Hoglah (hog'luh; Heb., "partridge"), the third named daughter of Zelophehad (Num. 26:33; 27:1; 36:11; Josh. 17:3), a member of the tribe of Manasseh. The name also occurs as part of a compound place-name (Beth-hoglah, Josh. 15:6); and it also appears in eighth-century B.C. ostraca inscriptions from Samaria.

holiness, a term in Hebrew probably meaning separate from the ordinary or profane. Also in Hebrew and in Greek "holy" implies connection with God or the divine. Thus, God is holy and people, things, and actions may be holy by association with God. Holiness may also include the ideas of consecration to God and purity from what is evil or improper.

In the OT: In the OT God is the Holy One par excellence. Israel's earliest hymn praises God as "majestic in holiness" (Exod. 15:11). Both Psalms and Isaiah frequently refer to God as the Holy One (Isa. 1:4; 5:19; Ps. 99) and in Isaiah's vision of the heavenly court the angels sing praise to God as "Holy, holy, holy" (Isa. 6:3). Places where God appeared and was customarily worshiped were also holy. At the burning bush (Exod. 3:5) Moses is instructed to remove his shoes because he stands on holy ground. After Jacob receives a vision at Bethel, he consecrates it as a holy place (Gen. 28:11–22). Other ancient Israelite shrines were consecrated by similar contact with God. The Temple in Jerusalem was the most holy place in Israel because God's presence dwelled there (1 Kings 8:10–11). The equipment used in the Temple, including the jars, altars, candleholders, musical instruments, and vestments, were especially set aside and thus holy. The sacrificial animals and other food had to meet stringent requirements and once designated holy could not be returned to secular use. They were either burned on the altar or consumed by the priests in the Temple. The priests and other personnel of the Temple were holy and only they could enter certain parts of the Temple and perform the sacrifices and other ritual acts. Holiness extended to the rituals and the words used at the Temple, to the name of God (Lev. 20:3), to the Sabbath (Gen. 2:3), and to the other feasts (Lev. 23).

In addition to God and to Israel's worship practices, Israel itself is a holy nation (Exod. 19:4; Deut. 7:6). Israel's holiness depends on its adherence to God's commandments and avoidance of sin. The Holiness Code, a comprehensive series of ethical and ritual laws in Lev. 18–26, demands observance because of holiness: "You shall be holy; for I the Lord your God am holy" (Lev. 19:2).

The Pharisees and the latter rabbis extended the ritual holiness of the Temple and its food to the ordinary people who were urged to observe ritual purity in eating, sex, and celebration of festivals. The text of the Bible, which became a central symbol for a life consecrated to God and obedience to God's commandments, became holy (cf. Rom. 7:12), as did "every action done for the sake of Heaven."

In the NT: The NT reaffirms the ideas of holiness found in Judaism. God, the Temple, and the law are all holy. The physical Temple is deemphasized because Gentile Christians had moved away from the practice of Judaism and because the Temple was destroyed in A.D. 70. But the Temple occurs as a metaphor for Christian holiness (1 Cor. 3:17; 6:19). God is addressed as "Holy Father" by Jesus (John 17:11), praised in heaven by the threefold "Holy" of Isaiah (Rev. 4:6–10), and addressed by the petition of the Lord's Prayer, "Hallowed be thy name." Jesus is also called holy on numerous occasions because of his closeness to God. The unclean spirit recognizes Jesus as the Holy One of God (Mark 1:24), as does Peter (John 6:69). The angel announcing Jesus' birth to Mary says that the Holy Spirit and God's power will make the child holy (Luke 1:35) and the disciples preaching after

Jesus' death refer to him as holy (Acts 3:14; 4:27, 30), as does the book of Revelation (3:7).

The Holy Spirit plays a special role in the NT. The Spirit of God in the OT guided the prophets and other servants of God and was a manifestation of God's active power. However, in the NT the Holy Spirit acts as the continuing power and presence of Jesus in Luke and Acts, especially in the early days of the Jerusalem community. The Holy Spirit comes upon those who have believed in Jesus as a sign of God's power. In Paul's Letters the Holy Spirit is God's presence, which sanctifies and teaches (Rom. 15:13, 16; 1 Cor. 2:13). In John the Holy Spirit and Paraclete play a special role in strengthening and guiding the community in times of trouble (John 14:26).

Like Israel in the OT, the Christian community is holy. Paul addresses his communities as "the saints," that is, "the holy ones" (Rom. 1:7; 1 Cor. 1:2), and argues that believers consecrate one another holy (1 Cor. 7:14). The First Letter of Peter repeats the OT in calling the community a holy nation (2:9) and demanding that it be holy because God is holy (1:16). The Letter to the Ephesians compares the Gentiles to Israel and reaches a climax with the metaphor of the community as a holy temple in which God dwells in the Spirit (Eph. 2:19–22). In general, the Christian way of life derives from God and so is holy. Consequently, the community must avoid sin and evil and anything that would compromise its holiness and closeness to God. ***See also*** Holy Spirit, The; Purity; Sanctification; Worship. A.J.S.

Holophernes (hol´uh-fuhr´neez; possibly from Gk., "be crafty"), the chief protagonist of Judith in the apocryphal book Judith. Representing Nebuchadnezzar as his chief general (Jth. 2:4), Holophernes carried out various campaigns against Nebuchadnezzar's enemies (chap. 2), including Israel (chaps. 5–12). Judith, having captivated Holofernes' passion, beheaded the drunk general, thus earning her status as one of Israel's true heroines (chaps. 13–16).

Holy of Holies. ***See*** Tabernacle; Temple, The.

Holy One of Israel, the, a term for God. In the OT the phrase is used frequently by the Hebrew prophets, especially Isaiah, as a title for Yahweh, Israel's God (Isa. 1:4; 5:19, 24; 10:17, 20; 40:25; 41:14, 16, 20; 43:3, 14–15). The phrase also appears in the Psalms (71:22; 78:41; 89:18). In the NT, "Holy One of God" is applied to Jesus in Mark 1:24; Luke 4:34; and Acts 3:14 (cf. 1 John 2:20). ***See also*** Names of God in the New Testament; Names of God in the Old Testament.

Holy Sepulcher (of Jesus). ***See*** Burial; Calvary; Jerusalem.

Holy Spirit, the, the mysterious power or presence of God in nature or with individuals and communities, inspiring or empowering them with qualities they would not otherwise possess. The term "spirit" translates Hebrew (*ruach*) and Greek (*pneuma*) words denoting "wind," "breath," and, by extension, a life-giving element. With the adjective "holy," the reference is to the divine spirit, i.e., the Spirit of God.

Emphases in the OT: In the OT, three major emphases may be identified, the first of which is the Holy Spirit as an agent in creation. This is an almost impersonal representation of the Spirit by which the awesome power of God is depicted (e.g., Gen. 1:2; Ps. 33:6; Ezek. 37:1–10). The second is the Holy Spirit as a source of inspiration and power. In these instances (particularly evident in the stories of the judges, kings, and prophets), the Holy Spirit becomes a vehicle of God's revelation and activity. Israel's leaders—from Moses to Joshua, to the judges, to David and Solomon, to the enigmatic "Servant of God" of Isaiah 42—all receive their wisdom, courage, and power as gifts resulting from the possession of God's Spirit. The primary example, however, is surely the inspiration of the prophets, who, because they possess (or are possessed by) this Spirit, speak and act with an authority and power not their own (an element also illustrated by the occurrence of ecstatic phenomena, cf. 1 Sam. 10:9–13). In this connection, it should be noted that the Spirit can be conveyed from one person to another, as with Moses and Joshua, Saul and David, Elijah and Elisha. The third emphasis is the Holy Spirit as God's presence in the covenantal community. To some degree connected with eschatological hope and expectations of the sanctification of Israel, this aspect is a significant, if less frequently found, understanding of the Holy Spirit (see esp. Ezek. 11:14–21; 36:22–32).

In the NT: In the NT, a more diverse range of meaning for this term is to be seen. Although the earlier usage continues (it is the Spirit of God that endows Jesus with power as the Messiah [Matt. 3:13–17; Mark 1:9–11; Luke 3:21–22; Matt. 12:28; Luke 4:16–21] and that empowers the church for its mission [Acts 2]), the close relationship of Jesus to God (the incarnation) expands and significantly transforms the understanding of the Holy Spirit in Christianity (cf. the related expressions, "Spirit of Christ," "Spirit of the Lord," "Spirit of Jesus," and especially passages such as Gal. 4:6, where God sends "the Spirit of his Son" to the followers of Jesus). Indeed, although the doctrine of the Trinity is a later development, a number of NT passages suggest that the Holy Spirit is sent jointly from God and the Risen Christ (i.e., from the Father and the Son; cf. Acts 2:33). In keeping with this, the Holy Spirit comes to represent both the presence and activity of God and the continuing presence of Jesus Christ in the church. While not uniquely Johannine, this idea comes to fullest expression in John 14, where the Holy Spirit is described as a "Coun-

selor" (Paraclete) who represents both divine presence and guidance for the disciples.

Since this term is found in nearly every book of the NT, other nuances can, of course, be mentioned. In Acts, there is a close connection among four elements: the proclamation of the gospel, baptism, the laying on of hands, and the reception of the Holy Spirit. In both Acts and Paul's Letters, reception of the Holy Spirit brings the "gifts" needed for Christian ministry (as well as the gift of ecstatic speech) and extends the presence and power of Christ to each new generation of Christians. In Pauline thought, however, there is an additional dimension seen in the contrast of "flesh" with "spirit" as characteristic of life in the old age and the new age, respectively. The Spirit makes Christians one "in Christ" and empowers them, not only for the mission of the church, but also for the moral and ethical life appropriate to those who understand themselves to be people of the new age. ***See also*** Baptism; Creation; Flesh and Spirit; God; Incarnation; Inspiration; Jesus Christ; Laying On of Hands; Paraclete; Pentecost; Revelation; Sanctification; Spiritual Gifts; Tongues as of Fire; Tongues, Speaking with; Trinity, The. T.R.W.L.

holy war, a basic component of covenant theology that emphasizes Yahweh's role as deliverer, protector, and judge of his chosen people Israel and their concomitant response of faith and specified ritual. In ancient Israel, as among all people of antiquity, there was no separation between religious and secular spheres. All aspects of life, including war, were linked with religion. Up to the time of the monarchy (tenth century B.C.) every war, therefore, was a holy war, or, in the preferred terminology of the OT, a war of Yahweh (Num. 21:14), and all references to it are suffused with religious terminology. It was the means by which Yahweh guided his people into that condition of well-being the OT calls peace. As such it differs markedly from the modern understanding of the term, for it always conveys the idea of Yahweh fighting for Israel, not of Israel fighting to spread or defend its belief in Yahweh. Yahweh, however, is not merely a victory God for Israel. The OT repeatedly stresses that when Israel forgets its proper covenant response, war becomes Yahweh's means of judgment upon his own people. The earliest instance of holy war in the OT is recorded in the description of the Exodus, when the Egyptian army pursues Israel and is destroyed as Yahweh had said it would be (Exod. 14). The concept of holy war flourished during the settlement of the land when Israel encountered repeated foreign invasions of its territory, but it changed considerably under the monarchy when it was the king who instigated wars to serve national policy. The classical prophets often criticized such wars because they were not the wars of Yahweh. They do not totally abandon the institution of holy war, however. For them it becomes eschatological, descriptive of the decisive struggle that will take place at the end of time. The apocalyptic sections of the NT echo this view of the OT prophets (e.g., Rev. 19:11–15). M.M.S.

homosexuality, a word for which there is no specific equivalent in the Hebrew OT or the Greek NT, since the concept itself, as well as the English word, originated only in the nineteenth century. Nevertheless, there are a few biblical references to persons of the same sex who engage in sexual intercourse.

The most explicit OT references to such a practice are in the "Holiness Code" of Leviticus, where, under penalty of death, a male is strictly prohibited from lying with another male as a woman does (Lev. 18:22; 20:13). This and other provisions in the code may have been prompted by a concern that Israel not adopt the ways of Egypt and Canaan (see Lev. 18:3–4). Neither here nor elsewhere in the OT is female homosexuality mentioned. Despite the fact that from postbiblical times up to the present the terms "sodomy" and "sodomite" have been used of homosexual practices in general, the story in Gen. 19:1–29 involves only the more specific case of intended gang rape—of Lot's angelic visitors by the men of Sodom (cf. a parallel incident in Judges 19). Elsewhere in the OT, Sodom symbolizes not "homosexuality" but immorality in general, as in Ezek. 16:49–50 (gluttony and various forms of social injustice). If there is any identification of Sodom with homosexuality in the NT, it is in Jude 7 (cf. 2 Pet. 2:6–8), but it is more likely that the "unnatural lust" mentioned there is that of mortals for angels (Lot's visitors).

That the female and male cultic prostitution proscribed in Deut. 23:17–18 involved homosexuality is doubtful. It is difficult to understand how homosexual prostitution could have had any symbolic function in the Canaanite fertility religion, against the practices of which this legislation was directed. The same may be said of the cultic prostitution mentioned elsewhere (e.g., 1 Kings 14:22–24).

Two of the three relatively clear NT references to homosexual practice occur in more or less traditional lists of vices. The noun listed after "adulterers" in 1 Cor. 6:9 literally means "soft" and was sometimes applied to the male who remained passive during homosexual intercourse. The following word in the list was perhaps coined in Hellenistic Judaism on the basis of the Greek text of Lev. 18:22 and 20:13 and literally means "(a male) lying with a male," as the one who takes the active role in homosexual intercourse. This second term is also among the vices listed in 1 Tim. 1:10.

The most extensive biblical reference, and the only one to female homosexuality, is in Rom. 1:26–27. There, such activity is mentioned as one example of the perversions that follow when humankind refuses to give glory and thanks to the one sovereign God (see Rom. 1:18–25, 28–32). Paul's association of homosexual practice with "degrading passions" and actions that are "contrary to nature" suggests that he shared the presuppositions about homosexuality that are reflected in certain pagan and many Hellenistic-Jewish writings of his day. ***See also*** Harlot; Law; Leviticus; Sodomy. V.P.F.

honey, viscid sweetener produced by several bees of *Apis* genus. Biblical references include those to domestic or cultivated honey (2 Chron. 31:5); wild honey recovered from among rocks (Deut. 32:13), from trees (1 Sam. 14:25–26), or even from an animal carcass (Judg. 14:8–9); and honey from grapes or dates (Arabic *dibs*). It was basic fare in the wilderness ("locusts and wild honey," Mark 1:6), and it symbolizes both rich productive land (Exod. 3:17), deceitful enticement (Prov. 5:3), and the ultimate in sweetness (Ps. 119:103). Though frequently used as a sacrifice material, it was forbidden as part of burnt offerings (Lev. 2:11).

hope, in the Bible the expectation of a favorable future under God's direction.

Hope in the Old Testament: In the OT there is no easy correspondence between the NT words for hope (Gk. *elpis/elpizein*) and any specific Hebrew word, although the most frequent expression of the concept may lie with the Hebrew verbs "to wait, to expect" (*kawah*), and "to be full of confidence, to trust" (*batah*). The present survey is limited to this word group and does not include the larger area of eschatology in general.

The prophet Jeremiah speaks for much of the OT tradition when he utters: "O Lord, the hope of Israel, all who forsake thee shall be put to shame; those who turn away from thee shall be written in the earth, for they have forsaken the Lord, the fountain of living water" (17:13; see also 14:8). This text asserts that God is not only the hope of the nation but of the individual as well, a thought also echoed in Ps. 71:5: "For thou, O Lord, art my hope, my trust, O Lord, from my youth." God's loving-kindness (Heb. *hesed*), revealed in repeated deeds of fidelity (Exod. 6:4–8), gives the people of Israel confidence that he will fulfill his promises in the future; thus, he is the basis of all hope. God will continue to pour out his loving-kindness as long as Israel places its hope in him (Ps. 33:18: "Behold, the eye of the Lord is on those who fear him, on those who hope in his steadfast love . . . "). Thus he is the source of Israel's true hope and can be called upon as their rock (Isa. 26:4; Ps. 18:2) and the refuge of the poor and righteous (Ps. 94:22). False hope, that is, hope in anyone or anything other than God, leads to chaos and disaster. Neither weapons of war (Hos. 10:13) nor wealth (Ps. 49:5–9) nor idols (Isa. 44:9–11) can give lasting security.

When Israel was destroyed by the Assyrians in 721 B.C. and Judah destroyed by Babylonians in 587 B.C., there were a variety of prophetic responses and warnings. Perhaps the most negative is that of Amos who warned his people that their hope was misguided: "Woe to you who desire the day of the Lord! Why would you have the day of the Lord? It is darkness, and not light . . . " (5:18). Isaiah sternly warned against foreign alliances (31:1–9) as an avenue of hope, and Ezekiel revealed a vision in which it is said, "Son of man, these bones are the whole house of Israel. Behold, they say, 'Our bones are dried up, and our hope is lost; we are clean cut off' " (37:11). Even in Ezekiel this hopelessness was balanced by a glimmer of hope, as the succeeding verses show (see also the theme of the new remembrance of the covenant in Ezek. 16:59–63 and 36:25–32), and the Deuteronomic editor of Amos could not resist adding prophecies of restoration at the very end of the book (9:11–15). This positive vision of restoration and hope in God despite the anticipated destruction is found in Hosea under the theme of the new covenant (2:17–20). It is well articulated by Jeremiah: "For I know the plans I have for you, says the Lord, plans for welfare and not for evil, to give you a future and a hope" (29:11). The classic formulation of this new covenant theme is found in Jer. 31:31–34 and mentioned in Isa. 55:3 as well. As in Israel's youth, so now in its period of destruction and exile, only hope in God and his loving-kindness can give it true security.

Hope in the New Testament: In the NT, the words for hope (Gk. *elpis/elpizein*) have no unique significance in either the synoptic Gospels or the Gospel of John. Only the verb form occurs. It is used in a purely secular sense (Luke 6:34; 23:8) or with specific regard to the OT and Israel. Thus Matt. 12:41 quotes Isa. 42:1–2; Luke 24:21 refers to the two disciples on the road to Emmaus lamenting that "we had hoped that he [Jesus] was the one to redeem Israel"; and in John 5:45 Jesus replies to the Jews that "it is Moses who accuses you, on whom you set your hope." In Acts the concept of hope, other than its purely secular use (16:19; 24:26; 27:20), always refers to the hope of Israel as culminating in "the resurrection of the Christ" (2:26; 23:6; 24:15; 26:6, 7; 28:20).

Paul's Letters: The broadest use of the words for hope and the most developed concept of hope is found in the Pauline Letters. Already in Paul's brief and earliest Letter, known as 1 Thessalonians, hope is referred to four times (1:3; 2:19; 4:13; 5:8), twice in the triadic formula of "faith, love, and hope" (1:3; 5:8). Paul, who is so affectionately bonded to this community of Christians (2:19: "For what is our hope or joy or

crown of boasting before our Lord Jesus at his coming? Is it not you?"), warns them not to grieve "as others do who have no hope" (4:13; see also the deutero-Pauline text in Eph. 2:12) and then proceeds to relate their belief that Jesus died and rose to the problem of those among them who had just recently died.

The fact that hope appears as part of the triadic formula "faith, love, and hope" not only in 1 Thessalonians but also in 1 Cor. 13:13, and somewhat more loosely in Gal. 5:5–6, suggests that it belongs to that process of new life in Christ that begins with faith and is fulfilled at the consummated salvation event of the last day. Thus hope emanates from faith and it reflects the guarantee (Gk. *arrabōn*; 2 Cor. 5:5) that what God has begun in Christ will be brought to consummation on the last day. The "good courage" (2 Cor. 5:6) nurtured by hope as a gift of the Spirit allows the believer to actualize faith through love (Gal. 5:6). Basic for Paul is the understanding that hope provides the essential linkage between the already/not-yet of the salvation event in Christ; hope assures the believers, provided they remain faithful to the kindness of Christ (Rom. 11:22; 1 Cor. 15:2), that what was begun in baptism will be completed at their resurrection.

Fundamental for Paul's concept of hope is the differentiation between justification and salvation; justification marks the beginning of the new life in Christ and sustains it to the end; salvation is the consummation of the gifts already experienced as a foretaste in baptism and in the living of the new life in Christ. This is precisely the point in Rom. 5:1–3, a most crucial text. What the Christian has obtained in this life is "access," not completed entrance, to God's grace, and the apostle rejoices in the "hope of sharing the glory of God" at the future consummation. The sign that the believer has access to this grace now is that "God's love has been poured into our hearts through the Holy Spirit which has been given to us." Thus Paul can assert that the ones in Christ who have "the first fruits of the Spirit, groan inwardly as we wait for adoption as sons, the redemption of our bodies. For in this hope we were saved" (Rom. 8:23–24). Rom. 8:18–25 is also an important text, for it shows, as all the authentic Pauline references to salvation do, that salvation has a future orientation and is not yet complete (see Rom. 5:9–10; Phil. 3:7–14). It further shows that God's revelation in Jesus Christ affects not only individuals, but creation itself, which God has subjected in hope "because the creation itself will be set free from its bondage to decay and obtain the glorious liberty of the children of God" (Rom. 8:19–21).

One of the important components in Paul's dynamic understanding of faith is hope. Since strong hope leads to strong faith rather than weak faith, Paul uses Abraham as an example in his exhortation in Romans 4, because in "hope he believed against hope, that he should become the father of many nations. . . . He did not weaken in faith. . . . No distrust made him waver concerning the promise of God, but he grew strong in his faith as he gave glory to God, fully convinced that God was able to do what he had promised" (Rom. 4:18–21; see also the deutero-Pauline text in Col. 1:23). The apostle can refer and point to this deeper understanding of hope by using a number of shorter formulations, such as "the God of hope" (Rom. 15:13), "abound in hope" (Rom. 15:13), and "rejoice in your hope" (Rom. 12:12). Also important to Paul is the relationship of the hope given in Christ to the hope expressed in the OT. Paul can write to the Christians in Rome that "whatever was written in former days was written for our instruction, that by steadfastness and by the encouragement of the scriptures we might have hope" (Rom. 15:4). For the believers in Christ that dimension of hope already present in the OT is made even more apparent in Christ, because in him the veil has been removed from the old covenant and thus the believers have become very bold in hope (2 Cor. 3:12–17; for a similar idea see also Heb. 7:19).

Other New Testament Writings: In other NT texts, the deutero-Pauline references stand relatively close to the Pauline usage (see in addition to the texts already cited Eph. 1:18; Col. 1:15 and 1 Tim. 4:10). Hebrews, with its theme that the church is the wandering people of God in sojourn between their earthly and heavenly home, also shapes the NT concept of hope. Thus, Christians must hold fast to their confidence until the end (3:6; 6:11; 10:23). Heb. 11:1 summarizes in a broader way the statements on hope in that writing, and Heb. 6:19, with its analogy of the anchor, concretizes the author's intention: "We have this as a sure and steadfast anchor of the soul, a hope that enters into the inner shrine behind the curtain, where Jesus has gone as a forerunner on our behalf, having become a high priest for ever after the order of Melchizedek." The theme of confidence in relationship to hope also appears in 1 Pet. 1:21. The congregation represented in 1 Peter lives in the midst of enormous difficulty, probably persecution, and the author urges them to "set your hope fully upon the grace that is coming to you at the revelation of Jesus Christ" (1:13). In the midst of their difficulties they should not fear their persecutors or be troubled by them, but they must always "be prepared to make a defense to any one who calls you to account for the hope that is in you . . . " (3:15). ***See also*** Faith; Love. K.P.D.

Hophni (hof'n*i*; Egyptian, "tadpole"), the brother of Phinehas, and the son of Eli, the priest at the tabernacle of the Lord in Shiloh in the days of Samuel. Hophni and his brother also served as priests at Shiloh, but they disgraced themselves. Even Eli was accused of honoring

his sons more than the Lord, so they were all condemned (1 Sam. 1–2). Their leadership gave way to Samuel's as the two sons were killed when the Ark of God was captured, and Eli died upon hearing the news (1 Sam. 4). ***See also*** Eli; Phinehas; Samuel.

Hor (hor), **Mount,** the mountain on which Aaron died and on which the Israelites gathered and camped on the border of Edom (Num. 20:22–29; 33:37–39). Traditionally it has been identified with modern Jebel Harun, overlooking Petra where there is a Muslim shrine. But this is unlikely because Jebel Harun is in the midst of Edom, and its high peaks are not conducive to the gathering of people. It is also identified as the northern boundary of Israel's inheritance (Num. 34:7, 8); perhaps Mt. Hermon is indicated.

Horeb (hor´eb), **Mount,** the name for Mt. Sinai used by the E and D writers of the Pentateuch, probably stemming from different tribal traditions. Here Moses was called (Exod. 3:1–12) and here he obtained water from the rock (Exod. 17:6–7). Here the Israelites made a covenant with Yahweh (Deut. 5:2), and from there they set out for Kadesh-barnea and Canaan (Deut. 1:19). Elijah fled to Horeb because of Jezebel's wrath. Since early Christian times Mt. Horeb/Sinai has been identified with modern Jebel Musa in southern Sinai, but there are no certain geographical data for this identity. ***See also*** Sinai. N.L.L.

Horesh (hor´esh; Heb., "forest"), a place in the Wilderness of Ziph used by David as a hiding place when in flight from Saul (1 Sam. 23:15–16, 18–19). Jonathan sought David out to reassure him, but some Ziphites reported David's presence to Saul, forcing David to move on. Ziph is located in the Judean wilderness southeast of Hebron. Some claim a specific site identification for Horesh, but others think its meaning ("forest") suggests a small region in the Ziph wilderness.

Horites (hor´īts), the pre-Edomite inhabitants of Seir (Gen. 14:6; 36:20–30; Deut. 2:12, 22), the chief mountain of Edom. The name was traditionally derived from Hebrew *khor,* "hole," and interpreted as meaning "cave dwellers," though there is little archaeological evidence for cave dwelling in Edom. Thus when nonbiblical texts revealed the important role the Hurrians played in Syria during the second millennium B.C., scholars attempted to connect the biblical Horites with the Hurrians of the Akkadian, Hittite, and Egyptian texts. Phonetically the names are identical, but two difficulties make the historical equation doubtful: first, the names of the Horites listed in Genesis 36 are all Semitic, not Hurrian; and, second, while the Hurrians, who first appeared in northern Mesopotamia around 1800 B.C. and were later organized under the empire of Mitanni, did expand into Cisjordan (i.e., the land west of the Jordan River), where there were Hurrian garrisons in the early fifteenth century B.C., they did not enter southern Transjordan (i.e., the land east of the Jordan River).

The Hivites, however, do appear in regions where the nonbiblical texts make the presence of Hurrians plausible—at Schechem (Gen. 34:2), at Gibeon (Josh. 9:7, 19), at the foot of Mount Hermon (Josh. 11:3), and on Mount Lebanon (Judg. 3:3)—and there is some evidence for the identification of Hivites and Horites. Zibeon the Hivite (Gen. 36:2) is listed among the Horites in Gen. 36:20, 29, and some texts of the Septuagint read "Horite" for "Hivite" in Gen. 34:2 and Josh. 9:7. Thus some scholars suggest that the biblical tradition has simply switched the terms "Horite" and "Hivite." Others identify the Hivites with the Hurrians of Cisjordan, assume there was a distinct people in Edom with a homophonous name, and explain the use of "Hivite" to designate the Hurrians of Cisjordan as a gradual development to avoid confusion between the two different Hurrian peoples.

A more likely reason for the identity in name between the biblical Horites and the nonbiblical Hurrians lies in the peculiar Israelite use of earlier nomenclature. Canaan and Hor were both traditional names for Cisjordan. Israel used the term "Canaan" for that region, and since they had no traditional designation for southern Transjordan, they adopted the superfluous term "Hor." Thus the inhabitants of this region became Horites, but with little historical basis. ***See also*** Mitanni. J.J.M.R.

Hormah (hor´muh; Heb., "destruction" or "accursed"), a city in the region of Judea, close to the border with Edom. In their first attempt to take the city the Israelites were defeated by the Canaanites and Amalek (Num. 14:45; Deut. 1:44). It was later subdued by Joshua in the conquest and was initially allotted to the tribe of Judah (Josh. 15:30). Later it was considered the land of the tribe of Simeon (Josh. 19:4; 1 Chron. 4:30; Josh. 12:14). It was a center of Davidic sympathizers and thus received some of the spoils of his activity (1 Sam. 30:30). The location of the site remains uncertain. Further, since Hormah means "destruction" and the place is unclear, modern OT scholars such as Martin Noth and Albrecht Alt argue that the Joshua accounts concerning Hormah are etiological (i.e., explain the nature of what they name). S.B.R.

horn, a word used both literally and symbolically in the Bible. **1** The bony projection from the head of various animals: for example, of a ram (Gen. 22:13); of a bull (Ps. 69:31). **2** A musical instrument made from a ram's horn (Heb. *shophar*); it was used in worship (e.g., 2 Chron. 15:14) as well as in war (e.g., Josh. 6:4–13; since

the two terms for such musical instruments used in this passage both mean "horn," the RSV translation "trumpets" in v. 5 is misleading). **3** The projection at each of the four corners of an altar (Exod. 27:2; Rev. 9:13); the precise significance of the symbolism here is not known, however. The instruction to put some blood of a sacrificed bull on the altar horns (Lev. 4:7) attests to their importance in Israel's religious ritual of animal sacrifice. People desiring asylum symbolized that desire by clinging to the altar's horns (1 Kings 1:50–51; 2:28–34). Persons accused of manslaughter may have sought such asylum at the altar (Exod. 21:14 says it is to be denied), but specific provision for such places of safety was made by means of cities of refuge (e.g., Num. 35:9–28) rather than by means of altars. Altars as places of sanctuary are nowhere specifically mentioned. **4** A receptacle for liquids: for the oil kept in the shrine (1 Kings 1:39) and used for anointing kings (1 Sam. 16:1, 13); perhaps for eye make-up ("horn of paint" is the literal meaning of the name of Job's third daughter, Job 42:14); and for ink (Ezek. 9:2–11). **5** A symbol of power, whether in animals (e.g., wild ox, Num. 23:22; Deut. 33:17) or human beings (iron horns symbolize a king's victory in war, 1 Kings 22:11). The term "horn of salvation" denotes royal saving power (e.g., Ps. 18:2; Ecclus. 49:5; cf. Luke 1:69). A further development of this theme is found in the use of "horn" for "king" in the visions in Daniel 7–8, where the horns refer to specific rulers. In the Revelation to John horn signifies supernatural power: the power of the lamb (5:6), of the dragon (12:13), of the beast from the sea (13:1), of the beast from the earth (13:11), and of the scarlet beast upon which a woman sits (17:3–16). Moses' shining face when he descended from Sinai and the presence of God (Exod. 34:29–35) is described in Hab. 3:4 ("rays of light") with a word that could be connected with the word for "horn" (Heb. *qeren*). That led the Latin Vulgate translation to assume Moses had "horns of light," a figure given literal representation in Michelangelo's statue of Moses. **6** The crown of a hill, or the hill itself (e.g., Isa. 5:1). P.R.A.

hornet, an insect of the order *Hymenoptera,* larger and more dangerous than a wasp, probably *Vespa orientalis.* The Hebrew term for hornet also means "depression, discouragement." In Josh. 24:12; Exod. 23:28; and Deut. 7:20 the term could have a literal meaning or it may symbolize God's intervention on Israel's behalf.

Horonaim (hor´uh-nay˝im), a Moabite city mentioned by both Isaiah (15:5) and Jeremiah (48:3, 5, 34); from the other place names mentioned in these passages, it was probably located in the southern part of Moab and has been identified by some scholars as modern el-Iraq, about nine miles east of the southeast corner of the Dead Sea, although this identification is questionable. The city appears in the Mesha Inscription (Moabite Stone) as being recaptured by King Mesha of Moab from an unidentified enemy (the tablet is damaged here), most likely the Israelites who are mentioned elsewhere in the inscription (see 1 Kings 3:4). ***See also*** Mesha; Moab; Moabite Stone, The. D.R.B.

horse, a large solid-hoofed mammal. The horse (*Equus caballus*) was first domesticated in the Eurasian steppes, probably around 3000 B.C. Horses were introduced into Palestine by the Hyksos in the first half of the second millennium B.C. With their horse-drawn chariots the Hyksos managed to besiege the whole Near East. Horse burials, probably sacrificial, were found at Tell el-'Ajjul some four miles southwest of Gaza, and attributed to this period.

The first biblical reference to the horse is in Gen. 47:17, where Joseph trades horses and other livestock for food for his starving people in Egypt. In the Bible the horse is a symbol of power and most often associated with war. Even the heavenly armies are equipped with war horses (Rev. 19:11, 14). In contrast, the ass seems to signify peace (Zech. 9:9; Matt. 21:1–7). It appears that for this reason the Hebrews were forbidden to keep horses on a large scale. In Deut. 17:14–16 Moses tells the Israelites that if they elect a king, they should make sure that he does not "multiply horses for himself" or buy horses from Egypt, in other words, build up an army. Samuel (1 Sam. 8:11–17) repeats this warning and impresses on them that, should they insist on a king, their sons will be needed to equip the war chariots. For a while this warning seems to have been observed, as Joshua killed the horses he had taken from the Canaanites (Josh. 11:9) and David disposed of the horses he had captured, except for a hundred chariot teams (2 Sam. 8:4). King Solomon, on

A galloping horse bearing a Scythian rider served as a handle on the lid of a copper jar dating to the fifth century B.C.

the other hand, is reported to have had stables for four thousand horses (2 Chron. 9:25) or even forty thousand (1 Kings 4:26). He also imported horses from Egypt and other places (2 Chron. 9:28) and fed them on straw and barley (1 Kings 4:28). Later King Hezekiah was offered two thousand horses by the general of the Assyrian king Sennacherib (2 Kings 18:23).

Horse-drawn chariots were not only used for warfare but also constituted a very noble and honorable means of transport. Joseph was provided with a chariot by Pharaoh as a special sign of honor (Gen. 41:43) and Jacob's dead body was brought back to Canaan accompanied by horses and chariots (Gen. 50:9). Similarly the body of King Amaziah of Judah was returned to Jerusalem in a war chariot (2 Kings 14:20), and the eunuch, a royal minister with whom Philip spoke, was traveling by chariot (Acts 8:27–28).

In later times horses must have been quite common in Palestine, for a so-called Horse Gate existed in Jerusalem and the royal palace was equipped with a special entrance for horses (2 Chron. 23:15). The exiles on their return from Babylon brought with them 736 horses (Neh. 7:68) and according to Ezek. 27:14 horses were also imported from Togarmah (Armenia).

A very vivid description of how the horse acts on the battlefield is given in Job 39:19–25. The fear inspired by the war horse is reflected when supernatural afflictions are pictured as being brought by horsemen (Rev. 6:2–8). Ps. 32:9 demands, "Be not like a horse or a mule without understanding, which must be curbed with bit and bridle" (cf. James 3:3).

Equines other than the horse are also featured in the Bible. The ass or donkey (*Equus asinus*) reached Palestine in the fourth millennium B.C. from Egypt, where it had been domesticated. It was used as a riding animal not only for the poor, but also for the well-to-do (Judg. 1:14) and even kings (Zech. 9:9; cf. Matt. 21:5).

The onager (*Equus hemionus*) or semi-ass roamed the Syrian steppes until the nineteenth century. The Sumerians used these animals, which were tamed but not domesticated, to pull four-wheeled chariots. This is evidenced by the famous standard from the third millennium B.C. found at the Royal Cemetery at Ur.

The mule, a cross between a horse mare and a donkey stallion, was the beast of burden par excellence. As the Hebrews were forbidden to crossbreed animals (Lev. 19:19), they probably imported mules. I.U.K.

horseleach. ***See*** Leech.

Hosah (hoh´suh; Heb., "refuge" or "protection"). **1** A porter (gatekeeper) in the time of David (1 Chron. 16:38; 26:10). **2** A village of Asher (Josh. 19:29), possibly the same as Uzu near Tyre.

hosanna (hoh-zan´uh), a Hebrew expression of two words meaning "Save, I [we] pray" (Ps. 118:25) but transliterated as one word in Greek and then English. Ps. 118:25 was recited once daily for six days in the liturgy of the Feast of Tabernacles (Booths) but seven times on the seventh day as branches were waved (*M. Sukka* 4.5). The Psalm became associated with messianic expectations (vv. 25–26: "Hosanna . . . blessed be he who enters in the name of the Lord"). In the gospels, Jesus is hailed as Messiah by use of the words of Ps. 118:25–26 as he enters Jerusalem (John 12:13; with variations in Matt. 21:9, 15; Mark 11:9–10; Luke 19:38). ***See also*** Feasts, Festivals, and Fasts; Palm Sunday; Tabernacles, Festival of. A.J.H.

Hosea (hoh-zay´uh; Heb., "[God] has saved"), **the Book of,** the first book of the Minor Prophets (the twenty-eighth book in the Christian OT and the fifteenth book of the Jewish Bible). Hosea, the son of Beeri, was active in the last years of the Northern Kingdom. His Hebrew name is the same as that of the Northern Kingdom's last king (usually spelled Hoshea in English; the Hoshea of Num. 13:8 and Deut. 32:44 is a reference to Joshua).

Date: Although it is difficult for scholars to pinpoint the exact dates of Hosea's prophetic career, most agree that it extended from the middle of the eighth century B.C. to near the end of the Northern Kingdom. Whether he lived to the fall of Samaria in 721 B.C. is not known. Moreover, while this temporal range makes good historical sense, there are few explicit textual references for precisely dating specific prophecies—though scholars have made bold attempts to concretize them. Thus, texts like Hos. 7:11; 9:13; and 12:1 (Heb. v. 2) have been interpreted as reflecting the attempt of King Hoshea to seek out the support of Egypt against Assyria; and 13:10, 15 has been taken, correspondingly, as referring to Assyria's subsequent punishment.

Author: Like the precise dates of Hosea's prophecies, the details of his life are also in question. Thus, even the opening unit (chaps. 1–3), which deals with a marriage between the prophet and one Gomer and their subsequent divorce and remarriage (an episode symbolizing the relationship between God and Israel), is contradictory (cf. chaps. 1–2 with 3) and subject to various interpretations, including nonhistorical ones (i.e., that the episode is a dream or parable). Further, the details of the abominations and sins described in chaps. 4–9 cannot be precisely fixed with respect to Israelite history or the prophet's life. Chaps. 10–13 deal with God's oracles of judgment on Israel and express other aspects of the complex relationship between God and Israel. Chap. 14 concludes the book with an appeal for repentance and hope for restoration. Because of divergences in tone, voice, and content, some modern scholars have

separated Hosea 1–3 from 4–14, seeing the latter as a deutero-Hosean anthology. Others have thought that hopeful passages, such as 11:8–11, could not be authentic. However, Hosea's use of the past to prefigure the future and his repeated use of Exodus imagery would seem to weaken this position, which has not won wide support. Most scholars prefer to treat the entire work as the prophecies of one prophet. More recently, a great deal of attention has been devoted to discerning evidence of a Judean editor, particularly in the book's opening and closing verses, as well as other stages in its development.

Themes: Hosea shares many themes with other classical prophets and, like them, uses symbolic names and actions. Three of his children are called Jezreel, Lo-ruhamah (Heb., "unloved"), and Lo-ammi (Heb., "not my people"), indicating God's warning to Israel. He describes God's anger at Israel's sins, which include ethical misbehavior (4:2; 10:13) and excessive reliance on both cultic activity (8:13) and military capability (10:13). Because of this, he warns, God will punish the nation, bringing destruction to the land (10:7–8) and removing its inhabitants (9:3).

As the only native of Israel's Northern Kingdom among the literary prophets, Hosea's linguistic idiosyncrasies may reflect a northern dialect of Hebrew. His prophecy is characterized by its extensive use of Israelite historical traditions (see, e.g., 12:3–4 [Heb. vv. 4–5], which refers to the patriarch Jacob). Primary among these are references to the Exodus and the wilderness wanderings: God brought Israel out of Egypt (11:1), but the people proved unfaithful even before reaching the promised land (9:10). Once there, they failed to recognize the true source of success (13:1–6), ascribing it to Baal, the local god (11:1–2). The past is important not only for its theological implications, but also as prefiguring the future. As a punishment, Israel will return to Egypt (8:13; 9:3). God will seduce them back into the wilderness, where Israel will answer "as in the days of her youth" (2:14–15; Heb. vv. 16–17). Chap. 2 suggests that God will make the desert bloom so that Israel cannot again make the mistake of thinking that the land's produce comes from Baal (see also 13:4–8).

Israelite apostasy, manifest particularly through idolatry, forms of divination, and various fertility rituals (cf. 4:12–19), constitutes the major concern of Hosea, whose marriage to a prostitute named Gomer is used to symbolize God's relationship with unfaithful Israel. Although scholars differ in their understanding of the relationship between the accounts in chaps. 1 and 3 and whether they are to be understood as factual or visionary, both describe Israel's lack of fidelity to God as adultery. In keeping with this marital imagery, Hosea looks forward to a new honeymoon in the desert (2:14–15; Heb. vv. 16–17) and a time when Israel will no longer speak of God as her master (Heb. *ba'al*), but as her husband (*'ish*), a hint that at one time it may have been acceptable to speak of God as *ba'al*, a usage that became unacceptable after that term was associated with a Canaanite god as well. Hosea's apparent condemnation of those who idolize the golden calves at Bethel and Dan (8:5–6) suggests a similar development, whereby a once legitimate cultic object came to be used for idolatrous purposes. (A similar process took place with regard to the bronze serpent, originally made by Moses at God's command [Num. 21:8–9], but destroyed by Judah's King Hezekiah after it had become an object of worship [2 Kings 18:4].) In addition to the marital imagery, Hosea also portrays the divine-human relationship in such images as father-son (11:1–3), physician-patient (7:1), and fowler-birds (7:12). ***See also*** Amos, The Book of; Prophet.

OUTLINE OF CONTENTS

The Book of Hosea

I. Hosea's marriage: symbol of God's relationship with Israel (1:1–3:5)
   A. Hosea's family: God's judgment (1:1–2:1; Heb. 2:3)
   B. God and Israel: warnings of judgment for unfaithfulness and promise of restoration (2:2–23; Heb. 2:4–25)
   C. The husband's love (Hosea and God; 3:1–5)

II. Israel's unfaithfulness to God and its consequences (4:1–13:16)
   A. Charges of infidelity against people and leaders (4:1–5:7)
   B. Warnings of punishment until repentance occurs (5:8–6:4)
   C. Pervasiveness of Israel's transgressions, geographical, ethical, political, cultic (6:5–8:14)
   D. Judgment in light of Israel's history with God (9:1–13:16; Heb. 14:1)

III. Israel after judgment (14:1–9; Heb. 14:2–10)
   A. Call to repentance and promise of restoration (14:1–8; Heb. 14:2–9)
   B. Instruction for the reader to take heed (14:9; Heb. 14:10)

Wolff, H. W. *Hosea*. Philadelphia: Fortress, 1974.

F.E.G.

hosen, a dialect plural of "hose," a form of leg clothing. In Dan. 3:21 the KJV translates the Aramaic *paṭiš* as "hosen." The RSV translates "tunics" based on the garment series there.

Hoshea (hoh-shee'uh; Heb., "salvation"). **1** The original name of Joshua (Num. 13:8; cf. Deut. 32:44). **2** The last king of Israel (ca. 732–724 B.C.), the son of Elah (2 Kings 15:30), and a contemporary of Ahaz and Hezekiah. Hoshea usurped the throne by murdering Pekah and served as a vassal ruler to Tiglath-pileser III and, after his death (727), to Shalmaneser V of Assyria. Shalmaneser "found treachery" in Hoshea, however, when he withheld tribute and instead turned for aid to the Egyptian king "So" (probably Tefnakhte I of Sais, 2 Kings 17:4). Egyptian aid never materialized and Samaria was taken by Sargon II after a siege of three years. The ultimate fate of Hoshea is not known. **3** The prophet whose Hebrew name has been commonly spelled in English as Hosea. **4** An Ephraimite chief in David's bureaucracy (1 Chron. 27:20). **5** A Levite who with others set his seal to the covenant in the time of Nehemiah (Neh. 10:23). D.L.C.

hospitality, the act of friendship shown a visitor. Hospitality in the ancient Near East was tightly bound up in customs and practices which all were expected to observe. As in an intricately choreographed dance, where any participant who does not observe his or her role must either learn it, or leave the dance if the whole is not to be jeopardized, so it was with the customs of ancient hospitality. One ignored the customs at one's own peril. To try to understand those carefully structured and rigidly observed practices in terms of the relative informality of modern Western practices of hospitality would be completely to misunderstand them.

In the ancient Near East, hospitality was the process of "receiving" outsiders and changing them from strangers to guests. Hospitality thus differed from entertaining family and friends. If strangers were not to be entirely ignored (or worse) either physically or socially (see Matt. 10:14–23), the reception occurred in three stages:

Testing the Stranger: Strangers pose a threat to any community since they are potentially harmful. Hence they must be tested both on how they may fit in and whether they will subscribe to the community's norms. Officials (Josh. 2:2) or concerned citizenry (Gen. 19:5) could conduct such tests; an invading outsider must be repelled (Mark 5:17; the Gerasenes ask the "stranger" Jesus to leave). An invitation to speak can be a test (Acts 13:14–15), while letters of recommendation can excuse from a test, although not always (e.g., 2 and 3 John; Rom. 16:3–16; 1 Thess. 5:12–13). The ritual of foot washing marks the movement from stranger to guest (see Gen. 18:4; 19:2; 24:32; lacking in Luke 7:36–50).

The Stranger as Guest: Since transient strangers lacked customary or legal standing within the visited community, it was imperative that they be under the protection of a patron, a host, who was an established community member. Through a personal bond with the host (something inns could not offer), strangers were incorporated as guests or clients/protégés. To offend the stranger become guest was to offend the host, who was protector and patron of the guest (poignantly underscored in the case of Lot, Gen. 19:1–10). Yet such patronage could yield more trouble than honor (e.g., Prov. 6:1).

A guest could infringe the requirements of hospitality by insulting the host or by any show of hostility or rivalry either toward the host or other guests; a guest must honor the host (when Jesus eats with sinners he neither accuses them of being sinners nor asks them to change, Matt. 9:10; Luke 5:29). The guest must not usurp the role of the host, e.g., make oneself at home when not yet invited to do so (in the home of another, Jesus heals only when asked, Mark 1:30), or take precedence (see Luke 14:8), or give orders to the dependents of the host, or demand or take what is not offered (see Luke 7:36–50, where Jesus is the perfect guest; Mark 6:10 and parallels with its rules for traveling disciples). By refusing what has been offered, the guest infringes the role of guest. The guest is above all bound to accept food (see Luke 10:18); the directives to disciples for their travels in Mark 6:8 require them to accept patronage (see 1 Cor. 9:4).

On the other hand, a host could infringe the requirements of hospitality by insulting the guests or by any show of hostility or rivalry, or by neglecting to protect the guests and their honor, for guests individually are the responsibility of the host. Thus while fellow guests have no explicit relationship, they were bound to forego hostilities, since they offended their host in the act of offending one another. The host had to defend each against the other since both were his guests (thus Paul's problem at the Lord's supper in 1 Cor. 11:17–34). The host could not fail to attend to the guests, to grant them the precedence that was their due or to show concern for their needs and wishes, or in general to earn the good will guests were supposed to show. Thus in Luke 7:36–50, Simon the Pharisee fails on all counts with his guest, Jesus: no foot washing; no kiss; no anointing; no keeping away the sinful woman; the parable in Luke 7:40–41 represents Jesus' defense of his honor as guest. Finally, failure to offer the best is to denigrate the guest (John 2:10).

A host's infringing these requirements assures that a stranger will rarely, if ever, reciprocate hospitality. Hence the necessity and value of observing rules of hospitality (Matt. 25:38) and avoiding their infringement (Matt. 25:43).

While hospitality entails reciprocity between individuals, it can also be viewed as a reciprocal relationship between communities. Such hospitality to traveling Christians was both

urged (see Rom. 12:13; 1 Pet. 4:9) and much practiced (e.g., Acts 17:7; 21:17; 28:7; Rom. 16:23).

From Guest to Transformed Stranger: The stranger-guest will leave the host either as friend or enemy. If as friend, the guest will spread the praises of the host (e.g., 1 Thess. 1:9; Phil. 5:16), notably to those sending the stranger (e.g., Mark 9:37). If as enemy, the one aggrieved will have to get satisfaction (e.g., 3 John).

It is probably in this context of the practice of hospitality that the meaning of John 1:10, "his own received him not," may best be understood. B.J.M.

host, a term referring to multitudes or armies. A title given the God of Israel is the "Lord of Hosts" (1 Sam. 17:45). The armies may be those of Israel or those of heaven, the latter made up of angels and other beings depicted in God's retinue or court (1 Kings 22:19; Isa. 6:1–5). Associated with the heavenly hosts are heavenly bodies (Judg. 5:20) and the forces of nature (Amos 4:13).

hour. *See* Time.

house. 1 The ordinary dwelling unit of the settled population. The Bible offers numerous references to specific parts of houses, such as roofs, upper rooms, doors, courtyards, but it gives no full description of a typical house. The supplementary evidence provided by archaeology makes it possible to trace at least the general development and characteristics of the house in Palestine, although information is not complete for every period and is based essentially upon preserved foundations and partial walls.

The Mesolithic peoples were the pioneering settlers who built the first houses in Palestine in the eighth millennium B.C. Beidha and Jericho furnish a good sequence of progress in building, from the earliest semisubterranean houses through periods of free-standing round houses to the fully evolved rectangular architecture of the Neolithic period (8000–4500 B.C.). Differences in style were influenced by a combination of factors: environment, which determined both materials and available space; new ideas and techniques spreading along with trade; and migrations of newcomers.

Four-room house discovered in the Iron Age II (1000–701 B.C.) ruins at Beer-sheba.

In the Early Bronze Age (3000–2000 B.C.) distinctive types of houses appear. The earlier ones feature solid walls and rooms with one rounded or apsidal end. The form that came to dominate the period was a rectangular house with the entrance on one of the longer sides. Stone benches, the "furnishings" of the house, extended around the length of the walls, and there was usually a flat stone slab serving as a table in the center. The size of the houses varied considerably. It is difficult to ascertain the general appearance of the houses since usually only the foundations remain. A terra-cotta model of a rectangular house discovered at Arad (about thirty-five miles south of Jerusalem) has therefore special value. It has no windows, indicating that the door was the only source of light, and the doorway itself reaches almost to the roof, suggesting that the height of the house was about that of a person.

The prosperity of the Middle Bronze Age (2000–1500 B.C.) is reflected in its architecture. Courtyard houses appear, ranging from single-room, one-story houses to multiple-room, two-story houses with an outer stairway rising to the second floor. All faced a courtyard, which contained a baking oven and a well. The courtyard house with its various arrangements of rooms seems to have continued throughout the Late Bronze Age (1500–1200 B.C.).

The nomadic Israelite tribes who settled in Palestine in the thirteenth and twelfth centuries B.C. at first copied this type of construction but in the course of time developed a distinctive Israelite style of building. This is known as the four-room house. Its principal feature was a back room the width of the building with three long rooms stemming forward from it. This form, with varied expansions and elaborations, continued from the end of the eleventh century B.C. to the destruction of Judah (586 B.C.). Most houses were two stories high, although two- and three-room, one-story houses are also found. The lower part of the wall was constructed of stone and the upper part of adobe brick or wood and was plastered with lime. The flat roofs were made of wooden beams filled in with dried mud and brushwood and, in the larger houses, were supported by rows of stone columns. The inhabitants generally lived in the upper story, although in the hot weather the roofs were used for sleeping. According to Deut. 22:8, a parapet was to be built around the roof as a safety precaution. The four-room plan has been found at numerous Iron Age (beginning in

1200 B.C.) sites, including Tell Beit Mirsim, Ai, Hazor, and Beer-sheba.

The growing social inequality between rich and poor, which was vehemently denounced by the eighth century prophets (e.g., Amos 6:4–6), seems to receive archaeological confirmation in certain excavations such as Tell el-Farah. In the tenth century B.C. all the houses were of the same size and arrangement. In the eighth century B.C. at the same site, the rich houses are larger, better built, and in a different quarter from the smaller, simpler houses of the poor, which were huddled together.

In the Hellenistic (333–63 B.C.) and Roman (63 B.C.–A.D. 324) periods marked changes in architecture occurred under Western influence. As yet there is little information about the houses of the common people, but recent excavations in Jerusalem have provided a good picture of how the wealthy lived in the days of Herod the Great (40–4 B.C.), with their homes resembling the magnificent mansions well known from the ruins in Pompeii (destroyed A.D. 79). One huge house, covering over 2000 square feet, has a series of rooms arranged around a central courtyard that contained four sunken ovens. Some houses have frescoed walls with ornamentation done in the decorative style of Pompeii. All of the excavated houses contained at least one cistern hewn into the bedrock, with the larger ones having many such water installations.

2 A term (Heb. *bêt;* Gk. *oikos, oikia*) with many extended uses in both the OT and NT. It can signify a family line, like "house of Levi" (Exod. 2:1) or a tribal group, like Israel (Num. 1:2). It is also used in a wider sense of domain, as in the house of slavery (Egypt in Exod. 13:3). By the "house of God" is meant an Israelite place of worship (Mark 2:26), sometimes called a house of prayer (Mark 11:17). In Heb. 3:3–6 the expression "house of God" is applied to the Christian community. ***See also*** Towns.

Beebe, H. K. "Ancient Palestinian Dwellings." *Biblical Archaeologist* 31 (1968):38–58. M.M.S.

Huldah (huhl'duh), a Jerusalemite prophetess. She was the wife of Shallum, keeper of the (king's) wardrobes during the reign of Josiah (639–609 B.C.). Consulted by Josiah's officials after discovery of a "scroll of Moses" in the Temple, Huldah prophesied the destruction of Jerusalem, adding that Josiah would die before the catastrophe. Huldah's prophecy helped spur vast religious reforms (2 Kings 22; 2 Chron. 34). ***See also*** Josiah; Prophet.

human being, a term traditionally translated by the generic "man." The Genesis creation accounts portray humans as part of the natural world but also specially related to God. As created, they are not divine but stand under God's authority. As uniquely created in his image, however, they are his agents in ruling other creatures and caring for the earth. Thus, the sexuality necessary to populate, rule, and care for the earth is not base but represents God's intention. Human superiority is also seen in Adam's naming the other creatures.

Human subordination to God appears both in God's creating Adam and Eve and in his command not to eat from the tree of the knowledge of good and evil. Eating would be deciding for themselves, apart from and against God, what constitutes good and evil. Disobedience broke fellowship with God and damaged relations between humans, with other creatures, and with the earth (Gen. 3). God's barring the way to the tree of life brought the penalty of death and averted the moral disaster of immortality in a state of sin.

In the OT, increasing sin brought increasing judgment (Gen. 6–7, 11, and throughout). But humans kept their superior dignity (Ps. 8), and God still valued them so highly that he acted to restore them to fellowship with himself. He sought Adam and Eve, called Abraham, initiated a covenant with Israel, sent prophets, and, in the NT gave his Son as a sacrifice for sin, raised him from death, and promised eternal life and the fullness of his Spirit to the faithful. Nevertheless, humans remain creatures. The ultimate aim of salvation is the glory of God the Creator and (now) Redeemer (Rom. 11:36; 1 Cor. 15:28). Paul presents Christ as the last Adam who perfectly exhibits God's glory (2 Cor. 4:4; cf. Col. 1:15) and heads up a new humanity of the faithful in Christ (Rom. 5:12–21).

As needed, regulations governing the relations of humans with God, one another, and the whole creation are prescribed throughout the Bible (e.g., Mosaic Law, messages of OT prophets, the Sermon on the Mount, and practical exhortations in NT Letters). Shifting circumstances produce changes, deletions, and additions designed to enhance the human condition with justice, love, and mercy. The emphasis falls on interrelations in family, clan, tribe, nation, and religious community, with little of the modern psychological stress on relationship to oneself. Individualism tends to grow somewhat from early to late in the Bible, but not at the expense of social units.

The Bible offers no systematic view of the individual human constitution. Indications that do appear are incidental to the interrelationships that entail thinking, feeling, and willing. Generally, the Bible suggests that humans have visible and invisible sides. The terminology, however, is mixed: on the one side, "flesh," "body," "members," "outer person"; on the other, "soul," "spirit," "mind," "inner person." And the two suit and interpenetrate each other, so that physical organs such as the heart, liver, kidneys, and bowels function on behalf of the inner consciousness. The brain does not get the credit modern science gives it, and clean distinctions among thinking, feeling, and willing

are absent (e.g., the heart thinks and wills, as well as feels).

When the breath of life departs, the body returns to dust and the person survives only as an unsubstantial shade. Because of Greek influence, distinctions between the visible and invisible sides of human beings and their separability become more explicit in the NT. But no denigration of physicality follows. Doctrines of Christ's incarnation and of bodily resurrection reaffirm the psychosomatic wholeness of human beings first indicated at creation. ***See also*** Body; Conscience; Flesh; Flesh and Spirit; Heart; Mind; Soul.

humility, in the biblical world a value that directs persons to stay within their inherited social status, specifically by not presuming on others and avoiding even the appearance of lording over another. Humble persons do not threaten or challenge another's rights, nor do they claim more for themselves than has been duly allotted them in life. They even stay a step below or behind their rightful status (e.g., the "unworthy" John the Baptist, Mark 1:7). Thus humility is a socially acknowledged claim to neutrality in the competition of life. Conversely, to attempt to better oneself at the expense of others, to acquire more than others, to strive for honors others currently enjoy are all instances of proud and arrogant behavior. God humbles such proud people (Matt. 23:12; Luke 18:14; see Deut. 8:2, 16), while he exalts the humble (Luke 1:52; 14:7–11); hence humility has precedence over honor (Prov. 15:33; 18:12). To humble or humiliate others is to shame them (e.g., Dinah in Gen. 34:2; Isa. 2:9, 11, 17). To humble or humiliate oneself is to declare oneself powerless to defend one's status (e.g., Phil. 2:9) and then to act accordingly—either factually by becoming powerless, like the lowborn, or ritually, by a rite in which the use of power is set aside, symbolized by behavior typical of the lowborn: fasting, rending garments, weeping, lamenting, confession (e.g., Lev. 26:41; 1 Kings 21:29; 2 Kings 22:8–20; Ps. 69:10). Such self-humiliation before God is praiseworthy (e.g., Prov. 3:34; James 4:10; 1 Pet. 5:5–6; 2 Cor. 12:21) and obtains God's help. While Jesus is no arrogant teacher (Matt. 11:29), he does not exhort to traditional self-humiliation but simply to avoid challenging the honor of others (Matt. 23:12; Luke 14:11; 18:14), in that way acting as though one were as powerless to do so as a child (Matt. 18:4). Such humility is highly valued (Eph. 4:2; Col. 3:12).

B.J.M.

hunting, an activity seldom mentioned in the Bible and apparently not a common occupation among the Israelites. Neither of the two men in the OT specifically designated as hunters, Nimrod (Gen. 10:9) and Esau (Gen. 25:27), were Israelites. Much more common for the Hebrews was the killing of game encountered by chance (Judg. 14:6) or the killing of wild animals that attacked the shepherd's flocks (lions and bears are mentioned specifically in 1 Sam. 17:34–37).

The typical weapons used for hunting included bow and arrow (Gen. 27:3), the sling and slingstone (1 Sam. 17:40, 49–50), and the shepherd's staff (1 Sam. 17:40). Egyptian paintings depict the use of hunting dogs, while Assyrian reliefs show noblemen in chariots hunting lions. The first-century A.D. Jewish historian Josephus tells us that Herod the Great enjoyed hunting on horseback (*Wars* 1.21.13).

Along with hunting, fishing (Isa. 19:8) and trapping birds with nets (Amos 3:5; Prov. 6:5; Pss. 91:3; 124:7) are mentioned.

Wild animals considered acceptable for food and thus apparently hunted included the hart, the gazelle, the roebuck, the wild goat, the ibex, the antelope, and the mountain sheep (all listed in Deut. 14:5). Forbidden to the Hebrews, but apparently acceptable to the Canaanites, were the hare and the wild pig (Lev. 11:6–7). ***See also*** Animals; Fish. J.F.D.

Spear hunting desert animals, including a lion and an ostrich, as depicted on an Assyrian cylinder seal; twelfth–tenth century B.C.

Hur (huhr), a name of uncertain derivation. **1** One of Israel's leaders during the wilderness sojourn, who helped govern the people at Sinai in Moses' absence (Exod. 24:14) and supported Moses' arms during the battle with the Amalekites (Exod. 17:10, 12). He evidently was the same Hur who was a descendant of Judah and grandfather of Bezalel, the craftsman who built the tabernacle (Exod. 31:2; 1 Chron. 2:19). **2** One of the five Midianite kings killed by Moses in Transjordan (Num. 31:8). **3** The father of Rephaiah, an official contemporary with Nehemiah (Neh. 3:9).

Huram (hyoor´uhm). ***See*** Hiram.

Hurrians (hoor´ree-uhnz). ***See*** Horites.

husband. ***See*** Family, The.

husbandman, an archaic term used in the KJV to refer to farmers as distinct from vinedressers (2 Chron. 26:10; 2 Kings 25:12; Jer. 52:16; Joel 1:11; Amos 5:16) and shepherds (Jer. 31:24; 51:23), but also sometimes to vinedressers (Gen. 9:20; Mark 12:1–9 and parallels; John 15:1f.). In Mark 12:1–9 the term is used metaphorically for the Jewish leadership.

Hushai (hoosh´*i*), an Archite who is called the "friend of David" (2 Sam. 15:32; 1 Chron. 23:33), although this is a technical term for an official of the king who served as a personal advisor (1 Kings 4:5; for the feminine counterpart, see Ps. 45:14). He remained loyal to David during Absalom's attempt to seize the throne and was sent by David back to Absalom as a spy (2 Sam. 15:32–37). He convinced Absalom of his loyalty and persuaded Absalom to take his counsel over the advice of Ahithophel, another advisor of David's who had joined Absalom's conspiracy. He then sent word to David of Absalom's plans, allowing David and his men to escape (2 Sam. 16:16–18; 17:5–22). He is probably the same person mentioned as the father of Baana, an official of King Solomon (1 Kings 4:16). ***See also*** Absalom; Ahithophel; David.

D.R.B.

Husham (hoosh´uhm), a pre-Israelite king of Edom, either from the area or the tribe of Teman (Gen. 36:34–35).

Hushathite (hoosh´uh-th*i*t), a resident of the home village (or clan) of two of David's warriors, Sibbecai (1 Chron. 11:29; 20:4; 27:11; 2 Sam. 21:18) and Mebunnai (2 Sam. 23:27). The location has been identified as Hushah, west of Bethlehem and in the path of Philistine invasion into the hill country. Such a location would involve David's conflicts with the Philistines in which the two warriors performed with distinction.

Hushim (hoosh´im). **1** A son of Dan who went to Egypt with Jacob (Gen. 46:23), although by a reversal of letters the name is Shuham in Numbers (26:42) and the clan of which he is the ancestral head is called the Shuhamites. Many scholars consider the passage in Numbers to be more accurate. **2** The son of Aher; a descendant of Benjamin (1 Chron. 7:12). **3** The wife of Shaharaim, a Benjaminite, and mother of Ahitub and Elpaal (1 Chron. 8:8, 11). ***See also*** Shuham.

husks. ***See*** Pods.

Huz (huhz). ***See*** Uz.

Hyksos (hik´sohs), the Greek name given by the third-century B.C. Egyptian priest Manetho to the Asiatic princes who ruled in Egypt as the fifteenth and sixteenth dynasties (ca. 1667–1559 B.C.). The contemporary Egyptians called them *Heqau khasut,* "rulers of foreign hill-countries." These Asiatics were largely Semitic in origin. They were evidently sufficiently well organized to be able to take advantage of a period of weakness in Egypt and gain control of much of the Nile valley. They had previously consolidated their power in the eastern delta, where Asiatics had been living in increasing numbers since the early second millennium B.C. Their principal deity was the Egyptian god Seth, whom they equated with one of their own Semitic deities.

In 1667 B.C. the Hyksos captured the Egyptian administrative capital of Memphis; this event inaugurates the fifteenth dynasty. Monuments bearing the names of Hyksos kings are rare; many of the Hyksos rulers are known only from the occurrence of their names on scarabs (beetle-shaped, semiprecious stones). These scarabs have been found in both Egypt and southern Palestine; in the latter area, the majority of these royal-name scarabs have been found at Tell el-'Ajjul, probably to be identified with the ancient Hyksos stronghold of Sharuhen. Eventually the Hyksos were defeated and thrown out of Egypt by King Kamose (ca. 1576–1570 B.C.) and his successor, King Ahmose (ca. 1570–1546 B.C.).

The two principal cities associated with the Hyksos were Avaris and Sharuhen. Avaris, their Egyptian capital, is identified with Tell el-Dabaa in the area of Khatana-Qantir in the eastern Nile delta. Manfred Bietak of the Austrian Archaeological Institute in Cairo excavated this site beginning in 1966; he found there extensive town remains that date to the Second Intermediate Period (thirteenth through seventeenth dynasties, ca. 1786–1570 B.C.). The finds at Tell el-Dabaa include a series of temples of Syro-Palestinian form as well as tombs of Asiatics who were interred with a variety of Levantine burial goods.

Sharuhen was evidently the principal Hyksos stronghold in southwestern Palestine. Tell el-'Ajjul, an enormous mound about four miles southwest of modern Gaza, which was excavated by the British Egyptologist W. M. Flinders Petrie and his staff during the 1930s, is the most probable site for Sharuhen.

Some scholars connect the Hyksos with the biblical patriarchs by viewing the patriarchal migration to Egypt and sojourn in the delta as the movement of Asiatics into Egypt before and during the Hyksos period. The story of Joseph and his rise to authority would certainly be understandable during a period when Asiatics were in power in Egypt. Moreover, Flavius Josephus, a first-century A.D. Jewish historian, actually equates the expulsion of the Hyksos from Egypt with the Exodus of the Hebrews, but this

may be a later attempt to give a great antiquity to the Jews. This theory remains highly speculative, and nothing in the patriarchal narrative need necessarily be dated to the Hyksos period in Egypt. ***See also*** Sharuhen. J.M.W.

Hymenaeus (hi'muh-nee'uhs), opponent of Paul, associated with Alexander (1 Tim. 1:18–20; cf. 2 Tim. 4:14) and Philetus (2 Tim. 2:14–18). With Philetus, Hymenaeus held that the general resurrection was already past (cf. 2 Thess. 2:1–2). Gnostic dualistic assumptions probably supported an anti-Pauline spiritualizing of the Christian hope and a denial of bodily resurrection. ***See also*** Alexander; Gnosticism; Philetus.

hymn, broadly speaking, any poetical composition in honor of God or suitable for use in a liturgical setting, i.e., in worship. Such poetical pieces could be sung or chanted or recited antiphonally as in a responsive reading. With this understanding, many of the Psalms in the OT fall into the category of "hymn," but there are passages incorporated into other OT writings that can also be understood as hymns. There are the Song of Moses (Exod. 15:1–18), the Song of Miriam (Exod. 15:21), and the Song of Hannah (1 Sam. 2:1–10), to cite only three. The Psalms, as well as other hymns not included in the canon (such as psalms discovered at Qumran), were used in the worship of the postexilic Jewish synagogues.

The early Christian church incorporated hymns in its liturgies (see, e.g., Acts 16:25; 1 Cor. 14:26; Col. 3:16), perhaps following the example of Jesus and the disciples at the Last Supper (Matt. 26:30; Mark 14:26). Some of the best-known poetical compositions in the Gospels are found in Luke: the Benedictus (1:68–79), the Magnificat (1:46–55), the Gloria of the Angels (2:10–14), and the Nunc Dimittis (2:29–32). Some scholars affirm that there are short compositions or perhaps fragments from early Christian hymnody embodied in Eph. 5:14; 1 Tim. 1:17; 3:16; 6:16; 2 Tim. 4:18; Rev. 4:11; 5:9–10; 11:17–18; and 15:3–4. One collection of early Christian hymns has survived outside the traditional NT canon; it is known by the title *The Odes of Solomon*.

Many NT scholars believe that hymns were an essential part of the early Christian worship and life, especially hymns in honor of Jesus and hymns used in connection with the rite of baptism. One of the most widely acknowledged examples of a hymn in honor of Christ is found in Phil. 2:6–11. This poem has been discussed at length in NT scholarly circles, and the general consensus is that the hymn was a pre-Pauline liturgical piece, adapted and used by Paul in Philippians because it was appropriate to his exhortation in that context. Another possible hymn in honor of Christ may be found in Col. 1:15–20, but this is more debatable than the Philippians example. The prologue to John's Gospel (1:1–18) may have been structured around a Christ hymn. The second use for hymns in liturgy seems to have been in the baptismal initiation of new members into the Christian community. Some have even argued that such a background was the setting for the poem in Col. 1:15–20, and it is also possible that part of Romans 6 and of 1 Peter may have served a similar function.

It is probable that the OT Psalms continued to be used in the worship of the early church and that new hymns were composed or made from the reworking of OT passages and poetic odes from the Greco-Roman world. These hymns could take the form of doxologies or creedal statements in addition to the baptismal and Christ hymns. Hymnody has been a recurring phenomenon throughout the history of the Christian church. ***See also*** Baptism; Benedictus, The; Magnificat; Music; Nunc Dimittis; Poetry; Psalms, The; Worship. J.M.E.

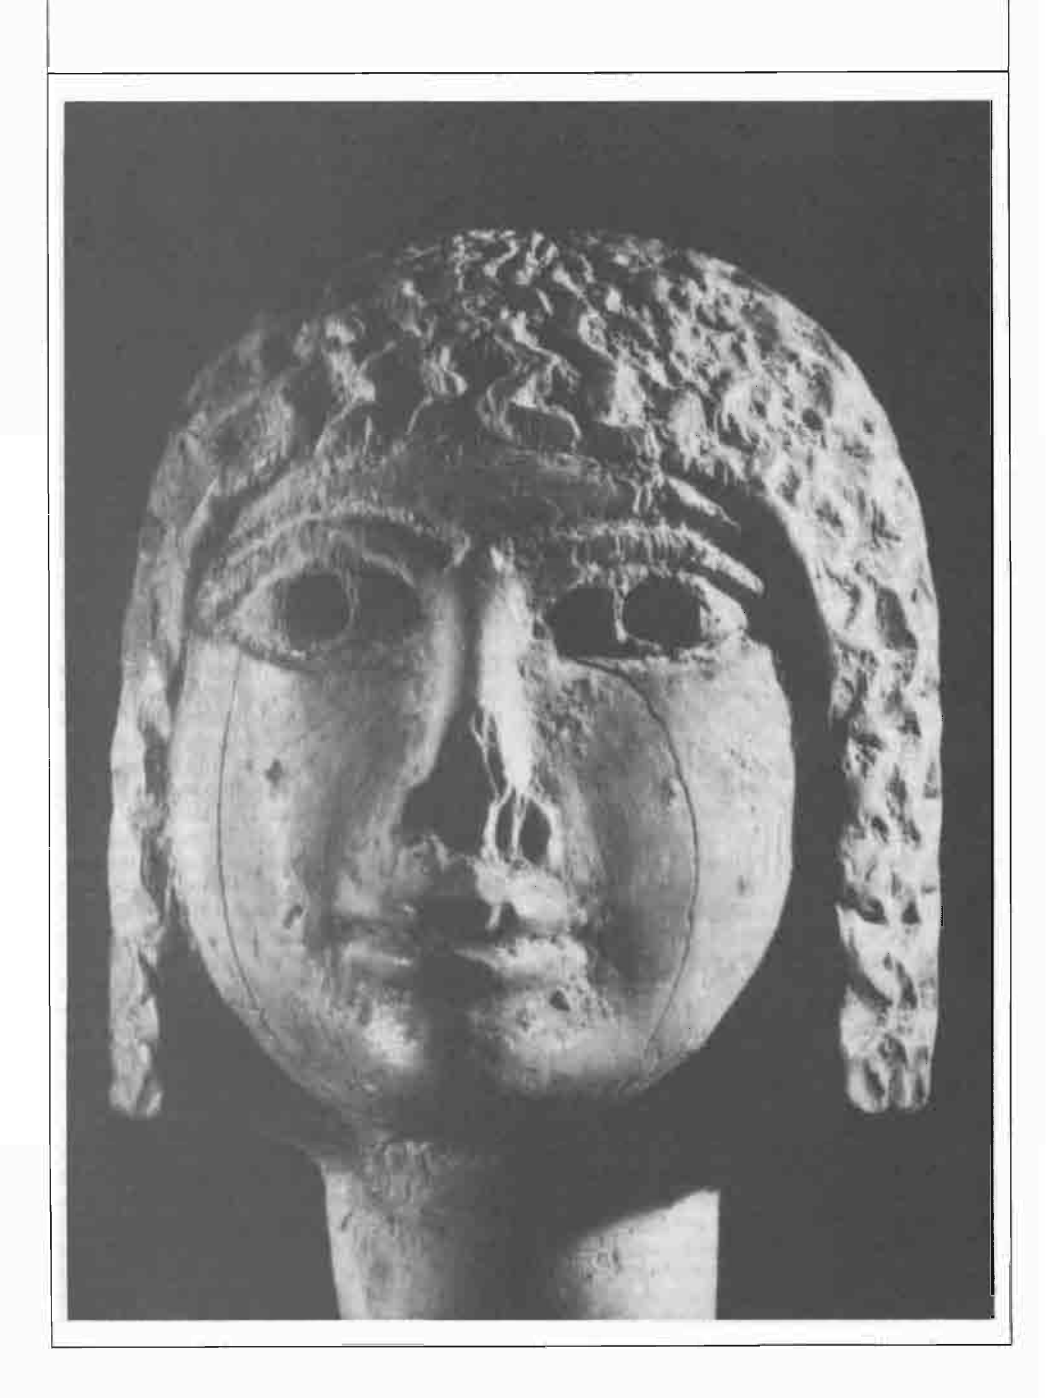
hypocrisy, a term and idea that are primarily limited in the Bible to the NT writings. The Greek word transliterated into English as "hypocrite" was used to denote an actor, one who performed behind a mask. Thus the popular understanding came to be that of persons who pretended to be something that they were not. It is interesting to note, however, that hypocrisy does not appear to be so limited in meaning in the NT. The term can sometimes denote general wickedness or evil, self-righteousness, pretense, or breach of "contract."

The best-known passage in the NT describing hypocrisy is Matthew 23, where self-righteousness and pretense are both in evidence (cf. also Matt. 6:2, 5, 16; 7:5; 15:7; 22:18; 24:51; Mark 7:6; Luke 6:42; 12:56; 13:15).

In Gal. 2:13, Paul accuses Peter, Barnabas, and other Jewish Christians of hypocrisy (RSV: "insincerity"). Although the term does not occur in Acts 5:1–11, the story reflects the seriousness with which the early church regarded hypocritical behavior. Perhaps the most frightening aspect of this sin is that one can enter the state of hypocrisy and not realize it (Matt. 7:21–23). J.M.E.

Hyrcanus (hihr-kay'nuhs), a name borne by two of the Hasmoneans. **1** John Hyrcanus I, son of Simon Maccabeus, who inherited the offices of high priest and ethnarch when his father and two brothers were murdered by a pretender. He ruled for thirty years (135/34–104 B.C.), during which time he consolidated the territorial and political status of Judea, forced the conversion to Judaism of the Idumeans, and destroyed the rival Samaritan temple of Mount Gerizim. **2** Hyrcanus II, son of Alexander Jannaeus and Alexandra Salome, who, as a pawn of Antipater the Idumean, fought with his brother Aristobulus II for the kingship. He served as high priest

during his mother's reign (76–66 B.C.) and after the Roman conquest (63–40 B.C.) and was eventually executed by Herod the Great in 30 B.C. ***See also*** Antipater; Herod; Maccabees. **3** Hyrcanus son of Tobias, a wealthy depositor in the Temple treasury, not otherwise mentioned (2 Macc. 3:11). F.O.G.



Hyssop.

hyssop (his´uhp; *Origanum Syriacum*), in the Bible Syrian Hyssop, a small shrub about 27 in. high with small white flowers in bunches at the end of the stem. A bunch of hyssop was used to apply blood to doorposts at Passover (Exod. 12:22). Hyssop was also used to sprinkle a blood and water mixture on a healed leper or a renovated house (Lev. 14:4, 6, 49, 51–52). In the view of Hebrews (9:19), Moses sprinkled blood on the people in the ceremony of Exod. 24:6–8 using hyssop. The use of hyssop to purify is used metaphorically in Ps. 51:7. John 19:29 says that hyssop was used to put a vinegar-soaked sponge to Jesus' lips (cf. Matt. 27:48; Mark 15:36). D.P.W.

Opposite: Ivory head of a woman; Megiddo, fourteenth–twelfth century B.C. Carved ivory pieces from as early as the Mesolithic Period (ca. 12,000–8,000 B.C.) help reconstruct aspects of life in the ancient Near East.

I

Ibleam (ib′lee-uhm), a strongly fortified town near one of the southern passes into the Esdraelon Plain. It is to be identified with modern Khirbet Bel'ameh located a quarter mile south of Jenin. Ibleam is mentioned in the fifteenth-century list of Canaanite towns Pharaoh Thutmose III brought under his control. The tribe of Manasseh was unable to drive the Canaanites out of Ibleam (Josh. 17:11, 12; Judg. 1:27), and it probably remained in Canaanite hands until the time of David. Bileam of 1 Chron. 6:70 is probably identical with Ibleam; it is listed there as a levitical town of Manasseh, while the Septuagint of the parallel passage, Josh. 21:25, lists Ibleam. Ahaziah, king of Judah, was wounded by Jehu near Ibleam (2 Kings 9:27), and according to a Greek text it was at Ibleam that Shallum murdered Zechariah, king of Israel (2 Kings 15:10). ***See also*** Esdraelon. N.L.L.

Ichabod (ik′uh-bod), a child born to Phinehas, son of Eli, the priest of Shiloh, at the time of the battle of Ebenezer. The Hebrew name, which means "Alas, the Glory!" belongs to a category of names expressing mourning for an absent deity (cf. Jezebel). According to 1 Sam. 4:19–21 Ichabod's mother gave him the name in grief over the capture of the Ark.

Iconium (*i*-koh′nee-uhm), a city (modern Konya) in south-central Asia Minor in a rich oasis at the edge of the central Anatolian plain. According to Greek mythology, Perseus decapitated Medusa here.

The area was apparently settled by Phrygians who spoke an Indo-European language and who came from Thrace or Macedonia ca. 1200 B.C., following the collapse of the Hittite Empire. In an area of shifting political boundaries, however, Iconium was sometimes considered part of Phrygia to the west, sometimes of Lycaonia to the east. Xenophon's *Anabasis* (ca. 399 B.C.) mentions the Persian king Cyrus's march eastward through Iconium as the last city of Phrygia, but Cicero, Strabo, and Pliny refer to it as in Lycaonia. Linguistically and ethnically, nonetheless, Iconium remained Phrygian.

Iconium was rarely independent, being subject to Lydia and Persia before its hellenization under the Seleucids in the third century B.C. It came under the sway of the invading Gauls after 278 B.C., when the entire central region of Asia Minor became known as Galatia, and was ruled by them until ceded to Pontus in 129 B.C. In 36 B.C., Mark Antony returned control of Iconium to the Galatian king Antymas, upon whose death in 25 B.C. all of Galatia (including Iconium) became a Roman province. Under Claudius (A.D. 41–54), Iconium received the honorary name of Claudiconium.

At the time of Paul's first missionary journey as reported in Acts 13:1–14:26 (ca. A.D. 47–48), Iconium, Lystra, Pisidian Antioch, and Derbe were all considered part of Galatia. Coming from Cyprus to Antioch, Paul and Barnabas were driven from the city by jealous members of the local Jewish community. They moved on to Iconium, where they remained for some time preaching successfully but causing division among the inhabitants, both Jews and Gentiles (Acts 13:51–14:7). Expelled in turn from Iconium, Paul and Barnabas went on to Lystra, some eighteen miles south, but were hounded down even there by Antiochian and Iconian Jews. They managed, nonetheless, to return to Iconium in order to encourage the fledgling church they had begun there (Acts 14:21–23).

On his second missionary journey as reported in Acts 15:40–18:21 (ca. A.D. 49–51), Paul visited Iconium again (Acts 16:1–6), when he recruited as his companion Timothy of Lystra, who was well known and respected in Iconium. A third journey (ca. A.D. 51–54) to Galatia and Phrygia (Acts 18:23) may well have included a stop in Iconium.

The church in Iconium may have been among the addressees of Paul's Letter to the Galatians and of 1 Peter (Gal. 1:2; 3:1; 1 Pet. 1:1). 2 Tim. 3:11 later recalled the persecutions of Paul's first visit to the city.

In the second century, Iconium was raised to the status of a Roman colony, and it provided the setting for the apocryphal romance of *The Acts of Paul and Thecla*. ***See also*** Antioch; Derbe; Galatia; Galatians, The Letter of Paul to the; Lycaonia; Lystra; Phrygia; Timothy. C.H.M.

iconography (*i*′kuh-nog′ruh-fee). ***See*** Symbol.

Iddo (id′oh), the English form of several different Hebrew names. **1** The father of Abinadab, one of Solomon's twelve district administrators (1 Kings 4:14). This is the only occurrence in pre-exilic literature. **2** The fifth-named son of Gershom, son of Levi (1 Chron. 6:21). **3** An officer responsible for the Gileadite half of Manasseh under David (1 Chron. 27:21). **4** A prophet and writer recording activities of Solomon, Rehoboam, and Abijah (2 Chron. 9:29; 12:15; 13:22). **5** The father (Ezra 5:1; 6:14) or grandfather (Zech. 1:1, 7) of the prophet Zechariah. **6** One of the priests and Levites who returned to Jerusalem with Zerubbabel and Joshua (Neh. 12:4, 16). **7** The head of a Jewish settlement in Casiphia, to whom Ezra sent for ministers to serve in the Temple. **8** A Jew who had married a foreign woman (Ezra 10:43). S.B.P.

idol, an image or statue of a deity fashioned to be an object of worship. The English word, which has a pejorative meaning, reflects several different Hebrew words. Some of these are neutral terms describing the manufacture, e.g., *pasil* or *pesel,* "(carved) image," and *masseka,* "(cast) image." For these the pejorative "idol" is not always appropriate; "image" or "statue" is sometimes better. Other Hebrew words for stat-

Clay "idol" from the second millennium B.C. found in northern Syria.

ues of deities are intentionally contemptuous and therefore are appropriately translated "idols," e.g., *'elilim*, "powerless ones," *gillulim*, "pellets of dung," and *shiqqutsim*, "shameful things."

Statues of deities are a common feature of ancient Near Eastern religions. Exactly how the ancients imagined their gods to be present in the statues is not easy to discern. Sometimes they treated the image itself as if it were the god; they bathed, clothed, and fed it. One may not conclude from this practice that they believed the image itself was the god. It seems rather that they believed the image imitated, however sketchily and impressionistically, the heavenly reality; the likeness made it possible for the god to encounter the worshiper. Statues are but one instance of the general religious phenomenon of earthly imitations of heavenly realities. Temples, for example, reproduce the heavenly palaces of the gods; their rites and liturgies imitate the elaborate ceremonies of the heavenly court and enable the earthly worshiper to participate in the honoring of the god. Israel was not prohibited from adapting this feature of Near Eastern religion. The Temple in Jerusalem was the center of worship where God "placed his name" and met the people; it is contrasted in some texts with heaven where he "dwelt" (e.g., 1 Kings 8:27–53). The predecessor of the Temple, the desert tabernacle, was constructed according to the pattern that was shown to Moses on Sinai; it is a copy of the heavenly tent dwelling (Exod. 25:9).

Prohibition Against Idols: Statues of God, however, were strictly forbidden to Israel according to the Bible, a prohibition that sets Israel apart from its neighbors. The aniconic tradition appears to be ancient and effective. No male image that has been certainly identified as Yahweh has so far been found at an Israelite site. The second commandment, generally considered to be early, connects the prohibition against images with monotheism: "You shall have no other gods before me. You shall not make for yourself a graven image . . . for I the Lord your God am a jealous God . . . " (Exod. 20:3–5; cf. Deut. 5:7–9; Roman Catholics and Lutherans count the prohibition as the first commandment; other traditions see in them two commands). The phrase "no other gods before me" was originally at home in the ancient Near Eastern sanctuary where images of different deities confronted worshipers. In contrast, the Bible imagines God as reigning invisibly upon a single visible throne in the Holy of Holies.

The prohibition against idols is most decisively stated in the book of Exodus, in which God liberates the Hebrews from bondage to Pharaoh in Egypt and makes them his people at his mountain, Sinai. Israel agrees to worship him alone (Exod. 19–24, esp. 19:1–8). The people's apostasy from their fundamental commitment is depicted as worship of the golden calf (Exod. 32), which the text interprets as an idol (32:8). 1 Kings 12:28 relates Jeroboam's founding of countershrines outside Jerusalem to that original apostasy. Many scholars believe that the calf in the Exodus passage originally meant the animal as the throne of the deity rather than the deity itself. Statues have been excavated from West Semitic sites, some of which show the god astride an animal and some of which show the animal only. In the latter, the god was imagined as invisibly enthroned upon the animal. The Exodus and Kings passages may have interpreted the animal as a god rather than a throne in order to make the point that the worship was false.

Joshua, in his great speech, eloquently exhorts all Israel, which has just received its land, to "put away the gods which your fathers served beyond the River, and in Egypt, and serve the Lord" (Josh. 24:14). Much of the power of biblical preaching from Moses to the time of the Exile comes from its stark either-or choice between Yahweh and the "other gods." The great ninth-century B.C. contest at Carmel in 1 Kings 18 between Yahweh and Baal regarding control of the rain, hence of deity, contains the challenge of Elijah: "If the Lord is God, follow him,

but if Baal, then follow him" (v. 21). To choose the other gods would have meant embracing an idol. In the great period of apostasy in Judah under Manasseh in the seventh century, 2 Kings 21:7 mentions a graven Asherah, a sacred pole by the altar, which the king put up in the sanctuary.

In the Exile and After: The Exile of the sixth century B.C. seems to mark a turning point in the biblical attitude toward idols, a result perhaps of the Babylonian Jewish community's ability to distance itself from the utterly strange Babylonian culture and worship system. Second Isaiah several times parodies the idols of Babylon (40:18–20; 41:5–7, 21–29; 44:6–20; 46; cf. Jer. 10:1–16; Pss. 115; 135). In his eyes the idols represented the deities only too well. A passive and inert statue cannot move itself, nor can it hear, speak, or act; the god is correspondingly lifeless and helpless. Made by humans of earthly material, the image shows forth nothing divine. The prophet's chief interest in the idols is to contrast them with Israel, which by its faithful action truly images forth, and witnesses to, the vitality of its God, Yahweh. Another text from the same period, Gen. 1:26–27, speaks of humans in their divinely ordained activity as the image and likeness of God. From perhaps the same period, Deut. 4:15–18 shows a similarly reflective awareness of the relationship between the statue and God: "Since you saw no form on the day that the Lord spoke to you at Horeb out of the midst of the fire, beware lest you act corruptly by making a graven image for yourselves." With the Exile, the theoretical foundation of monotheism seems sure; postexilic literature does not show the same urgent concern with idolatry as do the earlier, pre-exilic sources.

Early Christianity likewise does not inveigh strenuously against idolatry, to judge from the teachings of Jesus. Paul does, it is true, identify idolatry as the cause of the disintegration of sexual and social morality (Rom. 1:22–29) and he did forbid Christians to take part in rites honoring other gods; civic feasts in the Roman Empire could be so interpreted (1 Cor. 10:14). Pauline theology's radical devaluation of the present age in view of the coming of the new age led it to brand excessive concern with the wealth of this age as idolatry (Col. 3:5). R.J.C.

Idumaea (id'*yoo*-mee'uh), the Greek name for Edom as found in the Septuagint. After the Exile (586 B.C.) the name designated the region in Judea from Beth-zur to south of Beer-sheba, an area occupied in part by Edomites (Idumaeans; Ezek. 36:5). Throughout the Seleucid, Hasmonean, and Herodian periods (ca. 198 B.C.–A.D. 44) Idumaea changed hands frequently. Herod the Great was an Idumaean, and people from Idumaea came to hear Jesus (Mark 3:8). ***See also*** Beer-sheba; Beth-zur; Edom; Edomites; Exile; Hasmoneans; Herodians; Judea; Seleucids, The.

Igal (*i*'gal; Heb., "[God] redeems"). **1** The spy from Issachar sent by Moses to scout the promised land (Num. 13:7). **2** One of David's mighty men from Zobah (2 Sam. 23:36); apparently named as Joel in 1 Chron. 11:38. **3** A postexilic descendant of David (1 Chron. 3:22).

Ignatius (ig-nay'shuhs), **Letters of,** letters written in the late first or early second century by a bishop of Antioch in Syria to cities in Asia Minor through which he passed on his way to be killed by wild beasts in the amphitheater in Rome. The cities to which letters are addressed are Smyrna, Ephesus, Magnesia, Tralles, Philadelphia, and Rome. He also wrote a letter to Polycarp, the bishop of Smyrna. While the letters are basically thank-you notes to the churches that had shown him kindness during his trip, Ignatius was also anxious to see a single bishop (a "monarchial episcopate") established over the churches in a given area, and he urged such a form of church government on the recipients of his letters. His letter to Rome, with its prohibition of any activity that might keep him from a martyr's death, shows the high regard in which martyrdom was held in the early church. P.J.A.

Illyricum (i-lihr'i-kuhm), land of the Illyrians, a Roman province on the eastern coast of the Adriatic, today's Yugoslavia and Albania. Ancient writers speak of the Illyrians as wild and given to piracy. It took the Romans about two hundred and fifty years to subjugate the area completely and to integrate it fully into the Empire early in the first century A.D. under Tiberius (A.D. 14–37). Paul speaks of having preached from Jerusalem to Illyricum in Rom. 15:19, but it is not clear whether he was actually in Illyricum or merely considered it the eastern boundary of his apostolic activity up to the time of writing Romans. There were Christian communities in Illyricum by the second century, and Jerome, translator of the Bible into Latin (the Vulgate), was born there ca. 342. ***See also*** Dalmatia. C.H.M.

image. ***See*** Idol; Symbol.

image of God, a key term for understanding the divine-human relationship in biblical thought. The exact meaning of the phrase in Gen. 1:26–27 and 9:6 is problematic, and numerous suggestions have been proposed. To speak of human beings ("Adam") as created in the image of God apparently refers primarily to the bodily form (the Hebrew term for "image" usually denotes a concrete likeness) but also to the spiritual attributes the physical body symbolizes. The plural pronouns of Gen. 1:27–28 indicate that male and female share equally in

the image of God and connect this idea to the twofold commandment ("Be fruitful and multiply . . . and have dominion over . . . "), so that both in nature and in function human beings are understood to reflect their Creator.

In the NT, vestiges of the OT meaning survive (1 Cor. 11:7–12; James 3:9), but the emphasis shifts and it becomes Christ who embodies the image of God (2 Cor. 4:4; Phil. 2:6; Col. 1:15). This reflects the Christian view (most evident in John 14 and 15) in which Christ becomes the mediator between God and human beings.

T.R.W.L.

Imlah (im'luh; Heb., "he fills"), the father of Micaiah the prophet. Micaiah challenged four hundred other prophets and predicted the defeat of King Ahab (1 Kings 22:8–29). ***See also*** Micaiah.

Immanuel (i-man'*yoo*-uhl; Heb., "God is with us"), the name of a child whose birth is symbolic of God's guiding and protecting presence among his people (Isa. 7:14; 8:8; Matt. 1:23). The name was first used by the prophet Isaiah as a sign given to King Ahaz of Judah during the Syro-Ephraimitic war (ca. 734 B.C.). At that time, Syria and Israel declared war on Judah because of her refusal to join their alliance against Assyria. Ahaz in turn appealed to Assyria for help. During his preparations for the impending conflict, Ahaz was warned by Isaiah not to rely upon the military might of Assyria, but instead to put his trust in the Lord (Isa. 7:1–9). Ahaz, however, did not heed Isaiah's advice. Shortly after, Isaiah encouraged Ahaz to ask a sign of the Lord that would assure him of God's presence and protection. Ahaz refused, taking recourse in a religious subterfuge in order to mask his lack of faith (Isa. 7:12). Despite that refusal, the prophet Isaiah gave him a sign in the form of the Immanuel prophecy (Isa. 7:13–17).

While this text is beset with a number of problems about its exact interpretation, its essential meaning appears to be something as follows. A young woman, who either already was or soon would be pregnant, would give birth to a son who would be named Immanuel. Before the child was old enough to know the difference between good and evil, the two nations of whom Ahaz was afraid would be destroyed. But in their stead, a much more formidable threat against Judah would materialize in the rising power of Assyria (Isa. 7:17; 8:1–10).

In the NT, Isa. 7:14 was used by Matthew as scriptural support for his belief in the virginal conception of Jesus, a conviction arrived at independently on other grounds. It is clear, however, that in its own eighth-century B.C. context, Isa. 7:14 did not speak of the miraculous birth of Jesus centuries later. Neither the virginity of the woman, nor the miraculous birth of the child received any special emphasis. The sign of Immanuel offered by the prophet to Ahaz had to do with the imminent birth of a child, of a mother known to Ahaz and Isaiah, and signified God's presence with his people and the royal Davidic line during the turbulent years of the Assyrian invasions that were soon to engulf the kingdom of Judah. As such it did not so much initiate a novel theological insight, as it gave symbolic expression to a conviction widely held in the OT, namely, that God was present with his people, guiding their destiny (Gen. 28:15; Num. 23:21; Deut. 31:8; Isa. 43:5) and protecting them from danger (Deut. 20:1, 4; 1 Sam. 18:14; 2 Chron. 32:8; Ps. 46:7, 11). ***See also*** Isaiah, The Book of.

W.E.L.

Immer (im'uhr; Heb., "lamb"). **1** The father of a line of priests that numbered 1,052 (Ezra 2:37; Neh. 7:40), whose descendants included Jeremiah's opponent, Pashhur (1 Chron. 9:12; Jer. 20:1), and who was the winner of the sixteenth lot (1 Chron. 24.14). In postexilic times his descendants could not prove their priestly descent (Ezra 2:59; Neh. 7:61); two of them had also married foreign women (Ezra 10:20). One of the descendants, Zadok, repaired part of the Jerusalem wall opposite his house (Neh. 3:29). **2** The father of a line of warriors, including Meshillimoth (Neh. 11:13), but he may be identical with 1. **3** Perhaps a place in Babylon from which the returning priestly exiles emigrated (Ezra 2:59; Neh. 7:61). Their difficulty in proving priestly ancestry would thereby be reinforced, if this is true, as would their reportedly having married foreign women. The site identification of such a place is unknown.

immortality, immunity to death, endless existence. Two Greek words express the idea of immortality. One (*athanasia*) is translated literally as deathlessness (1 Cor. 15:53); the other (*aphtharsia*) as imperishability (Rom. 2:7). It is significant that the only passages in the Greek version of the Jewish Bible that contain these words are in writings originally composed in Greek, the Wisdom of Solomon and the fourth book of the Maccabees. The notion of immortality is a Hellenistic idea. The Hebrews accepted death as a limit ordained by God (Gen. 3:19). Blessedness consisted in a peaceful death at an old age and in having posterity to carry on in one's place (Gen. 15).

Certain elements, however, in the Jewish Bible press beyond the notion of death as a limit. For example, the song of Hannah proclaims, "The Lord kills and brings to life; he brings down to Sheol and raises up" (1 Sam. 2:6). Bringing to life probably refers to conception and birth rather than to raising from the dead. "Bringing down to Sheol" and "raising up" are probably not meant literally. These phrases are images for experiences of catastrophe and well-being, respectively. The vivid language of overcoming death in such OT passages, however, may have played a role in the later development

of the idea of resurrection (see also Pss. 16:10–11; 49:15; 73:24).

The people of Israel and the Jews at a later time were familiar with myths in neighboring cultures of dying and rising gods, such as Baal and Osiris. These myths reflect the rhythms of night and day, summer and winter, dormancy and fertility. The Israelites did not conceive of God as dying and rising but apparently made use of these myths to understand their own destiny as a people (Hos. 6:1–3; Ezek. 37:1–14). This language about the people rising from death to life as a nation may have influenced the emergence of the notion of individual resurrection.

The idea of individual resurrection appears first in Dan. 12:2–3, written about 167 B.C. According to Daniel, many, but not all, people will rise from the dead. The wise will rise, not to bodily existence on earth, but to a new form of life, "like the stars." Many ancients believed that the stars were divine beings. Resurrection in Daniel for the wise means a kind of angelic existence. The wicked will rise to shame and everlasting contempt.

In the Hellenistic and early Roman periods (325 B.C.–A.D. 325) some Jews held to the old idea of death as a limit (Ecclus. 30:4–6; 1 Macc. 2:49–70). Some looked forward to the resurrection (*Pss. Sol.* 3:16; 2 Macc. 7:9). Others believed in the immortality of the soul (*Jub.* 23:31; Wisd. of Sol. 3:1–4).

As Jesus is pictured in the Gospels, he shares the Hebrew notion of resurrection, rather than the notion of an immortal soul (e.g., John 11:23–25; cf. Mark 12:18–27). Indeed, the word "immortal" does not appear in the Gospels. In the Fourth Gospel, eternal life also describes the quality of life in the new age, rather than exclusively a future, unending life, since such eternal life can be enjoyed prior to death (e.g., 3:16).

In a few passages Paul appears to speak of a personal afterlife apart from and prior to resurrection (2 Cor. 5:1–15; Phil. 1:23). Resurrection is a more common image in his letters, however. Immortality for Paul is not the continuing existence of the soul apart from the body, but is rather the new heavenly existence of those who, clothed in "spiritual bodies," share in Jesus' resurrection in the new age (1 Cor. 15:42–50, 53–54). ***See also*** Eternal Life; Flesh and Spirit; Resurrection; Soul. A.Y.C.

Imnah (im´nuh; Heb., either "right-hand" or "south" [on the right facing east]). **1** A son of Asher who went with Jacob to Egypt (Gen. 46:17); he is considered the head of the clan of the Imnites (Num. 26:44). **2** A Levite, the father of Kore, a Temple official during the reign of Hezekiah (2 Chron. 31:14).

incarnation (in´kahr-nay´shuhn; Lat. *incarnatio*), a term meaning "to enter into or become flesh." It refers to the Christian doctrine that the pre-existent Son of God became man in Jesus. The term does not appear in the NT, but the elements of the doctrine are present in different stages of development.

The resurrection was the most important event for identifying Jesus in the earliest Christian proclamation. According to that proclamation, it was at the resurrection that God made Jesus Lord and Messiah (Acts 2:32–36) and begot and designated him as Son (Acts 13:32–33; Rom. 1:3–4). This preaching, however, does not exclude the reality that Jesus was already Son of God during his lifetime. Thus Mark attests that God addressed Jesus as his "beloved Son" at the baptism (1:11) and transfiguration (9:7). Matthew and Luke, through their infancy narratives, push the origins of Jesus' divine sonship further back when they speak of the virgin birth (Matt. 1:18–23; Luke 1:26–38). Moreover, all three Evangelists refer to Jesus as the Son of man who will return from heaven as God's final judge (Matt. 25:31–46; Mark 13:24–27; Luke 21:25–28). None of these writers, however, deals with the question of Jesus' pre-existence.

Paul does not directly address the question of the incarnation, but there are several passages that seem to imply the pre-existence of God's Son. Thus he speaks of God who "sent forth his Son" (Gal. 4:4; Rom. 8:3) and of Jesus Christ as the one Lord "through whom are all things and through whom we exist" (1 Cor. 8:6). In addition, he writes of Christ as "the wisdom of God" (1 Cor. 1:24), thereby recalling the OT motif of pre-existent wisdom. The most important and disputed texts, however, are those found in the hymns of Phil. 2:6–11 and Col. 1:15–20. The first seems to imply a period of divine pre-existence, whereas the second speaks of Christ as "the image of the invisible God, the firstborn of all creation . . . for in him all the fullness of God was pleased to dwell" (Col. 1:15, 19; cf. 2:9).

The notion of pre-existence becomes clearer in Hebrews where the author writes of the Son as the one through whom God created the world (1:1–3a). In addition, the author describes the Son as superior to the angels (1:5–2:8) and as sinless (4:15; 7:26). But it is in the Gospel of John that the notion of pre-existence flowers. The Gospel begins with a hymn (1:1–17) that proclaims that the pre-existent Word of God "became flesh and dwelt among us" (1:14). The background for this thought is found in the wisdom speculation of the OT, which saw wisdom as residing with God from eternity (Prov. 8; Ecclus. 24; Wisd. of Sol. 8). In addition, the Gospel speaks of Jesus' prior existence (6:62; 8:38), his descent from heaven (3:13; 6:33), his coming from God (16:27; 17:8), and his coming into the world (10:36; 12:46). Moreover it is only in John's Gospel that Jesus says, "before Abraham was, I am" (8:58). By the time of John the notion of pre-existence is so strong that the Johannine Letters must combat a tendency to deny the hu-

manity of Jesus (1 John 4:2–3). It is only with the fathers of the church in the third and fourth centuries, however, that a full-fledged theory of the incarnation develops. ***See also*** Lord; Savior; Son of God; Son of Man; Wisdom; Word. F.J.M.

incense, a compound of aromatic gums and spices, of which the ingredients, apparently made by skilled perfumers (Exod. 37:29), are detailed in Exod. 30:34–35. In this sense, the use of incense in Israelite worship is reported only in late priestly material (e.g., Lev. 1, 2, 16). This has led to the view that it was a postexilic introduction (mid- to late sixth century B.C.). However, the golden altar in Solomon's Temple (1 Kings 7:48) was probably for the burning of incense, and two incense altars stood in the Yahweh shrine at Arad, which was in use from the tenth to the eighth centuries. Incense was regularly offered in Canaanite religion (Jer. 7:9; 44:17) and is frequently condemned as part of Israelite worship of other gods (Jer. 1:16; Ezek. 8:11). It had a secular use as a costly adornment (Song of Sol. 3:6; 4:6, 14), but the incense employed in worship was clearly distinguished and considered as specially holy (Exod. 30:37–38). Originally this was burned in portable censers (Lev. 10:1; 16:12; Num. 16:17–18) but later also on the altar of incense that stood before the veil of the Holy of Holies in the Temple (Exod. 40:26).

Because of its very sacred character, the offering of incense was confined to the high priest, who burned it morning and evening (Exod. 30:7–8), although Luke 1:8–9 indicates that this duty was later transferred to ordinary priests. Those not duly authorized (Num. 16:1–35, 40; 2 Chron. 26:16–21) or those who offered incense improperly made (Lev. 10:1–2) were struck down.

In Israel's postexilic ritual, the primary concept of incense was that the burning of it made atonement by propitiating the divine wrath. This idea is expressed in the episode of Aaron's action in Num. 16:46–48 and in the reason given for the high priest's bringing of incense into the Holy of Holies on the Day of Atonement (Lev. 16:12–13). Similarly, incense was added to the cereal offering (Lev. 2:1), to make the propitiatory "pleasing odor," provided by the burning fat in the case of animal sacrifices (Lev. 1:9). Hence, the offering of incense can be paralleled to the offering of prayer (Ps. 141:2), a link that is also developed in the NT (Luke 1:10; Rev. 5:8; 8:3–4). ***See also*** Altar; Worship. J.R.P.

Incense burner, bowl and stand, found in a house at Tell Qiri, twelfth–eleventh century B.C.

India (in´dee-uh), the subcontinent lying east of Africa and south of Asia. It is mentioned in the phrase "from India [Heb. *hodu,* the Indus Valley] to Ethiopia" in Esther 1:1 and 8:9 as the eastern boundary of the Persian Empire under Ahasuerus (perhaps fifth century B.C.). In 1 Macc. 6:37 a reference to an "Indian driver" of each war elephant of Antiochus (second century B.C.) occurs. India is not otherwise attested in the biblical record. Nevertheless, widespread trade between ancient Mesopotamia and Indus Valley civilizations existed from as early as the Early Dynastic III through the Old Akkadian periods (ca. 2500–2200 B.C.), as evidenced by vases, carnelian beads and seals. There is an Aramaic inscription from Taxila (near Rawalpindi, Pakistan) from the third century B.C. that illustrates the contact between India and the biblical lands. D.B.W.

infidel. ***See*** Unbeliever.

inheritance, the passing of property at the owner's death to those entitled to succeed. Unlike ancient Near Eastern society, which bestowed the legal status of son or daughter with rights to inherit upon a stranger through adoption, Israelite law recognized only family relationships of blood kinship. Furthermore, the patriarchal structure of Israelite society was based on the agnatic family in which only blood relatives on the father's side were considered family and hence entitled to inherit. Most of the scant biblical legislation governing inheritance is imbedded in the material dealing with the territorial division of the land of Canaan according to tribes and families at the time of the conquest (thirteenth–twelfth centuries B.C.).

The major rule states that if a man died without leaving a son, his property was transferred to his daughter. If he had no daughter, his property was assigned to his brothers. If he had no brothers, it was assigned to his father's brothers. If there were none, the property was assigned to the nearest relative in his own clan (Num. 27:8–11). There is a supplementary rule that required the daughter who inherited to marry into a family of her father's tribe, preferably into the family of her father's brothers (Num. 36:6, 11).

By recognizing only the father's kin as family and by requiring the daughter who was heir to marry within the clan, no transfer of real property to another family or tribe was possible upon the death of the father. Thus the primary aim of the biblical inheritance legislation was to preserve the territorial integrity of the clans and tribes established at the time of the settlement of Canaan (cf. Num. 36:7). This right to inherit and transmit one's patrimony was strongly advocated in the monarchical period (ca. 1025–586 B.C.; 1 Kings 21:3).

Biblical legislation also established the right of the firstborn to inherit a double portion of his father's possessions, i.e., twice as much as that received by each of his brothers (Deut. 21:17). It furthermore prohibited the father from conferring the right of the firstborn upon a younger son (Deut. 21:16), which had been a prevalent practice in the patriarchal period (ca. 2000–1700 B.C.; Gen. 21:10; 27:37; cf. Gen. 48:18–20; 1 Chron. 5:1).

There are other scattered references to inheritance customs in the nonlegal literature of the Bible. It is not clear how the status of the mother affected her son's right to inherit. On the one hand, there is evidence that the sons of a concubine did not inherit (Gen. 21:10; 25:5–6; cf. Judg. 11:1–2); yet at times, such sons seem to have been considered equal to the sons of the primary wife (Gen. 35:23–26). Perhaps the right of the sons of a concubine to inherit was dependent upon the wishes of the father. This would accord well with the Laws of Hammurabi (§§170–171), which state that if a father legally recognized as his sons the children borne to him by a slave girl, they were to be counted among his heirs; but if he failed to acknowledge them, they had no claim to his estate. The right of daughters to inherit along with their brothers is mentioned only in the book of Job (42:15) whose setting is non-Israelite.

In addition to its legalistic usage, the term "inheritance" is used in theological contexts to affirm the relationship between God and his people (Deut. 9:26, 29; Jer. 10:16; Ps. 28:9; Gal. 3:7–14).

In the NT Jesus on one occasion refused to judge the rectitude of an unequal inheritance (Luke 12:13). He also told parables involving such bequests (Matt. 21:38; Luke 15:12). The Pauline Letters speak of God's Kingdom or of salvation as inheritance (e.g., Eph. 5:5; Col. 3:24; cf. Heb. 9:15; 1 Pet. 1:4). ***See also*** Law; Marriage. B.L.E.

iniquity. ***See*** Sin.

ink, in antiquity a liquid material used for writing on papyrus, made from soot, gum arabic, and water. Since this kind of ink does not stick well to leather or parchment, scribes also employed ink made with tannic acid derived from nut galls (oak galls). These were pulverized and then mixed with sulphate of iron and water. The ingredients for making ink were kept in an inkhorn, made of metal or wood, which the scribe carried at his belt (Ezek. 9:2–3, 11).

Besides black ink, other colors of ink were sometimes used. Titles might be written with red ink, which was made from either cinnabar or miniam. Purple ink was made from a liquid secreted by two kinds of gastropods, the murex and the purpura. For deluxe parchment or vellum manuscripts, scribes occasionally employed silver and gold inks.

The Bible refers to the use of ink in Jer. 36:18; 2 Cor. 3:3; 2 John 12; and 3 John 13. ***See also*** Writing. B.M.M.

inn. ***See*** Architecture; Caravan.

I. N. R. I., letters abbreviating the Latin version of the inscription Pilate had affixed to Jesus' cross. The inscription, written in Hebrew, Latin, and Greek, read "Jesus of Nazareth, King of the Jews" (John 19:19–20). The first letters of the words of the Latin form, "Iesus Nazarenus Rex Iudaeorum," occur frequently in art depicting the crucifixion of Jesus and on liturgical vestments and symbols.

insincerity. ***See*** Hypocrisy.

inspiration, the filling with or domination by spirit. This concept first appears in biblical materials as a way of describing and understanding certain types of oral discourse. In ancient Israel, prophecy was understood as being uttered under the influence of God's Spirit (e.g., Num. 24:2) or spirits (1 Kings 22:19–23). Sometimes this was evident in peculiar behavior by the prophets (e.g., 1 Sam. 10:6); at other times, it appears simply as a claim to divine authorization (e.g., Isa. 61:1).

The experience of prophetic inspiration apparently declined in Israel along with the prophetic institution itself (see Zech. 13:2–6), and the early rabbis did not approve of claims to special inspiration on the part of their contemporaries. Such claims were revived, however, among the early Christians. They understood the giving of the Spirit as a sign of the last times (Acts 2:16–18), as a mark of full assimilation into the Christian community (e.g., Heb. 6:4), and as a source not only of prophecy but of other functions vital to or common in the life of the churches (1 Cor. 12:4–11). As in the earlier tradition, the NT writings are not uniform as to whether there is one spirit involved or several (1 John 4:1–3; 1 Cor. 14:32).

The concept of inspiration is applied to written documents in 2 Tim. 3:16. The same idea may also be implied in Heb. 3:7 and 9:8, which describe the Spirit as speaking through

the words or provisions of Scripture. As in earlier references to the inspiration of oral discourse, the inspiration of written works is seen as evidenced in the authority and utility of the results.

The idea of an inspired text was perhaps implicit even earlier. Some of the translators who produced the Old Greek Version of the Jewish scriptures (the LXX) made an effort to find an equivalent Greek term for every Hebrew word, even at the expense of making sense in Greek. This tendency was carried still further by a later redactor, Aquila—sometimes to the point of complete absurdity. Ancient commentators also proceeded at times as if the most minute details of the biblical text were fraught with meaning. On the other hand, the Dead Sea Scrolls, the oldest library of biblical manuscripts we have, show a certain indifference to exact preservation of texts, and biblical interpreters at Qumran and in the NT sometimes cite their texts very loosely.

Speculation about modes and effects of inspiration continued and expanded in later Christianity. The Spirit's work has been described by a variety of metaphors, such as playing on a musical instrument or giving dictation to a secretary. Inspiration was understood to constitute the inspired utterance, even in its written form, as the Word of God, but this expression could mean a variety of things to different interpreters. There has often been a sense that the biblical interpreter as well as the original author stands in need of inspiration, and this continues the original oral context of the whole notion of inspiration. ***See also*** Holy Spirit, The; Prophet; Revelation; Scrolls, The Dead Sea; Septuagint; Spiritual Gifts. instrument, a term used in the KJV that connotes tools, utensils, weapons, or implements. The Hebrew term *kelî* can refer to weapons ("instruments of war"; Gen. 49:5; 1 Chron. 12:33, 37), musical instruments (1 Chron. 15:16; 16:42; 23:5) or utensils (1 Chron. 28). In the RSV the term is normally translated with a word identifying the specific type of utensil; the word "instrument" is reserved for musical devices. The use of utensils is one of the aspects of technology that is attributed to the "fallen angels" (*1 Enoch* 6–11). This story accents the potential for either good or evil of technology and instruments. S.B.R.

iota (*i*-oh´tuh), ninth (and smallest) letter in the Greek alphabet, frequently equivalent to the English letter *i*. It appears in Matt. 5:18 (Greek text and RSV) as a symbol of a very minor change in the law. The NRSV translates it "letter," but footnotes it as "Gk. *one iota*." It occurs in a sermon of Jesus in the course of which he asserts the inviolability of the Jewish law throughout all history.

Ira (*i*´ruh; Heb., "a male ass"), name of three officials of the Davidic period. **1** A (nonlevitical) priest (2 Sam. 20:26). **2** Two others were among David's warriors (2 Sam. 23:26, 28; 1 Chron. 11:28, 40; 27:9). **3** Some of the ancient biblical translations identify the priest Ira with one of David's warriors.

Iran (i-ran´), the modern name for the territory of biblical Media or Persia, extending from the Zagros mountains east to Baluchistan and from the Caspian Sea south to the Persian Gulf and Indian Ocean.

iron, a metal whose hardness and malleability made it ideal for implements of war as well as of more peaceful pursuits.

Biblical References: Biblical references to iron occur in all parts of the Hebrew Bible. The NT mentions iron once in Acts and five times in the Revelation to John.

Pentateuchal references include the attribution of iron working to Tubal-cain (Gen. 4:22), the traditional "father of metallurgy." Moses uses iron in a simile, stressing its hard and unyielding property (Lev. 26:19). Iron taken as booty in the defeat of Midian was required to be purified (Num. 31:22). Og, king of Bashan, had an iron bedstead (Deut. 3:11). Captivity in Egypt is likened to being in an iron furnace (Deut. 4:20). The land of Palestine is described as a land whose "stones are iron" (Deut. 8:9). Moses threatens the disobedient with a "yoke of iron" (Deut. 28:48).

Dagger with iron blade and other implements from ca. 1200 B.C., found at Tell el-Far'ah (Tirzah) and Beth-shan.

The historical books reflect the use of iron by Israel and its enemies. Canaanites had chariots of iron (Josh. 17:16). The Canaanite Sisera was said to have had nine hundred war chariots plated or studded with iron. Much has been made of the Philistines' two-hundred-year local monopoly of the metal industry (1 Sam. 13:19–21), which was broken when David came to power. Goliath's spear is described as weighing six hundred shekels of iron (1 Sam. 17:7). David was familiar with iron. The city of Mahanaim in the Jabbok Valley, well known to David, may have been the administrative center of the iron industry of his day, located as it is only about two miles from the largest and best iron mine of the Gilead mountains. An axe head was found at Gibead (modern Tell el-Ful), the capital of Saul's kingdom. Barzillai, whose name in Hebrew means "man of iron," was a Gileadite who helped David and was properly rewarded (2 Sam. 17:27–29; 19:31–39). The suggestion is that he was David's chief metallurgist. The floating axe head recovered by Elisha (2 Kings 6:6) shows evidence of a ninth-century iron implement. Iron furnaces were known in the early monarchy (1 Kings 8:51). Solomon had iron workers (2 Chron. 2:7), and by the reign of Joash (800–785 B.C.), Israel had craftsmen in iron (2 Kings 24:14; see also 2 Chron. 24:12). In preparation for building, David gathered materials including "great stores of iron for nails for the doors of the gates and for clamps" (1 Chron. 22:3), but iron was prohibited in the Temple (1 Kings 6:7). Later rabbinic interpreters gave the reason: It is not right to use instruments of death in the creation of an instrument of life. After David's farewell speech, heads of households gave free-will offerings that included "a hundred thousand talents of iron" (1 Chron. 29:7).

Prophetic references to iron include the most descriptive passages of the ironsmith's craft (Isa. 44:12; 54:16), as well as the metaphoric use of iron as a symbol of strength and toughness (Isa. 48:4; Jer. 1:18); servitude (Jer. 28:13–14; see also Deut. 4:20); and judgment (Isa. 1:25; Jer. 6:29–30; Ezek. 22:20–31).

In Psalms, Proverbs, and Daniel, iron is referred to in historical allusion (Ps. 105:18 tells that Joseph's neck was put in an iron collar when he was sold as a slave), proverbially (Prov. 27:17, "iron sharpens iron, and one man sharpens another") and in apocalyptic dream and vision (Dan. 2:35, where the image of Nebuchadnezzar's dream had feet of iron and clay; and Dan. 2:40–45, where one of the successive kingdoms is of iron).

NT references describe objects made of iron (e.g., an iron gate, Acts 12:10; breastplates of iron, Rev. 9:9; and vessels of iron, Rev. 18:12) and someone ruling "with a rod of iron" (Rev. 2:27; 12:5; 19:15).

Historical and Archaeological Data: The importance of iron in antiquity is attested by its use in pre–Iron Age periods. Meteoric iron, known by the name "metal of heaven" in Egyptian texts, was used for ornaments, jewelry, and dagger blades as early as 2000 B.C. The beginnings of iron metallurgy (smelting and forging) are linked generally to the Hittites of Asia Minor, ca. 1400 B.C. The Iron Age in Palestine is separated into three time periods: Iron I (1200–1000 B.C., biblically the era of judges and the United Monarchy); Iron II (1000–586 B.C., Divided Monarchy); and Iron III (or Persian, ca. 587–332 B.C., the Exile and Restoration).

Iron ore sources in ancient Palestine are very limited. Minor deposits are detected in the area southwest of the Dead Sea, in Galilee and in the Arabah, south of the Dead Sea. The largest ore source of antiquity is a mine at modern Mugharat Wardeh in the Southern Ajlun mountains (biblical Gilead), a site about twenty-two miles north-northwest of Amman, Jordan, about two miles north of the Zerqa (biblical Jabbok) River. The hypothesis of Philistine and Israelite use of this mine has strong circumstantial evidence, but to date no material evidence of Iron Age use has been found at the site. Medieval exploitation of Wardeh was carried out in A.D. 1185–1450 by the Islamic rulers of the Ayyubid-Mamluk period. The ore body at Wardeh is approximately 980 feet in length by 650 feet wide and some 30 meters in thickness. The ore reserve at the Wardeh mine is estimated at some 561,000 metric tons.

Numerous ancient literary texts yield evidence of iron. Documents from Mesopotamia's eighteenth century B.C. (the time of Hammurabi) mention iron implements. The Hittite king Hattusilis (1289–1265 B.C.) shows Hittite territory as the source of Assyrian iron in the thirteenth century B.C. Papyrus Anastasi I, ca. 1250 B.C. in Jaffa, tells of Canaanite craftsmen repairing iron chariots. Assyrian texts from Sargon II (722–705 B.C.) mention tribute in iron bars received from various vassals. Several suras of the Koran make reference to iron, e.g., in Sura 34:10, the Arabs give David a gift of iron, and in Sura 57:25, "We made iron soft for him."

Some archaeological artifacts of Near Eastern antiquity are an iron dagger found in Tutankhamen's tomb (ca. 1350 B.C.), some 160 tons of iron bars from Sargon II's palace at Khorsabad, an axe head from Ugarit (ca. 1300 B.C.), a miner's pick from the eleventh century B.C. in Israel, and an iron-tipped plow point from Gibeah of Saul (modern Tell el-Ful). The Philistine sites of modern Tell el Far'ah (Sharuhen), Tell Jemmeh, Tell Qasileh, and Ashdod yielded furnaces and implements; Gezer produced wedge-shaped lumps of iron; and Beth-shemesh (Ain Shems) had forges.

The most recent research of Robert Maddin and colleagues of the University of Pennsylvania suggests that early iron was carburized and perhaps the Iron Age should have been called the Steel Age. Further archaeo-metallurgical

study by researchers from the Museum of the University of Pennsylvania and by Britain's Institute of Archaeo-metallurgy may revolutionize the understanding of iron and other metals from the ancient world.

Iron Age, the designation of an archaeological period during which iron artifacts began to come into common use. In Palestine the Iron Age began around 1200 B.C. Iron had been utilized as early as 2700 B.C. in Mesopotamia and Egypt but only came into Israel at this later period because of the slower development of the necessary technology there. Biblical references in Josh. 6:24; 17:16; 22:8; 1 Sam. 13:19–22; and 1 Sam. 17 tend to corroborate the archaeological evidence of the relatively late entry of Israel into the Iron Age. The Iron Age is normally divided into these subdivisions:

Iron I or Early Iron: 1200–900 B.C.

Iron II or Middle Iron: 900–600 B.C.

Iron III, Late Iron or Persian: 600–300 B.C. ***See also*** Archaeology, History, and the Bible; Egypt; Iron; Mesopotamia; Palestine. K.H.R.

irrigation. ***See*** Farming; Water.

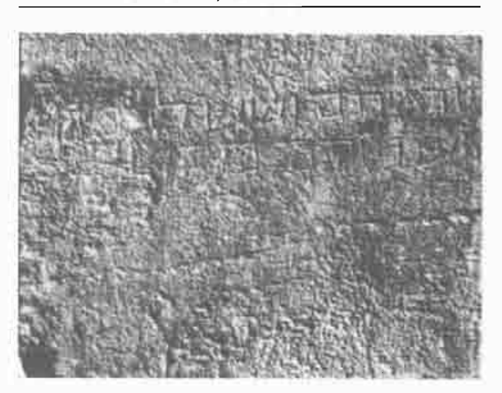
Isaac (*i*´zik), the second of the three patriarchs of the Israelites (Exod. 2:24; 3:6; Jer. 33:26). Born to the hundred-year-old Abraham (Gen. 21:5) and the ninety-year-old Sarah (17:17), Isaac was the fulfillment of the Divine promise of an heir to Abraham with whom God would establish his eternal covenant (17:15–21; 18:10–15; 26:2–5, 24).

The word "Isaac" comes from the Hebrew word for "laughter" (cf. 17:19 with 18:12, 13, 15; 21:3, 6–7), which was Sarah's reaction when she heard the prediction that she would bear a son even though she was well past the age of childbearing (18:10–11). Sarah and Isaac, thus, form the first and most extreme example in the Bible of the motif of the barren woman who finally bears a son due to divine intervention (see also Rebekah and her sons Esau and Jacob, Gen. 25:21–26; Rachel and Joseph, Gen. 30:22–24; Samson and his mother, Judg. 13:2–25; Hannah and Samuel, 1 Sam. 1:1–20). Isaac is even named by God (Gen. 17:19). He was the first to be circumcised at eight days as commanded by God (21:4; cf. 17:12). Isaac's birth resulted in the expulsion of his half-brother by Abraham and Hagar, Ishmael. This was accomplished after the feast of Isaac's weaning at Sarah's insistence, since she perceived Ishmael to be a threat to Isaac's future as Abraham's heir (21:8–14).

The angel staying Abraham's hand as he is about to sacrifice Isaac (cf. Gen. 22); detail from the twelfth-century Lambeth Bible.

The major event of Isaac's life in the biblical narration must surely have been "the binding of Isaac" (Gen. 22). Abraham's loyalty to God above all else was tested by a divine command to sacrifice his beloved son and sole heir (after the expulsion of Ishmael) on a mountain in the land of Moriah (vv. 1–2). At the time, Isaac is depicted as a lad of indeterminate age (v. 5). After leaving the servants and donkey behind (v. 5), Abraham gives the wood for the sacrifice

to Isaac to carry, while he himself takes the firestone and knife (v. 6). Isaac, surprised at the lack of a sacrificial animal, asks his father ". . . where is the lamb for a burnt offering?" (v. 7). Abraham's enigmatic reply, "God will provide himself the lamb for a burnt offering, my son" may have confirmed Isaac's fears, but that the two walk on together (v. 8) may indicate that Isaac is prepared for whatever destiny awaits him. Indeed, for the rest of the story, Isaac plays a passive role—he is bound and placed upon the altar Abraham makes, and only when Abraham has already taken hold of the knife to slaughter him is Isaac's fate resolved. An angel cries out from heaven and a ram is substituted for Isaac. Thus, God's promise to Abraham is reaffirmed.



For Isaac, this traumatic experience seems to have shaped his character and life. His passivity reappears with the choosing of Rebekah as wife for him, without consulting him (Gen. 24; at the age of forty! 25:20). He is the only patriarch to be monogamous and without concubines. It appears that Isaac had been bound to God in a special way, for of all the husbands of barren wives in the Hebrew Bible, only his prayer for a child by such a wife is mentioned as being answered by God (25:21). Isaac always remained the passive naïve innocent who was unaware of the intention of others—he does not know of God's plan for his sons, Jacob and Esau (25:23), nor of Rebekah's and Jacob's conspiracy to get his blessing transferred from Esau (Gen. 27). On the other hand, he is protected by God and all his doings are greatly blessed by God, and he attains great wealth and power (26:1–33). Isaac died at the age of one hundred and eighty, attended by his sons (35:27–29).

There is far less biblical material concerning Isaac than either Abraham or Jacob (or, for that matter, Joseph), which may indicate that many traditions have been lost. For instance, the origin of the phrase "Fear of Isaac" (31:42, 53) is unknown. His individual importance is attested by Amos (7:9, 16), who equates the name "Isaac" with the northern state of Israel. Isaac is frequently mentioned in the NT, along with Abraham and Jacob, as one of the three patriarchs (e.g., Matt. 1:2; Luke 3:39; Acts 7:8). The binding of Isaac is mentioned in James 2:21, and Paul emphasizes his wondrous birth (Rom. 9:7, 10) and the promise of God associated with him (Gal. 4:28). ***See also*** Genesis; Patriarch

J.U.

Isaiah (*i*-zay´yuh; Heb., "salvation of God" or "God is salvation"), **the Book of,** the longest prophetic book in the OT. Isaiah is also a common name, appearing especially in the post-exilic period (Ezra 8:7, 19; Neh. 11:7; 1 Chron. 3:21; 25:3, 15; 26:25).

Two almost complete manuscripts of the entire book of Isaiah were found in 1947 in a remote cave above the north end of the Dead Sea. This discovery is, in the American archaeologist W. F. Albright's words, "one of the greatest manuscript finds of modern times." The text is dated to the second or first century B.C. Significantly, in spite of various corrections and interlineations, there are no important differences between the Masoretic Text of Isaiah and that of the Dead Sea Scrolls.

An inscription quoting Isa. 66:14 carved on the western wall of the Temple Mount in Jerusalem during the reign of the Roman emperor Julian, who, in the fourth century, promised the resettlement of Jerusalem by Jews.

Biographical Sketch: It appears that the prophet Isaiah was from Jerusalem (in contrast to Amos and Jeremiah, who grew up on the periphery), which was the center of his activity. He was married to a woman whom he calls the prophetess (8:3) and they had at least two sons: Shearjashub (Heb., "a remnant shall return") and Mahershalal-hashbaz (Heb., "the spoil speeds, the prey hastes"). Their names are associated with prophetic pronouncements (7:3; 8:3). He may also have had a third son, Immanuel (Heb., "God is with us"; cf. 7:14; 8:18), who also bears a symbolic name. Isaiah is mentioned outside of his book in 2 Kings 19:20; 2 Chron. 26:22; and 32:20, 32. He was the son of Amoz. According to a Talmudic tradition (*Meg.* 10b), Amoz was the brother of Amaziah, king of Judah. Isaiah was a contemporary of the prophet Micah and was preceded slightly by Amos and Hosea, who were active in the Northern Kingdom (Israel). Isaiah prophesied in Judah during the reigns of kings Uzziah, Jotham, Ahaz, and Hezekiah, in the second half of the eighth century approximately between 740 and 701 B.C. He had access to the king (7:1–3) and was his counselor (37:1–7). Due to his frequent references to wisdom forms and vocabulary there is a tendency to regard him as a member of the wisdom school, or as a wisdom teacher, but this is unclear. However, 30:8 may indicate that he studied in the school of scribes (cf. 2 Chron. 26:22).

The Book: The present book contains sixty-six chapters, a form that had already appeared in the beginning of the second century B.C. Ben Sira (NRSV: Ben Sirach), the author of Ecclesiasticus, refers to Isaiah (Ecclus. [NRSV: Sir.] 48:17–25) as a single work. The Dead Sea Scrolls as well as the NT regard the entire sixty-six chapters as a single book. However, the present structure does not mirror the original book. As a rule, critical prophetic scholarship distinguishes between two major "books": chaps. 1–39 and 40–66, called First Isaiah and Second Isaiah (Deutero-Isaiah), respectively. The two compositions reflect two distinct historical periods. The first relates to the second half of the eighth century B.C., the Assyrian period, while chaps. 40–66 are a product of the sixth–fifth centuries B.C., the Persian period. The distinction has been recently confirmed by a computer analysis of the language (Y. T. Radday). Many scholars call chaps. 56–66 of the second composition a third "book," Third Isaiah (first suggested by B. Duhm in 1892). In contrast to First Isaiah, Second Isaiah does not bear any historical superscriptions, and it is attached to First Isaiah without any external reference. The distinction between the two compositions (first suggested in modern research in 1783 by Eichorn and in 1789 by Döderlein) is based therefore on historical, thematic, and philological criteria.

The prophet of Second Isaiah prophesied to the exilic community in Babylonia, witnessing the collapse of Babylon (539 B.C.) and the triumph of Cyrus, the founder of the great Persian Empire. Second Isaiah knows about the destruction of the Temple of Jerusalem and assigns Cyrus to build the new Temple (44:28; 45:1; cf. 52:5, 11), which dates the work to the sixth century B.C. In contrast, First Isaiah refers to political events that took place prior to the fall of the Northern Kingdom (722/1 B.C.) and deals with Assyria's threat to invade Judah during the second half of the eighth century. The distinct periods reflect different subjects and prophetic themes in the books. First Isaiah deals with social problems of the moral-ethical misbehavior of the elite of Judah, while Second Isaiah responds to the national religious crisis of the exiles that followed the fall of Jerusalem and the destruction of the Temple (586 B.C.). Hence, speeches of judgment distinguish First Isaiah, while words of comfort and encouragement characterize Second Isaiah.

On the other hand, we find specific linguistic usages common to both parts of the book. Thus, for instance, the combination "Holy One of Israel," which is characteristic of First Isaiah, appears as well in Second Isaiah (41:14, 16, 20; 43:3, 14; 45:11; 47:4; 48:17; 49:7; 54:5; 55:5; 60:9, 14). Also, the expression "says the Lord," an imperfect tense, appears in both books instead of the regular perfect, "said" (1:11, 18; 33:10; 41:21; 66:9; cf. 40:1, 25). Such linguistic similarities do not question, however, the distinction between the books, which was already recognized in the twelfth century A.D. by the commentator Abraham Ibn Ezra (in his comments on Isa. 40:1).

The question remains: how did the two distinct books get tied together? We can only speculate. Perhaps it was just a technical matter, and a shorter scroll was attached to a longer one for preservation. It was then forgotten over the years that originally two separate manuscripts had been put together. Conversely, the combination may have been intentional, the product of a specific theological school that intended to create a continuous work. Thus, the period of judgment, which had been fulfilled, paved the way for the new period of comfort and consolation. We may assume that the author of Second Isaiah considered himself Isaiah's disciple. This may explain the similarities in idiom and phrases. Thus, in a rare passage where the author of Second Isaiah refers to himself, he describes God's words as teaching (50:4), using words resembling Isaiah's (8:16). Isaiah, in the difficult hour of "distress and darkness" (8:22), decided to seal his testimony (8:16–17). His spiritual disciple, who feels that the times have changed, notices that God has revealed himself to everyone (40:5) and considers himself as the one who carries on the master's testimony.

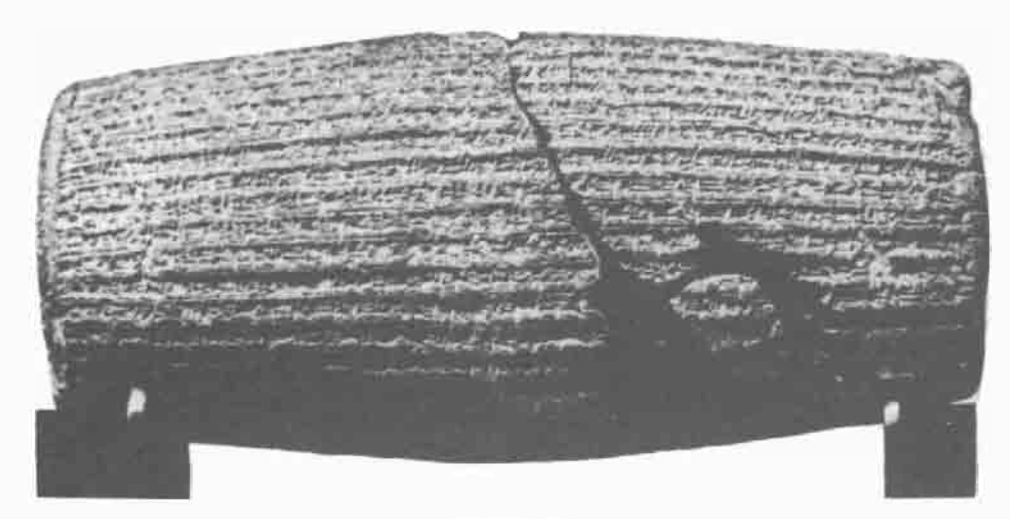
The Unity of First Isaiah: First Isaiah is divided into two major sections: prophecies (chaps. 1–35) and a historical account (chaps. 36–39). The prose material parallels the narrative of the book of Kings (2 Kings 18:13, 17–20:19). There are close similarities between Kings and Isaiah in spite of certain differences. It is assumed by most scholars that Isaiah relied on Kings (a theory recently challenged by K. A. D. Smelik). Thus, for instance, Isa. 36:1 is parallel to 2 Kings 18:13. The text from Kings that follows (18:14–16), describing Hezekiah's surrender to Assyria and detailing the heavy taxation Hezekiah had to pay on account of the Temple, is supported by the archaeological and Assyrian evidence that the siege and capture of the fortified city of Lachish was the climax of the entire Assyrian campaign (R. E. Clements). This text is missing from Isaiah. However, this may be understood as an intentional omission and the longer detailed text in chaps. 36–39 is assumed to be the original (notice, however, the addition of Hezekiah's psalm in Isa. 38:9–20). In any case, Isaiah 36–39 is a prose appendix.

The portrayal of Isaiah in the appendix is significant. Here he appears as a healer (2 Kings 20:1–7), an image that differs from his prophetic activities as depicted in his speeches. The image of the healer fits that of earlier prophets, such as Elisha's healing actions described, for example, in 2 Kings 4–5. One should note, however, that even in chaps. 1–35 Isaiah does not confine himself to the characteristic role of the classical prophet, as God's verbal messenger; he also acts

in a symbolically significant manner. Thus, he walked barefoot and naked in Jerusalem for three years as a symbol of the fate that would overtake Egypt and its ally, Ethiopia, at the hands of Assyria (chap. 20). The book of Isaiah the prophet ends in chap. 35. The book of Isaiah appears to have a long literary history. The Talmud (*B. Bat.* 15a) hints at the editorial process, which indicates that it was not Isaiah himself who wrote this book, but later scribes, Hezekiah and his school.

The Literary Shape of First Isaiah: The structure is complex. Even a brief glance at the chapters reveals several superscriptions (1:1; 2:1; 13:1). Isaiah himself states that he ceased his activity and sealed his prophecies as a testimony (8:16–17; see also 30:8). Furthermore, Isaiah's deeds sometimes are described indirectly in the third person (e.g., 7:1–9; 20). All this hints at the possibility that First Isaiah, even chaps. 1–35, is not a single composition.

Are there any indications of the development of a specific literary pattern for the arrangement of the book? A comparison with the book of Ezekiel and the Septuagint version of Jeremiah suggests a literary pattern:



1. Prophecies against Judah and Jerusalem: chaps. 1–12
2. Oracles against foreign nations: chaps. 13–23
3. Prophecies of hope and salvation: chaps. 24–35

The preceding arrangement may reflect a late editorial process that had the specific theological intention of concluding the prophecies of judgment with words of hope and comfort. The arrangements of the prophetic books of Amos (9:7–15) and Zephaniah (3:14–20) reveal a similar theological pattern. We should realize, however, that this literary scheme is rather forced. Prophecies of judgment are found in other than the first collection (chaps. 28–29). The oracles against the nations include prophecies against Judah's leaders as well (22:15–25); another oracle directed against foreign nations is located in chap. 34 (cf. 30:6–7). Prophecies of hope are found in the first collection as well (2:2–5; 11:1–10). It appears that we have to find a better explanation for the arrangement of the book.

According to many scholars, the various superscriptions and the prose material indicate the existence of a number of independent scrolls. In addition, several pieces (5:25–30; 9:7–17, 18–21) are connected on the basis of a refrain, "For all this his anger is not turned away and his hand is stretched out still," and a key word, "woe" (Heb. *hoy*; see also chaps. 28–33). Are these repeated stylistic formulas revealed in other literary collections? Based on literary patterns, many scholars suggest that First Isaiah is a construction of various literary fragments. Scholars are attempting to reconstruct the literary building blocks and thus to discover the original Isaiah. Two major theories are proposed: that at the beginning there were a number of independent short collections; or that there was an original text to which certain additions have been made.

Concerning such editorial processes and the additions, the assumption is that the original Isaianic speeches are the poetic pieces that relate to the concrete issues of the political times. The original prophecies in which Isaiah appears as God's messenger were collected as

Cyrus's clay cylinder text, 538 B.C., recording that he "liberated those who dwelt in Babylon from the yoke that chafed them."

scrolls by the prophet himself. The prose texts and sermons that are not restricted to concrete historical events (as 2:1–[4]5, or 11:1–10) were added by Isaiah's disciples. Likewise, the oracles against foreign nations were edited by the disciples. To these collections new material was added, usually prophecies of comfort and salvation, which supplements the original prophetic utterance of judgment. The explanation is that Isaiah's speeches were recited repeatedly in later periods when the prophetic word was a spiritual essential. The recitation of fulfilled prophecies of judgment confirmed the power of the prophetic word. Later, when under new conditions the audience needed a new message, it was added to the original prophecies. Thus, for example, 9:1–6 is an optimistic addition to a series of prophecies of judgment.

Recently a new proposal has been suggested (H. Barth) in regard to the prophecies of salvation, which are considered inauthentic and are found throughout the book. Many of these prophecies deal with the collapse of the Assyrian Empire (e.g., 10:24–26; 30:27–31). The explanation is that the Assyrian pieces were added during Josiah's reign (639–609 B.C.), a period in which the great Assyrian Empire was collapsing. This impressive political development was understood by certain religious schools in Jerusalem as God's interference and punishment. The poems and oracles of salvation were added as fresh commentaries to Isaiah's original speeches. There is also a sociopsychological explanation for the additions (R. P. Carroll). The issue concerns what happens to a community of believers when specific prophecies are not fulfilled. To release the believers' frustrations new prophecies adjusted to the new reality are added, thus keeping Isaiah's prophecy alive and meaningful.

The editorial theories are not free of criticism. The major problem lies in the literary-thematic criteria for the distinction between authentic speeches and the additions.

The Historical Period and First Isaiah's Speeches: The speeches provide a series of responses to specific political and domestic situations. These developments and the speeches are related. Isaiah has a broad view of world events and offers his specific prophetic interpretations of the political situation. His prophecies and visions must be studied not just as individual speeches but in light of the prophet's thematic way of thinking. Oracles of judgment do not have to contradict prophecies of comfort and salvation, as both may be integrated in Isaiah's prophetic view. The book deals with the two major political events that shocked Judah: the Syro-Ephraimite war (734–733/2) and the Assyrian threats on Jerusalem (734–701).

Isaiah's prophecy does not reflect these events merely as political-military developments; they are presented within a broader prophetic understanding. Chaps. 1–9 reflect the Syro-Ephraimite war, which threatened the house of David (see 7:6). This political and religious trauma, which brought the danger of breaking the sacred promise of God to David (2 Sam. 7), motivates Isaiah's response. The prophet tries to calm the frightened King Ahaz (Isa. 7:2) by reporting the near collapse of his enemies (7:5–9). Isaiah opposes Ahaz's inclination to use foreign aid from Assyria or Egypt (7:18–25). Since the king rejects Isaiah's advice, the prophet seals his words and awaits the future (8:16–18). The threat of replacing the house of David is answered by prophecies about the continuity of David's throne (9:1–6; 11:1–10). Isaiah does not restrict himself to the political situation, however. He deals in depth with the cause of the problem and points out the domestic issues such as the social-ethical misbehavior of the people (1:4–5, 10–17, 21–23; 3:16–26; 5:1–30). The war is God's punishment for the people's misbehavior. The punishment, however, is not final; Jerusalem will be purified and justice will be restored (1:26–27; 2:2–[4]5). Concerning chap. 6, regarded by many as Isaiah's call, his "inaugural vision," note should be taken of the message—to harden the hearts of the people (vv. 9–10). This response refers to the people's stubbornness and denial of the previous criticism (chaps. 1–5). The vision is therefore in its appropriate setting and reflects the prophet's feelings.

Chaps. 10–11 should be read in light of the implications of Assyria's threat. Ephraim and Aram had collapsed, and Judah was powerless against the Assyrians' military machine. This new political development invited a prophetic interpretation. Isaiah delivered a series of speeches that shed light on the meaning of the events and pointed out the causes of the catastrophe. He again indicated moral-ethical misbehavior as a cause (10:1–4). God's response is direct: Assyria is his means of punishment (10:5–6). However, Assyria exaggerates its self-reliance and will be punished (10:7–11). Isaiah is not pessimistic. He believes in the restoration of Judah and the house of David. He anticipates a new spiritual period of justice and peace (11:1–16).

The collection of oracles against the nations in chaps. 13–23 includes prophecies that are not Isaianic (chaps. 13–14 and perhaps also chap. 23). However, the collection includes a prophecy against Judah that concludes with a personal attack on two high officials (22:1–8). It appears that this collection is also integrated into Isaiah's thematic understanding. The structure of this collection resembles that of Amos, who starts with a series of prophecies against foreign nations and climaxes with a specific prophecy against Israel (1:2–2:16), which was the object of Amos's prophecy. The common theme in Isaiah's prophecies against other nations is the military defeats of the various nations. Hence, Isaiah repeatedly reveals his basic

religious-political conception. Read against Isaiah's prophetic understanding, this collection reveals his belief that the international political situation does not take place in a vacuum but is determined by God and does not exclude Judah. Consequently, all Judah's military efforts to protect itself will fail (22:1–11).

The visions of chaps. 24–35 again abstractly summarize Isaiah's general prophetic view: God's absolute universal domination and his punishment in the form of military defeat for misbehavior (24:1–5, 21–23; 28:14–22; 29:13–14; 30:1–3; 34:1). Isaiah, a master of language, moves from a visionary to a more concrete style. We should realize that he attempts to deliver his message effectively, using various styles and modes of speech, including poetry, as his means of communication. Characteristically, Isaiah concludes with an optimistic vision of the future (35:1–10). It is not necessary, therefore, to regard chaps. 34–35 with their enthusiastic tone as part of Second Isaiah's prophecy (C. C. Torrey, Y. Kaufmann; and see below).

First Isaiah, Conclusion: Isaiah's speeches are not developed methodologically in a specific thematic order. His speeches are responses to specific situations. Isaiah's major effort is to discover and present to his audience the relationship between cause and effect, sin and punishment—the connection between the people's moral-ethical misbehavior and the wars. He provides a general overview of his vision of Jerusalem and the house of David. Thus, reality and eschatology are mixed, creating Isaiah's profound political-religious viewpoint.

The Context of Second Isaiah; Time, Place, Political and Religious Conditions: The social and political elite of Judah were in Babylon in exile (2 Kings 24:12–16; Jer. 52:16–30). Evidence suggests that the exiles enjoyed political and religious autonomy to a limited degree. Many of the Jews in exile preserved their national and religious identity. Increased emphasis on the Sabbath as the expression of the covenant between God and his people has distinguished the Jews since this period (Isa. 56; 58:13–14). The exilic period is also noted for its national religious literary activity. The masterpiece of biblical historiography, the Deuteronomistic work (Deuteronomy–Judges), was developed and crystallized in this period. Nevertheless, there was a feeling of dissatisfaction among the exiles. The exiled prophet Ezekiel asks desperately: "How are we to go on living?" (33:10; see also 37:11). This pessimism was also expressed by the repeated phrase in Lamentations: "There is none to comfort me" (1:2; see also 1:16, 17, 21). It is reflected also in Ps. 137 and is presented by Second Isaiah (40:6–7). The exiles understood their pessimistic spiritual-religious condition to be a sign of neglect by God, and even as a sign of God's disappearance from the historical stage. This is the background of conditions faced by the author of Second Isaiah.

The unknown prophet was aroused by the momentous events occurring on the international political scene and was led to persuade the exiles that the immediate future held great promise and new hope. The sensational victories of Cyrus, king of Persia, and the threat to Babylon itself motivated Isaiah to consider Cyrus as God's agent (44:28; 45:12–23) who would change Israel's present hopeless national religious condition. Against the background of the spiritual crisis and the emergence of Cyrus, the prophet struggled with two main themes: the claim that God was not hidden from his people, and the insistence that the new political events were directed by God and that, consequently, they had direct implications for the exiles' future. These themes mainly underlie chapters 40–48.

The Historical Development of Second Isaiah: In 539 Babylon surrendered to Cyrus. In 538 Cyrus published his famous declaration allowing the exiled Jews of Babylon to return to Jerusalem and restore the Temple (Ezra 1:3–5; 2 Chron. 36:23; Ezra 6:3–5). An important issue in the interpretation of Second Isaiah's prophecy is whether the author addressed the exiles before Babylon's fall or following it. Do the main themes of the prophet's work fit the period preceding the fall of Babylon? Chaps. 40–66 do not reflect Cyrus's edict. One of the main themes of Second Isaiah is the people's skepticism about God's control over contemporary political events. Second Isaiah's argument would be inappropriate if Cyrus had already publicly granted permission to rebuild the Temple in Jerusalem. Furthermore, Second Isaiah's descriptions of the fall of Babylon are not realistic. In contrast to inscriptions that report that the city fell peacefully without a battle, Second Isaiah describes Marduk, Babylon's god, as being carried into captivity (46:1–2). It appears, therefore, that the author of Second Isaiah prophesied prior to 539. We may assume that he was active in the period following Cyrus's conquest of Lydia in 547, which made it obvious that Babylon's days were numbered.

The Structure of Second Isaiah: Formally, a concluding phrase, "There is no peace, says the LORD, for the wicked" (48:22; 57:21), divides chaps. 40–66 into three major parts. This division is close to the divisions concluded by modern research: 40–48, 49–55, and 56–66. It is commonly argued that chap. 56 starts a new book called Third Isaiah (or Trito-Isaiah), which is dated to the fifth century B.C. (see above).

Only a few scholars maintain that the entire twenty-seven chapters of Second Isaiah are a single book (C. C. Torrey, Y. Kaufmann). Another view holds that chaps. 49–66 are distinguished from 40–48 in location but not in authorship (M. Haran). This view holds that following Cyrus's edict the prophet returned to Jerusalem and continued his prophetic activity there. Zion is the background for this

material (49:14–18; 51:17–23; 54:1–3; 60:1–7; 62:1–9). In any case there is a certain thematic and stylistic difference between chaps. 40–48 and the remainder. Only in 40–48 is Cyrus mentioned, and only here are there arguments against the foreign gods, stressing Yahweh as the only God (40:12–31; 41:6–7; 43:8–13; 44:9–20; 46:5–11). The tone and mood of enthusiasm and encouragement of 40–48 are changed mainly in 56–66 to a stronger criticism of the people of Israel (56:9–57:12: 58; 59:1–18; 65:1–15; 66:1–10, 15, 17).

Second Isaiah's Literary Units: The composition of the book is the pivotal issue of the literary study of Second Isaiah. The questions involved are the determination of the literary units and the organization of the book as a whole. In general, two approaches have been taken with regard to these questions. The first considers the book to be a product of planned writing activity and sees the book as composed of large units. The second approach argues that the prophet delivered his addresses orally; hence the book is a collection of small units that once existed independently. The point of departure for the first approach is basically the issue of the content, supported at times by stylistic or structural analysis. On the other hand, the starting point of the second approach, i.e., the small independent units, is the formal formulas of opening and concluding speeches ("form criticism").

Another question involving the approach of independent prophetic units concerns the arrangement of the material. It has been argued (S. Mowinckel) that the small independent units were arranged mechanically according to key words or similarities in themes. Thus, each speech was placed on the basis of its association with the preceding speech. While form criticism concentrates on the external form of each speech and regards each one separately, the approaches that look at the book as a unified composition (J. Muilenburg, E. Hessler, C. Westermann) discuss the whole in relation to the individual components. Hence, they are able to explore the work's overall compositional techniques and are not restricted to the separate small units. The question of the structure of the individual units and the arrangement of the book as a whole depends on the function of the prophecies.

The author of Second Isaiah sought to change his audience's religious attitude. To accomplish this goal, he appealed to his audience, employing numerous means of persuasion. Contrary to the earlier prophets, Second Isaiah (esp. in chaps. 40–48) did not announce judgment and punishment, nor did he threaten. Rather, he sought to appeal to his audience through the effectiveness of his arguments and the impact of the style and expression of his proclamations. Such means of persuasion are rhetorical in nature. To present his argument persuasively, the prophet paid close attention to the organization of each address. Each address emerges from and is a response to a particular situation. An analysis of the book from this approach that focuses our attention on Second Isaiah's major efforts to affect his audience in chaps. 40–48 reveals that the material is composed of ten units: 40:1–11; 40:12–31; 41:1–29; 42:1–13; 42:14–43:13; 43:14–44:23; 44:24–45:13; 45:14–46:13; 47:1–15; 48:1–22. Another division based on stylistic-literary assumptions (e.g., J. Muilenburg) is 40:1–11, 12–31; 41:1–42:4; 42:5–17; 42:18–43:7; 43:8–13; 43:14–44:5; 44:6–8, 21–23; 44:9–20; 44:24–45:13; 45:14–25; 46:1–13; 47:1–15; 48:1–22 (see also E. Hessler's, C. Westermann's, and R. Clifford's divisions.)

The Songs of the Servant of the Lord (*Ebed Yahweh* Songs): There are four poems spoken by the servant of the Lord: 42:1–4; 42:5–7; 49:1–6; and 50:4–9, and two poems that speak about the servant: 50:10–11 and 52:13–53:12. The poems share a common theme: the servant suffers, ignored by the people around him, but he will be recognized in the future as God's servant and his mission to restore justice will be fulfilled. The poems occupy a special place in the history of interpretation and have significant theological meaning in the histories of Jewish and Christian interpretation (cf. Matt. 12:18–21; 1 Pet. 1:24–25). Scholars have debated whether to isolate the poems from their contexts or to consider them to be an integral part of Second Isaiah's message. Mention should also be made of Second Isaiah's other references to God's servant (41:8–10, 13; 42:19; 44:1–2).

The major question is the identity of the servant. Scholars are divided in understanding the servant as an individual or in a collective sense. There are many attempts to identify the servant as a specific public or historical figure (such as Jeremiah, Josiah, or Zerubbabel), including the prophet himself (61:1–2). In light of the frequent references to Israel as God's servant (see also 49:3) some scholars regard the servant as the people of Israel, sympathetically portrayed by Second Isaiah in order to arouse hope and feelings of mission. Another view holds that the servant is neither a particular figure nor a group, but a combination that represents a mythological-cultic and royal figure.

Third Isaiah: The opinion has already been stated that chaps. 56–66 comprise a separate collection of another anonymous prophet who was active during the period of Ezra and Nehemia in the fifth century B.C. (see above). The distinction, however, is not readily obvious and the portrayal of Zion may represent a shift in location but not necessarily a change in authorship. Chaps. 56–66 emphasize ritual requirements (56:2, 7; cf. 57:3–13; 65:1–7), the Sabbath (58:13–14), and the law. On the other hand, chaps. 60–62 convey optimistic expectations similar to those of Second Isaiah and may hint at Second Isaiah's influence.

OUTLINE OF CONTENTS

The Book of Isaiah

I. First Isaiah (1–39)
   A. Prophecies against Judah and Jerusalem (1–12)
   B. Oracles against foreign nations (13–23)
   C. Prophecies of universal judgment and Zion's subsequent role (24–27)
   D. Oracles of woe against Judah and Jerusalem (28–33)
   E. Prophecies of Zion's restoration after judgment (34–35)
   F. Historical account concerning Isaiah and Hezekiah (36–39)
II. Second Isaiah (40–55)
   A. The coming salvation of Yahweh, the only God; Babylon's fall and Cyrus as God's anointed (40–48)
   B. Promises of restoration for Zion/Jerusalem (49–55)
III. Third Isaiah (56–66)
   A. Prophecies of judgment against the restoration community (56–58)
   B. Call to repentance and community response (59)
   C. Promises of salvation (60–62)
   D. Community lament and God's response (63–64)
   E. Further prophecies of judgment and promises of final salvation (65–66)

66:1–4 rejects the building of the Temple, which reflects a view opposite to that of the cultic conception of Haggai and Zechariah, two other prophets of the period, who enthusiastically supported the rebuilding of the Temple around the year 520 B.C.

New Approaches to the Unity of the Book: The last decade or so has witnessed a growing interest in the question of how the whole book of Isaiah took shape (C. R. Seitz, R. E. Clements). There is no dispute, however, regarding the historical distance between chaps. 40–66 and what precedes. The issue, therefore, is editorial. It has been proposed that First and Second Isaiah basically constitute two separate books while chap. 35 was written as a bridging passage between the two main parts of the book (O. H. Stech).

On the other hand, stylistic and thematic similarities throughout the entire book suggest that Second Isaiah was influenced by and wrote consciously depending on the written form of First Isaiah. It has been proposed that Second Isaiah opened the book of (First) Isaiah, which had been sealed until the advent of the time of judgment. Second Isaiah joined his new proclamation to that of First Isaiah in order to situate his message through the former, just as he redacted (edited) First Isaiah to bind the two parts together. Thus, for instance, chap. 12 could have been written as part of Second Isaiah's redaction of First Isaiah. It shows similarity with the so-called "eschatological hymns of praise" found only in Second Isaiah (C. Westermann). Second Isaiah set chap. 12 in its present position as a conclusion to one of the main parts of the work, which he included in the book in order to manifest his idea of the new Exodus (H. G. M. Williamson). ***See also*** Babylon; Cyrus II; Hezekiah; Jerusalem; Scrolls, The Dead Sea.

Y.G.

Iscariot (is-kair´ee-uht), the surname of Judas, the disciple who betrayed Jesus (Matt. 26:14–16; 47–49). ***See also*** Judas.

Ishbosheth (ish-boh´shith; Heb., "man of shame"), the fourth son of Saul (2 Sam. 3:14–15). This version of his name appears in the book of Samuel and is, according to most modern scholars, a theologically corrected reading of the original name Eshbaal (which is preserved in 1 Chron. 8:33 and 9:39; the noun *ish* may, in fact, mean "gift," on the basis of Ugaritic; hence "gift of Baal"). The name was changed in order to avoid use of "Baal" in proper names (cf. Hos. 2:16–17). Upon the death of Saul, Ishbosheth attempted to rule all of the tribes. The tribe of Judah refused allegiance. With Abner as general, Ishbosheth set up his capital east of the Jordan River at Mahanaim (2 Sam. 2:8–10). After a stormy career, during which Abner deserted him, Ishbosheth was murdered by two of his own henchmen, Rechab and Baanah, who took his head to David at Hebron, expecting a reward. However, David's sense of justice led to the execution of the two criminals and the burial of the head of Ishbosheth at Hebron (2 Sam. 4). This event marked the end of Saul's brief dynasty. ***See also*** Abner; David.

M.A.F.

Ishi (ish´*i*; Heb., "[God has] saved [me]"). The name of members of the Judean (1 Chron. 4:20), Simeonite (1 Chron. 4:42), and Yerahmeelite (1 Chron. 2:31) branches of the Calebites as well as a leader of the Transjordanian Manassites (1 Chron. 5:24). It is also a term used by the KJV to transliterate the Hebrew term "my husband," which, according to Hos. 2:16 (Hebrew v. 18), is to be used instead of "my master" (Heb. *baali*) for God.

Ishmael (ish´may-uhl; Heb., "God has heard"). 1 The son of Abraham by the Egyptian hand-

maiden of Sarah whose name was Hagar (Gen. 16; 17; 21:1–21). He is especially celebrated in the Priestly source as one whom God would bless, multiply and make fruitful: "he shall be the father of twelve princes, and I will make him a great nation" (Gen. 17:20). Ishmael is circumcised (Gen. 17:25) at the age of thirteen and thus brought into the covenant of circumcision (v. 10), but not into the "everlasting covenant," as Isaac is (v. 19). The latter covenant evidently pertains to possession of the land (v. 8). The high standing of Ishmael in the Priestly source is seen not only in his genealogy, but also in his comparative age, since old age is worthy of honor: Abraham is 175 years old (Gen. 25:7); Isaac is 180 years old (Gen. 35:28); Jacob is 147 years old (Gen. 47:28); Ishmael is 137 years old (Gen. 25:7); Sarah is 127 years old (Gen. 23:1); and Joseph is 110 years old (Gen. 50:26).

Also in the Yahwistic and Elohistic sources, Ishmael is favored of God. The angel of the Lord who guarded Isaac (Gen. 22:11–13), Lot (Gen. 16:16–19:28), and Joseph (Gen. 48:16) also protected Ishmael's mother in her pregnancy (Gen. 16:6–14), and then protected both Hagar and Ishmael (Gen. 21:15–21). These sources reiterate that God will make Ishmael "a great nation" (Gen. 21:18). But a great difference remains between the father and this son: compare the favorable promise to Abraham (Gen. 12:3) with the statement about Ishmael: "his hand [shall be] against every man and every man's hand against him" (Gen. 16:12). According to the Elohistic source Ishmael dwelt in the Wilderness of Paran (Gen. 21:21) and became an expert bowman (v. 20).

2 The son of Nethananiah, a man of royal blood and the assassin of Gedaliah, whom the Babylonians appointed ruler of Judah after the fall of Jerusalem (2 Kings 25:25).

3 Other royal, courtly, and priestly figures (1 Chron. 8:38; 2 Chron. 19:11; 23:1; Ezra 10:22). ***See also*** Ishmaelites; Sources of the Pentateuch.

J.G.G.

Ishmaelites (ish´may-uh-l*i*ts), those who are related to Ishmael. **1** The descendants of Ishmael, who are listed by name (Gen. 25:13–16; 1 Chron. 1:28–31). The genealogy in Genesis 25 is probably from the Priestly source as evidenced by the common phrase "twelve princes" (Gen. 17:20; 25:16). The names indicate some affinities with the Edomites (see Gen. 36) with whom they intermarried (Gen. 28:9) and with the descendants of Keturah (Gen. 25:1–4; 1 Chron. 1:32–33). Root meanings of the patronymics reveal they were darkened (Kedar), perfumers (Mibsam), fierce (Hadad), settlers in Tema (Tema) or in encampments protected by stone walls (Jetur), "very wealthy" (Naphish), and ones who traveled "eastward" (Kedmah). **2** A synonym for traders between Gilead and Egypt to whom Joseph was sold (Gen. 37:25–28). They are also called Midianites (v. 28). The latter reference may reflect a second (Elohistic) version of the story. Scholars today, however, are more inclined to see in the variation of names a stylistic preference of a single author or editor. ***See also*** Ishmael.

J.G.G.

Ishtar (ish´tahr), a goddess in the Akkadian pantheon. Ishtar was widely worshiped in Mesopotamia from earliest times until at least the first century B.C. The etymology of her name is uncertain, although the relationship between the name "Ishtar" and the names of other Semitic goddesses and gods is clear (Astarte, Athtar). In the Akkadian language, "Ishtar" came to mean "goddess" and could be used as a common noun.

The cult of Ishtar was prominent at Nineveh, Arbela, and especially at Uruk (biblical Erech). Ishtar's famous temple, the Eanna, stood in Uruk, and because the Mesopotamian *Epic of Gilgamesh* was set in that city, she played an important role in that literary masterpiece. In the religion of Mesopotamia, Ishtar acceded to the position of the Sumerian goddess Inanna (Innin), with whom she was identified. In part the cult of the Semitic goddess Ishtar owed its prominence to the ascendancy of Semitic peoples in Mesopotamia.

Stele of Ishtar of Arbela standing on a lion. She is armed with a sword and quiver, and her right hand is extended in benediction; from Tell 'Ahmar, eighth century B.C.

Associated with the planet Venus, Ishtar was reckoned the child of the moon god Sin; her brother was the sun god Shamash (Sumerian Utu), and she had as her consort the sky god Anu, although she was sometimes reckoned the paramour of Tammuz (Sumerian Dumuzi). The cult of Ishtar and Tammuz, reflected in the myth "The Descent of Ishtar to the Nether World," enjoyed widespread popularity and made its way to Israel (Ezek. 8:14). It is often assumed that the "Queen of Heaven" (Jer. 7:18; 44:17–19) refers to Ishtar. The Bible preserves the name of Ishtar only in the personal name Esther.

Two aspects of the character of Ishtar were prominent: eroticism and belligerence. She was celebrated as a goddess of war, but at the same time she was vitally involved in the realm of sexuality and fecundity. When she descends to the nether world, mating and procreation cease on earth. She was not viewed with universal admiration. Her role in the *Epic of Gilgamesh* is undignified, and she is taunted by the hero Gilgamesh as a faithless lover. ***See also*** Erech; Tammuz. R.M.G.

Ishvi (ish'vi). **1** A son of Asher who went with Jacob to Egypt (Gen. 46:17); he is considered the ancestral head of the clan of the Ishvites (Num. 26:44). The name Ishvah, which is given as another son of Asher (Gen. 46:17; 1 Chron. 7:30; but omitted in Num. 26:44), probably identifies the same person and is a variant spelling of Ishvi that is (erroneously?) repeated in the text. **2** A son of King Saul and brother of Jonathan (1 Sam. 14:49); he is probably the same person elsewhere called Eshbaal (1 Chron. 8:33) and Ishbosheth (2 Sam. 2:8). ***See also*** Ishbosheth. D.R.B.

island, a body of land surrounded on all sides by water. The word, translated in the KJV as "isles" or "islands" (Heb. *'iyim*), means "regions with borders on the sea." Hence the word is frequently translated in the RSV as "coastlands" or "coasts."

A number of specific islands are referred to in the Bible. **1** "Isles of the sea" (KJV), which are Mediterranean islands (RSV coastlands) in general (Isa. 11:11; 24:15; 1 Macc. 14:5; cf. Ezek. 26:18). **2** Arvad, in northern Phoenicia, an island-city located two miles off shore (Ezek. 27:8, 11). **3** Cauda, a small island south of Crete where, Acts records, Paul took refuge during a storm (Acts 27:13–17). **4** Chios, an island off the northern coast of Ionia (Acts 20:15). **5** Cos, an island off the southwest coast of Asia Minor, fifty miles northwest of Rhodes, to which Paul sailed on his way back to Jerusalem (Acts 21:1). **6** Crete (biblical Caphtor), a famous island, 160 miles long, reputed to be the place of origin of the Philistines (Jer. 47:4; Amos 9:7). Paul sailed along its coast (Acts 27:7–21). It is also the area for which Titus was appointed as supervisor (Titus 1:5–14). **7** Cyprus (KJV: " 'isles' of the Kittim"), a large island located seventy-five miles off the northern Levant coast (Jer. 2:10; Ezek. 27:6; Acts 4:36; 11:19–20; 13:4; 15:39; 21:3; 16; 27:4). **8** Malta, a small island fifty miles south of Sicily, on which Paul, according to Acts, was shipwrecked (Acts 27:39–28:10). **9** Patmos, a small island off the Ionian coast, west of the island of Samos, on which John received his revelation (Rev. 1:9). **10** Rhodes, an island off the southwest coast of Asia Minor visited in the course of Paul's return to Jerusalem (Acts 21:1). **11** Samos, located off the Ionian coast, twelve miles southwest of ancient Ephesus (Acts 20:14). **12** Sicily, the largest of the Mediterranean islands. Although it is not mentioned by name, it was visited by Paul when he landed and stayed for three days at Syracuse, its leading city (Acts 28:12). **13** Tarshish, possibly Sardinia (Ps. 72:10; Ezek. 27:25). **14** Tyre, an island-city of the Phoenicians that was famous for its trade and wealth (Ezek. 26–28). It was conquered by Alexander the Great after he built a half-mile-long mole from the coast to the island. Thereafter it remained connected to the mainland.

The word "island" is used as a synonym for the nation(s) of the Gentiles (Gen. 10:5; Isa. 41:1; 42:4; 51:5). As a noun "island" is used to indicate nation(s) afar off (Isa. 41:5; 49:1; 66:19; Jer. 31:10). An island is a symbol of that which is taken to be permanent, but which at the end of time will be removed and flee away (Rev. 6:14; 16:20). J.G.G.

Israel (iz'ray-uhl), the collective name of the twelve tribes descended from Jacob, whose name was also "Israel" (Gen. 32:28; 35:10). In the Bible the people are called "the children of Israel" (usually rendered "the people of Israel" by the RSV) or simply "Israel." As a political designation "Israel" refers either to the nation as a whole or, during the period of the Divided Monarchy (924–721 B.C.), to the Northern Kingdom in particular, as distinct from Judah, the Southern Kingdom.

The Origin of the Name: According to biblical tradition "Israel" was the name of the ancestor of the people as well as the people themselves. We might conclude from this that the patriarchal name was the retrojection onto a common ancestor of the collective name of the people, who were called "the children of Israel" (KJV) just as the Ammonites were called "the children of Ammon" or the Edomites "the children of Edom." Modern analysis, however, shows that Hebrew *yisra'el*, "Israel," has the form of a personal name rather than a tribal or national name. It belongs to a well-known type of name and means "May God contend" or possibly "May God rule." This suggests that the patriarchal name has historical priority.

In Gen. 32:28 Jacob is given the name "Israel" after a struggle with a divine being on the bank of the Jabbok (the name *yisra'el* being

ISRAEL

understood there to mean "he strives [*yisra*] with God ['*el*]" [cf. Hos. 12:4]), and there is another account of Jacob's renaming in Gen. 35:10. The ancestor of the Israelites, therefore, was known by two names, a fact that suggests to many scholars that two patriarchs lie behind the figure of Jacob-Israel. Traditions about an originally distinct ancestor named Israel, in other words, were merged with those about Jacob as a consequence of an early process of tribal affiliation. If this hypothesis is correct, it seems likely that the "Israel" traditions belonged first to the people who occupied the central part of the country, i.e., the two half-tribes of Joseph (Ephraim and Manasseh [cf. Gen. 48]) and the tribe of Benjamin. These people traced their origin to a common ancestor, Israel. After the formation of the larger tribal organization, Israel was identified with Jacob, the patriarch of another group, and the name "children of Israel" was extended to apply to members of the new alliance as a whole.

The People of Israel: The earliest occurrence of the name outside the Bible is in a hymn celebrating the victories of the Egyptian king Merneptah, composed about 1230 B.C. The poem, which lists numerous enemies defeated in Palestine, contains the boast that "Israel has perished: its seed is no more." In the Egyptian text "Israel" is marked with the hieroglyphic determinative signifying "foreign people," not "foreign land." This is usually taken to mean that a group called Israel was present in Palestine at this time, but that they had not yet settled in the land and claimed territory for themselves.

Exactly what this group might have been, however, is impossible to determine. It is not likely that it was the fully developed twelve-tribe entity of biblical tradition. Although the Bible presents "all Israel" as a unified people, comprising the ancestors of all later Israelites, who acted in concert from the earliest times, it is improbable that any such unification was achieved before the time of David. We should probably think of a small group of tribes that gradually evolved into a political unit of national scope.

This is not to say, however, that Israel had no formal organization before the establishment of the kingdom. The biblical account of the premonarchical period and the rise of kingship (thirteenth–eleventh centuries B.C.) suggests that the monarchy was imposed on some kind of antecedent tribal order, which modern scholars have attempted to reconstruct from the biblical evidence on the basis of analogies with other tribal organizations. The term "amphictyony," which properly refers to certain twelve-tribe groups in early Greece and Italy, has frequently been applied to premonarchical Israel on the basis of supposed parallels of structure and function. Evidence for many of the distinctive features of the Aegean institution, however, is lacking in the case of Israel, and most scholars now prefer to speak more generally of a tribal league or confederation. There are also better analogies available: intertribal associations united by treaties and bonds of kinship were characteristic of Near Eastern nomadic society, as attested, for example, by the Mari archive, which provides information about the nomadic tribes of northwestern Mesopotamia in the second millennium B.C.

Thus the "Israel" of the Song of Deborah (Judg. 5), an ancient song celebrating a victory over the forces of Canaanite Hazor, was probably a loose confederation of tribes, perhaps ten in number (cf. vv. 14–18) and including some of the later tribes (Benjamin, Zebulun, Issachar, Reuben, Dan, Asher, Naphtali, and the half-tribe Ephraim) along with others (Machir, Gilead). The account of Joshua's covenant ceremony in Joshua 24 is often thought to preserve a memory of the establishment of this institution. It is impossible, however, to trace its history in the premonarchical period with any confidence. The various episodes of the book of Judges have been set in an "all Israel" framework by their editors, as if the ancestors of all the later Israelites were involved in every event, but a reading of the stories themselves shows that originally they were strictly local in character. The most we can say is that some kind of intertribal organization called "Israel" existed in Palestine from at least the last half of the thirteenth century B.C. until the time of the early monarchy, when the full twelve-tribe structure became the established ideal. Thereafter Israel's memories of its own premonarchical history were interpreted in light of this ideal structure, which was reinforced by the development of a genealogical scheme linking the twelve tribes together in a tradition of common origin.

The Nation of Israel: Sometime near the end of the first millennium B.C. Israel became a nation. The political ties that had bound the tribes together previously were routinized, and the group as a whole came to recognize the authority of a king. We should not, however, think of this transition as the replacement of the people Israel with the nation Israel. The concept of the people Israel, with its basis in kinship ties, remained as viable as ever during the monarchy and, indeed, provided the starting point for a new understanding of Israel after the fall of the state. During the period of the Israelite and Judean monarchies (924–721 B.C.), therefore, Israel was both a people and a nation.

Saul's Kingdom: Saul was Israel's first king, and it was under his rule that the old tribal alliance became a nation (late eleventh century B.C.). He came from a prominent family in Gibeah of Benjamin (1 Sam. 9:1–2), and after demonstrating his military leadership by a victory over the Ammonites (1 Sam. 11), he was

The stele of the Egyptian king Merneptah (ca. 1230 B.C.) contains the earliest mention of the name "Israel" (detail, bottom) outside the Bible. As used on the stele, the name signifies a "foreign people" rather than a "foreign land."

able to command the allegiance of a fairly extensive region in the central hills and Transjordan. We cannot be sure exactly how much territory Saul controlled, but the domains he passed on to his heir at his death included "Gilead and the Ashurites [so RSV, but probably read 'Geshurites,' inhabitants of northeastern Palestine in the region of the present-day Golan Heights] and Jezreel and Ephraim and Benjamin and all Israel" (2 Sam. 2:9). In this case "all Israel" is probably a summary reference to the preceding list of territories. In the time of Saul, then, "Israel" was a state in central Palestine bounded on the west by the coastal plain and on the east by the Transjordanian plateau; it ran along both banks of the Jordan from the Jezreel Valley south to Benjamin.

The United Monarchy: Before David became king of Israel, he was king of his native Judah (2 Sam. 2:4). His former alliance to the house of Saul, however, gave him a claim to Saul's throne, and eventually he united the two kingdoms under his rule (late eleventh century B.C.; 2 Sam. 5:1–3). It was the personal achievement of David, therefore, that joined Judah with Israel, creating the basis for the biblical view of a greater Israel encompassing both northern and southern Palestine. According to this view, which the biblical writers retrojected to the time of the conquest, Israel extended "from Dan to Beer-sheba," that is, from the southern wash of Mount Hermon in the north to the northern Negev in the south.

The Divided Monarchy: In fact, however, the historical Israel attained to the boundaries of the ideal Israel only for a brief period. The union of Israel and Judah did not survive the death of David's son Solomon (924 B.C.). The northern tribes refused to acknowledge the sovereignty of the king in Jerusalem, and Judah was left as a separate state. Nor were the two kingdoms together as extensive as the United Kingdom that preceded them. For only two short periods, during the reigns of Omri and Ahab in the first half of the ninth century B.C. and Jeroboam II a century later, did Israel expand to its Davidic-Solomonic borders to the north and east.

This history accounts for the ambivalence of the use "Israel" as a political designation in the historical books of the Bible. In the stories of the reigns of David and Solomon, when Israel and Judah were united under a single king, "Israel" is often used to refer to the larger nation (2 Sam. 8:15; 1 Kings 4:1). In the same materials, however, it can be used to designate the northern tribes as distinct from Judah (2 Sam. 19:41). In the account of the Divided Monarchy in 1 and 2 Kings "Israel" is ordinarily the Northern Kingdom as distinct from "Judah," the Southern Kingdom. Nevertheless, the ideal of a greater Israel persists in the literature after the account of the secession of the northern tribes, so that in 1 Kings 12:17, for example, we find reference to "the people of Israel who dwelt in the cities of Judah" (1 Kings 12:17). Even before the fall of Samaria (721 B.C.), therefore, "Israel" is sometimes used in reference to Judah (Isa. 1:3; 8:18), and after the destruction of the Northern Kingdom this usage becomes common (Ezek. 2:3).

The Idea of Israel: "Israel" is not only an ethnic and political designation in the Bible; it is also a central theological term. The idea of Israel as the chosen people of God pervaded the religious thought not only of the ancient Israelite community but of early Judaism and Christianity as well. We can discern two major phases in the early development of this idea.

First, there was the concept of Israel as the people chosen to live in the promised land. Fun-

damental to this concept was the notion that the land inhabited by the Israelite nation belonged to God. It was his land, and he chose one people to live in it to the exclusion of all others. This concept receives its primary articulation in the Hexateuchal narrative, i.e., the story that extends from Genesis through Joshua. There we are told that God summoned Abram to Canaan, promising that his descendants would take possession of the land and become a great nation there. From the twelve sons of Abram's grandson Jacob, whose name was also Israel, were descended twelve tribes. These "children of Israel" became enslaved in Egypt, but God rescued them, guided them through the desert, and brought them into Canaan. They conquered the land, eliminating its previous inhabitants, and settled in it, growing eventually into the great nation promised to Abram. This concept of Israel seems to have been a basic component of the theology of the pre-exilic community. Its most conspicuous feature is the centrality of the land.

Second was the concept of Israel as the people chosen to receive the Torah. This concept is expressed in the same biblical narrative, but in this case the climax of the story is the gift of the Torah at Sinai rather than the conquest of the land. In other words, our attention here is upon the Tetrateuchal narrative, i.e., the story that extends from Genesis through Numbers, and, more specifically, upon the Priestly materials ("P") within that narrative. God (*Elohim*, as he is usually called in this part of the story) is the universal creator, and it was his will that his human creatures should be blessed (Gen. 1:28). Because of their inclination toward error, however, it seemed impossible for human beings to live safely in the divinely created world. They tended to pervert the blessing into a curse. The divine solution was the election of one people through whom the other "families of the earth" could receive their blessing (cf. Gen. 12:3). God would give this people a set of instructions by which it would be possible for them to live safely in the world and receive the divine blessing as intended. This, then, was the reason for the call of Abram. From his grandson Jacob or Israel, the children of Israel were descended. After their escape from Egypt, they came to Mount Sinai, where God gave them the rules by which they were to lead their lives. This concept of Israel probably reflects the theology of the exilic (mid-sixth century B.C.) and postexilic (late sixth century and later) communities. Emphasis on the land, the chief characteristic of the pre-exilic concept (pre–586 B.C.), has been replaced by emphasis on the Torah.

Exilic and Postexilic Literature: A related idea, which receives its first clear expression in exilic literature, conceives of Israel as a vehicle by which the other nations would come to recognize and acknowledge the greatness of God. In the oracles of Ezekiel, for example, God explains his dealings with Israel as a means of vindicating himself in the sight of the nations (Ezek. 36:22–23). Israel, he says, will suffer the calamity of exile, "and all the nations shall see my judgment which I have executed" (39:21; cf. v. 23). Also, however, Israel will be resanctified, and "the nations will know that I the Lord sanctify Israel" (37:28; cf. 36:36). In short, God's purpose in the destruction and restoration of Israel is to demonstrate his justice and power to the nations. "So I will show my greatness and my holiness and make myself known in the eyes of many nations. Then they will know that I am the Lord" (38:23).

The same idea is expressed in Deutero-Isaiah's presentation of Israel as "witnesses" to the incomparability of God (Isa. 43:10, 12; 44:8). Eventually, we are told, the other nations will come to Israel in supplication, saying, "God is with you only, and there is no other, no god besides him" (45:14). This passage is sometimes cited as evidence that Deutero-Isaiah understood Israel to have a "mission to the Gentiles," whereby other nations were to be converted to the worship of God. The result envisioned, however, seems not to be the universal worship of God but rather the universal recognition of God's uniqueness. Accordingly, Israel's role is that of a witness, not a missionary.

Apocalyptic Judaism: In later Judaism the biblical concept of Israel as a people chosen by God to receive the Torah was combined with the apocalyptic expectation of the advent of the universal rule of God. The belief was that only when Israel was truly living according to the precepts of the Torah could the kingdom of God arrive. Apocalyptic groups dissented from the authority of those in power in Jerusalem, whom they regarded as corrupt and illegitimate. They believed themselves to be the true Israel and structured their lives accordingly in the conviction that by doing so they would make possible the final realization of the divine plan.

One such group was the Essene community at Qumran. They understood themselves as the "precious cornerstone" of Isa. 28:16, laid by God as "a sure foundation" (1QS 8.7–8). Their community organization into twelve tribes led by twelve tribal chiefs (1QSa 1.27–2.1), including both laity and priests, shows that they regarded themselves as the true Israel.

The Early Church: Likewise the early church, which also emerged from apocalyptic Judaism, understood itself as the legitimate heir to the ancient promises. Paul argued that the Jews had forfeited these promises, which had come to Abraham through faith, not the law (Rom. 4:13). Because "it is men of faith who are the [true] sons of Abraham" (Gal. 3:7), Christians, not Jews, could now claim to be descended from the Israelite patriarchs. The church was, in fact, "the twelve tribes in the Dispersion" (James 1:1). It follows that the early Christian community, like the Qumran community, regarded itself as the true Is-

rael, that is, "the Israel of God" (Gal. 6:16). Appropriating for the church language applicable to ancient Israel, the author of the First Letter of Peter addressed his audience as "a chosen race, a royal priesthood, a holy nation, God's own people" (1 Pet. 2:9).

Rabbinic Judaism: Paul, then, taught that the true Israel was descended from Abraham through faith, not the Mosaic law, which had served a temporary purpose that was now past (Gal. 3:17–26). By contrast, the Judaism of that time regarded the Torah as the one thing that distinguished Israel from the other nations. Although it was no longer possible to claim that the written Torah was the possession of Jews alone, this was still true of the oral Torah, which had been passed down alongside the written Torah and was now known and discussed by the rabbis. The oral Torah, though its authority was denied by the Sadducees, survived with the support of the Pharisees to find expression in the Mishnah, the Talmud, the midrashim, and other works based on them. There we find the rabbinic teaching that the Torah had been made available to the other nations, who were unwilling to live by such a restrictive code. The reason for Israel's special election, then, was precisely their willingness to accept and obey the Torah (*Abod. Zar.* 2b–3a; *Num. Rab.* 14:10; *Sipre Deut.* 343). ***See also*** Hebrews; Sources of the Pentateuch.

Israelite (iz´ray-uh-l*i*t), a descendant of Jacob. Before the Davidic empire split into two separate kingdoms in the tenth century B.C., the term "Israelite" signified every Hebrew. After that event, it properly connoted an Ephraimite as opposed to an inhabitant of Judah. The Israelite (i.e., the Northern) kingdom had its capital at Shechem, then at Tirzah, and finally at Samaria. The latter was destroyed by the Assyrians in 722 B.C., and Israelites were deported, only to become assimilated into the alien culture. Hopes that a remnant from the two kingdoms would some day come together again seem to have arisen in some circles (cf. Ezek. 37:15–22). In the NT, discussion took place over who actually could lay claim to the title "Israelite." Paul made a distinction between an Israelite by physical lineage and one forged through religious bonds (Rom. 2:28–29).

J.L.C.

Issachar (is´uh-kahr´; Heb., "hire"). **1** The ninth son of Jacob, his fifth by Leah (Gen. 30:14–18), and the eponymous ancestor of one of the twelve tribes of Israel. His name is evidently a verbal form from *sakar,* "hire, wages" (cf. Gen. 30:16–18). Issachar and his four sons immigrated to Egypt with Jacob's family (Gen. 46:13; Exod. 1:3; Num. 26:23–24; 1 Chron. 7:1). Jacob's blessing of Issachar seems to imply that the tribe would hire itself out to bear the burdens of others (Gen. 49:14–15). The tribe of Issachar was allotted the fertile territory between the eastern Jezreel Valley and the Jordan Valley (Josh. 19:17–23), i.e., the region known today as the Heights of Issachar. Its allotment extended from Mt. Tabor on the north to the edge of the hill country of Samaria on the south and included such towns as Jezreel (the winter palace of Ahab and Jezebel), Kesullot (modern Iksal, in the Jezreel Valley below Nazareth), Shunem (modern Solem), the home of the elderly couple who were hospitable to the prophet Elisha (2 Kings 4), and En-gannim (evidently the Beth-haggan of 2 Kings 9:27 and the Gina of the El Amarna Letters; modern Jenin). Issachar was an important factor in the battle of Deborah and Barak (Judg. 5:15). In fact, the territory of Issachar was the scene of a number of battles in ancient times, including those of Gideon (Judg. 7) and Saul (1 Sam. 28). **2** The son of Obed-edom, a Korahite gatekeeper during the reign of David (1 Chron. 26:5).

D.A.D.

Isshiah (i-sh*i*´uh). **1** A descendant of Issachar (1 Chron. 7:3). **2** One of David's mighty men (1 Chron. 12:6). **3** A leading member of the descendants of Rehabiah, possibly descended from Moses (1 Chron. 24:21; see 23:15–17). **4** A son of Uzziel from the tribe of Levi (1 Chron. 24:25). **5** A postexilic Israelite who divorced his foreign wife in response to Ezra's proclamation (Ezra 10:31).

issue, a term used in KJV to translate words referring to a male's bodily discharge (sore or venereal; Lev. 15:1–15), female bleeding (nonmenstrual; Lev. 15:25–30; Matt. 9:20), and a person's offspring (Gen. 48:6).

Italian Band. ***See*** Italy.

Italy (it´uh-lee), the boot-shaped peninsula extending about 750 miles from the Alps into the western part of the Mediterranean Sea. The name, according to ancient Greek writers, derives from a King Italos, who ruled the southern part in the late second millennium B.C. By the first century A.D., it had come to designate the entire peninsula.

Settled in remote antiquity by various tribes, Italy was in contact with Mycenaean traders in the second millennium B.C. By the middle of the first millennium, the north was organized into Etruscan city-states, while the south was so

heavily colonized by Greeks that it eventually became known to the Romans as Magna Graecia ("Great Greece"). Through the three Punic Wars (264–146 B.C.), Rome mastered the entire peninsula and began its expansion throughout the Mediterranean.

The earliest account of Jews in Italy is 1 Maccabees 8, which recounts the accomplishments of the Romans and a treaty with Rome made by Judas Maccabeus ca. 160 B.C. His brother Jonathan renewed the treaty some years later (1 Macc.12:1–4), and Simon sent a third delegation in 139 B.C. after Jonathan's death (1 Macc. 14:16–19, 24). After 63 B.C., Palestine was under either direct or indirect control of Rome.

By NT times, there were Jews living in Rome and elsewhere in Italy. Among those banished by a decree of Claudius (ca. A.D. 49) were Aquila and Priscilla (Acts 18:2). On his way to Rome, Paul sailed up the west coast from Rhegium to Puteoli, where he encountered fellow Christians, and others came out from Rome to welcome him along the Appian Way (Acts 27:1; 28:13–16).

"Those who come from Italy" sent greetings to the addressees of Hebrews (13:24). In Acts 10:1, Cornelius is identified as a centurion of the "Italian Cohort" (KJV: "centurion of the band called Italian"), stationed in Caesarea. ***See also*** Aquila; Claudius; Cornelius; Maccabees; Paul; Prisca, Priscilla; Puteoli; Rhegium; Roman Empire; Rome. C.H.M.

Ithai (ith'ī; Heb., abbreviation of "God is with me"; according to others, "God exists"), the son of the Benjaminite Ribai and one of David's mighty men (1 Chron. 11:31). His name is given as Ittai in 2 Sam. 23:29. ***See also*** Ittai.

Ithamar (ith'uh-mahr), the fourth and youngest son of Aaron (Exod. 6:23). Ithamar's priestly line continued to enjoy prominence, but not dominance, according to biblical writers, even after the fall of Jerusalem (1 Chron. 24:1–18). The two elder sons of Aaron died when presumptuously offering incense before the Lord, and the priestly succession thus devolved upon Eleazar and Ithamar (Lev. 10:1–7). Kohathites who carried the Ark were subservient to Eleazar; Gershonites and Merarites who performed more menial duties were subservient to Ithamar (Num. 4:1–33). The line of Eleazar is traced through Zadok, the line of Ithamar through Abiathar of Shiloh. Ezekiel recognized only the succession through Zadok, but the Chronicler recognized the validity of both priestly lines. ***See also*** Aaronites; Zadok. J.G.G.

Ithmah (ith'muh), a Moabite mercenary in David's employ (1 Chron. 11:46), one of the sixteen mighty men added by the Chronicler to David's thirty.

Ithnan (ith'nan), a city in the list of Canaanite cities assigned to Judah whose site in the south (Josh. 15:23) is as yet unidentified.

Ithra (ith'ruh), the father of Joab's cousin Amasa who served as chief of staff for Absalom in his rebellion against his father, David. Ithra is called an Israelite in 2 Sam. 17:25 (see RSV note), but an Ishmaelite in 1 Chron. 2:17, where the RSV translates his name as "Jether." ***See also*** Jether.

Ithran (ith'ran). **1** The son of Dishon and descendant of Seir the Horite (Gen. 36:26; 1 Chron. 1:41). **2** The son of Zophah; descendant of Asher (1 Chron. 7:37).

Ithream (ith'ree-uhm; Heb., "the kinsman is abundance"), the sixth son of David, born at Hebron by Eglah (2 Sam. 3:5; 1 Chron. 3:3).

Ithrite (ith'rīt), the designation of Ira and Gareb, two of David's "thirty" soldiers (2 Sam. 23:38; 1 Chron. 11:40). The word occurs as the name of a family listed in a genealogy and located in the town of Kiriath-jearim (1 Chron. 2:53). However, the name originally may have signified that David's two heroes were from the town of Jattir in the hill country of Judah (Josh. 15:48; 21:14).

Ittai (it'ī; Heb., "with God"?). **1** "The Gittite" who swore an oath of loyalty to David during Absalom's revolt (2 Sam. 15:19–23). He was a commander of one-third of David's army, thus ranking with Joab and his brother Abishai (2 Sam. 18:2–12). His loyalty to David is remarkable because he was a foreigner, only recently arrived in Judah. The epithet "the Gittite" indicates that he was from the Philistine city of Gath. **2** The son of Ribai of Gibeah in the territory of the tribe of Benjamin; he was one of David's "thirty" soldiers (2 Sam. 23:29; 1 Chron. 11:31). ***See also*** Philistines.

Ituraea (it'yoor-ee'uh), an area northeast of the Sea of Galilee. Mentioned only once in the Bible as being, together with Trachonitis, the territory ruled over by Philip, son of Herod the Great and brother of Herod Antipas (Luke 3:1), Ituraea was the region occupied by the tribe descended from Jetur, son of Ishmael (Gen. 25:13–16; 1 Chron. 1:31). In 1 Chron. 5:9–10 the tribe is described as the enemy of Reuben, Gad, and Manasseh, i.e., as seeking to penetrate Bashan and north Transjordan. The exact position of their homeland is not altogether clear, but it was probably the western slopes of Mt. Hermon, from which they expanded into the southern Beqa'a area between Lebanon and Anti-Lebanon. In the second century B.C. they dominated the entire Beqa'a region and were regarded by the Romans as

skilled and dangerous marauders. Pompey subdued them in the mid-first century B.C., though they remained troublesome. After the death of their ruler Lysanias I in 36 B.C. the territory was divided and part was given to Cleopatra. In 20 B.C. the emperor Augustus transferred part, or perhaps all, of this area to Herod the Great. ***See also*** Bashan; Hermon; Herod; Philip; Syria; Trachonitis; Trans-jordan.
D.B.

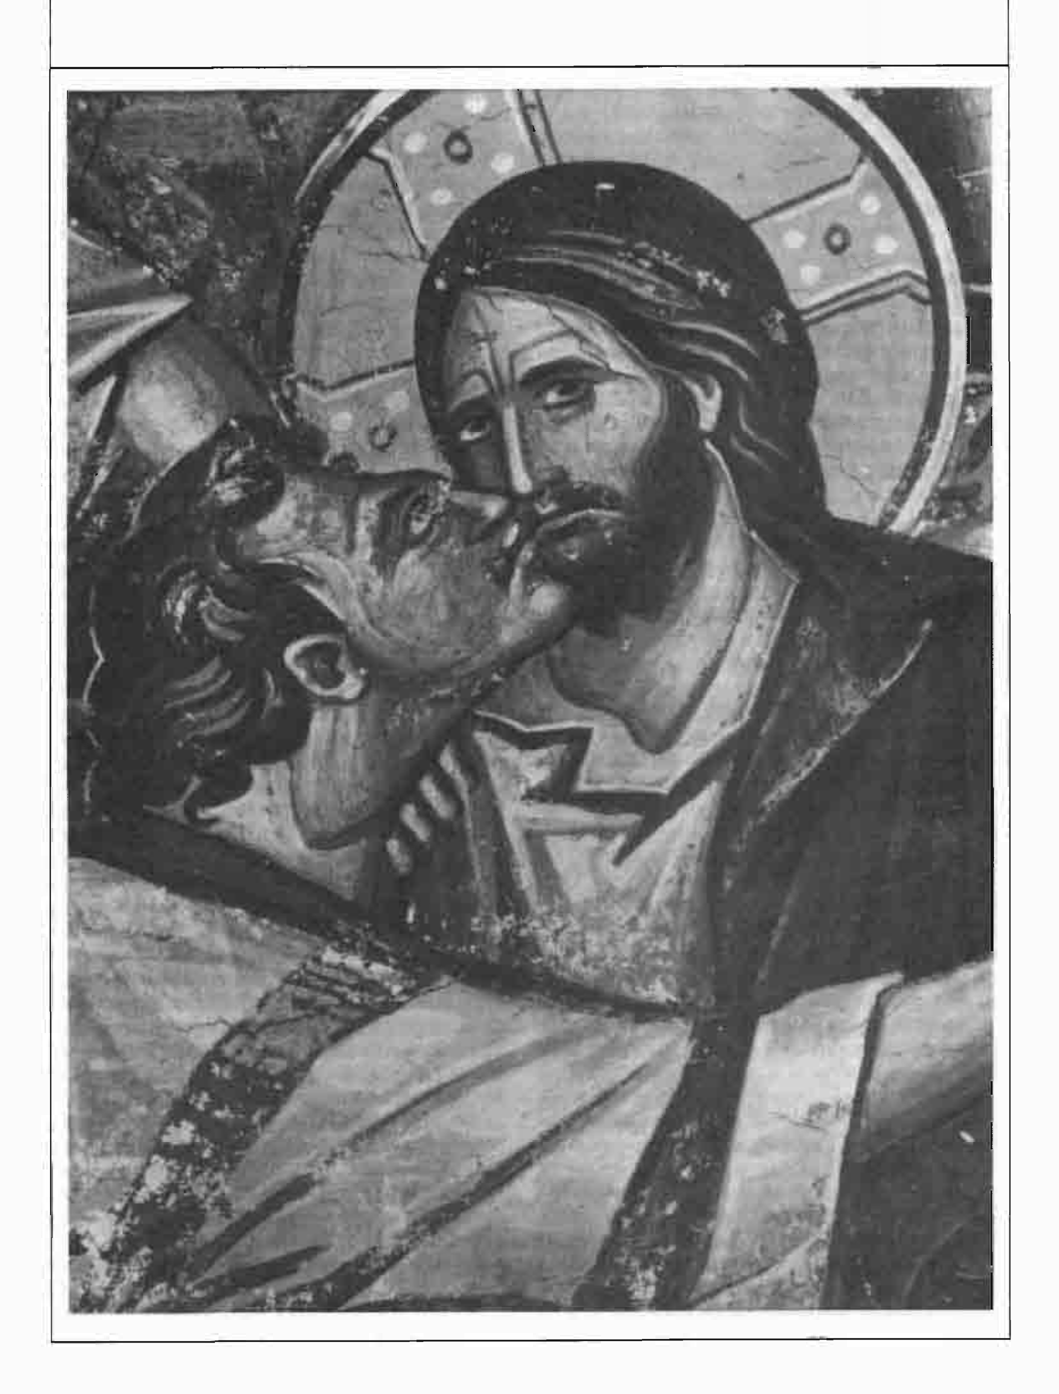
ivory, a costly material in ancient times, derived from the tusks of elephants (or sometimes hippopotami) and used for jewelry and various other luxury items. The Hebrew name, *shen,* means "tooth." The ivory used in the land of Canaan may have come from elephants of Syria, the so-called Asiatic elephant, which was well known in the upper Euphrates area until it became extinct in the first millennium B.C. Egyptian ivory was procured from African elephants. A third source of ivory for the ancient Near East was India. The use of ivory is attested as early as the Neolithic period (8000–4500 B.C.) in Egypt, where it was employed for making harpoons. In Palestine, from the Mesolithic period (12,000–8000 B.C.) on ivory is attested, and it becomes quite common during the Chalcolithic period (4500–3000 B.C.). Ivory was also in use in Mesopotamia during the early periods. In the excavations at Alalakh, in northern Syria, a storeroom full of elephant tusks was discovered in the eighteenth-century B.C. palace of King Yamrilim. Large collections of ivory wares dating from the Late Bronze Age (1550–1200 B.C.) have been found in excavations of Syrian and Palestinian sites.

At Ugarit ivories were discovered in the royal palace, including both figurines and ivory plaques carved in relief. At Megiddo similar ivories were found in the city's palace. In addition, 380 items of ivory were found in a storeroom adjacent to the palace. One of the most famous pieces is an ivory knife engraved with a scene from the royal court, portraying the king seated on his throne, which is supported by cherubim. He is drinking from a cup while one girl (a princess?) presents him with a lotus flower and another girl serenades him with a harp. A procession is approaching the throne, headed by a soldier followed by two naked male captives and a horse-drawn chariot. From behind the throne two cup-bearers are bringing refreshments to the king. Such ivories aid in reconstructing everyday life in ancient Canaanite palaces.

During the Iron Age (1200–586 B.C.) ivory continued to enjoy popularity as a luxury item. The Assyrian kings often list ivory alongside the precious metals and stones received as tribute. Sennacherib (ca. 705–681 B.C.), for example, mentions tribute that included beds of ivory, chairs of ivory, and tusks. Collections of ivories from this period have been found in Egypt, Palestine, Syria, and Mesopotamia. Those of Nineveh, Arslan Tash, and Samaria are the most famous. The Samaria ivories are carved in high relief and exhibit a decorative repertoire taken from Egyptian art. They were probably carved by Phoenician or Syrian artisans. On the back they are inscribed with Hebrew letters, presumably to facilitate their mounting on furniture.

Ivory is mentioned a number of times in the OT. Solomon's fleet of ships, on its three-year voyages, brought back ivory along with gold, apes, peacocks, and other exotic items (1 Kings 10:22; 2 Chron. 9:21). Solomon had his "great throne" inlaid with ivory (1 Kings 10:18). "Palaces adorned with ivory" are mentioned in Ps. 45:8; and in Song of Sol. 5:14 the exquisite body of the lover is compared to polished ivory. Amos prophesies against the

Detail of an ivory knife from Megiddo that depicts a scene from the royal court, twelfth century B.C.



"palaces of ivory" of the Northern Kingdom (Amos 3:15); and he scornfully refers to the "beds of ivory" (i.e., beds inlaid with ivory) upon which the aristocratic women of Samaria lie (6:4). ***See also*** Amos, The Book of; Samaria, City of. D.A.D.

Izhar (iz'hahr; Heb., "fresh [olive] oil"). **1** The son of Kohath and grandson of Levi (Exod. 6:18) and the ancestral head of one of the major subdivisions of the Kohathite clan of Levites, the Izharites (Num. 3:27). He was the father of Korah, the leader of the wilderness rebellion against Moses and Aaron (Num. 16:1). **2** The son of Ashur and Helah; a descendant of Judah (1 Chron. 4:7).

Opposite: Judas's kiss of betrayal (Matt. 26:49); fresco at the fourteenth-century St. Clement Church, Ohrid, in the Macedonia region of former Yugoslavia.

J

J, the siglum for the Yahwist (from the German form *Jahvist*), one of the sources of the material in the Pentateuch. ***See also*** Sources of the Pentateuch; Yahwist.

Jaazaniah (jay-az′uh-n*i*′uh; Heb., "the Lord hears"). **1** The son of Maacathi, or the Maacathite who remained with Gedaliah, the governor of Judah, after the destruction of Jerusalem by the Babylonians (2 Kings 25:23; Jer. 40:8). **2** The son of Jeremiah (not the prophet) who was a Rechabite whose religious principles were tested by the prophet Jeremiah (Jer. 35:3). **3** The son of Shaphan; he appears in Ezekiel's vision of the idolatrous elders in the Temple (Ezek. 8:11). **4** The son of Azzur; one of the twenty-five evil leaders in another of Ezekiel's visions (Ezek. 11:1).

Jabal (jay′buhl), the first son of Lamech by Adah. According to the tradition preserved in Gen. 4:20, Jabal is credited with being the founder (or "culture hero") of nomadism in the seventh generation after Adam. With his brothers, Jubal and Tubal-cain, he was thus considered an originator of ancient social patterns. The meaning of the name is not certain, although it may derive from a Semitic word indicating "ram."

Jabbok (jab′uhk), modern Nahr es-Zerqa (Arabic, "the blue river"), one of the four major eastern tributaries of the Jordan. The Jabbok rises in Amman, flows northeast to modern Zerqa, and then west until it joins the Jordan twenty-five miles north of the Dead Sea. In Gen. 32:22–32 Jacob fights with his divine adversary (who in an older form of the story may have been the river demon) at Penuel on the Jabbok; there is word play here on the names: Jacob (Heb. *y'aqōb*) wrestled at the Jabbok (*wayyē'ābēq*) (*yabbōq*). The Jabbok was a natural boundary, forming a border of Sihon's kingdom (Num. 21:24; Josh. 12:2; Judg. 11:13, 22), the Ammonites (Num. 21:24; Deut. 2:37; 3:16; Josh. 12:2), and Reuben and Gad (Deut. 3:16). It was a thoroughfare from the Jordan Valley to the Transjordanian plateau; cf. Judg. 8:4–9, where Gideon pursued the Midianites up the Jabbok passing Succoth and Penuel. Other sites on the Jabbok and its tributaries are Gerasa (modern Jerash), Adam, and Tulul edh-Dhahab. M.D.C.

Jabesh, Jabesh-gilead (jay′bish, jay′bish-gil′ee-uhd; Heb., "dried"). **1** The father of King Shallum of Israel (2 Kings 15:10, 13–14). The name may, however, represent a place rather than a person, meaning that Shallum's family lived at Jabesh.

2 A town east of the Jordan River, frequently called Jabesh-gilead. The name is evidently related to that of the Wadi Yabis, rising at Mihna north of Ajlun in the Gilead highlands. Scholars now usually accept the identification with the joint site of modern Tell el-Meqbereh (apparently the residential area) and Tell Abu Kharaz (a powerful fortress overlooking it) on the north bank of the *wadi* where it enters the Jordan Valley about five miles (8 km.) south of Pella. Others, however, place it at Tell el-Maqlub somewhat further up the valley on the basis of Eusebius's statement that in the early fourth century A.D. Jabesh-gilead was still a great city "at the sixth milestone from the city of Pella" on the road to Gerasa.

Jabesh-gilead first appears in Israelite history in the strange story of how all the men and married women were killed because no one from the town had come to the assembly at Mizpah, but four hundred young virgins were given to the men of Benjamin (Judg. 21:8–15). Later, when Nahash the Ammonite threatened to gouge out the right eye of every man in Jabesh-gilead, Saul, who had only recently been anointed king, came to their rescue and utterly routed the Ammonites. This victory is said to have convinced even his detractors that he was fit to rule Israel (1 Sam. 11). The people of Jabesh-gilead remained profoundly grateful and when, some years later, Saul and his sons died fighting against the Philistines on Mt. Gilboa, "all the valiant men arose, and went all night" to rescue their bodies from the walls of Beth-shan, where the victorious Philistines had triumphantly hung them. The bodies were then ceremonially burned and the bones buried under a tamarisk tree (1 Sam. 31:8–13). As soon as he heard of this, David, now accepted as king in Judah, with his usual generosity sent messengers praising the men of Jabesh for what they had done for his erstwhile enemy (2 Sam. 2:4–7). He also indicated that he had now become king in Saul's place, but it seems probable that their strong loyalty to the family of Saul kept the people of Jabesh faithful to Saul's ineffective son Ishbosheth, whom Abner had made king over Gilead and northern Palestine (2 Sam. 2:8–10). ***See also*** Abner; Ammonites; Benjamin; David; Gerasa; Gilboa; Mizpah; Nahash; Pella; Philistines; Saul. D.B.

Jabin (jay′bin), the king of the Canaanites (ca. 1100 B.C.), who fought against the Israelites according to Joshua 11 and Judges 4. In Joshua 11, Jabin, who led a coalition of Canaanite petty princes, was defeated at the Waters of Merom and was executed (Josh. 11:10). In Judges 4:2, Jabin is called "king of Canaan who reigned in Hazor" and his army commander Sisera was defeated by the Hebrew leaders Deborah and Barak near the Brook Kishon (cf. Ps. 83:9). Scholars debate whether these two accounts from Joshua and Judges refer to a single battle, whether the same Jabin is mentioned in both stories, and whether the name Jabin is original to the traditions of both books. M.Z.B.

Jabneel (jab´nee-uhl; Heb., "God is builder"). **1** A city in northwest Judah (Josh. 15:11). Jabneel is the Jabneh of 2 Chron. 26:6 and Jamnia of the Apocrypha (1 Macc. 4:15; 5:58; 2 Macc. 12:8, 9). This was the site of the Jamnia council of A.D. 90. It is believed by some that at this council the Jewish Sanhedrin established the canon of Hebrew Scriptures. **2** A northern border city of the tribal allotment of Naphtali, west of the south end of the Sea of Galilee (Josh. 19:33). S.B.R.

Jachin (jay´kin; Heb., "he establishes"). **1** The son of Simeon (Gen. 46:10; Exod. 6:15) and ancestor of the "Jachinite family" (Num. 26:12). **2** A priest (1 Chron. 24:17; cf. 9:10; Neh. 11:10). **3** The name of the pillar on the right of the entrance to the Temple in Jerusalem. ***See also*** Jachin and Boaz.

Jachin (jay´kin) **and Boaz** (boh´az), the names of the pillars standing to the right and left of the entrance to the Temple in Jerusalem (1 Kings 7:21; 2 Chron. 3:15–17). These were cast of bronze/copper. According to 1 Kings 7:15 and Jer. 52:21 each pillar stood 18 cubits high (ca. 26.5 feet), had a circumference of 12 cubits (ca. 17.5 feet), and was hollow, with a thickness of 4 fingers (ca. 3 inches). Each was surmounted by a bowl-shaped capital 5 cubits high (ca. 7.5 feet), ornamented with checkerwork, wreathed with chainwork, and bedecked with lily leaves 4 cubits high (ca. 6 feet). Varying dimensions for the height of the pillars and of the capitals are provided in 2 Chron. 3:15 and 2 Kings 25:17, respectively. From the description in 1 Kings 7:21 the location of the pillars is not entirely clear, but according to 2 Chron. 3:15 they were free-standing at the Temple's entrance. Similar items flanking temple entrances have been noted at Khorsabad, are graphically depicted on coins from Cyprus, Sardis, Pergamum, and Sidon, on a clay model of a temple from Idalion (Cyprus), on a relief from Quyunjiq, and are described by Herodotus as having flanked the entrance to the sanctuary of Herakles at Tyre. The presence of such pillars may also be indicated by pillar bases at the entrances of the temples at Canaanite Hazor and Tell Tainat.

The function these pillars may have served is uncertain, but the suggestion of the scholar W. Robertson Smith that these may have been fire altars, i.e., that the bowl-shaped capitals served as huge cressets in which the fat of sacrificial animals was burned, finds support in the employment of the term *gullot* (Heb.) to designate the bowl-shaped capitals (1 Kings 7:41), for the noun in singular number, *gullah,* denotes the bowl atop the lampstand in Zechariah's vision (Zech. 4:2).

The meaning of the name "Jachin" is "he establishes," but that of Boaz, which is the same as that of David's great-grandfather (Ruth 4:17, 21–22), is unknown.

At the time of the destruction of Jerusalem in 586 B.C., the pillars were dismantled, and, along with other metal objects from the Temple, were removed as booty to Babylon (2 Kings 25:13). S.G.

jackal (*Canis aureus*; Heb. *tannoth*), a member of the dog family similar in looks to the wolf, though considerably smaller in size, with a relatively shorter tail and smaller ears. A nocturnal carrion eater, the jackal also devours fruit and crops and kills chickens and other small animals. Its distribution range includes southeast Europe, southern Asia and northern Africa and it is still fairly common in Palestine and Jordan today. Its preference for a dry habitat is alluded to in Isa. 35:7 and 43:20. Numerous passages in the OT refer to the jackal prowling around settlements and in Mic. 1:8 its characteristic wailing howl is mentioned. According to Neh. 2:13 a well named after the jackal existed outside Jerusalem. Its lair could symbolize a destroyed or deserted settlement (Jer. 9:11). I.U.K.

Jacob (jay´kuhb; Heb., "heel grabber" [Gen. 25:26] or "supplanter" [Gen. 27:36]). **1** An OT patriarch. He is the brother of Esau, the son of Isaac and Rebekah, the father of Dinah and of twelve sons whose names are those of tribes. Jacob's own name was changed to "Israel" (Gen. 32:28; 35:10). The name "Jacob" was probably a shortened form of Jacob-el (Heb., "may God supplant") and hence originally bore witness to a divine, rather than a human, action. Jacob not only embodies and represents the nation, Israel, but also typifies the settler-farmer, the trickster, the reverent worshiper of God, the man of gallantry, the successful emigré and herder, the penitent brother, and the benevolent father.

Because the traditions concerning Jacob feature sites in northern Israel (Bethel, Shechem) and in northern Transjordan (Mahanaim, Penuel), it is generally agreed that Jacob was a northerner. Many authorities favor placing Jacob in the Middle Bronze Age (ca. 1950–1550 B.C.) and see an association between Jacob and the Hyksos movement in Egypt (ca. 1720–1570 B.C.). Because of the Aramaean presence in northern Mesopotamia, other authorities are inclined to place the historic Jacob at the beginning of the early Iron Age (ca. 1200–900 B.C.) when a sizable incursion of Aramaeans into northern Mesopotamia took place. Regardless of date, the diversity of style in the traditions about Jacob give evidence of their having come into being over a long period of time.

Pattern of Arrangement of the Jacob Traditions: Recent investigations, however, have brought to light the fact that these traditions have been arranged with an order and sophistication previously unsuspected, in that the first element corresponds to the last, the second element to the second from last, etc. This pattern of arrangement

has been variously called concentric, mirrorlike, or chiastic (from the Greek letter chi, which is shaped like an X).

Genealogical framework (Gen. 25:1–11)

A. Death of Abraham; burial by two sons (Isaac, Ishmael); genealogy and death of Ishmael; birth and youth of Esau and Jacob (Gen. 25:12–34)
  B. Regional strife (in southern Israel): Isaac vs. the Philistines; honorable covenant (chap. 26)
    C. Beginnings of fraternal strife in Cisjordan (Jacob vs. Esau: settler-farmer vs. hunter); Isaac blesses Jacob not Esau (chap. 27)
      D. Departure of Jacob alone to northeast with theophany enroute at Bethel (chap. 28)
        E. Arrival alone at the northeast (Haran in Upper Mesopotamia); marriage to Leah and Rachel; acquisition and naming of sons by Leah; commencement of strife with Laban (chap. 29)
          F. Acquisition and naming of sons by handmaidens and of first son (Joseph) by Rachel (Gen. 30:1–24)
          F′ Preparation to leave the northeast; acquisition of herds (Gen. 30:25–43)
        E′ Departure from the northeast with flocks, progeny, and two wives; conclusion of strife with Laban in a covenant in Gilead (Gen. 31:1–32:2)
      D′ Return from the northeast with theophany enroute at Penuel; change of name to Israel (Gen. 32:3–32)
    C′ Conclusion of fraternal strife in Transjordan (Jacob vs. Esau: herder vs. herder); Jacob blesses Esau (Gen. 33:1–17)
  B′ Regional strife (in northern Israel): Jacob's sons vs. Shechemites; deceitful covenant; putting away of foreign gods (Gen. 33:18–35:5); theophany at Bethel; change of name to Israel (Gen. 35:6–7, 9–15); combines parts of E and E′
A′ Birth of second son by Rachel (Benjamin); death of Rachel; genealogy of Israel; death of Isaac; burial by two sons (Esau, Jacob; Gen. 35:8, 16–29)

Genealogical framework (chap. 36)

Because the Priestly material in 35:6–7, 9–15 is disruptive of the chiastic pattern, it is clear that the one responsible for the chiastic arrangement (possibly the one who combined the Yahwistic and Elohistic sources) worked independently from the Priestly source. It is widely agreed that the genealogical relationship of Jacob to his sons is a literary construct, but one that accurately reflects tribal, sociological realities; the genealogical relationship to Abraham and Isaac is also a literary construct but of less certain sociological significance.

In his dream (Gen. 28:12) Jacob sees angels ascending and descending a ladder to heaven; from the twelfth-century Lambeth Bible. (The binding of Isaac appears on the right.)

Theologically Jacob, like Abraham and Isaac, is the recipient of the divine promise of land and plentiful progeny (Gen. 28:13–15). Divine manifestations are made to Jacob (Gen. 28:10–22; 32:3–22) despite the fact that he engages in deception (Gen. 27). This biblical agent of blessing (see Gen. 48–49), like others, is not flawless. Jacob's death and burial is described in Gen. 49:28–50:14.

2 The father of Joseph, the husband of Mary (Matt. 1:15–16). ***See also*** Esau; Genesis; Isaac; Israel; Patriarch; Sources of the Pentateuch.

Jacob, the blessing of, the title accorded the poem of Gen. 49:1–27; it derives from the poem's postscript, Gen. 49:28b. Ostensibly the death-bed observations in Egypt of Jacob-Israel regarding

his sons, the evaluations are of the Israelite tribes as they were settled in Canaan (Gen. 49:28a). The figure through whom the poet speaks, the patriarch Jacob, who is now at the point of death, is the eponymous ancestor of the federated tribes of Israel. Of the component poems, those on Judah (Gen. 49:8–12) and Joseph (Gen. 49:22–26) predominate and pertain to the kingdoms of Judah and Israel. The poem was composed, then, not much earlier than the inauguration of the Divided Monarchy, and Jacob's evaluations of the tribes have reference to their roles in the disintegration of the federation. Because Joseph alone is unequivocally blessed, the perspective of the poet is that of one sympathetic to the Northern Kingdom. ***See also*** Poetry. S.G.

Jacob's Well, the setting for Jesus' encounter with a Samaritan woman in John 4. Of considerable depth, its still waters contrasted with Jesus' "living [i.e., flowing or bubbling] water . . . welling up to eternal life" (John 4:14). Its location is fixed by reference in v. 20 to "this mountain," Gerizim, revered by Samaritans, and in v. 5 to the field Jacob gave Joseph (Gen. 33:18–20 with 48:22; see the RSV margin: "*Shekem*, shoulder"). Shechem is thus the correct context; Sychar in v. 5 is probably a corrupted form of Shechem.

Early Christian tradition correctly connected Jacob's Well to one a quarter-mile southeast of ancient Shechem's edge, now sheltered in the old crypt beneath the unfinished Greek Orthodox church in modern Balatah. Measurements of its depth to the water table fluctuate between 105 and 75 feet. Much of the shaft was hewn through the soft chalk of the valley floor. From it one could see the ruined Samaritan sanctuary on the spur of Gerizim now called Tell er-Ras, 1,950 feet above it. ***See also*** Gerizim; Samaritans; Shechem; Sychar. E.F.C.

Jael (jay'uhl; Heb., "mountain goat"), the wife of Heber the Kenite, who is celebrated in the Song of Deborah (Judges 5) and in the prose version of Judges 4 for her part in the aftermath of the miraculous victory of the Israelite militia over a superior Canaanite army during the period of the judges. Since the Kenites, a seminomadic group with longstanding ties with the Israelites, evidently were not threatened by Canaanite expansionism and thus were on good terms with the chief Canaanite king in the north, Jabin of Hazor (Judg. 4:17), the Canaanite general Sisera sought refuge among them when he fled following the defeat of his forces. Jael offered him refreshment and then, probably while he rested, smote him with a tent peg. As a heroine acting on behalf of the Israelites, Jael is an example of the way in which, during this pioneering period, unlikely figures served the Israelite cause. ***See also*** Deborah. C.L.M.

Jah (jah), a shortened, archaic form of the sacred name of God (KJV, Ps. 68:4). It is also found in theophoric names, as Jerem*iah*, Isa*iah*, where the person's name contains the divine name.

Jahath (jay'hath). **1** A Levite, the son of Gershom and father of Shimei (1 Chron. 6:43). **2** A Levite, the son of Libni (Ladan) and grandson of Gershom (1 Chron. 6:20); but elsewhere called Jehiel (1 Chron. 23:7). **3** A Levite, the son of Shimei and grandson of Gershom (1 Chron. 23:10–11). Because of the repetition of names in these lists it is possible that the names have become disordered through scribal errors and that these all represent the same person. **4** A Levite member of the Shelomoth family of the Izharite clan (1 Chron. 24:22). **5** A Levite of the clan of Merari who helped repair the Temple during King Josiah's reforms (ca. 621 B.C.; 2 Chron. 34:12). **6** A descendant of Judah of the clan of the Zorathites (1 Chron. 4:2). D.R.B.

Jahaz (jay'haz), a Moabite city that had been taken by the Amorite king Sihon and made a part of his kingdom. It was the site of the battle between the Amorites and the Israelites in which Sihon was killed and the Israelites took possession of a large part of the land east of the Jordan (Num. 21:23–26). The city was among those assigned to the tribe of Reuben and later given to the Merarite clan of Levites (Josh. 13:18; 21:36; called Jahzah in 1 Chron. 6:78). It appears in the Mesha inscription (Moabite Stone) as being fortified by Israel but captured by the Moabite king Mesha and two hundred men (ca. 850 B.C.; see 2 Kings 3:4–5). It was still in Moabite hands in the time of Isaiah (ca. 742–701 B.C.; Isa. 15:4; Jer. 48:34). From the place names that occur with Jahaz, one can infer that it was located in the vicinity of Heshbon northeast of the Dead Sea. It has sometimes been identified as modern Khirbet el-Medeiyina about eleven miles northeast of Heshbon, although the site is not certain. ***See also*** Amorites; Moab; Moabite Stone, The. D.R.B.

Jahaziel (juh-hay'zee-uhl; Heb., "El [God] sees"). **1** One of Saul's kinsmen who joined David's fighting men at Ziklag (1 Chron. 12:4). **2** A priest who was appointed by King David as musician to celebrate the arrival of the Ark of the Covenant at the tabernacle in Jerusalem (1 Chron. 16:6). **3** A Levite, the third son of Hebron of the clan of Kohath (1 Chron. 23:19). **4** A Levite who was a descendant of Asaph. He prophesied to King Jehoshaphat (ca. 874–850 B.C.) that he would not need to fight the invading allied armies of Edom, Moab, and Ammon because God would fight for him. The armies were destroyed in the Valley of Beracah after they began fighting with each other (2 Chron. 20:1–30). **5** The father of an unnamed (Ben-jahaziel?) member of the clan of Shecaniah who returned with Ezra from the Babylonian captivity (Ezra 8:5). ***See also*** Beracah. D.R.B.

Jahweh (yah´weh), an alternate transcription of Yahweh, the unpronounced name of God. ***See also*** God.

Jair (jay´uhr). **1** A son of the tribe of Manasseh who conquered the region of Argob in Gilead (Num. 32:41; Deut. 3:14). The captured cities were called Havvoth-jair, and were sixty in number (Josh. 13:30; 1 Kings 4:13). In 1 Chron. 2:22, Segub of Judah is the father of Jair and his mother is from Manasseh. Possibly, one of the descendants of Jair is appointed David's priest (2 Sam. 20:26). **2** According to another tradition (Judg. 10:3–4), a judge, also of Gilead, whose thirty sons possessed thirty cities, also called Havvoth-jair. **3** The father of Mordecai, a descendant of King Saul (Esther 2:5; see 1 Sam. 9:1). **4** The father of Elhanan (2 Sam. 21:19; 1 Chron. 20:5). ***See also*** Judges, The Book of. J.U.

Jairus (jay-*i*´ruhs), the synagogue ruler who fell before the feet of Jesus and begged him to

Jesus raising Jairus's daughter (Mark 5:21–43); from a fourth-century sarcophagus, Rome.

heal his only daughter who was at the point of death. When it was learned that the daughter had already died, Jairus was advised not to trouble Jesus further. Jesus encouraged Jairus with the words, "Do not fear, only believe," in contrast to the mourners whose lack of faith in Jesus led to derisive laughter. Jesus, by raising the young girl, manifested his power to overcome death (Mark 5:21–43; Luke 8:40–56).

Jalam (jay´luhm), the son of Esau and Oholibamah the Hivite. He was a clan chieftain of the Edomites (Gen. 36:5, 18).

James (jaymz), the English equivalent of the Greek *Jacobus,* apparently a common name in the first century. **1** James, the son of Zebedee (Matt. 4:21; 10:2; Mark 1:19; 3:17) and brother of John (Matt. 17:1; Mark 3:17; 5:37; Acts 12:2), with whom he was called by Jesus to be one of the Twelve (Matt. 4:21; Mark 1:19–20; Luke 5:10–11). Jesus nicknamed James and John "Boanerges," meaning "sons of thunder" (Mark 3:17). The two are prominent in the various lists of the Twelve (Matt. 10:2–4; Mark 3:16–19; Luke 6:14–16; Acts 1:13). With Peter, they were present when Jesus raised Jairus's daughter (Mark 5:37; Luke 8:51), at the transfiguration (Matt. 17:1; Mark 9:2; Luke 9:28), and in the Garden of Gethsemane (Matt. 26:37; Mark 14:33). The brothers (or their mother) request special places beside Jesus at the time of the messianic kingdom (Matt. 20:20–23; Mark 10:35–40). They are clearly very close associates of Jesus. Acts 12:2 reports James's martyrdom by decapitation at the command of Herod Agrippa I. **2** James, the son of Alphaeus. Identified in the apostolic lists as one of the Twelve (Matt. 10:3; Mark 3:18; Luke 6:15; Acts 1:13), little else is known about him. He is sometimes identified with the "James the younger" of Mark 15:40. **3** James, the brother of Jesus. The relationship of Jesus to "the brothers of the Lord" (1 Cor. 9:5; cf. Matt. 13:55; Mark 6:3; Acts 1:14; Gal. 1:19) is much debated. Possibilities include literal brothers (or half-brothers or stepbrothers) of Jesus, more distant relations of Jesus (e.g., cousins), or close friends and associates of Jesus. Though apparently not followers during Jesus' ministry (Matt. 12:46–50; Mark 3:31–35; Luke 8:19–21; John 7:3–5), the brothers are reportedly with the Twelve and others after Jesus' resurrection and ascension (Acts 1:14), and James is identified as one to whom Jesus appeared (1 Cor. 15:7). Eventually, James emerges as the recognized successor (along with the elders) to the leadership role originally exercised by Peter and the apostles (Acts 15 and following). Paul acknowledges James's role of leadership (Gal. 2:1–12), and Acts 15 reports his persuasive defense of the gentile mission. Both the Jewish historian Josephus and the Christian Hegesippus (according to the fourth-century church historian Eusebius) report that James was put to death by the priestly authorities in Jerusalem a few years before the destruction of the Temple in A.D. 70. **4** James, the father (KJV: "brother") of Judas (one of the Twelve; Luke 6:16), otherwise apparently not mentioned in the NT. ***See also*** Agrippa I; Alphaeus; Apostle; Boanerges; Disciple; Jacob; John the Apostle; Judas; Twelve, The; Zebedee. P.L.S.

James, the Letter of, the first of the "catholic" or "general" Epistles in the NT. Addressed to "the twelve tribes in the Dispersion" (1:1), the letter is intended for the church at large. The affinities with the Gospel of Matthew (James 1:6, cf. Matt. 7:7; James 1:22, cf. Matt. 7:21; James 4:11, cf. Matt. 7:1; James 5:12, cf. Matt. 5:34–37) suggest that the recipients are Jewish Christians in or near Palestine. Although no precise information is given about the location and circumstances of the readers, the vehemence against the rich (2:6–7; 5:1–3) who oppress the commu-

nity and blaspheme its "name" (2:7) indicates that the readers are socially marginalized.

Form and Content: Although it has the common epistolary introduction (1:1), the book lacks common epistolary characteristics. It appears to be composed of self-contained units without obvious development of thought or sustained argument. The dominant stylistic features of the units include the frequent address ("brothers": 1:2; 2:1; 3:1; 5:19; cf. 3:13; 5:7) followed by the imperative, which gives instructions to the community on various topics. This form, commonly called "paraenesis," resembles that of the Sermon on the Mount, the hortatory sections within Paul's Letters (e.g., Rom. 12–13), and similar units in Jewish literature (e.g., *T. 12 Patr.;* Tob. 4).

Despite the absence of obvious thematic coherence, the recurring themes in James indicate that the author has provided more than a random collection of exhortations. Chap. 1 serves as a table of contents for the book, announcing themes that are developed in chaps. 2–5.

The separate units in James are held together by an emphasis on deeds or "works," whereby one keeps the "law of liberty" (1:25; cf. 2:9, 10; 4:11) and becomes a "doer of the word" (1:22–23). The law that Christians keep is the love command, "you shall love your neighbor as yourself" (2:8), not the ritual commandments of the OT. Observance of the love command precludes the show of partiality (2:1–13), lack of compassion for the poor (2:14–26), and slanderous speech against a brother or sister (4:11–12; cf. 3:1–12). "Pure religion" involves concern for the helpless (1:27). Christian behavior includes a pattern of life that is not controlled by desire (4:13–5:6) or worldliness (4:1–6) but that manifests submission to God (4:7–10; 5:7–11).

The apparent contrast between James and Paul on the question of faith and works (James 2:24; cf. Rom. 3:28) has suggested to some that James was written in opposition to Paul. The language in Paul and James is so similar that some relation between the two writers is probable. Although they use the language of faith and works in different ways, however, the most likely explanation is that James is to be understood not as a direct polemic against Paul but rather as a critique of the misuse of Paul's teaching on justification by faith.

Authorship and Date: The author identifies himself only as "James, a servant of God and of the Lord Jesus Christ" (1:1). Because only one James was apparently of such stature as to speak with authority in the latter part of the first century, one may assume, with the ancient church, that the book purports to be by the brother of Jesus. This view has been questioned, however, on the following grounds: first, the excellent Greek of the Letter makes authorship by a Galilean unlikely; second, the fact that 2:14–26 appears to be a reaction against the use of Paul would appear to suggest a date later than that of James's death (A.D. 66), allowing time for the collection and use of Paul's letters; and third, the debate within the early church regarding authorship would be unlikely if the book had in fact been written by the brother of Jesus. None of these arguments is conclusive, however. The Letter is probably a collection of exhortations preserved in Palestinian Christianity under the authority of James. ***See also*** Faith; General Letters; James; Justification; Law; Love; Matthew, the Gospel According to; Paul; Poor; Religion, Religious; Sermon on the Mount, The; Tongue; Wealth; Wisdom. J.W.T.

OUTLINE OF CONTENTS

The Letter of James

I. Epistolary introduction (1:1)
II. Introduction of major themes (1:2–27)
  A. Enduring trials (1:2–4, 12–15)
  B. Prayer and divine wisdom (1:5–8)
  C. Rich and poor (1:9–11)
  D. Wisdom from above (1:16–18)
  E. The use of the tongue (1:19–21)
  F. Doers of the word (1:22–27)
III. Development of major themes (2:1–5:20)
  A. Rich and poor in the assembly (2:1–13)
  B. Doers of the word (2:14–26)
  C. The use of the tongue (3:1–12)
  D. Prayer and divine wisdom (3:13–4:10)
  E. Doers of the law and judging one's brother (4:11–12)
  F. Rich and poor and the pursuit of wealth (4:13–5:6)
  G. Endurance of trials (5:7–11)
  H. On swearing (5:12)
  I. Prayer and faith (5:13–18)
  J. The recovery of a brother (5:19–20)

Jamin (jay´min; Heb., either "right-hand" or "south" [on the right facing east]). **1** A son of Simeon who went with Jacob to Egypt (Gen. 46:10); he became the head of the clan of the Jaminites who left Egypt with Moses (Exod. 6:15; Num. 26:12). **2** The son of Ram, a descendant of Judah (1 Chron. 2:27). **3** A son of Simeon (1 Chron. 4:24). **4** One, probably a Levite, who explained to the people the law read by Ezra (Neh. 8:7).

Jannes and Jambres (jan´iz, jam´briz), legendary (Egyptian) magicians who opposed Moses (Exod. 7:11–23), becoming thereby typical of active unbelief (2 Tim. 3:8) in both Jewish and Christian thought. Though not named in other biblical texts, they appear often in later

Jewish and Christian traditions and comprise the title of a volume first mentioned in Origen's commentary on the Gospel of Matthew.

Japheth (jay'fith), one of the three sons of Noah (Gen. 5:32; 6:10; 7:13; 9:18, 23, 27; 1 Chron. 1:4), evidently either the youngest (he is normally listed third) or the second son (cf. Gen. 9:22, 24). According to the Table of Nations in Genesis 10, Japheth was the ancestor of a number of widespread ethnic groups known to ancient Israel, including: Gomer (the Cimmerians, who inhabited the Black Sea region, and later, Asia Minor; perhaps related to the Scythians); Magog (possibly the Scythians); Madai (the Medes of the Iranian Plateau); Javan (the Ionians, representing the Hellenic group); Tubal and Meshech (in Akkadian, Tabal and Mushku, two peoples of Asia Minor); Tiras (often identified with the Etruscans, but this is uncertain); Ashkenaz (the Ashguza of Assyrian inscriptions, a Scythian country); Riphath (unknown); Togarmah (Hittite Tagarma, between Asia Minor and the Upper Euphrates); Elishah (Cyprus); Tarshish (the identification of this famous toponym is disputed); Kittim (the Cretians, or a Hellenic people on Cyprus); and the Dodamin (possibly to be read "Rodanim," referring to the inhabitants of Rhodes). ***See also*** Noah. D.A.D.

Japhia (juh-fi'uh). **1** A king of Lachish in southern Judea, allied against Gibeon (Josh. 10:3), and executed by Joshua at a Makkedah cave (vv. 22–26). **2** A son of David (2 Sam. 5:15; 1 Chron. 3:7 14:6). **3** A town on the southern edge of the territory of Zebulun (Josh. 19:12), a short distance southwest of the Nazareth of Jesus' day.

Jareb (jair'ib), an Assyrian king. References to a King Jareb (KJV: Hos. 5:13; 10:6) are now usually understood as a Hebrew form of the standard Assyrian title *malku rabu,* known also in Aramaic, which means "great king," although other translations (e.g., "patron") are possible. The prophet refers thus to an Assyrian king of the second half of the eighth century B.C., perhaps Tiglath-pileser III.

Jared (jair'id), antediluvian son of Mahalalel (Gen. 5:15–16) and father of Enoch (Gen. 5:18–19); he lived a legendary 962 years (Gen. 5:20). Listed as the fifth person following Adam in the pre-Flood genealogy (1 Chron. 1:2), he is sixth from the beginning in the genealogy cited in Luke 3:37.

Jarmuth (jahr'muhth; Heb., "a height"). **1** A city belonging to the tribe of Judah formerly controlled by the Amorites whose king was killed and the city taken by Joshua (Josh. 10:3–23; 12:11; 15:35; Neh. 11:29). It is probably modern Khirbet Yarmuk, ca. eight miles from Beit Jibrin, south of Beth-shemesh. **2** A levitical city located in the tribal area of Issachar (Josh. 21:29). The archaeological remains from this site are predominantly Early Bronze Age (ca. 3000–2000 B.C.).

Jashar (jay'shuhr; Heb., "upright, righteous"; KJV: "Jasher"), **the Book of,** a source apparently containing heroic songs, cited twice in the OT: in the account of Joshua's battle at Gibeon, when "the sun stood still" (Josh. 10:13), and again in David's lamentation for Saul and Jonathan (2 Sam. 1:18). A third possible citation from this source is 1 Kings 8:12–13, where the Septuagint (LXX) adds, "is it not written in the book of songs," a reading that is perhaps due to a simple transposition of two Hebrew consonants. The nature of the "book" has been a matter of discussion from pre-Christian times. It was apparently a collection of archaic poetry which, though well known in ancient Israel, has not survived, perhaps because it was transmitted primarily in oral form by professional singers. D.L.C.

Jashobeam (juh-shoh'bee-uhm; Heb., "the people will return"). **1** The son of Zabdiel the Hachmonite. He was the commander of David's elite group of thirty fighting men (1 Chron. 11:11), a position apparently also held at one time by Abishai and Amasai (1 Chron. 11:20; 12:18). Jashobeam is credited with killing three hundred men in one battle and later became the commander of a division of twenty-four thousand men under King David (1 Chron. 27:2). Some scholars understand Josheb-basshebeth the Tahchemonite as a textual variant of the same name (2 Sam. 23:8), while others think he is an entirely different member of David's group. **2** A Levite of the clan of Korah who joined David's fighting men at Ziklag (1 Chron. 12:6); he may be the same as 1. D.R.B.

Jason (jay'suhn), a famous Greek name often utilized as a family name by Hellenistic (i.e., Greek-speaking) Jews for such Hebrew names as Joshua or Jeshua. **1** A Jewish high priest, ca. 174–171 B.C., who obtained the priesthood by bribery, fostered a policy of Hellenization, was deposed, and, after unsuccessful attempts to regain the priesthood, died in exile (2 Macc. 4:7–5:10). **2** According to Acts 17:5–9, Paul's host while the latter was establishing a Christian community in Thessalonica. After a riot occasioned by Paul's missionary work, Jason was required, as part of his role as patron, to accept legal responsibility for the future activity of Paul. It may be the same Jason who sends greetings in Rom. 16:21. A.J.M.

jasper. ***See*** Breastpiece; Jewelry.

Jattir (jat'uhr), a hill country village assigned to the tribe of Judah (Josh. 15:48) and allocated to levitical descendants of Aaron (Josh. 21:14; 1

Chron. 6:57). Residents received part of the war spoils from David after his victory over the Amalekites at Ziklag (1 Sam. 30:27). Consensus identifies the site as Khirbet 'Attir, southwest of Hebron and northeast of Beer-sheba, although no specific evidence for occupation during David's time has yet been found.

Jaulan (joh´luhn). *See* Golan.

Javan (jay´vuhn). **1** The fourth son of Japheth (Gen. 10:2; 1 Chron. 1:15). His name, like the names of the fifth son (Tubal) and the sixth son (Meshech), also became the name for the area he settled, 2 below. **2** A region in Asia Minor (Gk. Ionia; Isa. 66:19; Ezek. 27:13). In the passage in Isaiah, Javan and Tubal are specifically referred to as "coastlands." In the latter passage, a famous lament, Ezekiel states that Javan, Tubal, and Meshech trafficked with Tyre in slaves and vessels of bronze. Ionia was located between Aeolia and Doria. Famous cities of Javan (Ionia) were Miletus, Ephesus, Smyrna (Rev. 2:8–11), and Magnesia. **3** A name for Greece overall, hence in Joel 3:6 "Greeks" is literally "sons of Javan," and in Daniel 8:21 "the king of Javan" is clearly Alexander the Great. "Javan" also means "Greece" in Zech. 9:13; Dan. 10:20; and 11:2.

J.G.G.

javelin. *See* Weapons.

Jazer (jay´zer), a site in modern Jordan. References to this site in the OT are to a settled place and in two instances to the territory around the settlement (Num. 32:1–3; Josh. 13:25; 21:39). At various times the site belonged to Amorites, Israelites, Ammonites, and apparently Moabites (Num. 21:24, 32; Josh. 13:25; Isa. 16:8; Jer. 48:32; 1 Macc. 5:8). References to the site are also found in the writings of the Jewish historian Josephus and the Christian scholar Jerome. It is probably located a few kilometers west of present-day Amman, with several places as likely candidates.

jealousy. 1 A term used of God to refer to the unique relationship between God and his people (Exod. 20:5; Deut. 5:9; Josh. 24:19; 1 Kings 14:22). They are not to provoke God's "jealousy"/wrath by idolatry or sinful behavior (Deut. 32:16; 1 Cor. 10:22). **2** What humans show as zeal or ardor (2 Cor. 9:2; 11:2; Rom. 10:2). **3** Envy, a negative quality in humans (Gen. 26:14; Ecclus. 30:24; 1 Cor. 3:3; Rom. 13:13; 2 Cor. 12:20; Gal. 5:20; Jas. 3:14, 16).

Jebus (jee´buhs), a Canaanite village in central Palestine. The Jebusites were children of Canaan (Gen. 10:16). Three passages equate Jebus with Jerusalem (Josh. 15:8; 18:28; Judg. 19:10), leading many to propose that Jebus was the pre-Davidic name for Jerusalem. The data are not plentiful, however; the E source refers to Jebusites only once (Num. 13:29).

Such an identification of Jebus as Jerusalem is contained in 2 Sam. 5:6–9 and 24:18–25, however. Those passages argue that since the Jebusites were in Jerusalem then Jebus was the same as Jerusalem. This theory is problematic in light of the reference to Jerusalem in the Tell el-Amarna tablets. One could argue that Jebus and Jerusalem are two different names for the same city used simultaneously, but it is no longer possible to argue that Jebus was the name for pre-Davidic Jerusalem in light of those Tell el-Amarna texts.

Identifying the exact location of Jebus involves a number of problems. The term occurs in the boundary lists of both the tribe of Judah and the tribe of Benjamin (Josh. 15:5b–11; 18:15–19). If one accepts the parenthetical comment in Josh. 15:8 that Jebus is Jerusalem, then the other geographical designations in Josh. 15:5b–11 do not fit. Another problem is that Jebus is not listed as being on the Benjaminite side of the tribal allotment (Josh 18:15–19). The tribal history on the contrary recounts that the men of Judah took Jebus (Judg. 1:8–9). Yet Benjamin is mentioned with regard to Jebus (Judg. 1:21; see also Josh. 15:63). Some scholars argue that the Benjaminite material that mentions Jebus in connection with the Benjaminites is older and that the material that places Jebus in Judah is later, and was written in light of the assumed identification of Jebus with Jerusalem.

Moreover, topographically Jebus as Jerusalem is an awkward place for a boundary line. However, if modern Wadi Beit Hanina, which is opposite 'Ain el-Madauwerah in the Wadi Beit Hanina system, is what is meant by "the valley of the son of Hinnom," then the "shoulder of the Jebusite" (Josh. 15:8) would be the prominent ridge just north of present-day Sha'fat. Again, the account of the tribal war with Benjamin in Judges 19–21 presents problems related to Gibeah only if one posits that Jebus is Jerusalem. If, on the other hand, one posits that Jebus is Sha'fat, just north of Jerusalem, the places mentioned do make sense. It appears therefore that Sha'fat may work better as the site of Jebus than does Jerusalem in such passages as Josh. 15:5b–11; 18:15–19; Judg. 19–21.

Jebus is not mentioned in other ancient Near Eastern texts. The origin of the city remains obscure. Nevertheless, it is clear from the references to the Jebusites that they were a powerful force in the hill country (see Exod. 3:8; 13:5; 23:23; 33:2; 34:11; Josh. 12:8; 24:11). During the pre-monarchical period and later (ca. 1200–1000 B.C.), the Jebusites remained a force in the area (Judg. 1:21). Whether one accepts Jerusalem or Sha'fat as the site of Jebus, it is clear that the Jebusites were in control of Jerusalem in the period just prior to David's conquest of it as his royal city (2 Sam. 5:6–9). The Jebusite control of Jerusalem is pre-

supposed in the story of David's purchase of land for the Jerusalem Temple; David bought the land from the absentee landlord who was a Jebusite (2 Sam. 24:18–25).

Jebus is not referred to in the postexilic period (after ca. 538 B.C.) with the exception of references in the Chronicler's work that are based on the interpretation of 2 Sam. 5:6–9 and 24:18–25, which, as we saw, construed Jebus as Jerusalem. It seems that the name "Jebus" was no longer used to refer to any contemporary city but only an ancient name for a city, in this case Jerusalem. Therefore, if one can argue that Jebus is Sha'fat and not Jerusalem it seems likely that either the town was destroyed or had a name change prior to the postexilic material, since that material does not seem to be aware of Jebus's existence. It was this lack of awareness that probably led to the conclusion that since Jebus was close to Jerusalem and the Jebusites had control of Jerusalem that Jebus was in fact Jerusalem. None of this is conclusive; on the contrary, it merely demonstrates that there is a lack of clarity about the location of Jebus in OT references that has yet to be explained away. S.B.R.

Jeconiah (jek´uh-n*i*´uh). ***See*** Jehoiachin.

Jedaiah (ji-day´yuh), an OT name derived from two Hebrew words, *yeda' yah* ("Yah [God] knows"); it was borne by several Levites mostly in postexilic Judah. It is difficult to separate these names since some may refer to the same person or family group. **1** A descendant of Aaron and head of the second group of priests (1 Chron. 24:7); he was probably the ancestral head of one or more of the family groups below. **2** A priest and postexilic inhabitant of Jerusalem; he is called the "son of Joiarib" (Neh. 11:10), but in 1 Chronicles (9:10) "son of" is omitted and Joiarib (Jehoiarib) is simply another priest. **3** A Levite who returned from the Babylonian captivity with Zerubbabel (Neh. 12:6); however, this verse probably refers to a family group who returned, since Uzzi is given as a family head of Jedaiah (Neh. 12:19). **4** A second Levite who returned with Zerubbabel (Neh. 12:7); also probably a family group with Nethanel as the leader (Neh. 12:21). **5** A family group ("sons of Jedaiah") of the clan of Jeshua who returned with Zerubbabel (Ezra 2:36; Neh. 7:39). This group could be related to either 3 or 4. **6** One of the representative exiles named in a prophecy of Zechariah (Zech. 6:10, 14).

The name Jedaiah may also be derived from Hebrew *yedayah,* a name of uncertain meaning, possibly "Yah [God] is praise." **7** The son of Shimri; a descendant of Simeon (1 Chron. 4:37). **8** One who helped repair the walls of postexilic Jerusalem (Neh. 3:10). D.R.B.

Jediael (ji-d*i*´ay-uhl; Heb., meaning uncertain, possibly "El [God] knows"). **1** A son of Benjamin and head of a large family group (1 Chron. 7:6, 10, 11). **2** The son of Shimri; he and his brother Joha were members of David's fighting band (1 Chron. 11:45); he may be the same one who defected to David at Ziklag from the tribe of Manasseh (1 Chron. 12:20). **3** A Levite of the clan of Korah, the second son of the eastern gatekeeper Meshelemiah (Shelemiah; 1 Chron. 26:2).

Jeduthun (ji-dy*oo*´thuhn), member of a levitical family (1 Chron. 9:16) who is associated with the Judean village Netophah, and distinguished from "gatekeepers," although in another place (1 Chron. 16:42) "the sons of Jeduthun" apparently fulfilled that occupation (so MT) at the Gibeon shrine (cf. 1 Chron. 16:38 for the family as gatekeepers at Jerusalem). Jeduthun and Heman are mentioned as concerned with Temple music, instrumental alone and associated with song (1 Chron. 16:41–42). In 1 Chron. 25:1, 3, and 6 Jeduthun and his family are included among Temple musicians, prophesying with musical accompaniment (cf. 2 Kings 2:15) and offering praise. 2 Chron. 5:12 specifies in addition their fine linen garments and their station to the east of the altar. The Jeduthun family appears among the Levites who consecrated themselves and cleansed the Temple at Hezekiah's reform (2 Chron. 29:13–15; cf. a similar list in Neh. 11:15–17). 2 Chron. 35:15, in the account of Josiah's reform, describes Jeduthun as "the king's seer" (one form of text has a plural to include Heman, so designated in 1 Chron. 25:5).

The name Jeduthun also appears in the titles of Psalms 39, 62, and 77, perhaps indicating a musical or liturgical tradition. The association of this levitical family with prophetic activity (1 Chron. 25:1–6; 2 Chron. 35:15) is important for the understanding of the function of prophecy in the later OT writings. ***See also*** Music; Psalms, The. P.R.A.

Jehiel (ji-h*i*´uhl; Heb., "God lives"). **1** The son of Ladan (1 Chron. 23:8). He founded a priestly family called the Jehieli (1 Chron. 26:21–22) and had charge of the Temple treasury under King David (1 Chron. 29:8). **2** A Levite musician who served before the Ark (1 Chron. 15:18, 20; 16:5). **3** An attendant of King David's sons (1 Chron. 27:32). **4** A son of King Jehoshaphat (2 Chron. 21:2). **5** Two Temple officers (2 Chron. 31:13; 35:8). **6** The father of Obadiah who returned from exile with Ezra (Ezra 8:9). **7** The father of Shecaniah who agreed to Ezra's marriage reforms (Ezra 10:2). **8** Two men who divorced foreign wives in the time of Ezra (Ezra 10:21, 26).

Jehoahaz (ji-hoh´uh-haz; Heb., "God has grasped"). **1** The eleventh king of Israel, the son of Jehu, he ruled 816–800 B.C. He continued to suffer from the depredations of Hazael, king of

Syria (2 Kings 13:3, 22) which had already begun in the reign of his father, Jehu. Hazael's son Ben-Hadad apparently led the victorious armies of Syria (2 Kings 13:3), which faced little opposition from the decimated army of Jehoahaz (2 Kings 13:7). Although Jehoahaz sought God's deliverance from the divine wrath against Israel due to the worship of Asherah practiced there (2 Kings 13:6), and received the promise of a savior (2 Kings 13:4–5), the promise was not fulfilled during his reign. He was succeeded by his son, Joash. **2** The seventeenth king of Judah, the son of Josiah, he reigned for a short time, perhaps only three months (2 Kings 23:31; 609 B.C.). After his father's death at the hands of Pharaoh Neco at the battle of Megiddo, Jehoahaz was made king by the people even though he was not the oldest son of Josiah. Pharaoh Neco deposed him in favor of his brother Eliakim, whom Neco renamed Jehoiakim (2 Kings 23:34). Jehoahaz was taken to Egypt as a captive, and died there. Although he was adjudged an evil king (2 Kings 23:32), neither Jeremiah (who calls him Shallum; 22:10–12) nor Ezekiel (19:2–4) refers to him in such terms. **3** The twelfth king of Judah, who is better known as Ahaz. ***See also*** Ahaz; Asherah; Ben-hadad; Chronology, Old Testament; Hazael; Syria. P.J.A.

Jehoash (ji-hoh´ash). ***See*** Joash.

Jehohanan (jee'hoh-hay´nuhn; Heb., "God is gracious"). **1** One of the gatekeepers in David's tabernacle (1 Chron. 26:3). **2** A captain under the Judean king Jehoshaphat (2 Chron. 17:15). **3** The son of Bebai; he was one of the men who had married a foreign woman (Ezra 10:28). **4** A son of Eliashib (Ezra 10:6). **5** A son of Tobiah (Neh. 6:18). **6** A priest in the time of the Judean king Jehoiakim (Neh. 12:13). **7** A priest who was a contemporary of Nehemiah (Neh. 12:42).

Jehoiachin (ji-hoi´uh-kin; also called Joiachin, Jeconiah, Jechoniah, and Coniah), one of the last two kings of Judah. He came to the throne in 597 B.C. at the age of eighteen after the death of his father, Jehoiakim (2 Kings 24:8). At that time, Babylon besieged Jerusalem, and, after he had reigned only three months, he, his mother, wives, servants, princes, and officers surrendered themselves captive to Nebuchadnezzar (2 Kings 24:12; reflected in the prophecy of Jer. 22:24–30). The Babylonians also exiled ten thousand soldiers, officers, craftsmen, and smiths, leaving the land impoverished of skilled labor and administrators (2 Kings 24:14, 16; Jer. 24:1; 29:2). The Temple and palace treasures were also looted. According to Daniel, this exile included Daniel, Hananiah, Mishael, and Azariah (Dan. 1:1–7), and, according to Esther 2:6, it included Mordecai. Ezekiel was also among the captives (Ezek. 1:1–21; cf. Jer. 29:1).

Jeremiah prophesied the divine redemption of these captives of the first Babylonian exile

Babylonian cuneiform text that refers to Nebuchadnezzar's siege of Jerusalem and the exile of Jehoiachin to Babylon in 597 B.C.

(Jer. 24:4–7), but this would only come after a hiatus of seventy years (29:10–14; cf. vv. 1–7). Thus, he was at odds with Hananiah the son of Azzur, who predicted the immediate return of Jehoiachin and the exiles (28:1–4).

Several Babylonian food-rationing lists mention Jehoiachin's name or call him "King of Judah." Since he apparently surrendered quickly (2 Kings 24:12), he may have been treated fairly well. The Bible tells us (2 Kings 25:27–30; Jer. 52:31–34) that in the thirty-seventh year of Jehoiachin's captivity (561 B.C.), Nebuchadnezzar's successor, Evil-merodach, raised his status to that of a valued court retainer. For a people then wholly exiled, this fact served to provide hope that the tide had turned, and that the promised redemption would not long be delayed. ***See also*** Jeremiah, The Book of. J.U.

Jehoiada (ji-hoi´uh-duh). **1** The chief priest in the days of Athaliah and Joash of Judah (early eighth century B.C.). His wife was Jehosheba, daughter of King Jehoram and sister of King Ahaziah, Jehoram's son (2 Chron. 22:11). After Ahaziah died, his mother, Athaliah (Ahab's daughter), took the throne and had Ahaziah's children murdered. Jehosheba saved the youngest, Joash, and, with Jehoiada, hid him in the Temple for six years (vv. 11–12). In the seventh year Jehoiada formed a conspiracy of the commanders of the

royal guard, the Levites, and chiefs of clans to restore the crown to the house of David (2 Chron. 23:1–7, 20). With the citizenry in attendance, Jehoiada crowned and anointed Joash and had Athaliah killed (vv. 8–15). He then renewed the covenant between God, the king, and the people (v. 16) which resulted in the destruction of the Tyrian Baal cult (v. 17). Jehoiada restored proper administration in the Temple (vv. 18–19), and exerted significant influence over Joash (2 Chron. 24:2–3). With the king's avid cooperation, Jehoiada collected a tax for the Temple's maintenance and effected repairs (vv. 4–14). The Chronicler relates that he lived to be one hundred thirty and that he was buried in the tombs of the kings in the city of David—a sign of the great respect in which he was held (vv. 15–16). Jehoiada's fame may be remembered in Jer. 29:26. He was the father of Zechariah, who prophesied against Judah's apostasy. **2** A chief priest (1 Chron. 12:27; 27:5), the father of Benaiah, the chief of David's elite mercenaries (2 Sam. 8:18) and the head of the army under Solomon (1 Kings 2:35). **3** A high priest in the time of Nehemiah (Neh. 13:28). J.U.

Jehoiakim (ji-hoi´uh-kim), king of Judah (609–598 B.C.; 2 Kings 23:36). He was installed as king at the age of twenty-five by Pharaoh Neco after Neco had deposed his younger brother Jehoahaz (2 Kings 23:33–34). A son of Josiah, Jehoiakim's given name was Eliakim before Neco changed it. The Pharaoh exacted a tribute of a hundred talents of silver and a talent of gold upon Judah (v. 33), which Jehoiakim raised by tax (v. 35).

In 605 B.C., Babylon defeated Egypt decisively at Carchemish (Jer. 46:2; cf. 2 Kings 24:7) and captured Syria and the land of Israel (cf. Jer. 36:9). When the king's officers and princes tried to present the scroll of Jeremiah's prophecies to Jehoiakim, he burned it because of the prophet's prediction of the coming Babylonian destruction (Jer. 36:29). Jehoiakim became Babylon's vassal for three years, and then rebelled (2 Kings 24:1). Nebuchadnezzar responded with an invasion of troops from Moab, Ammon, and Aram (v. 2; cf. Jer. 35:11), but Judah was able to maintain its sovereignty for a few more years. The prophet who dared to oppose Jehoiakim risked his life: Jehoiakim had Uriah killed, and Jeremiah was put on trial for his life (Jer. 26). Although Jeremiah predicted that Jehoiakim would die an undignified death due to his murderous behavior (Jer. 22:17–19; cf. 2 Kings 24:4), 2 Kings 24:6 relates that he was buried in the tomb of the king of Judah. ***See also*** Jeremiah, The Book of; Josiah; Nebuchadnezzar. J.U.

Jehonadab (ji-hoh´nuh-dab), the son of Rechab and spiritual father of the Rechabite sect, whose members were distinguished by their abstinence from drinking wine, planting vineyards, sowing the land, and building houses (Jer. 35:6–7; RSV: "Jonadab"). Jeremiah praises them for their unswerving loyalty to their ancestral code of asceticism. Such symbolic clinging to Israel's nomadic past suits the role of Jehonadab in historical literature as the protagonist of native Israelite tradition. He was partner to Jehu in the mid-ninth century B.C. in the bloody overthrow of the Omride dynasty in Samaria and in eradicating the cult of the Tyrian Baal introduced by the Phoenician princess Jezebel (2 Kings 10:15–29). ***See also*** Jehu. M.C.

Jehonathan (ji-hon´uh-thuhn; Heb., "Yahweh has given"), name of some sixteen different OT characters. The names Jehonathan and Jonathan appear to be used interchangeably. ***See also*** Jonathan.

Jehoram (ji-hor´uhm; Heb., "Yahweh is exalted"), alternately Joram (joh´rem), the name of two contemporary kings in Judah and Israel who were also brothers-in-law. **1** A king of Judah (ca. 849–842 B.C.), son and successor of Jehoshaphat, and husband of the Omride Princess Athaliah. According to the account in 2 Chronicles 21 he murdered his six brothers upon succession to the throne. There was a close alliance between Judah and Israel during his reign and the subsequent reign of Athaliah. Edom rebelled during Jehoram's reign, thus gaining its independence from Judah. According to the Chronicler the Philistines also attacked Judah, and Libnah was taken (2 Chron. 21:16–17; 2 Kings 8:22). The Chronicler also reports that Jehoram suffered an incurable disease, predicted by Elijah, and was not buried in the tombs of the kings. **2** A king of Israel (ca. 849–842 B.C.) and brother and successor of Ahaziah. This Jehoram was probably coregent with his father Jehoshaphat with the result that his independent rule was less than the twelve years recorded in 2 Kings 3:1. He was unable to put down the rebellion of King Mesha of Moab. The prophet Elisha accompanied the armies of Jehoram when Mesha, in desperate straits, "offered up his eldest son as a burnt offering" on the city wall in full view of the attackers. Israel and Aram were apparently allies early in Jehoram's reign, while Ben-hadad II was alive. In the reign of his successor, Hazael, however, Jehoram was wounded in battle against Aram. He was subsequently assassinated in Jezreel by his commander-in-chief, Jehu, who cast Jehoram's body into the field of Naboth, thus destroying the Omride dynasty (2 Kings 9:23–24). ***See also*** Jehoshaphat. D.L.C.

Jehoshabeath (jee´hoh-shab´ee-ath; Jehoshaba, 2 Kings 11:2; Heb., "Yahweh is an oath"), the daughter of King Jehoram, and wife of the priest Jehoiada. She saved her young nephew Joash (Jehoash) from the murderous wrath of

Athaliah, the wicked queen, mother of the slain Ahaziah, by hiding him during her six-year reign (2 Chron. 22:10–12).

Jehoshaphat (ji-hosh´uh-fat; Heb., "Yahweh establishes justice"; also Joshaphat). **1** The son of Ahilud, "recorder" under David (2 Sam. 8:16; 20:24; 1 Chron. 18:15) and Solomon (1 Kings 4:3). **2** The son of Paruah, an officer in Issachar under Solomon (1 Kings 4:17). **3** King of Judah (cf. 1 Chron. 3:10; Matt. 1:8). He succeeded his father Asa on the throne (1 Kings 15:24; 22:41–46) and reigned twenty-five years, ca. 873–848 B.C. He is shown in 1 Kings 22 as the subordinate ally with the Israelite king who is named as Ahab only in 1 Kings 22:20 (cf. 39–40), whereas 2 Chronicles 18 introduces both names in vv. 1–3 to give a clearer identification. Jehoshaphat, by his insistence on consulting the prophets and specifically Micaiah, is contrasted with the Northern ruler, Ahab; he is delivered in battle in spite of being mistaken for his ally, whereas the doom pronounced by Micaiah brings death to the disguised king of Israel. 2 Kings 3:4–27 describes another such alliance with Jehoram of Israel and the king of Edom. This too uses the motif of the prophet, here Elisha, who promises victory; but the eventual outcome is disaster for Israel.

2 Chronicles 18 tells the same story as 1 Kings 22, noting the marriage alliance with Ahab in v. 1 and elaborating the welcome given to Samaria (18:2). This is prefaced in 2 Chronicles 17 with an account of Jehoshaphat's strengthening the position of Judah against Israel, commenting also on his obedience to God and his prosperity. Priests and Levites were sent to teach the law in the cities of Judah (cf. also 19:4–11). The surrounding nations honor Jehoshaphat and some send tribute. Details are given of fortresses, store cities, and military forces. The sequel (19:1–3) is a prophetic judgment against Jehoshaphat by Jehu, son of Hanani the seer, for allying himself with the wicked apostates of the North, a judgment alleviated by reference to Jehoshaphat's pious actions, and 19:4–11 repeats the theme of justice. Hence, so 20:1–30 relates, an attack by Moabites, Ammonites, and others is met by fasting and prayer. The prayer is set out in 20:6–12 and expresses the powerlessness of Judah and its trust in God. Divinely inspired, a Levite preacher proclaims divine help and coming victory. An act of praise follows, led by the Levites. Before the battle, Jehoshaphat further exhorts the people, using words close to those of Isa. 7:9. The singers offer praise, and the result is a divinely arranged victory that leaves the Judean army only the task of despoiling the totally destroyed enemy forces. Peace and prosperity are restored. This story may represent a reworking of 2 Kings 3.

A supplement in 2 Chron. 20:35–37 elaborates 1 Kings 22:47–49, showing another alliance with the Israelite king Ahaziah; a trading expedition to Tarshish is condemned by a prophet Eliezer, and the ships are wrecked. The accounts in Chronicles are clearly pious elaborations of the earlier narratives, partly linked with interpretation of the king's name—the theme of justice—and partly sermons on the relation between obedience and divine help. **4** The father of Jehu, king of Israel (2 Kings 9:2, 14), and son of Nimshi, elsewhere described as Jehu's father (1 Kings 19:16; 2 Kings 9:20; 2 Chron. 22:7). **5** The Valley of Jehoshaphat, place of divine judgment on the nations (Joel 3:2, 12). Its location is unknown; it is almost certainly a symbolic rather than a real place. P.R.A.

Jehoshaphat, Valley of, the site where the nations surrounding Israel will be judged by God for transgressions committed against Israel according to Joel 3:2, 12. Some scholars claim that the Valley of Jehoshaphat was known before Joel's time and that it was named for Jehoshaphat, king of Judah. Most scholars, however, believe that it was Joel who symbolically named a valley in Jerusalem, possibly the Kidron Valley or Gehinom, Jehoshaphat, namely "Yahweh judges." Whether or not this name originated with Joel, it is appropriate for the place where Yahweh "will enter into judgment" (Joel 3:2) and "will sit to judge" (3:12), a place also called "the valley of decision" (3:14). M.Z.B.

Jehovah (ji-hoh´vuh). ***See*** Tetragrammaton, The Sacred.

Jehovah-jireh (ji-hoh´vuh-j*i*´ruh; KJV; RSV: Heb., "The Lord will provide [or see]"), the name given by Abraham to the site where he found a ram to be offered in place of his son Isaac (Gen. 22:14).

Jehovah-nissi (ji-hoh´vuh-nis´*i*; KJV; RSV: Heb., "The Lord is my banner"), the name given by Moses to the altar he built (Exod. 17:15) to commemorate the victory over the Amalekites at Rephidim on the way to Canaan (see Exod. 17:8–16).

Jehovah-shalom (ji-hoh´vuh-shah´lohm; KJV; RSV: Heb., "The Lord is peace"), the name given by Gideon to commemorate the appearance of the Lord to him and his commission to deliver Israel from the Midianites (Judg. 6:24).

Jehovah-shamma (ji-hoh´vuh-sham´uh; KJV; RSV: Heb., "The Lord is there"), the name of Jerusalem in the restoration envisioned by Ezekiel, emphasizing the divine presence in the holy city (Ezek. 48:35; cf. Isa. 60:14–22; Rev. 21:2–22:5).

Jehovah-tsidkenu (ji-hoh´vuh-tsid-ken´*oo*; KJV; RSV: Heb., "The Lord is our righteousness"), the name given by Jeremiah to the future king through whom God would save the people (Jer. 23:6; 33:16). The name may be a play on the

name of Zedekiah, regent in Jerusalem from 597 to 587 B.C.

Jehozabad (ji-hoh´zuh-bad; Heb., "Yahweh is a gift" or "Yahweh has given"). **1** A retainer of King Joash of Judah who, with another retainer, Jozacar, assassinated the king (2 Kings 12:21; 2 Chron. 24:26); he was executed by Joash's son Amaziah shortly after Amaziah took the throne (ca. 800? B.C.; 2 Kings 14:5). **2** The son of Obed-edom; a Levite of the clan of Korah who shared responsibility for the south storehouse of the Temple during the reign of King David (1 Chron. 26:4, 16). **3** A Benjaminite commander of a hundred and eighty thousand troops under King Jehoshaphat (2 Chron. 17:18).

Jehozadak (ji-hoh´zuh-dak; Heb., "Yahweh is righteous"), a priestly descendant of Aaron who was exiled to Babylon by Nebuchadnezzar (1 Chron. 6:14–15). He was the father of Joshua (Jeshua) who was the high priest in Jerusalem following the Exile (586–490 B.C.; Hag. 1:1; Zech. 6:11). He is also called Jozadak, a shortened form of the same name (Ezra 3:8; 5:2). In some versions the name also occurs as Josedech. ***See also*** Jozadak.

Jehu (jee´hy*oo*). **1** The son of Jehoshaphat; he was king of Israel for twenty-eight years (ca. 843–816 B.C.) and established a dynasty that lasted five generations and ninety years (2 Kings 9–10; 15:12).

Jehu's reign and his war against the worship of Baal was set forth in God's speech to the prophet Elijah on Mt. Horeb (1 Kings 19:16–18). Although Elijah was given the task of anointing Jehu as king, it was finally carried out by a member of a prophetic band at the command of Elisha (2 Kings 9:1–6). In a bloody coup, Jehu killed Jehoram, king of Israel (849–843 B.C.; v. 24) and directed the killings of Jehu's confederate King Ahaziah of Judah (843; v. 27), Jezebel (vv. 30–37), Ahab's seventy sons (10:1–10), all members and associates of the house of Ahab (vv. 11, 17), Ahaziah's forty-two brothers (vv. 13–14), all the worshipers of Baal in Israel (vv. 18–25). Jehu also ordered the destruction of the temple and the idols of Baal (vv. 26–28). Thus, Jehu eliminated the worship of the Tyrian Baal. The bloodiness of the coup was still remembered a hundred years later by Hosea (1:4).

Although Jehu's coup and religious reforms ended the political alliance of Tyre, Israel, and Judah, it consolidated the military, the populace, and the prophetic movement in Israel behind him. The army looked to him as a strong leader to combat the Aramaeans. The poor needed him to reverse their fortunes after the economic hardships brought upon them by the dynasty of Omri (Jehonadab, son of Rechab, was one of these, 2 Kings 10:15–16).

In order to counter the Aramaeans, Jehu made himself vassal to the king of Assyria in 841 B.C. (as is inscribed in the annals of Shalmaneser III and the Black Obelisk). Shalmaneser III campaigned against Aram from 841 to 838. Afterward, however, the Aramaeans reasserted their military supremacy and conquered all of Ramoth-gilead (2 Kings 10:32–33).

2 The son of Hanani, and a prophet who prophesied against Baasha (902–886 B.C.), king of Israel (1 Kings 16:1–4, 7, 12), and both rebuked and praised Jehoshaphat (874–850 B.C.), king of Judah (2 Chron. 19:2–3). 2 Chron. 20:34 attributes authorship of the history of Jehoshaphat to him.

3 The son of Joshibiah, and a prince of the tribe of Simeon (1 Chron. 4:35).

4 One of David's mighty men from Anathoth (1 Chron. 12:3).

5 A Judahite, a descendant of Jarha, an Egyptian slave (1 Chron. 2:38). ***See also*** Elijah; Jehoshaphat; Omri; Shalmaneser. J.U.

Jehudi (ji-hy*oo*´d*i*), a servant of the court of Jehoiakim. He was sent by the nobles to order Baruch to bring them the scroll of Jeremiah's prophecies and then was ordered by the king to read the scroll before the court (Jer. 36:14, 21–23).

Jeiel (ji-*i*´uhl; Heb., "El [God] takes away"). **1** A clan chieftain in the tribe of Reuben (1 Chron. 5:7). **2** A Benjaminite, the father of Gibeon and great-grandfather of Saul (1 Chron. 8:29; 9:35). **3** The son of Hotham the Aroerite; one of David's fighting men (1 Chron. 11:44). **4** A Levite musician of the Merarite clan who helped celebrate the transfer of the Ark of the Covenant to Jerusalem (1 Chron. 15:18, 21). A second Jeiel is also listed among the group of musicians (1 Chron. 16:5), but he is elsewhere called Jaaziel (1 Chron. 15:18) or Aziel (1 Chron. 15:20). It is possible that Jeuel, a variant spelling of Jeiel, refers to the same person (2 Chron. 29:13), although he is from the clan of Elizaphan. **5** A Levite associated with the musical clan of Asaph; an ancestor of Jehaziel, the prophesier of deliverance for King Jehoshaphat (2 Chron. 20:14), he is possibly the same as **4**. **6** A scribe during the reign of Uzziah (Azariah) in Judah (2 Chron. 26:11). **7** A leader of the Levites who contributed animals for the celebration of the Passover reinstated by Josiah (2 Chron. 35:9). **8** A member of the clan of Nebo who took a foreign wife (Ezra 10:43). D.R.B.

Jemimah (ji-m*i*´muh), the first of Job's three daughters born when God restored his fortunes. All of these daughters were exceptional for their beauty and their receiving an inheritance from their father (Job 42:13–15).

Jephthah (jef´thuh; Heb., "he opens"; cf. the place name Iptahel, "God opens [the womb?],"

Josh. 19:14, 27), a Gileadite who delivered Israel from Ammonite domination. Jephthah sacrificed his daughter to fulfill a vow, suppressed an Ephraimite force in Gilead, and judged Israel six years (Judg. 10:6–12:7).

Born the son of a harlot, Jephthah was disowned and driven out from his family. In the district of Tob near the modern Jordan-Syria border, he gathered a band of mercenaries and was later recalled by the elders of Gilead. Ammonite forces had invaded Gilead and penetrated across the Jordan into Judah, Benjamin, and Ephraim. The elders of Gilead made Jephthah head and ruler, negotiations culminating in Jephthah's vows before Yahweh, at Mizpeh (in the vicinity of Jebel Jal'ad, south of the River Jabbok).

The territory disputed in the negotiations had belonged earlier to the Amorite kingdoms north of the Arnon River, which were defeated by Israel under Moses (Judg. 11:14–28; Num. 21). The territory was subsequently taken by Moab (Judg. 3:12–30). When Ammon became strong enough to press its own claims against Israel, the Ammonite king made claims and charges in the name of Moabite sovereignty over the disputed territory (perhaps claiming to hold it in trust). Jephthah recognized the jurisdiction of Chemosh, god of Moab, for diplomatic purposes, but argued that because God's gift to Israel was far older, Israel had not seized Ammonite land. When negotiations failed, Jephthah toured Gilead and Manasseh, presumably to muster the army, and returned to Mizpeh. From Mizpeh Israel moved to meet the Ammonites, defeating them along a line from southern Aroer (the northern edge of the Arnon gorge) to Abel-keramim (probably Tell el-Umeiri at the northern end of the Madeba plain). As a result, Ammon was pushed back to the desert fringe.

Upon accepting his commission, Jephthah made a vow that if he were to return victorious, he would sacrifice whatever emerged first from his house (Judg. 11:30–31; Iron Age dwellings, like many Palestinian village houses today, incorporated space for small cattle). The first creature to emerge was his only child, a daughter, who refused to let Jephthah break his vow. She requested two months to wander the hills with her dear friends, lamenting her virginity (childlessness; Judg. 11:39–40). The story serves to explain the otherwise obscure four-day rite observed annually by the daughters of Israel. Human sacrifice, a horror neither condoned nor unknown in ancient Israel, is here secondary to the irrevocability of the vow.

In the final story of the Jephthah cycle, Ephraimites crossed into Gilead, complaining that Jephthah had not summoned them to the Ammonite war and threatening to burn his house (Judg. 12:1). Again negotiations failed and Jephthah was victorious in the fighting. Gileadites used a password, *shibboleth,* to betray dialect differences, and many Ephraimites were slain at the Jordan fords (Judg. 12:5–6). Joshua 22 describes an earlier confrontation of Israelite tribes in the same area. ***See also*** Judges, The Book of; Shibboleth. R.B.

Jephunneh (ji-fuhn´uh). **1** A Kenizzite, the father of Caleb, one of the twelve spies sent to Canaan by Moses (Num. 13:6; 32:12). **2** The son of Jether; descendant of Asher (1 Chron. 7:38).

Jerah (jihr´uh; Heb., "moon"), a son of Joktan (Gen. 10:26; 1 Chron. 1:20), and the member of a tribe whose territories were probably located in the south Arabian coastland.

Jerahmeel (ji-rah´mee-uhl; Heb., "may God have compassion"). **1** The ancestor who gave his name to a group of non-Israelites, the Jerahmeelites, who lived in the extreme southern part of the land of Judah. David came into contact with them there after his flight from Saul (1 Sam.

Jephthah, returning home from battle victorious (left), first sees his daughter (center), whom he must therefore sacrifice according to his vow to God (right; Judg. 11:30–31); from a thirteenth-century French miniature.

27:10; 30:29). **2** The son of Kish, and a Levite (1 Chron. 24:29). **3** One of the three men sent by the Judean king Jehoiakim to arrest Jeremiah and Baruch (Jer. 36:26). Although Jerahmeel is called "the king's son," that may be an official title, and hence does not necessarily mean he was Jehoiakim's son. M.A.F.

Jerash (jair´ash). ***See*** Gerasa.

Jeremiah (jair'uh-m*i*´uh), **the Book of,** an OT book of prophetic oracles attributed to the Judean prophet Jeremiah.

The Prophet: Jeremiah of Anathoth, the son of Hilkiah, was a Judean prophet of the seventh–sixth centuries B.C. Jeremiah was of priestly extraction, perhaps descending from David's priest Abiathar, who was expelled by Solomon to Anathoth where he owned a field (1 Kings 2:26–27). Such a descent from Abiathar may explain the vivid memory of the fall of Shilo in Jeremiah (7:12, 14; 26:6, 9), because Abiathar himself was the great-grandson of the Shilonite priest Phinehas son of Eli.

Still young, Jeremiah was appointed prophet in the thirteenth year of Josiah, i.e., 627/6 B.C. Hence he was born sometime between 645 and 640. He first prophesied in Anathoth, provoking the anger of his villagers and family (11:21; 12:6), then moved to Jerusalem, one hour's walk from home. Some of his prophecies against the nations (e.g., 49:1–5) and those of restoration to Ephraim (31:1–21) as well as his indictment of the Judean policy of alliance with Egypt against Assyria (2:14–19, 36–37) certainly belong to his first period, up to the fall of Nineveh in 612 and the death of Josiah in 609.

In those early years Jeremiah perhaps belonged to a guild of professional prophets. He repeatedly mentions such a group alongside the priests as connected with the Temple (23:11) and as vindicating its sanctity (26:7–16) and integrity (27:16–18; 28:3). In time Jeremiah broke away from them, but his early prophecies of salvation and victory (see above) and his prayers concerning the drought (14:2–10; 14:19–15:1) attest to the legacy of traditional prophecy embedded in his message.

In the reign of Jehoiakim (608–598 B.C.), Jeremiah was already a mature man and prophet, versed in the international events that led to the battle of Carchemish in 605 (46:2–12). He collected his previous sayings into one scroll (chap. 36) and dared to assault the king (22:13–19) and the Temple (26:1–19). At that time he found friends and protectors within the noble families of Jerusalem, the sons of Shaphan (26:24; 36:10, 25) and of Neriah (e.g., 36:4).

Jeremiah's stature grew even more in Zedekiah's reign (597–587 B.C.). Repeatedly he warned the king not to revolt against Babylon (27:12–15). Nevertheless the revolt broke out; yet the king kept consulting him, either by messengers (37:3–10) or personally (37:17–20). The ministers wanted Jeremiah dead, but did not dare kill him. Charging him with desertion to the enemy, they imprisoned him in a pit-house (NRSV: "cistern house"), where he would have starved to death (37:11–16), but the king moved him to a less harsh prison, "the court of the guard," where he received food until he was released after the fall of Jerusalem (587 B.C.; 37:21; 38:28).

The Chaldeans freed Jeremiah from prison, committing him to the care of their Judean governor, Gedaliah son of Ahikam (39:14). After the latter's assassination, those remaining in Judah decided, in spite of Jeremiah's oracle, to flee to Egypt, taking along the prophet and his secretary, Baruch. The presence in the book of Jeremiah of several oracles from this "Egyptian" period (43:8–44:30; 46:13–26) proves that Jeremiah and Baruch did not die a violent death. The legend about their being lynched by the Jewish mob originated in the late Jewish interpretation of the prophets as martyrs who died for their faith's sake.

The Book: The book of Jeremiah is the only reliable source for information about the prophet and his message, but a historical perusal of this source is not free from doubts and difficulties. The structure is relatively clear: chaps. 1–24, visions and prophecies of judgment and personal laments; chaps. 25–45, speeches of Jeremiah and stories about him, all dated, within which is a further definable subunit, chaps. 30–33, restoration prophecies arranged around the consolation story of chap. 32; chaps. 46–51, prophecies against the nations; and chap. 52, historical appendix. Within these collections the arrangement was determined by the concentric principle, sometimes defined as inclusio, according to which similar material was set at the beginning and the end of one literary unit. The first collection (1–24), apart from the consecration (1:4–10), starts and ends with visions (almond rod, baskets of figs), each of them followed by the Lord asking "What do you see, Jeremiah?" and the prophet's answer (1:11; 24:3). The second collection (25–45) is enclosed by two stories of the fourth year of Jehoiakim (25:1; 45:1). This collection is composed of individual episodes (25–29; 32: 34–36) and a continuous biography (37–44). The individual episodes also reflect a concentric pattern beginning and ending in the fourth year of Jehoiakim (25; 36). They are arranged as follows: five from Zedekiah's reign (27; 28; 29; 32; 34) are enclosed by four from the time of Jehoiakim (25; 26; 35; 36). The restoration collection (30–33) surrounds chap. 32, as noted. The next collection, against the nations (46–51), begins and ends with the two powers, Egypt and Babylon, starting with Egypt, which was defeated by Babylon, and concluding with the latter. Next to the major

powers stand the oracles against their minor neighbors: the Philistines after Egypt, Elam before Babylon.

A different order obtains in the Septuagint (LXX). Here the oracles against the nations come between 25:13 and 25:15. This order is secondary, as it follows a pattern by which later scribes arranged other prophetic books (Isaiah, Ezekiel, Zepheniah): rebuke and doom against Israel; against the nations, restoration. Another arrangement, a chronological one, is manifest in 1:2–3; 40:1; according to it chaps. 1–39 contain prophecies up to the fall of Judah; chaps. 40–44 from the fall on.

Within the collections of prophecies and laments distinct units were often assembled according to association, either verbal or by content. For instance, the two laments of 20:7–9, 10–12, first joined because of the similar expressions "entice . . . prevail" (vv. 7, 10), were then added to the Pashhur incident (19:1–20:6), with the common key words "Terror-all-around" (20:3) and "Terror is all around" (20:10). An exception seems to be represented by the prophecies to the kings (21:11–23:8), where the chronological order prevails.

The growth and formation of the book can be reconstructed as follows. Single sayings of the prophet and episodes from his life were at first recorded on relatively short scrolls. The sayings, from one to ten verses, were generally abstracts of longer oral pronouncements. The recording of both genres is plausibly attributed to Baruch son of Neriah. As for the sayings this attribution is proved by 36:2, 4, 18, 28, 32; for the episodes, the fact that the oldest is from the beginning of the reign of Jehoiakim (26:1), shortly before Baruch first appeared at Jeremiah's side (36:1–4; 45:1), indicates that he was very probably the author.

In the next stage these original records were transmitted by Deuteronomistic disciples (Dtr.) who reworked them according to their literary and religious concepts. Both episodes and sayings were now reworked into speeches, as with 37:3–10 which was reshaped in 21:1–7, or 21:11–12a which was rephrased in 22:1–5. In other instances the Dtr. contributions were rather limited, adding half a verse as in 21:12b, or a few words as in 22:17. But all in all the Dtr. reworking is ubiquitous, changing as it did the whole aspect of the book. The aims of the Dtr. were the following: (1) interpretation and updating of prophecies, as in 22:25, 27, which expand 22:24, 26; (2) theodicy as in 22:8–9, appended for that end to 22:6–7; (3) unequivocal support of the Josiah covenant (11:1–14); (4) bestowal of a preferential status upon the exiles of 597 as against those who were left in the country or who emigrated to Egypt (24:6–7, 9–10; 29:10–14, 16–20); and (5) above all, emphasis on human free will, the opportunity to repent, and an ever readapting divine retribution—tenets common to most Dtr. sermons in Jeremiah (e.g., 7:1–15 which expand 7:4, 9–14; 18:7–10). The Dtr. editing of Jeremiah extended over a long period, its apex being in the early fifth century B.C.

The book was open to expansions during the entire Persian period (539–332 B.C.). Jewish religious propaganda of the Second Commonwealth (postexilic period) is extant in 10:1–16. The expectation of a David *redivivus* in 30:8–9 is typical of an editorial stratum of several prophetical books (cf. Ezek. 34:23–24; 37:24–25; Hos. 3:5). The liberation of Jeremiah by the Chaldeans in 39:14 has been reworked into a martyrological legend (39:11–12; 40:1–6) where the prophet attains an international status while the archenemy Nebuzaradan testifies to the supremacy of the Lord's word (cf. Dan. 2–4; 6).

Finally the book was organized into the collections identified above. The lateness of this operation is proved by the fact that all layers—original elements, secondary expansions, reedited pieces, and late additions—are represented in every collection. At that final stage some small topical collections were put together: droughts (14:1–15:4), kings (21:11–23:8), prophets (23:9–40), restoration (30–33), and a partial biography of Jeremiah during and after the fall of Jerusalem (37–44).

The Greek version (LXX) represents a Hebrew text shorter than the Masoretic Text (MT) by one-eighth. The same text type is also evident

OUTLINE OF CONTENTS

The Book of Jeremiah

I. Visions, prophecies of judgment, and personal laments, mostly undated (chaps. 1–24). Secondary collections here are:
   - Concerning the drought (14:1–15:4)
   - To the kings (21:11–23:8)
   - To the prophets (23:9–40)

II. Speeches of Jeremiah and stories about him, all dated (chaps. 25–45). This collection is subdivided as follows:
   - A. Individual episodes (chaps. 25–29; 32; 34–36). This subdivision incorporated the book of restoration (chaps. 30–33)
   - B. A continuous biography (chaps. 37–45).

III. Prophecies against the nations (chaps. 46–51)
   - A. Egypt (chap. 46)
   - B. Philistines (chap. 47)
   - C. Moab, Ammon, Edom, Damascus, Qedar and Hazor (48:1–49:33)
   - D. Elam (49:34–39)
   - E. Babylon (chaps. 50–51).

IV. Historical appendix (chap. 52).

in one of the Jeremiah scrolls discovered at Qumran—4QJer[b]. Currently many scholars believe that the shorter text represents an earlier edition of the book. However, a detailed inquiry reveals evidence to the contrary: the LXX placement of the prophecies against the nations after 25:13 is secondary vis-à-vis the MT (see above); the absence of 39:4–13 in the LXX is due to homoioteleuton (similar endings of two words); the divine epithet *seba'ot* (Heb., "Hosts") was frequently omitted from the Hebrew *Vorlage* (underlying source) of the LXX on theological grounds; antagonism between distinct Jewish communities caused the deletion of references to the exile of Zedekiah's subjects in 587 B.C. (52:15, 27b–30) and to their eventual restoration (27:22b). Literary considerations may account for the omission of many patronymics and personal epithets in the shorter text.

Jeremiah's message is difficult to assess even after the recovery of his original words. In the course of his career, more than forty years long, his political attitudes certainly changed more than once. While at first he criticized the alliance of Josiah with Egypt in the revolt against Assyria (2:14–19, 36–37), he later joined in the enthusiasm for the reconquest, announcing revenge to the neighbors/inheritors of Israel (49:1–5) and the return of Israelite exiles (31:1–21). The death of Josiah, whom he esteemed (22:15–16), must have been a traumatic event for Jeremiah. He sought and found the reason—sin in the land—and his political outlook conformed to this perception. There are many indications, in chaps. 25; 26; 36; and 45, that Jeremiah expected a total destruction to come upon Judah in the wake of the first campaign of Nebuchadrezzar to the west (604 B.C.) following his victory at Carchemish. But the disaster was averted by a prompt submission on the part of Jehoiakim, an event that again affected the prophet's views: from now on Jeremiah constantly predicated submission in order to prevent destruction (27; 29; 34; 37–38; 42). Thus, his identification as a Judean Cassandra (one whose repeated predictions of evil were disbelieved) due to his early visions (chap. 4) is ironically improper. Jeremiah realistically understood the necessity of adapting to the rule of the Babylonian world empire. This line was continued by Second Isaiah (Isa. 40–66), who expected the restoration to occur within the political frame of another world power, the Persians.

Embedded in Jeremiah's diatribes there is much of permanent value about concepts and institutions. Jeremiah denounces piety when its object is a syncretistic worship in natural settings (2:23–25; 14:10) and stigmatizes bravery and dispatch, if their end is adultery (23:10). For him the essence of royalty does not lie in luxurious palaces, but by timely justice to the oppressed (22:14–16, cf. 21:11–12); sanctity does not grant immunity to transgressors (7:4, 9–14), not even to buildings dedicated to God; prophecy is tested by the personal conduct of its bearers (23:14) and their determination to turn people back from evil (23:17–22), because this is God's will; revelation does not come in a state of unconsciousness, because the word of the Lord "is like fire, and like a hammer that shatters rock": it stirs the whole of the prophet's being (23:29). Most important of all, Jeremiah deepens the concept of repentance (2:33–35; 3:1–5, 12b–13, 19–20—all one unit). He rejects the easy, elegant recantation that confides in God's mercy; he looks for true contrition, for the pains of remorse and their outcome—tears of despair (3:21–4:1).

Jeremiah's concept of repentance provides a plausible explanation of his attitude toward the great religious revolution that occurred in his time, the unification of worship in Jerusalem. If he condemned the syncretistic worship in nature (2:20, 23; 3:2; 13:27), he certainly could only welcome a reform forbidding all sacrifice except that offered at the single Temple in Jerusalem. But Jeremiah could not be satisfied with that: ceremonies, conventions, processions, all headed by the old establishment of elders, priests, and prophets (2 Kings 23:1–2) were for him a parody of repentance, and therefore unacceptable. His exacting moral demands could not be easily grasped by the Deuteronomistic editors of the book, who therefore coined them in a more formal way: "the men of Judah and the inhabitants of Jerusalem repeated the sins of their forefathers" and broke the covenant (11:10). On the other hand, Jeremiah's legacy was fully realized by a later prophet: "rend your heart and not your garments," says Joel (2:13), and Jeremiah's call was echoed and made normative in the rabbinic teaching: "Brothers, it has not been said concerning the people of Nineveh 'the Lord saw their sack-cloth and fasting' but rather: 'the Lord saw their deeds, how they turned back from their evil ways'" (*m. Ta'an.* 2:1). ***See also*** Baruch; Prophet.

Jeremoth (jair´uh-moth). **1** A son of Becher and grandson of Benjamin (1 Chron. 7:8). **2** A descendant of Benjamin of the clan of Elpaal (1 Chron. 8:14). **3** A Levite, the son of Mushai of

the clan of Merari (1 Chron. 23:23); he is also called Jerimoth (1 Chron. 24:30). **4** A Levite, head of the fifteenth course of musicians (1 Chron. 25:22); he is probably the same person earlier called Jerimoth (a variant spelling; 1 Chron. 25:4). **5** The son of Azriel, head of the tribe of Naphtali during the reign of David (1 Chron. 27:19). **6** A member of the clan of Elam who took a foreign wife (Ezra 10:26). **7** Another, of the clan of Zattu, who took a foreign wife (Ezra 10:27). **8** A third, from the clan of Bani, who took a foreign wife (Ezra 10:29). ***See also*** Jerimoth. D.R.B.

Jericho (jair´uh-koh), a city in the Jordan Valley, six miles north of the Dead Sea. Its broad plain, irrigated from the copious spring of modern 'Ein es-Sultan, just east of the ancient city, is extremely fertile. A ford near the city carries an important east-west road and makes Jericho a strategic entrance point from Transjordan into the highlands of Judah. The city of OT times is represented today by a mound 70 feet high and 10 acres in area. The tropical climate and vegetation of the Jordan Valley earned Jericho the title "city of palm trees" (Deut. 34:3). The ancient city was excavated by C. Warren (1867), E. Sellin and C. Watzinger (1907–09), J. Garstang (1930–36), and K. Kenyon (1952–58).

After the Babylonian invasions (early sixth century B.C.) the mound was abandoned and settlement concentrated in the irrigated oasis where modern Jericho is located. During the Hasmonean (167–63 B.C.) and Herodian (40 B.C.–A.D. 44) periods a complex of royal buildings grew up on the banks of the Wadi Qelt one and a quarter miles south of the ancient city. This site (modern Tulūl Abu el-'Alâiq) is commonly called New Testament Jericho. It was excavated by C. Warren (1868); A. Nöldeke, C. Watzinger, and E. Sellin (1909–11); J. L. Kelso and D. C. Baramki (1950); J. Pritchard (1951); and E. Netzer (after 1973).

The earliest occupation at Jericho (ca. 9000 B.C.) was a small Mesolithic shrine near the spring. The next phase (the Neolithic, ca. 8000–4000 B.C.) has given Jericho the description "the oldest walled town in the world." In the earliest Neolithic phase (ca. 8000–7000 B.C.), before the invention of pottery, the town, which was then as large as at any later time, was surrounded by a stone wall into which was set a circular stone tower 25 feet high. From the second Pre-pottery Neolithic phase we have ten human skulls, molded over with plaster to produce portrait heads. The city then passed through two pottery-bearing Neolithic phases and, after a period of inoccupancy, a Proto-Urban phase, represented only by rock-cut tombs (ca. 4000–3000 B.C.).

With the urbanization of Palestine in the Early Bronze Age (ca. 3200–2000 B.C.) Jericho again became a walled city. It flourished for several centuries before being destroyed by nomadic intruders. Little trace of their occupation (Middle Bronze I, ca. 2000–1900 B.C.) remains on the mound itself. The culture is known principally by its distinctive shaft tombs which often contain the remains of only one individual.

The Middle Bronze Age (ca. 1900–1500 B.C.), the era of the biblical patriarchs, saw Jericho a flourishing city, defended by powerful walls mounted on a high earthen embankment. A feature of this period of special interest to students of the Bible is a series of burial caves in which much of the grave furniture was preserved. The mats, baskets, tables, stools, beds, boxes, bowls, combs, and beads give a unique sampling of the objects in daily use during the time of the patriarchs.

A human skull molded in plaster, excavated at Jericho from the Pre-pottery Neolithic phase (ca. 7000–4000 B.C.).

A clay oven with a juglet nearby (foreground) inside a house wall: scanty evidence of Late Bronze Age occupation of Jericho excavated by Kathleen Kenyon and dated by her to ca. 1350 B.C.

In the Bible: Jericho first appears in the biblical record in connection with the Israelite conquest of Canaan at the end of the Late Bronze Age (ca. 1500–1200 B.C.). The wide plain on both sides of the Jordan near Jericho provided an ideal campground from which to launch an attack on Canaan. According to the Priestly document the invading tribes were encamped in the Transjordanian portion of the plain when they defeated Sihon, Og (Num. 22:1), and the forces of Midian (Num. 31:12). At the camp a census was taken (Num. 26:3, 63) and the main provisions for the division and settlement of Canaan were made (Num. 33–36). When two spies, who were saved from death in Jericho by Rahab (Josh. 2), reported favorably, Joshua's army crossed the river, aided by a miraculous division of its waters (Josh. 3:14–17), and laid siege to Jericho.

If it could be established archaeologically, the date of the fall of Jericho would fix the beginning of the Israelite invasion of Canaan. This would require the identification of a layer of destruction debris that could reasonably be attributed to Joshua's total devastation of the city, and the identification of the city walls that, according to biblical tradition, collapsed under the spectacular conditions described in Joshua 6. J. Garstang believed that the ruin of a massive mudbrick wall, the destruction of which he dated to about 1400 B.C., was the wall in question. Dr. Kenyon's later excavation showed that this "wall" was in fact part of two Early Bronze Age walls, many centuries older than the time of Joshua. Kenyon found no trace of Late Bronze Age city walls, and only one fragment of a house floor belonging to the period. The forces of erosion had removed all the vital evidence. Principally on the basis of the pottery from five Late Bronze Age tombs, Dr. Kenyon suggested a date in the last half of the fourteenth century B.C. for the Israelite conquest of Jericho, but the more commonly accepted date of around 1200 B.C. is not ruled out on the basis of the Jericho evidence.

After its destruction by the Israelites Jericho lay unoccupied for about four centuries. It was uninhabited during the time of the prophets Elijah and Elisha, who were both active in the region (2 Kings 2:4). The long period of abandonment accounts for the almost complete erosion of the Late Bronze Age walls and buildings. Jericho was rebuilt by Hiel of Bethel during the reign of Ahab (873–851 B.C.). In the loss of his eldest and youngest sons (1 Kings 16:35) Hiel suffered the consequences predicted in the curse that Joshua laid on anyone who reestablished the city (Josh. 6:26).

Archaeologically, little is known about Israelite Jericho. Its remains have been com-

pletely eroded from the summit of the mound. It probably began as a small-scale settlement, but by the seventh century B.C. it had expanded so that impressive buildings occupied the slopes of the mound outside the line of the earlier walls. After the Babylonian invasions the site of the ancient city was abandoned.

Jericho figured in a minor way in the ministry of Jesus. He was baptized in the Jordan near the city (Matt. 3:5–17). His temptation probably took place on a mountain west of the city (Matt. 4:1–11). He came from Galilee to Jerusalem by way of the Jordan Valley and Jericho (Matt. 20). At Jericho he healed blind Bartimaeus (Mark 10:46–52), had his encounter with the tax collector Zacchaeus (Luke 19:1–11), and told the parable of the pounds (Luke 19:12–28).

Jesus' activity in Jericho was probably confined to the poorer quarter of the city and did not take him into Herod's magnificent winter capital on the banks of the Wadi Qelt, where archaeological excavations have produced spectacular results.

The Hasmonean structures, all on the north side of the wadi, were probably built by Alexander Jannaeus (103–76 B.C.). They consist in part of a palatial building (164 by 230 feet) and a swimming pool (65 by 115 feet) associated with a large courtyard. Herod renovated and extended the site on a grand scale. South of the wadi stood his earliest palace, and along the wadi's southern edge lay a magnificent sunken garden with columned porticoes at either end and a monumental facade of ornamental brickwork. On the north bank of the wadi, opposite the sunken garden, was a building designed primarily for guests. It had a columned facade 285 feet long and contained a paved reception hall; two courts, one with Ionic and one with Corinthian columns; a luxurious Roman-style bath; and numerous other rooms. Herod's private palace with adjoining swimming pool, gardens, pavilions, and ritual baths was at some distance to the west of the audience building. ***See also*** Archaeology, History, and the Bible; Conquest of Canaan; Joshua.

Jerimoth (jair'i-moth). **1** A son of Bela and grandson of Benjamin (1 Chron. 7:7). **2** One who joined David's fighting men at Ziklag (1 Chron. 12:5). **3** A Levite, son of Mushai of the clan of Merari (1 Chron. 24:30); he is also called Jeremoth (a variant spelling; 1 Chron. 23:23). **4** A Levite musician of the clan of Heman (1 Chron. 25:4); probably the same person also called Jeremoth who was head of the fifteenth course of musicians (1 Chron. 25:22). **5** A son of King David and father of Mahalath, a wife of King Rehoboam (2 Chron. 11:18). **6** A Levite Temple official during the reign of King Hezekiah (2 Chron. 31:13). ***See also*** Jeremoth. D.R.B.

Jeroboam I (jair'uh-boh'uhm; meaning uncertain; possibly Heb., "may the people multiply" or "he who contends for the people"), the first king of the Northern Kingdom (Israel), who reigned from ca. 922 to 901 B.C. Jeroboam, the son of Nebat and Zeruah, was an Ephraimite from Zeredah who began his rise to power when Solomon appointed him to oversee the forced labor in Ephraim and Manasseh (1 Kings 11:26–28). The precise circumstances of his becoming king are unclear, since the Masoretic Text (MT) and the Septuagint (LXX) preserve conflicting accounts of the event. According to the MT, Jeroboam rebelled against Solomon, although the details of the revolt are not given (1 Kings 11:26). Jeroboam was promised kingship over the northern tribes by the prophet Ahijah of Shiloh, who interpreted the later revolt of the north as a judgment on the house of David because of the sins of Solomon (1 Kings 11:29–39). Solomon then sought to kill Jeroboam, who was forced to flee to Egypt until the king's death. Jeroboam then returned and played a leading role in the events that led to the secession of the northern tribes.

The LXX amplifies the picture of Jeroboam's rebellion by stating that he fortified the city of Sarira and gathered three hundred chariots in an attempt to overthrow Solomon (LXX, 1 Kings 12:24). When this attempt failed, Jeroboam fled to Egypt, where he married into the royal family (cf. MT, 1 Kings 11:14–22). After he returned home, he again fortified Sarira, but before he could pursue the revolt further, his son became ill. When he asked Ahijah about the fate of the child, the prophet predicted the end of Jeroboam's dynasty (cf. MT, 1 Kings 14). No matter which of these two accounts is accurate, it is probable that Jeroboam did not become king until after the northern tribes had withdrawn their support from Solomon's son and successor Rehoboam because of the latter's refusal to lighten the burdens that Solomon had placed on them (1 Kings 12:1–20).

After becoming king, Jeroboam fortified Shechem and Penuel (1 Kings 12:25) and may have used them as his capital before he established his residence in Tirzah (1 Kings 14:17). In order to discourage his Ephraimite subjects from traveling to Jerusalem for worship, he set up gold bull images ("calves") at Bethel and Dan, an act he probably understood as a revival of an older form of the worship of God (see Exod. 32:1–6). At the same time, he revised the cultic calendar, instituted a non-levitical priesthood, built shrines on the high places, and

served as a priest himself, at least on certain occasions (1 Kings 12:26–33).

These religious reforms earned him the condemnation of the writers of the books of Kings, for whom he became the paradigm of the evil king. According to their interpretation of Israelite history, Jeroboam's cultic sins immediately led to the condemnation of the altar at Bethel by an unnamed prophet from Judah (1 Kings 13:1–10) and later provoked Ahijah to prophesy the destruction of Jeroboam's royal line (1 Kings 14:7–11; 15:27–30). Throughout their account of the history of the Northern Kingdom, the writers of Kings claim that all subsequent Ephraimite kings "did what was evil in the sight of the Lord and walked in the way of Jeroboam" (e.g., 1 Kings 15:26). The pattern of sin established by Jeroboam continued until the Northern Kingdom itself was finally destroyed (2 Kings 17:21–23).

When the Egyptian pharaoh Shishak invaded Palestine (ca. 918 B.C.), he made raids into Israel and destroyed a number of cities. This incursion may have weakened Jeroboam's control over his kingdom and encouraged the neighboring Philistines and Aramaeans to seize Israelite territory. The Chronicler also reports extensive warfare with Judah during Jeroboam's reign, although the outcome of these battles is unclear (2 Chron. 12:15; 13:2–20; cf. 1 Kings 14:30; 15:6–7). R.R.W.

Jeroboam II (meaning uncertain; possibly Heb., "may the people multiply" or "he who contends for the people"), the son of Joash and his successor as king of Israel. Although the writers of the books of Kings say little about Jeroboam's forty-one-year reign (ca. 786–746 B.C.) except that "he did what was evil in the sight of the Lord [and] did not depart from all the sins of Jeroboam son of Nebat" (2 Kings 14:24), a more complete account of his relatively prosperous kingship can be reconstructed on the basis of extrabiblical sources.

As the penultimate king of the Jehu dynasty, Jeroboam inherited a more favorable set of political circumstances than did his predecessors. Effective Assyrian intervention in Palestine ended with the campaigns of Adad-nirari III (809–782 B.C.), who at the end of the ninth century moved west and defeated the Aramaeans of Damascus, who had been harassing Israel since the end of Jehu's reign (ca. 816 B.C.; cf. 2 Kings 13:5). The Assyrian king exacted tribute from several rulers in the area, including Jeroboam's father, Joash, but the heaviest blows fell on the Aramaeans, whose political power was severely restricted. During the first half of the eighth century Adad-nirari III and his successors were occupied with internal strife at home, and the resulting power vacuum in Palestine allowed Jeroboam to expand his borders from the Sea of the Arabah (the Dead Sea) to the "entrance of Hamath" (2 Kings 14:25) and to reclaim territory lost during the

Bronze copy of a seal inscribed, "Belonging to Shema, the servant of Jeroboam"; Megiddo, from the reign of Jeroboam II, 786–746 B.C.

reign of Jehu and Jehoahaz (2 Kings 10:32–33; 13:1–9). He may also have moved into Transjordan and gained control over Damascus, thus restoring the boundaries of the old Davidic Empire (2 Kings 14:28; Amos 6:13), but the texts that describe these events are difficult to interpret.

Jeroboam's expansionist activities, which were supported by the prophet Jonah, the son of Amittai (2 Kings 14:25), brought prosperity to Israel, particularly in the larger cities. The new land was presumably assigned to the king's supporters, who became part of a new class of wealthy landowners. Increased agriculture and trade brought more tax revenue into the royal court. This redistribution of land and money increased the number of poor people in the land and created a class of servants and slaves, who were exploited by the rich. These social and economic abuses, together with a continuation of Baal worship, provoked sharp judgment oracles from the prophet Amos, whose words dramatize the negative aspects of Jeroboam's economic prosperity (Amos 2:6–8; 4:1–3; 5:10–12; 6:4–7, 11–14; 8:4–6). ***See also*** Amos, The Book of. R.R.W.

Jeroham (ji-roh´ham; Heb., "may he be loved" or "may he have compassion"). **1** A Levite, the father of Elkanah and grandfather of Samuel (1 Sam. 1:1; 1 Chron. 6:34). **2** A family group ("sons of Jeroham") in the tribe of Benjamin (1 Chron. 8:27). **3** A Benjaminite, the father of Ibneiah, an inhabitant of postexilic Jerusalem (1 Chron. 9:8). **4** A priest, the father of Adaiah, another inhabitant of postexilic Jerusalem (1 Chron. 9:12; Neh. 11:12). **5** A man from Gedor whose two sons, Joelah and Zebadiah, joined David's fighting men at Ziklag (1 Chron. 12:7). **6** The father of Azarel, the leader of the tribe of Dan during David's reign (1 Chron. 27:22). **7** The father of Azariah, a military leader under the high priest Jehoida (2 Chron. 23:1). Jerusalem

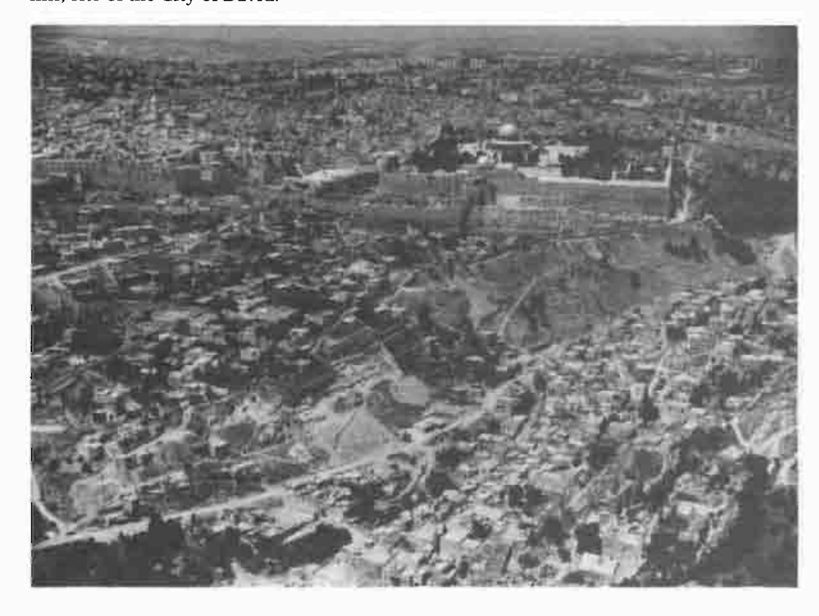
Topography: Situated on the crest of the Judean mountains, some twenty miles west of the Dead Sea's northern end and thirty miles east of the Mediterranean Sea, the biblical city of Jerusalem (ji-*roo*´suh-luhm) was built over two hills ranging from 2300 to 2500 feet above sea level and surrounded by valleys. The earliest walled settlement, which spanned the second millennium B.C., was founded on about fifteen acres of the low southern spur of the eastern hill, the area known today as the City of David. It was bounded on the east by the north-south Kidron Valley, on the west and south by the north-south Central (Tyropoeon) Valley, today El-Wad ("Valley") Street, and on the north by the hump of the Ophel; the population was probably between one and two thousand. Solomon's construction of the First Temple doubled the city's size to the north, incorporating the Ophel and what may have been a Jebusite holy place on the highest point of the eastern hill, up to the east-west Bethzatha Valley. Following the split of the two kingdoms and the growth of Assyrian pressure on the North, with a consequent migration of refugees to the South, the population of Jerusalem grew beyond the capacity of the walled enclosure, spreading through the Central Valley to the southwestern hill, today known as Mount Zion. The latter is circled on the west and south by the Hinnom Valley (Heb. *gai hinnom*, "Gehenna"), which begins near the Jaffa Gate and descends to meet the Kidron south of Siloam. On the north, Mount Zion is limited by the east-west Transversal Valley, which descends from today's Jaffa Gate along David Street and the Street of the Chain to meet the Central Valley at El-Wad Street. In Roman times, the city was extended again to the north and northwest, essentially to its modern walls. (But see below for discussion of "Third Wall.") The southern third of the biblical city is outside the confines of the walls of today's Old City.

The word "Jerusalem" incised on a wall of a rock-cut burial cave near Lachish; early sixth century, B.C.

Only two major springs are to be found in the neighborhood, both in the Kidron Valley. Ain Sitti Maryam ("Lady Mary's Spring"), biblical Gihon (1 Kings 1:38), is at the foot of the slope of the City of David, always a key water source for the city; the other, Bir el-Ayyub

Situated in the central hill country, Jerusalem became, under David, the key city of ancient Israel, and thus it remained. (In addition to the three plans of Jerusalem included later in this article, three more plans of the city at different historical periods are included in the section of color maps [14, 15, 16].)

("Job's Well") is a short distance to the southeast, just beyond the confluence of the Kidron and Hinnom valleys, probably to be identified with the biblical En-rogel (1 Kings 1:9).



The shallow soil of the region makes for meager agriculture, but the underlying Cenomanian limestone provides excellent building material, weathering into a beautiful golden hue in the evening sun. The area was heavily treed in biblical times, but suffered severe deforestation during the first-century Roman siege of the city, and again in the Islamic period with the overgrazing by herds of black goats.

Name: Although some Chalcolithic evidence for settlement about 3200 B.C. has been found, the earliest literary references to *Rushalimum* appear in Egyptian Execration Texts of the twentieth and nineteenth centuries B.C. The fourteenth-century B.C. Amarna Letters speak of *Urusalim*. *Yerushalem* was probably the original pronunciation in Hebrew, later modified to the dual form *Yerushalayyim*. The name seems to mean "Foundation of [the god] Shalem." Shalem and his twin, Shahar, are known from Ugaritic texts as the gods of twilight and dawn respectively. Scholarly opinion is divided over the identification of Melchizedek's "Salem" with Jerusalem (Gen. 14:18; Ps. 76:2; Heb. 7:1; see also John 3:23).

Jebus, the city of the Jebusites, is known only from the Bible and seems to be identified with Jerusalem of the immediate pre-Israelite period through the time of David's capture of the city ca. 1000 B.C. Some problems exist in this attribution, however.

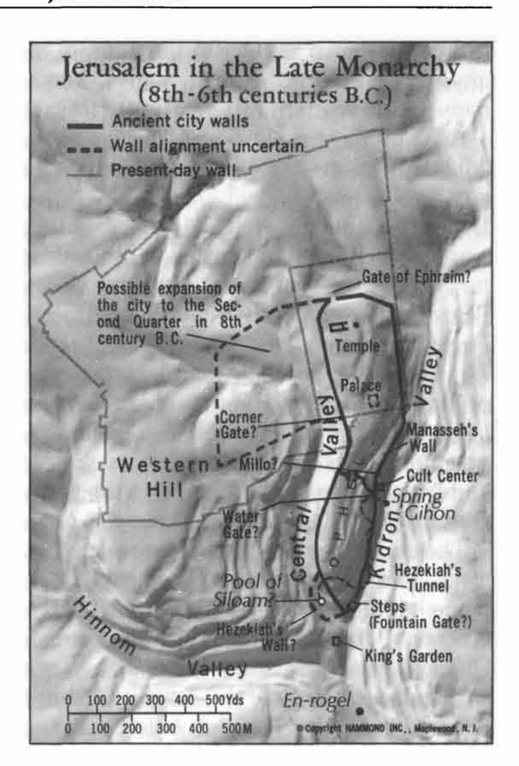
Zion is first mentioned as the citadel captured by David and renamed "City of David" (2 Sam. 5:6–7). It seems to have been extended

Aerial view of Jerusalem showing, in the center, the site of the ancient city. The Dome of the Rock stands in the area that was the Temple Mount, to the right of which is the Kidron Valley, which continues into the foreground. Above the steep slope of the Kidron is the Ophel hill, site of the City of David.

in later parlance to refer to the Temple Mount and then to the entire city, particularly in a poetic sense. The erroneous attribution of the name to the western hill dates only from the Byzantine period.

As capital, Jerusalem was known as the "city of Judah" (2 Chron. 25:28); it seems the natural reference for the Lachish Letters' "the city."

History: Although archaeologist Kathleen Kenyon thought the city was first walled about in the Middle Bronze period (eighteenth century B.C.), evidence from the succeeding Hyksos period of Egypt and Palestine (seventeenth–fifteenth centuries B.C.) has not been found in Jerusalem excavations. We catch a glimpse of the city's actual history for the first time in the Amarna Letters, six of them written by the king of Jerusalem to the Egyptian pharaoh, attesting to his own loyalty and begging for help against other Canaanite kings, Habiru, and even the pharaoh's own Nubian garrison in the region. Pottery of the Middle and Late Bronze periods found in the surroundings shows commercial contacts with Egypt, Cyprus, and the Aegean.



Entrance to Hezekiah's tunnel cut beneath the City of David in the eighth century B.C. It brought water from the Gihon spring to the west side of the Ophel hill.

The ethnic composition of Jerusalem of the Bronze Age is not totally clear. The king of the Amarna Letters bears a Hurrian theophoric name, *Abdi-hepa* or *ARAD-HI-pa* ("Servant of Hipa"), writes in the Akkadian *lingua franca* of the day, but betrays a West Semitic (akin to Hebrew) mother tongue. Josh. 10:5 refers to Adonizedek of Jerusalem as one of the "kings of the Amorites," but Josh. 18:28 assigns *haJebusi* ("the Jebusite city"), which is Jerusalem, to the tribe of Benjamin, an identification maintained in Judg. 19:10. Judg. 1:8 attributes an early total conquest and destruction of Jerusalem to the tribe of Judah, but the city reappears again as "Jebusite" in the days of David. The Jebusites survived in Jerusalem with Benjamin, intermarrying with Israelites (Judg. 1:21; 3:6). Ezek. 16:3 charges the city with mongrelized parentage: "Your father was an Amorite, and your mother a Hittite"; but these sixth-century references may be either pejorative, insulting reminiscences of fallen peoples, and/or genuine historical recollections of the origins of the Jerusalem population. When David conquered the city, he set aside the threshing floor of "the Araunah" (*evrine*, "lord," not a name here, but a Hurrian title used in Hittite), possibly the former ruler of the city (2 Sam. 24:16). Thus, the Jerusalem taken by David may have represented an enclave of Hittites/Hurrians remaining from the now long past Hittite empire, ruling over a local Amorite population, increasingly isolated among the surrounding Israelites.

Jerusalem was taken for David by his uncle, Joab (2 Sam. 5:6–8; 1 Chron. 11:4–6), winning for the latter the position of commanding general of David's armies from that time on. Seven years later, David transferred his capital from the Judahite town of Hebron to the more tribally neutral Jerusalem, whose citadel became known as "The City of David." He engaged in rebuilding the Millo (possibly the terraces of the eastern slope) and constructed for himself a palace of Lebanon cedar.

Recognizing the need to centralize the Israelite identity of the fractious tribes around the monarchy, David brought to Jerusalem the Ark of the covenant, the central pilgrimage shrine object and symbol of unity of all Israel. The description of the desert tabernacle in Exodus

Ahaz, Hezekiah, Manasseh, Josiah, and Jehoiakim are among the kings of Judah who reigned in Jerusalem in the eighth to sixth centuries B.C. The prophets Isaiah of Jerusalem and Jeremiah were active in this period.

26–27 is thought by some to be of David's shrine to house the Ark. The city thus became the cultic as well as the political and military administrative center of the nation. As the royal court developed, it attracted the best talent from throughout the country for royal service, as well as non-Israelite mercenaries (such as Uriah the Hittite), who owed their loyalty to David alone, not to a particular tribe. Indeed, it appears that the Jebusite urban establishment may have remained largely in place under David, with Zadok continuing as priest alongside the Aaronide Abiathar.

Solomon continued David's policies, enjoying a time of relative international peace to consolidate his central power in Jerusalem. He undertook massive building projects in Jerusalem, concentrating for the first seven years on the Temple north of the City of David and extending the acropolis to include the rise of the hill under today's Haram es-Sharif. The next thirteen years saw the erection of his own palace complex between the new Temple and the older City of David to the south, as well as pagan temples across the Kidron for his wives. But the royal taxation and centralization of power in Jerusalem offended tribal sensibilities in the north, and the division of the kingdom after Solomon's death (ca. 920 B.C.), as well as the loss of control of the surrounding subject nations, saw the city reduced to merely the capital of the tribal territories of Judah and Benjamin.

The Temple remained the principal (albeit not yet exclusive) site of Judahite worship. Jehoshaphat established a royal court system centered in the city, and fortifications were strengthened repeatedly throughout the next three centuries. The Assyrian threat and actual destruction of the Northern Kingdom drove many refugees south in

the eighth century B.C., leaving Hezekiah's expanding Jerusalem effectively once again the capital of the remnants of the entire Israelite nation. For a short time he was able to develop new strength in trade relations, but Sennacherib's hostile approach (701 B.C.) required new fortifications for the southwestern hill, strengthening of the Millo, and diversion of the Bilhon waters through a 1,700-foot tunnel under the City of David. Sennacherib, having taken Lachish and most of the rest of Judah, shut Hezekiah up in Jerusalem "like a bird in a cage." He was, nevertheless, unable to take the city, and withdrew to Assyria, strengthening the idea of the divinely guaranteed impregnability of Jerusalem. Nonetheless, the city remained under Assyrian hegemony for almost another century, symbolized by the worship of Assyrian gods in the Temple.

In the mid-seventh century, Manasseh again reinforced the citadel and built a new outer wall (2 Chron. 33:14). Josiah threw off the weakening Assyrian yoke, purged and renovated the Temple, and purified the cult on the basis of a scroll (probably much of Deuteronomy) found in 622 B.C. Josiah was killed at Megiddo in a confrontation between Egypt and Babylon as they attempted to take advantage of the power vacuum following the collapse of Assyria. His successors were unable to keep the Babylonians at bay, however, and the city was destroyed and depopulated by Nebuchadnezzar in 586 B.C., for the next half century lying in the desolation described so vividly in Lamentations.

With the fall of Babylon to the Persians in 539 B.C., Cyrus opened the way for exiles, including the Jews, to return to their various homelands, and small contingents of returnees began to move back into the ruins of the City of David. The first group, led by Prince Sheshbazzar, reestablished worship in 538 B.C. A second group under Prince Zerubbabel and the high priest Joshua, spurred on by the prophets Zechariah and Haggai, completed a modest rebuilding of the Temple between 521 and 515 B.C.

The huge retaining wall at the southwestern corner of the Temple Mount from the time of Herod the Great.

The next light on the city comes with the arrival of Ezra the scribe and his returnees, probably in 458 B.C., and then with a new governor, Nehemiah, in 445 B.C. Although abortive attempts to repair the walls had been made since the original return, opposition from the surrounding peoples had prevented the Jerusalemites from achieving this symbol of independence. Nehemiah, however, completed walls around the much restricted area of the crest of the City of David and the Temple in fifty-two days. His reform of Jewish marriages and enforced resettlement (Neh. 11:1) of one-tenth of the population inside the walls brought more economic and military security to the city. A number of structures and city gates are mentioned in Nehemiah but only a few can be located with certainty. Nothing else is known of the city's history for the next century, and the population must have been quite small.

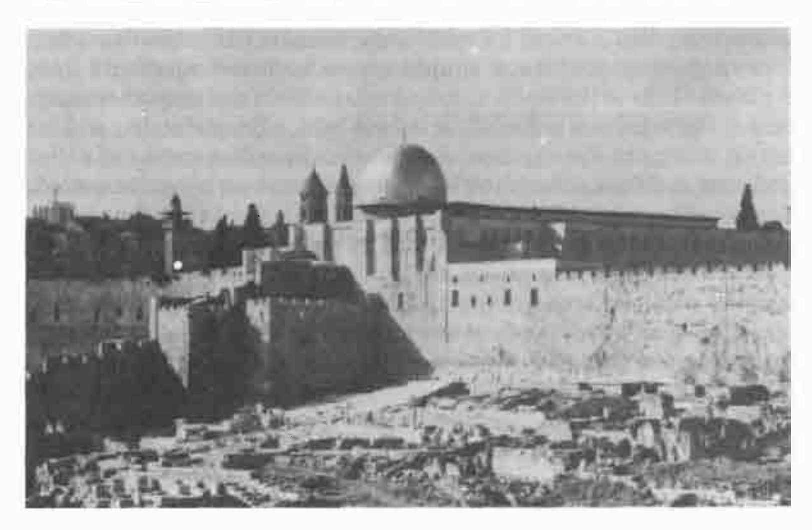
In 332 B.C., Alexander the Great conquered Judah and Jerusalem as he moved through Palestine toward Egypt. With the shakeout of the Diadochoi's (Alexander's generals) respective portions of Alexander's empire, Jerusalem lay under generally benign Ptolemaic rule from 301 to 198 B.C. Political stability seems to have led to economic development and a significant increase in population. Nonetheless, the Jews welcomed the Seleucid Antiochus III after his conquest of Palestine

and a movement of hellenization of the city began to take on momentum. The construction of a gymnasium in 175 B.C. moved the city closer to becoming a Greek *polis*. Repairs to the Temple and walls were aided by the authorities, and Jewish traditions were respected at first. But the royal appointment of Menelaus as high priest in 171 B.C., the looting of the Temple by Antiochus IV Epiphanes, establishment of a foreign garrison in the Acra in 168 B.C., and the attempt to impose Greco-Syrian pagan worship in the Temple incited a rebellion led by the priestly Hasmonean family. Judas Maccabeus took the city and cleansed the Temple in 164 B.C. (an event commemorated by the feast of Hanukkah), but was unable to dislodge the Syrian garrison in the Acra. Nonetheless, the city's fortifications were strengthened under Judas and his brothers, Simon finally expelling the Syrians and razing the hated Acra in 141 B.C.

Jerusalem prospered under the Hasmoneans (who arrogated to themselves both high-priestly and royal prerogatives), growing in population and spreading again to the southwestern hill, which was enclosed within the "First Wall" by Simon and John Hyrcanus I. A treaty with Antiochus VII Sidetes traded the demolition of part of the fortifications for Seleucid recognition of the now sizable Hasmonean kingdom under John Hyrcanus I, with the consequence that the city began to grow rapidly. A new section to the north was encircled by the "Second Wall" (although some scholars date it to the time of Herod the Great), and a new aqueduct brought in water from the southern hills to meet the population's increasing needs. A royal palace was constructed in the Upper City on a spur of the southwestern hill overlooking the Temple Mount. After the death of Queen Salome Alexandra in 67 B.C., a period of internecine warfare among the Hasmoneans permitted the Romans under Pompey to conquer Jerusalem in 63 B.C. as they consolidated their control of the former Seleucid kingdom of Syria.

Persian marble head, perhaps of Cyrus II, sixth century B.C.

The Roman governor, Antipater the Idumaean, repaired the walls in 48 B.C., and in 43 B.C. named his sons Phasael and Herod, respectively, tetrarchs of Jerusalem and of Galilee. A Parthian invasion in 40 B.C. incited a last Hasmonean revolt under Mattathias Antigonus. Phasael died, but Herod sought and obtained Roman sanction for his ambitions. The Senate named him king of the Jews and provided the military assistance necessary for the reconquest of the former Hasmonean territories by 37 B.C. Called "the Great" because of his many building projects both throughout his own kingdom and elsewhere in the empire, Herod completely changed the face of Jerusalem to that of a typical classical city over the next thirty years. The adaptation of an older Hasmonean fortress into the Antonia (named for Herod's patron, Marc Antony), the reconstruction of three massive towers in the Citadel (named "Phasael" for his brother, "Mariamne" for his wife, and "Hippicus" for a friend), the building of a royal palace on the southwestern hill adjacent to the present Jerusalem Citadel, and, above all, the erection of what was effectively a Third Temple on the massive platform still extant on the eastern hill led to an economic boom in the form of an influx of artisans and merchants to supply them. The "Ecce Homo" arch on the current Via Dolorosa north of the Temple Mount is now thought by some scholars to be the Herodian eastern gate of the ex-



panded city (but thought by more to be the gate of Hadrian's eastern forum). An improved water supply system included aqueducts from the higher hills to the south and reservoirs within and around the city. Herod seems to have followed, at least in part, a Hippodamian grid for his extensions of the city; and the historian Josephus speaks of a hippodrome and theater, but their locations have not yet been discovered. The beautification of the city made it that much more appealing to pilgrims, who came in tens of thousands for the major holy days.

At Herod's death in 4 B.C., rule of Judea and Jerusalem passed to his son, the ethnarch Archelaus, but after ten years of cruelty and malfeasance he was exiled to Gaul by the Romans, and their governors (procurators or prefects) were assigned to the province. Under one of these, Pontius Pilatus, Jesus of Nazareth was executed by crucifixion on a small hill called Calvary just outside the city and buried in an adjacent tomb. Many of his followers remained in Jerusalem after his crucifixion and reported resurrection, while others spread throughout the Roman world and beyond.

Herod's grandson, Agrippa I, reigned briefly, A.D. 41–44, but direct Roman rule was reinstated after his death. The population of Palestine was about two-thirds Jewish during this time, and the relationship between Jews and Roman authorities always carried a degree of tension. Under Gessius Florus, that tension exploded in Caesarea Maritima in A.D. 66 and then spread to Jerusalem. After the Roman Twelfth Legion and its auxiliaries under the governor of Syria, Cestius Gallus, were severely defeated by the Jews, the "Third Wall," well to the north of the city (now near the U.S. Consulate), was hastily erected in anticipation

Herod the Great (40–4 B.C.) undertook a massive building program in Jerusalem that included extending the Temple Mount to the south and constructing a new Temple edifice.

Excavations in front of the southern wall of the Temple Mount have revealed significant remains from the Umayyad, Byzantine, Herodian, Hasmonean, and First Temple periods.

of a siege by Vespasian's Romans. Christians in the city, perhaps incited by the quarreling among the Jewish leaders, abandoned it for Pella in Transjordan. Vespasian having been named emperor after his successful campaign in Galilee, his son Titus arrived in early 70 to lay siege to Jerusalem. The Romans breached the new north wall in May, took the Antonia in July, the Temple area in August, and the remainder of the city in September. Titus destroyed most of the city, sparing only the three towers of the Citadel area to provide protection for the Tenth Legion, which remained stationed there for the next several centuries. The city was largely abandoned, and even the Sanhedrin moved to Jamnia near the coast.

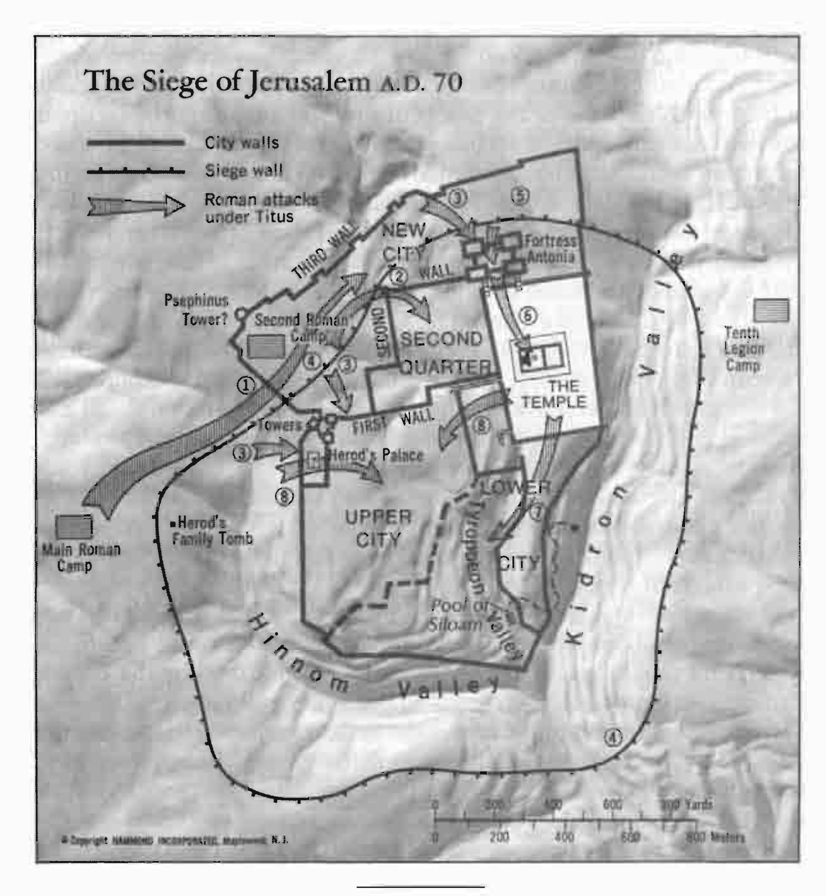
News that the Emperor Hadrian planned to settle a Roman colony on the site of Jerusalem provoked a second revolt of the Jews, this time under Bar Kochba in 131. The uprising was put down in 135, and Hadrian proceeded to rebuild the city as Aelia Capitolina, named for his own family and for Jupiter Capitolinus. A Roman temple was built on the Temple Mount and a forum with temple over the reputed site of the burial of Jesus. "All circumcised persons" (i.e., principally Jews) were forbidden even to enter the territory of Aelia Capitolina. After the devastation of two wars in seventy years, the Jewish population of Palestine had dropped to about one-third of the country's total. Most of the others were Syrians and Arabs, including many veterans of the Tenth Legion who settled in Aelia.

The later history of the city is beyond the scope of this article, but a short outline may be given:

135–323	Roman pagan rule of Aelia Capitolina: small town
323–638	Byzantine Christian rule: significant development
614–628	Persian invasion and interregnum
638–1099	Early Islamic period: economic decline
1099–1187	Latin Kingdom of Jerusalem: Crusaders
1187–1291	Alternating Crusader and Muslim rule
1291–1517	Ayyubid/Mamluk rule: Islamic construction
1517–1917	Ottoman Turkish rule: return of Jews

The Mount of Olives (upper left) and the traditional site of the Garden of Gethsemane (center, to the left of the church).

1917–1948	British Mandate from League of Nations: growth
1948–1967	City divided between Israel and Jordan
1967–	City reunited under Israel: significant growth



Archaeology: Given the spiritual importance attached to Jerusalem by both Jews and Christians (and later by Muslims), an abundance of ancient and medieval sources beside the Bible itself speak of the city. But at least partly because of the effects of that spiritual importance upon the writers, each source must be examined critically. Some of the more important works may be mentioned here. *The Jewish War*, by Flavius Josephus, is the best source for Jerusalem before A.D. 70. Eusebius, bishop of Caesarea (313–ca. 339), composed a major work on biblical geography, but only the fourth part remains extant as his *Onomasticon;* the plan of Jerusalem and the Temple has unfortunately been lost. Nonetheless, Eusebius's *Chronicle, Church History,* and *Life of Constantine* have an abundance of information about Christian Jerusalem. Later in the fourth century, Jerome translated into Latin and corrected the *Onomasticon*. Jerome's contemporary, Egeria (or Aetheria), left her account of a visit to the city in *Peregrinatio ad loca sancta.* The sixth-century mosaic map found in Madeba, Jordan, in 1884 depicts the Byzantine city and its major buildings and thoroughfares. The observations of the seventh-century Frankish bishop Arculf were preserved by Adamnan of Iona in the first of a three-volume work, *Adamnai de locis sanctis libri tres.*

Modern systematic study of Jerusalem began in the nineteenth century with the observations of the American scholar Edward Robinson. Robinson's reports inspired two expeditions sponsored by the British Palestine Exploration Fund, those under Charles Wilson and Charles Warren. Construction projects brought to light various ancient remains over the next several decades, such as the so-called Lithostratos under the convent of the sisters of Sion (now identified as pavement of a Hadrianic forum). Systematic excavations were undertaken on the southeastern spur by the Parker and Macalister expeditions early in the

twentieth century, and there and elsewhere by Kathleen Kenyon in the 1960s. But the real explosion of archaeological work came after the Six-Day War in 1967 left the Old City under Israeli control. Possibly no other city in the world has been excavated so extensively as Jerusalem since 1967. Only the Haram es-Sharif (the Herodian Temple Mount platform) remains untouched by archaeologists.

South and southwest of the Temple Mount, Benjamin Mazar uncovered massive Umayyad palaces and hostels built over Byzantine-period homes. Below these were the Herodian structures associated with the construction and situating of the Temple platform: the Huldah Gates, the stairway from "Robinson's Arch," the paved street descending the Tyropoeon Valley, shops, etc. A clear image of this part of Herodian Jerusalem has been pieced together. Ninth-century B.C. tombs, a plastered cistern, and a large building bore witness to Judahite Jerusalem. A structure just to the south of the Huldah Gates may be the Syrian Acra built by Antiochus IV Epiphanes, although this is still disputed by many scholars.

On the western hill, Nachman Avigad excavated the old Jewish Quarter, abandoned from 1948 to 1967, discovering the colonnaded Byzantine *cardo maximus* (main north-south street) and the foundations and cistern of Justinian's Nea church, just as depicted in the Madeba Map. Several affluent homes of Herodian Jerusalem were found. A "broad wall," other structures, and pottery bore witness to the expansion of the

KEY TO EVENTS OF SIEGE

① Romans breach Third Wall May 25 and capture New City.

② Romans enter Second Quarter. Jews withdraw behind First Wall. May 30–June 2.

③ Titus's divided attack on First Wall and the Antonia fails.

④ Romans build siege wall around city.

⑤ Romans renew assault on the Antonia. Fortress falls to Titus July 22.

⑥ Romans burn gates and enter Temple courtyards. On August 29 Temple destroyed by fire.

⑦ Romans burn Lower City. September 2?

⑧ Romans assault Herod's Palace and enter the Upper City. Resistance ends on September 26.

The base of "the Tower of David" dates to the time of Herod the Great, when it was part of the Phaesalis tower.

walls of Jerusalem in the eighth century B.C. under the Assyrian threat. Hasmonean engineers had later worked their fortifications into the remnants of the earlier walls.

Yigal Shiloh picked up where Kenyon had left off in the City of David, establishing more accurate dating for earlier discoveries and discerning some twenty-five occupational strata from the Chalcolithic through the medieval periods. The Gihon water systems were clarified, remains of monarchy-period houses were found, and a large stepped stone structure was reinterpreted as part of the retaining wall/platform of a tenth-century B.C. acropolis—David's stronghold.

Other excavations in the Jerusalem Citadel near the Jaffa Gate have confirmed the Iron Age II expansion of the city to the western hill. First Temple–period tombs have been found in Silwan, a village across the Kidron Valley from the City of David, in the Valley of Hinnom, and north of the Damascus Gate. Second Temple–period tombs and those of later periods have long been known on the Mount of Olives and elsewhere around Jerusalem. Excavations under the Church of the Holy Sepulchre have confirmed that the area was an ancient quarry reused as a cemetery in the first century A.D. To the south of Jerusalem, an ossuary in a burial cave of the first century A.D. was found in 1990 with two inscriptions reading *Jehosef bar Ca(i)fa,* "Joseph son of Caiphas," quite possibly the high priest at the time of Jesus' crucifixion. Work along the "Third Wall" north of the Old City has brought a growing consensus that recognizes its correspondence to the description by Josephus.

The twin arches of the now walled-up Golden Gate in the eastern wall of Jerusalem's old city, originally built in the Byzantine period.

Jerusalem as a Symbol: From the time of David's construction of the altar on the threshing floor and Solomon's building of the Temple, Jerusalem has been the primary center of the religious universe of the Jewish people. The destruction of the First Temple by the Babylonians in 586 B.C. evoked a national consciousness among the exiles that centered on restoration of the Temple and renewal of Jewish life in the city and the land. The book of Ezekiel idealized a rebuilt temple as the place of God's presence to his people. The sanctity of the site was enhanced by its identification in 2 Chron. 3:1 with the mountain of "the Moriah," the site of Abraham's abortive sacrifice of Isaac. Defilement of the Temple by Antiochus IV Epiphanes led to the successful Maccabean revolt. Herod rebuilt it to be the most magnificent structure in

the Roman world, and even Titus deliberated on how to save it from destruction in his siege. Hadrian's plans for a pagan temple on the site (intended to obliterate the memories and hopes of Jewish worship there) provoked Bar Kochba's unsuccessful revolt, but even the ensuing exclusion of Jews from the city and surroundings did not diminish its importance to them. The Mishnah preserved real and idealized descriptions of the Temple and its ceremonies, and the orientation of synagogues always provided for the congregation to face toward Jerusalem during prayer.

Idealization of the city of Jerusalem as such occurs in the exilic and postexilic prophets (e.g., Isa. 44:26–28; 62:1–12). The apocalyptic mind-set, increasingly frustrated with the cognitive dissonance between prophetic idealism and actual reality, began to make a distinction between an earthly Jerusalem and a heavenly one. In Gal. 4:22–31, Paul develops an allegory, equating the slave woman Hagar with Mount Sinai (i.e., the law) and the contemporary Jerusalem, but the freeborn wife, mother of Christians, with the Jerusalem above. A generation later, after the Jewish War and its destruction of the earthly city, the author of Rev. 21:9–22:5 draws heavily upon the New Temple imagery in Ezekiel 40–48 to describe the "holy city Jerusalem coming down out of heaven from God." The "New Jerusalem" has ever since remained a Christian symbol of God's ultimate saving power.

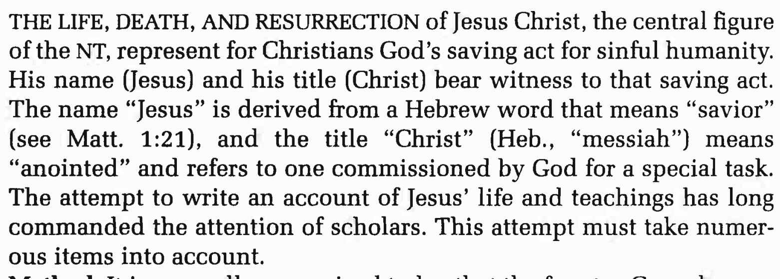
C.H.M.

Jeshaiah (ji-shay´yuh; Heb., "Yah [God] saves" or "Yah is salvation"). **1** A Judahite, the grandson of Zerubbabel and in the royal lineage of the kings of Judah (1 Chron. 3:21). **2** A Levite musician of the clan of Jeduthun; head of the eighth course of musicians (1 Chron. 25:3, 15). **3** A Levite who shared the responsibility of keeping the Temple treasures (1 Chron. 26:25). **4** The son of Athaliah; a leader of the clan of Elam who returned from the Babylonian captivity with Ezra (Ezra 8:7). **5** A Levite of the Merarite clan who joined Ezra at the Ahava River to return to Jerusalem from Babylon (Ezra 8:19). **6** A descendant of Benjamin (Neh. 11:7). D.R.B.

Jeshanah (jesh´uh-nuh; Heb., "old"), a city on the border of Judah and Israel, probably modern Burj el-Isaneh about six miles southeast of Shiloh. 2 Chron. 13:19 relates its capture by Abijah in his war with Jeroboam I.

Jeshimon (ji-sh*i*´mon; Heb., "desert" or "barren waste"). While the word is used simply to mean "barren wilderness" (Deut. 32:10; Ps. 107:4), there are several places where it seems to indicate a specific geographical location. **1** A region in the hill country of Judah into which David fled from Saul (1 Sam. 23:19, 24; 26:1–3). Other place names mentioned (Maon, Ziph, Engedi) identify Jeshimon as the eastern section of the Judean hill country, an area between Hebron and the Dead Sea generally called the Wilderness of Judah. **2** In Numbers (21:20; 23:28) Jeshimon is an area of the Jordan Valley northeast of the Dead Sea (the Plains of Moab) overlooked by Mount Pisgah (Nebo?) and Mount Peor. There may be some connection between the name Jeshimon for this area and the Moabite settlement of Beth-jeshimoth (Num. 33:49). It is possible that the word simply means "desert" in both instances above. ***See also*** Beth-jeshimoth; Maon.



Jeshua (jesh´y*oo*-uh; Heb., "Yahweh is salvation"), the Aramaic form of Joshua. **1** A Levite, the head of the ninth division of priests (1 Chron. 24:11); he is probably the ancestral head of the family groups below. **2** A priest who shared the responsibility for distributing the Levites' portion of the offerings to the levitical cities during the reign of Hezekiah (2 Chron. 31:15). **3** The son of Jozadak (Jehozadak) and a priest and clan leader who, along with Zerubbabel, led the return of a group of exiles from the Babylonian captivity (ca. 521 B.C.; Ezra 2:2; Neh. 7:7). He worked closely with Zerubbabel in reestablishing the worship of God in Jerusalem, first building an altar and reinstating sacrificial worship (Ezra 3:1–5) and then, with the encouragement of the prophet Haggai (Hag. 1:1–11), helping organize the rebuilding of the Temple (Ezra 3:8–9; 5:2). He is referred to as the high priest by Haggai (1:1) and Zechariah (6:11) and was the father of Joiakim who probably succeeded him as high priest (Neh. 12:10–12). In one of Zechariah's visions (Zech. 3:1–10) Jeshua is the representative of Israel whose exchange of "filthy garments" for "rich apparel" symbolizes not only the cleansing and reinstatement of the priesthood (v. 7), but also the atonement of the people's sins through the suffering of the captivity (v. 4; see Jer. 32:36–44). To him was given the messianic announcement of the coming of "My Servant" and the "Branch" who would finally remove the people's sin (vv. 8–9). In another vision (Zech. 6:10–15), Jeshua is given a crown and equated with the Branch; however, most scholars recognize a textual error here (v. 11) and read Zerubbabel for Jeshua. The Hebrew form of the name, Joshua, is used by the prophets (Hag. 1:1; Zech. 3:1). **4** A clan ("house of Jeshua") of which the family group of Jedaiah returned from the Exile with Zerubbabel (Ezra 2:36). **5** A family group of the clan of Pahath-moab who also returned from Exile (Ezra 2:6). **6** A priestly family of the clan of Hodaviah who returned from Exile (Ezra 2:40). **7** A Levite, the father of Jozabad, one who helped inventory the valuables brought back by the returning exiles (Ezra 8:33). **8** An official of the district of Mizpah who helped rebuild the walls of postexilic Jerusalem (Neh. 3:19). **9** One who helped explain to the people the law read by Ezra (Neh. 8:7); he is probably the same Levite who returned from the Exile with Zerubbabel (Neh. 12:8), took part in the covenant renewal ceremonies (Neh. 9:4–5) and signed the covenant (Neh. 10:9). He is possibly also the same as the son of Kadmiel who was a levitical leader under the priest Joiakim (Neh. 12:24). **10** A name occurring once for Joshua the son of Nun (Neh. 8:17). **11** A town settled by Judahites following the Exile (Neh. 11:26). Its location is suggested by some as modern Tel es-Sawa, about nine miles east of Beersheba. ***See also*** Branch; Haggai; Joshua; Zechariah, The Book of; Zerubbabel.

Jeshurun (jesh´uh-ruhn), a poetic title in Hebrew for the people of Israel (Deut. 32:15; 33:5, 26), with the symbolic meaning of "upright one" (Isa. 44:2).

Jesse (jes´ee), the father of King David. According to the tradition of the book of Ruth (4:17–22; see also Matt. 1:5) Jesse was the grandson of Boaz and Ruth. He was a prosperous farmer who could afford to send gifts to Saul (1 Sam. 16:20). His social position is stressed in 1 Sam. 17:12, where the Hebrew indicates that he was "an old man . . . who came among men of standing." This reference suggests that, like comparable references to Akkadian noblemen, Jesse was a distinguished elder of the community.

Jesse is mentioned in the messianic prophecy of Isaiah (11:1,10), which refers to the house of David, and also in the genealogies of Jesus (Matt. 1:5–6; Luke 3:22). Y.G.

Jesus Christ

THE LIFE, DEATH, AND RESURRECTION of Jesus Christ, the central figure of the NT, represent for Christians God's saving act for sinful humanity. His name (Jesus) and his title (Christ) bear witness to that saving act. The name "Jesus" is derived from a Hebrew word that means "savior" (see Matt. 1:21), and the title "Christ" (Heb., "messiah") means "anointed" and refers to one commissioned by God for a special task. The attempt to write an account of Jesus' life and teachings has long commanded the attention of scholars. This attempt must take numerous items into account.

Jesus' face as depicted in a sixth-century mosaic at the Monastery of St. Catherine, Sinai.

Method: It is generally recognized today that the four NT Gospels were written "from faith for faith," that is, that they come from and are intended for the believing community. Christians with a high view of Scripture, therefore, will read them to see how the Christian communities behind the Gospels understood Jesus of Nazareth to be their Lord, so that they may nourish and correct their own views in the light of this understanding. It is also generally held that the earliest developments in the Jesus tradition are best understood by a patient analysis of the first three ("synoptic") Gospels, supplemented and occasionally corrected by data from the Gospel of John. NT theology as a whole, on the other hand, will have to include all four Gospels in their present form as well as the other writings of the NT. And a historical understanding of all early Christian movements can only be obtained by using not only our canonical books but all surviving early Christian literature as well as fragments of Hellenistic literary works, papyri, archaeological remains, etc.

The "synoptic" Gospels—Matthew, Mark, and Luke—are universally recognized as standing in a close literary relationship, the most commonly accepted view of which is that Matthew and Luke both composed their Gospels by reading earlier sources (Luke 1:1–4) that included our Gospel of Mark and another brief source, now lost, usually designated "Q." The study of each of these sources and the tradition behind them is important in its own right. But a genuinely historical picture of Jesus of Nazareth can only be obtained by a critical winnowing of all these materials and setting aside (not as an irrelevance but as a key aspect of early Christian theology) those materials that seem to have been shaped in the light of the experience of the early church. The following picture of the career of Jesus rests on such a critical winnowing.

The World at Jesus' Birth: The conquests of Alexander the Great (332–323 B.C.) had the effect of exposing almost the entire Mediterranean basin (as well as the region east of it to the borders of India) to some degree to Greek culture and, more importantly, to the Greek language. Thus, most educated people in the area read Greek, whatever their family tongue, and were at least partially familiar with Greek thought and customs. Jews shared in this general atmosphere. Their

Scriptures were available in Greek well before the time of Jesus, and hence the earliest documents of the Christian movement were composed in Greek. In addition, however, Jews also retained (to varying degrees, in various places) the use of Aramaic and (especially for the reading of the Scriptures) Hebrew. Jewish inhabitants of rural areas with a less cosmopolitan culture probably spoke almost entirely Aramaic and used Greek at most for limited, possibly commercial purposes. Latin, which became the official language of the Roman Empire shortly before Jesus' birth, was hardly known in many far-flung areas and almost certainly did not affect the places of Jesus' ministry. Greek (and, to a lesser degree, Roman) customs and religious practices were thus close by, even to those areas largely untouched by higher Greek culture.

This explains the fact that although Jesus and practically all of his earliest disciples almost certainly spoke Aramaic rather than Greek and the traditions about Jesus at first circulated in Aramaic, these traditions gradually and increasingly came to be known primarily in Greek forms. Hence, not only our surviving Gospels but, as far as we can tell, most of the traditions behind them are already in Greek. (Extant Aramaic versions of the NT are late retranslations from the Greek and thus of no significance for early Christian history.) Inevitably, therefore, both Semitic and Greek culture and habits of thought (which are not to be sharply distinguished in any case) influence the understanding and transmission of the ongoing Jesus tradition in the apostolic age (i.e., the period during which the apostles remained alive).

Jesus' Life Before His Public Ministry: Very little is known about Jesus' life before the time of John the Baptist. The birth stories of Matthew provide little chronological information, and themes of Matthean theology are so deeply interwoven with the introductory genealogy (1:1–17) and the various recorded incidents (the appearance to Joseph, 1:18–25; the Wise Men, 2:10–12; the flight to Egypt, 2:13–15; the slaughter of the innocents, 2:16–18; the return to Israel and domicile in Nazareth, 2:19–23) that it is not possible to separate out the historical from the theological data in the accounts.

The slaughter of the innocents—part of the account of Jesus' birth in Matthew—as portrayed by P. Brueghel (1525–1569).

The study of the Lucan birth stories is somewhat more rewarding. The birth of Jesus is implicitly correlated with the birth of John the Baptist (1:36, 41–42); several political figures we know are named (Herod, king of Judea, 1:5; Caesar Augustus, 2:1; Quirinius, governor of Syria, 2:2); and Caesar's enrollment is specifically said to be the "first," taken under Quirinius's rule in Syria (2:1). Yet these data are only broadly helpful. Herod's death (in 4 B.C.) probably occurred a year or two after Jesus' birth, although this is uncertain; and Augustus's reign (27 B.C.–A.D. 14) surely includes Jesus' birth in any case. But the only census for which we have clear evidence took place in Judea, not Galilee, in A.D. 6/7, which is too late for Jesus' birth, no matter how loosely one understands "about thirty" in Luke 3:23. The other elements of the birth stories (including especially the relations with John the Baptist and the five hymns in 1:32–35, 46–55, 68–79; 2:29–32, 34–35) may include old traditions (possibly from circles that revered John the Baptist), but they are more certainly related to the theology of the Evangelist than to early historical developments as such.

Rugged hillside in the vicinity of Nazareth.

Not much is known, in other words, of the circumstances of Jesus' birth and early life, though many theological themes from the birth stories (among them his virginal conception, his Davidic descent, and his mission as Savior of the world) are important elements in the NT Christology (i.e., the theological understanding of Jesus) as a whole.

The canonical Gospels contain no information about Jesus' youth except the story of Jesus in the Temple (Luke 2:41–52), which probably represents the desire to fill in the chronological gaps in the Jesus tradition, as the incidents in such noncanonical Gospels as the Greek/Latin *Infancy Gospel of Thomas* surely do.

It is probable that Jesus' family had some connection with Nazareth (Matt. 2:23; Luke 2:39) and quite certain that his ministry began in and was largely confined to Galilee (though it may also have included occasional visits to Jerusalem as well, as the Gospel of John suggests). While the Greek text of Mark 6:3 is uncertain—it could suggest either that Jesus was a woodworker or that Joseph was—there is no reason to doubt that Jesus was familiar with the crafts and economy of Galilean village life. Nothing can be known from our texts about his psychological development and little about his education, though it is clear that he knew and had reflected deeply on the Hebrew Scriptures. His unusually close association with women (not ordinarily characteristic of Jewish teachers) and favorable attitude toward them in his later life and teaching both point toward a normal home and social life during his formative years.

The Beginning of Jesus' Public Ministry: While an exact dating is not possible, Jesus probably began his public ministry during the early years of Pontius Pilate's prefecture (A.D. 26–36), i.e., about 27–28. This date finds a rough confirmation in Luke's dating of the beginnings of John the Baptist's activity "in the fifteenth year of the Emperor Tiberius" (Luke 3:1). The nature and extent of Jesus' relation to John is somewhat obscure, but it is virtually certain that at some point Jesus was baptized by John, probably as an indication of his desire to share in John's calling of the people of God to repentance (Matt. 3:2; Luke 3:3). In the Gospels, John the Baptist is understood as a forerunner, a pointer to Jesus, implicitly in Mark (1:7), explicitly in the other Gospels (Matt. 3:14; Luke 1:43–44; John 1:29–34). While Jesus' message is more complex than John's, they share the view that the people of God must "repent," that is, return from their erring ways to God.

Galilee, the region where Jesus' ministry began and was centered.

The Samaritan woman meeting Jesus at the well (John 4:1–42); sixth-century mosaic at San Apollinare in Classe, Ravenna, Italy.

It is important to note that Jesus' message was not intended to create a new religious movement; as a call to repentance, it was thoroughly in line with the prophetic tradition of Israel. Yet while the message was addressed to the Jewish nation as a whole by both John and Jesus, those individuals who heeded the call formed an "alternative community" within Judaism and no doubt continued to mix for some time with other Jews. Of John's disciples we know very little (e.g., Mark 2:28; Matt. 11:2), though groups appealing to him continue down to the Mandaeans of our own day.

Jesus' disciples, however, were called by him during his lifetime to share his teaching and healing ministry (see esp. Matt. 10). Varying lists (Matt. 10:24; Mark 3:16–19; Luke 6:14–16; Acts 1:13) suggest that twelve of them may have been selected to represent the twelve tribes of Israel, a renewed People of God (Luke 22:30; Matt. 19:28). This, rather than some theory about male leadership, is almost certainly the reason only men were chosen. Jesus, unlike the rabbis, had women disciples, and, as Romans 16 and other texts show, women exercised leadership in many early Christian congregations.

Jesus' Teaching: Although a very close connection exists between Jesus' teaching and his actions, especially the miracles and his fellowship with the poor and the rejected, it is convenient to analyze them separately.

The Kingdom of God: The central emphasis of Jesus' teaching is the kingdom (or reign) of God (see esp. Mark 1:14–15; Matt. 4:2; Luke 4:43). Although this symbol has enormous implications for human life and conduct, its central concern lies elsewhere, namely, in God. It

evokes all that is implied in the divine activity, e.g., God's action for the deliverance of the people of God, the righting of wrongs, and the establishment of a reign of justice and peace. It includes, like the message of John the Baptist (see esp. Luke 3:7–9; Matt. 3:7–10), a note of judgment (see, e.g., Matt. 5:22, 30; 7:2, 13–14; 10:15, 28; 11:20–24; 16:27), but it emphasizes, far more than John seems to have done, the divine purpose to save.

It is striking that Jesus' teaching about the end of human history (his eschatology) includes three elements that are not easily harmonized and that yet must be kept together if his teaching is not to be distorted: the futurity of the kingdom, the presence of the kingdom, and a close connection between the coming of the kingdom and Jesus' own ministry. (The kingdom itself is never defined.)

The futurity of the kingdom is expressed in many ways. Jesus' teaching as a whole is summarized by Mark (1:15, NRSV) in these words: "The time is fulfilled, and the kingdom of God has drawn near; repent, and believe in the gospel." It is important to note that the kingdom is neither simply a present experience nor a distant hope (time's fulfillment is not its end), nor is its temporal nearness (or distance) emphasized. The same must be said of Mark 13:28–29, where similar language is used. Neither text, to be sure, represents a verbatim account of the teaching of Jesus. Yet the future coming of the hoped-for kingdom is attested in many ways in Jesus' teaching. In the Lord's Prayer, the disciples pray for the kingdom to come (Matt. 6:10; Luke 11:2). Jesus speaks of the "coming" of the day of judgment with a variety of symbols (see, e.g., Mark 13:2; Matt. 10:14–15; Luke 10:10–12; Matt. 11:20–24; Luke 10:13–15). In these texts, it is presumed to be future (see also Matt. 7:1–2; Luke 6:37–38; Matt. 7:13–14; Luke 13:23–24; Matt. 12:36, 41–42; Luke 11:31–32). The words at the Last Supper (Mark 14:25) surely represent very ancient tradition; there is little reason to doubt that Jesus spoke of a future day when fellowship with the disciples would be restored.

In addition, the theme of future judgment is inherent in many of Jesus' most significant parables; see, for example, the adversary (Matt. 5:25–26; Luke 12:57–59), the two houses (Matt. 7:24–27; Luke 6:47–49), the seed growing secretly (Mark 4:26–29), the laborers in the vineyard (Matt. 20:1–16), the friend at midnight (Luke 11:5–8), the rich fool (Luke 12:16–21), the rich man and Lazarus (Luke 16:19–31), and the importunate widow (Luke 18:1–6). While it may be the case that all or parts of some of these parables were created in the light of conditions in the early church (and such judgments can never achieve certainty), methodologically, it cannot be too strongly emphasized that such "inauthentic" materials often represent some degree of continuity with the teaching and situation of Jesus. For example, the "cherry tree" incident of early American history is certainly "inauthentic." Yet it is historically significant that it is told of George Washington, a man of utmost integrity, not of some other president in American history.

On these grounds, such "inauthentic" parables as the thief in the night (Matt. 24:43–44; Luke 12:39–40), the faithful or unfaithful servant (Matt. 24:45–51; Luke 12:42–48), and the wicked tenants (Mark 12:1–12) also represent developments of a theme clearly rooted in Jesus' own teaching. The same may be said of the large number of texts

that speak of the coming in judgment of the "Son of man," a technical term that probably arose in early Christian apocalyptic thought (Mark 8:38; cf. Luke 9:26; 12:8–9 with Matt. 10:32–33; Luke 17:24, 26, 30; Matt. 24:27; Luke 17:24; Matt. 19:28; Luke 22:30).

It is thus clear that Jesus' call for repentance (i.e., conversion, namely, a change of heart, mind, and direction) is based on warnings of a judgment to come, though its *imminence* is more explicit in early Christian thought than in many sayings with a high claim to authenticity.

What is unusual about Jesus' teaching is that the thoroughly Jewish motif of repentance based on the threat of judgment is inextricably connected with another theme much less well attested in Jewish writings of the period (though there are hints of it at Qumran), namely, the insistence that the coming judgment has in some way already begun. The most explicit statement of this view is the saying in Luke 11:20 (and Matt. 12:28): "But if [i.e., because] it is by the finger [Matthew: "Spirit"] of God I cast out demons, then the kingdom of God has come upon you." But many sayings and parables reflect the same conviction. The strong man (Mark 3:27), the wedding guests (Mark 2:19), and the so-called parables of growth—which do not really stress growth so much as beginning and harvest (see the sower, Mark 4:3–8; the seed growing secretly, Mark 4:26–29; and the mustard seed and the leaven, Matt. 13:31–33 and parallels)—all indicate that the promised time of the end has begun. Several sayings point in the same direction: e.g., Luke 10:23–24 (Matt. 13:16–17); Luke 11:31–32 (Matt. 12:41–42); Matt. 11:12–13 (Luke 16:16); and the very difficult comment in Luke 17:20, which must mean "the kingdom of God is in your midst," i.e., in the presence of Jesus. This latter motif is important (see below); here, it can only be noted that it lies as a presupposition behind Jesus' answer to John's disciples in Matt. 11:2–6 (Luke 7:22–23).

In other words, side by side with an insistence on an imminent judgment, in the light of which repentance is required, lies a "note of fulfillment" explaining the significance of Jesus' ministry in God's plan of salvation.

Many of the texts cited, as well as others, point toward a resolution of this difficult "already/not-yet" paradox: the future kingdom is beginning to be present, not simply in world history as a whole, but in the ministry of Jesus; its "presence" is Christologically defined. This is particularly clear in the "finger of God" statement (Luke 11:20; "Spirit

"And he went about all Galilee, teaching in their synagogues" (Matt. 4:23). *Below:* Aramaic inscription in the floor mosaic of the late third- to early fourth-century synagogue at Hammath-Tiberias. It reads, in part, "Peace be upon everyone who has fulfilled the commandment in this holy place."

of God," Matt. 12:28), in which, to be sure, the "I" is unemphatic but still a pointer to the locus of God's eschatological activity: God's victory over the power of the Evil One (so also Mark 3:23–27) is evidence of the kingdom's presence in Jesus' ministry. Since exorcisms are clearly an integral part of Jesus' activity, this motif can hardly be overemphasized.

Since the judgment, then, is not simply a far-off event but a reality beginning already in the present, the response to Jesus' message is one of eternal importance: see Luke 12:8–9 and parallels and Matt. 7:24–27 (Luke 6:47–49). Jesus understands both his words and his works as decisive, as "God's last word to humanity."

It should also be noted, however, that while Jesus' teaching is characterized by an urgent call to repentance, not every element of his teaching must be forced into this same framework. Some of the "wisdom" elements in his proclamation prevent us from seeing too radical a discontinuity between the world as it has been and the world as it is beginning to be. If Jesus challenges his hearers to "leave the dead to bury their own dead" (Luke 9:60; Matt. 8:22, a radical break with traditional obligations) and notes that no one who puts his hand to the plow and then looks back is fit for the kingdom of God (Luke 9:62), he also uses parables and proverbs that, like the wisdom material of the OT, presume continuing structures in the ethical basis of the universe.

This motif may be seen in ethical demands such as the so-called Golden Rule (Luke 6:31; Matt. 7:12) and turning the other cheek (Luke 6:29; Matt. 5:39), and in various generalizations about life or nature (see Luke 6:40, 45; 10:7; 12:34; 16:13; 17:37 with the parallels in Matthew). It is also presumed in little parables such as the speck and the log (KJV: the mote and the beam, Luke 6:41; Matt. 7:3), the lamp and the bushel (Luke 11:33; Matt. 5:15), the measure (Luke 6:38; Matt. 7:2), the tree and its fruit (Luke 6:44; Matt. 12:33), and such metaphors as the fish and the serpent (Luke 11:11; Matt. 7:9–10) and treasures on earth (Luke 12:33; Matt. 6:19).

Sometimes, to be sure, these wisdom sayings can be fitted easily into the context of eschatological urgency (see, e.g., Luke 9:60 and Matt. 8:22; or the weather proverb behind Matt. 16:2–3 and Luke 12:54–55) that lies behind Jesus' teaching as a whole. But the God who is coming in judgment in Jesus' ministry is not different from the God who created the world and called a people into being, so the demands of the new world, though often different in form, are similar to those of the world that is passing away.

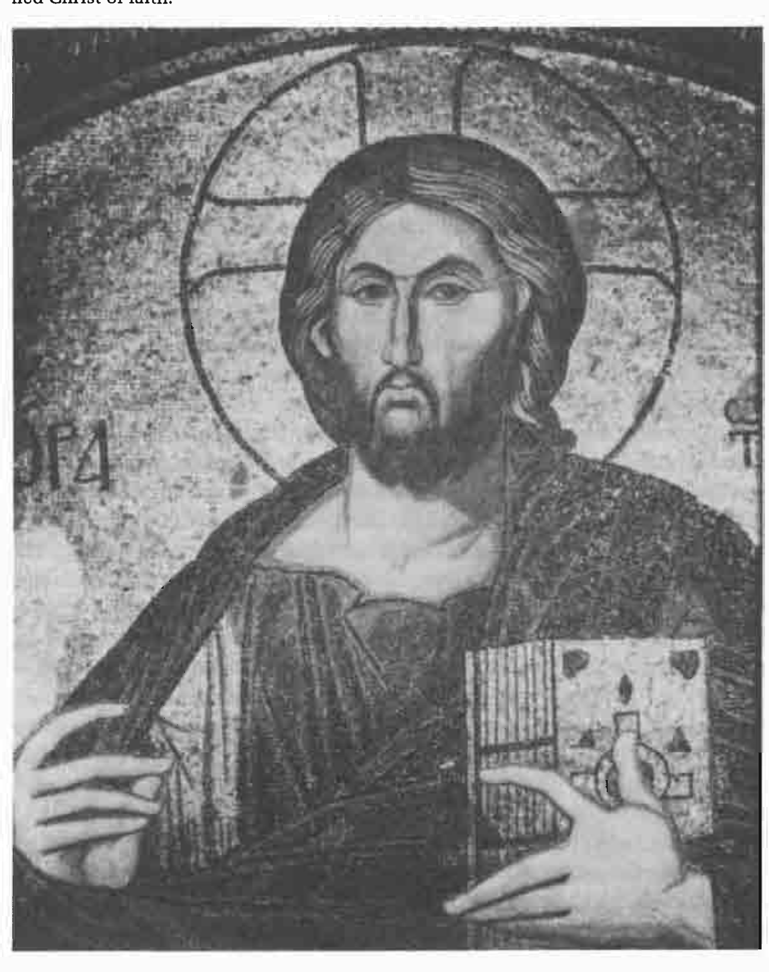
Jesus' Ethics: We turn, then, to Jesus' ethics. Three factors are of special importance: repentance as the basis of the ethical life, the radical nature of God's ethical demand, and the centrality of the love commandment. All are related.

Jesus' call to repentance, like that of the OT prophets, presupposes an immense distance between God's will for the people and their daily lives (see Isa. 6:10; 45:22; 55:7; Jer. 3:12–14, 22; 4:1; 8:5; 15:19; 18:8–11; 35:15; 36:3, 7; Ezek. 14:6; 18:30; 33:11; Hos 6:1; 14:1). What is required, therefore, is not so much the correction of a number of individual sins as a fundamental change, a redirection of life, a change of mind and heart (Gk. *metanoia;* cf. Heb. *shub,* "to turn, return"—the Heb. noun *teshubah* is first used for "repentance" in postbiblical Ju-

daism, in the Dead Sea Scrolls and in prayers). Unlike the prophets, Jesus seems to have little interest in the worship practices of Israel or in the keeping of the law as evidence of one's seriousness about God's will. It is thus possible for Jesus, as it is not for his rabbinic contemporaries, for the law or sincere religious activity to become a barrier to God; see, e.g., the elder brother in Luke 15:11–32. Repentance, whatever else it may involve, implies primarily a turning to God. Jesus' ethics are theologically based; they are not autonomous (i.e., derived from the needs of human individuals or society).

This does not mean that Jesus' ethics are new or even, in most cases, different. One who would do the will of God is still called upon to be humble, merciful, compassionate, selfless, honest, and pure, to avoid strife and violence, to serve the poor and outcast, and to go beyond the merely external demands of the law (see Mark 4:19; 6:34; 8:2; 10:23, 43–44; Matt. 5:3–9, 21–47; 6:12, 24; 7:1–5; 10:16; 12:35; 18:21–22; Luke 6:24–26; 12:13–21; 14:11; 18:9–14; 19:8). Further, the wisdom elements in Jesus' teaching, which cannot be eliminated, show that most people of good will, especially among the covenant people, are capable of both knowing and doing what is good. From time to time, Jesus even accepts without challenge the notion that God rewards the good and punishes the wicked (see Mark 10:29–30; Matt. 6:1–6, 16–18, 19–21; 10:40–42).

What is different in the ethical teaching of Jesus is the central place occupied by God, who not only will come in judgment (so also the prophets and apocalyptists) but also is beginning already, in the ministry of Jesus, to establish the kingdom, in which good and evil are to be separated, so that the concept of "reward" is rendered trivial. Both the twofold (already/not-yet) nature of Jesus' eschatology and its Christological conditioning are critical for Jesus' ethics.



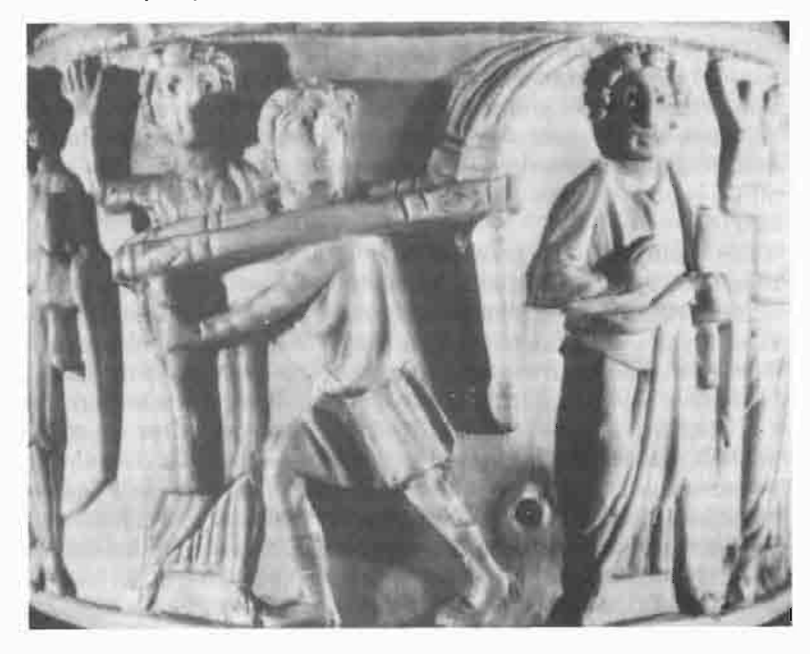
Thus, alongside the more or less traditional portrait of the will of God lies another, more absolute strain: God wills not approximate but radical obedience. What is demanded is not one's best, but everything. A man does not build a tower unless he is sure he has enough money to finish it (Luke 14:28–30); a king does not go to war unless he is certain of victory and willing to pay the price (Luke 14:31–32). The so-called Antitheses of the Sermon on the Mount ("You have heard that it was said . . . but I say to you . . . " (Matt. 5:21–47), the command to the rich man to sell all (Mark 10:21), the gentle judgment on the elder brother (Luke 15:31–32), and the paradoxical command to take up the cross (i.e., to die in order to live, Mark 8:34–35) all point in the same direction: God is concerned not for what is practicable, but for what is right. Jesus' God always calls to perfection, not merely to improvement. At the same time, to make of this demand, or any aspect of it, a law (as the Russian novelist Leo Tolstoy did, e.g., with the call to nonviolence) is to accept and attempt to live by precisely what Jesus rejected: a legalistic understanding of the will of God.

Such a legalistic understanding is invalid, for the overarching context of the will of God is the love commandment (Mark 12:28–31). This is not new. Love of God and neighbor are ancient biblical requirements (see Deut. 6:5; Lev. 19:18). Even love of enemies (Matt. 5:44; Luke 6:27), though rejected at Qumran and unknown in Judaism until more than a century after Jesus' death, is not incompatible with

a high spiritual legalism. What is new in Jesus' teaching is that the love commandment is not merely a way of adjudicating conflicting requirements of the law (as, e.g., the obligation both to provide for one's parents and to keep one's oath—Jesus' judgment in Mark 7:9–13 is the same as that given by most rabbis), but a way of transcending even such solemn obligations as familial responsibilities (Mark 3:35; Luke 14:26; Matt. 10:37) and keeping the Sabbath (Mark 2:23–29; 3:1–5; Luke 13:10–17). Love will always express itself in concrete actions for the neighbor's good, but no action can exhaust the love commandment.

It should be emphasized that affection as such is not implied (this is a modern misunderstanding), and neither are such matters as one's own or one's neighbor's dignity. The God who sends rain indifferently upon the just and the unjust (Matt. 5:45) can be relied upon to be concerned for the concrete good of the whole creation. What God loves, Jesus' disciple too must love. It is thus apparent that the disciple of

Christ as Pantocrator: a fourteenth-century mosaic in the Kariye Church, Istanbul, attempts to represent the resurrected and glorified Christ of faith.



Jesus can never substitute ethics for God, on the one hand, or define belief or trust in God apart from action, on the other. The God who wants not simply one's effort but one's *self* is genuinely loved and trusted only by those who, in Matthew's words, acknowledge Jesus as Lord by doing "the will of my Father who is in heaven" (7:21).

How Jesus Taught: Finally, it should be noted that although the above summary is stated propositionally by necessity, Jesus' public proclamation must not be reduced to "teaching" in the didactic sense. His use of metaphor and parable is so extensive—more than one-third of his words are in parabolic form—that it is evidently impossible to separate the form from the content of these words. Simple metaphors and similes such as "that fox" Herod (Luke 13:32) or "Be wise as serpents and innocent as doves" (Matt. 10:16) as well as colorful gnomic (i.e., proverbial) sayings ("Where the body [carcass] is, there the vultures will be gathered together," Luke 17:37; Matt. 24:18) abound; they serve to sharpen, to illuminate what is said, to direct it not only to the hearers' minds but in some way to their wills and affections as well. This is even more evident in the parables.

It is customary to categorize Jesus' parables in three groups: similitudes, parables proper, and exemplary stories. A similitude is general and tends to have a few verbs in the present tense (see, e.g., the scribe trained for the kingdom, Matt. 13:52; or the unclean spirit seeking rest, Matt. 12:43–45 and Luke 11:24–26). A parable, on the other hand, may involve quite an extensive narrative and speaks of a particular occurrence, with verbs in the past tense (see the sower, Mark 4:2–8; the two sons, Matt. 21:28–32; and the importunate widow, Luke 18:2–8). A few Lucan stories (e.g., the good Samaritan, 10:29–37; and the rich man and Lazarus, 16:19) are classified as exemplary stories because they

The healed paralytic walks away with his bed (cf. Matt. 9:2–8); seventh-century ivory.

seem to include no metaphorical elements but rather serve merely as illustrations of a certain kind of conduct. This latter classification is an unfortunate one, however, especially in the case of the good Samaritan, where the use of "Samaritan" involves an unexpected category shift (from a normally despised heretic to the hero of the parable) and thus provides a stimulus to the hearer's normal thought world.

It is not easy to spell out exactly how such parables function. Clearly, as both metaphor and narrative, they appeal to something innate in the human psyche that involves the hearer more profoundly than either statements or imperatives do. This appeal depends on an emotional and aesthetic stimulus, possibly to confront (so, e.g., the two sons), perhaps to amuse (so the speck and the log, Matt. 7:4–5), to provoke thought (the dishonest steward, Luke 16:1–9), to encourage (the sower, Mark 4:1–20), to challenge (the hidden treasure, Matt. 13:44), and so on. So while the kingdom is itself an extra-linguistic reality, parables serve to make it available, to call disciples into it, to illuminate its demands and rewards, rather than to define or illustrate it. Like the call to repentance, Jesus' use of parable and metaphor portrays the human problem and divine grace as far more than merely intellectual. And, again like the call to repentance and its eschatological warrants, it combines the threat of judgment and the promise of grace in a single call, opening the hearer to God by telling stories about the ordinary world, where the divine lordship is to be acknowledged.

Jesus' Actions: Jesus is portrayed in the Gospels not only as teacher but also as friend of sinners and miracle worker. His association with the poor and outcast, with tax collectors and sinners (Mark 2:15–17; Matt. 9:9; Luke 1:53; 4:18; 7:36–50; 14:12–14; 15:1–32; 18:10–14; 19:1–10) is a central aspect of his ministry. Such people, not the righteous, are the special objects of God's love and care. The kingdom is thus directly related to Jesus' choice of friends and table companions; the widely acknowledged boundaries between insiders and outsiders, between the righteous and the wicked, are consequently broken down.

The proclamation of the kingdom and Jesus' choice of table companions are also inextricably related to the miracles, which are usually categorized in three groups: exorcism, healings, and nature miracles. All three reflect current first-century conceptions, and all three are told (with some important exceptions) in the same stock ways as the miracles performed by other, especially Hellenistic, healers in the period.

Jesus entering Jerusalem (the traditional "Palm Sunday"); enamel panel from the Pala d'Oro, twelfth century.

In a healing miracle, for example, it is customary to describe the illness, often with vivid details (its extreme consequences, the failure of other healers); then to portray the healing itself (usually out of public view, involving the use of words or even names, gestures, instruments, and so on); and finally to offer some concrete evidence of the healing (activity of the person healed, awe and wonder of the onlookers; see, e.g., Mark 5:1–20, 21–43). An early emphasis on exorcisms, especially in Mark, gradually is broadened to include—as indeed it does already in the earliest traditions—illnesses of many kinds as well (so esp. Matt.; see, e.g., 8:16). It must be noted that in critical ways Jesus' miracles are portrayed differently from those of his surrounding culture: he rarely makes use of instruments (but see Mark 7:33; 8:23); he heals with a touch (Mark 1:31; 3:10) or a mere word (Mark 1:25; 2:11; 3:5;

The Last Supper (Matt. 26:20–29, Mark 14:17–25, Luke 22:14–38) from the twelfth-century *Four Gospels* illuminated manuscript.

5:13; 7:29; 10:52; cf. 5:41; 9:25–28; and the parallels in Matthew and Luke). He never uses foreign languages (Mark 5:41 and 7:34 are "foreign" only to Greek readers, since Aramaic was Jesus' mother tongue) or magical formulas, charms, drugs, or techniques. In many cases, though by no means all, faith is presupposed or required (see Matt. 8:10; Luke 7:9; Mark 2:5; 5:36; 9:23; 10:52; cf. 4:40; and esp. 5:34, which Matt. 9:22 rearranges to show that faith comes before healing). And the miracles are done for someone's concrete benefit, not for display. Quite evidently, the early testimony (no doubt in full accord with Jesus' own practice) wishes to reflect two not easily compatible things: Jesus is fully capable of performing mighty acts by the power of God, but, unlike contemporary miracle workers, he has no connection with demonic (see Mark 3:22–27) or magical forces.

The same emphasis can be seen in the nature miracles. On the one hand, Jesus is master of the elements (Mark 4:35–51; 6:45–52). On the other, his miracles benefit others rather than enhance his own reputation (Mark 11:12–14, 20–22, but note v. 22). They are (esp. in Matt.; see 9:35–38) tokens of his compassion. When confronted with the demand to work miracles as a sign (Mark 8:11–13) or for selfish or frivolous reasons (Matt. 4:1–7), he refuses. God is to be worshiped, not used.

It is fully compatible with these motifs that some miracles are wrought, so to speak, *on* rather than *by* Jesus: his baptism (Mark

The Crucifixion, by Hubert and Jan Van Eyck, early fifteenth century.

1:9–13), the transfiguration (Mark 9:2–9), and, most significant of all, his resurrection. From the very beginnings of his public ministry (in Matthew and Luke, from birth) the Son of God is accompanied by the power of God.

It is thus of no great importance that many of the honorific titles for Jesus such as "Messiah (Christ)," "Son of God," "Son of man," "Lord," and the like probably arose in early Palestinian Christianity rather than during the ministry of Jesus. To be sure, they reflect to a considerable degree a concentration on the person of Jesus that goes beyond Jesus' own understanding. But they make explicit what is clearly implicit in Jesus' claim to be God's final messenger, to offer in his own person and teaching (see esp. Luke 12:8–9 and parallels) exclusive access to God's saving reign. During Jesus' lifetime some were persuaded of the truth of his claims and, as followers, began to collect and to spread through Galilee and elsewhere what he had said and done, a process that was continued and—after his death—greatly elaborated in their understanding and experience of his renewed presence among them. That the Proclaimer became the Proclaimed is thus at once a continuation and a transformation of the very heart of Jesus' message: God is active in history for the salvation of the people of God.

Jesus' Final Days: It was perhaps inevitable that although the significance of Jesus' person and teaching was accepted by some, it was also rejected or ignored by many, and misunderstood by the most powerful political authorities in his region, the Romans. The precise details of Jesus' final days or of the political processes that led to his crucifixion are no longer recoverable. But two groups in particular—his Jewish coreligionists and the occupying Romans—had different reasons for failing to sympathize with him. On Jewish grounds, his teaching represented a break with current understandings of holiness under the law, and the "messianic" elements, though hardly punishable (Jews did not persecute their errant religious teachers), were clearly dangerous in first-century Palestine. Since the Jewish leaders' own relationships with the Roman officials were always uneasy at best, there was no particular reason for them to defend Jesus' cause when the political authorities, no doubt misunderstanding his teaching about the kingdom and mistrusting his popularity among an overtaxed and restless peasantry, decided that Jesus should be put to death. Pontius Pilate, the Roman prefect (procurator), showed no inclination whatsoever to take any personal risks in defending Jesus' innocence. So on a Passover pilgrimage to Jerusalem sometime in his mid-thirties, quite possibly on the evening of 14 Nisan (Thursday, April 6), 30, Jesus was arrested. After a brief examination by both Jewish (Mark 14:53–65) and Roman (Mark 15:1–15) authorities, he was taken to Golgotha, outside the city of Jerusalem, and put to death in the presence of other criminals.

So ends the life of Jesus of Nazareth. But both our earliest traditions (1 Cor. 15:3–7, which reflects beliefs no more than a few years after the crucifixion) and all the canonical Gospels (Matt. 28; Mark 16; Luke 24; John 20–21) agree not only that Jesus was raised from the dead but that he was believed by many of his followers to have been raised. The difficulty of the details (a solid body, Luke 24:36–43, with real wounds, John 20:24–29, that can pass through walls, John 20:19; recognizabil-

ity, Matt. 28:9 and Luke 24:36–38, combined with unrecognizability, Luke 24:16 and John 20:14) shows that the resurrection is no easily demonstrable phenomenon. Yet faith and trust in Jesus and his message, properly understood and obeyed, opened a new and living way to God. The resurrection was, for the earliest Christians, no mere natural wonder; it was God's great act for the redemption of the world. The gospel of the Crucified One was "God's power for salvation to everyone who believes" (Rom. 1:16). And thus the Jesus of history is seen, by the eyes of disciples in every age, to be the Christ of faith.

C.E.C.

Jether (jee´thuhr; also translated "Ithra"). **1** The father of Amasa (1 Kings 2:5, 32; 1 Chron. 2:17; he is called "Ithra" in 2 Sam. 17:25). **2** The son of Jeder: he died childless (1 Chron. 2:32). **3** One of the four sons of Ezrah (1 Chron. 4:17). **4** A member of the tribe of Asher, and the father of Jephunneh, Pispa, and Ara (1 Chron. 7:38). ***See also*** Ithra.

Jethro (jeth´roh), Moses' father-in-law, "the priest of Midian" (Exod. 3:1). The Hebrew form is *ytrw* in the Masoretic Text (except for Exod. 4:18, *ytr,* Jether) and in the Samaritan Pentateuch; the Septuagint has *Iothor* throughout. Jether occurs elsewhere for the father of Amasa and for sons of Gideon, Jada, Ezrah, and Zophah; related names include Jattir, Jithrite (Ithrite), Jithran (Ithran), and Jithream (Ithream). Jethro, however, is reserved for Moses' Midianite father-in-law. He cared for Moses' wife and sons during the Exodus; afterwards, he suggested a more effective structure for Moses' governance of the people (Exod. 18). His relationships with Reuel (Exod. 2:18) and with Hobab (Num. 10:29; Judg. 4:11) are unclear. If Reuel were Jethro's father and Zipporah's *grand*father, Hobab could either be Reuel's son, Jethro's (half-)brother, and Zipporah's uncle, or Reuel's grandson, Zipporah's (half-) brother, and Jethro's son or nephew. Less likely is the suggestion that Reuel is the clan name of both Jethro and Hobab. K.G.O.

Jeush (jee´ush; Heb., "he will come to help"). **1** The son of Esau and Oholibama; he was a chief of the Edomites (Gen. 36:5; 1 Chron. 1:35). **2** The son of Bilhan; he was a descendant of Benjamin (1 Chron. 7:10). **3** A Benjaminite, son of Eshek and descendant of Saul (1 Chron. 8:39). **4** A son of Shemei, of the Gershonite clan of Levites (1 Chron. 23:10–11). **5** The son of King Rehoboam and David's granddaughter Mahalath (2 Chron. 11:19).

jewelry, body ornaments, usually made of metal and/or precious stones. As with other generic terms (like "tools"), biblical usage tends to favor specific designations of jewel material or artifacts over use of the general word. References to the general term include both figurative ("lips of knowledge are a precious jewel" in parallel with "costly stones" [Prov. 20:15]; the "imperishable jewel of a gentle and quiet spirit" [1 Pet. 3:4]; wisdom is "more precious than jewels" [Prov. 3:15] or "better than jewels" [8:11]; a good wife is "far more precious than jewels" [Prov. 31:10]; and the erotic comparison of the beloved's "rounded thighs" as "like jewels, the work of a master hand" [Song of Sol. 7:1]) and literal applications.

Items of jewelry specifically mentioned include the necklace (Song of Sol. 4:9), ring (Hos. 2:13), strings of jewels (Song of Sol. 1:10), and gold and pearls (Rev. 17:4; 18:16). Specific materials from which jewelry was made include silver and gold (Gen. 24:53), including fine gold (Job 28:17).

Certain passages are especially helpful in identifying particular types of jewelry characteristic of the biblical period. One of these is Exod. 35:22, which describes gifts brought for the equipping of the shrine. Included here are brooches, earrings, signet rings, and armlets. In addition, Num. 31:50 mentions bracelets and beads. In Ezekiel's description of the exquisitely garbed woman (metaphoric of Jerusalem) are included bracelets on the arms, a chain on the neck, a ring in the nose, earrings, and a crown on the head (16:11–12). Ezekiel also describes some of the stones found on royal garb, properly considered jewel material (28:13): "carnelian, topaz, and jasper, chrysolite, beryl, and onyx, sapphire [probably lapis lazuli], carbuncle, and emerald" in addition to gold settings. While it described his sense of the royal garb of the king of Tyre, the similarities to the stones used as jewels in the garb of the high priest are striking. In Exod. 28:17–21 for the breastpiece are specified sardius, topaz, and carbuncle (first row); emerald, sapphire, and diamond (probably jasper; second row); jacinth, agate, and amethyst (third row); and beryl, onyx, and jasper (fourth row); all set in gold filigree. The difficulties in identifying the ancient names with accurate modern equivalents are considerable, leading some to suggest that what the translations reflect are the stones precious to the translators. There is some of the same uncertainty about additional items considered precious in Job 28:12–19: glass, coral, and crystal as well as gold from Ophir and topaz of Ethiopia. In this passage wisdom is judged to be more valuable than all these things—it can't be bought with them or its source discovered. Eschatological visions include precious metals and stones embellishing the holy city of Jerusalem (Isa. 54:12; Rev. 21:19–21) and often involve highly imaginative speculations (a city gate of a single pearl, Rev. 21:21).

Gold jewelry found at Tell el-'Ajjul dates to the second millennium B.C.

Archaeological investigations have recovered samples of all forms of personal jewelry mentioned from a variety of periods in Near East history. Furthermore they are amply represented in the art of Egypt, Mesopotamia, Persia, Greece, and Rome, giving further evidence that they were commonly used throughout the biblical period. On the other hand, the finds pertaining to Israelite history are remarkably restrained, but include finger rings; seals and scarabs; bracelets of copper, bronze, silver, and gold; bracelets and necklaces of drilled beads in a dozen shapes; earrings of single and multiple pendant designs; inscribed and carved brooches; multilayered necklaces; leg bracelets and carved plaques; decorative pins of bone or ivory; amulets rigged for pendant use; and shell and carved bone pendants. But the level of craftsmanship, intricacy of designs, and volume of precious materials involved suggest modest economic means rather than extravagant wealth. Lavish decorative hoards are rare and are usually associated with royalty, as with the Royal Cemetery materials from Ur and pharaonic burials like that of Tutankhamen in Egypt, or with the belongings of wealthy nobles such as occur in Greek and Roman period finds.

A glimpse of the jeweler's craft is given in Exod. 28:9–11 where the names of the Israelite tribal ancestors are to be inscribed on two onyx stones. "As a jeweler engraves signets" describes one of the most distinctive Near East achievements: inscribing stones as stamp or cylinder seal signature devices. The practice of using a small stone cylinder, drilled through the long axis to allow suspension on a cord from one's arm or neck, was first developed into fine art in Mesopotamia. From the older, simpler models, the art developed some of the most exquisite miniature representations of figures, animals, trees, and action scenes (from hunting to votive offerings) ever crafted. Their small size and durability have allowed their survival in archaeological debris to a remarkable extent, and the collections of such items in museums such as the Archaeological Museum in Istanbul, the Yale Babylonian Collection, and the University of Pennsylvania Museum are outstanding. They were used extensively by the Romans as well and, together with stamp seals and seal-bearing rings, provide helpful insights into trends in art, religion, and even commerce (stamped handles on wine jars shipped from Rhodes are a late commercial adaptation of an earlier practice of rolling a seal over the soft clay envelope of an inscribed tablet). R.S.B.

A gold bracelet inset with glass, pearls, and semiprecious stones, from the first century B.C.

Jews (jooz), a national-ethnic and, subsequently, religious designation for the people of the Judean state or province and their Diaspora. The title became common only after the Babylonian exile (586 B.C.). In the NT it is frequently used to distinguish the descendants of Israel from proselytes, Samaritans, and Gentiles.

Jezebel (jez´uh-bel; Heb., "Where is the Prince?"). **1** A Phoenician princess (daughter of Ethbaal, king of Sidon), who married King Ahab of Israel and incited him to sin (1 Kings 16:31; 21:25). A devotee of the Phoenician god Baal and a zealous missionary, she supported some 850 prophets of Baal and Asherah (1 Kings 18:19) and sought to suppress worship of Yahweh (1 Kings 18:4, 13). Thus she became the formidable adversary of the prophet Elijah, able to instill fear even in him (1 Kings 19:1–3). Her influence in Israel was strong during the reigns of her husband Ahab and her two sons Ahaziah and Jehoram and extended to the southern kingdom of Judah, where her daughter Athaliah became queen (2 Kings 8:18). The story of the appropriation of Naboth's vineyard (1 Kings 21) illustrates Jezebel's disregard for Israelite custom and ruthless use of royal power. Elijah's prophecy, "The dogs shall eat Jezebel within the bounds of Jezreel" (1 Kings 21:23), was fulfilled when Jehu seized power (2 Kings 9–10; cf. Hosea's later prophecy regarding the bloodshed at Jezreel, 1:4). Jezebel met her death with characteristic audacity: she painted her eyes, adorned her head, and greeted Jehu from her window with a caustic insult (2 Kings 9:30–31). Jezebel was pushed out the window at Jehu's command, and when they later went to bury her, only her skull, feet, and palms remained. **2** In Rev. 2:20 the name applied to a false prophet. ***See also*** Ahab; Asherah; Baal; Elijah; Jehu. J.C.E.

Jezreel (jez´ree-uhl; Heb., "God sows"). **1** A town on the southern border of Issachar, commanding the Valley of Jezreel, identified with modern Zer'in at the foot of Mt. Gilboa. Here the Israelites encamped before battling the Philistines (1 Sam. 29), and this was one of the towns over which Ishbosheth, son of Saul, briefly reigned (2 Sam. 2:9). Ahab had a royal residence here (1 Kings 18:45, 46), and Naboth's vineyard which Jezebel plotted to obtain was beside the palace (1 Kings 21). At

The fertile valley of Jezreel. A modern highway marks the route of the Via Maris, which connected Egypt and Syro-Palestine.

Jezreel Jezebel met her bloody death (2 Kings 9:30–37), as did the remainder of the house of Ahab (2 Kings 10:1–11). **2** The Valley of Jezreel, the eastern section of the broad valley separating Galilee from Samaria. From the pass between the Hill of Moreh and Mt. Gilboa, where the town of Jezreel was located, the valley descends eastward along the Jalud River to the Jordan, with Beth-shan commanding its eastern entrance. The broader plain to the west, known as Esdraelon, is included as a part of the Valley of Jezreel by some scholars.

The Valley of Jezreel, in addition to providing a fertile growing area, provided one of the few ways of access to the Jordan Valley and the east. Traders and armies from Egypt and the Palestinian coast as well as invaders from the east used this pass from earliest times. From Beth-shan and the Jordan a road passed through the Yarmuk Valley to Damascus to the north and east.

The Canaanites controlled the valley with chariots of iron when the Israelites entered the land (Josh. 17:16) and here Gideon met the Midianites and Amalekites in battle (Judg. 6:33–7:23). According to Hosea (1:5) it was in this valley that the battle would take place which would bring an end to the kingdom of Israel. **3** A town of Judah, location unknown, but probably southwest of Hebron in the vicinity of Ziph and Juttah (Josh. 15:56). A wife of David, Ahinoam, was from there. **4** The son of Etam, a descendant of Judah (1 Chron. 4:3). **5** The first son of Hosea (1:4), named symbolically for the acts that were to befall Israel because of the blood shed by Jehu at Jezreel. ***See also*** Beth-shan; Esdraelon; Gilboa. N.L.L.

Joab (joh´ab). **1** A Kenizzite, the son of Seraiah, and ancestor of a group of craftsmen called Geharashim (1 Chron. 4:14). **2** The second and most prominent of the three sons of David's sister Zeruiah (1 Chron. 2:16). Joab was the commander of David's army during much of his reign (2 Sam. 8:16; 20:23; 1 Chron. 18:15). He seems already to have held this position at the time of the struggle for power between David and Saul's son Ishbaal (cf. 2 Sam. 2:13), but according to 1 Chron. 11:6 he was awarded his command in consequence of his valor and leadership during David's conquest of Jerusalem. He led the army to its first victory in the war against the Ammonite-Aramean coalition (2 Sam. 10:7–14), and he was in charge of the subsequent siege of Rabbath-ammon, the Ammonite capital (2 Sam. 11:1, 26–31). He conducted the census described in 2 Samuel 24. Everywhere he is presented as a skilled and courageous soldier and a shrewd politician, fiercely loyal to his king and people. At the same time, however, he is shown to be unscrupulous, calculating, and occasionally brutal. Indeed the callous belligerence of the sons of Zeruiah is an important theme in the stories of David's reign, in which Joab and his brothers serve as foils to the gentle, vacillating king (cf. 2 Sam. 3:39). On occasions

when David's excessive sentimentality seemed to threaten the stability of his throne, Joab's cold pragmatism was beneficial. He arranged a reconciliation between David and Absalom after the murder of Amnon (2 Sam. 14:1–24), and he intervened when David's extreme grief at the death of Absalom provoked a crisis in the army (2 Sam. 19:1–8). More often, though, he was a violent, disruptive force. He assassinated Abner, the strongman of Ishbaal's rump government in Gilead (2 Sam. 3:27), who had slain Asahel, Joab's youngest brother, in battle (2 Sam. 2:18–23), and he ordered the execution of Absalom during the civil war (2 Sam. 18:9–15). Both of these killings were without David's knowledge, and the second was against his explicit orders (2 Sam. 18:5; cf. 18:12). Joab also slew Amasa (2 Sam. 20:8), with whom David had replaced him as commander of the army after Absalom's revolt. In the contest over the succession to David's throne Joab sided with Adonijah against Solomon (1 Kings 1:7), a mistake that cost him his life. Solomon charged him with the deaths of Abner and Amasa, and he was executed by Benaiah (1 Kings 2:38–34), who became commander of the army under Solomon (1 Kings 2:35). **3** The ancestor of a group of Israelites from the clan of Pahath-moab listed in the census of the first return from exile (late sixth century B.C.) in the time of Zerubbabel (Ezra 2:6; 8:9; Neh. 7:11). ***See also*** Abner; Absalom; Adonijah; Amasa; David. P.K.M.

Joah (joh´uh; Heb., "Yah [God] is a brother"). **1** The son of Asaph; he was the record keeper of King Hezekiah who, with Eliakim the palace steward and Shebnah the scribe, met with the envoy of the Assyrian ruler Sennacherib who was demanding the surrender of Jerusalem (2 Kings 18:17–37; Isa. 36). **2** A Levite of the Gershonite clan (1 Chron. 6:21). **3** The son of Obed-edom, of the Korahite clan of gatekeepers (1 Chron. 26:4). **4** The son of Zimmnah; he was a Levite of the Gershonite clan who, with his son Eden, participated in the cleansing of the Temple during Hezekiah's reforms (2 Chron. 29:12). **5** The son of Joahaz; he was sent by King Josiah to effect repairs on the Temple (2 Chron. 34:8). D.R.B.

Joanna (joh-an´uh). **1** According to Luke 8:3, the wife of Chuza, Herod's (i.e., Herod Antipas) steward, and one of the women who accompanied Jesus. Along with Mary Magdalene, Susanna, and others who "had been healed of evil spirits and infirmities," Joanna gave assistance ("out of their means") to Jesus and the Twelve. In Luke 24:10, she is one of the women (with Mary Magdalene, Mary the mother of James, and others) who, having gone to anoint Jesus' body, find the tomb empty. **2** One of the ancestors of Jesus in Luke 3:27 (KJV; RSV: "Joanan"). ***See also*** Chuza; Herod; Mary; Steward; Susanna; Twelve, The. P.L.S.

Joannan (joh-an´uhn; RSV: "John"). **1** Father of Mattathias Hashmon, whose resistance to the Syrian officials began the Maccabean revolt. **2** Also, the first son of Mattathias (1 Macc. 2:1–2, KJV). ***See also*** John; Maccabees.

Joash (joh´ash). **1** The youngest son of Ahaziah, king of Judah (835–796[8?] B.C.). After Ahaziah's death, his mother, Athaliah, had all his children killed. However, Joash, an infant, was saved by Jehosheba, Ahaziah's sister and the wife of the chief priest Jehoiada (2 Kings 11:2), who hid Joash in the temple for six years (v. 3; 2 Chron. 22:11–12). In the seventh year, Jehoiada conspired against Athaliah, crowned and anointed Joash, and had Athaliah slain (2 Chron. 23:1–15). Next Jehoiada renewed the covenant of God with the king and the people, which resulted in the destruction of the Tyrian Baal cult in Judah (2 Kings 11:17–18) as well as the repair of the Temple (12:7–17). Afterward, Hazael, king of Aram, attacked Israel, taking Gath, and threatened Jerusalem (v. 18). Joash was forced to buy him off with the gold of the temple and palace, and other gifts (v. 19).

The late narrative of 2 Chron. 24:15–27 (the veracity of which is debated by scholars) relates that after Jehoiada's death, Judah lapsed into paganism, provoking a prophecy by Jehoiada's son Zechariah, who was killed at the command of Joash. Another Aramaean campaign despoiled Judah, wounding Joash in the battle. Joash was murdered by two of his servants. He was succeeded on the throne by his son Amaziah.

2 The son of Jehoahaz, king of Israel (801–785 B.C.). During his reign, Assyria, under Adad-nirari III, resumed its domination of Aram by attacking Damascus and defeating its armies. This allowed Israel to regain its captured cities (2 Kings 13:25). These events are reflected in the prophecy to Jehoash of the dying Elisha (vv. 14–19). An Assyrian inscription names Jehoash as one of those paying tribute to Adad-nirari and includes Israel as one of the countries subdued in the campaign.

The late narrative of 2 Chron. 25:6–13 relates that Jehoash's contemporary, Amaziah, king of Judah, hired one hundred thousand soldiers of Israel (which could hardly have been done without the agreement of Jehoash) for one hundred talents of silver to help him against Edom. However, after a prophecy condemning this hiring, Amaziah sent them home before the battle was joined. On the way back, the Israelites raided Judean cities. These raids may have been the reason for Amaziah challenging Jehoash to battle, which ended disastrously for Judah—Amaziah was captured, although not killed, and "the wall of Jerusalem for four hundred cubits from the Ephraim Gate to the Corner Gate"

was dismantled, and the temple and palace treasures were looted (2 Kings 14:8–14).

3 An Abiezrite, the father of Gideon the judge, who defended his son's destruction of the Baal altar (Judg. 6:11, 29–31).

4 The son of Ahab, king of Israel, in whose co-custody the prophet Micaiah's imprisonment was entrusted (1 Kings 22:26).

5 A son of Shelah, the son of Judah (1 Chron. 4:21–22).

6 One of David's mighty men, ambidextrous with bow or sling, who came to David at Ziklag. They were relatives of Saul. Joash was the brother of their chief Ahiezer and the son of Shemaah of Gibeah (1 Chron. 12:1–3). J.U.

Job (johb), **the Book of,** the eighteenth book in the OT and a major example (with Proverbs) of wisdom literature. In Hebrew, "Job" may mean "where is the [divine] father?" or "hated/persecuted one"; or it may combine both meanings to pose the book's question. Date, place, and identity of authorship are debated. Proposed dates fall between the seventh and fourth centuries B.C.; an exilic date (after 586 B.C.) is assumed here.

Various sections of the book have been identified as secondary: chap. 28; chaps. 32–37; some parts of chaps. 38–41; and the prologue and/or epilogue. Such judgments rest largely on interpretation of the book as a whole. The unity of the book is not without its proponents, and that view is adopted here.

Background: The book has its background in Israel's religion up to the Exile and in Canaanite and Mesopotamian religious traditions as reflected in the book's allusions to common ancient mythic motifs. In Mesopotamia and Canaan, the gods appeared as divine creators and rulers of the cosmos, with human beings as subjects. Majestic in wisdom and power, they acted at times beneficently and at times with inscrutable arbitrariness. In second-millennium B.C. Mesopotamia (with parallels in Canaan) a form of "personal [or family] religion" became prominent, within which a god as divine parent endowed the human devotee as child with generative power, nurture, guidance, and protection. This "personal religion" was important for Israel's ancestors, beginning with Abram (Heb., "the [divine] father is exalted"). In one form, it centered in the worship of God as "Almighty" or "Shaddai" (NRSV note), giver of the blessings of cosmic and familial fertility and nurture (Gen. 49:25), and of promises of children and land (Gen. 17:1–8; 28:3–4; Exod. 6:2–4). This religion of the ancestors was important also in the birth of Israel in the Exodus and the Sinai covenant (see Exod. 2:23–25; 3:6, 13–15; 4:22–23; 6:2–8; 19:3–6). The latter actions displayed God as compassionate to the oppressed and just in the establishment of Israelite life upon a basis of law. Israel's Eden story (Gen. 2–3) universalized this vision of God as beneficent creator, provider, and covenanter; and the creation account of Genesis 1, with its portrayal of humankind as in God's image, affirmed the deepest affinity between human and divine within a context of creation as good.

In Mesopotamia this "personal religion" crumbled before the experience of persistent evils, and views of the gods as inscrutably arbitrary cosmic rulers prevailed. In Israel the many Psalms of complaint (e.g., Pss. 3–6; 22; 30), together with prophets such as Habakkuk, reflect the challenge that Israel's experience of evil posed to their vision of God and their self-understanding, a challenge that became excruciating with the Exile.

The Question of Undeserved Suffering: Israel's question, posed through Job, concerns the

"The torment of Job" (lying on his back in the center) as imagined by the twelfth-century artists of Chartres Cathedral.

JOB, THE BOOK OF

OUTLINE OF CONTENTS

The Book of Job

- I. Prose prologue: Job's calamity (chaps. 1–2)
- II. Job's opening soliloquy (chap. 3)
- III. Dialogues with friends (chaps. 4–27)
  - A. First cycle of dialogues (chaps. 4–14)
  - B. Second cycle of dialogues (chaps. 15–21)
  - C. Third cycle of dialogues (chaps. 22–27)
- IV. Monologues (chaps. 28–37)
  - A. Meditation on the inaccessibility of wisdom (chap. 28)
  - B. Job's concluding soliloquy and oath (chaps. 29–31)
  - C. The "inspired" utterance of Elihu (chaps. 32–37)
- V. Dialogues with God (38:1–42:6)
  - A. God's first answer from the whirlwind (38:1–40:2)
  - B. Job's first response (40:3–5)
  - C. God's second answer (40:6–41:34)
  - D. Job's second response (42:1–6)
- VI. Prose epilogue: Job's restoration (42:7–17)

meaning of undeserved suffering vis-à-vis the silence and inactivity of God; what is one to make of the tradition, of oneself, and of the divine character and purpose in view of such experience (chaps. 3–37)? This human question is embedded in a prior question in the divine realm concerning the character and purpose of human piety (1:6–12; 2:1–6). These two complementary questions, asked and explored with painstaking honesty on both sides, human and divine, may be viewed as a transformed exposition of traditional Israelite themes of divine-human covenanting and of the viability and significance of humankind as dust in God's image, human child of divine parent.

Job's friends have learned perhaps too well the lessons of Sinai. Observation and folk wisdom reinforced by the claims of covenant and its conditional blessings and curses (e.g., Deut. 30:15–20) schooled sensibilities in a strict calculus of retribution: reward for uprightness, punishment for wickedness. Job shares this theology, but now his experience calls it in question. As voiced by his friends, this theology would force him to deny his experience and confess a wickedness that his conscience cannot in truth attest. He therefore explores alternatives. Perhaps God is not benevolent creator, compassionate father, or just covenantor, but merely brute insensitive divine power acting in a grotesque parody of wisdom and purpose. Yet from time to time Job imagines God as, somehow, still on his side (9:33 [NRSV note]; 14:13–17; 16:19–21; 19:25–27). He remains loyal in continuing to address God, if only with stormy questions. This loyalty comes to a first climax in his oath of a clear conscience, sworn in the name of the very God (Shaddai, 27:1) responsible for his condition. Then, after a soliloquy in which (unlike chap. 3) he affirms the worthwhileness of his past life (chap. 29), he utters a second oath of conscience to Shaddai (31:2, 35) and leaves himself in the hands of God so appealed to (31:38–40).

The three friends and Job base their views largely on observation, experience, and tradition, though in 4:17–5:7 Eliphaz briefly appeals to nocturnal revelation. Now Elihu appears (chaps. 32–37) to settle the issue with his "inspired" revelation. Yet he only repeats the views of the friends, unwittingly betraying himself as a false prophet (cf. 1 Kings 22:13–23). Finally, God breaks the long divine silence and speaks directly to Job (chaps. 38–41).

The Divine Speeches: The divine speeches are generally taken as the key to the meaning of the book of Job. Yet they themselves require a key, and interpretations vary widely. Do they reinforce some aspect of the friends' theology? Or Elihu's? Do they shout Job down by reference to cosmic mysteries beyond his possible fathoming? Do they confirm his fear that heaven is indifferent to human concerns? Perhaps the genius of the book lies in the way it requires each reader to construe the speeches for her- or himself, thereby placing the reader in Job's shoes to hear and respond (42:1–6).

Three prominent features of the book may offer keys to the divine speeches. These features are the frequency of irony, of questions, and of the divine name Shaddai. In irony, the obvious sense of words is subverted by another implicit sense that emerges through them. Often irony cloaks its meaning in conventional wisdom that, however, is exploded for the keen listener. As for questions, where they address existential concerns they invite the one who entertains them into new contexts of understanding and existence. Repeatedly in Job, irony and question combine to mutually intensifying effect. One or another speaker poses questions that appear as rhetorical appeal to conventional wisdom; yet the context shows that these supposedly rhetorical questions function in fact as genuine questions opening alternative possibilities for understanding and existence.

The divine address to Job (chaps. 38–41) is composed almost entirely of questions ostensibly rhetorical and seemingly designed to throw him back into a skeptical wisdom according to which suffering conveys a baffling revelation of the incomprehensibility of life and the dissolution of human understandings grounded in the Exodus, the Sinai covenant, and the good creation with humankind in God's image. Yet when these divine questions are reread in the context of Job's own words and experience, in

the context of Israelite tradition generally, and in the context of the use of questions and irony throughout Job, the suspicion may arise that God's questions function ironically, so that their supposedly rhetorical character cloaks and conveys a genuine invitation to an alternate positive understanding of God, the world, and the suffering self. So read, these questions, in their ostensible and in their hidden character, re-present the two voices in the divine realm (1:6–12; 2:1–6), similar to the two voices in the Garden (Gen. 2:16–17; 3:1–5) and the voices of Lady Wisdom and the Strange Woman in Proverbs, calling for discernment and decision. So read, the divine questions restate a human vocation and divine-human covenanting hitherto only latent in Israel's tradition. (That vocation will emerge more explicitly with the servant in Isaiah 40–55 and later, e.g., in Mark 10:35–45. In the latter instance again, apparently rhetorical questions supposedly functioning as a rebuke to pretension turn out to function as genuine vocational questions.) Such a reading of the divine speeches may be reinforced by the significance of the name Shaddai, which occurs seven times in relation to Israel's ancestors and thirty-one times in this book, and which may indicate the experiential locus of value and meaning to which Job's sufferings draw him. Job laments his conception and birth (3:3–12) because, through his sufferings, the "blessings of breast and womb" (Gen. 49:25) have turned bitter for him (3:20; cf. 6:4–7; 27:2; also Ruth 1:20–21). This suggests that issues of justice, grave as they are, give out onto even graver issues of parental abandonment and forgetfulness (cf., e.g., Isa. 40:27; 49:13–16; also Isa. 6:10–13). Shaddai's response (40:2) points Job to a cosmos teeming with life as God's gift, a cosmos in which even the unruly sea has God as midwife at its birth (38:8–11). The implication is that the divine speeches go to meet the innocent sufferer at the level of the primal fear of abandonment and forgetfulness, to give reassurance of divine remembrance (cf. 14:13) and presence (cf. 23:3–9).

Job's Response: Job's response (42:1–6) comes as a confession, literally a "speaking in agreement" with God. It comes to a climax in 42:6, the Hebrew text of which may be translated, "Therefore I recant and change my mind concerning dust and ashes" (but the latter verb may also be translated, "I am comforted"). In his last soliloquy (30:19) Job had taken his sufferings as God's action to put him in his proper place as "dust and ashes." Now, after what God says to him, he repents of (or is comforted out of) that dour interpretation and comes to a new understanding of his experience as suffering dust, suffering human. That new understanding is undisclosed; readers must come to it for themselves, through self-involvement in the story. Is it only a coincidence that Job's words in 42:3 closely echo Psalm 131, where in the face of life's mysteries the psalmist is quieted before God like a weaned child with its mother (cf. Isa. 66:10–13)? In any case, neither are Job's earlier fears concerning divine arbitrariness and indifference confirmed, nor is the friends' doctrine of strict retribution established; and the book invites an exploration into other possibilities.

Restoration: To some, the epilogue rehabilitates the doctrine of retribution so painstakingly dismantled in the dialogues and must be obtusely and misleadingly secondary. Read in view of the dialogues, however (and not as though it followed immediately after the prologue), the epilogue may be taken to bring the insights of the revelatory mountaintop down to the plain of ordinary life, where it now identifies divine and human transactions, not in conventional *quid pro quo* terms, but as suffused with freedom, spontaneity, and loyalty. Relations are renewed with each partner acting not out of necessity or duty, but out of freedom, felicity, and loyalty, thereby with one another bringing into being a world of worth in the face of all that can and does go wrong.

So read, the book of Job presents a realistic exploration and ultimate vindication of humankind as called to image God in dust. Far from being an anthropomorphic domestication of the divine in accordance with human wishes, it presents a call to leave the homeland of one's settled understanding of self and the world, and to follow God in engaging the mystery of evil and affirming the goodness of existence. ***See also*** Wisdom Literature.

J.G.J.

Jobab (joh´bab). **1** A "son" of Joktan, descendant of Shem, and representative of an Arabian tribe (Gen. 10:29; 1 Chron. 1:23). **2** An Edomite king (Gen. 36:33–34; 1 Chron. 1:44–45). **3** A king allied with Jabin of Canaanite Hazor who fought against Joshua (Josh. 11:1). **4** Two men of Benjamin's tribe (1 Chron. 8:9, 18).

Jochebed (jok´uh-bed), the name of Moses' mother. According to priestly traditions, she and her husband, Amram, both descendants of Levi, were the parents of Aaron, Moses (Exod. 6:20), and Miriam (Num. 26:59). This is a conflation of earlier statements in Exodus (2:1–10; 4:14; 15:20).

Joda (joh´duh; RSV; KJV: "Juda"), an ancestor of Jesus (Luke 3:26).

Joel (joh´uhl), a common name in the Hebrew Bible, meaning "Yah[weh] is God," the inverse

form of the name Elijah. Joel is thus a polemical name, proclaiming that Yahweh, and not another party, is God. It is used of a number of people in the OT. **1** One of the sons of Samuel who became a judge but perverted justice (1 Sam. 8:2). **2** A Simeonite whose name appears in early genealogical records (1 Chron. 4:35). **3** A member of the tribe of Reuben, and the father of Shemaiah (1 Chron. 5:8). **4** The father of Shema (1 Chron. 5:12), he may be the same person mentioned in 3. **5** The father of Heman, a Koathite singer (1 Chron. 6:33). **6** The son of Azariah and the father of Elkanah (1 Chron. 6:36). **7** One of the five sons of Izrahiah, all of them chief men (1 Chron. 7:3). He may be the same person as 6. **8** The brother of Nathan and one of David's mighty men (1 Chron. 11:38). **9** The chief of 130 Levites, descendants of Gershom, who was included among the Levites appointed by David to accompany the Ark to Jerusalem (1 Chron. 15:7, 11). **10** The father of one of the Levites, Heman, appointed by David to sing as the Ark was brought to Jerusalem (1 Chron. 15:17). He may be the same as 5. **11** One of the three sons of the Levite Ladan (1 Chron. 23:8). **12** One of the two sons of Jehieli who were in charge of the treasuries of the house of the Lord (1 Chron. 26:22). **13** The son of Pedaiah; he was one of the officers from the half-tribe of Manasseh in David's kingdom (1 Chron. 27:20). **14** A Levite in the reign of King Hezekiah (ca. 725–697 B.C.); he helped in the resanctification of the Temple (2 Chron. 29:12). **15** One of seven sons of Nebo; he put aside his foreign wife and his children at the behest of Ezra (Ezra 10:43). **16** A Benjaminite, the son of Zichri, who was a leader among those who lived in Jerusalem at the time of its restoration under Nehemiah (sixth century B.C.; Neh. 11:9). **17** The son of Pethuel and the prophet of the book of Joel (Joel 1:1; cf. Acts 2:16). ***See also*** Joel, The Book of. M.Z.B.

Joel, the Book of, an OT book, the second of the Minor Prophets. The book begins by depicting a locust plague, which is understood as the onset of the "day of the LORD," and it continues with a description of the future fortunes of Israel and the nations. The Hebrew text contains four chapters; most English translations contain three chapters, following the Septuagint (LXX) and Vulgate, which combine chaps. 2 and 3.

Joel is a postexilic book; it refers to the dispersion of Israel as a past event (3:3) and is clearly written at a time when the Temple is standing (see, e.g., 1:9). The language and theology of the book are consistent with this date, which has important implications for the book's unity. Without question, certain tensions are felt in the book; the first two chapters focus on a locust plague, while the last chapter deals with judgment of the nations and Israel's ideal state. Within chaps. 1–2, there is some confusion between the locust plague and a drought (cf., e.g., 1:19). There are also unexpected repetitions; for example, an assembly is proclaimed in 1:13 and again at 2:1. The model of multiple sources or an original prophecy that has undergone revision(s), though possible, is not the best explanation of the book's unevenness. Instead, the roughness likely results from a single, learned prophet who integrated and interpreted disparate earlier oracles. This prophet then created a unity of sorts by interspersing common themes throughout the book, such as the "day of the LORD," darkness, and Zion.

The author of Joel, however, was not a hack who merely combined earlier sources. The major theme of the early part of the book, the locust plague, especially the description of the locusts as cavalry in chap. 2, is strikingly original. The language of Joel is lively and full of wordplays and internal repetitions. Joel is also comfortable radically revising earlier prophecies; e.g., 3:10, "Beat your plowshares into swords, and your pruning hooks into spears" is a reversal of the famous command in Isa. 2:4 (paralleled in Mic. 4:3). These elements all testify to Joel's creativity.

Interpretation: The focus of chap. 1 and much of chap. 2 is on the locust plague, which should be understood as real rather than metaphorical. Chap. 1 delineates the various groups affected: drunkards (v. 5), farmers (v. 11), priests (v. 13), and cattle (vv. 18, 20). The affliction motivates a lament at the Temple (v. 14). Some scholars even see the entire book as a lament. Joel 1 mentions the "day of the LORD" in passing (v. 15), foreshadowing the next chapter's theme of the darkness of

OUTLINE OF CONTENTS

The Book of Joel

I. National lament in response to a locust plague (1:1–20)
   A. Superscription (1:1)
   B. Description of the locust plague (1:2–4)
   C. Call to lament (1:5–14)
   D. A lament (1:15–20)
II. The "day of the LORD" as judgment on Judah (2:1–29)
   A. The locust plague as harbinger of the "day of the LORD" (2:1–11)
   B. Call to repentance (2:12–17)
   C. God's positive response: promise of deliverance (2:18–29)
III. The "day of the LORD" as judgment on Judah's enemies (2:30–3:21)
   A. Signs of the "day of the LORD" (2:30–32)
   B. Judgment on the nations (3:1–17)
   C. Summary: prosperity for Zion and destruction for enemies (3:18–21)

the "day of the LORD" (2:2, 10). Darkness is a traditional element of that day's depiction, seen already in Amos 5:18; the darkness in Joel probably reflects the pall cast by the hordes of locusts. Joel 2:1–11 is characterized by striking similes and metaphors that express the extreme devastation and fright caused by the locusts. The indebtedness of Joel to tradition may be seen, e.g., in 2:3, which contains one of the very few biblical references outside of Genesis to the Garden of Eden.

The remainder of chap. 2 is mostly a pastiche of reworked traditional material. For example, v. 13b is a restatement of a section of the attributes of God (see, e.g., Exod. 34:6; Jon. 4:2), and 14a is likely a quotation of Jon. 3:9. Joel 2:12b–13a, "return to me with all your heart, with fasting, weeping, and with mourning; rend your hearts and not your clothing" is a revision of the idea found in texts like Isa. 22:12b, "weeping and lamentation, baldness and the wearing of sackcloth." Joel, however, rejects the traditional rending of clothing to don a sackcloth in favor of complete internal contrition, expressed through "rend your hearts."

Joel 2:18 is a turning point of the book; the Lord (YHWH) is envisioned as "acting zealously" on behalf of his nation. Initially, the Lord's zeal is seen in the agricultural sphere, reversing the devastation depicted in the first chapter and a half. This section concludes with 2:27, with a formula that is particularly prominent in Ezekiel, "and you shall know . . . that I the LORD (YHWH) am your God." Further evidence of Israel's salvation in the ideal future time follows: prophecy will be bestowed on all, and there will be a remnant on Mount Zion. Joel 2:28–29 depicts all Israel as prophets and fits the postexilic period, when prophecy experienced a crisis; it may also be a reaction against Amos 8:11, which had predicted the end of prophecy. The idea of a remnant on Mount Zion is an important prophetic idea, found, e.g., in Isa. 37:22 (paralleled in 2 Kings 19:31), which Joel adapts. This "remnant" also introduces the following theme, the battle against the nations.

The Lord's (YHWH's) "zeal" on behalf of Israel that had introduced the agricultural recovery (2:18) is more typically used in contexts of punishment of the nations (e.g., Zech. 1:14–15), to which Joel now turns. They are defeated in battle in the land of Israel, as in the battle of Gog and Magog (Ezek. 38–39); this defeat is connected to the "day of the LORD" (2:31; 3:14). "And you shall know that I am YHWH your God" also ends this section (3:17; cf. 2:27); it here emphasizes the Lord's military power (3:17b).

The last four verses of the book (3:18–21) function as a conclusion. Thematically, they combine the disparate agricultural and military images of the book. Joel concludes with "Zion," which had been mentioned explicitly five times earlier (2:1, 15, 23; 3:16, 17), and is the setting for the entire book. The concluding verses typify Joel in that they combine various traditional images, in some cases even quoting earlier prophesies (e.g., 3:18a and Amos 9:13; 3:21b and Isa. 8:18b); this reused material, however, is presented in a striking and new way. ***See also*** Prophet.

M.Z.B.

Johanan (joh-hay´nuhn; Heb., "God shows favor"; cf. John). **1** The eldest son of Josiah (1 Chron. 3:15). **2** A descendant of the Davidic family, son of Elioenai (1 Chron. 3:24). **3** A member of the priestly line of Zadok (1 Chron. 6:9–10). **4** One of David's "mighty men" (1 Chron. 12:4), possibly the same as a Gadite in 1 Chron. 12:12. **5** Father of an Ephraimite chief, Azariah, in the time of king Ahaz (2 Chron. 28:12). **6** The son of Kareah (2 Kings 25:33; Jer. 40:8–43:5), a leader in Judah after the destruction of Jerusalem (587 B.C.) under Gedaliah, who refused him permission to kill Ishmael, who subsequently assassinated Gedaliah. He was a leader in rescuing the captives taken by Ishmael and in asking for divine guidance from Jeremiah. But Jeremiah's message to stay in Judah was repudiated by Johanan and his associates and they took refuge in Egypt. **7** The son of Hakkatan of the Azgad family who brought 110 men to Ezra's company (Ezra 8:12). **8** The son (possibly grandson) of Eliashib, priest or high priest contemporary with Nehemiah (Neh. 12:22–23; cf. Jonathan in 12:11). ***See also*** Gedaliah; Jeremiah, The Book of. P.R.A.

Johannine (joh-han´in) **Epistles.** ***See*** John, The Letters of.

Johannine literature, the, a name given by modern scholars to the five books of the NT that are attributed to an author named John. Of the five—the Gospel According to John, 1, 2, and 3 John, the Revelation to John—only Revelation carries the name of its author in the text (1:4). The remaining four owe the attribution of authorship to post-NT tradition. That the "John" is the disciple John of Zebedee is an early tradition, but it was disputed as early as the early third century A.D. by Origen. Along with the similarities in content and style that have caused scholars to link these five books, there are also enough differences to call into question their authorship by one individual. Some have suggested they were written by followers of John of Zebedee (the "Johannine School"),

whence the similarities and the attribution to John. P.J.A.

John (jon; short for Johanan or Jehohanan), a common name among Jews and in the NT. **1** The father of Mattathias and grandfather of Judas Maccabeus (1 Macc. 2:1). **2** The oldest son of Mattathias and brother of Judas Maccabeus (1 Macc. 2:2; 9:35–42). **3** John the Baptist (Matt. 3:1). **4** John the son of Zebedee (Mark 10:35). **5** John Mark (Acts 16:37). **6** The father of Peter (John 1:42; 21:15–17). **7** A member of the high-priestly family (Acts 4:6). **8** The author of Revelation (Rev. 1:1, 4, 9; 22:8). ***See also*** John the Apostle; John the Baptist; Maccabees; Mark; Peter; Revelation to John, The.

John, the Gospel According to, the fourth Gospel in the NT. It is traditionally ascribed to John, the son of Zebedee, one of the Twelve and the brother of James. Yet Zebedee's sons, who are prominent in the synoptic Gospels, are mentioned only in 21:2 and then not by name. Although "the Beloved Disciple," who appears only in Jerusalem, is traditionally identified as John, this equation is not made in the Gospel itself. For reasons that will be given below, most modern scholars do not think that the Gospel is apostolic in origin.

The Distinctiveness of the Fourth Gospel: In the Gospel of John, Jesus delivers no Sermon on the Mount (or Plain). He tells no parables, heals no lepers, performs no exorcisms, does not instruct his disciples to pray the Lord's Prayer, and does not institute the Lord's Supper on the night of his betrayal and arrest. The kinds of moral teaching and religious instruction associated with the Jesus of the synoptic Gospels are almost completely absent from John, as are his typically brief and epigrammatic sayings (e.g., Mark 2:27; 12:17).

Jesus delivers discourses and carries on debates with his opponents in the Fourth Gospel up to the point (chap. 12) at which he withdraws from the world to be with his disciples, whom he commands to love one another (13:14). These discourses and debates do not, however, concern the interpretation of God's will in practical moral issues, as in the Synoptics; rather, they dwell upon the claim to messiahship and divine sonship that Jesus makes for himself. The prologue's (1:1–18) description of him as the "Word" (Gk. *logos*) sent from God is borne out in his appearance and discourses. His opponents are often categorized simply as "the Jews," even though the Gospel presents Jesus himself as a Jew, a native of Nazareth (1:45–46; 4:22; 18:33–35). The distinction between Jesus and his disciples, on the one hand, and the Jews, on the other, is altogether characteristic of the Gospel of John but not of the other Gospels, where Jesus appears as a figure within Judaism. (The other authors and their communities are, of course, also convinced that Jesus is not only Christ but Son of God.) This difference may afford some indication of the reasons for the distinctiveness of the Fourth Gospel: it arises out of a sharp conflict between Jews who accept the messiahship of Jesus and those who do not (see below).

Jesus performs healings and other miracles in the Fourth Gospel, as in the Synoptics, but for the most part John has accounts of different episodes. Yet, like the others, John recounts how Jesus fed a multitude, apparently miraculously, and soon thereafter was seen walking on the water by his disciples, who were in a boat on the lake. Typically, John portrays Jesus performing a healing, then debating with Jews (or Pharisees) about its significance (cf. chaps. 5 and 9). In this Gospel, the miracles are "signs" signifying who Jesus is, and they are intended to evoke faith on the part of those who witness them, beginning with the disciples (2:11). Yet one can see signs and, even without rejecting them, fail to attain adequate faith (2:23–25). Nevertheless, Jesus' miracles, like his message, are in John's Gospel fundamentally testimonies to who he is (see 20:30–31). They are not acts of mercy or signs of the kingdom of God, as in the Synoptics, but serve to convey John's message about Jesus Christ (i.e., Christology).

Although John's narrative of events leading from Jesus' arrest to his death and burial is remarkably similar to that in the Synoptics, the role and demeanor of Jesus are again distinctive. Jesus seems above, or aloof from, the course of events. He is not silent before the Roman procurator Pilate, however, but virtually turns the tables on him. In the Johannine trial scene, Pilate shuttles back and forth between Jesus and the accusing Jews, seeming to wish to release Jesus but not having the fortitude to do so. When Jesus goes to his execution, it is as if by his own initiative. In death, he shows no pain or emotion (cf. Mark 14:32–42) but says "It is finished," as if he remained in control of events until the very end (19:30). And that is precisely the picture this Gospel encourages its readers to form.

The rather different and contrasting portrayal of Jesus, his message, and his ministry in the Fourth Gospel raises questions about the causes or conditions that produced the Gospel, as well as its historical validity. The latter question is perhaps less complex, although both are difficult enough.

In an earlier, uncritical era, John was used to supplement the Synoptics, as though each were a straightforward historical account. Yet this is true of none of them. The Gospel is a characteristically Christian literary genre, albeit with affinities with late Hellenistic (i.e., 100 B.C.–A.D. 100) biography as well as OT narratives, that intends to report historical events, but in the overall framework or context of a distinctly Christian theological interpretation. Because the Synoptics do not generally present

John the Evangelist with his symbol, the eagle, behind him; page from the seventh-century *Lindisfarne Gospels.*

Jesus as proclaiming himself, i.e., presenting Christological doctrine, and because the issues they portray him dealing with are largely indigenous to early first-century Palestinian Judaism, historians have rightly preferred their renditions particularly of Jesus' teaching but also of his healing activity and his death. Yet in all probability John contains some valid historical data peculiar to itself (e.g., the dating of Jesus' execution on the afternoon before the beginning of Passover rather than during the feast), as well as authentic sayings of Jesus. Whether John knew the synoptic Gospels is a debated question. Obviously, he did not feel constrained to agree with them or conform to them.

Language and Style: The style and language of Jesus' speech in the Fourth Gospel are in many respects closer to the three Letters of John than to the other Gospels. Not surprisingly, tradition has held, and many scholars have agreed, that the Gospel and the Letters are the work of the same author.

Although the book of Revelation is in language and style quite different from the Gospel of John, the two nevertheless have certain features in common. In both, Jesus is described as the "Word" and "Lamb" (of God), and in both heavy emphasis is laid on witnessing to Jesus and the gospel. Strikingly, in Revelation, the crucified and risen Jesus delivers the initial revelation (Rev. 1–3), and his words are not unlike those of the Johannine Jesus (cf. Rev. 3:20). Several seemingly diverse factors may also be pertinent here: the author of Revelation is a prophet (1:3) through whom words of the living Jesus are conveyed; 1 John 4:1–6 apparently deals with Spirit-inspired prophets; and in the farewell discourses of the Gospel of John (chaps. 14–16), Jesus promises the disciples that he will send them the Counselor, the Holy Spirit, who will somehow mediate his further teaching to them. Quite possibly, the activity of Spirit inspiration among Christians who produce such books as the Gospel of John, as well as the other Johannine writings, is related to the distinctiveness of the Johannine style and particularly to the unique framing and content of the discourses of Jesus in the Fourth Gospel. However that may be, the very distinctiveness of the Johannine emphases, language, and store of concepts suggests that the circumstances and influences that helped produce the Gospel of John were quite different from those affecting the Synoptics.

Influences: The concept of the "word," prominent in Greek philosophy since Heraclitus and important to the Stoic philosophers, dominates the prologue of John's Gospel. Interpreters once took this as a clue to the Greek character and origin of John. Analogies to such hellenization (i.e., adaptation to Greek ways of thinking) of the Christian gospel were seen in the work of the Alexandrian Jew Philo and the apocryphal Wisdom of Solomon, and such affinities are real. Yet soon after World War II, they were overshadowed by the Qumran Scrolls. Of Jewish origin and discovered in Palestine near the Dead Sea, the scrolls share significant theological vocabulary and dualistic thought patterns (e.g., light/darkness, truth/lie) with the Fourth Gospel. Earlier suggestions of a profoundly Jewish substratum of the Gospel seemed to be confirmed.

In the meantime, a number of scholars came to believe that John was influenced by, or written to refute, an earlier form of the so-called Gnostic heresy that flourished during the second century and threatened for a while to become the dominant form of Christianity. Gnosticism tended to equate Creation with the Fall, to regard the material world as evil, and to see in Jesus the emissary from an alien God who had descended into this world to save his kindred spirits, the elect. Some elements of this view, especially its Christology and concept of salvation, seemed to find an echo in the Fourth Gospel. On the other hand, the Gospel's assertion that all things were made through the Word, that is, Christ (1:3), and that the Word became flesh (1:4), its positive use of the OT, and 1 John's denunciation of those who deny the fleshliness (i.e., humanity) of Jesus (4:2–3) could be construed as directly opposed to Gnosticism. Significantly, however, the earliest

JOHN, THE GOSPEL ACCORDING TO

known commentary on the Fourth Gospel was written by Heracleon, a mid-second-century Gnostic. Perhaps because it was used by Gnostic Christians who came to be regarded as heretics, and also because it was so obviously different from the Synoptics, John was looked upon with suspicion by some orthodox Christians. When, in the last quarter of the second century, Bishop Irenaeus argued for the necessity of four Gospels, he may have been defending the authority of the Gospel of John in particular.

Authorship and Date: As we push back into the middle and first half of the second century, there is some evidence that John was known among orthodox churchmen (Ignatius, Justin Martyr), but no connection is made either with John the son of Zebedee or with Ephesus in Asia Minor, the traditional place of origin. The statements of Irenaeus that the Gospel of John was written by John the disciple of the Lord in Ephesus appear as the four-Gospel canon is emerging in the general usage of the church, that is, the end of the second century. It was said that John was a "spiritual" Gospel, written after the other Gospels and with knowledge of them (Clement of Alexandria, at the end of the second century). The implication that John was the last of the four canonical Gospels was thus willingly accepted. Therefore, the widely held critical opinion that John could not have been composed much before the end of the first century has ancient roots.

Historical Setting: A date at or near the end of the first century also accommodates the likely possibility that the manifest hostility between, on the one hand, Jesus and his disciples and, on the other, the authorities, called Jews or Pharisees, reflects a later conflict between those Jews who believed Jesus was the Messiah and the majority who did not. (So sharp a division probably did not exist in Jesus' day; it is not evidenced by the synoptic Gospels or their tradition.) That those who confess Jesus to be the Messiah should fear being expelled from synagogues (9:22; 12:42; 16:2) makes sense only if those faced with the question of whether or not to confess Jesus lived within, or at the fringe of, Judaism. A Jewish setting is also presupposed by the Gospel's intense concentration on the question of whether Jesus is actually the Messiah (e.g., 1:41–45; 20:31), a matter that is only intelligible within a Jewish context. The absence in John of scribes, Sadducees, and Herodians (all mentioned in the Synoptics) bespeaks a time after the Roman War (after A.D. 70), when only the Pharisees maintained, and enhanced, their influence. Apparently the Gospel of John in its present form was published at a time when the community of Jesus' followers had already left the synagogue, however, for the culminating farewell discourses (chaps. 13–17) deal mostly with distinctively Christian, as opposed to Jewish or Jewish-Christian, issues. Yet the marks of the earlier conflict and the subsequent separation from the synagogue remain.

Quite possibly the Jewish side of this conflict is somehow represented in the *birkat ha-minim* ("Blessing of the Heretics"), the twelfth

OUTLINE OF CONTENTS

The Gospel According to John

I. Introduction (1:1–51)
   A. Prologue (1:1–18)
   B. Encounter with John the Baptist and call of disciples (1:19–51)
II. Jesus' manifestation of God's glory before the world (2:1–12:50)
   A. Wine miracle (2:1–11)
   B. Cleansing of the Temple (2:12–22)
   C. Discussion with Nicodemus on birth from above (2:23–3:21)
   D. The second appearance of the Baptist (3:22–36)
   E. Conversation with Samaritan woman (4:1–42)
   F. Healing of official's son (4:43–54)
   G. Healing at pool of Beth-zatha and related discourse (5:1–47)
   H. Feeding of five thousand and related incidents and discussions (6:1–71)
   I. Jesus at Feast of Tabernacles (7:1–52)
   J. Woman taken in adultery (7:53–8:11; a later addition to the Gospel)
   K. Jesus the Light of the World (8:12–59)
   L. Restoration of sight to blind man (9:1–41)
   M. Jesus the Good Shepherd (10:1–42)
   N. Raising of Lazarus from the dead (11:1–44)
   O. Condemnation of Jesus (11:45–57)
   P. Triumphal entry and related events (12:1–50)
III. Jesus' manifestation of God's glory to his disciples (13:1–20:31)
   A. The Last Supper; Jesus washes disciples' feet (13:1–38)
   B. First farewell discourse to disciples (14:1–31)
   C. Second farewell discourse to disciples (15:1–16:33)
   D. Jesus' final prayer (17:1–26)
   E. The passion narrative: Jesus' arrest, trial, crucifixion, and burial (18:1–19:42)
   F. Discovery of empty tomb and resurrection appearances in Jerusalem (20:1–31)
IV. Appendix: Jesus' appearance by Sea of Galilee to Peter and others (21:1–25)

of the classic Eighteen Benedictions of traditional synagogue worship. In one ancient version of the benediction a curse is pronounced on *Notzrim* ("Nazarenes," i.e., Christians) as well as *minim* (heretics or separatists). Although this correlation of Jewish and Johannine evidence is disputed because of the uncertainty about the date and function of the benediction, the rooting of Johannine Christianity in some such inner-Jewish conflict is now widely accepted.

Interpretation: *The Interpretation of the Fourth Gospel* (1953) is the title of a major work by C. H. Dodd, the great British scholar, who placed the Gospel against a broad background in ancient Jewish and Hellenistic religion. Similarly, Rudolf Bultmann, Dodd's German counterpart, interpreted John against the background of what he deemed to be a pervasive Gnosticism. Both Dodd and Bultmann represent an earlier tendency to understand John against a general background in the history of religions and, in the case of Bultmann, a universal understanding of human existence.

Subsequently, John has been seen against a more specific and concrete Jewish background (see above and the works of Brown and Martyn cited in the Bibliography). Even more recently, however, attention has moved to the literary character of the Fourth Gospel, as it has been read on the basis of insights and perspectives of literary criticism developed outside the realm of biblical scholarship (see the work of Culpepper cited in the Bibliography). Whether historical considerations become irrelevant, or less relevant, to the understanding of the Gospel has therefore become a matter for debate. ***See also*** Beloved Disciple, The; Gnosticism; Gospel, Gospels; Holy Spirit, The; John the Apostle; John, The Letters of; Logos; Paraclete; Philo; Revelation to John, The; Sign.

John, the Letters of, three brief writings at the end of the NT situated before Jude and Revelation. 2 and 3 John are in epistolary form. The longest of the three, 1 John, has neither salutation nor conclusion but is clearly a written communication to a group of Christians. The author of 2 and 3 John refers to himself in the salutation as "the Elder." The author of 1 John does not identify himself at all, although presumably he is an authoritative figure.

Traditionally, these Letters have been ascribed to the same John, the son of Zebedee, who was believed to have written the Gospel of John and Revelation. Since 1 John, in its prologue and elsewhere, seems to presuppose the Gospel, the Letters were probably written later. As in the case of the Gospel, the area around Ephesus is the traditional place of origin. The documents themselves, however, give no clues to their geographical provenance or date. Only the relation to the Gospel of John enables us to assign them a probable date near the end of the first century or even a little later.

Considerations of language and style lend some support to the traditional view that the Gospel and Letters (not Revelation) are by the same author. Terms such as "life," "light," "love," "Son," "Spirit," "word," "world," and "truth" play an important role in the Gospel and in 1 John particularly. The same can be said for a number of grammatical constructions. The New Commandment to love one another, which Jesus gives in the Gospel (13:34), is said to be both old and new in 1 John 2:7–8 (cf. 2 John 5–6), but the context reveals that it is still the same commandment of love.

The question of the identity of the author is not satisfactorily resolved by the tradition that identifies him with John, the son of Zebedee. If 2 and 3 John are his work, it is curious that he refers to himself only as an elder and not as an apostle. 1 John remains anonymous. Although considerations of language, style, and theology may favor common authorship of the Gospel and Letters, modern critics have observed some significant differences between the Gospel and 1 John. For example, the concept of Jesus' death as expiation for sin is more important in 1 John than in the Gospel, and the expectation of Jesus' return is very much alive in 1 John (2:18; 3:2) but is being revised or reinterpreted in the Gospel. While the close relationship of the Gospel and Letters is not in dispute, the same cannot be said of the identity of their author(s).

To a considerable extent, 1 and 2 John address a similar set of problems in the life of Christian communities. Some members, or former members (1 John 2:19), while claiming not to sin (cf. 1:8), fail to obey Jesus' commandments (2:3; cf. 2 John 4) and hate rather than love their brothers and sisters (2:9–11; cf. 2 John 5). Presumably these same people claim to possess God's Spirit but deny that Jesus was really human, i.e., "has come in the flesh" (4:2; cf. 2 John 7). Thus, in his prologue, the author of 1 John emphasizes the visibility and tangibility of what he proclaims, namely, Jesus Christ, while he later insists that Jesus has come "not with water only but with water and

the blood" (5:6), an allusion to the historical baptism and death of Jesus. Likewise, 2 John emphasizes the importance of obeying the love commandment and confessing that Jesus has come in the flesh.

Given this emphasis on Jesus' humanity, we can more easily understand why "the beginning," which in the prologue of the Gospel means primordial time, means in 1 John the beginning or source of the Christian tradition, namely, Jesus himself. The beginning and source of Christianity is Jesus, and a proper understanding of who he was and what he commanded is of prime importance in the first Johannine Letter.

Thus the relationship of 1 John to the Gospel is best explained if the Letter is regarded as secondary, that is, as clarifying or qualifying statements or positions already set out in the Gospel. In that case, the Gospel's "the Word became flesh" would be underscored by 1 John, where those who deny that Jesus Christ has come in the flesh are condemned (4:2), and the visibility and tangibility of the incarnate Word are specifically spelled out (1:1–3). Moreover, the play on old commandment versus new (1 John 2:7–8) seems to presuppose the new commandment of the Gospel (13:34). Because of 1 John's sometimes more primitive aspects, for example, its eschatology and concept of vicarious, blood atonement, the Gospel is sometimes thought to be later. More probably, however, 1 John represents a return to earlier standpoints in view of potential problems in the interpretation of the Gospel.

The other two Johannine letters, each no more than a page long, are similar to 1 John and to each other, but they also betray some striking differences. While 3 John names the recipient, Gaius, 2 John is addressed only to "the elect lady and her children." In the conclusion, the "children" of her "elect sister" are said to send greetings. Probably this is a symbolic reference to churches. While the issues in 2 John are similar to those in 1 John, 3 John deals with hospitality offered by churches to visiting emissaries of the Elder and upbraids the ambitious Diotrephes, possibly the head of a house-church, who has refused to extend such hospitality. Interestingly enough, 2 John instructs its readers not to extend hospitality to those who do not adhere to true doctrine.

In the earliest canonical lists, dating from the end of the second century, 1 John already appears. Indeed, 1 John is quoted as authoritative by Bishop Polycarp of Smyrna before the middle of the second century. The attestation of 2 John is almost as good. There is no second-century reference to 3 John, but this is not surprising, since it deals with a specific, local issue. Probably it was eventually included with 1 and 2 John because it was known to be the work of a notable authority in the church. ***See also*** Beloved Disciple, The; Diotrephes; Johannine Literature, The; John, The Gospel According to; John the Apostle; Revelation to John, The.

OUTLINE OF CONTENTS

The First Letter of John

1 John has no clearly defined structure, but its essential content can be represented in the following way:

- I. Prologue: the grounds of the testimony (1:1–4)
- II. The true message of Jesus (1:5–3:24)
  - A. Fellowship, obedience, and forgiveness (1:5–2:17)
  - B. Warnings against false teachings (2:18–28)
  - C. The marks of life in the community (3:1–24)
- III. Testing the claims of those who testify (4:1–5:12)
  - A. Testing the spirits (4:1–6)
  - B. Love as the essential test (4:7–21)
  - C. Obedience to the commandments (5:1–5)
  - D. The true testimony (5:6–12)
- IV. Postcript: sins, forgiveness, and certain knowledge (5:13–21)

The Second Letter of John

- I. Salutation (1–3)
- II. The love commandment and the true doctrine of Christ (4–11)
- III. Conclusion (12–13)

The Third Letter of John

- I. Salutation (1–4)
- II. Hospitality to emissaries (5–12)
- III. Conclusion (13–15)

John the Apostle, the son of Zebedee and brother of James. Along with James, John was called by Jesus to be one of the Twelve (Matt. 4:21–22; Mark 1:19–20; Luke 5:10–11) while they were fishing. His name appears in each of the apostolic lists (Matt. 10:2; Mark 3:17; Luke 6:14; Acts 1:13). Some think that Mark's reference to "hired servants" indicates a prosperous

family background (Mark 1:20). John and James receive from Jesus the nickname "Boanerges," meaning "sons of thunder" (Mark 3:17). Their prominence among the Twelve is indicated by their presence, along with Peter, at the raising of Jairus's daughter by Jesus (Mark 5:37; Luke 8:51), at the transfiguration of Jesus (Matt. 17:1; Mark 9:2; Luke 9:28), and with Jesus in the Garden of Gethsemane (Matt. 26:37; Mark 14:33). According to Luke 22:8, John and Peter are instructed by Jesus to make the preparations for the Passover. James and John (or their mother) ask special consideration upon the advent of the messianic kingdom (Matt. 20:20–23; Mark 10:35–40). All of this indicates that John was close to Jesus. It is John who complains about the exorcist (Mark 9:38; Luke 9:49), and James and John request that the unresponsive Samaritan village be destroyed (Luke 9:54). Paul attests to John's prominence by referring to him as one of the "pillars" of the Jerusalem church (Gal. 2:6–10). In spite of these and a few other references to John in the NT, the data necessary for a fuller sketch of his life, character, and activities do not exist.

Further attestation to John's prominence among the apostles is evidenced by the fact that he is traditionally regarded as the author of the Fourth Gospel, of the three canonical letters bearing his name, and of the book of Revelation. That John the Apostle wrote the Fourth Gospel is by no means certain. Patristic evidence tends to identify John with the Fourth Gospel beginning with the church father Irenaeus (late second century), who adopts the view of his teacher, Polycarp. This tradition, coupled with recent studies on the early dating of the superscriptions (titles) of the Gospels, lends some support to the view that the Fourth Gospel was written by John the Apostle or by his disciple(s). Even so, one must still proceed cautiously, because the Gospel bears no signature, nor is the author identified therein. Furthermore, significant differences between the portrayals of Jesus in the Fourth Gospel and in the Synoptics must be kept in mind. Attempts to link John the Apostle with "the beloved disciple" (John 13:23; 19:26; 20:2; 21:7, 20–24), though not impossible, are nevertheless conjectural. The situation is further complicated by the relationship between "the beloved disciple" and the unnamed "other" disciple in John 1:40 and 18:15–16. Similar difficulties surround attempts to link the author of the three Letters of John (particularly 2 and 3 John) to John the Apostle. Although tradition has identified the John of Revelation (1:1, 4, 9) with John the Apostle, many scholars seriously question this association.

According to some traditions, John survived until ca. A.D. 100 in Ephesus, but it is also possible that he was martyred much earlier, along with his brother James. ***See also*** Apostle; Beloved Disciple, The; Boanerges; Disciple; Jairus; James; John, The Gospel According to; John, The Letters of; Revelation to John, The; Twelve, The; Zebedee. P.L.S.

John the Baptist, or John the Baptizer, an important figure in each of the four NT Gospels. He is identified with the beginning of Jesus' ministry and understood as the forerunner to Jesus the Messiah. Reference to John is the first point of convergence among the canonical Gospels, all of which give a somewhat similar account of his person, preaching, and activity, though varying in detail.

John's Ministry: Historically, the account of John in each of the Gospels indicates that his was apparently an effective and successful ministry in its own right (Matt. 3:5–6; Mark 1:5). Considerable care is taken to maintain the distinctive character of Jesus' activity in relation to that of John. In Matthew, Mark, and Luke, John is arrested and imprisoned before Jesus' public ministry begins (Matt. 4:12; Mark 1:14; Luke 3:20). In the Fourth Gospel, although Jesus begins his ministry before John's arrest (John 3:23–24), the relationship between the two is clarified in the prologue (1:6–9) and elsewhere (1:19–23). In each case, John's words convey his recognition of the one greater than himself who is to come baptizing not with water but with the Spirit (Matt. 3:11–12; Mark 1:7–8; Luke 3:16–17; John 1:26–27). In Matt. 3:13–15, John is reluctant to baptize Jesus and must be encouraged by Jesus to do so. The care with which the authors seek to clarify the roles of and relationship between these two figures suggests that, because of the impact of John's ministry and the close proximity of John and Jesus, there was a distinct possibility of the readers confusing the two men and their ministries. Indeed, when Herod, after having had John beheaded, is informed of Jesus' ministry, his first thought is that John has come back to life (Matt. 14:1–12; Mark 6:14–29; Luke 9:7–9). Further attestation to the effectiveness of the ministry of John the Baptist is found in Acts, where on two occasions Christians encounter disciples of John who, after being further instructed, are received into the church (Priscilla and Aquila meet Apollos in Acts 18:24–28, and Paul meets twelve such disciples, perhaps associated with Apollos, in Acts 19:1–7). Thus, the prominence of John's ministry is attested by the care with which the Gospel writers compose their accounts of him, the fact that Herod deemed it necessary to have him killed (the historian Josephus also reports, with somewhat different details, that John was executed by Herod in the fortress of Machaerus near the Dead Sea), and the fact that some years after Jesus' death Christians still encountered people (in Asia Minor!) who knew only "the baptism of John."

Prophet: The portrayal of John in the canonical Gospels is that of a prophet who came out of the desert to proclaim the advent of the King-

John the Baptist; ninth-century mosaic from Hagia Sophia, Istanbul.

dom of God and issue a call to repentance (Matt. 3:1–12; Mark 1:4–8; Luke 3:1–20). According to Luke, he was of priestly descent, the son of Zechariah and Elizabeth (1:5–80; 3:2), and John and Jesus were related (1:36). Matthew and Mark describe John's appearance and diet: he wore a camel-hair cloak with a waist belt made of leather and he dined on locusts and wild honey (Matt. 3:4; Mark 1:6). He baptized those who repented of their sins and announced the coming of one after him who would be greater than he and would baptize with the Spirit. Thus, John is cast into a role like Elijah's (Matt. 17:10–13; Mark 9:11–13; Matt. 11:7–15; cf. Mal. 4:5–6; Ecclus. 48:10), that is, he is the austere one who prepares for and announces the advent of the Messiah (John 1:6–8, 19–36). Luke 1–2 most clearly balances John's role with that of Jesus by his presentation of John traditions in parallel with Jesus traditions, a parallelism that echoes the story of Abraham and Sarah (Gen. 17:15–21; 18:1–15; 21:1–8).

Scholars have noted the possibility that John knew of and perhaps was even associated with the Qumran community (which produced the Dead Sea Scrolls). The location of his ministry, content of his preaching, interest in water purification, and lifestyle all point to similarities between John and the Essenes. It has also been suggested that, prior to the beginning of his own ministry, Jesus may have been among the followers of John. All such conclusions remain speculative, however. ***See also*** Elijah; Elizabeth; Essenes; Forerunner; Herod; Machaerus; Salome; Scrolls, The Dead Sea; Wilderness; Zechariah.

P.L.S.

Joiada (joi´uh-duh; Heb., "Yahweh knows"). **1** The son of Paseah and one of the builders of the wall of Jerusalem under Nehemiah (Neh. 3:6; KJV "Jehoiada"). **2** A postexilic high priest, the son of Eliashib and the father of Jonathan (Neb. 12:10–11, 22), also called Jehoiada in Neh. 13:28.

Joiakim (joi´uh-kim; Heb., "Yahweh will raise up"), a shortened form of Jehoiakim, the son of Jeshua, the high priest in Jerusalem following the return from the Exile; he succeeded his father as high priest (ca. 500–450 B.C.?; Neh. 12:10, 12, 26).

Joiarib (joi´uh-rib; Heb., "Yahweh will contend"), a shortened form of Jehoiarib. **1** A Levite teacher who met Ezra at the Ahava River and was commanded to return to Jerusalem from Babylon (Ezra 8:16). **2** A Judahite ancestor of Maaseiah, a postexilic inhabitant of Jerusalem (Neh. 11:5). **3** Apparently the father of Jedaiah, a priest who lived in postexilic Jerusalem (Neh. 11:10). However, a parallel passage (1 Chron. 9:10) omits "son of" and lists Joiarib (Jehoiarib) as one of the priests along with Jedaiah. **4** A priest who returned from the Babylonian captivity with Zerubbabel (Neh. 12:6); possibly the same as 3 above. **5** A postexilic family group headed by Mattenai (Neh. 12:19).

D.R.B.

Jokneam (jok´nee-uhm), a Canaanite city in Carmel (Josh. 12:22). It was located in the territory of Zebulun and marked its limits (Josh. 19:11). It was assigned to the Levites from among the cities in Zebulun according to Joshua (21:34); according to 1 Chronicles, where it is spelled Jokmeam, it was among the cities in Ephraim (6:68). The toponym Jokmeam also occurs in 1 Kings 4:12. It is located six miles northwest of Megiddo at modern Tel Qaimun.

Jokshan (jok´shan), the second child of Abraham and his second wife, Keturah (Gen. 25:2; 1 Chron. 1:32), and the father of Sheba and Dedan (Gen. 25:3; 1 Chron. 1:32). Different parentages are assigned elsewhere for Sheba and Dedan (Gen. 10:7, 28), and identity with the Joktan of Gen. 10:28 seems unlikely.

Joktan (jok´tan), a descendant of Shem and the brother of Peleg, whose thirteen sons are

generally to be identified with various Arabian tribes (Gen. 10:25–30).

Jonadab (joh´nuh-dab; Heb., meaning uncertain, perhaps "Yahweh is noble"), a shortened form of Jehonadab. **1** The son of Shimeah (Shimea), David's brother, and cousin of Amnon, David's son. He gave Amnon the plan that led to Amnon's rape of Tamar, his half-sister (2 Sam. 13:3–5). It is possible that he is the same nephew of David elsewhere (erroneously?) called Jonathan (2 Sam. 21:21; 1 Chron. 20:7). **2** The son of Rechab, the founder of the Rechabites, a strict religious sect characterized by adherence to traditions, abstinence from wine, and nomadic life style. Since Jonadab is referred to as the authority for the rules of this group (Jer. 35:6), he probably effectively organized the sect. Jeremiah praised the strictness with which the later descendants of the group followed the traditions established by Jonadab in contrast to the infidelity that Judah and Jerusalem had shown to God (Jer. 35:1–19). The religious zeal characteristic of the group is perhaps reflected in Jonadab's (here Jehonadab) accompaniment of Jehu in his chariot as he killed those loyal to the apostate Ahab (2 Kings 10:15–17) and then attempted to exterminate the worshipers of Baal (2 Kings 10:18–25). ***See also*** Amnon; Jehonadab; Jonathan; Rechab. D.R.B.

Jonah (joh´nuh), **the Book of,** an OT book, fifth of the Minor Prophets. Jonah, the son of Amittai, was an eighth-century B.C. Israelite prophet. He is mentioned in 2 Kings 14:25 as God's "servant" from Gath-hepher in Galilean Zebulun, who prophesied Israel's expansion under Jeroboam II (785–745 B.C.). The protagonist of the book of Jonah, however, is widely held to bear only the loosest connection to the historical Jonah. Rather, the book has the character of a parable, dealing with paradoxes and ambiguities in the relationship between the prophet, repentant sinners, and God. Often dated to postexilic times (late sixth century B.C. or later), the work bears thematic affinities to Genesis, Exodus, the Deuteronomistic History (Deut.–2 Kings), and Psalms, among others, and to other prophetic books.

Content: According to the story, Jonah was commanded by God (1:1–2) to warn Nineveh in Assyria of its great evil. Jonah, however, fled, boarding a ship to Tarshish that God then assailed with a storm. The sailors called upon their gods, desperately casting lots to learn who was responsible for the divine wrath. Jonah, slumbering in the hold, was singled out. He instructed the crew to cast him overboard. The sailors, though reluctant to take a human life, complied, and the storm subsided, whereupon the sailors offered thanks to God (1:3–17). God then appointed a great fish to swallow Jonah. Inside the fish, Jonah burst into prayer, essentially a psalm of deliverance, stressing the terrors of the ocean depths and the gratitude of one delivered from death. The fish then vomited Jonah alive onto dry land (2:1–11).

After Jonah's rescue, God again commanded Jonah to warn Nineveh. Jonah now complied, with unexpectedly spectacular results, bringing the Ninevites and their animals(!) to total repentance in sackcloth and ashes by a single brief oracle (chap. 3). But Jonah brooded angrily, apparently disappointed that divine mercy left his oracle of judgment unfulfilled. God grew a castor plant (Heb. *qiqayôn*) over Jonah, providing him shade from the sun's heat, but turned Jonah's comfort to distress by causing the plant to wither (4:1–10). "You are concerned about the bush," said God, "for which you did not labor . . . and should I not be concerned about Nineveh, that great city, in which there are more than a hundred and twenty thousand persons who do not know their right hand from their left, and also many animals?" (4:10–11, NRSV).

Interpretation: Modern investigators differ on the story's meaning. Some hold it to deal with Israel's mission, never fully embraced by Jonah, to preach God's universal mercy to non-Israelite nations. The work, in this light, suggests a polemic against the alleged narrow nationalism of Ezra's postexilic community. Others, with

OUTLINE OF CONTENTS

The Book of Jonah

- I. Jonah's call and flight (1:1–17)
  - A. God tells Jonah to preach repentance to Nineveh (1:1–2)
  - B. Jonah takes a ship in the opposite direction (1:3)
  - C. Jonah is cast from the storm-wracked ship (1:4–16)
  - D. Jonah is swallowed by the great fish (1:17)
- II. Jonah in the great fish (2:1–10)
  - A. Jonah's prayer (2:1–9)
  - B. Jonah is put on dry land by fish (2:10)
- III. Jonah as preacher of repentance (3:1–10)
  - A. Jonah preaches repentance to Nineveh (3:1–5)
  - B. Nineveh repents and God has mercy on the city (3:6–10)
- IV. The aftermath of Nineveh's repentance (4:1–11)
  - A. Jonah disappointed by God's mercy (4:1–5)
  - B. God grows castor plant over Jonah, then withers it, causing Jonah discomfort (4:6–9)
  - C. God's question to Jonah (4:10–11)

some justice, see an intra-Israelite message concerned with divine mercy and the power of repentance. The book also stresses a change in a prophet's role from a deliverer of oracles to a persuader: since God's decrees can be reversed by repentance, the prophet must preach to arouse change of heart. Literary interpreters note the story's intensive wordplays, its thematic coherence despite frequent shifts of style and perspective, its elaborate intrabiblical allusions (cf. 4:2 to Exod. 34:6–7; Pss. 86:15; 103:8; 111:4; 112:4; Joel 2:13; and, more generally, 3:1–4:11 to Joel 2:1–17), and its artfully contextual use of divine names. Still others have pointed out the book's satirical or parodic nature, suggested by its fanciful exaggerations and plot absurdities (e.g., the prophet's virtually comic retreat from his mission, the uncommonly rapid willingness of the story's pagans to obey Israel's God, and the amusingly excessive nature of their penances), which represent subversive reshaping of traditional tales of a prophet. The book's unique ending, however—a divine question addressed to Jonah, who does not answer—turns this playful narration to impressive effect, leaving readers with a question only they can answer, and thus with a sense of the mystery of divine plan.

The work was interpreted allegorically by Jewish and Christian readers. It is read publicly by Jews on the Day of Atonement to mirror the experience of repentant worshipers. In Matt. 12:39–41, Jonah 2 is cited to prefigure Jesus' death and resurrection. Jewish Kabbalists in late medieval times saw it as a paradigm of general resurrection. ***See also*** Prophet; Nineveh.

Jonas (joh´nuhs). ***See*** Jonah, The Book of.

Jonathan (jon´uh-thuhn), the most important son of the first king of Israel, Saul, and David's bosom friend. Jonathan lived in the second half of the eleventh century B.C. This prince figures in 1 Sam. 13–31, and first appears in chaps. 13–14 as a grownup and commander-in-chief directly under Saul. In his military capacity, Jonathan provoked war with the Philistines, the enemy on the coast, though Israel was weak and badly armed at that time (the Philistines had a monopoly on forged iron). With the outbreak of hostilities, the enemy swept over central Palestine and, to make matters worse, Saul came into conflict with Samuel, the prophet who had anointed him king. However, inspired by the courage of his exceptional trust in God, Jonathan managed to climb what was considered an impregnable rocky mount and eliminated a Philistine watchpost. The psychological shock of this success brought with it a reversal in the battle. Saul, however, became jealous, forfeited the victory on account of excessive religious zeal, and made a scapegoat of his son Jonathan who had severely criticized him. Saul hoped to have his son executed; but at the last moment the soldiers intervened to save Jonathan.

As soon as Jonathan, one round of war later, saw the military prowess of David (who slew Goliath), he acknowledged him as his peer, grew affectionate toward him, and symbolically assigned to him his own rights to the throne. Furthermore, he demonstrated deep friendship and loyalty to David: twice he tried to mediate on his behalf with Saul, the king, and to protect his friend against his father's jealousy. In so doing, Jonathan risked a breach with his own father. In addition, when David was forced to flee the court, Jonathan concluded a special covenant-pact with him, whom he recognized as God's chosen one.

In the final battle on Mt. Gilboa where the Philistines settled accounts with Saul's army, Jonathan did his duty as a warrior and died together with his father. David honored him as a hero and celebrated his noble character and selfless behavior by dedicating the climax of his dirge in 2 Samuel 1 to his friend: "Your love to me was wonderful, / passing the love of women." ***See also*** David; Saul. Joppa (jop´uh; Heb., "beauty"), an important harbor in ancient Palestine. Today it is a suburb of modern Tel Aviv. Occupation began as early as the Middle Bronze Age (1900–1500 B.C.), with a large fortified enclosure with a beaten earth rampart found on the site. It was first mentioned in the victory list of Pharaoh Thutmose III (ca. 1468 B.C.). The city is subsequently characterized as an Egyptian stronghold in the Tell el-Amarna tablets. During excavations of the site of ancient Joppa a thirteenth-century B.C. citadel gate was uncovered, which had dressed stones with titles and an inscription mentioning Pharaoh Rameses II (ca. 1304–1237). The city is mentioned along with Azor, Bene-berak and Beth-dagon as having been under the influence of Sennacherib in the "prism stele" (701 B.C.).

According to the OT, this city was allotted to the tribe of Dan (Josh. 19:46). It was also the port through which the cedars of Lebanon came

for the construction of both the First and Second Temples (2 Chron. 2:16; Ezra 3:7). It was from this port that the prophet Jonah sailed in his attempt to evade God's command to him (Jon. 1:3). It was also in Joppa that Peter raised the dead Dorcas (Acts 9:36–43).

This city also has a place in Greek mythology. The Greek legend of Perseus and Andromeda was supposed to have taken place in the Sea of Jaffa. The inscription of Eshmunazar of Sidon (probably fifth century B.C.) would indicate that the city was under the control of the king of Persia during that time. The city was colonized by the Greeks in the Hellenistic period (333–63 B.C.). The Zenon papyri, a travel diary of an Egyptian treasury official who visited Palestine (ca. 259/58 B.C.) during the reign of Pharaoh Ptolemy II, makes reference to the city. The Seleucids captured the city in the Hasmonean period (ca. 175–63 B.C.). It was destroyed by the Romans on more than one occasion, first by Cestius Gallus and then by Vespasian.

The site was excavated in 1948–50 by P. L. O. Guy for the Palestine Exploration Fund and later, in 1952, J. Bowman and B. S. J. Isserlin did additional work in the area on behalf of the University of Leeds. In 1955 J. Kaplan excavated the site in an expedition sponsored by the Museum of Antiquities, Tel Aviv-Jaffa. S.B.R.

Joram (jor´uhm; Heb., "[Yah] God is high"). **1** The son of King Toi of Hamath (2 Sam. 8:10). **2** A Levite (1 Chron. 26:5). **3** A short form of the name Jehoram. ***See also*** Jehoram.

Jordan (johr´duhn) **River, the** (Heb. *ha-yarden*), a river that runs from north of the Sea of Galilee to the Dead Sea. Occupying two-thirds of the deep rift valley between Israel and Jordan, i.e., the Palestinian section of the rift valley system that extends from southern Turkey about thirty-five hundred miles (5,600 km.) to the Zambesi in southeast Africa, it is the world's lowest river, flowing mainly well below sea level. Except just north of the Sea of Galilee, the valley is enclosed between steep mountain walls; the eastern side is usually higher and more precipitous and provides most of the tributaries, since the plateau edge receives heavier rainfall than the Palestine highlands. The whole valley is in a rain shadow, since the rain-bearing westerly winds in winter are warmed and dried by their rapid descent. Average annual rainfall at Dan in the north is 24 inches (600 mm.), at the Sea of Galilee 16 inches (400 mm.), and at Jericho 5 inches (125 mm.). Heavy rain can sometimes occur, even far south, causing the desolate wastes to blossom amazingly. Summers are exhaustingly hot, but the winters pleasantly warm.

The major headwaters come from the slopes of Mount Hermon, the Hasbani being the most northerly, and the Liddani, near Dan (modern Tell el-Qadi), and Banyasi at Paneas (Banyas), both at the southern foot, being the strongest. The smallest, the Bareighit, rises just north of modern Metullah. Cut off from the north by a sudden change in height, the Bareighit was usually a political frontier, and its sanctuaries amidst the rich forest were renowned. The oracle at Abel (modern Tell Abil; 2 Sam. 20:18), the royal high place at Dan (1 Kings 12:29; Amos 8:14), the sacred cavern at Paneas, and NT Caesarea Philippi, where Peter first recognized Jesus as the Christ (Mark 8:27–29), are all located along it.

The streams once meandered through a papyrus marsh, with fauna and flora often similar to those of the Sudan, to the shallow Lake Huleh, 250 feet (76 m.) above sea level. All this, however, is now drained. Crossing was possible only just south of the lake, where the Damascus road came to join the north-south route that passed further to the west. Guarding the junction was the great Bronze Age city of Hazor, which "formerly was the head of all those kingdoms" (Josh. 11:10), destroyed by Joshua, but fortified again by Solomon (1 Kings 9:15), and even more strongly by Ahab. South of Huleh the river descends 945 feet (290 m.) through a narrow gorge, sometimes 1,000 feet (300 m.) deep, cut through a basalt outflow. Beyond the basalt is the Sea of Galilee (Lake Tiberias), 695 feet (212 m.) below sea level, roughly heart-shaped and twelve miles long by seven wide (18 by 12 km.). The encircling hills leave room for a shoreline track, widest at the little plain of Gennesaret in the northwest.

Mentioned in the OT only as a border (Num. 34:11; [Heb. *kinneret*] Josh. 11:2), the lake bustled with life in Roman times, exporting lake fish and grain from the eastern plateau. Capernaum, the center of Jesus' activity, is in the northwest, with Bethsaida, the birthplace of Philip, Andrew, and Peter (John 1:44), located at modern al-'Araj, just across the Jordan mouth. Tiberias, then a busy gentile city with famous hot springs, was apparently never visited by Jesus. On the basalt plateau northward

Waterfall at the headwaters of the Jordan River.

are the ruins of Chorazin, one of the cities condemned by Jesus (Matt. 11:21), and east of the lake was Gergasa and the Decapolis city of Hippos. The scene of the healing of the Gadarene demoniac is unknown but may be on the southeastern shore.

The Jordan then meanders for about two hundred miles (320 km.) to the Dead Sea, though the direct distance is only sixty-five miles (105 km.). Twenty miles (32 km.) south of the lake the mountains close in from both sides, creating a narrow "waist" to the valley. Immediately south of the lake the river is joined by the Yarmuq from the east, as large as the Jordan itself, with the fine Roman baths at Hammamat Gader a few miles above the confluence. Then further southward come the 'Arab, the Taiyebeh, the Ziqlab, and the Yabis, just north of which is the Decapolis city of Pella (Khirbet Fahil) with impressive early Christian and Muslim ruins. Jabesh-gilead, famous in the saga of Saul (1 Sam. 11:1–11; 31:8–13), was either at the entrance to the Wadi Yabis or at Tell Miqlab further upstream. At the narrow "waist" the Kufrinje descends from the Ajlun mountains, towering 4,000 feet (1,220 m.) above the valley. Westward the Harod comes from Jezreel, the only lowland breach in the Palestine mountains, the entrance guarded by Beth-shan (Arabic Beit Shean), later called Scythopolis.

Immediately south of the "waist" the 'Faria joins the Jordan from the west, and the much larger Jabbok (Gen. 32:22; modern Zerqa) from the east. Close to the confluence is Adam (modern Tell ed-Damiyeh; Josh. 3:16). Just north of the Jabbok is Tell Deir 'Alla, an important Bronze Age (3000–1250 B.C.) sanctuary, perhaps the site of the "altar of great size" (Josh. 22:10). A desert climate now prevails, and the river wanders in a thick jungle of tamarisk and other shrubs through the Zor, the "pride" (RSV: "jungle") of Jordan (Jer. 12:5; Zech. 11:3). On either side are the gray, desolate badlands of the Qattara, and beyond them the downward sloping plain of the Ghor. The base of the highlands was intensely cultivated wherever there were springs. On the west was Jericho (modern Tell es-Sultan) with striking early Neolithic (ca. 8000–4000 B.C.) defenses, but apparently not a walled city in the time of Joshua, and also the Roman settlements of Phasaelis (Khirbet Fasayil) and Archelais (Auja et-Tahta). The site of Gilgal is, alas, still obscure. On the eastern springline are the well-watered "plains of Moab" (Num. 22:1). The "waters of Nimrim" (Isa. 15:6) flow down the Wadi Shu'eib. The Wadi Kufrein supplied Abel-shittim (modern Tell el-Hammam; Num. 33:49; Josh. 2:1 [Shittim]; Mic. 6:5), and the Wadi Hesban fed Bath-peor (or Baal-peor; Deut. 3:29; Josh. 13:20; Hos. 9:10). The location of "Bethany beyond Jordan," where John baptized Jesus (John 1:28), is unknown, but the traditional site is modern el-Mughtas, six and a

half miles (10 km.) north of the Dead Sea. ***See also*** Abel; Adam; Ahab; Bethany; Bethsaida; Beth-shan; Caesarea Philippi; Capernaum; Chorazin; Dan; Gilgal; Hazor; Hermon; Jabbok; Jabesh, Jabesh-gilead; Jericho; Pella; Solomon.

D.B.

Joseph (joh'sif), the name of several men who figure prominently in the biblical narrative. **1** The oldest son of Rachel, favorite wife of the patriarch Jacob. Joseph appears in the tradition as one of the fathers of the tribes of Israel (Gen. 49:22–26). The tribe of Joseph divided into Ephraim and Manasseh when, in the history of the tribal league, Levi left the tribal structure (Gen. 48:8–22).

Joseph plays the central role in a novella, Gen. 37:1–47:27, and in a collection of narrative traditions in Gen. 47:28–50:26. One problem in the history of Pentateuchal traditions is the relationship between the saga tradition about the patriarchs in Genesis (Jacob in Canaan) and the saga tradition about Moses in Exodus (the sons of Israel in Egypt). The Joseph novella constitutes a link between those two saga traditions.

As is typical for the tradition about the patriarchs in Canaan, the Joseph novella builds its plot around a problem created by strife in the patriarchal family. The narrative characterizes each member of the family as a party to the strife. Joseph appears initially as a spoiled son, favored by his doting father, proud of his pre-eminence. The father adds to the explosive atmosphere of the family by giving his favorite son a piece of clothing that marks his pre-eminence and by freeing him from the responsibility carried by the other sons for work with the family flocks. The brothers succumb to sibling jealousy and seek an occasion to rid the family of their troublemaker. Their resolve increases when Joseph reports dreams that confirm his pre-eminence. Their anger breaks into open violence when Joseph leaves the protection of the father in order to seek out the brothers' condition. Their initial plan to kill him changes to a more economically advantageous plan to sell him to passing merchants; yet the sale is tantamount to killing him.

The narrator alerts the audience that the issue has not yet been resolved, however. The merchants sell Joseph in Egypt. Genesis 39–41 constitutes a self-contained story about Joseph as the wise and prudent administrator who rises from servant in a private household to vizier in Pharaoh's court. As second in command over the entire kingdom, Joseph receives responsibility from Pharaoh to administer grain reserves in a time of famine. But specifically, the story depicts the standards for judging an effective administration in the king's court. All administrators should be as wise and prudent as Joseph. This story about the ideal administrator derives from royal wisdom tradition, a guide for developing effective court officials. As a distinct story, it was available for use by the author of the Joseph novella as an explanation of Joseph's transition from brother at the mercy of jealous brothers to brother with power over jealous brothers.

Joseph administers the grain reserves during the famine for the benefit of the Egyptians and, indeed, for all the people of the world. Ironically, the famine forces Joseph's brothers to travel to Egypt in order to buy enough grain to sustain their families. In Egypt they stand at the mercy of Joseph whom they do not recognize but who recognizes them. After two accounts depicting the brothers as subject to the whim of Joseph, Joseph finally reveals his true identity. Reconciliation between the brothers occurs, and Jacob with all the families in Canaan comes to Egypt. The family reunion effects reconciliation of a family once at war within itself.

The storyteller affirms that the reconciliation occurs by the hand of God (45:7, 8, 9). God led Joseph to Egypt, to his place of power, so that the family might live through the famine. Now, brothers who once hated Joseph embrace him and share news of their father. Joseph, who lost his position in the family because of the brothers' jealousy, provides for the entire family and, indeed, saves them from death in the famine. If the strife in Israel characteristic for an entire history is represented by the strife in the family at the beginning of the Joseph story, then the reconciliation at the denouement represents a reconciliation for the striving brothers of Israel. In the view of the theologian who composed the novella, God intends his people to be together, a single family. Joseph, the ancestral father of the leading tribe in the north, effects that reconciliation.

The narrative framework for the Joseph story, however, suggests that the reconciliation effected by the Joseph transaction did not work. The narrative from the end of the Joseph novella to the end of Genesis depicts the family as deceptive and distrusting, indeed, as untrustworthy. When the father dies, the brothers approach Joseph with a plea for pardon based on a request of the father before he died. The tradition, of course, contains no such request from Jacob and clearly asserts that the brothers have manufactured their story to Joseph just as earlier they manufactured their story to Jacob. The author of the framework argues that reconciliation has not yet occurred, that the family is as broken as it ever was. Reconciliation cannot be found, according to the larger context, in the patriarchal traditions.

2 The father of the Igal who was one of the spies Moses sent into Canaan (Num. 13:7).

3 A musician in the service of David (1 Chron. 25:2, 9).

4 A priest in the time of Joiakim (Neh. 12:14).

5 One of the sons of priests who in the time of Ezra put away the foreign women they had married (Ezra 10:42).

6 The son of Jacob (Matt. 1:16) or Heli (Luke 3:23), the husband of Mary (Matt. 1:16), and, in the eyes of his compatriots, the father of Jesus (Luke 4:22; John 1:45; 6:42). A descendant of David (Matt. 1:20), his unwillingness publicly to set aside his pregnant betrothed showed him to be a just man (Matt. 1:19). The notion that he was an older man when he married Mary has no basis in the Gospel accounts—this tradition probably arose to account for Joseph's absence in the Gospel narratives about the mature Jesus.

7 A high-ranking (Luke 23:50), rich (Matt. 27:57), and honorable (Mark 15:34) Jew who wrapped the body of the crucified Jesus in a linen shroud and buried him in a tomb newly cut from rock (Luke 23:53), perhaps the tomb he had had prepared for himself (Matt. 27:60). That he was a disciple of Jesus (Matt. 27:57; John 19:38) is not mentioned by either Luke or Mark.

8 The name of three ancestors of Joseph, the husband of Mary (Luke 3:26, 30, 34).

9 A follower of Jesus, also called Barsabbas, surnamed Justus, who was not chosen to replace Judas as one of the twelve disciples when he, along with Matthias, was put forward for that position (Acts 1:23).

10 An early Christian, surnamed Barnabas (Acts 4:36), who along with Saul (Paul) was sent on a missionary journey by the church in Antioch (Acts 13:2). A later dispute over a traveling companion led them to go their separate ways (Acts 15:36–39).

11 One of the sons of Mary and a brother of Jesus (Matt. 13:55) who bore the Greek rather than the Hebrew form of the name (Joses; Mark 6:3). Perhaps the Joses mentioned as a son of Mary in Matt. 27:56 and Mark 15:40, 47 is the same brother of Jesus. ***See also*** Genesis; Hexateuch; Jacob; Patriarch.

Josephus (joh-see´fuhs), Flavius Josephus or Joseph ben Matthias, the single most important Jewish historian in the early Roman period. He was born of a priestly family in the first year of the emperor Gaius (A.D. 37–38) and also claimed descent from the Hasmoneans. In his twenty-sixth year (A.D. 63–64) he served on an embassy to Rome. During the revolt against Rome that began in 66, he led the revolutionary forces in Galilee until he was captured by the Roman general Vespasian at Jotapata (A.D. 67). After his capture, he predicted that Vespasian would become emperor. When the prophecy was fulfilled, he was released. For the remainder of the

Harvesting grain with sickles. (In the Genesis narrative Joseph administers the grain reserves for Pharaoh.) From the tomb of Mennah, scribe of Thutmose IV, ca. 1390 B.C.

war he served as an interpreter for the Romans. He spent the rest of his life in Rome, engaged in literary activity under imperial patronage. He died ca. A.D. 100.

While in Rome Josephus produced works, four of which have survived. *The Jewish War* is an account in seven books of the Jewish revolt, prefaced with a brief survey of Jewish history from the second century B.C. *The Antiquities of the Jews* is a twenty-volume work, the first half of which paraphrases the Jewish scriptures, while the second half records, in greater detail than in the *War*, the postbiblical history of the Jews. *Against Apion* is an apologetic work in two books refuting slanders leveled against the Jews during the Hellenistic period. The brief *Life*, an appendix to the *Antiquities*, provides general autobiographical information but focuses on Josephus' period of revolutionary leadership in Galilee. Josephus also composed an Aramaic account of the Jewish revolt which has not survived.

Throughout his works, Josephus strove to elicit sympathy for his people, and to make Jewish traditions comprehensible to the Greco-Roman world. At the same time he attempted to blame the revolt on a fanatical minority of the Jewish people. H.W.A.

Joses (joh´siz; Gk., "Joseph"). **1** One of Jesus' brothers (Mark 6:3; cf. Matt. 13:53, "Joseph"). The meaning of "brothers" is debated. One view includes cousins and perhaps others, maintaining that Jesus was Mary's only child; other views hold that Jesus did have (half or even full) brothers and sisters. **2** A brother of James the younger (Mark 14:40, 47; cf. Matt. 27:56, "Joseph"), perhaps identical with 1. **3** The original name of Barnabas, Paul's co-worker (Acts 4:36). ***See also*** Barnabas; Brothers; James; Joseph.

Joshaphat (josh´uh-fat). ***See*** Jehoshaphat.

Joshua (josh´yoo-uh). **1** The dominant figure in the book of Joshua: the successor of Moses and the supervisor of Israel's conquest of Canaan and of the allotment of the land to the tribes. According to Num. 13:16, Joshua was an Ephraimite, originally called Hoshea and renamed by Moses. An Ephraimite genealogy is provided for him in 1 Chron. 7:20–27. He first appears in Exod. 17:8–13, where Moses appoints him to lead the battle against Amalek, which he does successfully. In Exod. 33:11 he appears as a young man serving as Moses' assistant in the tent of meeting. He urges Moses to restrict spirit-inspired behavior but is overruled by Moses (Num. 11:28–29). As one of the twelve spies sent to reconnoiter Canaan, he agrees with Caleb; Joshua and Caleb constitute the minority who recommend confidence in God and a direct assault (Num. 14:6–10). For this God exempts them from the general condemnation of that generation to death in the wilderness. God then tells Moses to lay his hands on Joshua and designate him a leader like Moses, who will be obeyed fully by all the people (Num. 27:18–23; cf. Deut. 34:9). In Num. 34:17 God tells Moses that Joshua, along with Eleazer and an officer from each tribe, will be responsible for allotting the land to the people. Moses publicly encourages Joshua and recognizes his future role in Deut. 31:7–8 (cf. 3:28; 31:3). Joshua is commissioned by God himself in Deut. 31:14, 23 and Josh. 1:1–9. The book of Joshua then relates how Joshua fulfilled his dual role as conqueror and distributor of the promised land, concluding with a notice of Joshua's death at the age of one hundred and ten and his burial in his allotted territory (Josh. 24:29–30; Judg. 2:8–9).

Many of Joshua's deeds are analogous to those of Moses, and the text says that God was with Joshua as with Moses (Josh. 3:9) and that Israel revered Joshua as they had Moses (4:14). Like Moses, the original Joshua probably would have had a much more restricted historical role. But the present, developed literary figure is of greater theological significance than any historical antecedent—as an archetypal leader, who by his faith and obedience to God accomplished his mission effectively and completely. He has some of the characteristics of a monarch and may have been modeled on or served as a model for such kings as Josiah. In later tradition Joshua is remembered for his great deeds (Ecclus. 46:1–8) and cited specifically for his obedience to the law (1 Macc. 2:55) and his intercession for Israel (2 Esd. 7:107). **2** A resident of Beth-shemesh on whose land the cows bringing the Ark from its Philistine captivity came to a standstill (1 Sam. 6:14, 18). **3** A governor of Jerusalem, after whom a gate was named during the late monarchical period (2 Kings 23:8). **4** An alternate form of the name Jeshua. ***See also*** Joshua, The Book of. S.B.P.

Joshua, the Book of, the sixth book of the OT, the first of the Former Prophets (the historical books of Joshua through 2 Kings). The book tells how the people of Israel came to possess the land promised to their ancestors (e.g., Gen. 13:15–17; 15:5, 7, 18–21; 17:2–8; 22:17–18; 26:2–4; 28:3–4, 13–15; 50:24). It begins with Joshua's commission by God after Moses' death (1:1–9). The tribes of Israel then enter Canaan by crossing the Jordan (3:1–17) and, beginning with Jericho, conquer the land (6:1–12:24), which is subsequently divided among the tribes (13:7–19:51) with six cities designated for refuge (20:1–9) and forty-eight cities reserved for the priestly tribe of Levi, which had no land (21:1–44). The eastern tribes are then dismissed to cross the Jordan, where they build an altar, nearly bringing about intertribal warfare. Once a diplomatic solution is reached, Joshua gives his farewell address and a great covenant ceremony at Shechem is conducted with all the tribes present (23:1–24:33).

OUTLINE OF CONTENTS

The Book of Joshua

- I. The conquest of Canaan (1:1–12:24)
  - A. Transfer of leadership to Joshua (1:1–18)
    - 1. God's commission to Joshua (1:1–9)
    - 2. Joshua's instructions to the people (1:10–18)
  - B. Entrance into Canaan (2:1–5:15)
    - 1. Reconnaissance of Jericho (2:1–24)
    - 2. Crossing the Jordan (3:1–17)
    - 3. Establishing a foothold at Gilgal (4:1–5:1)
    - 4. Circumcision and Passover (5:2–15)
  - C. Victory over Canaan (6:1–12:24)
    - 1. Destruction of Jericho (6:1–27)
    - 2. Failure and success at Ai (7:1–8:29)
    - 3. Renewal of the covenant at Mount Ebal (8:30–35)
    - 4. Other campaigns in central Palestine (9:1–9:27)
    - 5. Campaigns in southern Palestine (10:1–43)
    - 6. Campaigns in northern Palestine (11:1–23)
    - 7. Summary list of defeated kings (12:1–24)
- II. Distribution of the land (13:1–22:34)
  - A. God's instructions to Joshua (13:1–7)
  - B. Tribal allotments (13:8–19:51)
    - 1. Eastern tribes (13:8–33)
    - 2. Western tribes (14:1–19:51)
  - C. Cities of refuge and levitical cities (20:1–21:42)
  - D. Summary of conquest (21:43–45)
  - E. Dismissal of the eastern tribes (22:1–34)
- III. Conclusion (23:1–24:33)
  - A. Joshua's farewell address (23:1–16)
  - B. Covenant at Shechem (24:1–28)
  - C. Deaths of Joshua and Eleazar; burial of Joseph's bones (24:29–33)

As evident in the outline, much of the book presents a series of military victories by which a unified, twelve-tribe army under Joshua's leadership is able to conquer the entire land of Canaan (6:1–11:15). Yet this picture of success is not without tension. The military accounts focus primarily on the limited area of central Palestine, despite the sweeping claim that "all" the land was conquered (11:16, 23). In addition, the narrative relates Israel's inability to exterminate all the indigenous inhabitants, such as the Gibeonites (9:17–21) and the Jebusites (15:63; see also 11:22; 13:1–6; 16:10; 17:11–12; 19:40–47). Such failures are attributed to Israel's unwillingness or inability to fulfill all of God's directives (7:1–25; 9:1–27; 24:19–20).

Although some of the tribal allotments may reflect tribal divisions of the early monarchical period (late eleventh century B.C.), the bulk of the book was written and edited in the seventh and sixth centuries B.C. Joshua is presented as the ideal (royal?) military leader who takes his orders only from God and instructs the people on God's law. The model of faithful obedience under Joshua's leadership crumbles, however, in the following book of Judges, in which the people are described as locked in an endless cycle of failure and apostasy. Both books are part of a larger historical account that begins with Moses' address in Deuteronomy to the people as they are poised to enter the promised land and ends with the dissolution of the Southern Kingdom in 2 Kings 25 (the so-called Deuteronomistic History). ***See also*** Conquest of Canaan; Joshua.

Josiah (joh-*si*′uh; Heb., "Yahweh gives," "cures," or "brings forth"). **1** The son of King Amon by Jedidah, whom the people of the land made king of Judah at the age of eight after his father's assassination (639 B.C.). Josiah's reign during the last half of the seventh century B.C. lasted thirty-one years. The Assyrian Empire, which had previously dominated the region, was in its final decline, making the expansion and religious reform that characterized Josiah's reign possible. According to 2 Kings 23, the reform (ca. 620) was motivated by discovery of "the book of the law," generally considered some form of Deuteronomy; Chronicles, however, suggests that the reform had already started six years before. The relationship of Josiah's reform to that of Hezekiah almost a century earlier is also uncertain.

Josiah's religious actions included the removal of all traces of foreign worship and the elimination of all outlying places of worship, including those in Assyrian-controlled sections of what had been the Northern Kingdom (v. 15), thereby effectively centralizing all officially sanctioned religious practice in Jerusalem. Josiah entered into a covenant with God and observed a unique Passover in Jerusalem. His political accomplishments are manifest in the evidence of the kingdom's expansion, perhaps the result of an attempt to recreate the kingdom of David, an attempt made possible by Assyria's

weakened condition. Not only did Josiah remove shrines in Samaria (2 Kings 23:19) and Galilee (2 Chron. 34:6) as foretold in 1 Kings 13:2, but he apparently also expanded in other directions, as shown by the discovery of a Hebrew letter from this period at Yavneh Yam, a Judean fort on the Philistine coast of the Mediterranean Sea.

Josiah was killed in 609 B.C. at Megiddo while trying to block Pharaoh Neco II from helping the last remnant of the Assyrian Empire against the rising power of Babylonia (2 Kings 23:29). Whether this action was coordinated with Babylonia or undertaken on Josiah's own initiative is unknown. According to 1 Chron. 35:20–24, he was merely wounded at Megiddo and taken from there to Jerusalem where he died. He was succeeded by his sons Jehoahaz (2 Kings 23:30, called Shallum in Jer. 22:11), who was installed by the people, and Jehoiakim (Jer. 22:18, previously Eliakim according to 2 Kings 23:34), who was installed by Neco. Later his son Zedekiah (or grandson according to 2 Chron. 36:10), whose original name was Mattaniah, became Judah's last king (2 Kings 24:17).

Josiah's reign was a time of Judean national resurgence. The king was highly regarded by Jeremiah (Jer. 22:15), who lived during his reign as did the prophet Zephaniah (Zeph. 1:1; see also Jer. 1:2; 25:3; 36:2). Josiah was considered by the author of Kings to have been Judah's outstanding monarch (2 Kings 23:25).

2 The son of Zephaniah, a Jerusalemite homeowner who lived immediately after the Exile (mid-sixth century B.C.) (Zech. 6:10). ***See also*** Deuteronomy. F.E.G.

jot (KJV; RSV: "iota"), in Matt. 5:18 representing the equivalent of "i," the smallest letter in the Greek alphabet. In the KJV, it is combined with "tittle" (RSV, dot), which means a small part of a letter. The phrase as used by Jesus emphasizes that nothing will be removed from the law, not a letter, not even part of a letter, as long as heaven and earth endure.

Jotham (joh´thuhm; Heb., "Yah[weh] is perfect"). **1** The youngest of seventy sons of Jerubbaal (Gideon). He alone escaped when his brother Abimelech conspired to be crowned king at Shechem and killed the remaining sons of Jerubbaal (Judg. 8:29–9:5). After hearing that the men of Shechem had made Abimelech king (9:6) Jotham went to the top of Mount Gerizim near Shechem and, speaking loudly enough to be heard in the valley below, denounced the selection of Abimelech as king by telling the fable of the trees who foolishly selected a thorn bush as their king instead of a more worthy tree (9:7–21). The curse pronounced against the city of Shechem and Abimelech was fulfilled three years later by a civil war in which Shechem was leveled and Abimelech was killed by a millstone thrown from a wall (Judg. 9:22–57). **2** The son of Uzziah (Azariah), and king of Judah (ca. 750–734 B.C.). The sixteen years of his reign included about eight years in which he served as regent for his father, who was struck with leprosy (2 Kings 15:5, 7; 2 Chron. 26:16–27:1). Jotham was given a rather mediocre evaluation as king by the writer of the book of Kings and a slightly better rating by the Chronicler. He is credited with several building projects as well as subjugating the Ammonites, and he prospered because "he ordered his ways before the Lord" (2 Chron. 27:4–6; cf. 2 Kings 15:34). However, he failed to remove the high places on which the people offered sacrifice to Baal (2 Kings 15:35; cf. 2 Chron. 27:2). Late in his reign an alliance of Pekah of Israel (the Northern Kingdom) and Rezin of Syria threatened Judah with invasion, but Jotham died before the threat could be carried out. His son Ahaz bore the force of the invasion (2 Kings 15:37; 16:5). Jotham was contemporary with the prophets Hosea (1:1), Isaiah (1:1), and Micah (1:1). **3** The son of Jahdai, a Judahite of the clan of Caleb (1 Chron. 2:47). ***See also*** Fable; Gideon. D.R.B.

journey, Sabbath. ***See*** Sabbath Day's Journey.

joy, an expression pervading both OT and NT. Scattered throughout the OT are references to the happiness derived from sexual love (Song of Sol. 1:4), married life (Prov. 5:18), the birth of children (Ps. 113:9), and especially the pleasures of harvest (Deut. 26:1–11) and feasting (Eccles. 8:15). These, however, merely form the backdrop and establish the metaphors for the far more pervasive exultation in God's actions on behalf of Israel. Nature itself is invited to join in this joyous mood of thanksgiving (Ps. 98), which often had a cultic setting as Israel celebrated in her feasts and liturgy God's past acts of deliverance. The righteous especially are summoned to look with joy upon acts of divine redemption and vengeance, in which the wicked receive just recompense for their deeds (Ps. 58:10). In a similar vein, wisdom literature rejoices in the law, which leads Israel in the paths of obedience and righteousness that are pleasing to God (Ps. 1).

Under circumstances of oppression, however, the mood became more anticipatory as Israel looked ahead to the joy that would accompany their future deliverance by God (Isa. 65:17–19). God's own joy over this event is also anticipated (Zeph. 3:17) and thus joy emerges as a dominant aspect of Israel's eschatological hope.

Because the early Christians believed that the advent of Jesus marked the inbreaking of God's final redemptive act, all the eschatological joy that Israel had anticipated was now associated with Jesus. This motif is particularly strong in Luke's Gospel, where the birth of the infant Jesus occasions an outpouring of human and heavenly joy (Luke 1–2) and his ministry

(10:17) and resurrection (24:52) evoke the same response. Acts describes the early church sustaining this mood of rejoicing and spreading it beyond the borders of Judea (Acts 8:8).

John's Gospel employs the familiar metaphors of marriage and harvest joy to suggest the exultant mood accompanying Jesus' ministry of salvation (John 3:29; 4:36). Even more characteristic of this Gospel, however, is the explicit association of joy with the person of Jesus and the perfect joy of those secure in their fellowship with him (John 15–17).

The Pauline Letters are filled with the mood of rejoicing, for eschatological joy, closely linked with the Holy Spirit, is both the impetus (1 Thess. 2:19–20) and the goal (2 Cor. 1:24) of Paul's apostolic ministry. Paul, however, also stresses the paradox that this joy can be experienced in the midst of temporal afflictions. Not only are afflictions viewed as transitory and thus unable to dampen the joy of the believer, they also suggest the imminent fulfillment of the believers' hopes and thus heighten rather than diminish the mood of exultation (Rom. 5:3). Paul also suggests that affliction, even martyrdom, could be viewed as a reflection of Jesus' own suffering, and thus it becomes a sign of the true disciple or apostle and a further basis for rejoicing (2 Cor. 11:23–12:10). Thus Paul's Letter to the Philippians, written under circumstances of severe apostolic suffering, is also the most joyous of all his Letters. The author of 1 Peter also affirms the view that sharing Christ's suffering is to be a cause of joy (4:13; 1:6). J.M.B.

Jozabad (joh´zuh-bad; Heb., "Yahweh is a gift" or "Yahweh has given"), a shortened form of Jehozabad. **1** A Gederathite who joined David's fighting men at Ziklag (1 Chron. 12:4). **2** One from the tribe of Manasseh who defected from Saul to join David (1 Chron. 12:20). **3** A Levite who helped oversee the collection of the Temple offerings during the reign of Hezekiah (2 Chron. 31:13). **4** A Levite leader who contributed animals for the Passover celebration during King Josiah's reforms (2 Chron. 35:9). **5** A Levite who helped inventory the valuables brought back by the exiles who returned with Ezra (Ezra 8:33). **6** A member of the clan of Pashur who took a foreign wife (Ezra 10:22). **7** A Levite who took a foreign wife (Ezra 10:23). **8** One, probably a Levite, who helped explain to the people the law read by Ezra (Neh. 8:7). **9** A Levite leader who helped supervise the rebuilding of the Temple following the return from the Exile (Neh. 11:16). He may be the same as 8 above. D.R.B.

Jozadak (joh´zuh-dak; Heb., "Yahweh is righteous"), a shortened form of Jehozadak. He was a priest, the father of Jeshua, the high priest in Jerusalem following the return from the Babylonian captivity (Ezra 3:2; 10:18). He is most often called Jehozadak (1 Chron. 16:14; Hag. 1:12). ***See also*** Jehozadak.

Jubal (j*oo*´buhl), "father" (i.e., ancestral patron) of musicians playing the lyre and pipe, according to the early tradition of Gen. 4:21. One of two sons of Lamech by Adah, he is linked through his brother Jabal with herdsmen.

Jubilee (j*oo*´buh-lee), the fiftieth year occurring at the end of seven Sabbatical cycles of seven years each, in which all land was returned to its ancestral owners and all Israelite slaves were freed. The Jubilee is described in Lev. 25:8–17, 23–55; 27:16–25; and Num. 36:4. It was proclaimed with the blowing of the shophar (trumpet made from a ram's horn) on the Day of Atonement. (Hebrew *yovel,* "Jubilee," takes its name from the ram's horn.) The land was also left fallow in the Jubilee Year. The Jubilee was observed in the seventh Sabbatical in Second Temple times, so that there was a forty-nine-year cycle. ***See also*** Feasts, Festivals, and Fasts; Sabbatical Year; Shophar. L.H.S.

Jubilees (j*oo*´buh-leez), **Book of.** ***See*** Pseudepigrapha.

Judaea (j*oo*-dee´uh). ***See*** Judea.

Judah (j*oo*´duh), the name of a region in Palestine, of a tribe, and of an individual, who is the eponymous ancestor of the tribe. In Genesis, Judah is introduced as the fourth son born to Jacob and his first wife, Leah (Gen. 29:35; 37:26; 43:3, 8; 44:14, 16, 18; 46:28). The tribal name "Judah" may have derived from the geographical area in which clans settled in the highlands approximately between Jerusalem and Hebron (i.e., the mountains of Judah), the greater part of southern Palestine. The twelve-tribe scheme includes under Judah a number of other tribal groups that settled in the area from Hebron southward into the Negeb—i.e., the Calebites (in the territory around Hebron; Josh. 14:13–15; Judg. 1:20), Kenites (in the area around Arad; Judg. 1:16), Kennizzites (in the environs of Debir; Josh. 15:15–19; Judg. 1:11–15), Simeonites (near Zepath-hormah; Judg. 1:17), Jerahmeelites, and Othnielites. Of these groups, Simeon alone is given autonomous tribal status among the southern tribes and represented as a partner to Judah in Judges 1. The fact that Judah is not mentioned in the ancient Song of Deborah (Judg. 5) is probably due to its firm association with the south from a very early period. Judah's position in the Blessing of Moses (Deut. 33:7), which stems from a relatively early period, is that of a rather insignificant tribe. The Blessing of Jacob (Gen. 49:8–12), however, makes Judah the ruler and displaces the older Reuben. This probably reflects the situation of the tribes in the time of David (late eleventh

JUDAH, KINGDOM OF

century B.C.). The tribe of Judah became the state of Judah in the time of David. In Hebron, the capital of Judah, David was anointed king by "the men of Judah" (2 Sam. 2:4) to rule over what was apparently a loose confederation of southern tribes.

In the NT, Judah is ranked at the head of "the sealed" (Rev. 7:5) and Jesus' descent is from Judah, a nonpriestly tribe in Heb. 7:14. ***See also*** Caleb; Judah, Kingdom of; Kenaz; Kenites; Simeon.

F.S.F.

Judah, Kingdom of, a kingdom in southern Palestine consisting of the tribal areas of Judah and Benjamin that was created by the dissolution of the United Monarchy at the death of Solomon (922 B.C.). Following this division there was a period of civil war between Judah (the Southern Kingdom) and Israel (the Northern Kingdom) that finally terminated in the time of Jehoshaphat, king of Judah (868–847 B.C.). Although Judah was considerably less populous than its sister kingdom, it enjoyed greater political stability due to the presence of Jerusalem and the Davidic monarchy. Because of its relatively secluded geographic location, it was somewhat less vulnerable to external aggression.

The population of Judah, from the time of David on, had incorporated considerable numbers of non-Israelites, leading to an alternation between pro-Canaanite, non-Yahwist religious policies on the part of some kings and the reversal of such policies in periodic religious reforms. Thus, Rehoboam (ca. 926–907 B.C.), the first king of Judah, adopted pro-Canaanite policies (1 Kings 14:21–24), but his policies were reversed by his grandson Asa (ca. 905–874; 1 Kings 15:9–13). Asa's pro-Yahwist reforms were continued by his son Jehoshaphat, but they were again reversed by the extremely anti-Yahwist policies of Queen Athaliah (843–837 B.C.; 2 Kings 8:26; 11:2; 2 Chron. 24:7), a daughter or sister of Ahab of Israel, who seized the throne violently, causing a break in what had been Judah's orderly succession to the throne. She ruled as Judah's only queen until she was ousted by the Jerusalem priesthood acting in concert with the Judean rural nobility. The Davidic succession was renewed with Athaliah's ouster (2 Kings 11:17) and the installation of her seven-year-old grandson Jehoash (837–801 B.C.) on the throne.

Jehoash's son Amaziah (ca. 801–787) campaigned against Edom (2 Kings 14:7) and was involved in costly hostilities with Joash of Israel (2 Kings 14:8–14). He fell victim to a conspiracy mounted by pro-Yahwists, who assassinated him and placed his sixteen-year-old son, Uzziah (ca. 787–747), on the throne. The reign of Uzziah (or Azariah in 2 Kings 14:21; 15:1, 6, 7, 8) was marked by territorial expansion, an increase in population, strengthening of defenses, advancement of agriculture with the cultivation of semiarid areas, and the development of commerce. Uzziah pursued Yahwist policies but was afflicted with leprosy, leading the Chronicler (2 Chron. 26:16–21) to blame his illness on the fact that he had usurped a priestly prerogative by sacrificing incense in the Temple. His son Jotham (ca. 756–742), who began his reign before his father's death, continued Uzziah's successful policies, but Judah suffered losses under Jotham's son, Ahaz (ca. 742–727), losing territory to the Philistines and to Edom and being attacked by an Israel-Syrian alliance. These losses drove Ahaz to Assyria for help, and he instituted pro-Assyrian, anti-Yahwist practices, including even the human sacrifice of his own son (2 Kings 16:2–4).

Early in the reign of Ahaz's son Hezekiah (ca. 727–698), the Assyrians conquered Israel, leaving Judah as the sole surviving independent state in the area. The Judean state was one of the few in the region that avoided the catastrophe that befell the other states of the area in the latter part of the eighth century in the reigns of the Assyrian kings Tiglath-pileser III (745–727 B.C.) and Sargon II (722–705).

The fall of the Northern Kingdom encouraged Judean kings to pursue nationalistic policies aimed at recovering a united Davidic monarchy. Accordingly, Hezekiah pursued thorough-going religious reforms (2 Kings 18; 2 Chron. 29–31). He revolted against the Assyrians after the death of Sargon II in 705, and Sargon's successor, Sennacherib, responded with an invasion in 701, in which he conquered the fortified cities of Judah and besieged Jerusalem (2 Kings 19). Jerusalem, however, escaped destruction when "The angel of the Lord went forth, and slew a hundred and eighty-five thousand in the camp of the Assyrians" (2 Kings 19:35), causing the Assyrians to withdraw.

The extensive reforms of Hezekiah, in a now familiar pattern, were completely reversed by his son Manasseh (ca. 697–642; 2 Kings 21:1–18; 2 Chron. 33:1–20), who submitted to the Assyrians and "seduced [his people] to do more evil than the nations had done whom the Lord destroyed before the people of Israel" (2 Kings 21:9). His son Amon (ca. 641–640) was assassinated by pro-Yahwist elements, who installed his eight-year-old son Josiah on the throne (ca. 639–609; 2 Kings 21:24). When he came of age, Josiah instituted strongly nationalistic, pro-Yahwist policies in a time when Assyria had begun to be severely threatened by the Babylonians and the Medes (2 Kings 22:3–20; 23:8, 15, 19). Josiah purified religious practices and centralized them in Jerusalem. After the Assyrian capital Nineveh fell in 612, Josiah exploited the situation by seeking to expand his territory. The Egyptian pharaoh Neco, at the same time, sought to go to the aid of the Assyrians. Josiah attempted to stop Neco in 609 at the pass of Megiddo and lost his life in the failed at-

tempt (2 Kings 23:29). The disastrous death of such a reformer king put to rest any visions of a restored Davidic empire and marked the end of an independent Judean state.

Josiah's son, Jehoahaz, reigned for only three months and was then deposed by the pharaoh and deported to Egypt. The Egyptians installed Jehoiakim (Eliakim) on the throne of Judah (608–598); Jehoiakim was hated by his people, both because of his pro-Egyptian policies and the heavy tribute he exacted from them to send to Egypt. There was also a religious decline under his rule (2 Kings 24:2–4).

The last years of Judah saw a struggle between Egypt and Babylon for hegemony over Palestine. The Babylonians, under the leadership of Nebuchadrezzar (or Nebuchadnezzar), decisively defeated the Egyptians at Carchemish in 605 (2 Kings 24:1). It was this Nebuchadrezzar, as king of the newly ascendant Babylonian Empire, that Jehoiakim rebelled against three years later. Responding to this rebellion, Nebuchadrezzar moved against Judah (2 Kings 24:2). Thus Jerusalem fell into Babylonian hands on March 15/16, 597 B.C., as reported in the Babylonian Chronicles. Jehoiakim died during the siege of Jerusalem and was succeeded by his son Jehoiachin, who surrendered to Nebuchadrezzar (2 Kings 24:12). The upper classes and skilled artisans were exiled to Babylon (2 Kings 24:14–16). The Babylonians appointed Zedekiah as their puppet on the throne. After nine years he rebelled against the Babylonians, bringing Nebuchadrezzar to Jerusalem again, which suffered under a two-year siege. Jerusalem fell in 587 and more people were sent into exile (2 Kings 25:11).

The kingdom of Judah outlasted the kingdom of Israel by some 135 years, but it too fell to a foreign power, bringing to an end a period of national independence that had lasted nearly a half millennium. ***See also*** Rehoboam. F.S.F.

Judaism (j*oo*´duh-iz-uhm), the religion of the Jewish people from the Sinai theophany through the present day. Up to and including modern times, Judaism professes the belief in the one, asexual, eternal, creator God, righteous and compassionate judge, king, and parent, who entered into a permanent historical relationship with "the children of Israel" that would culminate in eschatological redemption. The written and oral Torah perpetually obligated the people to a detailed code of ethical and ritual behavior. The term appears (in Greek) in 2 Macc. 2:21; 8:1; 14:38; and Gal. 1:13–14.

Judas (j*oo*´duhs; Gk. for the Heb. *Judah*). **1** Judas, the son of Jacob (Matt. 1:2–3). **2** Judas, an ancestor of Jesus (Luke 3:30). **3** Judas Maccabeus, the third of the five sons of Mattathias. After Antiochus IV Epiphanes polluted the Temple in 167 B.C. ("the abomination that makes desolate") Mattathias moved with his

Judas kisses Jesus, identifying him for Roman soldiers; from the *Winchester Psalter*, ca. 1160.

family to Modein (1 Macc. 2:1–14). When officers of Antiochus sought to force Mattathias and his family to apostasize, Mattathias rose up in defense of the law and the covenant, killed an officer, and led his sons into the wilderness in revolt (1 Macc. 2:15–48). Upon the death of his father, Judas successfully led Israel in numerous battles against the Syrians. He defeated a combined army of Syrians and Samaritans (1 Macc. 2:49–4:35), the Syrians led by Seron, the Syrians led by Gorgias, and the Syrians led by Lysias, after which the Temple was purified (1 Macc. 4:36–61; cf. John 10:22). Judas continued to lead Israel in battle with great success, liberating Jews from surrounding territories and even making a treaty with Rome. Finally, against a Syrian army led by Bacchides, Judas fell in battle in 160 B.C. (1 Macc. 9:1–18). **4** Judas, the son of Chalphi, an officer of Jonathan Maccabeus (1 Macc. 11:70). **5** Judas, the son of Simon Maccabeus and nephew of Judas Maccabeus who with his brother John successfully led the forces of Israel against Candebeus (1 Macc. 16:2–10). **6** Judas, one of the senders of a letter to Aristobolus (2 Macc. 1:10). **7** Judas of Galilee, a Jewish leader who led a revolt against Rome during the census of Quirinius (Acts 5:37). Josephus credits him with founding the "sect" of the zealots. **8** Judas Iscariot, one of the twelve apostles, the son of Simon Iscariot. He is to be distinguished from the other apostle called Judas (John 14:22). The origin of the name Iscariot is debated. Some suggestions are: man (Heb., *ish*) of Karioth; the assassin (from Gk. *sikarios*); man from Issachar. Certainty is impossible, but if the first is correct, Judas was the only apostle from Judea.

Judas possessed a privileged position among the apostles as treasurer of the group (John 12:5–6; 13:29). His proximity to Jesus at the Lord's Supper (John 13:21–26) also suggests this. Why he betrayed Jesus is uncertain. Some suggestions are that he did it (Mark 14:10–11)

after being convinced that Jesus truly planned to die (Mark 14:3–9); that he did it for money (Matt. 26:14–16); or that he did it to help Jesus fulfill his purpose of dying! The last suggestion, however, is at odds with Jesus' words in Mark 14:21. Despite a loving gesture by Jesus (John 13:26–27), Judas proceeded to betray his Lord.

What Judas betrayed is easier to answer. One suggestion is that he betrayed Jesus' claim to be the Messiah, but his absence at the trial, when such witnesses were sought, refutes this. What he betrayed was how Jesus could be arrested privately (Mark 14:1–2). This he did in Gethsemane by singling him out at night with a kiss.

Upon reflecting over what he had done, Judas experienced remorse and sought to undo his evil deed (Matt. 27:3–4), but it was not possible. In sorrow he hanged himself (Matt. 27:5) and, falling headlong, his body split open and his bowels fell out (Acts 1:18). **9** Judas, the son of James and one of the apostles (Luke 6:16; Acts 1:13; John 14:22). This is probably the Thaddaeus of Matt. 10:3; Mark 3:18. The qualification of Judas in these latter two passages only makes sense if there were another Judas in the group. **10** Judas, one of the four brothers of Jesus (Mark 6:3) whom tradition associated with the author of Jude. **11** Judas, a man in whose home in Damascus the blind Saul was brought (Acts 9:11). **12** Judas Barsabbas, a leader in the Jerusalem church chosen along with Silas to accompany Paul and Barnabus back to Antioch in order to announce the apostolic decree (Acts 15:22–23). It is possible that he and Joseph (Acts 1:23) were brothers. ***See also*** Apostle; Maccabees. R.H.S.

Jude (*joo* d), a shortened form of "Judas," a person described as "a servant of Jesus Christ and brother of James" and identified as the author of the Letter of Jude (v. 1), which many scholars, however, regard as pseudonymous. It is generally agreed that this is not the Judas, son (or brother) of James, identified in Luke 6:16 and Acts 1:13 as one of the Twelve (in Matt. 10:2–4; Mark 3:16–19, however, "Thaddaeus" occurs rather than "Judas"). Traditionally, Jude is identified with Judas, one of the "brothers of the Lord" (Matt. 13:55; Mark 6:3; cf. Acts 1:14; 1 Cor. 9:5). His identification with the disciple "Judas" of John 14:22 is questionable. ***See also*** Apostle; Brothers; Disciple; James; Judas; Jude, The Letter of; Pseudonym; Thaddaeus; Twelve, The. P.L.S.

Jude, the Letter of, one of the "catholic" or "general" Epistles of the NT. After the epistolary prescript (vv. 1–2), the author states the purpose of the letter in vv. 3–4. Because of the presence of ungodly persons who "pervert the grace of our God into licentiousness" and are destined for judgment (v. 4), the Letter appeals to the readers "to contend for the faith which was once for all delivered to the saints" (v. 3).

Jude 5–23 elaborates on the purpose stated in vv. 3–4, while both the prescript (vv. 1–2) and the concluding doxology (vv. 24–25) strengthen the appeal by focusing on the sustaining power of God. Jude 5–16 substantiates the claim of v. 4 that both the present danger posed by the false teachers and their future punishment were prophesied long ago. Through a series of illustrations drawn from the OT and extracanonical Jewish literature (vv. 5–7, 11, 14–15) and midrashic comments (vv. 8–10, 12–13, 16), the author associates the false teachers of his own day with those of the past and demonstrates that ancient prophecy announces the condemnation of both. This announcement of judgment on false teachers (vv. 5–16) is the basis for the series of appeals in vv. 17–23, which function as the climax of the argument, describing what "contending for the faith" (v. 3) actually involves.

Although the identity of the opponents has been a topic of considerable scholarly debate, the structure of the book suggests that the description in vv. 5–19 functions primarily as a basis for the appeals in vv. 17–23. Rather than delineate a specific heresy, vv. 5–16 give, as a basis for the appeal in vv. 17–23, a general description of the antinomian dangers threatening the church.

I. Salutation (1–2)
II. Purpose for writing (3–4)
III. Judgment on false teachers (5–16)
IV. Appeal to the community (17–23)
V. Doxology (24–25)

The identity of the author and recipients remains obscure. Because the author identifies himself as "Jude, a servant of Jesus Christ and brother of James" (v. 1), tradition has regarded him as one of the brothers of Jesus. The appeal to the community to "remember" the words of the apostles (v. 17), however, may suggest a later generation. The use of apocalyptic imagery suggests that the recipients may have been Palestinian. ***See also*** Apocalyptic Literature; Epistle; General Letters; Heresy; Judas. J.W.T.

Judea (*joo*-dee´uh; KJV: "Judaea," except in Ezra 5:8), the Greco-Latin form of Judah. The geographical term "Judea" is introduced in Ezra-Nehemiah to designate the area of the Jewish state under the Persians, which included only a relatively small area around Jerusalem, smaller in extent than the former area of Judah. Following the Persian period (ca. 538–333 B.C.), Judea is spoken of in the Maccabbean era (ca. 167–63 B.C.) as a greatly expanded, independent Jewish

state (1 Macc. 5:45; 7:10; 11:28, 34; 12:38). In its most comprehensive political sense, Judea comes to include all of Palestine (with the exception of some Hellenistic cities), although in its more limited sense it continues to refer to the region around Jerusalem and one of the three main divisions of the country: Judea, Samaria, and Galilee. In its extended political sense it is the territory over which Herod the Great (37–4 B.C.) ruled. His son Archelaus (4 B.C.–A.D. 6), however, as ethnarch of Judea, ruled from Jerusalem over the more limited area of Judea-Idumea-Samaria, not over Galilee and Perea.

After Archelaus, Judea became part of the Roman province of Syria and was ruled by procurators appointed by Rome. These procurators presided over the same limited area as Archelaus, but from Caesarea. The first-century A.D. Jewish historian Josephus often uses the term "Judea" in its broad political sense, as does the NT (Matt. 19:1; Luke 1:5; 4:44; 7:17; 23:5; Acts 10:37; 11:1, 29; 26:20). Throughout Jesus' lifetime (after the banishment of Archelaus in A.D. 6), Judea continued to be ruled by a Roman procurator who served under the proconsul, or president, of Syria who resided in Antioch (Luke 3:1; Josephus *Antiquities* 17.13.5; 18.1.1); among them was Pontius Pilate (A.D. 26–36).

Judea was not traversed by major trade routes. The land included a sizeable desert area in the Wilderness of Judea and had a pastoral economy supplemented by olives and grapes, the principal crops of the highlands. Economically, however, Judea was always dependent upon the revenues generated by Jerusalem, and its population tended to be concentrated around Jerusalem. *See also* Jerusalem; Judah. F.S.F.

judge, a person who has the authority to settle disputes and to restore justice. In the early period of Israelite history those who acted in this official capacity were the heads of families or the elders of the tribe. With the coming of the monarchy, judges included the king as supreme authority in the land, leading citizens and professional magistrates delegated by him, as well as priests in matters strictly religious or in special cases. OT tradition associates the institution of the office of judge with Moses, the covenant mediator, thereby stressing the element of covenant responsibility in the administration of justice. Judges in Israel ruled with the authority delegated to them by Yahweh, "the Judge of all the earth" (Gen. 18:25). Those selected to be judges were to be capable and God-fearing persons who were trustworthy and incorruptible (Exod. 18:21). Codes for the conduct of judges stress the importance of absolute fairness and impartial judgment (Exod. 23:1–3, 6–9; Lev. 19:15–16, 35–36; Deut. 16:19–20; 17:8–13). In a special sense, probably derived from the notion of restoring justice implicit in the role of judge, the title is also applied to outstanding military figures, the "major" judges who delivered the Israelites from their oppressors during the turbulent times of the settlement into the land of Canaan. When used of the "minor" judges in this same period, the term retains its ordinary sense. M.M.S.

Judges, the Book of, the seventh book in the OT, containing stories of people and events in the period between the death of Joshua and the establishment of the monarchy, stories that were collected early in the monarchy, later edited into a national history (late seventh century B.C.), and finally reedited after the destruction of Jerusalem (in 587 B.C.). The book attempts to address the fundamental issue of how Israel organized itself and was governed upon entry into the promised land.

The book begins with Israel united for offensive war and recapitulates materials reported earlier in Joshua 14–15, though with several significant changes in detail and orientation. Through these changes the historian of Judges 1 presents a different view of the nature of the conquest and Israel's role in it. The editorial prologue (2:11–23) attributed to a Deuteronomic redactor articulates the evaluation of the period that pervades the book: cycles of idolatry, divine punishments, the appeal for divine aid, the emergence of a "savior" figure, and a period of rest when the people were ruled or judged by the heroic savior. In this way, the role of Yahweh as the ultimate authority and divine judge is established at the beginning of the book. This pattern is also found as a connective element between the various traditions of the book (for another evaluation, see 3:1–5). The

OUTLINE OF CONTENTS

The Book of Judges

- I. Introduction: conquest and final settlement (1:1–3:6)
- II. History of the judges (3:7–16:31)
  - A. Othniel, Ehud, Shamgar (3:7–31)
  - B. Deborah and Barak versus royal coalition (4:1–5:31)
  - C. Gideon (chaps. 6–8) and Abimelech (chap. 9)
  - D. "Minor" judges and Jephthah (10:1–12:15)
  - E. Samson (13:1–16:31)
- III. Supplementary stories (chaps. 17–21)
  - A. Micah and the Levite (chap. 17)
  - B. The migration of the Danites (chap. 18)
  - C. Rape and murder of a Levite's concubine (chap. 19)
  - D. Civil war (chaps. 20–21)

Hebrew verb used in connection with the military judge, *shaphat*, has the broader sense "to rule," and the literary evidence suggests that two distinct categories of leaders carrying this title were found in early Israel. From notices about "minor" judges (10:1–5; 12:8–15) it appears that such authority rarely extended beyond the judge's neighboring tribes. Other stories, however, laud exploits of saviors in time of crisis for the federation, i.e., "major" judges. There then appears to be an overlap of semantic uses for the verb, which includes military and administrative-legal functions. The "major" judges seem to have performed both tasks; the "minor" ones only the latter.

Othniel, the first judge, is presented as an ideal leader who rescued the Israelites after an eight-year period of servitude to Cushan-rishathaim of Aram. The precise identity and origin of this latter figure are somewhat obscure. The next judge is Ehud, whose "left-handed" dagger diplomacy dealt with Eglon, king of Moab (3:15–23).

The story of the prophetess Deborah and the commander Barak (chap. 4), followed by a virtual eyewitness poem (Song of Deborah and Barak, chap. 5), recounts a war for the fertile plains, especially Esdraelon. This latter text is a victory hymn that many scholars consider to be among the oldest poetic passages in the Hebrew Bible. The Israelite population was concentrated in upland villages founded after ca. 1200 B.C. Forces of the "kings of Canaan" (5:19) were led by Sisera (a non-Semitic name) from Harosheth "of the nations." Sisera's overlord was "Jabin king of Canaan" at Hazor (4:2, 24; cf. Josh. 11). Possibly (but not necessarily) two battle accounts are conflated. Victory "at Taanach, by the waters of Megiddo" (5:19b) may be dated to ca. 1125 B.C., when Megiddo was unoccupied and Taanach violently destroyed.

Gideon (Jerubbaal), who led the rout of the Midianites (camel-riding raiders), piously declined the offer of kingship and requested instead the trappings of diviner-judge.

Abimelech, the son of Gideon by a Shechemite concubine, accepted funds from the covenant sanctuary at Shechem and became king of Shechem, while serving as commander of the tribal militia. When local support collapsed, he used the militia to destroy Shechem; after his victory he sowed the city with salt. Massive mid-twelfth-century destruction at Tell Balata witnesses to the violence.

Jephthah, the Gileadite son of a harlot, gathered a band of mercenaries in the north and was later recalled by the elders of Gilead to lead Israel against the Ammonites. He sacrificed his daughter to fulfill a vow and turned back an Ephraimite force with troops who used the password *shibboleth*.

Samson appears as a tragic figure who opposed the Philistines, the eleventh-century successors to the earlier Sea Peoples. A cycle of adventures of this hero have been artfully gathered and crafted in chaps. 13–16. As against other judges, Samson appears less as a national savior figure than as a person with private exploits and vendettas. The account may draw from old folk motifs.

With examples of charismatic leadership inconclusive, stories of escalating internal chaos follow. Micah (chap. 17) was proprietor of a freelance shrine (probably Bethel) and a maker of graven images, whose young levitical priest from Bethlehem was taken by migrating Danites to become founder of the far northern priesthood. "In those days there was no king in Israel; all the people did what was right in their own eyes" (17:6, NRSV).

The southern polemic against northern sanctuaries is countered in the sequel (chaps. 18–21). A northern Levite rallied the militia to avenge the rape and murder of his southern concubine, glossing over his own responsibility in the affair (chaps. 19–20). A tragic civil war is recounted with grim humor, "all Israel" versus Benjamin. Finally, to secure wives for the six hundred Benjaminite survivors, the elders recommend one more massacre and then authorize the kidnapping of Shiloh maidens. "In those days . . . right in their own eyes" becomes the last word (21:25), lamenting such behaviors and commending the establishment of the monarchy.

The negative example of the Benjaminites in the last section may have been deliberately arranged so as to climax the chaotic period and serve as an anti-Saul polemic (Saul was a Benjaminite) by pro-Judean monarchists. This same polemical tone is inherent throughout much of the book as the competing perspectives and traditions of the various constituencies of early Israel are each given a voice. ***See also*** Abimelech; Barak; Jephthah; Shibboleth; Sisera.

judgment, day of, a term found mainly in the NT referring to the time when God or his Messiah (or the Son of man) is to punish the wicked and redeem the righteous. Related terms and concepts appear frequently in the OT, intertestamental writings, and the NT.

In the OT: In the OT, God is regarded as the Judge of all the earth (Gen. 18:25; Ps. 9:7–8). His judgment is often invoked on individuals (Gen. 16:5) or nations (Judg. 11:27). Psalm writers, particularly, looked for God to reward the righteous, whether individuals (Ps. 1:5–6), nations (Ps. 110:6), the needy and oppressed (Pss. 72:2–4; 103:6), or the whole world (Ps. 96:13). Many prophets spoke of the "day of the Lord" when, because of their wickedness, God would punish other nations (Obad. 15), Israel

(Amos 5:18–20), Judah (Joel 1:15), or all the inhabitants of the earth (Zeph. 1:14–18). Joel 2:30–32 and Mal. 4:5–6 suggest that those who repent beforehand may be spared. Other OT expressions likewise refer to the coming of God's judgment against the wicked: "on that day" (Isa. 24:21), "the days are coming when . . . " (Jer. 9:25–26; Amos 4:2), or simply "then" (Mal. 3:5). The second expression frequently points toward the time when God is to restore his people (Jer. 23:7–8; Amos 9:13). Related phrases, notably "in that day" (Amos 9:11), "in those days" (Jer. 33:16), and "in the latter days" (Hos. 3:5), typically connote the coming era of redemption.

Generally, the OT writers expected God's judgment to occur in history: in the little histories of individuals or the larger history of nations and the world. A few passages hint that the righteous might hope for redemption beyond this life or this world (Job 19:25–27; Isa. 26:19; Ezek. 37:1–14). Dan. 12:1–3 promises that many who have died will awake, some to everlasting life, some to everlasting contempt. Isa. 66:24 and Jth. 16:17 contemplate the eternal torment of the wicked. Wisd. of Sol. 3:1–9, on the other hand, offers assurance that "the souls of the righteous are in the hand of God"; thus, if the righteous are not vindicated and the wicked punished in this life, they will be in the next. 2 Esd. 14:34–35 looks for judgment after death.

The term "day of judgment" appears in several intertestamental writings (e.g., Jth. 16:17; Wisd. of Sol. 3:18, "day of decision"; 2 Esd. 12:34; *2 Enoch* 51:3). The emerging idea is that people will be judged individually in the new age, or, perhaps, after death, and consigned to their respective destinies. The "day of judgment" and related expressions in the NT often have similar meaning.

Christ as judge; sixth-century mosaic in San Apollinare Nuovo, Ravenna, Italy.

In the NT: According to the first three Gospels, Jesus spoke frequently of the coming judgment. The term "day of judgment" appears in Matt. 10:15; 11:22, 24; and 12:36. Often, reference is simply to "the judgment" (Matt. 12:41, 42; Luke 10:14). Related expressions include "that day" (Luke 21:34–35), "on that day" (Matt. 7:22; Luke 17:31), and "in those days" (Mark 13:17, 19, 24). Sometimes, these terms also refer to the expected time of tribulation. Many of Jesus' parables (e.g., Matt. 18:23–35) and other sayings (e.g., Mark 10:17–25) called his hearers to repentance and responsive neighbor-love, so that they might, at the judgment, be found fit to enter the Kingdom of God. The classic passage is Matt. 25:31–46, where the Son of man or "king" sits in judgment, separating the "sheep from the goats." According to Matt. 19:28, the twelve disciples are to join in judging Israel. In John's Gospel, Jesus speaks of a future judgment (5:28–29; 12:48), but more often emphasizes his own authority as judge (5:22, 30) and suggests that judgment is already taking place (9:39; 12:31).

The term "day of judgment" also appears in 2 Pet. 2:9; 3:7; and 1 John 4:17. That God will judge the world on a certain future day, often designated as "that day" or the "day of the Lord," is also stated (Acts 17:31; Rom. 2:16; 1 Thess. 5:2–4; 2 Thess. 2:2; 2 Tim. 1:18; 4:1–8; 2 Pet. 3:10–12; Jude 6). Paul alternatively refers to the coming "day of our Lord Jesus Christ" (1 Cor. 1:8), "the day of the Lord Jesus" (2 Cor. 1:14), "the day of Jesus Christ" (Phil. 1:6), and "the day of Christ" (Phil. 1:10; 2:16). Rev. 14:7 looks for the "hour" of God's judgment. In some of these passages, God is the expected judge; in others, it is Christ. Paul thought that "the saints" (faithful Christians) would also judge the world (1 Cor. 6:2; cf. Matt. 19:28). Only those who lived rightly could hope for a favorable decision at the judgment (Rom. 2:1–8; 2 Cor. 5:6–10; cf. Gal. 5:16–21; so also Rev. 20:12–13). Exactly how Paul's ideas about the coming judgment are to be reconciled with his doctrine of "justification through faith" (e.g., Gal. 2:15–16; 3:1–14; Rom. 3:21–4:25) is not completely clear (but cf. 1 Cor. 3:10–15).

Many NT traditions urge that the time of judgment, along with the coming of the Kingdom of God (or the Son of man), is so near that it may happen at any time (e.g., 1 Thess. 5:1–3; James 5:8–9; 1 Pet. 4:5, 7, 17). One writer, perhaps Paul, had to oppose certain enthusiasts who thought the day of the Lord already present (2 Thess. 2:1–12; cf. 1 Cor. 4:5). A few NT passages hint that judgment takes place directly after death (Luke 16:1–9, 19–31; Heb. 9:27; cf. 2 Esd. 14:34–35). ***See also*** Apocalyptic Literature; Eschatology; Heaven; Hell; Judgment, The Last; Parousia; Resurrection; Son of Man. R.H.H.

judgment, the last, a nonbiblical term commonly meaning the future trial of nations or in-

dividuals before God or Christ, especially as in Matt. 25:31–46 (the Son of man). ***See also*** Eschatology; Heaven; Hell; Judgment, Day of; Kingdom of God; Parousia; Son of Man.

judgment hall. ***See*** Architecture; Gabbatha.

judgment seat, one translation of the Greek word referring to the judicial bench of a city court in the Roman Empire (Gk. *bēma;* also translated as "tribunal" and once as "throne"). Jesus was put on trial before Pilate "while he was sitting on the judgment seat" (Matt. 27:19). The Gospel of John locates Pilate's judgment seat "at a place called The Pavement, and in Hebrew, Gabbatha" (19:13). Since the Middle Ages, the trial of Jesus was thought to have been at the Tower of Antonia, a belief reinforced in the nineteenth century by the discovery of a Roman pavement under the convent of the Sisters of Sion in the Via Dolorosa of Jerusalem. The pavement is now known to be of the second century A.D., however, and most scholars today would place Jesus' trial before Pilate at the site of Herod's palace, the Citadel of Jerusalem today.

The term "judgment seat" is used as an eschatological symbol by Paul in Rom. 14:10 ("the judgment seat of God") and 2 Cor. 5:10 ("the judgment seat of Christ"). ***See also*** Antonia, Tower of; Gabbatha; Judgment, Day of; Judgment, The Last; Throne; Tribunal. C.H.M.

Judith (j*oo*´dith), a Hebrew name meaning female Judean or Jewess. **1** The daughter of Beeri the Hittite (despite her Hebrew name) and wife of Esau. **2** The heroine of the book of Judith, a widow of Bethulia, who killed the Assyrian Holophernes and saved her city from destruction.

Judith, a book in the Apocrypha. It is a tale of faith and horror in which Judith, the beautiful and pious widow, entices and brutally assassinates Holophernes, the Assyrian general besieging her hometown, Bethulia. The story may have been written in Hebrew in the Maccabean era and possibly reflects the defeat of the Seleucid general Nicanor by Judah the Maccabee (161 B.C.). The deliberate confusion of names and events from the Persian, Babylonian, and Assyrian eras, however, is probably a device on the part of the author to indicate that the work is intended as fiction. The name "Judith" means "the Jewess," and like a good hero from the period of the judges she returns to her home after delivering her people from the enemy (cf. 16:21). Judah the Maccabee and his brothers, on the other hand, seek continuing political power. The story thus may be, in part, a comment by the Ḥasidim, the forerunners of the Pharisees and Essenes and, initially, the allies of the Maccabees, on Maccabean political ambitions.

Like its prototype, the story and song of Deborah (Judg. 4–5), Judith carries a message of faith in the deliverance of God's people in the face of

OUTLINE OF CONTENTS

Judith

I. Holophernes's invasion (chaps. 1–7)
   A. The western nations, including the Jews, refuse to help Nebuchadnezzar, king of the "Assyrians," in defeating Arphaxad, king of the Medes (chap. 1)
   B. Nebuchadnezzar commissions Holophernes to invade the western nations (chap. 2)
   C. Except for the Jews, all sue for peace and are accepted as vassals (chap. 3)
   D. The Jews are alarmed and cry out to God (chap. 4)
   E. Holophernes prepares to invade Judea; Achior the Ammonite is turned over to the Jews; he is not to see Holophernes's face again until the general has dealt with them (chaps. 5–6)
   F. Holophernes besieges Bethulia, and its terrified leaders prepare to surrender (chap. 7)
II. The story of Judith (chaps. 8–16)
   A. Judith is introduced as a beautiful, virtuous, and pious widow with a plan to deliver her people; she asks the leaders to postpone surrender, noting that, in addition to their town, the sanctuary in Jerusalem is in danger (chap. 8)
   B. Judith's prayer (chap. 9)
   C. She arrays herself in beautiful clothes, provisions herself with kosher foods, and with her maidservant seeks asylum in Holophernes's camp; he is captivated by her great beauty (chaps. 10–11)
   D. For three nights, Judith goes out to pray and bathe in a spring; on the fourth evening, Holophernes throws a banquet at which he plans to seduce her (chap. 12)
   E. Alone in the chambers with the general, Judith decapitates him and, pretending to go out again to bathe, carries his head away to Bethulia in her food bag (chap. 13)
   F. Achior looks upon Holophernes's face and becomes a proselyte, as the Assyrians discover his body (chap. 14)
   G. The Assyrians flee while Judith is honored by the high priest (chap. 15)
   H. The song of Judith (16:1–17)
   I. The spoil is dedicated to the Temple and Judith returns home (16:18–25)

Judith, portrayed by Bernardo Cavallino (1616–1656) with the head of the Assyrian general Holophernes.

political and military oppression. In particular, the feminism of the book is deliberate. The point seems to be not so much that God chooses a woman to prove his strength—Judith is no weakling—but that a woman is the appropriate instrument of a God who is the helper of the oppressed (9:11). Judith may be also a personification of "Judea" and, in her final song of triumph, speak as the mother of the Jewish people.

The story has had an influence on Western literature and art. It was one of the two apocryphal books with sufficient popularity in the West to convince Jerome to include it in his Vulgate translation of the Bible. For Catholics, it is one of the deuterocanonical books, while, for Protestants, it is included among the Apocrypha. ***See also*** Apocrypha, Old Testament; Deborah; Deuterocanonical Literature; Maccabees; Women. D.W.S.

Julia (*joo*´lee-uh), a woman to whom Paul sends greetings in Rom. 16:15. Philologus, mentioned first in the verse, is perhaps her husband, and "Nereus and his sister" are possibly their children. "All the saints who are with them" may have formed a house-church in their home.

Julius (*joo*´lee-uhs), a Roman centurion mentioned by name only in Acts 27:1, 3. He is probably the same centurion who was helpful to Paul throughout his eventful sea voyage as a prisoner from Caesarea to Rome (Acts 27:6, 11, 31, 43). According to Acts 27:1, Julius was a member of the "Augustan Cohort." This may have been an honorary title (named after the Emperor Augustus) given to Julius's regiment. Julius represents another example of the favorable attitude toward the Gentiles found in Acts. Unlike Cornelius, however, there is no evidence that Julius became a Christian. ***See also*** Cornelius; Gentile; Paul. A.J.M.

jungle of the Jordan (RSV; NRSV: "thickets of the Jordan"), a wildly overgrown area of the northern Jordan Valley where thick undergrowth gave shelter to varieties of wildlife. Jeremiah uses it as a symbol of the most extremely threatening natural habitat (Jer. 12:5) from which lions emerge to hunt on pastureland (49:19; 50:44). Zechariah views destruction of this habitat as part of divine judgment (Zech. 11:3).

Junias (*joo*´nee-uhs; KJV: "Junia"), a Christian to whom Paul sends greetings in Rom. 16:7. It is unclear whether a masculine (Junias) or a feminine name (Junia) is intended (the masculine is not found elsewhere). If a woman, Junia may be the wife of Andronicus. It is significant that the two are perhaps referred to as "apostles." ***See also*** Apostle.

juniper. ***See*** broom tree.

Jupiter (*joo*´puh-tuhr), a Roman sky god of agricultural origins. Jupiter was head of the Roman pantheon, and is the god most frequently mentioned in Latin inscriptions. Jupiter formed a powerful triad with Juno, protectress of women, and Minerva, the goddess of craftsmen, in Roman religion. Even in Egypt, one finds a temple dedicated to Jupiter Capitolinus. In the moral and political sphere, Jupiter was associated with wars, treaties, and oaths. He was identified with the sky gods of other peoples, especially with Zeus. ***See also*** Zeus.

justice, the standard by which the benefits and penalties of living in society are distributed. The same basic meaning of justice is found throughout the different books and types of writing of the Bible despite the differing spheres to which it is applied. The pervasiveness of the concept of justice in the Bible can be veiled from the English reader by the fact that the original terms most approximating justice have been frequently translated in English as "righteousness" and "judgment." A rule of thumb can be that when these terms appear in a context of social distribution or social conflict, "justice" would be a better translation.

Foundation: Justice is founded in the being of God, for whom it is a chief attribute. As such, God is the sure defender of the poor and the oppressed (Jer. 9:23–24; Ps. 10:17–18). This care of God is universal (Pss. 76:8–9; 103:6). The

Psalms ground it in God's role as the sovereign creator of the universe (Ps. 99:1–4). The demands of God's justice thus extend beyond the nation of Israel (Ps. 9:7–9; cf. Dan. 4:27).

Since the justice of God is characterized by special regard for the poor and the weak, a corresponding quality is demanded of God's people (Deut. 10:18–19). When they properly carry out justice, they are agents of the divine will (Isa. 59:15–16). Paul presents God's justice as a grace flowing into and through the believers to the needy (2 Cor. 9:8–10). The demand of God for justice is so central that other responses to God are empty or diminished if they exist without it (Amos 5:21–24; Mic. 6:6–8; Matt. 23:23). Justice is demanded of all the people, but particularly of the political authorities (Jer. 21:11–12; Isa. 1:10, 17).

Focus: Justice is closely related to love and grace (Deut. 10:18–19; Hos. 10:12) rather than being a contrasting principle. It thus provides vindication, deliverance, and creation of community in addition to retribution. Need is the criterion for distributing benefits although the provisions do not exclude ability as a criterion once this priority is met. Thus the focus is upon the oppressed with particular attention given to specific groups, such as the poor, widows, the fatherless, slaves, resident aliens, wage earners, and those with physical infirmities (Job 29:12–17; Ps. 146:7–9; Mal. 3:5). Justice is associated with the basic requirements of life in community. Basic needs are basic rights. Thus what is literally "the justice belonging to the needy" is properly translated as "the rights of the needy" (Jer. 5:28, RSV). These rights, found by observing what matters are involved in the context of passages mentioning justice (cf. Job 24:1–12; 22:6–9, 23; 31:6, 17–19), include land (Ezek. 45:9), food and clothing (Deut. 10:18), and shelter (Job 8:6). While due process is not omitted (Exod. 23:1–3, 6–8), the dominating concerns are substantive, material, and benefit oriented. The context for the carrying out of justice is the creation of community and the preservation of people in it (Lev. 25:35–36; Job 24:5; Ps. 107:36; Luke 7:29–30).

Justice is a deliverance, rectifying the gross social inequities of the disadvantaged (Ps. 76:9). It puts an end to the conditions that produce the injustice (Ps. 10:18). Such redress will not be to the advantage of everyone in the community. The oppressed are raised; the oppressors are judged (1 Sam. 2:7–10; cf. Luke 1:51–53; 6:20–26).

Paul uses the language and meaning of justice to describe God's work of salvation in his theme of "the righteousness of God." It occurs primarily in Romans, where he treats the inclusion of the Gentiles in the new order of redemption. By justice, God brings into community the Gentiles, who previously had no rights in the commonwealth of Israel. ***See also*** Justification; Law; Righteousness.

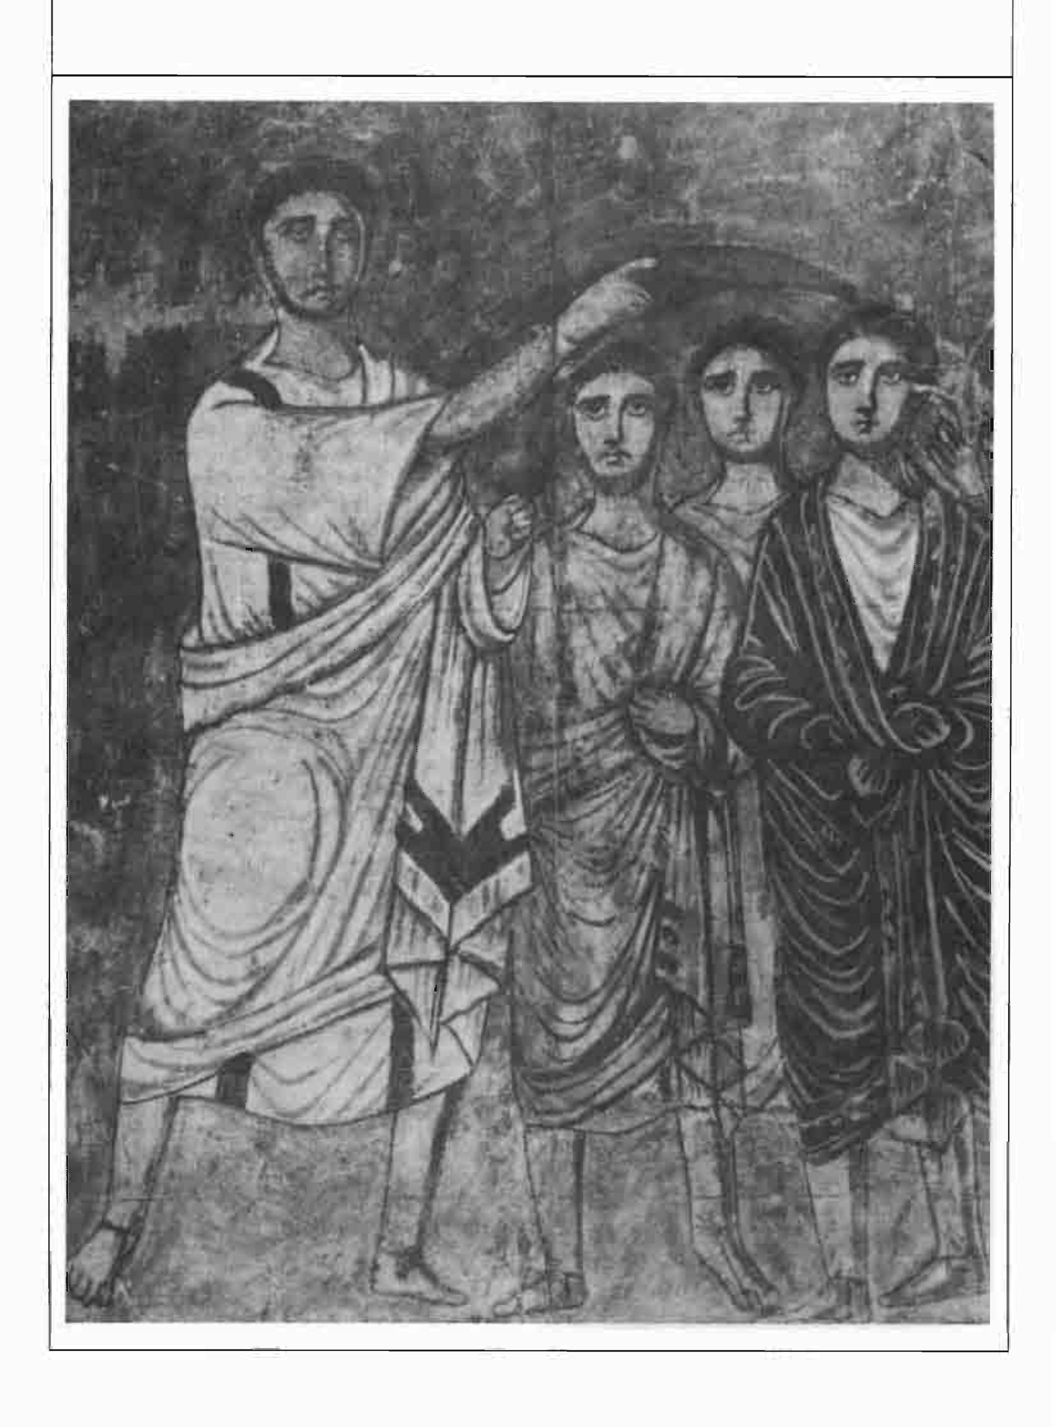
justification, the exculpation of guilt or the demonstration of the correctness of an act or statement. "Justification" and its related terms "just," "justly," "justify" help to render the Hebrew *ṣdq* and the Greek *dikaioō* (altogether the two words occur in the Bible about seven hundred and fifty times). These concepts are more frequently expressed in English Bibles by the term "righteousness" and its related forms. Translation by means of the English word "justification" comes through the Vulgate's *justitia.* The Latin verb *justificare* added the sense of *"make* just," though the Hebrew regularly meant *"declare* just." The two concepts relate, as at Rom. 3:26 where Christ's death demonstrates that God "is righteous and that he justifies" one who believes in Jesus.

OT uses reflect the human desire to justify oneself (Job 32:2; 33:32; Isa. 43:9) or show one is "in the right." When applied to God (Job 32:2; Ps. 51:4), they raise the question of theodicy or justifying the ways of God to human beings. The OT insists God "is just in all his ways" (Ps. 145:17) and asks, "How can a person be just before God?" (Job 9:2). It knows the complaint that "the way of the Lord is not just" (Ezek. 18:25, 29) but replies God will judge nonetheless (33:17, 20). The eventual answer is not that love or mercy triumphs over righteousness but that righteousness is seen as having a saving dimension (Isa. 51:1, 5, 6, 8, RSV: "deliverance"). God who saves is the one who justifies (Rom. 8:33; cf. Isa. 50:8, "vindicates").

Early Jewish Christians confessed that Jesus was put to death "for our trespasses" and raised "for our justification" (Rom. 4:25) and that we are "justified . . . in Christ Jesus . . . by his blood" (Rom. 3:24–25). They further confessed that when "the Son was made sin" (perhaps a "sin offering," 2 Cor. 5:21) it demonstrated God's righteousness while at the same time showing that sinners are justified by faith in Jesus (Rom. 3:26).

Paul deepened this idea of justification through faith "apart from works of the law" (Rom. 3:28) and applied it to non-Jews (Gal. 3:8) as well as Jews (Rom. 3:30), on the basis of Abraham's experience (Rom. 4). The universality of justification is shown by comparing Christ with Adam: Adam's trespass brought condemnation for all, whereas Christ's act of "righteousness" brings justification or acquittal and life to all. Thus sinners are "made [declared, established as] righteous" (Rom. 5:16–21). God "justifies the ungodly" who trust him (Rom. 4:5); they receive peace and life in the Spirit



(Rom. 5:1; 8:4). The ethical aspects of justification emphasize "whatever is just" (Phil. 4:8).

James speaks of justification (2:24–25), not in opposition to Paul but against people who fail to understand that faith includes obedience (Rom. 1:5) to God beyond creedal assent. ***See also*** Righteousness. J.H.P.R.

Justus (juhs´tuhs). **1** A Latin praenomen for Joseph Barsabbas, who lost out by lot in an appointment to the Twelve to replace Judas Iscariot after his suicide (Acts 1:15–26). **2** A "worshiper of God" (Gentile attracted to Judaism?) in Corinth who, according to Acts 18:7, offered hospitality to Paul after the latter was forced to leave the synagogue. He probably hosted a house-church. Some manuscripts give his name as Titus Justus, but the strongest evidence points to Titius Justus. **3** A Jewish-Christian co-worker with Paul, mentioned with respect in Col. 4:11. On the precarious basis of different punctuation and the changing of several letters of the text, Philem. 23–24 could be translated: "Epaphras my fellow prisoner in Christ sends greetings to you, and so do Justus (not Jesus), Mark, Aristarchus, Demas, and Luke, my fellow workers." Thus, the same greeters would appear in both Col. 4:10–14 and Philem. 23–24. ***See also*** Barsabbas; Paul; Titus. A.J.M.

Opposite: Samuel anoints David (far right) king (1 Sam. 16:11–13); from a panel at the third-century A.D. synagogue at Dura-Europos.

K

kab (kab; KJV: "cab"), a measure of capacity in 2 Kings 6:25. From rabbinic information it was 1/18 of an ephah which is 1 1/16 of a quart. ***See also*** Weights and Measures.

Kabzeel (kab´zee-uhl; Heb., "may God gather"), a town of Judah near the Edomite border (Josh. 15:21), the home of Benaiah (2 Sam. 23:20; 1 Chron. 11:22). Modern Khirbet Hora, about ten miles northeast of Beer-sheba, may be the site of ancient Kabzeel. The city is called Jekabzeel in Neb. 11:25.

Kadesh (kay´dish), a city in ancient Palestine. **1** Kadesh-barnea (kay´desh-bahr-nee´ah) or Qadesh, 'Ain Kadeis, 'Ain el-Qudeirat or Gedeirat, a place in the wilderness of Paran between Shur and Edom, or alternatively in the Wilderness of Zin, where it formed the south border of Canaan and the west border with Edom. Abraham dwelt in the area (Gen. 20:1). It was the camp for the failed invasion of Canaan from the south (Num. 13–14), after which the Israelites left the area (Num. 20:1–29). At this time Kadesh became an important symbol in the early history of Israel (see Num. 32:8; 33:36–37; Deut. 1:2, 19, 46; 2:14; 9:23; 32:51; Josh. 10:41; 14:6–7; 15:3; Judg. 11:16–17). The name En-mishpat is based on a geographical origin (etiology) story about the decisions made there (Gen. 14:7) and is another name for Kadesh. Miriam died there (Num. 20:1). It was there that the Hebrews were camped when they were denied permission to traverse Edom by the king of Edom (Num. 20:14–21). Modern 'Ain-Gedeirat, the location of ancient Kadesh, has a tenth-century B.C. fortress as well as a reservoir 75 feet square and 9 feet deep dating from the pre-Roman era. **2** Kadesh-on-the-Orontes, where Rameses II fought with the Hittites (ca. 1286 B.C.). While the Hittites were able to prevail in the battle, they were unable to press the advantage. S.B.R.

The oasis at 'Ain-Gedeirat in southern Israel, the location of the biblical Kadesh-barnea.

Kadmiel (kad´mee-uhl; Heb., "God is of old" or "God goes before"), the father of a Levite family (Ezra 2:40; Neh. 7:43) who supervised reconstruction in the Jerusalem Temple in the late sixth century B.C. (Ezra 3:9) and participated in various services there (repentance, Neh. 9:4, 5; sealing the covenant, 10:9; thanksgiving, 12:8; praise and thanks, 12:24).

Kadmonites (kad´muh-*n*its; Heb., "easterners"), a tribe or people living in terrain west of the Euphrates River. In Gen. 15:19 they are paired with other nomadic people, the Kenites and Kenizzites, whose lands were promised to Abraham's descendants. The name may reflect simply the direction of their territory from the standpoint of the biblical writer in Palestine.

Kain (kayn). **1** An alternative name for the clan called Kenites (Num. 24:22, KJV: "the Kenite"). **2** A city of Judah (Josh. 15:57, KJV: "Cain"), whose location may be modern Khirbet Yaqin, about seven miles southeast of Hebron, traditionally viewed as a Kenite city. Arab tradition associates it with Abraham's seeing Sodom and Gomorrah destroyed (Gen. 19:24–28).

Kallai (kal´*i*), the head of a priestly family in postexilic Judah under the high priest Joiakim (Neh. 12:20).

Kanah (kay´nuh; Heb., "reed"). **1** A small brook, the modern Wadi Qanah, that forms part of the boundary between the tribes of Ephraim and Manasseh (Josh. 16:8; 17:9). It flows generally west and southwest, joining the Yarkon before emptying into the Mediterranean Sea north of present-day Arsuf. **2** The north border town of the tribe of Asher (Josh. 19:28), modern Qana (not NT Cana) about six miles southeast of Tyre.

kaph (kaf). ***See*** Caph.

Kareah (kuh-ree´uh; Heb., "bald"), the father of Johanan, a military commander in Judah at the beginning of the Exile (2 Kings 25:23; Jer. 40:8).

Kattath (kat´uh), a town of the tribe of Zebulun (Josh. 19:15) whose location is unknown. It may be identical to Kitron (Judg. 1:30).

Kedar (kee´duhr; Heb., "dark"), a confederation of Arab tribes based in the north Arabian desert. In Gen. 25:13 and 1 Chron. 1:29 Kedar is one of the twelve sons of Ishmael. The Kedarites were a major force from the late eighth century B.C. until the rise of the Nabateans in the fourth century B.C. and are frequently mentioned in Assyrian and Neo-Babylonian sources. They raided lands on their eastern and western borders and controlled the eastern trade route from Arabia to the Fertile Crescent. The later extent of their influence is illustrated by a silver bowl dated to the fifth century B.C. from modern Tell el-Maskhuta in the eastern Nile delta dedicated to the goddess Han-Ilat by "Qaynu the son of Gashmu the king of Kedar"; this Gashmu is the same as "Geshem the Arab" of Neh. 2:19 and 6:1.

In the Bible the military might of the Kedarites is indicated by reference to their archers and warriors (Isa. 21:16–17). Thus, although they dwelt in the eastern desert in dark tents (Isa. 42:11; Jer. 2:10; 49:28; Ps. 120:5; Song of Sol. 1:5) and were herders (Isa. 60:7; Jer. 49:29), their "princes" traded with Tyre, which lay on the coast of the Mediterranean Sea far to the north and east (Ezek. 27:21). Their being singled out in Isaiah and Jeremiah as objects of oracles shows their importance and corresponds to what we know of them from nonbiblical sources. ***See also*** Geshem.

M.D.C.

Kedemah (ked´uh-muh; Heb., "eastern[er]" from the root *qdm* meaning "front"), the "front" or "beginning" of the day is in the east, hence the sense of the word. It is the name of one of Ishmael's sons, and thus of an Arabian tribe (Gen. 25:15; 1 Chron. 1:31).

Kedemoth (ked´uh-moth), the wilderness area east of Jordan from which Moses sent a message to Sihon requesting permission to pass through his land (Deut. 2:26). Later it appears as a levitical city within the territory of Reuben (Josh. 13:18) assigned to the Merarite families (Josh. 21:37; 1 Chron. 6:79). Among the modern places identified as the location of Kedemoth are Kasr ez-Za'faran, Khirbet er-Rumeil or 'Aleiyan northeast of Dibon, and es-Saliyeh southeast of Dibon. However, the location of the site remains uncertain. ***See also*** Dibon; Merari; Reuben; Sihon.

Kedes (kee´dis). ***See*** Kadesh.

Kedesh (kee´dish; Heb., "to be holy"), a name for several places with ancient sanctuaries; they are often difficult to distinguish from one another. **1** Kedesh-naphtali, a place allotted to the tribe of Naphtali (Josh. 19:37); it is the town from which Barak was called (Judg. 4:6) and where he gathered his forces (4:10). Modern Khirbet Qedish in southeastern Galilee is a more likely site for the Israelite forces to assemble than 2 below. **2** Kedesh in Galilee, a site identified with modern Tell Qadis northwest of Lake Huleh. It was set apart as a city of refuge and levitical town (Josh. 20:7; 21:32; 1 Chron. 6:76). The Kedesh where Heber pitched his tent and Sisera escaped (Judg. 4:11, 17) was probably this northern site, near Canaanite Hazor and away from the center of Israelite strength. It was captured by Tiglath-pileser III in the reign of Pekah (ca. 735–732 B.C.), king of Israel (2 Kings 15:29). **3** Kedesh in Issachar, the levitical city of Issachar according to 1 Chron. 6:72, although the parallel Joshua passage (21:28) identifies it as Kishion, as does Josh. 19:20. This may be the town listed after Taanach and Megiddo whose king was taken by Joshua (Josh. 12:22); perhaps it is to be identified with modern Tell Abu Qudeis, which lies between the two sites. **4** Kedesh in Judah, a city near the southern border (Josh. 15:23). ***See also*** Kadesh. N.L.L.

Keilah (kee-*i*´luh), a town of Judah (Josh. 15:44; 1 Chron. 4:19) identified as modern Khirbet Qila, located eight and a half miles northwest of Hebron. It was repaired by postexilic Levites (Neh. 3:17–18), but it is more prominent as a town rescued by David from Philistine assault during threshing season (1 Sam. 23:1–5) and used by David as a haven from Saul until fear of betrayal by the local people moved him to seek safety in the hills (1 Sam. 23:6–14).

Kemuel (kem´y*oo*-uhl), a name of uncertain derivation or meaning. **1** A cousin of Abraham and ancestor of the Aramaeans (Gen. 22:21). **2** A leader of the tribe of Ephraim, appointed by Moses to assist in dividing the land of Canaan into tribal territories (Num. 34:24). **3** A Levite whose son was that tribe's official representative in David's government (1 Chron. 27:17).

Kenan (kee´nuhn), antediluvian Israelite ancestor. The son of Enosh (Gen. 5:9; 1 Chron. 1:2) and the father of Mahalalel (Gen. 5:12; 1 Chron. 1:2) and others (Gen. 5:13), he lived a legendary 910 years (Gen. 5:14). Some suggest the name is an alternate form of Cain, since it is sometimes found as Cainan (Luke 3:37).

Kenath (kee´nath), an important city of Bashan guarding the desert highway from Rabbath-ammon to Damascus, located about 50 miles south-southeast of the latter. Mentioned in the Egyptian Execration Texts, the annals of Thutmose III, and the Amarna correspondence, the city was conquered by Nobah of Manasseh and renamed after him (Num. 32:42). Subsequently the city fell under Aramaean control (1 Chron. 2:23) and by NT times was one of the Decapolis

cities (Canatha). It has been identified with the extensive ruins of Qanawat.

Kenaz (kee´naz). **1** The grandson of Esau and the Edomite clan chief (Gen. 36:11, 42; 1 Chron. 1:36). **2** The father of Othniel and younger brother of Caleb (Josh. 15:17; Judg. 1:13; 3:9; 1 Chron. 4:13). **3** The grandson of Caleb (1 Chron. 4:15).

An ethnic group known as the "Kenizzites" were one of the pre-Israelite peoples of Canaan, mentioned once in the OT (Gen. 15:19). Whether they should be connected with the Kenaz of Gen. 36:11, however, is uncertain.

Three times (Num. 32:12; Josh. 14:6, 14) Caleb is referred to as "Caleb the son of Jephunah the Kenizzite." Presumably this designation should be related to the Kenizzites of Gen. 15:19. D.A.D.

Kenites (ken´*i*ts), an ethnic group listed among the pre-Israelite inhabitants of the land of Canaan (Gen. 15:19). Their name is popularly derived from "smith" (Heb. *qayin*), a theory supported, but not proven, by the fact that the Kenites lived in northern Sinai, a region of copper mining and smelting in ancient times (cf. Num. 24:17–22). Moses' father-in-law, Jethro (or Hobab), a priest of Midian (Exod. 2:15–16; 3:1; 18:1; Num. 10:29), is identified in Judg. 1:16 and 4:11 as a Kenite. In view of the fact that Moses first encountered Yahweh in the service of the priest Jethro, and since Jethro later blessed Moses, offered sacrifice to Yahweh, and instructed Moses regarding delegation of authority (Exod. 18:17–27), it has been speculated by some scholars that Moses learned Yahwism from the Kenites (the so-called Kenite Hypothesis). The evidence, however, is not adequate to support this view.

Some Kenite families evidently accompanied the Israelites to the Plains of Moab, for the descendants of Moses' father-in-law, the Kenite, went up from the city of palms (presumably Jericho) with the men of Judah to live among the people of the wilderness of Judah, in the Negeb near Arad (see Judg. 1:16). One Kenite family from this Negeb community, Heber and his wife Jael, migrated north to settle in Zaanannim, near Kedesh (probably just northeast of Mt. Tabor), and Jael subsequently killed Israel's enemy Sisera in her tent (Judg. 4:11, 17–22; 5:24–27). In Saul's campaign against the Amalekites of northern Sinai, he sent word to the Kenites to separate themselves from the Amalekites; Saul wanted to spare the Kenites, since they had shown "kindness to all the people of Israel when they came up out of Egypt" (1 Sam. 15:6). During Saul's reign (late eleventh century B.C.) a section of the Negeb, evidently in the Arad area (cf. Judg. 1:16), was known as "the Negeb of the Kenites" (1 Sam. 27:10). David, while living in Ziklag, sent gifts of spoil to some of the "cities of the Kenites" in southern Judah (1 Sam. 30:29). The tent-dwelling Rechabites (Jer. 35) were evidently Kenites (1 Chron. 2:55). ***See also*** Cain; Jethro. D.A.D.

Kenizzites (ken´uh-z*i*ts; also Kenezzites). ***See*** Kenaz.

Keren-happuch (kair´uhn-hap´uhk; Heb., "horn of antimony" [black eye-shadow]), the third of Job's latter-day daughters, along with Jemimah and Keziah (in Hebrew Jemimah means "dove" and Keziah means "cassia" [a perfume]). While the three earlier daughters (Job 1:2) were unnamed, like the sons in both prologue and epilogue of the book of Job, these daughters are named, and, uncharacteristically for the time, they receive inheritances along with their brothers. Thus the epilogue in part resembles, yet transforms, the scene presented in the prologue, reflecting the transformation of vision effected through the dialogues of 3:1–42:6. ***See also*** Job, The Book of.

Kerioth (kair´ee-oth; Kirioth, Amos 2:2). **1** A town in the mountains of Idumea, west of the southern shore of the Dead Sea, the Kirioth-hezron of Josh. 15:25. **2** A city in Moab (Jer. 48:24, 41). Numerous sites have been proposed by modern archaeologists. It may have been a royal city of some sort, as Amos 2:2 refers to its royal palaces. Line 13 of the Moabite Stone refers to its having a principal sanctuary of the god Chemosh. ***See also*** Moabite Stone, The.

kerygma (ki-rig´muh), the transliteration of a Greek noun usually translated "preaching" but indicating the content of the preaching more than the act. In the NT, that content is the "gospel," i.e., the "good news" of God's redemptive activity in the life, death, and resurrection of Jesus (Matt. 12:41; Luke 11:32; Rom. 16:25; 1 Cor. 1:21; 15:14; Titus 1:3). ***See also*** Preaching.

kesitah (kes´i-tah), a Hebrew unit of value, equivalent unknown. Jacob bought land from the Shechemites for a hundred kesitahs (Gen. 33:19; see also Josh. 24:32). Here the kesitah is connected with God's promises and fulfillments to Israel. Job's kin, as instruments of God's restoration, each present him with a kesitah and a gold ring (Job 42:11). In each instance, the kesitah figures in fullness of fortunes under God's aegis.

Keturah (ki-ty*oo*r´uh), a wife or concubine of Abraham, after the death of Sarah, who bore him six sons: Zimran, Jokshan, Medan, Midian, Ishbak, and Shuah (Gen. 25:1–6; 1 Chron. 1:32–33). This genealogy links these six tribes and their descendants, who settled to the south

and east of the Hebrews, with the descendants of Abraham. It also marks the partial fulfillment of God's promise to Abraham that his offspring would be like "the stars of the sky" (Gen. 15:5).

key, a device to open a lock. In the Bible it is often a symbol of the steward's authority over his master's household and of who gains entry to his master's presence. In the OT, God promises to raise up a new "steward" over Israel and to give him the "key of the house of David" so that what he opens no one will shut and what he shuts no one will open (Isa. 22:22). A similar image in the NT is used of the authority Peter is to have in the emerging Christian community (Matt. 16:19). The "keys" of the kingdom suggest the image of the steward with the keys to the rooms and storechambers of the house. Not only does the bearer of the "key" have authority to determine who is admitted, the chief steward also has responsibility for overseeing all that takes place in the master's house. Rev. 3:7 presents Jesus as the one who possesses the "key of David." Some interpreters hold that this passage contrasts Jesus' "opening and shutting" with Jewish exclusion of Christians from their synagogue (called "synagogue of Satan," 3:9). Others think that the image is meant to encourage Christians to continue in their attempts to evangelize the Jews, since in other contexts Paul often speaks of missionary activity as an "open door" (1 Cor. 16:9; 2 Cor. 2:12).

Other uses of "key" in Revelation refer to the keys of Hades and death held by Jesus (1:18). Rabbinic tradition held that God reserved three keys to himself, the power over rain, the womb, and the tomb (*b. Sanh.* 113a). Heavenly angels wield the keys to the abyss from which the plague of locusts is released (Rev. 9:1) and in which Satan is to be bound (20:1). P.P.

Keziah (ki-zī´uh). ***See*** Keren-happuch.

Peter receiving "the keys of the Kingdom of Heaven" (cf. Matt. 16:19), as depicted on an eleventh-century enamel plaque.

Khapiru (hah-pee'*roo*), a term meaning "outcast," once thought to be the source of the word "Hebrew." The correct form of this pejorative social term was *'apiru,* probably with a long vowel in the first syllable. It appears in cuneiform texts, often written with a Sumerian ideogram, *SA.GAZ,* from the Ur III period (end of the third millennium B.C.) through the Late Bronze Age in the Levant (to 1200 B.C.). Cuneiform has only signs with ḫ (= kh) for representing the West Semitic *'ayin;* thus the pseudoform Khapiru, or Habiru, is found in many books.

The *'apiru/SA.GAZ* are "outcasts, outlaws," or "displaced persons, renegades." They served as mercenaries throughout the Fertile Crescent from Anatolia to southern Mesopotamia and Egypt. They were from many races and ethnic groups, and they never had a tribal social organization. At Nuzi on the Tigris, homeless refugees called *'apiru* sold themselves into servitude. In the Hittite Empire they were hired troops. They often sought refuge in hilly regions away from the urban Canaanite centers from which they had fled. They came from the upper class and had often been trained as charioteers. They were recruited by Canaanite leaders who were seeking to seize neighboring territories.

The dynastic state of Amurru was founded with the help of *'apiru* troops. The rulers of Shechem in the Amarna tablets (fourteenth century B.C.), Lab'ayu and his sons, used *'apiru* when trying to conquer the principal towns on the main caravan route. References to them in the Jerusalem Amarna letters led scholars to think that there was some connection between them and the Hebrews in the book of Joshua.

Many theories have been promulgated to explain the connection between the *'apiru* and the Hebrews (the patriarchs and the invading tribes). None of them are sound, but because of the strong desire to find some extrabiblical allusions to the patriarchs and to Joshua's campaigns, the theories continue to have their appeal. Actually, the proto-Israelites probably stem from another group, the tribal pastoralists called Sutu in cuneiform and *Shasu/Shosu* in Egyptian; these latter are never confused with the *'apiru.* A new theory, that the *'apiru* were revolting peasants, has no textual support, either in the Bible or in extrabiblical documents. ***See also*** Hebrew; Hebrews. A.F.R.

Kheleifeh, Tell (kel-ay´fuh, tel). ***See*** Ezion-geber.

Khirbet et-Tannur (kihr´bet et-tahn´uhr), the ruins of a Nabatean temple on top of a prominent mountain that rises from the floor of Wadi el-Hesa (the biblical River Zered). The archaeologist Nelson Glueck excavated this isolated and elaborately decorated temple complex in 1937. Built at the end of the second century B.C., the

temple was used into the second century A.D. A variety of artistic and architectural styles are represented here, along with a host of deities, including the fertility goddess Atargatis. ***See also*** Nabatea, Nabateans.

Khirbet Kerak (kihr'bet kair'ak; Arabic, "ruins of the fortress"), a location not mentioned in biblical texts, presumably because it stood unoccupied in the periods from the end of Middle Bronze Age II (1600 B.C.) until Persian occupation (after 538 B.C.). The 60-acre site was occupied from Chalcolithic times (4000–3000 B.C.) until its abandonment and from the Persian through late Roman times (fifth century A.D.). It is best known for a large quantity of Early Bronze III (2500 B.C.) pottery carrying its name (Khirbet Kerak Ware), and its strategic value lay in its location just west of the start of the Jordan River at the south end of the Sea of Galilee. A nearby ford allowed traffic heading toward Damascus and other points north and east to cross the Jordan. The site was also known as Beth-yerah (Heb., "house of the moon") and Philoteria (named for a sister of Ptolemy Philadelphus [285–246 B.C.] in the Hellenistic period). R.S.B.

Khirbet Qumran (kihr'bet koom'rahn). ***See*** Qumran, Khirbet; Scrolls, The Dead Sea.

Kibbroth-hattaavah (kib'roth-huh-tay'uh-vuh; Heb., "graves of lust"), a locale between Mount Sinai and Hazeroth (identified with modern Rueis el-Ebeirij). It was there that the Israelites died by plague as they consumed quail rained down upon them by Yahweh in answer to their complaints. The plague punished their lusting after the meat, fish, and other delicacies they had enjoyed in Egypt (Num. 11:31–34; cf. 1–6; 33:16–17; Deut. 9:22).

kid, a young goat, regarded as a delicacy when prepared for food (cf. Luke 15:29). In the OT it is also a symbol for helplessness (Judg. 14:6); in God's kingdom even such an animal will be safe from its natural enemies (Isa. 11:6). ***See also*** Goat.

kidney, part of the group of fat pieces burnt on the altar as the well-being, purification, reparation, and priestly consecration offerings (Exod. 29:22; Lev. 3:4; 4:9; 7:4). The Bible also uses the term to refer to the human organ (Job 16:13; Lam. 3:13). Metaphorically, the term can denote the mind or conscience (Jer. 11:20; 20:12; Ps. 139:13). Once it refers to wheat of high quality (Deut. 32:14; lit., "the kidney fat of wheat"). ***See also*** Fat.

Kidron (kid'ruhn), the valley that lies east of Jerusalem between the Temple Mount and the Mount of Olives. The valley runs on a north-south axis, joining the Tyropoeon and Hinnom valleys south of the Jebusite and Davidic city of Jerusalem. Originally the Gihon spring flowed into the Kidron, but Hezekiah's tunnel brought the water of Gihon to the Pool of Siloam inside the city. From Jerusalem, the Kidron Valley extends southeastward through the Wilderness of Judah to the Dead Sea.

Aerial view of the Kidron Valley, which separates the Temple Mount area in Jerusalem from the Mount of Olives to the east (left).

The Kidron Valley lay just beyond the eastern boundary of Jerusalem during the monarchy (1025–586 B.C.). David fled from Jerusalem across the Kidron during Absalom's rebellion (2 Sam. 15:23). Nearly a thousand years later, Jesus, with his disciples, crossed the Kidron after the Last Supper on the way to Gethsemane (John 18:1).

The Kidron was also the place where idols and cult objects from pagan shrines were destroyed by the reformer kings Asa (1 Kings 15:13), Hezekiah (2 Chron. 29:16; 30:14), and Josiah (2 Kings 23:4–6). Kidron may have been chosen because it was just outside the boundaries of the city and convenient to the Temple.

On the east side of Kidron are a number of ancient tombs along with a modern Jewish cemetery. Most notable of the ancient tombs are the Pillar of Absalom, the Cave of Jehoshaphat, the Tomb of Bene Hezir, and the Tomb of Zachariah. Each of these monuments appears to belong to the Hellenistic period of the third and second centuries B.C.

The Gihon spring is on the west side of the Kidron. Recent excavation has uncovered a Jebusite water shaft that led to this spring centuries before Hezekiah constructed his famous tunnel. Remains of a water channel, cut into the bedrock of the hillside, have also been recovered. This water channel brought water from Kidron to the Pool of Shelah, below the Pool of Siloam, during the early monarchy (eleventh–tenth centuries B.C.).

Kidron is often identified as the site of the king's garden (Neh. 3:15). Similarly Kidron is frequently identified with the "King's Valley" where Absalom built his monument, which later became his tomb (2 Sam. 18:18). Despite these popular identifications of Kidron, how-

ever, there is no definite evidence linking it either to the King's Valley or to the king's garden. The tombs popularly ascribed to Absalom and other kings also belong to a later era. ***See also*** Gihon; Jerusalem; Olives, Mount of. J.F.D.

king, in both the OT and the NT a term designating a male sovereign who exercised ultimate political authority over a city-state, a nation-state, or an empire. A king generally held office for life, and monarchies in the biblical world were generally hereditary.

In the OT, the Israelite king may also be referred to as "prince" (1 Sam. 9:16; 13:14), a title that may point to one who is so designated by God, while "king" is a designation given by people. The king in Israel is also called the "anointed one" (1 Sam. 2:35; Ps. 132:17), from which the term Messiah is derived.

In Ancient Israel: The place of the king in the OT is different from that of the monarch in Egypt and Mesopotamia, where kingship was regarded as a divinely ordained political order that had existed from nearly the beginning of time. In Israel, by contrast, kingship was a relatively late institution. Before the institution of the monarchy, early Israel was ruled by what were essentially charismatic clan chieftains. Kingship developed in response to both internal pressures and external threats, the principal of which came from the Philistines (1 Sam. 13:19–21), which called forth greater political unity. Kingship was not instituted, however, without serious reservations, misgivings reflected in the assessment of the role and function of the king, especially in his relationship to divine authority. Jotham's fable (Judg. 9:7–15) reflects opposition to the institution of kingship in Israel with its moral that only a useless person (symbolized by the bramble) would ever accept the office.

The accounts of the institution of the monarchy in 1 Sam. 1–12 evidence both anti- and promonarchical tendencies. The so-called antimonarchic source (1 Sam. 7:3–8:22; 10:17–27; 12) brands Israel's attempt to set up a stable political government by imitating nations around her as a rejection of the Lord's rule over his people Israel (1 Sam. 8:7). In this source, God is pictured as reluctantly conceding to the initiative of his people. Samuel warns the people of the "ways of the king" (1 Sam. 8:10–19) in a passage that lists monarchic excesses. In the promonarchic source (1 Sam. 9:1–10:16; 11), however, there is nothing about divine disapproval, and in fact Samuel, as God's prophet, takes the initiative in finding and anointing Saul as the first king, who then is further distinguished by being possessed by "the spirit of God." But even when the objection to the monarchy waned in Israel, the king's power was not unrestrained and was repeatedly checked by the terms of God's covenant with his people. The king in Israel, even David who was later regarded as the ideal king, was never an absolute lord over his subjects. He could not expropriate land with impunity (2 Sam. 24:24; 1 Kings 16:24; 21:4), nor was he exempt from moral and civil law generally (Deut. 17:14–20). Even with these restraints, however, Israel did know some despotic monarchs who were guilty of apostasy and lawlessness, chief among them being Manasseh (2 Kings 21:1–18). Excesses in monarchical power were one of the main things to call forth prophetic rebuke, and there is recorded a whole series of prophet-king encounters, beginning with Nathan-David and continuing until the dissolution of the monarchy with the fall of the two nation-states of Israel and Judah.

God as King: The prophetic critique of kingship is based upon the conviction that God was the original and only king of Israel and, later by extension, of all peoples (Jer. 10:7–10). The formula introducing a prophetic oracle, "Thus says the Lord," was in fact originally a formula announcing a message from a monarch. Thus the form of God's covenant with Israel resembles that of a suzerainty treaty between king and people. The king in Israel was one of the people and, as such, Yahweh's vassal and servant. Even though the southern kingdom of Judah believed that God's covenant included an everlasting covenant guaranteeing the perpetuity of the Davidic line, there was never the accompanying belief in the divinity of the king.

A mythically enlarged or spiritualized conception of kingship is found in the Psalms (Pss. 47; 96–99). For all people to know and worship God who was "a great King above all gods" (Ps. 95:3) became a goal of Jewish apocalyptic and later Christian thought, a goal that is reflected in Jesus' teachings in the synoptic Gospels about the Kingdom of God (Mark 1:14–15; Luke 22:18–30). That this was primarily a religious concept for Jesus, rather than a political or economic one, is reflected in the fact that although Jesus is in the Davidic line (Matt. 4:8–16) and is accused of royal pretensions (Luke 23:2; John 18:33), he repudiated all popular attempts to make him king (Matt. 4:8–10). In the NT apocalyptic book, Revelation, Jesus is described with royal terminology (Rev. 2:5; 3:21; 14:14; 17:14; 19:15–16). ***See also*** God; Kingdom of God; Messiah; Prince; Psalms, The. F.S.F.

kingdom of God, the reign of God, or the realm over which God rules or will rule. Although a number of OT passages contain related expressions, none refers in so many words to the "kingdom of God." According to the synoptic Gospels, the term does constitute a central feature of Jesus' proclamation to his contemporaries. In Matthew, Jesus often speaks instead of the "kingdom of heaven," apparently a circumlocution, or way to avoid using the divine name. The meaning is the same. Related expressions frequently appear in rabbinic literature: most notably, "the age to come" or "the coming

KINGDOM OF GOD

age," in contrast to "the present age." In the Fourth Gospel, Jesus speaks of the kingdom of God in only one passage (John 3:3, 5). Outside the Gospels, it is mentioned in Acts and a few times in Paul's Letters, but nowhere else in the NT. Postbiblical writers sometimes refer to "the messianic age" as an equivalent term.

Old Testament: Related expressions in the OT are found mainly in prophetic writings that look forward to a future time when God's (or Yahweh's) rule or reign will be established on earth (e.g., Obad. 21; Hag. 2:21–23; Zech. 14:9). Then, God's people will no longer suffer oppression at the hands of other nations. A number of other OT texts look for this kind of future era, but without using such expressions. In some prophetic passages, the new era is visualized as one in which Israel, Judah, or the Jewish people will gain the advantage over their erstwhile enemies (e.g., Obad.; Joel 3:19–21). In other texts, the new era is seen as one in which all nations will live at peace, acknowledging, if not also worshiping, Yahweh as their sovereign (e.g., Isa. 2:2–4; 19:19–24; Mic. 4:1–3; Tob. 13:11; cf. Zech. 14:16–19). And in some, the new era will be one of peace and blessing for all creation: humans and other animate beings will enjoy life together without hurting or destroying one another in that transformed world sometimes known as "the peaceable kingdom" (e.g., Isa. 11:6–9; 65:17–25; Hos. 2:18; cf. Ezek. 34:25–28). Several OT prophetic texts look specifically for the coming of David—or a "branch" or descendant of David—to rule as king or messiah in that new age (e.g., Isa. 9:7; 11:1–5; Jer. 30:9; Ezek. 34:23–24; 37:24–26; Amos 9:11; cf. Hag. 2:20–23). Many other texts express hope for the coming of the new age, but without mentioning a new king or messiah (e.g., Isa. 2:2–4; Jer. 31:31–34; Dan. 2:44; 7:13–27; Hos. 2:16–23; Obad. 21; Zech. 14:9; Tob. 13:15–18).

A number of other OT writings affirm that God already reigns or rules over the creation, caring for people and other creatures, bringing about his purposes through them or on their behalf (e.g., Job 38–39; Pss. 104; 145; 147; Isa. 45:1–13; Dan. 4:17; Jon. 1–4; Tob. 13:1–2). That God reigns or rules in history, over the affairs of Israel and other nations, is also often affirmed, especially in Psalms (e.g., 22:27–28; 47; 95–99; see also Dan. 4:3, 34–35). God's reign also takes the form of judgment against Israel or Judah, or other nations (e.g., Jer. 1–11; Ezek. 12–16; Amos 1:3–4:13). In history, however, other forces are at work, preventing the fulfillment of God's purposes, most notably, the perversity of God's own people (e.g., Isa. 1; 3; 5; Jer. 2–8; Hos. 4–10; Amos 2:26–6:13; 8:4–7) and hostile enemy nations (e.g., Isa. 13:1–19:15; Amos 1:3–2:3). Fate and chance are other factors (Eccles. 9:11–12). Thus, so far as most of the OT texts are concerned, the kingdom of God or messianic age has not yet come. Moreover, in certain of the Apocrypha and other intertestamental writings, independent evil powers are understood to be at work, corrupting the faithful and causing grief (see, e.g., Wisd. of Sol. 1:16–2:24; *1 Enoch* 6–16; *2 Enoch* 29:4–5; *Jub.* 1:20; 10:1–13; 15:31–32; and the Dead Sea Scrolls).

New Testament: Many NT texts refer to Satan (or the devil) and his demons (e.g., Matt. 4:8–9; Luke 4:5–6; John 12:31; 14:30; 1 Cor. 2:8; 15:24–27; 2 Cor. 4:4; 1 John 5:19). Their presence and power oppose the establishment or coming of the kingdom of God. Satan and the demons also cause sickness (e.g., Mark 1:32–34; 3:7–27; 9:17–29) and attempt to corrupt the faithful (Matt. 13:19; Luke 22:31–32; 2 Cor. 4:4), even trying to tempt Jesus himself to renounce his mission (Matt. 4:1–11; Luke 4:1–13; cf. 1 Cor. 2:8).

According to the synoptic Gospels, the coming of the kingdom of God is at the core of Jesus' teaching and preaching. Many synoptic texts clearly refer to the coming of the kingdom as a dramatic, future event—in some instances, as one that will take place within the lifetime of Jesus' hearers or their contemporaries (e.g., Matt. 4:17; 6:10; 10:7; Mark 1:14–15; 9:1; Luke 10:8–12; 11:2; 21:31). Some verses, however, refer more ambiguously to the kingdom's "coming," without indicating whether Jesus meant that it had already come or that it would come in the future (e.g., Luke 4:43; 9:11). Likewise, a number of passages refer to people's "entering" the kingdom, but without making clear whether doing so was understood to be a present or only a future possibility.

According to the synoptic Gospels, several other events or phenomena are also closely associated with the coming of or entering the kingdom. These include the future coming of the Son of man (frequently referred to by Jesus in the third person, but probably understood to mean Jesus' own future manifestation in that role), the resurrection of the dead of previous generations, the "day" or time of judgment, the sentencing of the unrighteous to torment (or extinction) in Gehenna or hell, and the admission of the righteous to eternal life in the kingdom of God. Some texts also anticipate that in the coming kingdom people will gather at table with the patriarchs and other righteous persons of previous generations (Matt. 8:11–12; Luke 13:28–29; 22:28–30; cf. Rev. 2:7, 17; 3:20). Taken together, these and some other phenomena are sometimes referred to, broadly, as "eschatological" or "parousia" events.

The two references to the kingdom of God in the Fourth Gospel suggest that, although entering the kingdom is a present possibility, believers will have to be "born again" and, perhaps, baptized first (John 3:3–5). Elsewhere, however, the Fourth Gospel urges that entering into "eternal life" is possible for those who believe in Jesus and/or partake of the Eucharist (e.g., John 6:35–58). They need not await the time of judg-

ment. But the same passage states that believers will be raised "at the last day" (John 6:40, 54), and another text indicates that they will enter the "heavenly mansions" only after Jesus has come "again" to take the faithful with him there (John 14:1–3).

According to Acts, the kingdom of God was a central theme in the preaching of Jesus and of the early Christians (Acts 1:3; 28:23; 30–31). These Acts passages do not specify whether the kingdom of God is present or yet to come. But others clearly look for a future occurrence (e.g., Acts 1:6–8; 3:17–21).

Paul's references to the kingdom of God generally indicate that he looked for its coming, or the time for entering or inheriting it, as future (1 Cor. 6:9; Gal. 5:21; cf. 1 Thess. 5:1–2, 23; 2 Thess. 1:5). Paul expected, however, that he himself, along with many of his contemporaries, would be alive when Jesus returned as Lord or Christ. Then, the dead would be raised, and the living "changed" or transformed so as to be ready to take part in the spiritual realm, the heavenly commonwealth (1 Cor. 15:42–54; 1 Thess. 4:13–17; 5:23; Phil. 3:20–21). In some other texts, however, Paul writes that believers, and perhaps all creation, are already undergoing a new birth or transformation, and thus those "in Christ" are already new creatures (2 Cor. 5:16–17; Gal. 6:15). And twice Paul writes as if, perhaps, the kingdom of God was a present realm or reality in which Christians might already participate if they acted worthily (Rom. 14:17; 1 Cor. 4:20).

Expressions closely related to "kingdom of God" are found in Revelation (11:15; 12:20; 21:1–3). Revelation repeatedly assures readers that "the time" is "near" (1:3; 22:10) and that Jesus is "coming soon" (3:11; 22:12; 20). Then, God and the Lamb will "reign for ever and ever" (22:5).

Interpretation: Up to and through the end of the nineteenth century, Christian interpreters of the NT generally thought that when Jesus taught or preached about the kingdom of God he was referring either to the church—an idea favored more in traditional Catholic and Protestant circles—or to one or another of the central concerns of Protestant liberal theology. One of these concerns was with individual religious experience. When, in Luke 17:21, Jesus seemed to say that the "kingdom of God" was "within" (or "in the midst of") his hearers, he must have been referring to the reign of God in human hearts, or to the relation between each soul and God. So, for example, concluded Wilhelm Herrmann and Adolf von Harnack. Protestant liberals who were concerned more with improving the conditions of human society or the "social gospel" saw in Jesus' message of the kingdom of God a model for reconstituting social arrangements (thus, for example, Julius Kaftan, Shailer Mathews, and Walter Rauschenbusch).

It was only near the end of the nineteenth century that a few biblical scholars began to suggest that Jesus more likely thought of the coming of the kingdom of God as a divinely wrought, cosmic transformation of the conditions of life, more congruent with Jewish apocalyptic eschatology of his own time than with concerns of modern clerics or social reformers. The writings of Ernst Issel, Otto Schmoller, and particularly Johannes Weiss, Albert Schweitzer, and Alfred Loisy inaugurated a new era in NT scholarship and debate.

Weiss drew attention to the Lord's Prayer's petition for the *coming* of the kingdom (Matt. 6:10; Luke 11:2) and such summaries of Jesus' and his disciples' proclamation as Mark 1:14–15; Matt. 4:17; 10:7; and Luke 10:8–12, pointing out that these texts clearly referred to a future, if not imminent, coming of the kingdom. If Jesus on rare occasions spoke of the kingdom as though it were present, these were no more than moments of enthusiasm or prophetic hopefulness.

Schweitzer's work, set out initially in *The Mystery of the Kingdom of God* (1901) and *The Quest of the Historical Jesus* (1906), was especially provocative. Schweitzer referred to his own position as that of *konsequente* or "consistent" eschatology, in distinction to the interpretation set out by Weiss, who, so Schweitzer thought, recognized Jesus' eschatological preaching but failed to grasp that his actions likewise were based on eschatological beliefs. According to Schweitzer, Jesus expected the kingdom of God to come in his own lifetime, and when it failed to do so, took upon himself the final "tribulation" that must come first. Jesus did not proclaim an ethic for all times, but rather an ethic for the interim between his own activity and the imminent coming of the kingdom. Once the kingdom came, there would be no need for "ethics," for the conditions of human existence would be completely transformed.

Loisy, a Roman Catholic scholar, argued that Jesus' preaching of the kingdom referred neither to the church nor to religious experience but rather to that dramatic, future coming of the eschatological kingdom—agreeing in effect with Weiss and Schweitzer. He was excommunicated for his work and the Catholic church banned his biblical scholarship for several decades afterwards.

Though many European NT scholars became convinced that Jesus proclaimed an eschatological, future coming of the kingdom of God, Anglo-Saxon interpreters were, for the most part, scandalized. Surely Jesus could not have been mistaken—for the eschatological kingdom never came! Surely Jesus' ethic was more than an ethic for the interim! C. H. Dodd eventually developed his program of "realized eschatology," contending that Jesus' parables showed his belief that the kingdom had already come in some way or other. Dodd and

others also suggested that many of the future-oriented eschatological sayings must have been added by later Christians, perhaps the Evangelists themselves, and were, therefore, not to be viewed as authentic sayings of Jesus. Others urged that Jesus' futuristic, eschatological sayings must be understood symbolically, as referring to ineffable—or, at any rate, noneschatological—realities that either were newly present in his person and ministry or else transcended time and space altogether. In Europe, Rudolf Bultmann—while accepting Weiss's conclusions—argued that Jesus' eschatological message could and should be "demythologized." The underlying message Bultmann found there, valid for all times, was that "now" is always an existential "crisis of decision," an "either/or" situation in which persons are called on to choose between, on the one hand, love for God and neighbor and, on the other, all other interests and claims (particularly their own). For purposes of theology, it was enough that the "Christ event" had occurred. Bultmann's circle of pupils, however, wished to bridge the gap between Jesus' eschatological preaching and the church's later *kerygma* (Gk.), or teachings about him (thus, for example, Gunther Bornkamm, Ernst Käsemann, and James M. Robinson). For them, it was important to insist that Jesus himself understood and proclaimed that the kingdom of God was already "breaking in" to history or "dawning."

Many scholars outside this circle also continued to assert that Jesus so understood and proclaimed—notwithstanding the fact that expressions such as "breaking in" and "dawning" do not appear in any of the Gospels. Likewise, the Westar Institute's "Jesus Seminar" members generally agree that the few authentic Jesus sayings they allow show that he emphasized the presence of the kingdom of God (see, e.g., writings by Marcus J. Borg, John Dominic Crossan, and Robert W. Funk). If there was a future dimension, it was of lesser or no importance. In contrast, proponents of the "theology of hope," such as Wolfhart Pannenberg and Carl Braaten, have been more willing to acknowledge the futuristic dimension of Jesus' and early Christian expectations and have emphasized the latter-day ethical, existential, and theological importance of such futuristic beliefs. ***See also*** Apocalyptic Literature; Eschatology; Jesus; Judgment, Day of; Messiah; Millennium; Parousia; Resurrection; Satan; Son of Man.

Kings, the First and Second Books of the, the eleventh and twelfth books of the OT.

Name and Contents: These two narratives, the fifth and sixth books of the second division of the Hebrew Bible, the Prophets, were originally considered one book in Jewish sources (*t. B. Bat.* 14a). The Greek tradition, which is followed by the Vulgate, treated 1 and 2 Kings together with 1 and 2 Samuel as a single composition and divided the whole into the "four books of Reigns/Kingdoms" (Gk. *Basileion*).

1 and 2 Kings is the major history of the Israelite monarchy, covering the four centuries from the death of David and the succession of Solomon (ca. 965 B.C.) until the destruction of Jerusalem and the Exile (586 B.C.). It is an eclectic work, whose editors(s) drew upon a variety of earlier sources, all of which have been subsumed under a single point of view. The tragic series of events in the history of Israel—the breakup of the United Kingdom into the separate states of Judah and Israel, the fall of Samaria and ultimately of Jerusalem and its Temple—are explained as the Lord's just punishment of the violators of his law.

Structure: 1 Kings 1–11 covers the death of David, the reign of Solomon, and the building of the Temple. 1 Kings 12–2 Kings 17 concerns the Divided Monarchy, from the founding of the kingdom of Israel by Jeroboam I until the Assyrian conquest, and the kingdom of Judah from Rehoboam until Ahaz. 2 Kings 18–25 is about the kingdom of Judah from Hezekiah until the Babylonian conquest. Uniting the whole is a fixed, schematic framework, particularly evident in the history of the Divided Monarchy. The editor provided an opening and closing formula for each king in which he noted: the date of accession according to the years of the reigning king in the neighboring kingdom; the age of the king at accession (only for the kings of Judah); the length of his reign; the name of his mother (only for kings of Judah); an evaluation; a reference to "Annals" (e.g., "Book of the Chronicles of the Kings of Israel"); the death of the king and his burial; and the succession of his son.

Sources: The editor referred his original readers to three works available to them for further details that he did not include in his book: the "Book of the Annals of Solomon" (1 Kings 11:41); the "Books of the Annals (or Chronicles) of the

1 AND 2 KINGS

Kings of Israel" (1 Kings 14:19; 15:31; and fifteen other references); the "Books of the Annals of the Kings of Judah" (1 Kings 14:29; 15:7; and thirteen other references). These works, which are otherwise unknown to us, contained information on the political and military exploits as well as building projects accomplished by the kings. In addition, the "Annals of Solomon" highlighted that king's wisdom, which "was greater than the wisdom of the Kedemites [easterners] and than all the wisdom of the Egyptians" (cf. 1 Kings 3:16–28; 5:9–14; 10:1–13, 23–25; 11:41) and was likely the product of the wisdom circle at court. It, too, has been lost.

In addition to the books specifically mentioned by name, other unacknowledged sources fill out the editorial frame. Temple archives in Jerusalem supplied data on Temple affairs; e.g., architectural plans and materials used in its construction (1 Kings 6–7); alterations and innovations in structure and service (2 Kings 12:5–17; 16:10–16; 22:3–9); and the looting of the Temple treasury (1 Kings 14:26; 15:18; 2 Kings 12:19; 16:17–18; 18:15–16). Prophetic stories extend the history of the Northern Kingdom; they center, for the most part, around the lives of Elijah the Tishbite (1 Kings 17–19; 21; 2 Kings 1–2:18) and his disciple Elisha (1 Kings 19:15–21; 2 Kings 2:19–8:15; 13:14–21), as well as other prophetic individuals (e.g., Micaiah, 1 Kings 22; cf. 1 Kings 20). The peculiar diction and the unique social setting depicted in these narrative cycles suggest that a northern prophetic document—dated to the mid-eighth century B.C. (?)—was utilized by the editor of Kings.

Historiography: The editorial judgments, their spirit, and their distinctive language, conform with the ideals articulated in the book of Deuteronomy (esp. Deut. 12), and so the editor can be conveniently labeled a member of the Deuteronomistic school. This Deuteronomist's evaluation of each king is phrased: "he did what was pleasing/what was not pleasing to the Lord." This judgment is based upon a single criterion: religious loyalty to the God of Israel as specified in the teaching of Moses. Thus all worship was to be concentrated at one chosen site and care taken not to imitate the practices of other nations in service of the Lord. The northern kingdom of Israel, born in revolution against the house of David, was condemned from the start; its first king, Jeroboam son of Nebat, had founded royal shrines outside

Elijah, with raised arm, as the fire of the Lord falls upon the bull offering, in the contest with the prophets of Baal (1 Kings 18:30–39); panel at the third-century A.D. synagogue at Dura-Europos.

1 AND 2 KINGS

Jerusalem at Bethel and Dan, where golden calves symbolized the Lord's presence (1 Kings 12:25–32). The Deuteronomist adjudged every king of Israel sinful because he followed the ways of Jeroboam (cf. e.g., 1 Kings 15:25–26, 33–34).

As for the kings of Judah, all but two were sinful, for instead of checking the worship at the rural shrines ("high places") in favor of the Jerusalem Temple, they allowed the nation to continue worshiping as they had done in the pre-Solomonic era. Only Hezekiah and Josiah come in for praise, for their wholehearted trust in the Lord, just as David their ancestor had done, and for their religious reforms, i.e., abolishing the "high places" and purifying Temple rites (2 Kings 18:1–8; 22:1–2; 23:24–25).

The inclusion in the book of Kings of the Northern prophetic document exemplifies another principle in the Deuteronomistic world view: the word of the Lord, uttered by his prophets, does not go unfulfilled (cf. 1 Kings 8:20; 12:15; 15:29; 16:12, 34; 2 Kings 1:17; 23:16–18; 24:2). Elijah put a curse on the royal sponsors of the cult of the Tyrian Baal (1 Kings 18; 21:20–24), justifying Jehu's execution of the house of Ahab (2 Kings 10:10–11, 30). In similar fashion, the prophetic tradition of Isaiah's prediction that the Lord "will defend this city [i.e., Jerusalem] to save it for my own sake and for the sake of my servant David" (Isa. 37:35) and its fulfillment was grafted on to the history of Hezekiah (2 Kings 18:17–19:37).

Date of Composition: The OT scholar M. Noth proposes seeing Kings as part of a larger historical work, including Deuteronomy, Joshua, Judges, and Samuel, dated ca. 550 B.C. This Deuteronomistic composition sought to explain to an exilic audience the reason for Israel's failure to possess the Promised Land and maintain its national existence. Generation after generation broke with the Lord's covenant, inextricably leading to punishment through exile.

Another OT scholar, F. M. Cross, argues for a double redaction of Kings: a first edition at the time of King Josiah's cultic reform (ca. 620 B.C.), which held out hope for salvation through a renewed Davidic monarchy, and a second edition, which attributed the destruction and Exile to the inexpiable sin of Manasseh.

OUTLINE OF CONTENTS

The First and Second Books of the Kings

- I. The reign of Solomon (1 Kings 1:1–11:43)
  - A. Solomon's appointment as king; David's death; consolidation of power (1 Kings 1:1–2:46)
  - B. Solomon's endowment with wisdom; the king's wise judgments (3:1–28)
  - C. Organization of the kingdom; wealth and wisdom (4:1–5:14)
  - D. Building and dedication of the Temple and the royal palaces (5:15–8:66)
  - E. Solomon's vision; eternal dynasty conditioned upon obedience to the law (9:1–9)
  - F. Administration of the kingdom; visit of Queen of Sheba (9:10–10:29)
  - G. Solomon's apostasy, adversaries, and death (11:1–43)
- II. The Divided Monarchy (1 Kings 12:1–2 Kings 17:41)
  - A. Division of the kingdom; rebellion of Jeroboam in Israel against Rehoboam (1 Kings 12:1–33)
  - B. Prophetic activity during Jeroboam's reign (13:1–14:20)
  - C. Synchronized history of Israel and Judah, the early ninth century (14:21–16:14).
  - D. Rise and downfall of the house of Omri; reign of Ahab; the prophets Elijah and Elisha; the rebellion of Jehu (1 Kings 16:15–2 Kings 10:31)
  - E. Synchronized history of Israel and Judah, mid-ninth–mid-eighth centuries (2 Kings 10:32–16:20)
  - F. The end of the Northern Kingdom, Israel, 720 B.C. (17:1–23)

  - E. The end of the kingdom of Judah; the exile of 597 B.C.; the destruction of Jerusalem, 586 B.C. (24:8–25:21)
  - F. Gedaliah as Babylonian governor; the release of Jehoiachin from prison (25:22–30)

The present generation of scholars is much engaged with the question of the source material available and used by the Deuteronomistic creator of Kings. Some (e.g., J. van Seters) date the book late, to the exilic or postexilic period, and see it as inspired by Babylonian (and even Greek) modes, with many subsequent additions. Yet others still confirm that Kings is basically a pre-exilic composition, which grew through successive editions.

There is also reason to believe that a pre-Deuteronomistic work treating the history of the Northern Kingdom has been incorporated in Kings. The signs for this early book, which contravene the general tendencies of the total work, are the sympathetic approach to certain Israelite kings (e.g., 2 Kings 13:4–5, 23; 14:25–27), the preservation of the Elijah-Elisha cycles, the contradictory chronological data. ***See also*** Judah, Kingdom of; Samaria, District of.

King's Garden, the royal gardens in Jerusalem, situated in the tract before the confluence of the Kidron and Hinnom valleys and irrigated by the Siloam Pool and En-rogel. From the City of David, the gardens were reached by descending the steps from the Fountain Gate (Neh. 3:15). Through this exit, King Zedekiah fled besieged Jerusalem in 586 B.C. (2 Kings 25:4).

King's Highway, the (Heb. *derek hammelek,* "the royal way"), a route by which Moses sought to lead the Hebrews through Edom and Moab (Num. 20:17; 21:22; cf. Deut. 2:17). Although it is possible that *derek hammelek* was nothing more than the common designation for a public road that ran through a particular region (as in the use of *harran sarri* for a number of roads in Mesopotamia), most scholars—especially after Nelson Glueck—use "King's Highway" as a proper name for the major international route that traversed the entire length of Transjordan's plateau. Specifically, this roadway ran from Damascus to the Gulf of Aqabah, connecting many important towns in between (e.g., Ashtaroth, Rabbath-ammon, Dibon, Kir-hareseth, Bozra, Ezion-geber). Known later in Arabic as *Tariq es-Sultani,* the Sultan's Highway, an actual roadway was repaired by King Mesha of Moab in the ninth century B.C. (cf. *Mesha Inscription,* line 26). The antiquity of this route is evident in the itinerary recorded in Gen. 14:5–6. The Via Nova of the Roman emperor Trajan (A.D. 98–117), which was constructed early in the second century A.D., and one of Jordan's modern highways follow closely the line of the ancient road. ***See also*** Road.

G.L.M.

Kings of Judea and Israel. ***See*** Chronology, Old Testament.

King's Pool, a reservoir in the royal gardens at Jerusalem (Neh. 2:14), probably the Pool of Shelah receiving water from the Gihon spring. It may be identical with the Upper Pool (Isa. 7:3).

King's Vale, the (KJV: "King's Dale"), the valley of Shaveh (RSV: "King's Valley") in Gen. 14:17–18 where Abraham met the king of Sodom and also Melchizedek. In 2 Sam. 18:18 it is the location of Absalom's monument near Jerusalem. It is probably the Kidron Valley just east of that city.

Kir (kihr). **1** The place to which Assyria's king Tiglath-pileser (ca. 745–727 B.C.) took his Damascus captives (2 Kings 16:9). It was remembered by Amos (9:7) as the ancestral home of the Syrians, to which they were condemned to return (1:5). It may also have been the source of allies in the action Isaiah anticipated against Judah (Isa. 22:6). The precise location is unknown. **2** The Moabite city Kir-hareseth, a Moabite capital (Isa. 15:1), identified with modern el-Kerak. It is the site of a magnificent Crusader castle and is located on a promontory eleven miles east of the Dead Sea and about seventeen miles south of the Arnon gorge. The site was protected by 300-foot drops on all sides of its 2,500-foot-long salient, and stood 3,110 feet above sea level, 4,400 feet above the surface of the Dead Sea.

R.S.B.

Kiriath (kihr´ee-ath; Heb., "city of"; KJV: "Kirjath"), a frequently used prefix of compound names for places, such as Kiriath-arba, Kiriath-arim, Kiriath-baal, Kiriath-huzzoth, Kiriath-jearim, Kiriath-sannah, or Kiriath-sepher.

Kiriathaim (kihr´ee-uh-thay´im; Heb., "two cities"; KJV: "Kirjathaim"). **1** A city in Moab assigned to the tribe of Reuben (Num. 32:37; Josh. 13:19). It is thought to be in the area of modern el-Qereiyat in the Transjordan five and a half

miles north-northwest of Dibon, but the identity is uncertain. It was in Moabite hands (Jer. 48:1, 23; Ezek. 25:9) and is mentioned in the Moabite Stone inscription. **2** A levitical city in the territory of Naphtali (1 Chron. 6:76) given to Gershomites, probably modern Khirbet el-Qureiyeh, likely identical with Kartan (Josh. 21:32). ***See also*** Moabite Stone, The.

Kiriath-jearim (kihr´ee-ath-jee´uh-rim; Heb., "city of forests"; KJV: "Kirjath-jearim"), a city of the tribe of Judah (Josh. 18:14), modern Deir al 'Azhar about eight and a quarter miles north of Jerusalem and just west of Abu Ghosh. Subject of an Israelite treaty with Gibeonites (Josh. 9:17), it carried the earlier name "Kiriath-baal," meaning "city of the god Baal" (Josh. 15:60), and was a border town of the tribes of Judah, Dan, and Benjamin (Josh. 18:14). It had excellent water for which it was sought as a bivouac (Josh. 18:12). The Philistines returned the Ark to this city (1 Sam. 7:2), where it remained until David moved it to Jerusalem (1 Sam. 6:20–7:2 and 2 Sam. 6:1–19, as corrected from 1 Chron. 13:5–14). Jeremiah's contemporary, the prophet Uriah, came from this city (Jer. 26:20–23), and some of the citizens returned to it from exile in Babylon (Ezra 2:25, "Kiriath-arim"; Neh. 7:29). Later it was the site of a Roman fort and a Byzantine church. R.S.B.

Kiriath-sepher (kihr´ee-ath-see´fuhr), the earlier name for Debir (Josh. 15:15; Judg. 1:11). ***See also*** Debir.

Kish (kish), a Mesopotamian city, eight miles east of Babylon, which dominated the history of the Early Dynastic (ED) I period (2900–2700 B.C.). Excavations reveal extensive remains of the first palace known from this time. Although fragmentary, remains of two ziggurats are visible. According to the Sumerian King List, Kish is the place to which kingship is restored following the Flood. Evidence of a flood appears at Kish, but it is too limited in scope and too late (between ED II, 2700–2500 B.C., and ED III, 2500–2300 B.C.) to support native and biblical traditions of a universal flood presumed to antedate the historical ED I period.

The story of *Gilgamesh* (king of Uruk) *and Agga* (king of Kish) reflects tensions between these two early political centers. In the ED period, use of the title "King of Kish" indicated hegemony over Sumer and Akkad. Kish declined in political importance with the northward shift of power under Sargon of Akkad, ca. 2350 B.C., and his creation of the first Semitic empire.

As a personal name, Kish appears several times in the Bible. **1** The father of Saul (1 Sam. 9:1, 3; 10:11, 21; 14:51; 2 Sam. 21:14; 1 Chron. 8:30, 33; 12:1; 26:28). **2** Levites (1 Chron. 23:21, 22; 24:29; 2 Chron. 29:12). **3** An ancestor of Mordecai (Esther 2:5). ***See also*** Flood, The; Noah; Saul. L.E.P.

Kishon (kī´shon), a stream bed in which much of the year water flows westward through the Esdraelon (Megiddo) Plain. One major source rises in the springs west of Mt. Tabor and the Galilean hills south of Nazareth and flows to the south. The other major source rises in several springs in the vicinity of Megiddo and flows to the north from near Mt. Gilboa. They join in the Esdraelon Plain, and from there the river winds its way northwestward through the narrow pass between Mt. Carmel and the Galilean hills and enters the Plain of Acco. It empties into the Mediterranean by the excavated site of modern Tell Abu Hawam.

Most of the year the Kishon is a sluggish brook. During the rainy season it can be swampy through the Megiddo Plain, as when in Deborah's defeat of the Canaanites the "torrent Kishon swept them away" (Judg. 5:21). Although the exact location of that battle cannot be determined, Sisera's chariots and troops were drawn out to meet Barak at the river Kishon (Judg. 4:7) and the Song of Deborah suggests a place near Taanach (Judg. 5:19). The recent excavations at Taanach indicate it was destroyed about 1125 B.C., and the destruction may be associated with these events. This victory at the river Kishon is recalled in Ps. 83:9.

It was near the brook Kishon that Elijah killed the prophets of Baal when they could not call down fire on their offering on Mt. Carmel (1 Kings 18:40). ***See also*** Esdraelon; Taanach. N.L.L.

kiss. ***See*** Gestures.

Kittim (kit´im). **1** The descendant of Javan, the fourth son of Japheth who was a son of Noah, and Elishah's brother (Gen. 10:4; 1 Chron. 1:7). **2** A place the first-century A.D. historian Josephus (*Antiquities* 1:28) identifies with Kition, or Kitti, a Phoenician city on the island of Cyprus, later known as Larnaka. Apparently the term Kittim in the OT included all islands of the Aegean Sea. Jeremiah (2:10) mentions isles of Kittim as the symbol of the western extremity of the world. Kittim is mentioned in connection with Tyre and Sidon as the mother of western maritime colonies (Ezek. 27:6). Various passages indicate a connection between Kittim and Assyria (see Num. 24:24). **3** A figurative name for Rome in the apocalyptic book of Daniel (11:30). **4** Macedonia in 1 Maccabees (1:1). **5** A people mentioned briefly in the pseudepigraphal books *The Testament of Simeon* (6:3) and the book of *Jubilees* (24:28). In a number of Qumran texts the Kittim appear as the last gentile world power to oppress the people of God. In the Habakkuk commentary (from Cave 1 at Qumran) the "Chaldeans," sent by God to execute his judgment, were understood to be the

Kittim. In a fragmentary commentary on Isaiah (from Cave 4 at Qumran) the downfall of the Assyrians was interpreted as the war of the Kittim. The war of the Kittim is described in the *War Scroll:* the Sons of Light take the field against the enemy of Israel, the Kittim, "those who deal wickedly against the covenant" (1QM 1:2; 15:2). The author of the scroll believed that Isaiah's prophecy against Assyria (Isa. 31:8) will be fulfilled after the victory over the Kittim. Many scholars identify the Kittim with the Syrians, but there are others who associate them with the Romans. However, the Kittim in the references in the Qumran commentaries resemble the Romans, even though the evidence is not decisive. Y.G.

KJV, the common abbreviation for the King James Version of the Bible. ***See*** English Bible, The.

kneading bowl, a container for mixing ingredients in preparing bread (Exod. 8:3 and 12:34, KJV: "kneading troughs"; Deut. 28:5, 17). It could be made of wood, bronze, or pottery and was important enough to be taken along when traveling (Exod. 12:34). While shallow, it could be round or irregularly shaped. Kneading was done usually by hand, but it could be done by foot also. As an Israelite possession it could be blessed or cursed (see Deut. texts above).

kneel. ***See*** Gestures.

knife, a tool used for cutting or stabbing. A knife was used for a variety of purposes in antiquity. Abraham raised one to carry out the act of sacrificially slaying his son, only to have his hand stayed (Gen. 22:9–14). The knife was used in the ritual slaughter of animals for sacrifice. It was also used for the circumcision ceremony, where at least some of the knives were made of flint rather than metal (Josh. 5:2–3). Yet another ritual use is recorded by the prophets of Baal, who cut themselves to receive their god's attention (1 Kings 18:28). Such activity is forbidden in the levitical law (Lev. 19:28).

Bronze implements, including a knife, from a fourteenth-century B.C. cemetery near Acre.

The equivalent of the razor was probably a sharpened blade. It could be used for shaving or trimming a beard or other body hair (Ezek. 5:1; Isa. 7:20).

There is some overlap in biblical references to knives and swords. The account of Joab's murder of Amasa, where the latter is stabbed as the two men embraced, probably presupposes a knife or dagger rather than a sword.

Knives also had a ceremonial role to play in the ancient world as did other implements of war. Archaeological excavations have found a number of them from different historical periods partially constructed with inlaid ivory or with precious metals. The royal treasury of Judah had fine enough ceremonial knives that Nebuchadnezzar confiscated them when Jerusalem fell to his siege (Ezra 1:9). Knives are not mentioned in the NT. J.A.D.

knop (nop), the KJV's term for the RSV's "capitals" as a part of the lampstands in the tabernacle (Exod. 25:31–36; 37:17–22), probably a knob-shaped ornament. It is also the term in the KJV for the RSV's "gourd" (1 Kings 6:18) as part of the cedar decorations in the Temple (see also 1 Kings 7:24 where it adorned the bronze [molten] sea in the Temple furnishings).

knowledge, a term in the OT that includes experience, emotion, and personal relationship along with intellectual understanding. In Greek "knowledge" refers primarily to intelligent apprehension, but the NT use of the word usually includes OT connotations. Individual books of the Bible develop particular meanings for "knowledge."

In the OT God is known because of self-revelation and humans know by acknowledging and accepting God (Deut. 11:2–7; Isa. 11:2; 41:20; Jer. 2:8; 9:6). The nations do not know God (Jer. 10:25), but God's saving of Israel makes them know God's power (Isa. 37:20). Conversely, God knows humans and gives them support. God knew Jeremiah before he was born (Jer. 1:5) and appointed him a prophet. Human knowledge implies involvement and commitment. In the garden Adam and Eve ate of the tree of the knowledge of good and evil and gained personal knowledge of good and evil that changed their relationship with God (Gen. 3). The prophets describe sinners as those who know not the way of peace (Isa. 59:8). Knowing also implies experience; sexual relations are spoken of as "knowing" (Gen. 4:1; Luke 1:34).

In rabbinic writings that stress the study of Torah, the knowledge of God's word that issues from study results in acceptance of God with consequent obedience to his commandments.

The NT continues the OT tradition of knowledge as a relationship. According to Paul the believer who knows and loves God is known by God (Gal. 4:9; 1 Cor. 8:3). God can only be known by the Spirit and believers who have the Spirit (1 Cor. 2:11). God reveals the mystery of salvation in Jesus Christ (1 Cor. 2:7, 12–13; cf. Col. 2:2–3). In the Gospel of John both God and Jesus are known through signs and humans come to know the Father through the sign par excellence, Jesus (8:14; 14:7–9). Jesus knows the Father (16:30; 17:25; cf. 1:18) and the disciples know through him (17:7–8, 26). This view is also presumed by the thanksgiving formula in Matt. 11:25–27 where Jesus asserts that the Father and Son know each other, along with those to whom the Son reveals the Father. In the NT, knowledge of God comes through Jesus and concerns the saving work that God does in Jesus. Knowledge assumes faith in God and Jesus as well as obedience to them: "And by this we may be sure that we know him [Christ], if we keep his commandments" (1 John 2:3).

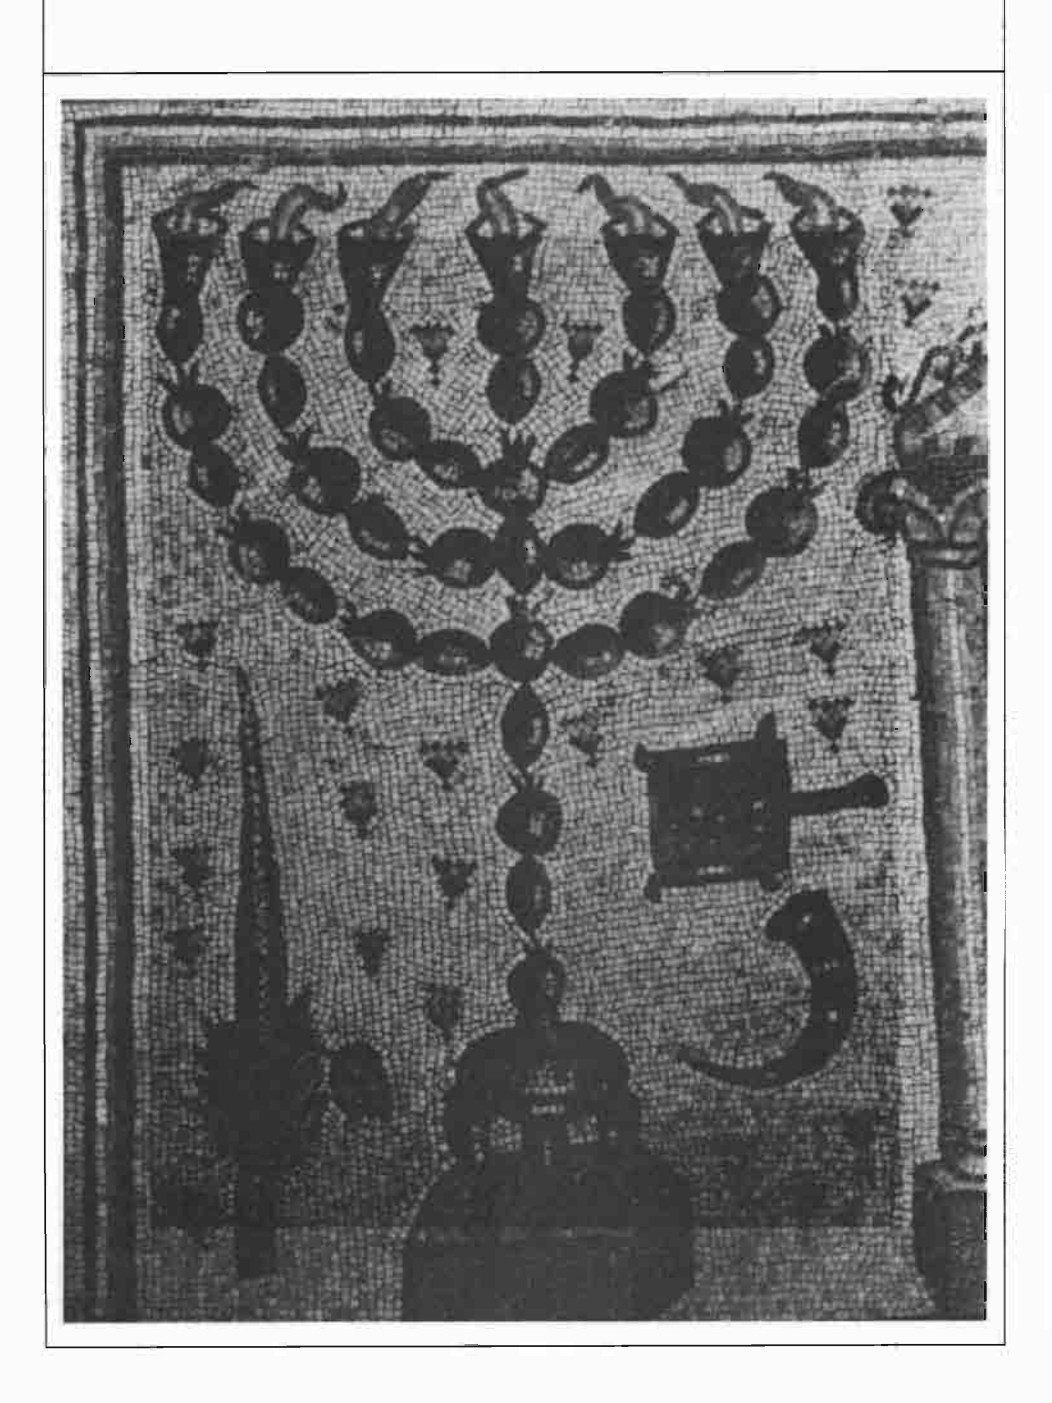
The later syncretistic religious movement Gnosticism (from the Greek word for "knowledge") stressed special illumination about the divine and cosmic realities and a special revelation beyond and superior to the Bible. ***See also*** Faith; Obedience; Revelation. A.J.S.

Kohath (koh'hath), the second of Levi's three sons (Gen. 46:11), grandfather of Moses and Aaron (Exod. 6:16–20), and, according to 1 Chron. 6:22–28, the ancestor of Samuel. Although Gershon was Levi's firstborn, the narrative sections (e.g., Num. 3–4) often treat Kohath and his descendants as the most important levitical family. Kohath's descendants are sometimes mentioned before Gershon's descendants (Num. 4:34–45; 1 Chron. 15:5). The Kohathites had the most important function in the tabernacle—disassembling and transporting the Holy of Holies (Num. 4:4–20). According to 1 Chronicles, they also prepared the showbread (9:32) and their descendants included Asaph and Heman, two important Temple singers (6:31–43). M.Z.B.

Koheleth (koh-hel'ith). ***See*** Ecclesiastes.

koph (kohf), the nineteenth letter of the Hebrew alphabet; its numerical value is one hundred. The letter is preserved in proto-Sinaitic inscriptions, where it resembles the number eight. The form developed in the Phoenician and early Hebrew script. The form of the letter in the classical Hebrew square script resembles the later Phoenician and early Aramaic script. ***See also*** Writing.

ק



Korah (kor'uh). **1** The chief of a clan of Edom (Gen. 36:16, 18). He is listed as both the son of Esau (Gen. 36:5, 14; 1 Chron. 1:35) and the grandson of Esau, son of Eliphaz (Gen. 36:16). **2** A son of Hebron (1 Chron. 2:43), possibly a Judean geographical site or clan name (cf. 1 Chron. 12:6). **3** A Levite family of the clan of Kohath (Exod. 6:21, 24; 1 Chron. 6:22 [Hebrew 6:7]). The Korahites were one of the major guilds of Temple singers (2 Chron. 20:19) whose name appears in the superscriptions of Pss. 42; 44–49; 84–85; 87–88. They were also Temple gatekeepers (1 Chron. 9:19; 26:1, 19) and bakers (1 Chron. 9:31). Numbers 16 reports that the eponymous ancestor of the family, Korah, together with two hundred and fifty leaders of the people, led a revolt against Moses and Aaron in the wilderness. Most scholars agree that this account was conflated with an originally independent account of a lay revolt against levitical authority led by Dothan and Abiram (cf. Deut. 11:6; Ps. 106:7). Korah's revolt indicates a conflict between priestly houses over Aaron's exclusive right to offer incense before the Lord. He died when fire came forth from the Lord, consuming the rebels. Num. 26:9–11 states that Korah and his cohorts died when the earth swallowed Dothan and Abiram, but the sons of Korah survived. ***See also*** Abiram; Dothan; Levites. M.A.S.

Kore (kor'ee), the name of a bird alternatively identified with *Ammoperdix heyi* or the slightly larger *Alectoris graeca;* both are types of partridge. It is the name of two men in the OT. **1** The father of Shallum, a member of the tabernacle gatekeepers' guild (1 Chron. 9:19). **2** A Levite contemporary with Hezekiah (2 Chron. 31:14).

Kue (ky*oo*'ee), a source of horses for King Solomon's armies. Cited along with Egypt as a place Solomon could buy horses (1 Kings 10:28; 2 Chron. 1:16), it has been identified as a probable ancient name for eastern Cilicia in Asia Minor. If so, it refers to the southeastern portion of modern Turkey between the Taurus and Amanus mountain ranges and the Mediterranean Sea. In Solomon's time it would have been a relatively independent Neo-Hittite community.

Opposite: A seven-branched holy lampstand with other ritual objects—*lulav* (palm frond), shofar, and incense shovel—as depicted on the late third- or early fourth-century A.D. mosaic floor of the synagogue at Hammath-Tiberias.

L

L, a symbol designating material found only in the Gospel of Luke; it also designates the hypothetical source of this material. The Lucan narratives dealing with Jesus' birth and postresurrection appearances are included in this material. ***See also*** Synoptic Problem, The.

Laban (lay'buhn; Heb., "white" or "pale"). **1** An unknown location east of the Jordan connected with the Israelites' wilderness wandering (Deut. 1:1); some scholars identify it with Libnah (Num. 33:20).

2 A member of Abraham's ancestral family through Nahor, Abraham's brother; he was the brother of Rebekah and father of Leah and Rachel (Gen. 24:24, 29; 29:16). His home was near Haran in Paddan-aram (or Aram-naharaim, "the river country"), the upper region of the land lying between the Tigris and Euphrates rivers (upper Mesopotamia); he and his father are both called Aramaeans ("Syrians" in some versions; Gen. 24:10; 25:20; 27:43).

Laban's greedy nature and subsequent role in the patriarchal narratives are aptly foreshadowed in his first introduction into the story where his lavish and servile greeting of Abraham's servant was prompted by the sight of the gifts (Gen. 24:29–32). Laban is encountered later in the narrative as Rebekah sends Jacob to the ancestral home at Haran to escape the anger of Esau and to find a wife from among the family clan group of Laban (Gen. 27:43–28:5). Laban's covetous nature is fully revealed in his rather uneven bargain with Jacob of seven years labor for Rachel and his subsequent deception in tricking Jacob into another seven years labor (Gen. 29:1–30). However, he finally outwitted himself in agreeing to give Jacob the oddly marked livestock; thinking to take advantage of Jacob again, he found himself with dwindling herds as Jacob shrewdly used his knowledge of animal husbandry to carry out the poetic justice of God (Gen. 30:25–43).

Laban's anger at Jacob's secret departure for Canaan was, no doubt, partly caused by the prospect of losing his daughters, much of what he considered to be his flocks, and the cheap labor of Jacob, all of which amounted to a breaking up of the family unit to which Jacob had willingly attached himself. But Laban was also concerned over the theft of the household idols (teraphim). These were more than just pagan images; they were tribal or clan symbols of ownership whose possession gave title to the family inheritance. Tablets found at the Hurrian city of Nuzi illustrate and confirm much of the legal and social background of this narrative. According to the customs portrayed in these tablets, Laban adopted his son-in-law as legal heir since, at that time, he had no male children. Jacob then had a right to the teraphim and the family inheritance, unless Laban had sons of his own who would then have precedence. Sons were later born to Laban, so neither Jacob nor Rachel had a legal right to the idols or inheritance and Laban was understandably upset over their disappearance (Gen. 31:22–30). The final parting of Laban and Jacob at Mizpah symbolizes the break between the Hebrews and their ancestral homeland in Aram and probably also reflects an ancient treaty of nonaggression between the two peoples (Gen. 31:43–55).

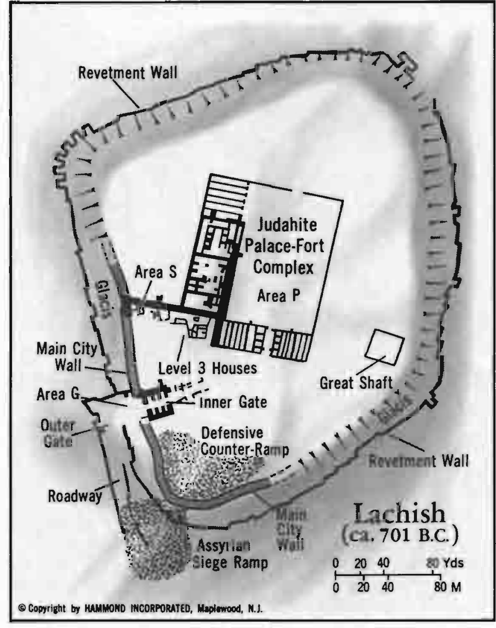
In the entire narrative Laban is characterized as greedy and devious and many scholars see the development of his character in the story as a satire aimed at the Aramaeans. On another level, the defeat of Laban, who seemed to have the upper hand initially, is attributed to the action of God, who used even the devious Aramaean to fulfill his divine purpose for his people (Gen. 31:5–13, 24, 42). ***See also*** Aram; Jacob; Mizpah; Nuzi; Rachel; Teraphim. D.R.B.

labor, a term mentioned in a variety of contexts in the Bible meaning manual labor or great effort. Near Eastern society knew several types of work and workers: the farmer, shepherd, craftsman, day laborer (Matt. 20:1–15), forced labor for the monarchy (1 Sam. 8:11–17), native slave (Exod. 21:2–11), and foreign slave (Deut. 21:10–14). Women generally worked in the home and field (cf. Prov. 31:10–31). Work is natural to humans (Gen. 2:15) and labor is honored and appreciated (Prov. 22:29; 10:4; Eccles. 5:12). God is pictured as working at creation (Gen. 1–2) and God brings labor to a successful conclusion (Gen. 26:12; Prov. 10:16; Eccles. 2:24; Isa. 65:21–23). Biblical laws protect the wages of laborers as part of an orderly society (Lev. 19:13; Deut. 24:14–15). Hard work is also presented as a punishment for sin (Gen. 3:17–19) and generally as a wearisome part of the human condition.

In the NT Paul speaks most often about labor. Paul himself worked as a tentmaker or leatherworker to earn his living while preaching the gospel (Acts 18:3; 1 Cor. 4:12; 1 Thess. 2:9), even though Christian preachers have a right to the support of the community (1 Cor. 9:4–18; Mark 6:10–11). Paul's emphasis on his gainful employment makes it likely that his work was part of his missionary strategy for meeting and influencing people. Work is also part of an orderly Christian life, even in the face of expectation of the end (1 Thess. 4:12; 2 Thess. 3:10–12). Ephesians affirms that slaves are to continue honest labor for their masters (6:5–8).

Paul also speaks of his labor on behalf of his missionary work (2 Cor. 11:23–29) as a sign of his genuineness. All Christians are exhorted to labor at the Lord's work (1 Cor. 15:58) and references to work for the community are frequent. In John 5:17 Jesus identifies his work with God's work, specifically his curing of a man on the Sabbath and, more generally, all God's dealings with humans. ***See also*** Sabbath. A.J.S.

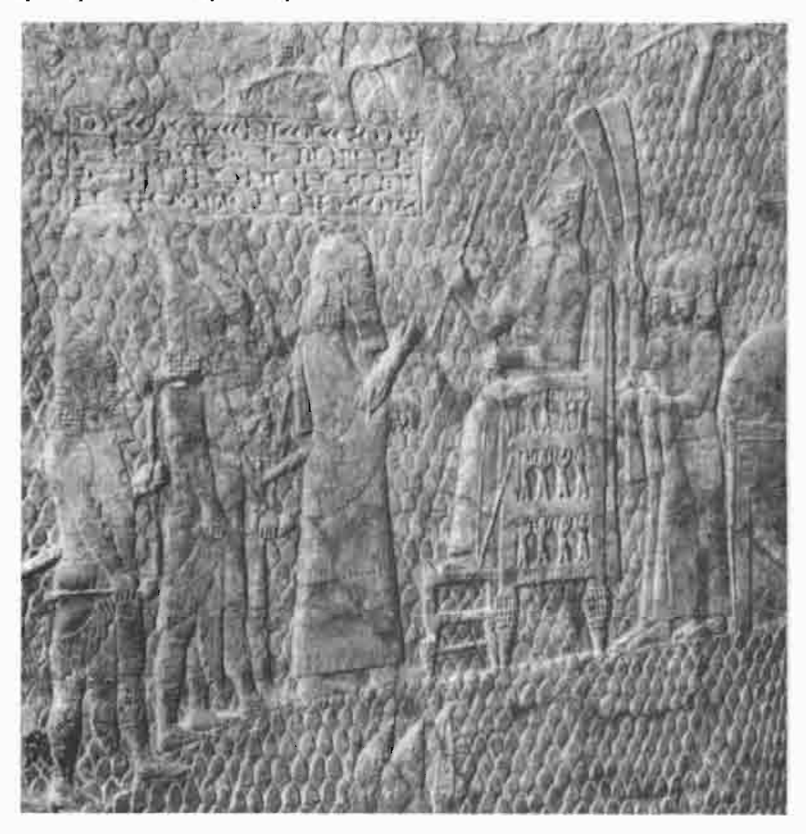
Lachish



A PROMINENT Canaanite and Israelite city, and in fact the most important Judahite city after Jerusalem, Lachish (lay´kish) is mentioned both in biblical and nonbiblical texts. Indicative of Lachish's importance as a city-state, its name appears in the Amarna cuneiform correspondence (fourteenth century B.C.) of Pharaoh Amenophis IV (Akhenaton), as well as in Assyrian records. The OT contains many references to Lachish. When Japhia, king of Lachish, joined an anti-Gibeonite coalition to resist the Israelite invasion, Joshua put him to death and captured Lachish (Josh. 10:1–32). King Amaziah of Judah (ca. 800–783 B.C.) was killed at Lachish, where he had taken refuge from a palace revolt in Jerusalem (2 Kings 14:17–20).

History: The location of Lachish was uncertain until the American archaeologist William F. Albright in 1929 proposed Tell ed-Duweir as the site of Lachish, an identification generally accepted. Today in Israel it is commonly known as Tel Lachish. An imposing mound in the foothills of Judah, Tell ed-Duweir lies about twenty-five miles southwest of Jerusalem and fifteen miles west of Hebron. This nearly rectangular tell is relatively large, measuring eighteen acres at the summit and thirty acres at the base. A deep well supplied adequate water. This site had been occupied with some interruptions from Chalcolithic times (fourth millennium), when the inhabitants lived in caves, to the

Tell ed-Duweir (above); aerial view from the southwest. William F. Albright identified this mound as the site of ancient Lachish.



Persian period (ca. 538–333 B.C.); Tell ed-Duweir was abandoned finally about 150 B.C. The mound is secured by deep valleys all around except on the southwestern side where the city's only gate, a double gateway complex, was located. This vulnerable access required strong fortifications to ward off enemy attacks.

After Joshua's conquest of Lachish the city was deserted and lay partially in ruins from the twelfth to the tenth centuries B.C. Then Lachish was rebuilt as a garrison city and became second in importance to Jerusalem. To protect his southern border against Egyptian and Philistine attack, King Rehoboam (924–907 B.C.) of Judah, according to 2 Chron. 11:5–12, fortified Lachish.

In 705 B.C. Sennacherib acceded to the imperial throne of Assyria. At that time Egypt, some Philistine cities, and Judah formed an alliance against Assyria; Sennacherib responded by invading Palestine in 701 B.C. After demolishing the Egyptian forces and the Philistines, he conquered most of Judah including the fortress-city of Lachish; only Jerusalem was spared. According to Sennacherib's annals, forty-six of King Hezekiah's fortified cities were conquered. Despite its strong defenses—two massive city walls and a gate complex composed of an

The Assyrian king Sennacherib conquered most of Judah, including the fortress-city of Lachish in 701 B.C. The victory was commemorated in a group of reliefs at his palace at Nineveh. In this detail, according to the inscription, "Sennacherib, king of the world, king of Assyria, sat upon a *nîmedu*-throne and passed in review the booty [taken] from Lachish [*La-ki-su*]."

(*Left*) The townspeople of Lachish defending a tower in the city wall against the invading Assyrians. (*Right*) Vanquished Lachishites impaled outside the city by Assyrian soldiers.

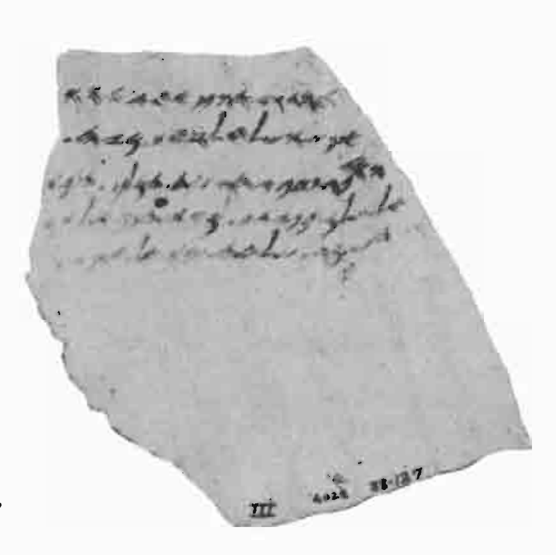
outer and inner gate—Lachish succumbed to Sennacherib, who was personally present in the city at the time of its demise. The Assyrians (and later the Babylonians) made their assault on the vulnerable gate complex near the southwest corner of the city. There they threw up a "fan-shaped" siege ramp (measuring about 200 feet at the bottom and 80 feet at the top) against the outer side of the wall to mobilize their siege machines equipped with battering rams. Constructed from tons of boulders bonded with lime plaster, this ramp was topped by a platform for the siege machines. The Judahites countered with a ramp of their own, laid against the inner face of the city wall, but to no avail. After his stunning victory Sennacherib reestablished his imperial rule in Palestine.

Sennacherib's devastation of Lachish is not only documented in the Bible (2 Kings 18:13), but was also memorialized in stone relief on the palace walls of the Assyrian royal city of Nineveh (modern Kuyunjik) opposite modern Mosul in northern Iraq. These elaborate bas-reliefs, housed today in the British Museum, were uncovered in the middle of

An ivory head from Lachish, ca. sixteenth–fifteenth century B.C.



the nineteenth century by Austen H. Layard, pioneer excavator in Assyria. They depict realistically the siege and conquest of Lachish. Their detail and prominence suggest that Sennacherib viewed his conquest of Lachish as especially significant.

Archaeological Excavations: British archaeologist James L. Starkey, who trained under W. M. Flinders Petrie in Egypt and southern Palestine, began a long-term systematic excavation of Tell ed-Duweir in 1932. Paying close attention to architectural units in the course of his digging, Starkey, who maintained high standards of field technique, distinguished six occupational levels (levels VI to I). However, the project ended abruptly in 1938 when Starkey was killed in an ambush. His associates continued the project for a time, but the impetus was gone. Olga Tufnell brought the Lachish publications to completion in 1958.

Starkey concentrated on the city-gate complex, the Judahite palace-fort, and the west sector of the mound. Although he did not complete the investigation of the gate area, which revealed superimposed city gates, he did distinguish and date levels III and II. He dated the destruction of level III to the first campaign of Nebuchadrezzar in 597 B.C. against King Jehoiachin of Judah. To level II Starkey ascribed the conflagration of Lachish at the hands of Nebuchadrezzar of Babylon in 588/6 B.C., as most archaeologists would agree. Detecting little difference in pottery types between levels III and II, Starkey was satisfied that only a short time had elapsed between the two destructions.

Starkey's dating of level III occasioned controversy from the beginning. While preparing the results of the investigation of the gate area for publication, Tufnell, who had dug with Starkey, discerned a noticeable variance in pottery typology between levels III and II. Consequently she attributed Sennacherib's conquest in 701 B.C. to level III. She also observed two phases in the gate area of level II, dating them respectively to 597 B.C. and 588/6 B.C.

Among the outstanding epigraphical discoveries at Tell ed-Duweir are twenty-one Hebrew ostraca, or storage-jar fragments inscribed in black ink. Known as the Lachish Letters (most were letters, others were lists of names), these ostraca date to ca. 590 B.C. (level II), during

One of the ostraca, or Lachish Letters, from Hoshaiah to the Lachish military commander Yaosh, dating to ca. 590 B.C.

the reign of Zedekiah, the last king of Judah. Eighteen of the inscribed potsherds, found in 1935, lay on the floor among the ashes in a guardroom adjacent to the city gate. The remaining three, unearthed in 1938, were in the vicinity of the palace-fort. According to many scholars, Hoshaiah, who was stationed in a garrison somewhere between Lachish and Jerusalem, had sent these letters to Yaosh, the military commander of Lachish. Written in classical Hebrew prose, these ostraca not only shed light on Hebrew philology and epigraphy but also provide valuable information about the times of the prophet Jeremiah, who was speaking to King Zedekiah, "while the armies of the king of Babylon were attacking Jerusalem and the remaining cities of Judah, Lachish and Azekah; since these alone were left of the fortified cities of Judah" (Jer. 34:7).

(*Top*) Ivory figurine of a crouching cat. From the excavations of the temple at Lachish, it dates to ca. the fifteenth century B.C. (*Bottom*) Ivory stopper carved in the shape of a male ibex, found in a Level-4 house at Lachish. It is perforated so that liquid, possibly perfume, could be poured through the mouth of the ibex.

To complete the unfinished work of Starkey and to study in greater depth the history of Lachish and its material culture, Israeli archaeologist David Ussishkin undertook, in 1973 (through 1990), a long-term project at Lachish. In the interest of continuity he concentrated on the areas Starkey had dug. Ussishkin excavated the palace-fort, as well as the monumental Canaanite buildings beneath it, situated on the summit of the mount (area P). On the western edge of the tell he dug a narrow trench to the lower slope in order to view all the strata to bedrock (area S). In this sector the excavators uncovered portions of three superimposed city walls. Ussishkin's most critical undertaking was the Judahite city-gate complex, consisting of several superimposed gates (area G). In addition, the archaeological team conducted a regional survey around Tell ed-Duweir.

As a policy Ussishkin limited his digging to certain parts of the tell; other areas he has left untouched so that future archaeologists (perhaps with more sophisticated technology) can test his conclusions afresh. With respect to field technique, Ussishkin, in the spirit of Kathleen M. Kenyon, Britain's eminent archaeologist, has emphasized the vertical section; he has also attended to the restoration of pottery forms and has utilized specialists in the applied sciences, such as botany, osteology, palynology, and metallurgy.

Ussishkin concurs with Starkey that six strata lay between the Late Bronze Age (1500–1200 B.C.) and the Persian-Hellenistic period (ca. 538–63 B.C.) at Tell ed-Duweir. The levels are the following: level VI, the final Canaanite city level, marks the conflagration of the last Late Bronze Age III city in the twelfth century, perhaps about 1150 B.C. Canaanite Lachish was under Egyptian control at the time of the Israelite settlement. In the Late Bronze Age Lachish was a large Canaanite city-state.

Level V pertains to the late tenth century, the period of the United Monarchy when Judahites began to resettle Lachish. This level was destroyed by fire. Level IV, dating from the ninth century, represents the royal Judahite fortified city, composed of two massive city walls (outer and inner), the gate complex, and the palace-fort situated at the center of the city. An earthquake may have been responsible for destroying this level.

Level III marks the Assyrian conquest of Lachish in 701 B.C., according to Ussishkin, Tufnell, and many other scholars. At the time of the conflagration Lachish was a densely populated city. In this same

Moundlike formation that was probably part of the Assyrian siege ramp thrown up against the Lachish city wall. A depiction of an Assyrian siege machine is with the color photographs.

period the palace-fort complex had been rebuilt and enlarged. Level II (smaller than level III) represents the Babylonian destruction by fire of Lachish in 588/6 B.C. The city at this level may have been built and fortified by King Josiah (639–609 B.C.). The Lachish Letters date from this period. Level I dates from the postexilic era, including the Babylonian, Persian, and Hellenistic periods (sixth–first centuries B.C.). In the time of Nehemiah, following the Babylonian captivity (586–538 B.C.), Jews settled in Lachish.

Level III is key to the dating of a significant corpus of pottery in Palestine. On the basis of stratigraphy and a comparison of the pottery typology of levels III and II at Tell ed-Duweir, Ussishkin is confident in dating level III to Sennacherib's conquest in 701 B.C. John S. Holladay and some other archaeologists would disagree. They counter Ussishkin's internal evidence with external data from other sites, such as Samaria, the capital of the Northern Kingdom. Until scholars reach consensus, a variance of more than a hundred years in the dating of a significant corpus of Palestinian pottery continues to be a problem.

In addition to the excavated areas of Tell ed-Duweir already described, two other structures were investigated: the fosse temple (with three phases) and the solar shrine. The fosse temple, so named because it was constructed in a moat that had been part of the Middle Bronze Age II fortifications, is situated near the northwest corner of the mound, outside the city. The original building was constructed of unhewn stone in the sixteenth century. Rebuilt and enlarged more than

once, this temple was destroyed by fire about 1200 B.C. The fosse temple was in use throughout the Late Bronze Age. The nature of the temple's cult is unknown.

A new temple (level VI), probably replacing the fosse temple, was built on the acropolis in the center of the tell. It consisted mainly of an antechamber, main hall, and "holy of holies" (*cella*). The remains of this temple lay under the late Judahite palace-fort.

The solar shrine, so named by Starkey because of its orientation and the presence of an altar with an adoring human figure, is situated in the eastern sector of Tell ed-Duweir. Yohanan Aharoni excavated the structure in 1966 and 1968 in an effort to clarify the chronology and history of Lachish. This solar shrine, composed of two main rooms and a court, dates from about 200 B.C. Starkey and Aharoni identified the ruins as a Jewish temple or sanctuary, but Albright and Frank M. Cross disagreed because of lack of evidence.

Ussishkin's work continues at Lachish, consisting mostly of the preservation and reconstruction of the city-gate complex. Also, Yehuda Dagtan is pursuing the surface survey of the Lachish region. As preparation of the material for publication proceeds, nagging problems will be solved and preliminary interpretations clarified. Already, however, the archaeologists at Lachish have made a significant contribution to biblical history.

Lamech (lay'mik; Heb., meaning uncertain; cf. the Old Akkadian names *Lamkium* and *Lamki-Mari*). **1** The son of Methushael, husband of Adah and Zillah, and father of three sons (Jabal, Jubal, and Tubal-Cain, the progenitors respectively of nomads, musicians, and smiths) and a daughter (Naamah; Gen. 4:18–22). The Song of Lamech (Gen. 4:23–24) is composed of three couplets, in the first of which Lamech exhorts his wives to attend his words; in the second he vaunts his prowess in having slain a man/boy for merely wounding/bruising him; and in the third he boasts: "If Cain be avenged seven-fold, then Lamech seventy and seven." Lamech thus expresses disdain for the law of retaliation, according to which a wound may be avenged with a wound, a bruise with a bruise (Exod. 21:25), and boasts that he has instead exacted the penalty of death for the hurt done him. That the object of his vengeance, as he states, was a boy, reflects the fact that warriors in the ancient world were often young boys (Judg. 8:20; 1 Sam. 17:33). The parallelism of the numbers, "sevenfold" (lit., twice seven, i.e., fourteen) and "seventy-seven," is unique, but it finds explanation in the numeral construction based upon the sum of three consecutive squared numbers; thus, $14 = 1^2 + 2^2 + 3^2$, and $77 = 4^2 + 5^2 + 6^2$. **2** The son of Methuselah and father of Noah. He lived 777 years (Gen. 5:25–29).
S.G.

lamed (lah'mid), the twelfth letter of the Hebrew alphabet; its numerical value is thirty. The earliest form of the letter is a pictograph of an ox-goad. In Phoenician script the position of the form changed, and in later Phoenician and early Aramaic forms a tail was added. It was from this form that the classical Hebrew square form developed. ***See also*** Writing.

ל

lameness, one of the blemishes disqualifying descendants of Aaron from their priestly prerogative of approaching the altar of God's sanctuary to offer bread to God (Lev. 21:16–24). It was not appropriate to sacrifice lame animals to God (Deut. 15:21; Mal. 1:8, 13). Jesus' healing of the lame was one of the "deeds of the Christ" illustrating and bringing about the Kingdom of God (Matt. 11:2–6; 15:29–31; Luke 7:18–23). By healing the lame in the Temple Jesus restored them to the worshiping community (Matt. 21:10–17). Jesus' healing of lameness was continued by Peter and John in the Temple (Acts 3:2–13) and Philip in Samaria (Acts 8:4–8).

Lamentations of Jeremiah, the, an OT book consisting of five elegies bewailing the destruction of Jerusalem and the Temple in 587 B.C. The name "Lamentations" reflects the Greek *Threnoi* and the Latin *Threni,* both of which are a translation of the Hebrew title *Qinoth,* meaning "dirges" (*b. B. Bat.* 14b). The more prevalent Hebrew name, however, is *Eikhah* ("Ah, how"), the book's opening word. In the Hebrew Bible, Lamentations is one of the five scrolls in the Hagiographa. In the Septuagint and the Latin versions, however, Lamentations appears as an appendix to the book of Jeremiah.

Authorship and Date: Tradition holds that the prophet Jeremiah was the author of Lamentations. This tradition is based on Jeremiah's central role as prophet of the destruction as well as on other verses associating him with the composition of dirges (Jer. 7:29; 9:9, 19; 2 Chron. 35:25). Modern scholarship has generally been skeptical of assigning the book to Jeremiah. Verses expressing the crushed hopes pinned on the king or on foreign alliances (4:17, 20) appear to be out of character with Jeremiah's thinking (cf. Jer. 2:18, 36; 37:5–8). Furthermore, the standard prophetic indictments against the generation of the destruction (such as practice of idol worship and sociomoral offenses, cf. Jer. 5:7–8; 7:9–10; 9:1–5, 11–13) go practically unmentioned in Lamentations. With the exception of 4:13, the book refers to Jerusalem's sins only in the most general terms (1:5, 8, 14, 18; 2:14; 4:6) and even seems to bespeak a certain measure of perplexity regarding the severity of God's judgment (3:43–44; 5:7). In these respects, Lamentations may be said to reflect the popular (i.e., nonprophetic) ideology current during the period of the monarchy (ca. 1020–587 B.C.). The spirit of the book can be traced more precisely to upper-class circles versed in the wisdom tradition. The concern for the fate of the king and noblemen (1:6; 2:9; 4:5, 7, 8, 20) as well as the conception of suffering expressed in chap. 3 (see below) tend to support this conclusion.

Even if Jeremianic authorship of Lamentations is to be rejected, much of the book gives the impression of being an eyewitness account of Jerusalem's destruction, written when the horror of the tragic event was still fresh. Thus, the most likely date for the book is shortly after 587 B.C. and in any event, long before the edict of Cyrus in 538 B.C. allowing for the restoration of the Jerusalem Temple.

Contents: Chap. 1 serves as an overall introduction to the book by providing a general description of Jerusalem's desolation in the wake of the destruction. Chap. 2 gives a more vivid account of the actual events, with particular emphasis placed on God's enmity on the day of his fury. Chap. 3 stands apart from the surrounding chapters by focusing on the fate of a suffering individual. This individual recounts his own feeling of abandonment by God (vv. 1–18), but then proceeds to reflect on the meaning of his suffering. As in many passages associated with the wisdom tradition, God's justness in bringing on punishment as well as his ultimate kindness is accepted axiomatically (vv. 21–25, 31–38).

Ladan (lay´duhn). **1** An Ephraimite, the father of Ammihud and ancestor of Joshua (1 Chron. 7:26). **2** The head of the Gershonite clan of Levites (1 Chron. 23:7–9; 26:21); he is also called Libni (Exod. 6:17; Num. 3:18). ***See also*** Libni.

ladder, the term that translates Hebrew *sullām* in the story of Jacob's dream in Gen. 28:12 where it describes a means of ascent from earth to heaven (cf. John 1:51). Normal devices for ascending heights included rock-cut steps and constructed ladders of wood, metal, or rope. Archaeological evidences for cut and constructed stone stairways are abundant, and the most frequent uses of constructed ladders were to enter storerooms without doorways, reach rooftops without stairways, or scale defense walls as part of attack weaponry in wartime.

Lagash (lah´gash; Arabic *Telloh,* "tablet hill"), a Sumerian city about fifty miles north of Ur whose ruins have yielded the largest number of cuneiform tablets of the third-millennium Sumerian cities. Girsu is the oldest mound of the group of sites comprising Lagash.

Lagash flourished in the Early Dynastic III period (2500–2300 B.C.). Just prior to this time, Enhegal bought several parcels of land and asserted Lagashite independence at a time when all other city governors were subject to the ruler claiming hegemony over Sumer. Lagash and Umma, its neighbor and rival, served as political buffers as well as vehicles of cultural transmission between Sumer and Elam. Tensions developed between these two cities over the question of control of a rich stretch of agricultural land called the *edin.* Eannatum of Lagash commissioned the monument "The Stele of Vultures" to commemorate his campaign for this land. He also subdued Elam.

Urukagina of Lagash promulgated the first legal reforms. Unfortunately, they and his reign were short-lived. The city was already deteriorating under the weight of administrative excesses and was soon conquered by Lugalzagesi of Umma.

As city governor, Gudea ruled Lagash during the Gutian domination following the collapse of the Akkadian empire around 2168 B.C. The Ur III period of Sumerian renaissance produced artistic and textual witnesses to the final flowering of Lagashite power. Among the surviving texts are those that record the instructions Gudea received in a dream for building a temple to the city gods. L.E.P.

Diorite statue of Gudea, ruler of Lagash, seated; ca. 2168 B.C.

Lahmi (lah´m*i*), a brother of Goliath, who, according to 1 Chron. 20:5, was slain by David's hero Elhanan. "Lahmi," however, is probably part of a textual error with the effect of harmonizing 2 Sam. 21:19 with 1 Sam. 17.

Laish (lay´ish; Heb., "lion"). **1** The father of Palti(el), to whom Saul gave his daughter (who was David's wife) Michal (1 Sam. 25:44) and for whose return David bargained (2 Sam. 3:12–16). **2** A Canaanite city, modern Tell el-Qadi, which was subsequently occupied by Israelites and named Dan (Judg. 18:7–31). It is located ten and a half miles north of Lake Huleh. ***See also*** Dan.

lamb. ***See*** Sheep.

Lamb of God, the title with which John the Baptist twice greets Jesus at the beginning of the Gospel of John (1:29, 35). In Revelation, the lamb also appears a number of times as a symbol for Christ, although a different Greek word is used than that found in the Gospel.

In Revelation, the lamb has clearly been slain as a ransom for sin (5:6–14). Probably the idea of the lamb as sacrificial offering lies behind John 1:29, 35 as well ("the Lamb of God, who takes away the sin of the world"), although this way of speaking of the saving work of Christ is not common in the Fourth Gospel (but cf. 1 John 1:7). It is also possible that the Suffering Servant of Isaiah 53, who is likened to "a lamb that is led to slaughter," has influenced this description of Jesus (cf. 1 Pet. 1:18–19). In the Gospel of John, Jesus died on the afternoon before the Feast of Passover began, as the Passover lambs were slain. Thus the possibility that Jesus is to be understood as the lamb of the Passover sacrifice suggests itself, even though that lamb was not technically a sin offering. The designation of Jesus as the Lamb of God, then, suggests a wide range of images from the OT, mostly having to do with expiatory sacrifice. ***See also*** Expi-

OUTLINE OF CONTENTS

Lamentations of Jeremiah

I. Jerusalem deserted (1:1–22)
II. Divine warnings fulfilled (2:1–22)
III. Steadfast love of God endures (3:1–66)
IV. Punishment and a plea for mercy (4:1–5:22)
   A. Zion punished (4:1–22)
   B. Plea for divine mercy (5:1–22)

With the recognition that his suffering is not a capricious occurrence, but rather a result of his own sins, the author accepts it willingly, mindful that a sincere change of heart will evoke God's mercy (vv. 26–30, 39–41). Significantly, the poet's call to repentance in vv. 40–41 is formulated in the first-person plural, thus indicating that the message of chap. 3 indeed forms the ideological core of the entire book. Chap. 4 returns to cataloging the terrible conditions prevailing at the time of the catastrophe. Finally, chap. 5 closes the book in the style of a communal lament. It begins with a direct petition to God to take the people's plight to heart, proceeds to enumerate the sorry conditions that continue to affect the survivors of the catastrophe, and concludes with an impassioned plea for restoration.

While each chapter has its individual character, certain themes are repeated throughout the book. The general conditions of famine in besieged and destroyed Jerusalem are described in 1:11, 19; 2:11–12, 19–20; 4:3–10; 5:9–10. Another common theme is Jerusalem's isolation and disgrace in the face of jeering enemies and former allies who had abandoned it (1:2, 7, 21; 2:16; 3:46, 63; 4:17). At the end of three of the five chapters, a vengeful wish is expressed for those foes (1:22; 3:64–66; 4:21–22). Paramount in Lamentations is the attribution of the destruction to God's wrath, which is best understood as resulting from the people's sins (1:5, 14–15, 17–18; 2:1–9, 17, 21–22; 3:42–53; 4:11–13). However, despite the feeling of guilt, there is an ongoing hope in God's salvation even in the moments of greatest despair (1:9, 11, 20–22; 2:18–20; 3:21–25, 31–32, 55–56; 4:21–22; 5:19–22).

Style: All of the book's five chapters are composed in poetic style. Chaps. 1–4 are alphabetical acrostics, with chaps. 1, 2, and 4 containing one verse for each letter of the Hebrew alphabet, and chap. 3 containing three verses for each letter. Chap. 5 is not an acrostic, but like chaps. 1, 2, and 4, it contains twenty-two metrical verses. Another striking poetic device is the personification of Zion as a distraught female figure (1:1–9, 17; 2:13, 18–19). In addition to these literary features, many linguistic elements run like a thread through the book (e.g., *eikhah* in 1:1; 2:1; 4:1–2; "days of old" in 1:7; 5:21; "sucklings" in 1:5; 2:11, 19–20; 4:4).

Near Eastern Parallels: Much recent research on Lamentations has focused on the many metaphorical and conceptual parallels with Mesopotamian "city laments," a poetic genre dating back to the early second millenium B.C. Examples of such parallels include the motif of a weeping female figure, whether it be the city itself, personified as a woman, or the city goddess who weeps over her destroyed sanctuary and ruined city. Another dominant parallel is the heavy emphasis placed on the role of the gods in bringing about the destruction. In addition, there is a strong likelihood that the Mesopotamian "city laments" were recited in a liturgical context, much as Jews to this day chant the book of Lamentations on the ninth day of the month of Ab, the anniversary of the Jerusalem Temple's destruction. At the same time, differences between Lamentations and the Mesopotamian material remain. For example, more space is devoted in Lamentations to humans and their plight than in the Mesopotamian material. Also, there is a greater acknowledgment in Lamentations of the people's responsibility for having angered God into bringing about the destruction. ***See also*** Jeremiah, The Book of; Poetry.

lamp, a vessel used to keep and control fire as a source of light. The development of such a vessel was a major achievement of early human history. This vessel, known as the oil lamp, had two basic parts: a receptacle for the oil and a wick inserted into the oil whose protruding end would burn. Olives provided the main source of oil in Palestine; various materials, including flax, served as wicks. Because the oil lamp was in everyday use and has been found in abundance in excavated sites, its typological and historical development is relatively easy to establish and indicates that the lamps in Palestine

Five terra-cotta oil lamps that date to the first century B.C.

were, with few exceptions, similar to those in use all over the Mediterranean world.

In the Neolithic period (prior to fourth millennium B.C.) ordinary stone bowls were used to contain and burn oil; in the fourth millennium B.C. ordinary pottery bowls were used. Early in the third millennium the first adaptations were made for the specific placement of the wick. This vessel, a round saucer with four slight depressions on its rim, eventually developed into a square saucer with four pronounced open spouts at the corners. In the second millennium the dominant shape became a saucer with only one pinched corner. This single-spouted, open form remained in use for over fifteen hundred years while undergoing only slight utilitarian improvements affecting the base, spout, and rim. By the Late Bronze Age (1500–1200 B.C.) the oil lamp had generally assumed a triangular shape. In the Iron Age I period (1200–900 B.C.) variations on this basic form included multi-spouted saucers and lamps with tall pedestal bases. In the Iron Age II period (900–600 B.C.) the form of the oil lamp developed somewhat differently in the two politically and culturally divided areas of Israel and Judah. In Israel the tradition of the single-spouted, open shape continued with only slight modifications, but in Judah marked changes occurred as the base became high and heavy and the rim wide. The Israel-type lamp has frequently been found in Judah but the Judah-type rarely in Israel. With the Babylonian conquest (597 B.C.) the Judah-type lamp disappeared and throughout Palestine a broad shallow lamp with wide rim came into use, the last in the long line of open oil lamps that had originated in the second millennium.

The Hellenistic lamp, which developed from a fifth-century B.C. Greek form, was a closed vessel with a long nozzle for the wick and a broad circular opening in the cover to receive the oil. Many such lamps were imported into Palestine during Hellenistic times (332–63 B.C.), but most lamps in use were made locally. These were generally of the closed type, although the older open-type saucer was also made. During the early Roman period in Palestine (63 B.C.–A.D. 135) Hellenistic forms continued to be used and the Roman round discus lamp was introduced and copied. However, new forms, distinctively Palestinian, appeared. One, the "Herodian" lamp, had a round, wheel-made body, a flat base, a large filling hole, and a separately attached nozzle. Unlike the highly decorated Roman lamps, which featured scenes from mythology, most "Herodian" lamps were unadorned, although some had simple incision marks. Sometime in the first century A.D. a different type evolved, influenced by a technical innovation already common in the Roman world—the mold-made lamp. It had a handle and its rim and nozzle were decorated with geometric and floral designs, with or without Jewish symbols. Both forms have most commonly been found in southern Palestine.

In houses and public buildings lamps were placed in niches, on shelves jutting out from the walls, or on lampstands; in later times, they were hung from the ceiling. In addition to their chief function of illumination, lamps played a central role in religious practices. The tending of the "eternal light" in the Jerusalem Temple was a sacred duty. In later Jewish tradition, Jews lit special oil lamps on Friday evening and on the eve of every holiday. The abundance of oil lamps found in tombs suggests that besides illuminating the dark interiors they may have been used as a symbolic rekindling of the spirit of the deceased, as a remedy against "evil spirits," and as subsequent memorial offerings.

An easily understandable and powerful symbol of the importance of light, the oil lamp (Heb. *nîr;* Gk. *lychnos, lampas*) is referred to frequently in the Bible in a wide range of contexts. In the OT it conveys, for example, the illuminating power of God (2 Sam. 22:29; Job 29:3) and of his precepts (Ps. 119:105); a father's instructions to his dutiful son (Prov. 6:23); and the lasting existence of the Davidic dynasty (1 Kings 11:36; 15:4). In the NT it is a symbol of the eye of the body (Matt. 6:22); the vigilance of the faithful servant (Luke 12:35); and the function of the disciples in the world (Matt. 5:14–16). ***See also*** Lampstand.

lampstand (Heb., *menorah*), the term for an object that supported one or more oil lamps.

Although such stands could be made of stone, pottery, or wood, the biblical passages dealing with lampstands, with one exception (2 Kings 4:10), present golden lampstands intended for cultic usage.

Four successive lampstand traditions can be identified. First, the tabernacle texts describe a single golden lampstand composed of a central, cylindrical stand with three pairs of branches and elaborate floral decorations (Exod. 25:31–40; 37:17–24). The unattached lamp or lamps were apparently grouped on the central stand rather than on the ends of the branches (cf. Lev. 24:1–4). The origins of the tabernacle lampstand in the premonarchical period can be discerned in the floral and technical vocabulary used to describe it; this vocabulary also suggests the symbolic value of the lampstand as a sacred tree form representing God's unseen presence in his earthly shrine.

Second, ten golden lampstands (1 Kings 7:49), for which no branches are specified, stood in the Solomonic Temple. These were probably cylindrical stands holding multi-spouted lamps similar to those known, archaeologically, from cultic contexts spanning the Middle Bronze through the Iron ages.

Third, the rebuilt Temple of the late sixth century, using the tabernacle texts as a guideline for cultic appurtenances, evidently resumed the single lampstand tradition, as Zechariah's fourth vision indicates (Zech. 4:1–6, 11–14). The second Temple was repeatedly looted and restored or rebuilt (cf. 1 Macc. 1:21; 4:49); and by the end of its existence, the single Temple lampstand with branches was fashioned according to techniques and traditions current in the Roman world. It is the last Temple lampstand, of the first century A.D., with its characteristic seven lamp-holding branches and tripodal or stepped base, that appears in the earliest artistic renderings of the holy lampstand and dominates its use as a paramount Jewish symbol, representing light and life eternal.

Fourth, the apocalyptic vision in the book of Revelation expands the single golden lampstand to seven, in keeping with the other symbolic usages of that sacred Semitic number, although in one place (Rev. 11:4), building upon the Zechariah vision, two lampstands are suggested to match the two trees that flank the stands in Zech. 4:11. ***See also*** Lamp; Temple, The; Tree of Life, The. C.L.M.

land (Heb. *'eres*; also "earth," "country"; less often *'adama*, also "ground," "soil," in contrast to "wilderness"), a term occurring in the Hebrew Bible some 1750 times (RSV) and usually referring to a specific geographical region (e.g., "the land of Araral," 2 Kings 19:37) or the territory of a specific people (e.g., "land of the Kenites," Gen. 15:19).

As a reference to a nation, it is usually phrased in possessive relation to the people inhabiting it. So one reads of the land of the Philistines (Gen. 21:32), the Hittites (Josh. 1:4), Amorites (Josh. 12:8), Ammonites (Josh. 13:25), and Chaldeans/Babylonians (Jer. 51:24); the land of Canaan (Gen. 11:31; 13:12), of Egypt (Gen. 21:21), Edom (Gen 36:17), Moab (Judg. 11:18), Midian (Acts 7:29), Israel (2 Chron. 2:17), Judah (2 Chron. 15:8), Cyprus (Isa. 23:1), and Assyria (Isa. 27:13), to cite the most frequently mentioned.

In connection with a city, it most often refers to the city and its surrounding supporting agricultural acreage or land developed for grazing livestock. Thus we find in two sometimes parallel lists in Joshua 21 and 1 Chronicles 6 the lands of the cities of Hebron (Josh. 21:11), Dan (Josh. 21:23), Gezer (Josh. 21:21), Taanach (Josh. 21:25), Aijalon (Josh. 21:24), Mahanaim (Josh. 21:38), Heshbon (Josh. 21:39), Anathoth (1 Chron. 6:60), Debir (1 Chron. 6:58), and Sodom and Gomorrah (Matt. 10:15), to cite the most prominent.

For regions or geographic units, we find Canaan (Gen. 23:2), the region around Jericho (Josh. 2:1), the land of the north (Zech. 2:6), of Goshen (eastern Nile Delta region; Gen. 46:28), of the Negeb (desert; Judg. 1:15), of Uz (possibly in Edom; Job 1:1), of Ham (possibly Egypt; Ps. 106:22), of Tema (oasis in northeast Arabia; Isa. 21:14), of Hamath (Syrian city-state; Jer. 39:5), of Merathaim (wordplay on a region in southern Babylon; Jer. 50:21), of Pathros (region of southern Egypt (Ezek. 29:14), of Hadrach (likely a Syrian city-state; Zech. 9:1), and Gilead (Num. 32:1).

In most instances, however, the land referred to is the land promised to and/or occupied by Israel (e.g., Gen. 12:1; Josh. 13:1–7). Only exceptionally, however, is it called the "land of Israel" (especially in Ezek., e.g., 7:2). On the contrary, throughout Israel's long association with "the promised land" or "the holy land" (modern designations also virtually absent from the Hebrew Bible), Israel kept alive the memory that it had originally been "the land of the Canaanites, the Hittites, the Amorites, the Perizzites, the Hivites, and the Jebusites" (Exod. 3:17).

While the members in this list may vary, it reflects the Bible's land theology. According to it, Yahweh, sole owner of the whole earth/land (Lev. 25:23; Ps. 24:1), had given the land of Canaan to Israel as a fulfillment of his promise to Abraham and his descendants (e.g., Exod. 6:1–4; Deut. 6:10, 18). In Yahweh's strength alone, Israel, redeemed from slavery in Egypt, had been able to defeat and displace nations greater and stronger, a feat never to be forgotten (e.g., Deut. 7:17–26; 9:1–3). Deuteronomy in particular emphasizes the land as gift (e.g., Deut. 8:7–9; 9:4–6), but also warns Israel of its calling to lead a new life, marked by obedience to God's covenant law, in the newly given land. Failing that, Israel would forfeit the land, as the nations before it had done (e.g., Deut. 8:19–20; 9:5), to be cast out into exile

again (Deut. 28:64–68). The Deuteronomistic History (Joshua, Judges, 1 and 2 Samuel, 1 and 2 Kings) and many prophetic texts treat the story of Israel as an interplay between faithfulness to God and security in the land, on the one hand, and, on the other, unfaithfulness threatening that security. Even beyond the loss of the land to the Assyrians (fall of Samaria, 722 B.C.) and the Babylonians (fall of Jerusalem, 587 B.C.), prophets proclaimed God's grace for the future in terms of promises of return to the land.

That the land had not originally belonged to Israel is also reflected in three theologically important designations referring to the land. It is Israel's "inheritance" from God (e.g., Num. 26:52–56; Josh. 11:23), "possession" (from a verbal root meaning "seize," "grasp," "take hold"; e.g., Lev. 14:34; Deut. 32:49), and "rest" after Israel's wanderings (e.g., Deut. 12:9–10; Josh. 1:13, 15; Ps. 95:11).

Israel's heartland extended from the Jordan to the Mediterranean Sea, and from the Brook of Egypt to the "entrance of Hamath" (Num. 34:1–12). Sometimes, however, a much larger area is included, extending from the Euphrates to the Mediterranean (Deut. 11:24), perhaps reflecting the extent of the Davidic-Solomonic empire. This freedom of the texts in defining the land suggests that the land's significance lay in its symbolic-theological meaning as God's gift and Israel's responsibility rather than in any precise geographical delimitation.

In the New Testament: "Land" (usually Gk. *gē*, also "earth") appears much less frequently (RSV ca. fifty-seven times) in the NT. Certain continuities with the Hebrew Bible's rich land theology are preserved not only in quotations (e.g., Mic. 5:2 in Matt. 2:6; Gen. 12:1 in Acts 7:3), but also elsewhere. Thus, Jesus' return from Egypt parallels Israel's Exodus (Matt. 2:14–15; cf. Hos. 11:1), and the third Beatitude calls the meek happy, "for they shall inherit the earth/land" (Matt. 5:5). Against those who downplay the significance of any land theology in the NT (e.g., W. D. Davies), the following may also be noted: first, the ministry of Jesus was consciously limited to and defined by OT land theology (borders, Jerusalem); second, the extension of the gospel to the whole world (e.g., Acts 1:8; 13:1–5) is not a rejection of OT theology, but a realization of its vision (e.g., Gen. 12:3; Isa. 2:2–4; 49:1–7); and third, Jesus and the early church expressed new theological meaning through geographical realities (e.g., Mark and to some extent Matthew portray Galilee as the new "holy land," the land that dwelt in darkness but had seen a great light; Matt. 4:15–16; cf. Isa. 9:1–2). Jerusalem, on the other hand, becomes the place of opposition and rejection in these Gospels (e.g., Mark 10:32–34).

A certain spiritualization of OT land motifs in the NT cannot be denied, especially in the Letter to the Hebrews (e.g., Heb. 11:8–16, 38–40). Sometimes, the reality of God's gifts, expressed in the OT through the gift of the land, is transferred to the person of Jesus. Thus, he, not Jacob's well, is the source of living water (John 4:7–15); he, not the land, is the believer's inheritance (Gal. 3:29–4:7), in whom the promise of Abraham is fulfilled (Gal. 3:15–18). Nevertheless, the call to serve God "in spirit and in truth" (John 4:23) is not a call to an interiorized or otherworldly faith that ignores the concrete lands of the map; it is, instead, a rejection of fossilized "holy places" and a call to be open for God's new acts on the real global map. ***See also*** Canaan, Canaanites; Conquest of Canaan; Israel; Palestine.

landmarks, indications of property boundaries, whether erected (as boundary stones) or natural and recognized by mutual agreement. They were not to be moved (Deut. 19:14; 27:17) and doing so was a symbol of irresponsible deceit (Hos. 5:10), greed (Job 24:2), and abuse (Prov. 23:10). This biblical respect for ancestral property reflected similar concern in Babylonian, Egyptian, and later, Greek and Roman law. International markers were frequently elaborately inscribed stones.

Laodicea (lay-od'i-see'uh), a prosperous, commercial city in the region of Phrygia in northwest Asia Minor. It was named after his wife, Laodice, by Antiochus II of the Seleucid dynasty, which ruled Syria after the death of Alexander the Great. Situated on a plateau in the south of the Lycus River valley, Laodicea was adjacent to one of the ancient trade routes from the east. Two neighboring cities with Christian communities, Colossae and Hierapolis (Col. 2:1; 4:13–16), were in this same river valley. Epaphras, portrayed as one of Paul's companions, apparently worked in all three cities (Col. 4:12–13). According to Col. 4:16, Laodicea received a letter from Paul, and it was to exchange letters with the neighboring community at Colossae. The Laodicean letter is no longer extant, although various attempts to trace or identify it have been made over the

centuries. The church of Laodicea was one of the seven rebuked in Revelation (Rev. 3:14–22), and the image used in the reprimand may reflect a natural occurrence (Rev. 3:15–16). Laodicea received its water through an aqueduct coming from a spring four miles to the south; the waters of neighboring Hierapolis, however, were famous as hot springs and would have provided a contrast with the tepid aqueduct water in Laodicea. The accusation against the community may also be a reference to an arrogant self-sufficiency reflected in the fact that, after the earthquake of A.D. 60, the Laodiceans did not wish any help from Rome in rebuilding their city. ***See also*** Colossae; Colossians, The Letter of Paul to the; Epaphras; Hierapolis; Philemon, The Letter of Paul to; Phrygia. Lappidoth (lap´i-doth; Heb., "flash"), husband of the prophetess Deborah (Judg. 4:4). He is mentioned only once in a narrative especially concerned with commander Barak (Heb., "lightning"). ***See also*** Barak.

Lasea (luh-see´uh), a city on the south coast of Crete. It is mentioned in Acts 27:8 as a point beyond which the dangers of proceeding by sea increased dramatically, especially in winter. The coast turns sharply north at that point, bringing open sea winds to bear full force, heightening danger. Lasea is near Fair Havens, modern Limenes Kali.

latchet, the leather strap or thong that secures the sole of a sandal to the foot (Gen. 14:23; Isa. 5:27; Mark 1:7; Luke 3:16).

Latin (lat´in), a word originally referring to peoples surrounding Rome in the area of Latium. In the second century B.C. Rome's Latin allies had a "second class" citizenship, though they might become full citizens of Rome upon moving to the city. Such a class of "Latin" citizens continued to exist in the Imperial period.

Latin was the language spoken by these people and the primary language used among the educated and romanized populace in the western part of the Roman Empire. It had developed considerable flexibility under the influence of Greek. However, Greek remained the primary language for the eastern part of the Empire, even among educated Romans. There Latin was limited to Roman military affairs. According to John 19:20, the official reason for Jesus' crucifixion was written in Latin, the official language, as well as the local Hebrew and the widely used Greek. P.P.

laughter, an expression of rejoicing (Ps. 126:2), contrasted with weeping (Eccles. 3:4; Luke 6:21) or mourning (James 4:9) or both (Luke 6:25). Laughter may mean "laughter for pleasure, merrymaking, fun, enjoyment." The contexts of Exod. 32:6 and 1 Sam. 18:7 suggest specifically religious celebrations. The reference in Gen. 26:8 seems to be explicitly sexual. Laughter is also used of the play of children (Gen. 21:9; Zech. 8:5). Prov. 26:19 condemns a deception subsequently claimed to be for a laugh. Laughter may also denote "laughter at, mockery, ridicule, derision." Job complains that his juniors laugh at him (Job 30:1), and Jerusalem recalls how its enemies laughed at its downfall (Lam. 1:7). God, who can see the fate of wrongdoers (Ps. 37:13; cf. 52:6), laughs at the futile presumptions of earthly rulers (Ps. 2:4). Laughter at God, however, is reprimanded. On the occasion of Abraham's (Gen. 17:17) and Sarah's (Gen. 18:12) laughter God directs them to call the promised son "He laughs [at]" (Heb. *yitzkhaq,* "Isaac"; Gen. 17:19). Laughter at threats or dangers is an expression of confidence and security (Job 5:22; 39:22; 41:29). Ecclesiasticus tends to deprecate laughter (Ecclus. 21:20; 31:10), while recognizing that one's laughter may reveal one's character (Ecclus. 19:30). Rarely mentioned in the NT, laughter may express either joy (Luke 6:21) or derision (Matt. 9:24).

laver (lay´vuhr), a large copper or bronze vessel used for priestly ablutions in the tabernacle (Exod. 30:17–21) and in the Temple. It stood near the altar (Exod. 40:7), and, according to Exod. 38:8, was fashioned from the mirrors of women ministering at the door of the Tent of Meeting. Solomon's Temple had ten lavers (1 Kings 7:30, 38, 40) made by Hiram of Tyre.

law, an official set of rules governing the behavior of individuals in society. Judaism divides the Bible into the Law, the Prophets, and the Writings, "Law" reflecting the Greek understanding of the Hebrew word *torah* (here used with reference to the Pentateuch) as law (Gk. *nomos*). But *torah* is more properly translated

Moses receiving a scroll from God that contains the law by which the ancient Israelites are to live; a mosaic at the Monastery of St. Catherine, Sinai, sixth century A.D.

"instruction," and the content of the Pentateuch differs significantly from "law" as we usually understand it. There is little evidence that biblical Law was the law applied by the courts before the Babylonian exile. "Law" was not yet identified with the idea of a statutory text. Even in Babylonia, where we have considerable evidence of court practice, the "Codes" (the Laws of Hammurabi, and earlier the Codes of Ur Nammu, Lipit Ishtar, and Eshnunna) are never quoted in the judicial records. Rather, they are royal statements of ideal justice.

A similar pattern is evidenced from the Bible. When courts are instituted, they are charged simply to apply justice and avoid corruption (Deut. 16:18–20); in cases of difficulty they are to resort to higher authority (Deut. 17:8–13). Jehoshaphat's reform charges the judges in similar fashion (2 Chron. 19:5–11). Quite separately, Jehoshaphat sent officers to teach from "the book of the law of the Lord" in the cities of Judah (2 Chron. 17:17–19)—a practice also found in Assyrian sources. The particular association of the book of the law (Heb. *sefer torah*) with the king, and with didactic rather than judicial functions, is found also in Deut. 17:18–20. The actual administration of justice was largely conducted by city elders sitting at the city gate, on the basis of customary rules tempered by occasional royal ordinance and determined in cases of difficulty by recourse to oracular procedures conducted in local shrines. With the centralization of the worship of God such difficult cases were transferred to Jerusalem.

The Role of the King: The role of the king in law is much disputed. Some scholars deny him any genuine legislative role. But the legal powers he claims are characteristic of kings in states where central authority is only beginning to consolidate: he could require conscription; establish military, judicial, and administrative structures; commandeer labor for his estates, the production of munitions, and the servicing of his household; and confiscate land and levy taxation (1 Sam. 8:11–17). In the last days of the kingdom of Judah, King Zedekiah (597–586 B.C.) is said to have enforced an economic reform to relieve debt-slavery (Jer. 34); but there are grounds to believe that the motivation was more concerned with recruitment into the army than the regulation of purely private law matters. Such practical ordinances as these, unlike the *torah* whose teaching the king sponsored, were not designed to establish rules that would continue in force unless repealed. Nevertheless, there is one royal ordinance that is reported to have subsisted: David's law on the distribution of booty, which the author of 1 Sam. 30:25 tells us remained "a statute and an ordinance for Israel to this day." By contrast, God's instructions to Moses regarding the distribution of the booty taken from the Midianites are not presented as establishing a general rule (Num. 31).

Moses, though not given the title of a king, frequently acted like one. On occasion, he issued commands for which no divine mandate was claimed. For example, he organized the judicial system along military lines (Exod. 18). He dictated the monuments to be raised and the ceremonies to be performed after the crossing of the Jordan (Deut. 27). He required a septennial reading of the Law at the festival of Sukkoth (Deut. 31:10–13)—but the law of Sukkoth was itself then neglected from the time of Joshua until rediscovered in the written law by Ezra (Neh. 8:13). At Marah, before the Israelites reached Sinai, he issued a "statute and an ordinance" (Heb. *khok umishpat,* Exod. 15:25, the same term as is used of David's booty law).

Some law was produced in the course of adjudication; here too there are parallels between the narratives of Moses and later kings. In the wilderness, the case of the daughters of Zelophehad (Num. 27, 36) is presented as a dispute, its resolution by Moses is through an oracular consultation of God, and there is a statement of general rules (going beyond the situation of the dispute) that are to have abiding force. David's booty law is the product of a similar sequence: a dispute between sections of the army regarding the distribution of booty after the campaign. But not all adjudication produced precedents for the future (e.g., Solomon's judgment, 1 Kings 3:16–28); a precedent required a new act of authoritative enunciation.

Narrative sources, both inside and outside the Pentateuch, present a picture of piecemeal lawgiving, albeit divinely inspired, often springing from concrete events. Given the central role of the king in both the promulgation of law and ordinances and the king's capacity to act as supreme judge, it is not appropriate to differentiate strictly between precedent and legislation. The king's power over and responsibility for the cult and his patronage of court prophets and court scribes also contributed to the institutionalization of divine law and its consolidation into the codes we find in the Pentateuch.

The Institutionalization of Divine Law: Four narratives cast light on the process. When Samuel is asked to authorize the appointment of a king, he—a prophet—acting under divine command issues a formulation of royal privileges which he writes in a "book" (Heb. *sefer,* meaning writing on leather) and deposits it in a sanctuary. If the account we have in 1 Samuel 8 is a guide, the text cannot have been long. More substantial was the text God commanded Jeremiah to have read in the Temple (Jer. 36:23), a scroll that was deposited in the Temple with the connivance of the Temple officials. The story may well cast light on the circumstances leading to the discovery of the "book of the covenant" found in the Temple in the time of Josiah (ca. 620 B.C.; 2 Kings 23), a text whose authenticity is validated by a prophetess, Huldah, who consults God probably by means of an oracle (2 Kings 22:13, 18). We have no means of identifying positively the text found on that occasion, although scholarly opinion most commonly takes it to have been the bulk of Deuteronomy. After the Exile (late sixth century B.C.), Ezra is sent to Jerusalem with the authority of King Artaxerxes to guide the restoration of Israel in its own land. He is described as a scribe learned in the *torah* of Moses, and he comes prepared to "study the law of the Lord, and to do it, and to teach his statutes and ordinances in Israel" (Ezra 7:10). The two traditions kept separate by Jehoshaphat are here combined: the teaching of divine law is now to be accompanied by implementation measures characteristic of royal ordinance. At the same time, the text of the *torah* comes to acquire the kind of force we associate with statute, so that verbal interpretation becomes necessary (Neh. 8:7–8).

The Covenant Code, the Priestly Code, and Deuteronomy: It is not easy to ascertain the place of the Pentateuchal laws in the history of the legal institutions of ancient Israel. The "Covenant Code" (Exod. 21–23, deriving its conventional title from Exod. 24:7) is generally regarded as the oldest. It falls into two halves, the first of which (Exod. 21:1–22:17) is formulated mainly in conditional sentences (known as the "casuistic form") wherein the protasis ("if" clause) states circumstances and the apodosis ("then" clause) the legal consequences. This is also the predominant (though not exclusive) form used in the ancient Near Eastern codes. The subject matter and tone (secular and without rhetorical ornamentation) also make it the most similar to its ancient counterpart. Parallels in content are found between all the biblical codes and those of the ancient Near East, but the Covenant Code includes one that is particularly striking in both form and content (Exod. 21:35; cf. *Laws of Eshnunna* 53), despite the impossibility of a direct literary connection. It perhaps serves as indirect evidence of the existence of Canaanite codes (thus far undiscovered), which may have served as intermediaries before the Israelites became familiar at first hand, as a result of conquest, with the legal traditions of Babylon and Assyria. The "Covenant Code" contains rules on slavery, homicide, various types of assault, death caused by animals, cattle theft, agricultural damage, deposit of property, shepherding, loan of animals, and seduction of a virgin. The rule "an eye for an eye . . ." is found earlier in the Laws of Hammurabi.

The second half of the Code (Exod. 22:18–23:19), expressed largely in the "apodictic" form (direct, second-person commands, unaccompanied by any statement of sanction), combines sacral offenses, humanitarian injunctions, standards for the administration of justice, the laws of the seventh year, the Sabbath, and the three pilgrimage festivals (see Exod. 23:14–17) and regulations regarding sacrifice; it may be significant that the ban on seething (boiling) a kid in its mother's milk is found in this latter context. It is likely that the Code as a whole was compiled from discrete sources, and it is widely believed not to have formed an original part of the Sinaitic narrative, to which it now belongs.

Much of the rest of Exodus, Leviticus, and Numbers is called the "Priestly Code," associated with the literary source "P" of traditional biblical criticism. There is increasing recognition of the existence within it of early materials, and some contemporary scholars date the source as a whole earlier than Deuteronomy, thus well before the Exile. Very generally, the Priestly Code emphasizes religious and ritual concerns, while the Covenant Code deals with civil law and Deuteronomy shows special interest in matters of public law. But these characteristics are by no means exclusive: both the Priestly Code and Deuteronomy also deal with slavery and homicide; Deuteronomy alone deals with remarriage. Within the Priestly corpus, there is a distinguishable text in Leviticus 17–26, known as the "Holiness Code" in view of the reiterated motive for obedience to its laws: "Be Holy."

Biblical law has traditionally been studied much like modern statutory sources, with concentration on the wording of the individual legal provisions.

Narrative in Biblical Law: For some, the biblical mixture of legal, ritual, and moral rules, together with the intermingling of law and narrative in the Pentateuch, is a matter to be ignored, or even explained away as representing a "primitive" stage of legal development. Today, these literary characteristics of the text are themselves the object of study and are increasingly seen as integral to the understanding of the laws themselves. One example is the "law of the altar" in Exod. 20:22–26, which some have regarded as misplaced, belonging properly to the Covenant Code (which is introduced only in Exod. 21:1). More likely, this law forms an essential part of the narrative that links the revelation of the law on Sinai with the sin of the golden calf (Exod. 32–34). The very arrangement of the Covenant Code may itself require explanation in terms of its narrative context, commencing with the theme of slavery (as does the Decalogue, which immediately precedes).

Attention to the narrative context is particularly important for the understanding of Deuteronomy, formulated as a speech made by Moses in the plains of Moab before the entry to the promised land. Whereas divine law is presented in Exodus-Numbers as the words of God to Moses, which he is commanded to transmit to the children of Israel, Deuteronomy recounts Moses' performance of that task: it is Moses telling the children of Israel what God has told him. Deuteronomy refers to itself (in the context of the law of the king, though the verses in question may well be secondary) as "a copy of this law" (Heb. *mishneh hatorah hazot,* 17:18), understood by the Septuagint as "this second law," rather than "a copy of this law" (RSV). The Greek rendering accords with the later Hebrew usage of the term and with what we find in the text. Moses does not proclaim a "copy" of Exodus-Numbers; though many of the themes of the latter are taken up, he provides in effect a supplementary revelation. The narrative confirms the status of this supplementary revelation: at the conclusion of the book, God commands the making of a further covenant in the plains of Moab "besides the covenant which he had made with them at Horeb" (Deut. 29:1). The strong association of law with covenant, wherein the observance of law becomes a term of the covenant, is characteristic of Deuteronomy and is thought by some to have been imposed by Deuteronomic editors on the Sinai narrative in Exodus: originally, it is argued, Sinai was understood as a reiteration of the patriarchal covenant to those descendants of the patriarchs who had escaped from Egypt, combined with the revelation of the Decalogue but not the Covenant Code or the Priestly laws.

Later Biblical Law: In the Persian, Hellenistic, and Roman periods (539 B.C.–A.D. 325), biblical law was the object of increasing restatement and elaboration. Deuteronomy itself had indicated the continuation of prophetic revelation of the law, in promising the coming of a prophet like Moses, who would perform the same function as Moses in mediating the transmission of divine commands (Deut. 18:15–22). Rabbinic tradition regarded this figure not as a single eschatological prophet, but as a sequence of prophets operating through history: Micah was one, Abraham (anachronistically) another. This Deuteronomic tradition was used by the Qumran community to validate its own restatement of scriptural rules. There is evidence of a similar association of Jesus with the prophet like Moses (as well as with other OT figures) in the NT; the Sermon on the Mount (where Jesus claims not to change an iota of the law, despite the antitheses; Matt. 5:18) may be viewed as a compilation of teachings claiming this same status of revealed restatement.

Judaism by the first century A.D. had become a highly diversified phenomenon, with different groups interpreting the OT in their own ways and for their own purposes. This pluralism went far beyond the content of the interpretation of particular passages. Given the different audiences being addressed, the very style of interpretation differed. Thus Philo (late first century B.C. to early first century A.D.) addresses an intellectual Greek audience in terms of allegory and philosophy; the Qumran community addresses itself as a group dissentient from the Temple establishment and viewing its redemption in terms of separation and purity; the rabbis after the destruction of the Second Temple in A.D. 70 seek to unify the people around the synagogue, the study-house, and the traditions of the pharisaic fellowships (Heb. *khavurot*). First, however, they needed to supplement the written law with an "Oral Law" that would really regulate the details of everyday existence, thus providing a focus for both unity and the concentration of religious (and other) energies.

Jesus spoke to a popular and unsophisticated audience moved by none of these considerations. His target was not the law, but rather any style of interpretation of the law that removed its immediacy as teaching to the people. There is no hint of an antithesis between law and grace in the teachings of Jesus. In some of the Pauline writings, the matter stands differently. But Pauline antinomianism was not an opposition to law per se (e.g., Rom. 7:12), rather an opposition to observance of the law as the route to divine redemption (e.g., Gal. 5:4). Paul's approach, too, was a function of his aims and his audience. Unlike Jesus, his audience was mainly gentile and his mission to convert them was likely to be impeded by insistence upon observance of the Mosaic law. ***See also*** Covenant; Jesus Christ; Moses; Paul; Pentateuch; Prophet.

laying on of hands, concretely, the activity of exerting force or doing physical violence (e.g., Gen. 22:12; Exod. 7:9; Luke 20:19; 21:12; Acts 21:17). Because of this concrete usage, the placing of one's hands on someone or something becomes a natural symbol of the transfer of physical activity and force, i.e., as a symbol of a person's past deeds and their effects, or of present power, or of both. Thus, by laying hands on the head of an animal to be sacrificed, people transfer their past deeds and the effects of those deeds on the beast to have them annihilated and/or transformed with the destruction of the animal (e.g., Exod. 29:10, 15, 19; Lev. 3:2, 8, 13; Num. 8:12). Laying hands on the sick effects the transference of the power of the healer to them (Mark 5:23; 7:23; Acts 9:12, 17), just as laying hands on children wards off negative influence, a protection due to the imparted power of the one laying on hands (Gen. 48:14; Mark 10:16). Finally, people can hand over their power and have another exercise it on their behalf, effecting this by the laying on of hands (Num. 8:10; Acts 6:6; 8:17; 1 Tim. 4:14). Those already wielding power over a group can hand that power on to others by laying on their hands (Num. 27:23; Deut. 34:9; 1 Tim. 5:22; 2 Tim. 1:6). B.J.M.

Lazarus (laz´uh-ruhs), a figure in two different passages in the Gospels. In Luke 16:19–31, Jesus tells the parable of the rich man and Lazarus; in John 11:1–44, Jesus raises his friend Lazarus from the dead. It is uncertain whether the same individual is intended in both cases, but there are apparent connections.

In the Lucan parable, Lazarus dies a poor man and is carried by angels to Abraham's bosom, while the rich man dies and is tormented in Hades. When the rich man seeks relief and is denied it, he asks Abraham to send Lazarus back to warn his five brothers, lest they meet a similar fate. But Abraham replies, "If they do not hear Moses and the prophets, neither will they be convinced if some one should rise from the dead" (Luke 16:31).

Jesus raises Lazarus from the dead (John 11:1–44); sixth-century mosaic at San Apollinare in Classe, Ravenna, Italy.

In John 11, a Lazarus does rise from the dead at the command of Jesus, and his resurrection precipitates Jesus' own death (11:45–53). But it does not result in anyone's repentance or salvation. Seemingly, Abraham's prediction is fulfilled. Yet there is no explicit connection between the Lucan parable and the Johannine account.

The web of relationship does not, however, end there. In John, Lazarus is the brother of Mary and Martha of Bethany, a village near Jerusalem (11:1–2). In Luke (10:38–42), Jesus enters an unnamed village (hardly Bethany, however, for Jesus is presumably still in Galilee) and is entertained by the sisters, Mary and Martha, as he is also in John (12:2). In Luke, Mary sits at Jesus' feet, while Martha serves; in John, Mary anoints Jesus' feet (12:1–8; cf. Luke 7:36–50), and again Martha serves (12:2). Although Luke does not link Mary and Martha to Lazarus, and though all the episodes are different, these sisters and a Lazarus who dies and whose resurrection is either suggested or recounted are encountered only in the Gospels of Luke and John. ***See also*** Martha; Mary. D.M.S.

lead, a heavy, malleable, bluish-gray metal. It was Midianite booty (Num. 31:22), used for weights (Zech. 5:7) and for sinkers on fishing lines (British Museum examples, from ca. 1200 B.C.). Ezek. 22:18–20 mentions lead with other metals; 27:12 indicates the existence of Israelite trade in lead with Tarshish. Job 19:24 describes engraved tablets whose letters are lead-filled for reading clarity and permanence. Exod. 15:10 employs lead figuratively: Pharaoh's armies sink "as lead" into the waters. First-century lead sarcophagi are known from examples in Beirut's American University.

Leah (lee´uh), one of the two wives of Jacob. Little is known of her personally other than the fact that she was "weak-eyed" (Gen. 29:17, Heb. *rakkot,* possibly "tender"). She was clearly less

favored than her beautiful sister and co-wife, Rachel, for whom Jacob had contracted with their father, Laban, to work seven years as a bride price (Gen. 29:18). At the bridal feast, Leah, the elder, was substituted for Rachel, and Jacob then married her. He married Rachel a week later and worked for Laban for another seven years (Gen. 29:23–30). Leah bore Jacob's first four children, Reuben, Simeon, Levi, and Judah, and ceased bearing (Gen. 29:31–35). Then childless Rachel gave her servant Bilhah to Jacob as surrogate mother, so she might have children "through her." Leah also gave her own servant Zilpah, and the two surrogates bore four sons—Bilbah bore Dan and Naphtali and Zilpah bore Gad and Asher. Rachel was clearly the dominant wife, for Leah had to give Rachel mandrakes (a fertility charm) in return for sleeping with Jacob (Gen. 30:14–16). Leah then bore two more sons, Issachar and Zebulun, and a daughter, Dinah. Rachel and Leah both agreed to accompany Jacob back to his homeland, and Leah was ultimately buried in the cave of Machpelah (Gen. 49:31).

In Ruth 4:11 Leah and Rachel are mentioned together as matriarchs of Israel. The name Leah means "cow" (and she was "cow-eyed") and Rachel means "ewe," so it is possible to speculate that the tale of the two wives of Jacob reflects the jockeying for position of sheep herders and cattle herders in the early tribes of Israel. An alternate hypothesis is that these animals were totemic insignia of groups of early tribes. We are certain only that the sons of Leah and Rachel were considered the ancestors of the tribes who constituted the members of the tribal federation (sometimes called the amphictyony) of Israel during the period of the judges. ***See also*** Rachel. T.S.F.

leather, processed animal hides suitable as rough clothing (Elijah's girdle, 2 Kings 1:8; John the Baptist's girdle, Matt. 3:4; Mark 1:6) or as fine accouterments (the shoes of Ezek. 16:10 were of the material [KJV: "badger's skin"]). Leather was also employed in covering the tabernacle (Exod. 25:5, RSV: "goatskins"). While the variety of animal hides usable was large, preparation involved scraping the hair and flesh from the material, then treating it for durability, flexibility, and even fluid-proofing. It degenerates readily once discarded, so finds of intact ancient leather are archaeologically rare and important. Some of the Dead Sea Scrolls were written on leather. R.S.B.

leaven, a fermenting agent (like yeast), which in biblical times was normally added to a batch of bread dough by using an unbaked portion of dough from the previous batch. However, the custom of nomads was to eat unleavened bread, and evidence of this is found in the OT (Gen. 19:3; Judg. 6:19; 1 Sam. 28:24, which perhaps represent occasions of special bedouin hospitality).

Leavened bread was prohibited in sacrifices that went on the altar (Lev. 2:4). The reason for this was that no leaven could be burned, nor could honey (Lev. 2:11). These both caused fermentation and thus appeared to have a life of their own that must not be destroyed. So leaven is the vital force of the vegetable world as blood is of the animal, which also was forbidden to be burnt. Leavened bread was permitted for the thank offering (Lev. 7:13) and for the first fruits of the wheat harvest (Lev. 23:7), but these were not burned on the altar (Lev. 7:14). To understand Amos 4:5, it should be noted that the word there commonly translated "offer" properly means "burn."

The Feast of Unleavened Bread owes its name to the fact that all leaven was avoided during its seven days (Exod. 12:15). Scholars believe that originally this feast was distinct from Passover. It was an agricultural celebration, first observed in Palestine (Josh. 5:11–12) and probably adopted from the Canaanites. It marked the gathering of the first crop and so a new beginning. Therefore only the newly reaped grain was eaten, with no leaven from the previous year's harvest in it. Later, however, when Passover and the Feast of Unleavened Bread had been combined, the eating of unleavened bread was interpreted as a memorial of what had happened at the Exodus (Exod. 13:7–8).

In rabbinical literature, leaven was viewed as causing decay and so became a symbol of evil and the corruption of human nature. This idea is reflected in the NT in Jesus' sayings about the leaven of Pharisees, Sadducees, and Herod (Mark 8:15 and parallels) and in Paul's attack on Corinthian laxity and Galatian circumcising (1 Cor. 5:68; Gal. 5:9). But the positive concept of leaven as a powerful life-force also appears in Jesus' parable of the growth of the kingdom (Matt. 13:33; Luke 13:20–21). ***See also*** Feasts, Festivals, and Fasts; Passover, The. J.R.P.

Lebanon (leb´uh-nuhn), the name of a mountain range parallel to the eastern Mediterranean coast. It has also given its name to the modern Republic of Lebanon, created during the French mandate of Syria between World Wars I and II. In antiquity Lebanon was populated by Canaanites and was the homeland of the Phoenicians. The name derives from a Hebrew word for "white" and refers to the snow-capped peaks of the range (Jer. 18:14). The Lebanon mountains begin at the northern border of Palestine and extend northward approximately a hundred miles. The highest peak of this rugged range is over 9,850 feet high. On the western slope of the range the coastal zone is narrow and the mountains make communications inland difficult at best. Narrow, steep valleys and small rivers run down to the sea. The northernmost river is Nahr el-Kabir, in antiquity the Eleutherus, and in the

The cedars of the Lebanon mountain range provided abundant timber for the ancient Near East; few remain today.

south is the Litani River. They and others are fed by heavy annual precipitation (between 40 and 60 inches in the mountains).

The Lebanon mountains were famous not only for their beautiful white peaks but for their cedar forests (1 Kings 4:33; 2 Kings 14:9; Pss. 92:12; 104:16). These tall and beautiful trees were sought by many peoples in the ancient world. The Egyptians imported cedar wood as early as the third millennium B.C. and Byblos became the primary port where timber was obtained. Consequently it was under strong Egyptian cultural influence during the third and second millennia B.C. Rulers from Mesopotamia also took timber from Lebanon for their temples. King Solomon used cedars of Lebanon in the construction of the Temple in Jerusalem (1 Kings 5:6–10; 6:15–20) and in his palace (1 Kings 7:2–3). Today only a few stands of cedars remain.

To the east, running parallel to the Lebanon mountains, is the Biqa‘ Valley, classical Coelesyria (Lat., "hollow Syria"), and beyond, the Anti-Lebanon mountain range, dominated by Mount Hermon at its southern end. The high Biqa‘ is a fertile and well-watered river valley drained by two main streams: the Orontes that runs from Baalbek to northern Syria and the Litani that flows down the center of the southern Biqa‘ and then cuts westward to empty into the Mediterranean Sea.

In antiquity the two main areas of human settlement were the coastal plain and the Biqa‘ Valley. Paleolithic (to ca. 25,000–12,000 B.C.) remains have been found at a number of sites along the coast, the most important being modern Kasir Akil. Neolithic (10,000–4000 B.C.) settlement is well represented at Byblos and sites along the banks of the Litani River in the Biqa‘ valley. Along the coast in the Bronze and Iron Ages (ca. 3000–333 B.C.), numerous cities are known from ancient texts and archaeological excavations. Byblos is the best known, and other port cities include Tyre, Zarephath, Sidon, Beirut, Batrum, and Tripoli. At the beginning of the Iron Age the population became known as Phoenicians and their cities emerged as the leading maritime centers of the Mediterranean in the wake of the collapse of the Late Bronze Age trade. But the coastal cities never successfully united except when Tyre controlled Sidon and southern Phoenicia in the ninth and eighth centuries B.C.

Despite its renown for fruitfulness, relatively small portions of the Biqa‘ valley are profitably farmed even today, and settlement was never very dense. Partly as a result of the

great diversity of farming conditions, agriculture was filled with risks and insecurity, and there were periods when sheep and goat nomadism increased. After a peak of settlement in the Early Bronze Age (third millennium B.C.) there was a gradual rural decline. In the Bronze Age about a dozen small towns were strung out the length of the valley in the rich flood plains and by springs; none were much larger than 12 acres. Political and cultural fragmentation was common. Two cities known from Egyptian sources were Kadesh in the north and Kumidi in the south. Kadesh, identified as modern Tell Nebi Mend, is on the bank of the Orontes River and was the site of the famous battle between Rameses II and the Hittites in the thirteenth century B.C. Kumidi is modern Kamid el-Loz, located a few miles east of the Litani River. Cuneiform tablets and public buildings from the Late Bronze Age have been discovered there. In Roman times Baalbek was the important sanctuary of Heliopolis in the Biqa'.

Significant settlement of the highlands of the Lebanon mountains only began in Roman times when deforestation went hand in hand with population increases. In a system of intensive terrace farming, a variety of cash crops were planted at different elevations and harvested sequentially. Grapes, olives, apples and other orchard crops were most important. This type of agriculture required investments of capital, time, and labor, and encouraged the development of stable but closed communities. In the early modern era mulberry orchards became important as part of silk production but the industry collapsed in the early nineteenth century. The mountains have become a home for two minority groups, the Christian Maronites and the Druse. Other prominent groups in modern Lebanon are Sunni and Shi'ite Muslims.

Lebbaeus (li-bee'uhs), an alternate name in some texts for Thaddeus (Matt. 10:3). ***See also*** Judas; Thaddeus.

leech (KJV: "horseleach"), a bloodsucking parasite of the class *Hirudinea* of which several varieties are common in Palestine. It is used as a symbol of insatiable appetite in Prov. 30:15.

leeks, the biennial herb *Allium porrum,* similar to garlic and onion. A staple in the ancient Near Eastern diet, leeks were reportedly yearned for by the Hebrews while in the wilderness (Num. 11:5) as a symbol of more abundant life.

Leek.

lees, the residue left in a wine container during fermentation and aging. Wine with the lees in it was considered a preferable product to new wine (Isa. 25:6) and was also used as a metaphor for sluggish richness (Jer. 48:11; Zeph. 1:12) which deserved to be disturbed.

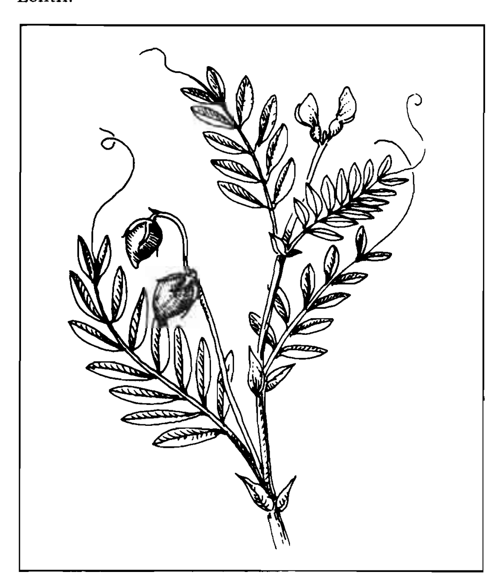
legion, a large unit of soldiers in the Roman army. With Augustus's reorganization of the Roman army a legion was composed of 5,400 to 6,000 men and a like number of auxiliary troops. The standing army comprised twenty-eight legions until A.D. 9 when three were lost. They were not replaced until two new legions were raised at the end of Caligula's reign (A.D. 37–41) in preparation for the invasion of Britain. Tacitus (*Annals* 4.5) gives the following deployment of the legions for A.D. 23: eight along the Rhine; six in the Balkans and along the Danube; three in Spain; two in Africa; and two in Egypt and four in Syria to watch over the eastern frontiers.

The auxiliary regiments consisted of infantry cohorts and cavalry recruited from among the subject peoples. Sometimes they were commanded by Roman officers and sometimes by their own tribal leaders. Trajan increased the strength of the Roman army to thirty legions.

"Legion" ("for we are many") appears as the name of a demon exorcised by Jesus in Mark 5:9 (cf. Luke 8:30). Jesus at his capture claimed God would send more than twelve legions of angels to rescue him if he so desired (Matt. 26:53). P.P.

Lehi (lee'hi; Heb., "jawbone"), a place name, the site where the Philistines camped as they

sought Samson after he had burned their grain (Judg. 15:9). Samson was bound and brought to the Philistines at Lehi but broke free and killed 1,000 Philistines with the jawbone of a donkey. To mark the occasion, the place was named Ramath-lehi, meaning the "height, or high place, of the jawbone" (Judg. 15:14–17). The name probably refers more to the area where the exploit occurred, including the spring named En-hakkore, rather than to a specific settlement (note Judg. 15:9, 19). It was probably located somewhere in the lowlands of southwestern Judah. The occurrence of the name in 2 Samuel (23:11) is textually uncertain, and some translators read "in a troop" for "Lehi." ***See also*** Samson. D.R.B.



Lemuel (lem´*yoo*-uhl; Heb., "belonging to God"), the king of Massa and the addressee of his mother's wisdom in Prov. 31:1–9. The Septuagint understands "Lemuel" and "Massa" as common nouns; thus the RSV margin translates the latter in 31:1 as "oracle" ("the words of King Lemuel, the oracle which his mother taught him").

lending. ***See*** Debt; Loan.

Lent, among Christians originally the period of prebaptismal preparation, later of public penance. Finally it became a forty-day devotional preparation for Easter traditionally based on Jesus' wilderness fast (Mark 1:13).

lentil (*Lens culinaris*), a plant of the legume family cultivated widely in the Near East since prehistoric times. The small lens-shaped seeds are an especially nutritious food providing both protein and carbohydrates. It was a common component of soups and stews (Gen. 25:34) as well as a flour base for breads (Ezek. 4:9).

Lentil.

leopard (*Panthera pardus*), a large cat identified by its characteristic spots (Jer. 13:23). It is at home in mountainous terrain, especially Mount Hermon and Lebanon (Song of Sol. 4:8), and a few leopards are still to be found in Israel and Jordan. As a predator, the leopard represented a great danger to shepherds and their flocks, as well as to travelers (Jer. 5:6; Sir. 28:23), and cessation of such predatory activity will characterize the time of God's final peace (Isa. 11:6). Hab. 1:8 mentions horses that are swifter than the leopard, but this probably refers instead to the cheetah (*Acionyx jubatus*), another large cat once present in the area and trained for use in hunting.

leprosy, in the OT a disorder affecting humans, fabrics, and houses. There are different types of leprosy that afflict persons (Lev. 13). Though it is not clear what these skin diseases are, it is certain that they are not modern leprosy (Hansen's disease). The plague in fabrics and houses is described as greenish or reddish spots (Lev. 13:49; 14:37), thus indicating a type of mold or mildew.

Persons or objects afflicted with leprosy can pollute others. Anyone who enters a leprous house must bathe. If a person tarries there by eating or lying down, both bathing and laundering are necessary (Lev. 14:46–47). Surprisingly, the Bible says nothing about the effect of a leper's impurity. The leper certainly polluted at least like a polluted house and probably like one who has an abnormal bodily discharge (Lev. 15:2–12; cf. *m. Zabim* 5:6).

A leper is to be excluded from habitations (Lev. 13:45–46; cf. Num. 12:15; 2 Kings 7:3–4). When the person recovers from the affliction, purification rites are performed (Lev. 14:2–20, 21–32). Similar rites are performed for a renovated house (14:48–53; note that these rites are not as extensive as the healed leper's). These purification rites are not for the removal of leprosy, but only for the removal of residual ritual impurity (see Mark 1:44). A rite for the curing of leprosy is found in the case of Naaman immersing in the Jordan seven times (2 Kings 5:10, 14).

Fabrics incorrigibly infected with leprosy are to be burned (Lev. 13:52, 55, 57) and building materials so infected must be discarded outside the habitation (14:40, 41, 45). There is some evidence that leprosy was considered a punishment from God for sin (cf. Num. 12:10–15; 2 Kings 5:27; 15:5; 2 Chron. 26:20–21).

The Gospels report that Jesus healed people afflicted with leprosy (e.g., Matt. 8:1–4; Luke 17:11–19) and he commissioned his disciples to do the same (Matt. 10:8). Jesus is also reported to have visited the home of Simon the leper (Mark 14:3), perhaps one of those he had healed. The data do not enable one to determine if this "leprosy" was Hansen's disease. D.P.W.

Lesbos (lez´buhs), a northeastern Aegean island. Paul stopped at Mitylene on Lesbos en route to Jerusalem (Acts 20:14). ***See also*** Mitylene.

letter, a form of literary communication. The number of letters discovered in the Middle East and the Mediterranean basin within the last century shows that the letter was one of the most ancient and common forms of communication. Even these discoveries do not reflect how extensive letter writing was, because only letters written on decay-resistant materials or those preserved by a dry climate, such as papyrus letters in Egypt, have survived. Though many were written by professional scribes, the percentage written by common people indicates that illiteracy was not as prevalent in the Hellenistic culture as scholars once imagined.

There was an organized postal system as early as the Persian Empire (sixth century B.C.), but it existed only for government business and not for private correspondence. Wealthy families used slaves or couriers, and common people relied on caravans, friends, or passing strangers who were traveling in the direction of the recipient of the letter.

Clay tablets from Ras-Shamra, El-Amarna, Lachish, Babylon, Mari, etc., throw light on letter writing in the OT period. Jewish letters found at Elephantine, an island in the Nile River near the first cataract on which there was a Jewish colony in the fifth century B.C., as well as other Aramaic letters on skins and potsherds, show what letter writing was like in the period immediately following that of the OT. Of the OT letters, all are embedded in OT documents and only their message is actually quoted.

Since no OT document is written in letter form, it is surprising that the letter became the largest literary category in the NT, i.e., twenty-one of the twenty-seven documents are written in epistolary form. A partial explanation of the prominence of letters in the NT is the way in which Christian leaders such as Paul employed letters as a means of instructing communities under their supervision when the leaders could not be present in person.

Greek papyrus letters, which have been discovered in great number in Egypt, help us understand Greek letter writing at the time of the NT. By comparison with these letters, NT letters tend to be longer and somewhat more literary. In the case of Paul, for example, the religious nature of his correspondence colored the manner in which he wrote letters and contributed to the creation of his recognizable style. He intended that his letters be read aloud to his communities when they were at worship. This is indicated by the manner in which he substitutes prayers of thanksgiving and/or blessing for conventional epistolary phrases at the beginning and end of the letter, and by the citation of hymns, creeds, Scripture, and catechetical instruction in the body. ***See also*** Epistle; Ostraca; Salutations; Writing. J.L.W.

Letter of Jeremiah, the, a writing attributed to Jeremiah (late seventh–early sixth centuries B.C.) but composed most likely in the fourth century B.C. in order to provide Jews with arguments to counter their gentile neighbors' belief in the reality of idols. It is more of a homily than a letter, arising from Jeremiah's advice to the exiles concerning idolatry—"Thus shall you say to them: 'The gods who did not make the heavens and the earth shall perish from the earth and from under the heavens'" (Jer. 10:11)—as well as from his correspondence with them in Jeremiah 29. The work defies organization or outline. It is punctuated with the refrain, "Since you know by these things that they are not gods, do not fear them" (see vv. 16, 23, 29, 40, 44, 52, 56, 65, and 69), and includes all of the stock polemics that Jews directed against idols (see Jer. 10:2–16; Pss. 115:4–8; 135:15–18; Isa. 40:18–20; 41:6–7; 46:1–7; Bel and the Dragon). They are helpless, fabricated by human beings out of wood, stone, and metal, subject to decay, rust, and rot, powerless to deliver anyone from danger, and served by impure and dishonest priests and priestesses who engage in immoral activities like cultic prostitution and theft of offerings.

The Letter was probably composed in Hebrew but has been preserved only in Greek. Its place of composition may have been Babylonia, since it is well informed concerning Mesopotamian religious practices. Some manuscripts of the Septuagint (LXX) treat it as a separate book following Lamentations, while others, along with the Vulgate, include it at the end of Baruch. For Protestants, it is part of the Apocrypha, while Catholics number it among the deuterocanonical books as a part of Baruch. ***See also*** Apocrypha, Old Testament; Baruch; Idol; Jeremiah, The Book of. Levant (luh-vant´), a term coined by early travelers to the Holy Land and more frequently used today in geological discussions to designate the lands of the eastern Mediterranean. The Levant Rift Valley, sometimes referred to as the Jordan rift, is part of an extensive fault system which was formed over a long period of time. This rift shaped the topography of the region and serves as a reminder of geography's influence on the

life of a region. ***See also*** Historical Geography of the Bible; Jordan River, The.

Levi (lee´vi; Heb., "joined"). **1** The third son of Jacob (Gen. 29:34). **2** The tribe descended from 1 above. Together with Reuben, Simeon, Judah, Issachar, and Zebulun it formed a group of six tribes whose special relationship was expressed by their common descent from Jacob's wife Leah (Gen. 35:23). Originally, Levi must have been a full tribe, since it appears in some lists of the twelve tribes; but in others it has disappeared and, unlike all the other tribes, nowhere in the OT is it given any allocation of territory (Josh. 13–19). On the contrary, it is said that its members have no share in the land, because they have been chosen by God to serve him as priests (Josh. 18:7). So the Levites are viewed as the tribe of Levi (Deut. 18:1) who are given a number of towns to live in (Josh. 21), but also, when later priests and Levites come to be distinguished, all the cultic personnel are considered to be descended from Levi.

It seems likely that, early in its history, some disaster overtook the tribe of Levi. This is perhaps reflected in Genesis 34, which tells of an attack by Simeon and Levi on Shechem, in the neighborhood in which they may have originally settled. But Jacob is depicted as fearing that their action will cause his destruction (Gen. 34:30), and in Genesis 49, apparently referring to the same episode, Jacob is shown as promising them that they will be divided and scattered in Israel (Gen. 49:7). As a result of this, Levi lost its "secular" character and became the priestly tribe of the later Blessing of Moses (Deut. 33:8–11; it is noteworthy that v. 11 speaks of violent hostility to the tribe). However, this reconstruction remains hypothetical, and whether such an evolution of the tribe of Levi is historically correct and how far there is any factual connection between it and the Levites is still disputed. ***See also*** Levites.

Leviathan (li-vi´uh-thuhn), a great, mythological monster. In Ugaritic mythology, Leviathan (appearing by the name "Lothan") is one of the primeval sea monsters who battles against Baal on the side of Mot (the god of the underworld) and who is ultimately defeated. This mythological tradition was adopted and transformed in the Bible where God appears as the victor over the sea monsters, Ps. 74:13–14: ". . . thou didst break the heads of the dragons on the waters. Thou didst crush the heads of Leviathan, thou didst give him as food for the creatures of the wilderness" (cf. Job 3:8; 26:12–13; 41:1–34; Ps. 104:26). The references to God "playing" with Leviathan (Ps. 104:26; Job 41:5) are explainable on the basis of God's omnipotence which reduces this mighty rebellious dragon to a plaything. The mythological pagan drama is ultimately transposed in Israel into a moral lesson. The future and final destruction of Leviathan becomes a symbol in Isaiah (27:1) for the death of the wicked, to be succeeded by the redemption of Israel (26:20–21; 27:2–13). ***See also*** Baal; Tiamat; Ugarit.

Levites (lee´vits), generally, those belonging to the tribe of Levi, although this may not be the original meaning of the term. In some passages, Levite seems to be a description rather than a tribal name. A Levite is mentioned who was a Judahite (Judg. 17:7) and who appears as a kind of priest (Judg. 17:13); we may compare the designation of Aaron as "the Levite" and a spokesman for God (Exod. 4:14–16). The term may be from the Hebrew root meaning "to join" (Num. 18:2, 4), denoting originally a group whose members were particularly closely attached to God (Num. 3:12; 8:16). The Levites' zeal for God's cause is stressed in Exod. 32:25–28 (cf. Deut. 33:9), which tells how they were ordained for it (Exod. 32:29). Perhaps, then, Levites and the tribe of Levi were once two different groups, but, when the tribe disappeared, the Levites were confused with them because of the similarity of the name.

In any case, wherever the Levites appear they are solely priests, whose function was not only to sacrifice but also to transmit and administer the divine law (Deut. 17:18; 33:10). In Deuteronomy, they comprise the whole priesthood and live in various towns in the country, perhaps in special levitical cities (Josh. 21:1–42). Because of its demand for the centralization of worship, Deuteronomy makes provision for the Levites to come to the central sanctuary and to join the priesthood there (Deut. 18:6–8). However, it would seem that the Jerusalem authorities would not accept them as true priests and they were reduced to a subordinate position in the cultic staff (2 Kings 23:8–9). This was because the country Levites were considered to have become tainted with Canaanite idolatry, for which they are condemned in Ezek. 44:10–14, where the priesthood is confined to the sons of Zadok, the Jerusalem hierarchy, and the Levites are demoted to Temple servants, looking after the Temple, maintaining order in it, acting as doorkeepers, and being responsible for slaying the sacrificial animals. Here for the first time we meet the clear division between priests and Levites that became normative after the Exile (late sixth century B.C. on) and that, in the postexilic priestly tradition, was attributed to the time of Moses (Num. 18:2–6).

Postexilic developments, however, greatly increased the role of the Levites and restored much of their former importance. Both they and the priests proper were now given a common descent from Levi, and the levitical order came to include all the Temple personnel other than the priests. Our fullest information about the

Levites at this period comes from 1 and 2 Chronicles, which emphasize their high position and the importance of their duties, sometimes even over against the priests (2 Chron. 29:34). They alone may carry the Ark, the Temple's holiest object (1 Chron. 15:11–15). In addition, they provided the music for the services (1 Chron. 16:4–37), and two collections of psalms in the Psalter are attributed to groups into which the Levites were divided, Asaph (Pss. 50, 70–83) and Korah (Pss. 42–49). They retained their ancient functions of administering the law (1 Chron. 23:4; 2 Chron. 19:8–11) and of teaching it to the people (2 Chron. 17:7–9; 35:3); many of the speeches in 1 and 2 Chronicles may reflect the form of contemporary levitical sermons. The Levites retained their high status until the end of the Temple (A.D. 70), as Luke 10:32 indicates. ***See also*** Ark; Deuteronomy; Levi; Zadok. J.R.P.

levitical cities. ***See*** Priests; Levites.

Leviticus (li-vit´i-kuhs), the third book in the Pentateuch (the first five books of the OT). It gets its name from the title of the work, *Liber Leviticus,* in the Vulgate (Latin translation), which in turn is a translation of the name given to it in the Septuagint (Greek translation). The name is descriptive, "the levitical book," that is, concerned with the Temple personnel, all of whom were assumed to be descended from Levi.

Recent studies of Leviticus have tended to focus on three areas: the date of the book, its relation to the rest of the Pentateuch, especially to a supposed extended "P" work, and the contribution of modern social anthropology for understanding the sacrificial system and the purity laws.

It has generally been held that Leviticus dates from the sixth century B.C. in its existing form. Some scholars, however, now argue that it was produced during the early monarchical period or perhaps even earlier and reflects the rituals of the First Temple, rather than the Second. Again, Leviticus has often been viewed and interpreted as part of a separate priestly documentary compilation, but increasingly the existence of this is questioned and it is claimed that "P" should rather be seen as an editorial layer in a lengthy process of tradition. Alongside, there is a growing tendency to treat Leviticus in its own right, to take the final form of the text as the starting point, rather than any possible earlier stages through which it may have passed. Anthropologists differ in their theories, which always need to be applied with caution to the biblical material, but the use of such theories by OT scholars has revealed the great significance of such elements as the sacrificial system, and especially the purity laws, for Israel's own understanding of its society and the cosmos.

It would be generally agreed that Leviticus is the product of a long period of development, with numerous accretions and revisions. Not only are the sacrificial regulations of chaps. 1–7 and the Holiness Code independent entities that the final editors took over, but the whole book is made up of previously existing legal collections, which probably represent the traditions of various Israelite sanctuaries during the monarchical age; this may account for the occasional discrepancies in the descriptions of ritual arrangements that occur in the work. Much of the material in these collections is very old, sometimes going back to Israel's earliest days, and cultic regulations and practices no doubt remained in force from age to age, so that observances of the First Temple could well have continued basically unchanged in the Second. On the other hand, the cultic regulations of Leviticus may not always mirror precisely what was done in any actual sanctuary. The priestly authors envisaged an ideal pattern of worship and society, which they ascribed to Moses, that did not always correspond to reality. Thus it is very doubtful whether the Jubilee Year, unlike the Sabbath Year, was ever observed in practice.

Taken together, these considerations suggest that it is possible to give full weight to the ancient background of Leviticus while still placing the composition of the present form of the work in the postexilic period. The final editors seem to have imposed a clear structure on the materials they used. Chaps. 1–7 precede the account of the priestly consecrations of chaps. 8–10 because they provide the ritual directions for the sacrifices offered on that occasion. The distinctive mark of the worshiping community thus constituted was its "holiness," that is, its being set apart from all other nations to belong solely to God. Hence there follows in chaps. 11–15 a set of laws to maintain the nation's purity, culminating in the description in chap. 16 of the Day of Atonement, which removed every trace of uncleanness. Finally, the remaining chapters consist largely of the Holiness Code, so called because of the repeated refrain, "You shall be holy; for I the LORD your God am holy" (19:2), in which what being the holy nation involves is spelled out for ordinary life.

The section consisting of blessings and curses (Lev. 26), which really concludes the whole, reaches a climax with a threat of national exile if the people are disobedient (26:36–39). Series of blessings and curses are often appended to ancient Near Eastern law codes and treaties and sometimes include a threat of national captivity, but in Leviticus this is accompanied by an expression of hope for the people's repentance and return (26:40–45). It seems likely, then, that Leviticus may represent a response to the destructions of the kingdoms of Israel (721 B.C.) and Judah (586 B.C.) and the subsequent Exile and that it aims to provide a program for the reconstruction of the restored community that its authors hoped to see. This program is carried out in various ways.

First, the priestly writers collected and preserved the fundamental laws that were the basis of the community's life but were in danger of being lost because of the disruptions caused by foreign invasions. All law was now pictured as the direct commandment of God given for all time at Sinai at the very beginning of Israel's existence as a nation (27:34).

Second, the priestly writers explain to the people the reasons for the tragedy that had befallen them. Here they adopted and developed the teaching of the great pre-exilic prophets, which had largely gone unheeded. The disaster had been sent as a just punishment for Israel's constant disobedience to the terms of the Sinai covenant (26:44–45). The priestly school presented this message by setting out the covenant laws, to bring home the number of ways the Israelites had failed to observe them.

Third, the priestly writers aimed to ensure that the laws were faithfully kept for the future as the only guarantee of national and religious survival (26:3–13). Such reiterated teaching and exhortation to bring this about is a marked feature of Leviticus: the Holiness Code in particular has the form of an extended sermon on this theme. Further, ancient regulations were reinterpreted as the basis of a community under priestly direction: the Sabbath (23:3), the Sabbath and Jubilee years (25:1–22), and the purity laws (chaps. 11–15) became the distinctive marks of the nation. Above all, a new interpretation was given to the whole sacrificial system and the one sanctuary where it is carried out. The purpose of all sacrifices was now to make atonement, to nullify the disastrous effects of sin on the individual, community, and sanctuary. Thus there is a much greater emphasis than before on the sacrifices that primarily achieve this, the sin offering and the guilt offering (4:1–6:7), and on the great Day of Atonement (chap. 16).

The levitical code regulated national life until the destruction of the Temple and the cessation of actual sacrifices (A.D. 70). But its view of sacrifice, sin, and guilt lived on as the mold in which the NT (where Leviticus is cited over one hundred times) understands, especially in the Letter to the Hebrews, the death of Christ as the one, all-sufficient, atoning offering for sin. In later Judaism, attention focused primarily on the laws of cleanliness and uncleanliness, which were much developed in rabbinic literature, both as the key to the life of purity and the means of self-identification for a people who had lost both land and Temple. ***See also*** Pentateuch; Purity.

OUTLINE OF CONTENTS

Leviticus

- I. Sacrifices (1:1–7:38)
  - A. Whole burnt offering (1:1–17)
  - B. Cereal offering (2:1–16)
  - C. Peace offering (3:1–17)
  - D. Sin offering (4:1–5:13)
  - E. Guilt offering (5:14–6:7)
  - F. Priests' sacrificial dues (6:8–7:38)
- II. Consecration of Aaron and his sons (8:1–10:20)
- III. Laws of purity and pollution (11:1–16:34)
  - A. Clean and unclean animals (11:1–47)
  - B. Childbirth (12:1–8)
  - C. Skin diseases (13:1–14:57)
  - D. Genital discharges (15:1–33)
  - E. Day of atonement (16:1–34)
- IV. Holiness code (17:1–26:46)
  - A. Teaching on blood (17:1–16)
  - B. Sexual relations (18:1–30)
  - C. Miscellaneous holiness laws (19:1–22:33)
  - D. Festivals (23:1–44)
  - E. Ritual objects and blasphemy (24:1–23)
  - F. Sabbath and jubilee years (25:1–55)
  - G. Blessings and curses (26:1–46)
  - H. Appendix on vows and tithes (27:1–34)

liberation theology, hermeneutics of. The theology of liberation, a movement that originated in Latin America in the 1960s, predominantly but not exclusively in Roman Catholic contexts, defines itself as reflection arising from the "praxis" (activity, practice) of the People of God in the process of liberation. Hermeneutics, in this context, reflects on the reading(s) of the Bible that arise(s) from and that help(s) to shape the liberating practice of the people, in particular in the life of the Basic Ecclesial Communities of Latin America (Basic Ecclesial Communities are closely knit groups, mostly of urban poor and rural laypersons, centered on communal worship, Bible study, and a commitment to actualizing the Christian gospel in their common life). Liberation theology is not confined to Latin America, however, and related hermeneutical stances are active in the life of

Asian and African churches as well as influential in "First-World" Hispano/Latino, black, womanist, and *mujerista* theologies ("womanist" and "*mujerista*" are, respectively, the self-designations of feminists who base their work on their experience of oppression as African American and as Hispanic/Latina women).

Critique of Traditional Hermeneutics: Traditional theories of biblical interpretation, both ecclesiastical and academic, are criticized by liberation theologians as often having led either to a "spiritualizing" exegesis that yields interiorized and privatized readings of the Bible or to antiquarian readings in which the Bible is seen exclusively as a literary artifact of the ancient past. Such readings, characterized by liberation theology as politically ineffectual or even reactionary, are not regarded as fortuitous but rather are seen as the inevitable, albeit often unreflectively arrived at, intellectual product of the participation of ecclesiastics and academics in the structures of oppression. Liberation hermeneutics does make use of the results of historical-critical scholarship and of social-scientific approaches in order to establish the history and to understand the social reality of the production of the texts. Nevertheless, its characteristic method always proceeds from the interpreter's present reality to the text and back from the text to the interpreter's reality, in the proverbial "hermeneutic circle." The interpreter's situation in a liberating or in an oppressive praxis will inevitably affect the process and the outcome of interpretation.

Preferential Option for the Poor: Basic to liberation hermeneutics is a reading of the Bible as a revelation of a God who acts preferentially on the side of the poor. The poor are not to be defined only as a class of economically and politically marginalized people but also as persons who suffer oppression because of race, ethnicity, or gender, all of which are crucial defining factors of contemporary social reality. Narratives of God's liberating activity on behalf of the poor in the biblical texts—the Exodus and Jesus' preaching of the kingdom of God are central instances—yield readings determinative of the praxis of today's poor and of those who stand in solidarity with them. In turn, this praxis, as it proceeds, generates an expansion of the meaning of the biblical text, a meaning that therefore can never be seen as "closed."

Old Testament Emphases: For liberation hermeneutics, the Exodus complex of narratives provides the central paradigm of the OT. From its rich textual lode (J. S. Croatto calls it a "reservoir of meaning") interpreters have derived readings that illuminate the conditions of oppression of the Hebrew poor before their "conscientization" (alienation, incapacity to hope, internalized oppression), the political dimensions of their oppression (exploitation of an ethnic minority by the Egyptian state, genocidal policies), and the interplay of the word (cry) of the oppressed, the word of the oppressor, and the word of the liberator. These readings both reflect and illuminate the actual situation of the readers, at the same time that their growing understanding of their praxis makes possible new readings of the biblical text. The socio-political nature of the liberating event is a central assumption in the readings, which support a historical conception of liberation working against spiritualizing or suprahistorical readings of the meaning of the Exodus. Other parts of the OT, notably the promises to David, the prophetic literature, and Psalms, are also read from the hopeful stance of the oppressed poor in their quest for justice and in the light of their perception of a God who takes an active part in their struggle for liberation.

New Testament Emphases: Jesus of Nazareth is the paradigmatic liberator, and his mission can be defined simply as the liberation of the poor. The dominance of Roman imperial power and the preeminence of religious elites supported by that power as oppressive factors are central to Jesus' sociological context. His announcement of the reign of God is to be seen as a call for the transformation of the system by a radical project of redemption of all relationships and structures, a project that gives evidence of its power and attainability in the healings, exorcisms, and miraculous feedings reported in the Gospels, as well as in Jesus' claims to authority with respect to the law and the Temple. The praxis of Jesus defines the praxis of the community of faith, which seeks to carry on his project of liberation in its own historical situation. Particularly for the Basic Ecclesial Communities that experience a social reality of marginalization and repression, it has been easy to identify with the situation of the church in Acts or in the Letters of Paul, as well as to read Revelation as a source of special support in their endeavor to bring about change in their oppressive situation through a praxis of solidarity and of service toward the poor. ***See also*** African Americans and the Bible; Bible; Biblical Criticism; Feminist Hermeneutics; Hermeneutics.

libertines. ***See*** Freedman.

liberty, the theme of the story of the Exodus, God's liberation of the people of Israel out of Egyptian bondage; it is a central feature of the OT and a dominant biblical theme. During the Exile the language of political liberation (deliver, redeem, bring out, lead forth) became normative for

describing God's saving purposes for Israel, especially in Deuteronomy and Deutero-Isaiah (Isa. 61:1).

Liberation from bondage also shaped the social consciousness of the people through laws insisting that Israel translate her own experience into a concern for the poor, the oppressed, the weak, and the enslaved (Deut. 15:12–18). This concern was formalized in the concept of the Sabbatical Year (Exod. 21:2–6) and later in the Jubilee Year, the "Year of Liberty" (Ezek. 46:17). Though perhaps only a theoretical ideal, every fiftieth or Jubilee Year liberty was proclaimed throughout the land (Lev. 25:10) and enslaved Jews and foreclosed property were emancipated from masters and creditors.

The concept of liberty became more individual in the psalms of lament, where God is called on to liberate the psalmist from the tyranny of oppression (Ps. 69) or sin (Ps. 51). The religious significance of liberty deepens in Ps. 119:45, where it is associated with obedience to the law, and in Deutero-Isaiah, where Israel, newly emancipated from the Exile, is commissioned to liberate those imprisoned in ignorance of the one true God (Isa. 42:6–7).

In the NT, John's Gospel often describes salvation in terms of freedom (John 8:32), but it is in the Pauline Letters that liberty becomes a central theological motif. For Paul, the human predicament is defined by bondage to sin (Rom. 6:20) and consequently by bondage to the law (Rom. 7:6) and to decay (Rom. 8:21). Though the law is holy, the person who encounters it is enslaved to sin. Human nature is so corrupt that even when the law is embraced as a means of escaping from sin and achieving salvation, the effort is doomed to fail (Rom. 7:7–20). The only result is a new, futile slavery to the law and death remains the inevitable outcome (Rom. 7:24). This cycle is broken by God's redemptive act in Christ. Through the atoning death on the cross, sin is remitted. Divine grace then replaces legal demand and the tyranny of the law is broken as well as the finality of death.

This new liberty, however, is not merely freedom *from* past masters; it is also freedom *for* new obedience to God so complete that Paul can paradoxically speak of a new bondage replacing the old, bondage to righteousness and God (Rom. 6:18–22), which has as its consequence life, not death. Elsewhere Paul uses a different metaphor, suggesting that the baptismal gift of the Holy Spirit indicates that the believer is no longer a slave, but fully a child of God, and the law can be fulfilled out of responsive love instead of enslaving necessity (Gal. 4:1–7). Thus the Spirit becomes a sign of liberty (2 Cor. 3:17). ***See also*** Cross; Exile, Exodus; Feasts, Festivals, and Fasts; Holy Spirit, The; Isaiah, The Book of; Law; Paul. J.M.B.

Libnah (lib´nuh). **1** One of the Israelite camps in the wilderness after the Israelites left Egypt (Num. 33:20, 21). Its location is unknown.

2 A city of Judah that Joshua took during his southern campaign when he besieged Lachish, Eglon, Hebron, and Debir (Josh. 10:29–39; 12:15). It was named as one of the levitical cities (Josh. 21:13; 1 Chron. 6:57). Hamutal, one of Josiah's wives and the mother of Jehoahaz (2 Kings 23:31) and Zedekiah (2 Kings 24:18; Jer. 52:1), was the daughter of Jeremiah of Libnah.

After F. J. Bliss and R. A. S. Macalister excavated the northwestern Judean site Tell es-Safi in 1899, it was identified with Libnah. There was heavy Iron Age occupation on the mound, especially 1000–587 B.C., and Libnah (Heb., "white"), Tell es-Safi (Arabic, "white mound"), and the crusader fortress Blanche Garde (French, "white citadel") could all be associated with the white cliffs in the area. But as early as 1924 the American archaeologist and biblical scholar W. F. Albright placed Libnah at modern Tell Bornat, the preferred site today. Tell Bornat is not so far north as Tell es-Safi and is closer to the towns of Judah named as being located in the same district (Josh. 15:42). Its position near the western border may have made possible a revolt against King Jehoram while he was dealing with the rebellious Edomites to the east (2 Kings 8:22; 2 Chron. 21:10). Tell Bornat lies about five miles north of the most important city in the area, Lachish, and the Assyrian king Sennacherib turned to Libnah after the siege of Lachish in 701 B.C. (2 Kings 19:8; Isa. 37:8). ***See also*** Lachish; Sennacherib. N.L.L.

Libni (lib´nī; Heb., "white"). **1** The son of Gershon (Gershom) and the grandson of Levi (Exod. 6:17; 1 Chron. 6:20); he was the ancestral head of a major subdivision of the Gershonite clan of Levites, the Libnites (Num. 3:21; 26:58). He is also called Ladan (1 Chron. 23:7–9). **2** A Levite, the son of Mahli and the grandson of Merari (1 Chron. 6:29). ***See also*** Ladan.

Libya (lib´ee-uh), the portion of the north African coast of the Mediterranean Sea just west of Egypt. Ezekiel expected its destruction (Ezek. 30:5) together with Egypt and its neighbors. Its language was heard at Pentecost (Acts 2:10). Its people participated in the invasion of Judah led by Pharaoh Shishak of Egypt (2 Chron. 2:12) against Rehoboam about 918 B.C. Similar forces were later defeated by Asa of Judah (2 Chron. 16:8). Daniel (11:43) saw Libyans serving the "king of the north" together with Egyptians and Ethiopians, and Nahum recalled their alliance with Egypt against Assyria's invasion (3:9). Frequently associated with Put, Lud, Ethiopia, and Egypt, they figured directly in the defense against the Sea Peoples mounted by Egypt and were at times a dominant influence in Egyptian politics. ***See also*** Lubim; Sea Peoples. R.S.B.

life, in the OT a term generally meaning life on this earth. It frequently refers to one's lifespan (Deut. 4:9; Jer. 52:33) and is often contrasted to death (Gen. 47:19). Death is understood as the end of life; no soul or part of a person lives on after death. Ezekiel speaks of resurrection of the nation to renewed existence on this earth (Ezek. 37), but individual life after death is mentioned only very rarely and in late writings (e.g., Dan. 12:2).

God is the living God (Jer. 10:10), who alone creates human existence on earth and brings life and death to individuals (Gen. 2:7; 1 Sam. 2:6). Life is God's basic blessing (Deut. 30:19). Sometimes life means not only survival but health and well-being (Prov. 3:13–18). In Deuteronomy and wisdom literature, life is associated with keeping the commandments of God (Deut. 30:15–20; Prov. 4:4).

In the NT, life generally means life after death, eternal life, but otherwise the NT continues OT understandings of the term. In the synoptic Gospels, eternal life is associated with living a moral life and helping those in need (Matt. 19:16–19 and parallels; 25:31–46). Receiving eternal life is not easy and may cost a great deal (Matt. 7:14; Mark 9:42–48). It is associated with following Jesus (Mark 10:28–31).

For Paul, keeping the commandments brings not life but death (Rom. 7:10). Eternal life comes through Christ; baptism into Christ's death and resurrection enables the Christian to walk in newness of life (Rom. 6:4). "I have been crucified with Christ; it is no longer I who live, but Christ who lives in me" (Gal. 2:20). Eternal life begins in the present—the Christian lives to God by the Spirit—and will continue after death (Rom. 6:13; Gal. 5:25).

"Life" occurs particularly frequently in the Gospel of John. As God is the living God, so God has granted Jesus to have life in himself (John 5:26) and to bring life to humanity (John 6:33, 51; 10:10). Jesus is "the bread of life," "the light of life," "the resurrection and the life," "the way, and the truth, and the life" (John 6:48; 8:12; 11:25; 14:6). The one believing in Jesus receives eternal life both in the present ("has passed from death to life," John 5:24) and in the future ("I will raise him up at the last day," John 6:40). ***See also*** Death; Eternal Life; Immortality; Resurrection. J.D.

Life, Book of, a roster of names kept in heaven of those who will survive the manifestation of God's wrath (Mal. 3:16–4:3). In the book of Revelation (21:27), only those whose names are in the Book of Life will enter the new Jerusalem.

light, in most religions and cultures a symbol of God, godliness, or supernatural illumination. The Bible is no exception. God is described as covering himself with light as with a garment (Ps. 104:2). His countenance is light (Ps. 4:6), and even the darkness is not night to him (Ps. 139:12). In the beginning, God says, "Let there be light" (Gen. 1:3); there was light, and the creation narrative is underway. At the end of Revelation, the Lord God is said to be the light of his servants (Rev. 22:5).

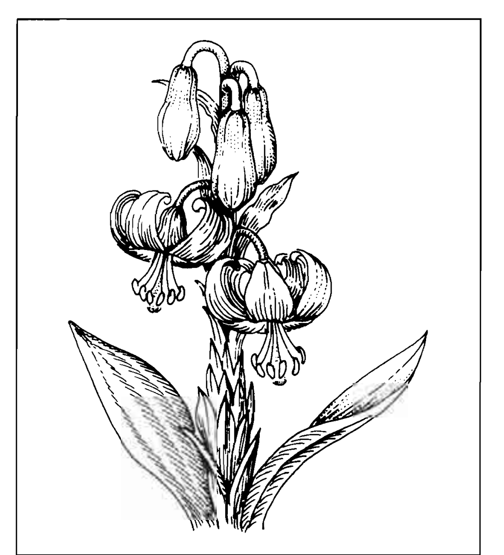
Inasmuch as walking is used as a metaphor for life (Pss. 1:1; 15:2; 23:3–4; Prov. 4:11–14), God is fittingly implored to provide light (Ps. 43:3). "I will turn the darkness before them into light," says the Lord (Isa. 42:16). It follows that the law of God, his word, is described as "a lamp to my feet and a light to my path" (Ps. 119:105). The longed-for "day of the Lord" is expected to be light (Zech. 14:7); thus, the prophet Amos can astound his hearers by announcing it will instead be darkness (5:18, 20).

In the literature of postbiblical Judaism (after mid-second century B.C.), the imagery of light and darkness continues along the same lines. In the Qumran Scrolls, the opposition between them is quite sharp and fits a general pattern known as dualism. Such dualism appears in the antithesis between light and darkness in the NT, especially the Johannine literature (e.g., 1 John 1:5–7).

The NT use of "light" is both literal (Matt. 17:2) and symbolic (Matt. 4:16, quoting Isa. 9:2), and against the OT and Jewish background becomes clearly intelligible. In view of the Christian message, the light imagery understandably centers about Jesus. Paul speaks of "the light of the gospel of the glory of Christ" (2 Cor. 4:4) and refers to the language of the Genesis creation narrative (4:6). Believers can be described as enlightened (Heb. 6:4; 10:32). Moreover, disciples are called "the light of the world" (Matt. 5:14). Ultimately, the basis for such statements is the belief that Christ is the light of the world (John 8:12; cf. 1:4–5, 9), for he is the emissary of God, who is light (1 John 1:5) and who calls people "out of darkness into his marvelous light" (1 Pet. 2:9). D.M.S.

lightning, an electrical discharge triggered by a build-up of static electricity. This frightening natural phenomenon, always identified in ancient mythology with divine power and wrath, is also associated solely with God in the OT. It is routinely associated with theophany (the appearance of God) in such events as the revelation at Mt. Sinai (Exod. 19:16; 20:18), and in Ezekiel's inaugural vision (Ezek. 1:13–14; cf. Dan. 10:6). Lightning is a mark of God's wisdom as the creator and the giver of life (Pss. 77:18; 97:4; Jer. 10:13; 51:16; Job 28:26; 37:3; 38:25, 35). In poetic descriptions of God as the Divine Warrior, lightning is presented as one of the weapons God uses

against both earthly foes (2 Sam. 22:15; cf. Neh. 2:4) and the powers of chaos itself (cf. Pss. 18:14; 77:18; 144:6; also Zech. 9:14 for a setting in the future).



Lightning as a feature of the end of the age is almost the only use made of the imagery in the NT (see Matt. 24:27; Luke 17:24; and esp. Rev. 4:5; 8:5; 11:19; 16:18), although the association with theophany is also reutilized (Matt. 28:3). Once it refers to power other than that of God. When the disciples joyously recount their discovery that they possessed power to exorcise demons in Jesus' name, Jesus cryptically remarks, "I saw Satan fall like lightning from heaven" (Luke 10:18; hints of the same tradition can be seen in its metaphorical application to the king of Babylon in Isa. 14:12–15; and in Rev. 12:7–9). W.S.T.

Lights, Feast of. *See* Dedication, Feast of.

lign aloes (lin al′ohs; Lat., "wood of aloes"; KJV; RSV: "aloes," in Num. 24:6), an archaic term designating the wood of any of a family of plants *Liliaceae,* genus *Aloe* or *Furcraea.*

lily, a flower such as the hyacinth or tulip that grows from a bulb (true lily). Similar groups include the iris, crocus, and narcissus. The reference to "lilies of the field" in Matt. 6:28–30 and Luke 12:27–28 implies an impressive showing of blossoms and variety of colors and therefore may be identified as the common crown anemone or windflower (*Anemone coronaria*). This poppylike flower, which is not a true lily, blooms brightly and profusely in the spring throughout the hilly country of the Holy Land. The lilies mentioned in the Song of Sol. 2:1–2 and 5:13 are referred to as symbols of beauty. The "lily of the valleys" of Song of Sol. 2:1–2 is not our common lily-of-the-valley, but most likely the sweet-smelling blue hyacinth (*Hyacinth orientalis*) common in fields and rocky places. The lilies gathered in the gardens (Song of Sol. 6:2) may be true lilies such as the distinctive white Madonna lily (*Lilium candidum*) and the scarlet Martagon lily (*Lilium chalcedonicum*), both of which are native to the Holy Land. The white Madonna lily is often traditionally depicted in representations of the annunciation as a symbol of the purity of the Virgin. The lilies that form the decorative floral motif of Solomon's Temple (1 Kings 7:19, 26) are probably water lilies or the lotus (genus *Nymphaea*). This flower is commonly represented in Egyptian architecture as well. ***See also*** Flowers. P.L.C.

Martagon lily.

limestone, sedimentary rock formed from large concentrations of marine shell life, hence composed largely of calcium carbonate or magnesium carbonate. It is the dominant rock in the central hills of Palestine and in the heights of Transjordan. When treated with heat and water, the resulting slaked (hydrated) lime could be used for plaster, providing a smooth base for decoration. In its natural state, limestone was the primary construction material for stone walls, foundations, door sockets, lintels, and even decorative work such as stelae, friezes, bas-reliefs, and statuary in Palestine. Only basalt was in sufficient supply in some sectors to rival limestone's popularity. Most of the frequent biblical references to stone are thus to limestone (e.g., 1 Kings 5:5; 6:36; 2 Kings 12:12; Amos 5:11; Matt. 24:2). The Hebrews knew the treatment of heating it (Isa. 33:12) and the consequences on human bone (Amos 2:1). Decomposed limestone comprises the bulk of Palestine's soil. It was the matrix of modest iron and copper deposits on both sides of the Arabah. R.S.B.

linen, a fabric woven from flax yarn. Flax appears to have been the first vegetable fiber cultivated by early agriculturalists. Flax was also cultivated for its seeds, called linseeds, which contain oil and protein. As archaeologists today routinely collect paleobotanical samples, the origins and development of agriculture are slowly being pieced together. It is well known from Neolithic sites (ca. 8000–4500 B.C.), such as Jericho, that cereal production was coeval with a surge toward settled life. Domesticated flax seeds begin to make their appearance in archaeological contexts as early as the sixth millennium B.C. in Mesopotamia, a correlate apparently of the introduction of irrigation technology.

In the biblical lands, linseeds have been recorded as early as the Pre-pottery Neolithic period (eighth millennium B.C.) at the oasis site

A monolith lintel from the synagogue at Horvat Shema', ca. A.D. 284–306, bearing a *menorah* relief almost a meter wide, the largest such depiction from an ancient synagogue.

of Jericho and from Early Bronze Age (ca. 3000–2000 B.C.) sites such as Arad, Bab edh-Dhra, Numeira, and Jericho. Of exceptional interest and significance are the remains of linen cloth recovered at Bab edh-Dhra, for they are the earliest dated occurrence of flax fiber in the Syro-Palestinian region (ca. 3100 B.C.), and they reflect a local industry and a commodity that could have been a trade item even at this early period. The cloth was of a simple weave, consisting of single warps and wefts, clear evidence of loom weaving technology.

Later biblical tradition documents the cultivation of flax and the production of linen cloth (Josh. 2:6; Judg. 15:14; Prov. 31:13; Isa. 15:9). Also, the tenth-century B.C. Gezer Calendar mentions "the month of the harvest of flax." Lamp wicks were made of flax (Isa. 42:3; Matt. 12:20). It is Palestinian linen in which the Dead Sea Scrolls were wrapped.

The coolness, luster, and strength of linen made it a luxury item (Isa. 3:23), graphically illustrated by Samson's wager of thirty linen garments (Judg. 14:12–13). The long fiber of Egyptian flax lent itself to the weaver's art. Egyptian linen was considered to be the finest and most desirable; the words "fine linen" usually referred to Egyptian cloth. Pharaoh dressed Joseph in garments of "fine linen" (Gen. 41:42); Ezekiel describes the sail of a ship of Tyre as made "of fine embroidered linen from Egypt" (Ezek. 27:7); Lazarus wore "fine linen" and royal purple (Luke 16:19); and the harlot possessed as bed coverings "colored spreads of Egyptian linen" (Prov. 7:16). Extant pieces of linen from royal Egyptian burials testify to its superior quality.

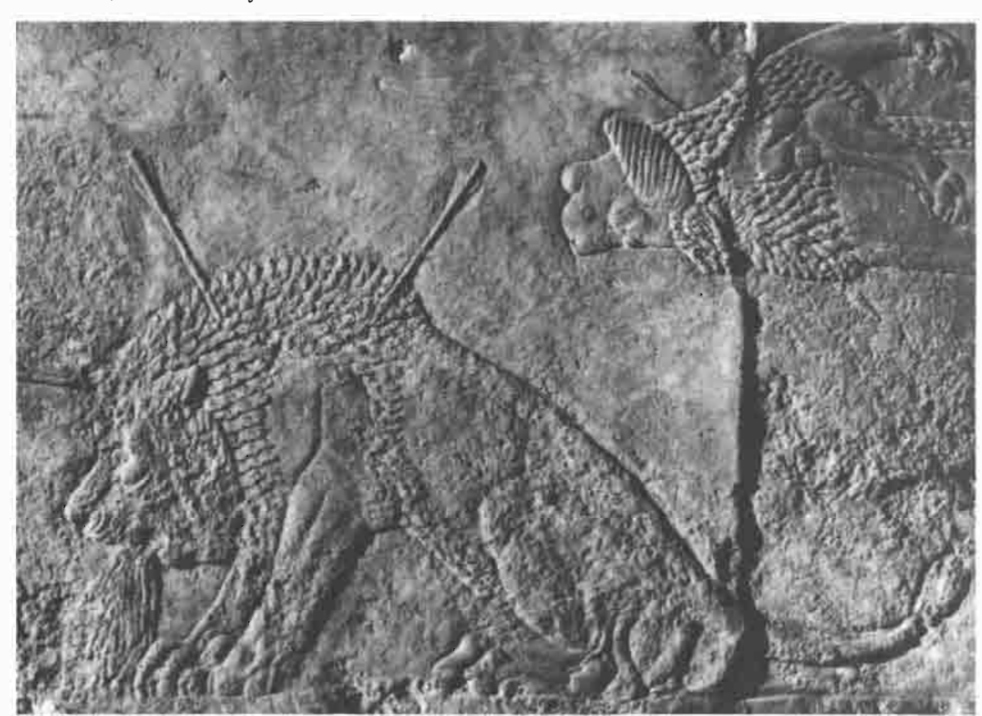
Flax is a plant requiring a great amount of moisture and thus is best suited to areas with fertile silty clays as in Egypt, where it grew abundantly. Elsewhere in dryer climates irrigation was necessary for cultivation. The fine linen of Egypt was produced by soaking or steeping the flax in water to loosen the fibers of the woody stem, a process called retting; compare Rahab's method of spreading flax on the roof to be moistened by the dew (Josh. 2:6), a method rendering rough, coarse fibers. Once cleaned, the stems were beaten and combed into strands, a process called hackling, then sent to the spinner.

Fine linen was a symbol of purity so it was particularly fitting for Egyptian, Greek, and Jewish priests. Thus it is again fine Egyptian linen that is called for by the Lord in his instructions to Moses concerning the construction of the tabernacle and the proper priestly vestments. Of fine linen were: the tabernacle curtains (Exod. 26:1); the veil (Exod. 26:31); the screen (Exod. 26:36); the court hangings (Exod. 27:9); the priestly garments: the ephod (Exod. 28:6), the girdle (Exod. 28:8), the breastpiece of judgment (Exod. 28:15), the coat and turban (Exod. 28:39), and the breeches (Exod. 28:42). One of the ordinances of God regarding cloth was a prohibition: "nor shall there come upon you a garment of cloth made of two kinds of stuff" (e.g., linen and wool, Lev. 19:19; Deut. 22:11; Ezek. 44:17–18).

From excavations of royal tombs in Egypt, we know that linen was used to wrap mummies in bandages sometimes hundreds of yards long. This practice very likely influenced Jewish burial traditions (John 19:39); the body of Jesus was wrapped in a "linen shroud" (Matt. 27:59; Mark 15:46; Luke 23:53). S.L.R.

lintel, any solid beam, whether wood or stone, set horizontally over a doorway. Anchored on both ends, it supports the construction above

the doorway and prevents its collapse into the doorway's open space. Biblical usage prescribed that blood be placed on both doorposts and the lintel as part of the Passover ritual (Exod. 12:7, 22–23). The obscure Hebrew in 1 Kings 6:31 may describe a lintel shaped like an inverted "V" over the door of the inner sanctuary of Solomon's Temple. Archaeological evidence of lintels of stone, sometimes elaborately decorated, is extensive, while the more readily degenerated wooden beams used as lintels are found less frequently. R.S.B.



Linus (lī´nuhs), according to Irenaeus, successor to Peter and Paul as first bishop of Rome. Fanciful traditions relate Linus to Eubulus, Pudens, and Claudia, who, with Linus, send greetings to Timothy in 2 Tim. 4:21. ***See also*** Claudia; Eubulus; Pudens.

lion, a large predatory feline. The lion (Heb. *ari;* Gk. *leōn*) is frequently depicted in the Bible, often as a symbol of danger, but also one of strength. Today lions are more or less restricted to Africa, but an Asian subspecies, *Panthera leo persica,* once inhabited Asia Minor, Syria, Palestine, Mesopotamia, and Iran. The Asian lion is distinguishable from its African cousin by its scantier mane, thicker coat, and longer tail tassle. It became extinct in Palestine in the fourteenth century A.D., when the last specimen was killed near Megiddo, but in Syria and Mesopotamia, the marshes of the Orontes, Euphrates, and Tigris rivers provided cover, and lions survived until the nineteenth century. The lion's preference for river thickets is mentioned in Jer. 50:44.

In antiquity lion hunting was a sport favored by nobility, as is mentioned in the Assyrian records and evidenced by the famous lion hunt relief at Ashurbanipal's palace in Nineveh. Lions were also kept in captivity. The Egyptian pharaoh Rameses II is said to have owned a pet lion and Ashurnasirpal II of Assyria even succeeded in breeding them at Nimrud. With all its popularity among the ruling classes it is not surprising that the lion is a popular motif in ancient art. Well-known examples are the lions on the Processional Way in Babylon, a street used for royal celebrations, and the lion orthostat (i.e., standing erect) from the thirteenth-century B.C. cemetery at Hazor (five miles southwest of Lake Huleh). The famous Samaria ivories dating to the ninth century B.C. include many lion representations. In Jordan stone-carved lions flank some of the Nabatean tombs in Petra and decorate the palace at Araq el Emir.

The Bible mentions numerous encounters between humans and lions, which usually end fatally for one of the parties. Benaiah (2 Sam. 23:20), David (1 Sam. 17:34–36), Samson (Judg.

A dying lion, part of Assyrian ruler Ashurbanipal's "Lion Hunt" relief from his palace at Nineveh, seventh century B.C.

14:6), and Paul (2 Tim. 4:17) manage to overcome their aggressors. In some cases, however, the lions tear their victims apart (1 Kings 13:24, 26), but Daniel (Dan. 6:16–24) escapes unharmed from the lion den. Lions also constituted a major threat to herdsmen and their stock. Amos (3:12) describes how a shepherd rescued a lamb from the mouth of a lion.

Some OT proverbs deal with the lion. In Eccles. 9:4 "a living dog is better than a dead lion" and in Judg. 14:18 Samson is asked, "What is stronger than a lion?" Prov. 26:13 tells the story of the lazy man, who does not want to go to work, because there "is a lion in the road! . . . a lion in the streets!" In the NT, the ferocity of the predatory lion makes it an apt simile for Satan (1 Pet. 5:8) and the fearsome nature of the apocalyptic beasts is due in large part to the resemblance of some of their characteristics to those of the lion: teeth (Rev. 9:8), head (9:17), mouth (13:2), and roar (10:3). I.U.K.

literary criticism. *See* Biblical Criticism.

literature, the New Testament as. At the beginning, one must distinguish between the narrative works of the NT—the four Gospels and Acts—and the remaining works, which are mostly Letters.

Narrative Works: The first three Gospels form a special group within the narrative works, not only because of considerable shared content but also because of the predominance of brief literary forms, which often seem to be loosely connected, within these works. These brief literary forms may be derived from previous oral traditions. They continued to be useful because of their rhetorical power; they enabled the early witnesses to present Jesus in ways that would make a strong impact on hearer or reader. Consideration of the pronouncement story, the parable, and the aphorism will illustrate the nature of these brief forms.

Pronouncement Stories. The pronouncement story (a form common in Greco-Roman literature) is a brief narrative scene in which the central figure (Jesus in the Gospels) responds to something observed or said with a decisive pronouncement (sometimes accompanied by an action). The scene usually ends with the pronouncement, which is often striking in its expression, and everything else leads up to the pronouncement as climax. Because of its brief setting, the pronouncement appears in a situation of dramatic interaction that highlights it. In responding to the situation, Jesus often corrects the views of others or interprets the situation in a remarkable way. The scene in Mark 2:15–17, in which Jesus responds to criticism by justifying his meals with tax collectors and sinners, is an example of a pronouncement story.

Parables. The parables of Jesus vary from brief comparisons, such as the parable of the leaven (Matt. 13:33; Luke 13:20–21), to well-developed stories of several scenes, such as the prodigal son (Luke 15:11–32). The longer parables focus on scenes of dramatic interaction and often use contrasting characters. These parables rely on the power of an extended metaphor to change the way in which people perceive and respond. Instead of looking at situations or persons directly, hearers are invited to look at them through the narrative metaphor. The metaphor is able to provoke the imagination to consider a situation from a new perspective, and this new perspective can result in new attitudes and actions.

Aphorisms. In the Gospels, Jesus also speaks in aphorisms, a succinct and pointed mode of speech that presents a perspective on life or a guide to action in a striking sentence. While these aphorisms may be related to proverbs, they tend to present extreme or even paradoxical challenges to ordinary views rather than expressing traditional wisdom. Thus, the saying about saving and losing one's life (Matt. 16:25; Mark 8:35; Luke 9:24) uses opposing terms to convey a paradoxical vision of a disciple's existence, while the command to turn the other cheek (Matt. 5:39; Luke 6:29) focuses on a very specific situation and requires a very unusual response to it. The purpose of this command is not to provide a clear general rule to regulate behavior but to awaken the imagination of hearers to possibilities of response that break out of the usual patterns of attack and counterattack.

We see, then, that the synoptic Gospels present Jesus with forceful and imaginative language. We find such language in the words attributed to Jesus. We also find it in the stories about him. Forceful and imaginative language is important in the Gospels, because the early witnesses to Jesus wanted their Master to make an impression on the imaginations of hearers and readers. The language of the Gospels is less concerned to produce an aesthetic response, a delight in creative form for its own sake, than to move hearers and readers to belief and action. It has a rhetorical purpose, and scholars who tend to distinguish literary art from rhetoric might give the Gospels an inferior rating because of this. However, a clear distinction between art and rhetoric cannot be drawn. Furthermore, the Gospels do not simply appeal to established views and prejudices in order to control behavior, the way much advertising does, but use language that appeals to the imagination in order to invite new perspectives on life that conflict with established views. Such revolutions in perspective may be produced by literary art, which has the power to awaken the imagination to view the world differently, changing the images by which we apprehend the world and thereby changing the way we act. The forceful and imaginative language of Jesus and the Gospel writers is necessary to their purpose of creating repentance

and faith, for the transformation of persons requires a restructuring of the self and its life world in which the active imagination must participate.

In the first three Gospels, the brief forms discussed thus far have a place within larger literary forms. Some of the parables and sayings are gathered into large, speechlike discourses of Jesus, with various literary patterns unifying segments of the discourse. Thus, a major section of the Sermon on the Mount is called "Antitheses" because sayings are united in a series by a repeated antithetical introduction, "You have heard that it was said . . . But I say to you . . . " (Matt. 5:21–48). Presentation of Jesus' words in rather lengthy discourses is especially characteristic of Matthew. Matthew also shows the strongest tendency to use literary patterns that show exact repetition of words and careful balance of elements. Pronouncement stories and miracle stories can also be gathered into larger formal groups. In Mark 2:1–3:6, we find a series of five pronouncement stories in which the first and second are related thematically (they concern forgiveness of sins), as are the fourth and fifth (they concern work on the Sabbath), but there is also a chiastic (or concentric) pattern, for the first and fifth stories, as well as the second and fourth, also have similarities.

The modern reader may find the synoptic Gospels strange because they are composed of brief episodes with few indications of connecting plot lines. Nevertheless, careful study reveals significant plot development within each of the Gospels. For example, in Mark 8:14–21, we find a remarkable scene in which Jesus, who is with his disciples in a boat, accuses his followers of deafness and blindness. In doing so, he refers back to two previous scenes in which multitudes of people were fed (see Mark 6:30–44; 8:1–9). Following the first of these feedings, there was another scene in which the disciples were in a boat on the lake, and this scene ended with the statement that the disciples "did not understand about the loaves, but their hearts were hardened" (Mark 6:52), an accusation that Jesus will develop later in 8:14–21. All of these scenes, and probably also the boat scene in Mark 4:35–41, are part of a developing plot line that builds up to a crisis in 8:14–21, where the failure of the disciples to understand is so vividly portrayed that it cries out for some resolution in the rest of the story.

Like other narratives, the Gospels can be studied in terms of plot, setting, characterization, the role of the narrator, etc. Such study is often called narrative criticism. Careful analysis of these factors will show that a particular narrative is the result of decisions that have been made concerning what to include in the story, when to pause for a detailed scene and when to summarize, whose perspective should be placed in the foreground, how to evaluate persons and events, how to connect material into a developing plot, etc. These decisions reflect the perspective of the implied author, i.e., the author in so far as she or he is embodied in the work. In the four Gospels, we experience Jesus from the perspective of four implied authors who have (consciously or unconsciously) made such decisions.

Narrative critics also speak of the implied reader, an image of the reader contained within the text. Frequently, the implied reader is viewed as an ideal reader—the reader who understands all of the messages being sent by the implied author—and as a compliant reader, i.e., one who will agree entirely with the perspective of the implied author. It is doubtful, however, that this view fits the texts, for frequently the Gospels seem to anticipate a resistant reader, one who will not easily understand or agree. Therefore, certain messages must be reinforced.

Reader-response criticism focuses on the relation between the text and the reader. Reading is not the passive reception of data; it is an active process of constructing meaning out of language codes. Furthermore, reading is a sequential process. As the process unfolds, readers are repeatedly trying to integrate what has just been read with what preceded it. They must revise expectations formed in earlier reading and form new expectations. They must fill in gaps in the narrative in order to arrive at an interpretation. Reader-response critics differ in the degree of control that they attribute to the text, on the one hand, and the reader, on the other. Some assume that careful reading means ceding control to the text; others insist that the reader constructs the work out of the text (the marks on the page) and has so much freedom in doing so that no two readings will be identical. The latter group would argue that texts contain sufficient indeterminacy that multiple meanings are possible at crucial points.

The recognition that the literary shaping of the work mirrors the emphases, evaluations, and assumptions of the implied author enables critics to study the ideology of literature. Ideology here has the broad sense of explicit beliefs and implicit assumptions that shape the life of a social group. Thus, biblical narratives often reflect assumptions about the ways that the two genders and the different social classes should behave. Literary analysis can sharpen the critic's awareness of the influence of these beliefs and assumptions on biblical literature. At the same time, narrative literature, with its interest in unique events, frequently focuses on the ways in which people and events escape the limits of social expectations. Thus, within biblical literature we find many reflections of patriarchal society, but also stories of women who do not conform to the expectations of such a society.

The book of Acts departs from the literary style of the synoptic Gospels in its tendency to develop longer dramatic scenes. These scenes

LITERATURE, THE NEW TESTAMENT AS

often contain carefully composed speeches that summarize central themes in light of which the events of the narrative should be understood. In general, Acts has tighter narrative continuity than the Gospels. Acts (along with Luke 1–2) also demonstrates the author's mastery of varieties of Greek style. Scenes with a Jewish setting and Jewish characters often use Greek influenced by the Semitic Greek of the Septuagint, while scenes in which cultured Greeks and Romans are being addressed use a cultured Greek appropriate to the audience.

The Gospel of John has its own literary form, which is strongly influenced by its interest in symbolism. The narration of an event is often followed by a dialogue and/or monologue by Jesus that reveals the deeper symbolic significance of the event. This development sometimes involves reflection on the significance of an elemental religious symbol, such as water or bread, relating these symbols to Jesus. Words with double meanings are used, resulting in ironic misunderstanding, which emphasizes the difference between Jesus' insight and ordinary perception. Some of the lengthy monologues seem to lose touch with the narrative settings in which they are placed. However, the narrator of John is also capable of presenting a dramatic series of events that has both narrative interest and symbolic meaning, as in the story of the blind man in John 9. The solemn and repetitious language of Jesus in John seems to emphasize the importance and the many-sided meaning of the central themes of this Gospel.

Other Works: There is renewed interest in analyzing the NT Letters in light of patterns used in Greco-Roman rhetoric for the composition of speeches and letters. It is clear that Paul is a vigorous writer with a well-developed rhetoric that he can use to speak powerfully to the problems he must address. His methods include lively dialogue as he puts objections into the mouth of an opponent (Rom. 3:1–8), appeals to authoritative writings (Gal. 3:6–13), puts together strings of balanced phrases with repetitive emphasis (1 Cor. 13:7) or strings of antitheses (1 Cor. 15:42–44), and the like. Furthermore, his versatility is apparent from his shifting style as he approaches particular congregations and particular issues.

Rhetorical criticism often appeals to ancient rhetoric to understand NT Letters. It approaches the Letters as persuasive speech that tends to follow well-established patterns. The significance of these patterns may become clearer if we can clarify the rhetorical situation to which they respond. A particular kind of situation may call for a particular kind of utterance for effective response. There may be a basic issue that must be addressed, and it may call for a particular species of discourse, e.g., judicial rhetoric when it is a case of judgment about the past and deliberative rhetoric when it concerns a decision to take some action in the future. The arrangement of the material provides clues to the rhetorical strategy being followed, and devices of style also support this strategy. Familiar themes may appear that were commonly used in connection with particular issues in the ancient world. Thus, ancient rhetoric, as taught in rhetorical handbooks and demonstrated in ancient speeches and letters, can help us understand the purpose and literary methods of a NT Letter and its possible effects on ancient readers attuned to such rhetoric. Rhetorical criticism has also been applied to sections of the Gospels and Acts.

The Letters of Paul have typical elements at the beginning and end. The Letter head, for instance, names the sender, then the recipient, and often concludes with "grace to you and peace." NT Letters by authors other than Paul often show similar elements of the letter form (e.g., 1 Peter, 2 John, 3 John, Jude), while other writings omit all such formal elements (1 John) or have them only at the beginning (James, 2 Peter) or at the end (Hebrews).

The strange symbolism of the Revelation to John comes to a large extent from a tradition of prophetic and apocalyptic imagery that this writing employs to address the churches. The complex symbolic language of Revelation suggests that events and persons, perhaps already familiar from ordinary life, have a different and deeper meaning as part of a cosmic drama. The symbolic language helps to clarify the roles of particular events and persons in this drama, partly through linking these events and persons with scriptural and apocalyptic types. This symbolic redescription of the world also involves evaluation, for it divides the world into good and evil, with appropriate emotional overtones. The symbolic visions of Revelation have been formed into literary patterns that tie these visions together in larger sequences. The series of seven that builds up to a point of climax is especially common.

The Greek used by NT authors varies greatly in sophistication and elegance. Hebrews and parts of Luke-Acts contain relatively sophisticated language with complex sentences and a rich vocabulary. Many other NT writings use relatively simple sentences. The book of Revelation departs so far from elegant Greek as to violate basic rules of Greek grammar. ***See also*** Bible; Biblical Criticism; English Bible, The; Greek, New Testament; Hermeneutics; Narrative Criticism; New Testament; Old Testament; Reader-Response Criticism.

literature, the Old Testament as. To read and study the Bible as literature means to read the Bible in the ways we read texts we regard as literature—to apply the same methods of analysis that we apply to literature in general to the Bible, too. This is not to say that the Bible need be taken *only* as literature, only that it can be seen as literature—art in language. As such, to the extent that we draw meaning from figurations of language, uses of words, style, formal organization, and other linguistic aspects of a text, an approach to the Bible as literature enhances the meaning we find in the text.

The Hebrew Bible does not define its own form, be it literary or any other. It does, however, describe certain lines or passages with respect to their genre or performance style using terms such as "judgment" (Heb. *mishpat*), "law" (*ḥok*), "song" (*shir*), "chant" (*mizmor*), "psalm" (*tehilla*), "fiction" (*mashal*), "riddle" (*ḥidda*), "figure of speech" (*melitsa*), "dissertation" (*massa*), and "elegy" (*kina*). The importance of good rhetoric, of shaping a message in an effective literary form, seems to inform the powerful, emotional appeal of Judah in Gen. 44:18–34 and other passages, and the fact that the form of a message has an aesthetic side apart from its content is acknowledged in Ezek. 33:30–33, where the Lord tells Ezekiel that his audience appreciates his verse but eschews his message. When Prov. 16:21 says that "pleasant speech increases persuasiveness," it may be celebrating the value of good rhetoric, though it may, alternatively, be referring to the efficacy of a smooth delivery.

But whether the OT actually reflects upon literary art or not, its evident control of a variety of literary forms impresses critics and other readers with its quality as literature. Indeed, since classical times authors have paid tribute to the literary art of the Hebrew Bible and have compared it favorably to other great works of literature. OT style, images, story patterns, and themes continue to serve as sources and materials for literary artists.

Historical and Literary Criticism: Broadly speaking, there are two models for studying the OT as literature, each with its own methods and purposes. The historical, or diachronic, traces the history of composition of the OT literature. It endeavors to identify the sources of the present composition, describe the process by which the present composition was made, and explain the intention behind the final arrangement. The other literary model is synchronic, dealing with the text in more or less its present form and finding its meaning in that form. For the sake of clarity, only the synchronic approach will here be considered "literary criticism."

What Makes a Text Literary: Reading the OT as literature implies at least two important claims: that the OT is, at least in part, literary; and that the experience of reading or hearing the OT is, again at least in part, aesthetic.

What it is that makes a text literary or artistic is, in general, the subject of widespread theoretical discussion and controversy. Traditionally, the literary text possesses two special properties. On the one hand, the form and style of the text do not merely shape its message but comprise an integral part of the message. Form and semantic content merge to produce meaning. To take a simple example, in 1 Sam. 3:5 we read that Samuel "ran to Eli." Later, in v. 6, we read "And Samuel arose and went to Eli." The slower movement is conveyed by considerably longer wording. The literary text "does," as it were, what it "says." Similarly, the contrast between Isaac's love of Esau and Rebekah's love for Jacob in Gen. 25:28 is underscored by the usage of different Hebrew verb forms and word order for each (a fact that is rarely reproduced in translation).

On the other hand, we find a literary text to be allusive, connoting associations beyond its immediate sense and pointing to references beyond its immediate context. The literary text proliferates meaning, signifying more than it explicitly says. For example, before the Lord commissions Moses at the burning bush to lead the Israelites out of Egypt, the text presents Moses in the act of leading a flock of sheep (Exod. 3:1). This activity not only brings Moses to the site of the next scene; the image of Moses as shepherd suggests his destiny to lead his people, as the shepherd was a widespread metaphor for a king or leader (see, e.g., Num. 27:17). Through a metaphorical association, the audience considers Moses a leader before Moses does.

Literary Criticism: The theory and practice of literary criticism have increasingly diversified and specialized, so that numerous ways have developed for reading the OT as literature. Despite widely differing procedures, literary critics tend to hold in common certain fundamental assumptions about literature and the aims of criticism. Literature is created to communicate verbally with an audience that shares a language, certain literary conventions, and certain frames of reference with the author. The author manipulates language and literary conventions in order to convey meaning. As in routine conversation the audience does not have to analyze what it hears or reads; it automatically perceives some message. The literary critic seeks to expose the various ways by which we make sense of a text.

Literary criticism of the OT takes many different forms, reflecting various modes of making sense of the text. Many critics will want first to

LITERATURE, THE OLD TESTAMENT AS

ascertain the genre of a text, holding that our presuppositions about the function and literary category of a particular text affect the way in which we read it. Whether, for example, we read Esther as farce or as history or the Song of Songs as erotic poems or as religious allegory affects our responses throughout.

Critics customarily try to define the literary conventions of a text—its patterns of organization and its poetic devices—in order to follow those conventions in interpreting a text. How we determine what the conventions of ancient OT literature were depends ultimately upon what we look for in the OT. While all critics will seek out conventions that are familiar from other literatures, some will emphasize those literary features that are, on the one hand, widespread within the OT itself and, on the other, common among other texts from the ancient Near East. (The trouble with this latter criterion is that critics typically find that, although the OT shares many genres and poetic devices with other ancient literatures, it is often more richly textured and more finely nuanced than those other literatures. Thus, one might subject the OT to a more intensive and sophisticated analysis than other ancient Near Eastern texts.)

Among the many literary conventions identified in diverse OT passages are: first, the use of traditional source material, imagery, formulations, and lines of text. It would seem that wherever possible OT authors adapted or recombined earlier materials rather than created entirely novel stories or poems. Second, there are typical genre forms, story patterns, or scene types—i.e., creating stories or poems within the framework of standard structures. Other conventions include extensive repetition, within which variations receive special attention; repetition of key words within a unit or between units; wordplay, i.e., the text's attachment of special significance to certain words by repeating their sounds or to certain names by interpreting their meaning explicitly or implicitly; the use of metaphor, simile, and personification; concentric structures, in which the focal or turning point of a unit appears in the center; and, especially in OT verse, parallelism—the formation of couplets and longer series of lines through repetitions in syntactic construction and/or semantic sense from line to line.

Close Reading: The first chapter of Jonah may serve to illustrate some of the conventions just cited. The book opens with a traditional formula, leading us to expect the delivery of an oracle: "Now the word of the Lord came to Jonah the son of Amittai, saying . . . " (v. 1). The oracle, however—"Arise, go to Nineveh . . . "—is addressed to Jonah alone (v. 2). We expected a book of prophecies, but instead we get a story: "But Jonah rose to flee to Tarshish . . . " (v. 3). The description of the prophet's response, "But Jonah rose . . . ," repeats the first verb of the Lord's command—"Arise." We are set, at this point, to find the prophet fulfilling his mission, but the next word, "to flee," deviates both in form and sense from the command. The destination, "to Tarshish," exacerbates Jonah's deviation, for wherever Tarshish is, it is west and overseas, whereas Nineveh is northeast and overland.

The name the prophet bears is ironic. "Jonah," which means "dove," the symbol of peace, here designates a mean-spirited harbinger of doom, and his patronymic, "son of Amittai," connotes "son of the faithful one" —hardly apt for this rebellious prophet.

Jonah's withdrawal from his mission is delineated as a series of descents through the repetition of a key word: "He *went down* to Joppa" (v. 3), "he *went down* into the ship" (v. 3), "he *went down* into the hold of the ship" (v. 5), and "he went into a deep sleep" (v. 5). The fourth verb (*wayeradam*) derives from a different stem but sounds like the verb "he went down" (*wayered*). The wordplay suggests that Jonah's sleep is the ultimate phase in his withdrawal.

A "close" literary reading of a text capitalizes on the sorts of observations we have just made. It reads the text at close range and follows shades of meaning in words and phrases and subtleties of word order, too, in interpreting a text. A useful procedure in such a reading is continually to ask: What difference would it have made had the text said something other than what it says? By thereby creating a "countertext" one perceives the sense of the present text more finely. If, for example, the text had only said "Jonah fled" and had not repeated the verb "he rose" (1:2), we would not experience the same surprise. If the narrative in Jonah 1 had described the ship, the sea, the activities of the sailors, and the storm in greater details, as we might find in the Homeric epics, we would be more impressed with the conflict of people against nature than with the opposition of human will and thinking to God's. In a close reading we draw significance out of what the text says and doesn't say and the way it says what it does say.

Comparative Criticism: Just as in close reading one contrasts what the text says with what it might have said, one may also contrast what one text says with what another text says. One may better appreciate and understand what is special about one text by comparing it with others. Ps. 1:3–4 and Jer. 17:5–6, for example, each compare the righteous man to a well-watered tree; yet they imagine the wicked differently. In the psalm, the wicked are pictured as chaff that is swept away in the wind; in Jeremiah, the wicked are depicted, preceding the image of the righteous, as a shrub in a parched desert. Observing this contrast leads to interpreting the nature of righteousness differently in the two passages. One may further compare different stories that relate to a common theme or subject, such as the story of the binding of Isaac in Genesis 22 and the story of Jephthah and his

LITERATURE, THE OLD TESTAMENT AS

daughter in Judges 11, or the story of Hagar's flight from Sarah in Genesis 16 and that of the expulsion of Hagar by Abraham in Genesis 21. Because the narratives hold several elements in common, observing their differences throws the distinctive qualities of each into relief.

Since it is the goal of comparative literature to learn about individual texts by contrasting them with one another, as well as to learn about the phenomenon of literature in general by sampling a wide variety of texts, one may compare texts within the OT literature to texts from diverse places and periods. One may, for example, discern distinctive ideas of OT and Mesopotamian civilization by contrasting the Flood story in Genesis 6–9 with the account in the Epic of Gilgamesh, tablet 11. Or one may appreciate the nature of the OT's poetry and storytelling art by comparing its style, sensibilities, and themes with those of other literatures. A justly famous comparison of an OT narrative (Gen. 22) with a Homeric episode (*Odyssey*, book 19), for example, has shown that biblical narrative tends to relate the action taking place in center stage, so to speak, to the general exclusion of visual description and background as it narrates, while the Homeric epic tends to place in the foreground both description and background as it narrates. It has been widely remarked, too, that whereas epic literatures narrate in poetic form, OT poetry rarely narrates, and never at length.

On the other hand, by applying what we have learned from diverse literatures about literary art in general to the OT, we may better analyze the conventions of OT literature. Without in any way assuming that the OT's poetic and narrative devices are the same as those of another literature, we may investigate the particular ways that OT literature achieves what other literatures do, such as narration, characterization, formal organization, imagery, coherence, point of view, allusion, and thematic development. The study of literature should sensitize one to be a more perceptive reader of the Bible.

Similarly, although the literary genres and categories of other literatures may not find precise equivalents in the OT, one's awareness of the characteristics of various genres and categories may lend one a helpful perspective on an OT text. Comparison of the narrative of Israel's exodus from Egypt to a classical comedy or of the story of King Saul to a classical tragedy, for example, may not demonstrate the identity of the OT texts with those genres. It may, however, illuminate certain significant effects of those stories and suggest the ways by which those effects have been achieved.

Literary Theory and the OT: Comparing the OT to other literatures assumes, of course, that its text is interpretable in ways similar to the interpretation of other texts. If so, one can apply to the OT the methods of analysis that have been found to be effective when applied to literature in general. Among the various approaches or theories that critics have begun to implement in recent years in analyzing the literature of the OT are: formalism, structuralism, reception or reader-response criticism, and deconstruction.

Formalism. The analysis of folk tales, in particular, has led to the impression that each tale comprises a limited series of obligatory and optional action sequences, or "functions." Many diverse stories have been found to build around a finite set of components. Identifying similar series of "functions" in biblical narratives, such as episodes in the life of Jacob and the story of Ruth, may, on the one hand, highlight significant elements of the stories and, on the other, fix the genre and literary history of the tales.

Structuralism. Structuralism is a theory of knowledge holding that communication translates underlying abstract messages into the forms that actually occur and that what we immediately perceive are these surface occurrences; our minds automatically decode surface appearances into "deep-level" messages. The phenomenon we perceive, be it an image, a sound sequence such as a musical work, or a linguistic discourse such as a conversation or a written text, is taken as a system of interdependent components. The message is primarily encoded within the various components' relations with one another. A structuralist will accordingly look for patterns and relationships, especially ones that recur, rather than single actions or utterances, in interpreting a text. Traditionally, structuralists have tended to seek relationships in which two polar opposite concepts are set into conflict and are mediated by some crucial factor. The mediation may resolve the opposition or hold it in tension.

For example, in Psalm 19 the opposition between the awesome God of a seemingly perfect natural order and the routine imperfection of God's human creature is mediated through language—God's *torah* ("teaching") and human reflection and confession. Or, in the narrative of Ruth, the opposition of potential fertility and actual barrenness of both the land of Judah and the family of Naomi is resolved through the parallel kindness of God toward the land and of Ruth and Boaz toward Naomi.

Reception or Reader-response Criticism. Reception theory holds that the meaning of a text does not inhere in the internal structure of the text itself but rather in the effects the text has on its various readers. A reader's responses to the text constitute the meaning of the text for that particular reader. In the course of reading (or hearing) a text, one forms a variety of impressions, senses the beginnings and ends of units, develops hypotheses about the text, tests the hypotheses and sustains or dismisses them, raises questions, resolves problems, and more. One's total experience of the text, rather than merely the conclusions one makes at the end of the experience, comprise the text's meaning.

Reception, or "affective," criticism endeavors to explain how texts produce the effects they do.

The episode concerning how Joseph got down to Egypt in Genesis 37, for example, produces confusion as to the manner in which his conveyance took place. Was he sold by his brothers, was he kidnapped from the pit, or what? The question remains unresolved, for the text provides support for either reading (contrast Gen. 39:1 and 45:4, from which one may gather Joseph was sold to the Ishmaelites, with Gen. 37:36 and 40:15, from which one may infer he was kidnapped by Midianites). The ambiguity surrounding the physical conveyance, it has been suggested, contrasts with the unequivocal explanation by Joseph himself concerning how he came to Egypt: the Lord sent him (Gen. 45:5, 7–8). Remaining confused about the physical course of events, the reader is receptive to the unequivocal theological explanation.

Deconstruction. Deconstruction is a philosophy that has barely begun to make an impact on the literary study of the OT. It maintains that the text can only be perceived by a reader who brings an array of personal associations and interpretive strategies to the act of reading. Consequently, every reading of a text creates, so to speak, a new text, and no text can exist except in a one-time, more or less idiosyncratic version. Because each re-creation of the text is different, the act of deciding the meaning of the text must continually be held in abeyance or deferred. To fix a reading of a text would be to falsify the text's nature as open and indeterminate.

The best case for deconstruction is made by texts such as the episode of David and Bathsheba in 2 Samuel 11, which have been contrarily interpreted. The question of whether Uriah the Hittite knew that David had slept with his wife Bathsheba remains moot and undecidable because one can construe the text either way. Uriah may have refused to visit his wife (v. 11) because he suspected the adultery or because he was an extraordinarily conscientious soldier.

Conclusion: While the historian reads the OT in order to reconstruct from it part of the world of ancient Israel, the literary critic or reader understands that the text conceives its own world. Literary approaches to the OT seek to perceive that world ever more finely and to explain how it is created. ***See also*** Biblical Criticism; Hermeneutics.

lizard, a four-footed reptile. Lev. 11:30 lists six types of lizards or reptiles as unclean animals: the great lizard, the gecko, the land crocodile, the lizard, the sand lizard, and the chameleon. The great lizard is probably the Negev dabb lizard (*Uromastyx*). There are a number of varieties of the gecko lizard. The term "land crocodile" seems to apply to the large carnivorous desert monitor or varan, and "lizard" could relate to the numerous lacertids ("European lizards"). The sand lizard may correspond to the burrowing skink, and the translation of the Hebrew *tinshemeth* as "chameleon" is disputable, although chameleons are quite common throughout the Holy Land.

loan, something lent or furnished on condition of being returned. Biblical legislation concerning the lending of fungibles must be understood against the background of a noncommercial agricultural society with strong tribal roots. The primary motivation of borrowers was to obtain relief from need rather than to further their economic enterprises. Furthermore, the poor and needy were deemed fellow kin of all Israelites (Deut. 15:11). Hence, biblical law considers the lending of fungibles to be a philanthropic act and thus restricts severely the rights of the lender or creditor.

Interest: According to the Mesopotamian law codes and private contracts to which OT law may be compared, Mesopotamian creditors commonly charged an annual interest rate of 20 percent for loans of silver and 33-1/3 percent for loans of grain. Biblical law, however, prohibits creditors from exercising this right over their needy brethren (Exod. 22:24; Lev. 25:35–37; Deut. 23:20), although it does allow the taking of interest from non-Israelites (Deut. 23:21). The nonlegal biblical references depicting the difficult plight of debtors in ancient Israel (e.g., 1 Sam. 22:2; Jer. 15:10) would seem to attest to the violation of this prohibition. Ezekiel brands creditors who take interest as wicked, while praising those who refrain as pious (Ezek. 18:8, 13, 17; 22:12; cf. Ps. 15:5). The wisdom literature further cautions that wealth augmented by interest is fleeting (Prov. 28:8). According to the NT, as inferred from the parable of the talents, it is proper to invest one's money with bankers for the sake of receiving interest (Luke 19:23; Matt. 25:27).

The two terms for "interest" in biblical Hebrew are *neshek* (derived from the verb "to bite") and *tarbith* (lit., "increase"), which are translated in the RSV as "interest." Scholars differ in their understanding of the two Hebrew terms. Some view the terms as a fixed pair denoting a single

concept. Others attempt to distinguish them as referring to two different types of interest: advanced interest, which is "bitten" off the principal at the onset of the loan, and accrued interest resulting in an "increase" at the time of repaying the loan.

Pledges and Surety: Ancient Near Eastern law acknowledged as means of protecting the lender against loss due to default of payment both the pledge whereby chattel, real estate, or persons were surrendered as security for a loan and the surety whereby a person assumed liability for the obligation of the borrower. Limited knowledge of ancient Near Eastern pledge law, however, does not allow for clear differentiation between pledge and mortgage found in modern law. Today a mortgage is defined as a conditional conveyance of property bestowing legal title upon the mortgagee who need not have physical possession of the property. In contrast, a pledge is a bailment of property to be in the physical possession of the pledgee who does not have legal title to the property. Thus, upon default, the mortgaged property passes wholly to the mortgagee while the pledged property must be sold and only as much of the proceeds as will satisfy the debt passes to the pledgee. Similarly, limited knowledge of ancient Near Eastern suretyship does not always allow clear definition as to whether the surety becomes a co-debtor or whether he only ensures the presence of the defaulting debtor for personal prosecution by the creditor.

Biblical law recognizes the right of lenders to take a pledge. However, the law places the following restrictions upon creditors: they may not enter the debtor's home to seize a pledge but must wait outside (Deut. 24:10–11); they may not seize what is needed for one's daily living (Deut. 24:6; cf. Job 24:3); they may not seize the garment of a widow (Deut. 24:17); and the pledged garment of the poor must be returned by nightfall (Deut. 24:12–13; Exod. 22:25–26; cf. Amos 2:8). The nonlegal literature of the Bible attests to the seizing of members of the defaulting debtor's family and to the taking of real estate to secure and satisfy a loan (2 Kings 4:1; Isa. 50:1; Neh. 5:3–5; Matt. 18:25).

Laws governing surety do not occur in the corpus of biblical law. References to the institution, however, are found in the nonlegal literature of the Bible, especially in the wisdom literature. The book of Proverbs is replete with advice against standing surety for another (6:1; 11:15; 17:18; 22:26–27; 27:13). The references reveal that the assumption of surety was accompanied by the symbolic gesture of "giving one's hand" perhaps as a type of handshake (Prov. 6:1; 17:18; Job 17:3). Judah's assumption of surety for Benjamin (Gen. 44:32) seems to indicate that at times a surety would only ensure the physical presence of the debtor for personal prosecution by the creditor, while Prov. 22:26–27 clearly indicates that a surety often became a co-debtor. The concept of surety is used also metaphorically in prayer (Isa. 38:14; Ps. 119:122; Job 17:3; cf. Heb. 7:22).

Remission of Debt: Mesopotamian kings are known to have issued edicts designed to restore some measure of equilibrium in the economic life of the society. These edicts entailed cancellation of certain types of debts, release from certain kinds of tenant obligations, and freedom from debt servitude. Biblical law instituted a cyclical cancellation of debts by decreeing the remission of all outstanding loans in the Sabbatical (i.e., seventh) Year (Deut. 15:1–11). ***See also*** Law; Ownership. loaves. ***See*** Baker; Bread; Miracles.

locks. **1** Devices on doors (Song of Sol. 5:5; Neh. 3:3, 13–15; see also Judg. 3:23–24). **2** Strands of hair, mentioned with regard to Nazirites (Num. 6:5), Samson (Judg. 16:13, 19), and levitical priests (Ezek. 44:20), all of whom were not to have their hair cut (see also Ezek. 8:3; Song of Sol. 5:2, 11).

locust, a small insect resembling a cricket or grasshopper that seasonally migrates in great swarms, causing damage to all vegetation in its path. This insect is therefore a serious pest, especially to crops, and as a major pest of the Bible it was associated with the canker worm, palmer worm, and caterpillar (Joel 1:4; 2:25). The migrating swarms of locusts were one of the "plagues" of the OT (Exod. 10:12–20) imposed by the Lord on the people of Egypt as punishment for the enslavement of the Israelites. This form of punishment was not reserved for foreigners alone, but was also extended to the Israelites as a curse for disobedience to the commandments and statutes of the Lord (Deut. 28:42).

Locust may also refer to the carob (*Ceratonia siliqua*), a common tree in the Holy Land that bears large edible beanlike pods. It is perhaps mistakenly identified as the food that provided John the Baptist with sustenance in the wilderness (Matt. 3:4; Mark 1:6). However, since the passage in Lev. 11:22 that sets out dietary guidelines refers to locusts in the same context as beetles and grasshoppers, these insects are the more likely candidates for items of diet indicated in the NT. Locusts are a cheap, though time-costly, form of protein that may be heavily exploited during a swarming event. They are even consumed by the natives of the Holy Land today as an emergency food. P.L.C.

Lod (lod). ***See*** Lydda.

Lo-debar (loh-dee'buhr), a city in Gilead, east of the Jordan, where Jonathan's son Mephibosheth lived after his father's death (2 Sam. 9:4–5). Machir of Lo-debar gave aid to David during his flight from Absalom (2 Sam. 17:27).

If one reads *lo debar* in Josh. 13:26 instead of *lodebir* in the Masoretic Text (as does the NEB; RSV: "Debir"), then the city was assigned to the tribe of Gad and probably was located near the northern edge of Gilead (see also Amos 6:13).

log. 1 the smallest Hebrew measure of capacity, about two-thirds of a pint. **2** A piece of wood, usually the trunk portion of a tree (cf. Matt. 7:3). ***See also*** Weights and Measures.

logos (loh´gohs), the Greek term usually translated "word" (especially word of God) when it occurs in the NT. *Logos* has a wide range of meaning, e.g., reckoning or accounting, explanation or reason, statement or discourse. In English, it frequently appears in the names of scientific or other disciplines, e.g., bio*logy,* psycho*logy,* theo*logy.*

Originally employed as a technical philosophical term by the Greek philosopher Heraclitus (sixth century B.C.), *logos* became a particularly important concept for the Stoics (third century B.C. and later). In Stoicism, *logos* was the principle and pattern that gave the world or cosmos its character and coherence. The term was taken over by Philo, the Alexandrian philosophical theologian of Judaism, who was roughly a contemporary of the apostle Paul. By means of the *logos,* Philo sought to reconcile Greek philosophical theories about the universe (cosmology) with the biblical accounts of God's creating the world by his spoken word. God's *logos* became a clearly identifiable entity, mediating between God and the world, the mode of the divine creativity and revelation.

Already before Philo, *logos* had been used in the Greek translation of the OT (Septuagint or LXX) to render the Hebrew term (*dabar*) usually translated into English as "word"—a term frequently used of God's speaking. Just the use of this Greek term, with its rich associations, to translate the equally pregnant Hebrew word (which could mean "word," "thing," or "event") was a significant development in the growth of the biblical tradition. At the same time, in the later OT and apocryphal books, "wisdom" (Gk. *sophia*) was beginning to play a mediatorial role between God and creation not unlike that of *logos* in Philo (cf. Prov. 8:22–31; Wisd. of Sol. 9:1–2). The idea that God's relation to his creation was mediated through a subordinate being or mode of manifestation was thus developing in a variety of ways.

In the NT, Jesus is described as preaching the word (Mark 2:2) or word of God (Luke 5:1). In both cases, *logos* is used, as it most often is in the NT where the English has "word." The gospel message about Jesus can also be described as the word or word of God (Acts 4:31; 8:4; 1 Cor. 14:36).

Not surprisingly, in the Johannine literature, Jesus himself is called *logos* (John 1:14: "the Word became flesh"). In Rev. 19:13, Jesus is called "Word of God" (*logos* of God). Elsewhere, in the prologue of 1 John, he is referred to as "the word of life" (1:1).

Particularly significant is the role in creation assigned to the *logos,* who is incarnate in Jesus (John 1:14) in the prologue of the Fourth Gospel. It is not immediately obvious why a man sent from God, even the Messiah of Israel, should have played such a role. Yet Jesus Christ figures as the mediator in creation not only in John, but also in such NT books as 1 Corinthians (8:6), Colossians (1:15–17), and Hebrews (1:2), although the term *logos* is not used. (Interestingly enough, in 1 Cor. 1:24, Paul calls Christ "the wisdom of God," using the Greek term *sophia,* mentioned above, that has close connections with *logos.*) This development in the doctrine of Christ becomes immediately intelligible in light of the use of *logos* as God's creating and revealing mediator in Philo and the role played by "wisdom" in ancient Jewish wisdom literature. Yet an unprecedented step is taken by NT writers, especially the Fourth Evangelist, when it is claimed that the one who has played this role can be identified with a historic figure, Jesus of Nazareth. ***See also*** Christology; Creation; Jesus Christ; Philo; Septuagint; Stoics; Wisdom; Word. Lord, a title of dignity and honor acknowledging the power and authority of the one so addressed. In the OT "Lord" is used to translate various titles for God (e.g., *Adonai, El Shaddai*). It can also be used in a secular sense for a master or owner. In Aramaic these words are translated by *miaria,* with possessive suffixes ("my" or "our" Lord), and in Greek by *kyrios.* In the Septuagint the sacred name "Yahweh" was left untranslated in Hebrew characters but was read *kyrios.*

In Jesus' time the Aramaic word *mari,* "my Lord," was coming into use as a title of respect (not of divinity) in addressing human beings with authority, e.g., a rabbi, and it would appear that Jesus was so addressed (e.g., Matt. 7:21). Jesus insists that recognition of his authority requires obedience to the demands of God enunciated by him. Mark 7:28 suggests that a Greek-speaking woman could address Jesus as *kyrie,* "Lord" or "Sir." Thus, Jesus during his earthly life could be addressed as "Lord" in recognition of his authority as a teacher (rabbi) and as a charismatic prophet.

After Easter one of the most important OT texts to be applied to the Risen One was Psalm 110:1. Here the word "Lord" is used both for

God and for the messianic king (Acts 2:34). The application of this text to Jesus meant that the title *mari,* "my Lord," addressed to him during his earthly life in recognition of his unusual authority was upgraded as a messianic address. Thus, we get the liturgical acclamation in Aramaic *marana tha,* "our Lord, come" (1 Cor. 16:22; Rev. 22:20).

Scholars once thought that use of the term "Lord" (*mārā*) in the absolute sense was not possible in Aramaic, but new evidence from the Dead Sea Scrolls shows that it was possible to refer to God as "Lord" or "*the* Lord," not only as "my Lord" or "our Lord." Consequently, it is possible that the formula from early Christian preaching, "God has made him both Lord and Christ" (Acts 2:36), goes back to the earliest Aramaic-speaking church. The title "Lord," while not connoting divinity in the metaphysical sense, means that at his exaltation Jesus entered upon a new function as the representative of God's Lordship in the world and over the church (Phil. 2:11). It is henceforth through the exalted Jesus that God exercises Lordship or kingly rule. The two "Lords" God and Jesus are distinguished from each other but not separated. We may assume that the Christology of Acts 2:36 was shared by both the Aramaic- and Greek-speaking sections of the earliest Jerusalem community.

With the mission to the Gentiles, which began in Antioch (Acts 11:20), Christianity entered a milieu in which the title "Lord" was already given to the deities of various religious cults. They were "lords" (the feminine, *kyria,* was used for the goddess Isis) of their religious communities. Scholars used to hold that this pagan usage was the source for the application of the title *kyrios* to Jesus, but that theory has been ruled out by the Aramaic evidence for the use of "Lord." Moreover, Christianity did not regard Jesus as a cult deity. Christian worship was directed to the Father through the Son in the power of the Holy Spirit. At the same time Paul can assert the Lordship of Christ polemically against the pagan cults. "There are many 'gods' and many 'lords'—yet for us there is one God, the Father . . . and one Lord, Jesus Christ" (1 Cor. 8:6).

The title "Lord" (*kyrios*) was also coming into use in the eastern part of the Roman Empire for the emperor (Acts 25:26, here with the possessive pronoun, "my Lord"). It is doubtful, however, whether this usage had any direct effect on early Christian usage, although Luke's birth narratives polemically assert the Lordship of Christ over against the claims of Caesar (Luke 2:11).

Paul is the one NT author to develop the Lordship of Christ theologically. The authority of Jesus as teacher during his earthly life is projected into the present life of the believing community. Thus Paul uses the title "Lord" when he appeals to the teaching of the earthly Jesus (1 Cor. 7:10; 9:14; 11:21). Those who have been justified have been brought under the authority of the Lord Jesus and are now committed to obedience to him (Rom. 14:8; cf. Rom. 6:3–11; 7:4–6). To be "in the Lord" is much the same as to be "in Christ," though the emphasis in the formula "in Christ" is primarily soteriological (having to do with salvation), whereas the emphasis of being "in the Lord" is primarily ethical. Thus, for example, Christians are to marry "in the Lord" (1 Cor. 7:39). "In the Lord" is also used in contexts concerned with ministerial activity: note how frequently the phrase occurs in Romans 16, where Paul is greeting those who shared his apostolic labors (Rom. 16:2). Finally, Paul uses "Lord" in contexts that speak of Christ's second coming. Those who are still alive at that time will be caught up in the air to meet "the Lord" (1 Thess. 4:17). That will happen "on the day of the Lord," not the day of Yahweh but the day of Christ (1 Thess. 5:12). ***See also*** Jesus Christ; Maranatha.

lord, one who wields authority. When used to address some individual and not as a title for God or the Christ, this term conveys esteem to a leader from his people (e.g., Num. 32:25; cf. Acts 25:26), or a master from a slave (so the brothers to Joseph, Gen. 44:6–17; see also Jesus' parable of the wicked servant, Matt. 18:23–35). It can refer to secular heads of tribes or nations (e.g., "the five lords of the Philistines," Judg. 3:3; Judg. 16; 1 Sam. 5:8; Isa. 16:8 ["The lords of the heights of the Arnon," Num. 21:28, may refer to idols]) or even an entire class of nobles (Dan. 1:10). In Dan. 5:1, Belshazzar gives a feast for a thousand of his lords or courtiers. It is over human lords such as these that God is "King of kings and Lord of lords" (1 Tim. 6:15; Rev. 19:16). That lordship can be demonstrated even against the corrupt elite of Judah (cf. Jer. 22:8; 25:35; 34:5).

In one NT instance, Jesus uses the term to establish his authority over ancient custom: "The Son of man is lord even of the sabbath" (Mark 2:28; Matt. 12:8; Luke 6:5). As a verb ("to lord it over") the term is used occasionally to describe high-handed behavior (Neh. 5:15; Eccles. 8:9), the very antithesis of the style Jesus commands of his disciples (Luke 22:24–27; cf. 2 Cor. 1:24).

W.S.T.

Lord of Hosts (KJV: "Lord of Sabaoth"), a term describing all the forces that operate at God's

command throughout his whole creation (e.g., Ps. 89:6–8). It is an old title for God who, in the role of divine warrior, was the leader of the armies of Israel. He was believed to be enthroned upon the cherubim on the Ark of the covenant. For that reason, when the Israelites were preparing to go to war against the Philistines, they sent to the shrine at Shiloh in order to get the Ark, so that God, who was enthroned on the cherubim, might accompany them into battle, thus ensuring, they thought, their success (1 Sam. 4:4). In the NT, the term occurs in Rom. 9:29 and James 5:4. ***See also*** Names of God in the Old Testament. M.A.F.

Lord of Sabaoth (sab´ay-oth). ***See*** Lord of Hosts.

Lord's Day, the day of Jesus' resurrection, the first day of the week, Sunday. The phrase "the Lord's Day" occurs first in Rev. 1:10, the only occurrence of it in the NT. A similar phrase appears in *The Teaching of the Twelve Apostles,* also known as the *Didache* (Gk., "teaching"), a work written toward the end of the first century, probably in Syria. The readers of this work are instructed to gather on the Lord's Day to break bread and to give thanks (*Did.* 14:1). A similar practice is presupposed in Acts 20:7. When Paul instructed the Corinthians each to contribute to the collection for the saints in Judea on the first day of every week, he presupposed a gathering for worship on that day (1 Cor. 16:2). Each of the Gospels emphasizes the tradition that Jesus was raised on the first day of the week. That emphasis probably reflects liturgical practice. This association is especially clear in Luke, where the Emmaus story links the first day of the week, Jesus' resurrection, and the breaking of bread (Luke 24:13–35).

It is likely that many early Christians observed both the Sabbath, the seventh day of the week, Saturday, and the Lord's Day. Paul may have objected to gentile Christians' adopting of Sabbath observance (Gal. 4:10). The Letter to the Colossians instructed its readers that Sabbath observance was not required (Col. 2:16). Ignatius, bishop of Antioch, wrote in the early part of the second century that the Lord's Day should be observed in place of the Sabbath (Ign. *Magn.* 9:1). ***See also*** Sabbath. A.Y.C.

Lord's Prayer, the, a prayer given by Jesus to his followers. It is found in different versions in Matt. 6:9–13 and Luke 11:2–4. The version in Matthew is longer, consisting of an address and seven petitions. It is embedded in the Sermon on the Mount (5:1–7:29), where Jesus instructs his followers (5:3–16) in doing the "greater" righteousness (5:20), which means to be wholehearted in doing God's will as interpreted by Jesus (5:48; 7:21). Acts of piety that express the greater righteousness are alms giving, prayer, and fasting (6:1–18). Such acts are to be performed in worship of God, however, and not for public show (6:1). As an example of how his disciples should pray (6:9a), Jesus recites the Lord's Prayer, which is devoid of the "empty phrases" and "many words" that characterize the prayers of the Gentiles (6:7). Here, the Lord's Prayer is a model that the disciples are to approximate in formulating their own prayers.

In Luke, the Lord's Prayer appears in a section that one scholar has termed a "catechism of prayer" (11:1–13). Jesus is on his way to Jerusalem in the company of his disciples (9:51; 13:22). Having observed Jesus at prayer, one of his disciples asks him to teach them to pray, just as John the Baptist taught his disciples (11:1). In response, Jesus recites the Lord's Prayer (11:2–4). This version, perhaps closer to the original, is shorter than the one in Matthew, consisting of an address and only five petitions. It, too, is a model prayer, but one intended for habitual use by the disciples (11:2a).

THE LORD'S PRAYER IN MATTHEW AND LUKE

	Mathew 6:9–13	***Luke 11:2–4***
Address:	Our **Father** who art in heaven,	**Father,**
"Thou"	**Hallowed be thy name.**	**Hallowed be thy name.**
Petitions:	**Thy kingdom come,**	**Thy kingdom come.**
	Thy will be done, on earth as it is in heaven.	
"We"	*Give us today*	*Give us each day*
Petitions:	**our bread for the morrow;**	**our bread for the morrow;**
	And forgive us our *debts,* *as we also have forgiven* *our debtors;*	**And forgive us our** *sins,* *for we ourselves forgive* *everyone who is indebted* *to us;*
	And lead us not into temptation,	**And lead us not into temptation.**
	But deliver us from evil.	
Doxology:	[For thine is the kingdom and the power and the glory forever. Amen.]	

Boldface and italic indicate, respectively, exact and approximate parallels. Where translation departs from NRSV it is that of J. D. Kingsbury.

In its original form, the Lord's Prayer probably comes from the earthly Jesus himself. One indication of this is that the version in Luke essentially reappears in Matthew. Another is the Jewish and Aramaic character of the prayer. Here, two points are important: first, in form and content, the Lord's Prayer parallels in important respects the Kaddish and the Eighteen Benedictions—Jewish prayers apparently in use, in their oldest forms, in the synagogue worship of Jesus' time; second, behind the Greek word for "Father" is the Aramaic *abba,* and behind the Greek for "debts" and "sins" is *choba.* Jesus himself apparently addressed God as *abba* (cf. Mark 14:36), thus establishing a custom that was continued even by Greek-speaking Christians (Gal. 4:6; Rom. 8:15). *Choba* means "debt" or, in a religious context, "sin" or "guilt"; thus, in Aramaic, forgiveness of "debts" (Matt. 6:12) is the same as forgiveness of "sins" (Luke 11:4).

The Lord's Prayer divides itself into four parts: the address, "thou" petitions, "we" petitions, and doxology. In the address, Jesus instructs his disciples to call upon God as "Father." In the OT and intertestamental Jewish literature, God is described variously as the Father of his covenant people, Israel (Deut. 32:6), of the Davidic king (2 Sam. 7:14; Ps. 89:26), of righteous Israelites (Ps. 103:13; Ecclus. 51:10; *Jubilees* 1:24), and as the one who will act in the future to deliver his people (Isa. 63:16; Mal. 3:17). When Jesus addresses God as Father in the Gospels, however, he gives expression to his awareness of his own unique filial relationship to God (Mark 14:36). In Jesus' person and words and deeds, God's Kingdom, or end-time Rule, is a present, albeit hidden, reality (Matt. 12:28; Luke 17:20–21). Jesus is the one through whom God reveals himself to humankind (Matt. 11:27; Luke 10:22) and the one who is God's supreme agent of salvation (Matt. 1:21; Luke 2:11). In calling persons to become his disciples, Jesus, the Son of God, makes of them sons of God who do the will of God and live in the sphere of God's end-time Rule (Matt. 5:45; Luke 6:35). Still, in speaking of God to his disciples, Jesus distinguishes between God as "my Father" and God as "your Father." "Our Father" is the corporate expression employed by the disciples, exclusive of Jesus (Matt. 6:9). Nonetheless, through Jesus, who is uniquely the Son of God, the disciples are given to know God as a gracious and loving Father and are invited to approach him as such in prayer.

The words, "who art in heaven," found only in Matthew, characterize God as the heavenly Father of the disciples in contradistinction to their earthly fathers. More importantly, "heaven" is also seen as that indeterminate place from which God exercises his Rule and, through Jesus, effects his purposes on earth.

The "thou" petitions of the Lord's Prayer focus on God and implore God to act so as to achieve his purposes in the world. The first petition (hallowing God's name) is further explicated by the second (coming of God's Kingdom) and the third, found only in Matthew (doing God's will). God's "name" is synonymous with God himself; the first petition invokes God to make his holiness manifest to the world by ushering in the final day of salvation. To concretize this, the disciples pray, "Thy kingdom come," and, "Thy will be done, on earth as it is in heaven." Here, God is called upon, as part and parcel of his holiness, to establish his kingly Rule in splendor over all nations and (in Matthew) to exercise his will here on earth with as much freedom from opposition as he presently exercises it in the sphere of his heavenly abode.

The "we" petitions focus on the physical and spiritual needs of the disciples. The petition for bread is a request for the necessities of life. Traditionally translated (in Matthew), "Give us this day our daily bread," it is more accurately rendered, "Give us today our bread for the morrow." At the basis of this petition is the notion that the disciples pray for the necessities of life that they require "today" in view of the fact that "tomorrow" God's splendid Kingdom will come. The petition for the forgiveness of debts, or sins, is an appeal that God, as Father of the disciples, will graciously forgive them their sins and so enable them to forgive one another. The final petition in Luke (not being led into temptation), which is supplemented in Matthew by the petition for deliverance from evil, is a plea that God so guide the disciples through life that their relationship to him as Father may never come into jeopardy and that they may be preserved from Satanic evil of every kind.

The doxology, though missing in the oldest and best manuscripts of Matthew and not original to the Lord's Prayer, is a fitting conclusion to the prayer. Here, the disciples praise God for the unmerited privilege of knowing him as Father and assert their confidence that he will give an ear to their petition. ***See also*** Abba; God; Heaven; Kingdom of God; Prayer; Sermon on the Mount, The; Sin; Temptation. J.D.K.

Lord's Supper, the, the last meal Jesus shared with his disciples prior to his death. The early Christian celebration known as the Lord's Supper receives this name from Paul's reference to "the supper of the Lord" in 1 Cor. 11:20. Its origin is Jesus' last meal with his disciples. Even if the synoptic Gospels are correct in describing this "last supper" as a Passover meal (in John, Jesus' last meal is eaten *before* Passover), that meal should still be viewed in the context of the table fellowship that was a distinctive feature of Jesus' ministry.

The words "after supper" in the tradition quoted by Paul in 1 Cor. 11:23–25 indicate that the Lord's Supper was originally a full meal, introduced by the blessing and breaking of the bread and concluded by the blessing

LORD'S SUPPER, THE

Jesus' last meal with his disciples, as depicted by Nicholas of Verdun on a panel from the altar at Klosterneuberg Abbey, 1180.

and passing of the cup. Today, however, it is widely assumed that by the time 1 Corinthians was written the bread and cup were taken together at the *end* of the common meal, as a special sacramental act.

In earliest Christianity the Lord's Supper was pervaded by intense eschatological expectation. Fervent hope for the new age, to be inaugurated by the risen and exalted Jesus upon his return to earth, is obvious in Mark 14:25 and Luke 22:18 and is echoed in 1 Cor. 11:26.

Most scholars think that the words spoken over bread and cup were a crucial part of the Lord's Supper liturgy from the beginning. Nevertheless, it is not possible to determine what the original "words of institution" were, for, as even a cursory comparison shows, the different versions are by no means identical in their details (Matt. 26:26–29; Mark 14:22–25; Luke 22:14–22; 1 Cor. 11:23–26; cf. John 6:35–59). In all the Gospels, as in 1 Corinthians, the bread and wine are connected with Jesus' redemptive death, but the different writings reflect distinctive understandings of the Lord's Supper.

1 Corinthians, in fact, reveals two views of the Supper—that of Paul's "opponents" and that of the apostle himself. Apparently some of the Corinthian Christians thought that they could participate in pagan cults at will because the bread and wine of the Lord's Supper ensured salvation. Paul, in response, draws a parallel between the eucharistic bread and wine and the spiritual food and drink (manna and water from the rock) that nourished the ancestors in the wilderness (1 Cor. 10:1–4). He argues that as the ancient "sacrament" did not protect the ancestors from God's judgment when they committed idolatry, so the Lord's Supper will not magically protect Christians who partake of the cup of demons (1 Cor. 10:6–22). The cup of blessing is rather a "*koinonia* of the blood of Christ"; the bread is a "*koinonia* of the body of Christ." The Greek word *koinonia* can be translated "fellowship," "communion," or "sharing." Some think that Paul's emphasis is on partaking of bread and wine as a means of communing with the Crucified and Risen One; others see partaking as a means of securing the benefits of Jesus' saving death. In either case, playing on a second sense of "body of Christ," Paul affirms that those who share bread and cup are bound together with each other: the many are made one by partaking of the one loaf (1 Cor. 10:17).

The apostle's emphasis is similar in 1 Corinthians 11, where he excoriates the Corinthians for the class consciousness and insensitivity to the poor that keeps the common meal from being the *Lord's* Supper. The tradition he quotes in 11:23–25 reminds the Corinthians of the meaning of Christ's death: the bread re-presents the body "for you"; the shared cup actualizes the new covenant effected through Jesus' death (see Jer. 31:31–34). If the Supper is truly to "proclaim the Lord's death until he comes," it must be marked by loving concern for every member of the body. To eat and drink without "discerning the body" is to incur divine judgment (11:29).

In Mark's words of institution (14:22–25) the phrase "my blood of the covenant" probably echoes Exod. 24:8, and "poured out for many" stresses the atoning efficacy of Jesus' death. Matthew makes the point even more explicit by adding "for the forgiveness of sins" to Mark's cup formula (Matt. 26:28). Among the Gospels and 1 Corinthians, Luke's cup-bread-cup order is unique. Many scholars think that Luke's "long text" (that is, 22:19b–20—not included in all ancient manuscripts—as well as 22:17–19a) is dependent on Mark plus a tradition similar to that quoted by Paul. Luke (long text) is the only Gospel that, like 1 Corinthians 11, includes Jesus' command "Do this in remembrance of me."

In the Gospel of John Jesus does not institute the Lord's Supper during the last meal with his disciples, but the "bread of life" discourse in John 6 (vv. 25–59) likely reflects the understanding of the Lord's Supper in the Johannine community. Scholars disagree, however, about what that understanding was. Jesus speaks of eating his flesh and drinking his blood as the means of attaining eternal life (6:53–58). At least three interpretations of these words are possible. First, the language is sacramental: when believers eat the bread and drink the wine they are partaking of sacred food and drink that gives eternal life. (Compare the view of Ignatius of Antioch, who in the second century described the eucharistic bread as "a medicine of immortality" [Ign. *Eph.* 20:2].) Second, the language of eating Jesus' flesh and drinking his blood dramatically suggests that one must *appropriate* God's salvation,

made available through Jesus' death, by being spiritually united with the Crucified and Risen One. Third, in light of the emphasis at John 6:63, the shocking and offensive language in John 6 (e.g., vv. 51, 52–57; cf. v. 60) points to the scandal of the incarnation: to have eternal life one must commit oneself to Jesus as the revealer sent from God, the Word become flesh (John 1:14). ***See also*** Jesus Christ; Passover, The; Sacraments; Worship.

Lot (lot), the son of Abraham's brother Haran. Lot is first mentioned in Gen. 11:31 as migrating with his uncle Abraham and grandfather Terah from Ur of the Chaldeans toward Canaan. After Terah's death in the Syrian locale of Haran, Lot accompanied Abraham on his journey into Canaan (12:1–9) and to and from Egypt (12:10–20; 13:1). Upon their return, a quarrel between Lot's and Abraham's herdsmen (13:7) prompted Abraham to propose an amicable separation, offering Lot his choice of where to settle. Lot preferred the well-watered Jordan plain and its prosperous towns. Abraham settled in Hebron.

Lot appears in Genesis 14 as a captive in a battle between five kings of the Jordan plain and four invading Mesopotamian kings. Abraham, with only 318 men, defeated and pursued the invaders beyond Damascus, recovering Lot and his possessions. Abraham indirectly aided Lot a second time (18:23–33) when he pleaded with God to spare Sodom and Gomorrah from destruction because of the few righteous among its inhabitants. God nevertheless destroyed the cities but first sent divine emissaries to rescue Lot and his family (19:1–29). The emissaries appeared as wayfarers and reluctantly accepted Lot's hospitality. When rowdy townsmen sought to harm the newcomers, Lot pleaded with them, offering his daughters instead. But the emissaries blinded the mob, and, with some difficulty, persuaded Lot and his wife and daughters to leave. Lot pleaded for a refuge in the nearby town of Zoar (Heb., "trifle"), which the emissaries, pressed for time, granted. On departing, Lot's wife, looking back at the destruction, turned into a pillar of salt. Lot's daughters, believing themselves the world's sole survivors, plied Lot with liquor and cohabited with him, conceiving Moab (Heb., "of the same father") and Ben-ammi (Heb., "son of paternal kin"), ancestors of Israel's Transjordanian neighbors, the Moabites and Ammonites (Gen. 19:30–38). ***See also*** Abraham; Ammonites; Moab; Sodom.

lot, lots, objects the casting or drawing of which was a common method for determining the divine will in ancient Israel and in NT times. A range of questions, usually posed or subdivided so that a yes or no would suffice, were dealt with in this manner. The Hebrew word *goral,* the standard term for "lot," has the additional meaning of "destiny" in certain biblical texts (Isa. 17:14; Jer. 13:25; Dan. 12:13) and in the Dead Sea Scrolls comes to mean "fate." In addition, the noun *pur,* related to the Akkadian *puru,* is found in the book of Esther; hence the name of the festival, Purim. The word *pur* denotes the instrument Haman used to fix the day for the pogrom. In Esther 3:7, *pur* is specifically identified with *goral.*

Various notable events recorded in the Bible were determined by the choosing or casting of lots. Saul, Israel's first king, was selected in this manner (1 Sam. 10:16–26), the conquered land was apportioned among the tribes by lot (Num. 26:55; Josh. 14:2), the identity of Achen as the thief of the spoil from Jericho was discovered by lot (Josh. 7:14), and by this means Jonathan was found to be the (unwitting) violator of his father's oath (1 Sam. 14:42). The ranks of Temple personnel were also determined by lot (1 Chron. 24:5; 25:8; 26:13; cf. Luke 1:9). The soldiers who crucified Jesus divided up his possessions by lot (Matt. 27:35; Mark 15:24; Luke 23:34; John 19:24 mentions Jesus' seamless robe as the object of a special casting of lots), and Matthias was chosen in this way to replace Judas among the twelve apostles (Acts 1:26).

References to the use of lots abound, and the legitimacy of this means of determining the divine will was never questioned. Yet no detailed

Lots found at Masada, a mountaintop fortress on the western shore of the Dead Sea and final holdout of Jews in the rebellion against Rome, A.D. 66–73. Each is inscribed with a name and may have been used to determine who would slay the others in order to avoid capture by the Romans.

description of the actual procedures involved or of the precise nature of the instrument(s) used is offered in the Bible. ***See also*** Purim, The Feast of; Saul; Urim and Thummim. W.L.H.

Lotan (loh´tan), a son of Seir the Horite and chieftain of the Horites who inhabited the hill country of Seir (Edom) in patriarchal times (Gen. 36:20, 29). ***See also*** Horites; Seir.

love, in the Bible a relationship of self-giving. **Love in the Old Testament:** In the OT the verb "to love" (Heb. *'ahab*) and its cognates cover the full range of meanings the English word "love" has, including love for God (Exod. 20:6; Ps. 40:17) and the love God has for his people (Hos. 3:1; Deut. 7:13). This latter sense of love, God's love for his people in the covenant context, is often expressed by the term "steadfast love" (Heb. *ḥesed*). God's steadfast love is a sign of his fidelity.

A review of some texts will indicate the wide range of meaning "love" has. It can be used to describe physical love between the sexes, as well as sexual concupiscence (Gen. 34:3; Judg. 16:4, 15; 2 Sam. 13:4, 15; see also Song of Sol.). The description of love between the sexes transcending the purely physical is also common (Gen. 24:67; 29:20: "So Jacob served seven years for Rachel, and they seemed to him but a few days because of the love he had for her"). The Hebrew word can refer to love within a family (Gen. 22:2; 25:28; Ruth 4:15); among friends (Ps. 38:12; Jer. 20:4–6); and between superior and inferior or slave and master (Deut. 15:16). Especially significant is the command that Israel love the foreigner or stranger, and the rationale for such action (Lev. 19:34: "The stranger who sojourns with you shall be to you as the native among you, and you shall love him as yourself; for you were strangers in the land of Egypt: I am the Lord your God"; also Deut. 10:19). Additionally, Israel is instructed to love the neighbor, namely, the fellow Israelite (Lev. 19:18).

With the prophecy of Hosea (mid-eighth century B.C.), a profound theological conception of love is introduced into the literature of Israel. Hosea was speaking prior to the fall of Samaria to the Assyrians in 721 B.C., and he used the imagery of love and marriage to describe the faithlessness of Israel to its God. The problem is described in Hos. 6:4–6: "What shall I do with you, O Ephraim? What shall I do with you, O Judah? Your love is like a morning cloud, like the dew that goes early away. . . . For I desire steadfast love and not sacrifice, the knowledge of God, rather than burnt offerings" (see also 9:15; 11:1–7). The depth of God's compassionate love is manifested in his directive to Hosea to buy back again his adulterous wife, a directive that broke with legal custom and revealed the freedom by which only the Holy One of Israel can act: "Go again, love a woman who is beloved of a paramour and is an adulteress . . . " (3:1). Similarly God will restore Israel, a theme expressed throughout this OT book, as, for example, in 11:8–9: "How can I give you up, O Ephraim! How can I hand you over, O Israel! How can I make you like Admah! How can I treat you like Zeboiim! My heart recoils within me, my compassion grows warm and tender. I will not execute my fierce anger, I will not again destroy Ephraim; for I am God and not man, the Holy One in your midst, and I will not come to destroy." As God initiated the covenant (11:1: "When Israel was a child, I loved him, and out of Egypt I called my son") so now, because he is the Holy One, he invites Israel once again to respond to the depth of his love for it. Similar language is found occasionally in Jeremiah (2:2; 3:2) and in Deutero-Isaiah (i.e., Isa. 40–55), but without the harlot motif. Isaiah can describe God as "your husband" (54:5–8) and can have God proclaim his love for Israel by using feminine language and imagery: "Can a woman forget her sucking child, that she should have no compassion on the son of her womb? Even these may forget, yet I will not forget you" (49:15). The metaphor is similar to Hosea's, but the roles are reversed.

In Deuteronomy the concept of love is systematically included, but its tone is considerably less passionate than that found in Hosea. The essential function of love is to undergird the concepts of election and covenant and thus the freedom of God as observed in Hosea is restrained as, for example, in Deut. 7:12–13: "And because you hearken to these ordinances, and keep and do them, the Lord your God will keep with you the covenant and the steadfast love which he swore to your fathers to keep; he will love you, bless you, and multiply you . . ." (note also 4:37; 7:8; 10:15). To love God is to keep his commandments (5:10; 7:9); love is now a requirement (10:12; 11:1, 11, 13) and it is in this sense that one must understand the great *shema* (Heb., "hear") in Deut. 6:4–6: "Hear, O Israel: The Lord our God is one Lord; and you shall love the Lord your God with all your heart, and with all your soul, and with all your might. And these words which I command you this day shall be upon your heart. . . ."

Love in the New Testament: In the NT the primary Greek words used to express the concept of love are *agapan/agape* and *philein/philia; eros,* signifying sexual love in Greek, is not used in the NT. Although the NT much prefers the use of *agapan,* in contrast to normal Greek usage, it is difficult to draw any precise distinctions between the NT use of *agapan* and the use of *philein.*

In the synoptic Gospels, one notes that the primary use of "love" is with regard to the great commandment (Mark 12:28–34; Matt. 22:34–40; Luke 20:39–40). In Mark a scribe approaches Jesus and asks, "'Which commandment is the first of all?' Jesus answered, 'The first is "Hear, O Israel: The Lord our God, the Lord is one; and you shall love the Lord your

God with all your heart, and with all your soul, and with all your mind, and with all your strength." The second is this, "You shall love your neighbor as yourself." There is no other commandment greater than these'" (Mark 12:28–31). The answer Jesus gives (in Matthew and Luke it is the lawyer who gives the answer) is derived from Deut. 6:5 and Lev. 19:8. God expects to be loved with the totality of one's being; the neighbor is to be loved with the same love as one has for oneself (see also Matt. 19:19).

In Matt. 5:43–46 (see Luke 6:27–35) the theme "love your enemies" is emphasized. While this is hinted at in Exod. 23:4–5 and Prov. 25:21–22 (note Paul's expansion of this in Rom. 12:16–21), the texts in both these Gospels certainly intensify this motif. Matt. 6:24 (see Luke 16:13) makes clear that God expects total response and commitment from those who claim to love him (Luke 16:13: "No servant can serve two masters; for either he will hate the one and love the other, or he will be devoted to the one and despise the other. You cannot serve God and mammon"). In Matthew, Jesus emphasizes a similar point in the context of discipleship; the disciple must love Jesus more than any family member (10:37–38). Another reference to love found only in Matthew is in the final, eschatological narrative of the Gospel: "And because wickedness is multiplied, most men's love will grow cold. But he who endures to the end will be saved" (24:12–13). This emphasis fits in well with Matthew's emphasis on ethics, particularly in view of the delayed Parousia (24:48). Luke, too, has a passage dealing with the concept of love that is unique to his Gospel: the woman with the ointment (7:36–50). "To love" appears specifically in 7:42 and 47: "Therefore I tell you, her sins, which are many, are forgiven, for she loved much; but he who is forgiven little, loves little." Love is not the cause of her forgiveness; rather her repentance and forgiveness are the reason she is able to love.

Paul's Perspective on Love: In order to understand Paul's perspective on love, it is important to note that it is often linked with faith and hope (1 Cor. 13:13: "So faith, hope, love abide, these three; but the greatest of these is love"; see 1 Thess. 1:3; 5:8; Gal. 5:5–6). Love is a possibility only because the believer has responded to God's salvific act in the death and resurrection of Christ with faith (Rom. 5:8: "But God shows his love for us in that while we were yet sinners Christ died for us"; see Gal. 2:20). Love is given to the believer by the Holy Spirit as a gift to be exercised now and as a sign of the future consummation of that new creation which God has begun in Christ, a fulfillment that is expected in hope. In fact, hope "does not disappoint us, because God's love has been poured into our hearts through the Holy Spirit which has been given us" (Rom. 5:5).

Love is the primary term describing the result of faith both for the believer and the community

Love as a virtue personified; bronze relief by Andrea Pisano, South Doors, Baptistry, Florence, 1336.

in Christ. Because Christ has died and the Holy Spirit has given the believer the gift of love, Paul can write the Corinthians that the "love of Christ controls us . . ." (2 Cor. 2:4). Paul is emphatic that love does not originate in the human heart. It is not a human possibility, it is a divine gift. It is Christ who now lives in the believer (Gal. 2:20); therefore the believer must actualize this love of Christ. Faith works through love (Gal. 5:6) and it must increase and abound (1 Thess. 1:12). The one in Christ must walk in love (Rom. 14:15). For this reason the apostle always gives a priority to love (1 Cor. 13:13), especially over knowledge. "'Knowledge' puffs up, but love builds up" (1 Cor. 8:1). Paul is careful to note that a person can love God, but not know him; rather one is known by God. Love must be concerned not with self-elevation and boasting, but with the needs of the weak members of the body of Christ. Love is considerate of this weak brother or sister, otherwise "this weak man is destroyed, the brother for whom Christ died. Thus, sinning against your brethren and wounding their conscience when it is weak, you sin against Christ" (1 Cor. 8:11–12; note also Matt. 25:31–46). To emphasize this primary nature of love in the life of the new Christian community, Paul devotes an entire chapter to the theme in his magnificent description of love in 1 Cor. 13. That this hymn of love appears in a letter to Corinth is hardly accidental when it is remembered that one of the cult centers of Aphrodite (the Greek goddess of love who often appears together with Eros) was in Corinth.

Paul is careful to root his concept of love not only in the Christ event, but in the OT as well, undoubtedly as a way to prevent love from becoming a coverall for selfishness and self-desire.

This tendency is clear in Gal. 5:14 and in response Paul cites Lev. 19:18: "For the whole law is fulfilled in one word, 'You shall love your neighbor as yourself.'" Similarly, we find such a usage of the OT in Rom. 13:8–10. Here Paul asserts that the one exception to obedience to the authorities is when they prohibit the love of neighbor; he then proceeds to articulate that theme. Additionally, love can also give great personal assurance. Among such lines the apostle writes to the Romans: "we know that in everything God works for good with those who love him. . . . For I am sure that neither death, nor life, nor angels, nor principalities, nor things present, nor things to come, nor powers, nor height, nor depth, nor anything else in all creation will be able to separate us from the love of God in Christ Jesus our Lord" (8:28–39).

The Johannine Writings: In the Johannine school (the Gospel of John; 1, 2, 3 John; and perhaps Revelation) the concept of love plays a central role, and it is here that we find an apparently synonymous usage between *agapan* and *philein.* In the first half of the Gospel (chaps. 1–12) there is no consistent usage. Jesus loves Lazarus (11:3, 36; *philein*) and Martha and her sister (11:5; *agapan*). In a debate with Jews, Jesus responds, "If God were your Father, you would love me . . . " (8:42; *agapan*). Even though "God so loved the world that he gave his only son" (3:16; *agapan*), "men loved darkness rather than light . . . " (3:19; *agapan*). John 10:17 is a direct allusion to the death, resurrection, and glorification of Jesus: "For this reason the Father loves (*agapan*) me, because I lay down my life, that I may take it again." The aspect of the Father loving the Son is also found in 3:35 (*agapan*) and 5:20 (*philein*). In the second half of the Gospel a more consistent ethical dimension of love within the community is stressed. The key text is 13:34–35: "A new commandment I give to you, that you love one another; even as I have loved you, that you also love one another. By this all men will know that you are my disciples, if you have love for one another." This key verse is emphasized over and over again as essential to the existence of the Christian community (14:15, 21, 23, 24; 15:9, 12, 17). Another series of texts revolve around the enigmatic "beloved disciple," someone who is without question deeply loved and respected in this Johannine community and, perhaps, is the apostle John himself. This disciple whom Jesus loved is discussed in 13:23; 19:26; 20:2; 21:7; and 21:15, 16, 17. In John 17, which contains the high priestly prayer of Jesus for the unity of his disciples, the desire is expressed "that the love with which thou has loved me may be in them, and I in them" (v. 26), because the oneness of the disciples is necessary if the world is to believe that the Father has sent the Son and loves the believers as much as the Son. Finally, the threefold questioning of Peter in the final edition of the Gospel (21:15–17) with the repeated "Do you love me?" suggests that the authority given to Peter must always be exercised in the context of love (note the similar theme in 1 Pet. 5:1–5).

The basic pattern of love defined in John 13:34 and further articulated there, continues in the three Letters and the book of Revelation. The obvious connection with John 13 is evident in 1 John 2:7 ("Beloved, I am writing you no new commandment, but an old commandment which you had from the beginning . . ."), 1 John 3:23 ("And this is his commandment, that we should believe in the name of his Son Jesus Christ and love one another, just as he had commanded us"), 2 John 6 ("And this is love, that we follow his commandments; this is the commandment, as you have heard from the beginning, that you follow love"), and Rev. 2:4 ("But I have this against you, that you have abandoned the love you had at first"). The author of 1 John is intent on making clear the ethical implications of love and to eradicate any hypocrisy. An essential text in this writing is 3:18: "Little children, let us not love in word or speech but in deed and in truth." Thus, the person "who says he is in the light and hates his brother is in the darkness still" (1 John 2:9); "whoever does not do right is not of God, nor he who does not love his brother" (1 John 3:10); "If any one says, 'I love God,' and hates his brother, he is a liar; for he who does not love his brother whom he has seen, cannot love God whom he has not seen" (1 John 4:20). It is 1 John that has given us the well-known verse, "He who does not love does not know God; for God is love" (4:8). In this context the writer stresses again the priority of God's love in Christ in response to which the believers are permitted and encouraged to love one another. Thus, the Johannine authors as a whole are quite close to the Pauline understanding of love and are sophisticated interpreters of the purpose and ministry of Jesus. ***See also*** Faith; Hope. K.P.D.

loving-kindness, a characteristic of God in the OT. The Hebrew word *khesed,* which is rendered by the KJV as "loving-kindness" (30 times), as "kindness" (38 times), and as "mercy" (145 times), is translated in the RSV chiefly as "steadfast love" (182 times) and "kindness" (21 times), but occasionally as "great kindness" (Gen. 19:19) or "loyal love" (1 Sam. 20:14). In its preference for "mercy" the KJV was obviously influenced by the Septuagint (LXX) which in 168 instances renders *khesed* as "mercy" or "compassion" (Gk. *eleos).*

All renderings in English only approximate the richness of the original. It contains the idea of devotion, loyalty, and covenant faithfulness (see Exod. 34:6; Neh. 9:32). Thus one who was *ḥasēēd* (Ps. 18:25) was a "loyal" (RSV) "devout person." The plural *ḥasidim* is used frequently by historians to describe the pious and devout predecessors of the Pharisees at the time of the Maccabean revolt (167 B.C.).

This word is used chiefly, but not exclusively, of God. The "kindness" the prophet Micah enjoins humankind to love includes both its human and divine aspects (Mic. 6:1–6). It is thus a metonym for covenantal loyalty and performance. J.G.G.

Lubim (*loo*'bim), the Hebrew word for Libya and Libyans in the KJV, the equivalent of Egyptian *Rebu*, "Libu." These North African people settled in Egypt and served as mercenaries in the Egyptian army in the latter part of the second millennium B.C. A Libyan dynasty (the twenty-second dynasty) ruled Egypt from ca. 945 to 715 B.C. In 925 B.C. Libyans served with Shishak (Shoshenq I) when he campaigned in Palestine (2 Chron. 12:3). Subsequently (ca. 897 B.C.), they formed an important element in the army led by the Ethiopian general Zerah, who fought unsuccessfully against King Asa of Judah (2 Chron. 14:9; 16:8). Libyans also served on the side of the Ethiopians when the Assyrians captured No-amon (Thebes) in 663 B.C. (Nah. 3:9). ***See also*** Shishak; Zerah. J.M.W.

Lucifer (*loo*'si-fuhr), the English translation in the KJV (Isa. 14:12) of the Hebrew word meaning "light bringer" or "shining one," sometimes designating the morning (or day) star, that is, Venus (cf. RSV: "Day Star"). The English word "Lucifer" comes from the Latin for "light bearer." In Isa. 14:12, the King of Babylon, in an apparent reference to Canaanite mythology, is tauntingly called "Day Star, son of Dawn" because he has fallen from his lofty but temporary position of power. In the Christian church, this passage from Isaiah came to be connected with Jesus' saying in Luke 10:18: "I saw Satan fall like lightning from heaven." Thus the connection was made (erroneously) between Lucifer and Satan, and Lucifer was popularly understood as another name for Satan. ***See also*** Canaan, Canaanites; Devil; Satan; Stars, Star of Bethlehem. J.M.E.

Lucius (*loo*'shuhs). **1** A Roman consul who sent a letter supporting Simon Maccabeus in his struggle against the Seleucids (1 Macc. 15:15–24). ***See also*** Maccabees; Seleucids, The. **2** A prophet and teacher from Cyrene in the church at Antioch (Acts 13:1). ***See also*** Antioch; Cyrene; Prophet. **3** An associate of Paul who sends greetings in Rom. 16:21. There is no evidence that he is the Lucius of Cyrene or Luke the reputed author of the Gospel of Luke and Acts.

Lud (luhd), a name given to the son of Shem (Gen. 10:22). In its plural form, Ludim (loo'dim), it designates a group of people (Isa. 66:19; Ezek. 30:5; it is now widely recognized that the Table of Nations in Genesis 10 is a record of historical and geographical relationships rather than strictly a genealogicial record). Their identification is difficult and various proposals have been made, none entirely satisfactory. There are apparently two groups designated by the name. One group is associated with peoples in Asia Minor (Isa. 66:19; possibly also Ezek. 27:10) and would probably include the "sons" of Shem (Gen. 10:22) who were Semitic people. They are often identified with the kingdom of Lydia on the western coast of Asia Minor. However the Lydians were not Semitic peoples and have little connection with other OT groups, so this identification is questionable. The second group appears to be centered in North Africa (Ezek. 30:5; Jer. 46:9) and is probably to be connected with the Ludim (Gen. 10:13) who are said to be "sons" of Mizraim (Egypt). Various conjectures are offered for their identification but none is supported by textual evidence. It is possible that the two groups are of the same origin and settled in various places. The fact that they appear in the biblical record as mercenary soldiers in the army of Tyre (Ezek. 27:10; see also 30:5) and as skilled bowmen (Jer. 46:9) might account for their wide dispersion. ***See also*** Put; Sardis. D.R.B.

Luke (l*oo*k), the transliteration of the Greek *Loukas*, probably an affectionate form of the Latin name Lucius (Gk. *Loukios*). The name appears three times in the NT, all in Letters attributed to Paul: Philem. 24; Col. 4:14; 2 Tim. 4:11.

Evangelist page of the Gospel According to Luke from the *Lindisfarne Gospels* (ca. 700) shows Luke writing. Behind him is his symbol, the winged ox.

In Philem. 23–24, Luke, along with Epaphras, Mark, Aristarchus, and Demas, is said to be with Paul, and they join him in sending greetings to Philemon, Apphia, and Archippus (v. 2). Epa-

LUKE, THE GOSPEL ACCORDING TO

phras is called Paul's fellow prisoner (v. 23), while Luke and the others are called his fellow workers, as is Philemon (v. 2). In Col. 4:10–14, Luke, along with Demas, Aristarchus, Mark, Epaphras, and others, joins Paul in sending greetings. Here, Luke is called "the beloved physician." In 2 Tim. 4:10–12, Paul is said to have been deserted by or to have sent to other places most of his former associates (Demas, Crescens, Titus, and Tychicus). Only Luke is with him, and Paul asks Timothy to join him with Mark.

It seems clear that all three passages are intended to refer to the same person. Since, however, two of the references appear in Letters that may not have been written by Paul himself (Colossians and 2 Timothy), Philemon must be regarded as the most important reference. We should therefore put more weight on the image of Luke as a fellow worker with Paul than upon that of Luke as the beloved physician.

It is possible that the Lucius referred to in Rom. 16:21 is the same as the Luke of Philem. 24 and the other references. In Romans, however, Lucius, Jason, and Sosipater are called Paul's kinsmen and distinguished from Timothy, who is called "my fellow worker." Although the third-century scholar Origen identified the two, most modern scholars do not agree. Another Lucius is mentioned in Acts 13:1, as one of the prophets in the church at Antioch. There is little to suggest, however, that this is the person referred to in the Pauline Letters.

Irenaeus (late second-century bishop of Lyons) appears to have been the first to identify the author of the third Gospel as Luke, "the companion of Paul." The Muratorian Canon, a late second-century list of authoritative Christian writings, agrees and adds that this Luke was a physician, not an eyewitness of the events narrated in the Gospel but a participant in some of those in Acts, which he also wrote (presumably, a reference to the "We Passages" in Acts, in which the author uses the first-person plural pronoun, thus appearing to identify himself as a participant in the narrative). Luke, the companion of Paul, has traditionally been identified as the author of both the Gospel of Luke and the book of Acts. Modern critical scholars agree that the same author wrote both books but are more cautious about the identification of this author. ***See also*** Acts of the Apostles, The; Colossians, The Letter of Paul to the; Lucius; Luke, The Gospel According to; Timothy, The First and Second Letters of Paul to, and Titus, The Letter of Paul to. J.B.T.

Luke, the Gospel According to, the third book in the NT, frequently called the Third Gospel. Although the author is not identified in the text of the Gospel, Irenaeus, a Christian bishop who lived and wrote near the end of the second century, claimed that the author was a companion of Paul. Presumably, Irenaeus was thinking of the Luke who is mentioned in Col. 4:14; Philemon 24; and 2 Tim. 4:11. After the time of Irenaeus, it became traditional to refer to the author of the Third Gospel, as well as the author of the book of Acts, as Luke, the companion of Paul.

Authorship and Date: The tradition that both this Gospel and the book of Acts were written by the same person is almost certainly correct. The two books have a similar literary style, and certain themes can be traced through both. Both books begin with prologues and dedications to one Theophilus (Luke 1:1–4; Acts 1:1–3), and the prologue in Acts has a brief but fitting description of what is there called "the first book" (Acts 1:1), surely a reference to the Gospel of Luke.

Although most modern scholars agree with the tradition that one author wrote both Luke and Acts, many do not agree with the traditional identification of this author as a companion of Paul. They point out that the author of Acts shows no acquaintance with Paul's literary activity or his major theological views as these may be discerned in the apostle's genuine writings. Despite the high status that is granted to Paul in Acts, he is not counted among the apostles, whose names are given in Acts 1:13, nor does he meet the requirements for apostleship as given in Acts 1:21–22. The title of apostle is thus withheld from Paul except in Acts 14:14 and by implication 14:4. In his own letter to the Galatians, however, Paul insists that he is an apostle (see Gal. 1:1). Thus, many scholars believe that a companion of Paul would have known him better and would have described him in closer conformity with the image that emerges from reading his genuine Letters. It should be noted, however, that not all scholars agree with these judgments and that many accept the traditional identification of the author of Luke-Acts as indeed a companion of Paul. These scholars explain the divergences with the Letters by assuming that Luke was not with Paul at every moment and was writing at a time when the issues that engaged Paul's attention were no longer of such great importance. Thus, the question of the authorship of Luke-Acts has not finally been settled.

OUTLINE OF CONTENTS

The Gospel According to Luke

I. Prologue (1:1–4)
II. Infancy narratives (1:5–2:52)
III. Narratives about John the Baptist and Jesus' baptism and temptation (3:1–4:13)
IV. Jesus in and around Galilee (4:14–9:50)
V. Jesus' trip to Jerusalem (9:51–19:44)
VI. Jesus in Jerusalem (19:45–21:38)
VII. The Last Supper and the trial and death of Jesus (22:1–23:56)
VIII. Resurrection narratives (24:1–53).

LUKE, THE GOSPEL ACCORDING TO

The date at which Luke and Acts were written is usually set at ca. A.D. 80–85. In the prologue to the Gospel (1:1–4), the author implies that he was not an eyewitness to the things described and that he has consulted other documents. Similarities among the Gospels of Luke, Matthew, and Mark (the synoptic Gospels) suggest that there are certain literary relationships among these three Gospels and that Luke likely consulted one or both of the others. The Synoptic Problem is the problem of sorting out these relationships.

The relative date that one sets for the writing of Luke depends largely on the hypothesis one uses to solve the Synoptic Problem and the dates one assigns to the composition of Matthew and Mark. In one place, however, Luke appears to be in possession of some knowledge about the fall of Jerusalem to the Romans, an event that occurred in the year A.D. 70. Luke 21, which has parallels in Matthew 24 and Mark 13, contains some specific and detailed information about the Roman conquest and thus appears to have been written from a post-70 perspective (see esp. 21:20–24). It is possible, however, that the same can be said for one or both of the other synoptic Gospels.

How long after the year 70 did Luke write? The earliest references to Luke and Acts come from ca. 140. But it may be possible to narrow the range between 70 and 140 if we assume that the differences between the picture of Paul in Acts and that in Paul's Letters may be partially explained by the fact that the Letters were not available to Luke at the time he wrote. It is likely that Paul's Letters were not collected, copied, and distributed before ca. 90. If Luke wrote before this time, he probably would not have known about the Letters. Thus, the outside chronological range for the writing of Luke-Acts would be ca. 70–90, and the dates 80–85 would probably be close to correct.

Theme and Style: As an author, Luke is usually highly regarded. His literary ability, in comparison with that of other NT writers, is frequently said to be second only to that of the author of the Letter to the Hebrews. He appears to be aware of the power of rhetorical style in the use of the Greek language, he is careful in the structuring of his narrative as a whole, and he is consistent in his characterizations and use of themes.

Probably because he is the only Evangelist to pair his Gospel with a narrative about the early history of the church (the Acts of the Apostles), Luke is often called a historian. The German scholar Hans Conzelmann referred to Luke's writing as a "history of salvation." He claimed that Luke thought of world history as made up of three periods: the time of Israel, the time of Jesus, and the time of the church. The time of Israel extends to John the Baptist (see Luke 16:16), and the period of the church begins with the descent of the Spirit in Acts 2. In between is the period of Jesus, a special time of salvation, according to Conzelmann, marked by the absence of the devil, who departed in Luke 4:13 and did not return until Luke 22:3. Throughout both the Gospel and Acts, the author emphasizes the theme of divine necessity, a theme that expresses the belief that God is working out a plan of salvation within world history.

It may be, however, that "salvation history" is not the governing theme of Luke-Acts. Some scholars call attention to the interplay in the text of prophecy and fulfillment, and others cite the way in which the Christian message comes first to Jews and then to Gentiles and see in this progressive movement a key to the structure of Luke-Acts.

Although Luke includes several statements about the consummation of history, he does not impart a sense of urgency about these matters. His Gospel has less eschatological fervor than either Matthew or Mark. He cautions against people who proclaim that the end has arrived (21:8). According to Luke, Jesus told the parable of the pounds because some people wrongly felt that the kingdom of God was to come almost immediately (19:11–27). The Lucan Jesus emphasizes patience, a necessary quality for persons who are waiting for something that is not to be immediate.

Luke's interest in oppressed people, especially women and the poor, is frequently noted. His interest is not simply expressed, however, in terms of sympathy. In this Gospel, Jesus has as many words about the duties of the rich toward the poor as he has words of assurance to the poor. There is also a strong note of optimism in Luke. Jesus' birth is greeted by the joyful songs of angels and the hopeful praises of pious people. The teaching of Jesus is filled with hope and assurance for the future. The kingdom of God is pictured as God's gracious gift. Jesus himself is portrayed as loving, kind, and a doer of good deeds.

Distinctiveness of Luke's Gospel: Despite the extensive similarity between Luke and the other two synoptic Gospels, there is a great deal of material in Luke that is distinctive. Only Luke has such narratives as that of the boy Jesus in the Temple (2:41–52), the raising of the widow's son at Nain (7:11–17), the dialogue with Mary and Martha (10:38–42), and Jesus' visit to the home of Zacchaeus (19:1–10). Some of the best-known parables appear only in Luke: for example, the good Samaritan (10:29–37), the lost coin (15:8–10), the prodigal son (15:11–32), the rich man and Lazarus (16:19–31), and the Pharisee and the tax collector (18:9–14).

Moreover, although there are some similarities between Luke's birth narratives and Matthew's, the actual stories in Luke are distinctive. Only Luke gives us the story of the birth of John the Baptist (1:5–25, 57–80), the annunciation of Jesus' birth to Mary (1:26–38), the birth of Jesus in a manger (2:1–7), the angelic announcement and the visit of the shepherds (2:8–20), and the prayers of Simeon and Anna (2:25–38).

Finally, Luke's account of the postresurrection appearances of Jesus is distinctive. In contrast to Matthew, he locates all of the appearances in the vicinity of Jerusalem, includes an especially meaningful narrative about the appearance of Jesus to two disciples who are traveling to Emmaus (24:13–35), and concludes his Gospel with the ascension of Jesus and the return of the disciples to Jerusalem (24:50–53). In the final verse, we find the disciples "continually in the temple blessing God" (24:53). ***See also*** Acts of the Apostles, The; Chronology, New Testament; Gospel, Gospels; L; Luke; Synoptic Problem, The; Theophilus.

Luz (luhz). **1** The Canaanite name of the city Bethel, renamed by Jacob (Gen. 28:19; 35:6). Luz/Bethel was on the border between Benjamin and Ephraim (Josh. 16:2; 18:13; Judg. 1:23). Josh. 16:2 implies that Luz and Bethel are distinct places. Nevertheless on the basis of all other references, Luz and Bethel are more likely two names for the same place. Similar double names are frequently found (e.g., Jebus/Jerusalem, Kiriath-arba/Hebron). **2** The name of a town in the land of the Hittites built by a refugee from the Canaanite town of Luz (Judg. 1:22–26). ***See also*** Bethel. J.F.D.

LXX, the symbol for the Greek translation of the OT called the "Septuagint." ***See also*** Septuagint.

Lycaonia (lik´uh-oh´nee-uh), a district in central Asia Minor located on a plateau north of the Taurus Mountains and bounded by the districts of Cappadocia, Cilicia, Pisidia, Phrygia, and Galatia. Annexed to the district of Galatia ca. 35 B.C., it became, with Galatia, part of the Roman Empire ca. 25 B.C. Three cities of Lycaonia were visited by Paul during his first and second journeys, Lystra, Derbe, and Iconium (Acts 13:51–14:21; 16:1–3). Paul's letter to the Galatians, which reflects the conflict between gentile and Jewish Christians, could well have been addressed to the people residing in the district of Lycaonia. ***See also*** Derbe; Iconium; Galatia; Galatians, The Letter of Paul to the; Lystra. M.K.M.

Lycia (lish´uh), a coastal district in southwestern Asia Minor, bounded to the west by Lydia, to the north by Pisidia, and to the east by Pamphylia. Its principal city, Xanthus (modern Günük), headed a federation of cities and towns populated by a people possibly of Hittite origin, at least from the sixth century B.C. The central sanctuary of the federation was the Letoön, sacred to Apollo.

Ruled successively by the Persians, Alexander the Great, the Seleucids and Ptolemies, and the Romans, the area progressively abandoned the Lycian language and merged into the general Hellenistic culture of the times. According to 1 Macc. 15:23, Lycia was among the recipients of the letter concerning the Romans' alliance with the Jews sent out by the consul Lucius Calpurnius Piso in the second century B.C. The Roman generals Brutus and Cassius sacked Xanthus for money in 42 B.C., but the Roman emperor Claudius made Lycia a province in A.D. 43, and the emperor Vespasian joined it to Pamphylia in A.D. 74.

Paul changed ships at the Lycian port of Patara en route to Jerusalem (Acts 21:1) and again at Myra on his final journey to Rome (Acts 27:5–6). ***See also*** Myra; Paul. C.H.M.

Lydda (lid´uh), a town (Lod in the OT) in the fertile plain of Sharon along an eastern branch of the ancient international highway, the *Via Maris.* This location gave Lydda a certain strategic and commercial importance. First mentioned as Lydda in a Late Bronze Age list of towns in Canaan conquered by Thutmose III of Egypt (1490–1435 B.C.), the town was rebuilt by the Benjaminites (1 Chron. 8:12) and, after the return from Exile, was one of the places resettled (Ezra 2:33; Neh. 7:37; 11:35). At first outside the boundaries of Judea in the Hellenistic period, it was given to Jonathan the Hasmonean as a purely Jewish town ca. 145 B.C. (1 Macc. 11:34). In the A.D. 66–70 war of the Jews against the Romans, the city was burned by Cestius Gallus's contingent on their way to attack and destroy Jerusalem. An early Christian community

lived in Lydda, and there Peter healed the paralyzed man Aeneas (Acts 9:32–35). ***See also*** Aeneas. M.K.M.

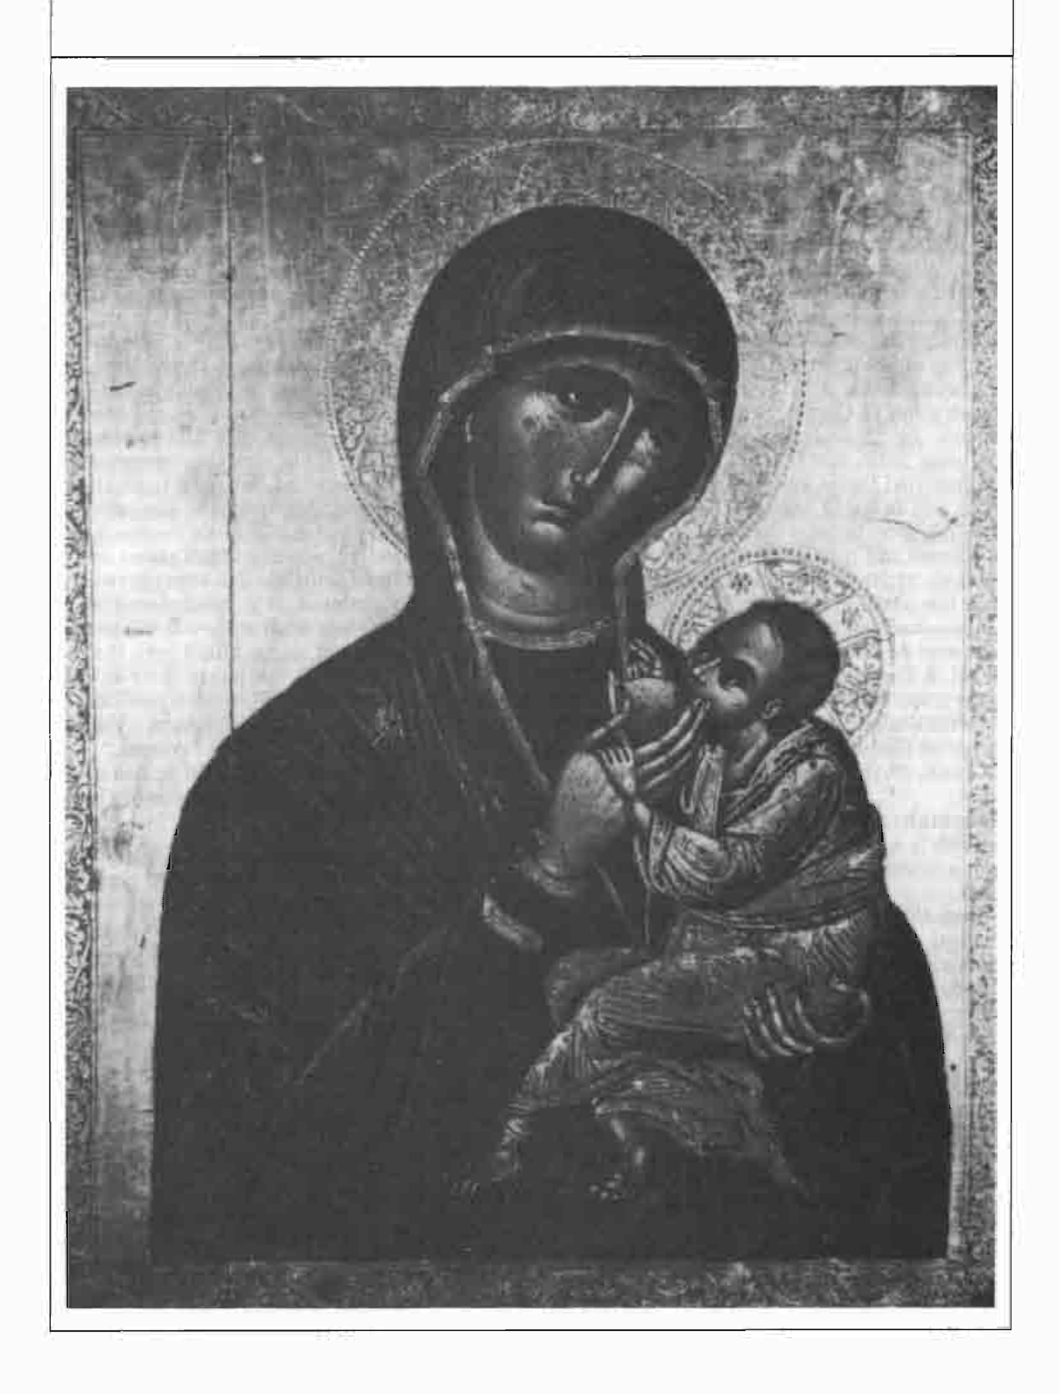
Lydia (lid´ee-uh). **1** An area in south-central Asia Minor, whose most famous king was Croesus (sixth century B.C.). Successively occupied by the Persians, Alexander the Great and his successors, and the Romans who incorporated it into the province of Asia, it is mentioned in 1 Macc. 8:8. Thyatira, Sardis, and Philadelphia (see Rev. 2:18–3:13) were located in Lydia. **2** According to Acts 16:12–15, Paul's first convert in Europe (at Philippi in Macedonia). Lydia was apparently a traveling merchant who sold luxurious purple-dyed cloth for a living. Perhaps she was a freedwoman and her name was given because she came from Thyatira, in the district of Lydia. As a Gentile, Lydia apparently had been attracted to the Jewish way of life in the synagogue, perhaps while she lived in Thyatira. She had a kind of "associate" status with the Jews as a "worshiper of God," and her attachment to Judaism was strong enough that she maintained the ties even when in Philippi, where Judaism appears to have been weak (the account in Acts suggests that there were not enough Jews to form a synagogue, since they met by the river outside the city). Lydia met Paul and, along with her household, was converted to Christianity. According to Acts, she had sufficient means to give extended hospitality to Paul and Silas in her home (see Acts 16:15, 40), even though she may have been a widow. The Philippian church perhaps initially met in her home. Lydia's stay in Philippi may not have been permanent; she is not mentioned in Paul's Philippian correspondence. ***See also*** Paul; Philippi; Purple; Thyatira. A.J.M.

lying, the act of telling falsehoods as truth. Israel is exhorted against using God's name for false oaths and lying on the witness stand in the Ten Commandments (Exod. 20:7, 16; Deut. 5:11, 20). Witnesses who testify falsely will receive the punishment that would have been meted out to their accused (Deut. 19:15–21). Indeed, all falsehoods are prohibited by the Torah (Exod. 23:7; Lev. 19:11). Persons who lie, and thereby defraud their neighbor, must pay restitution for the property loss plus a fine to the owner as well as bring a sacrificial offering before they are forgiven by God (Lev. 6:1–7). Lying is thus an abomination to God and his faithful (Prov. 12:22; Ps. 119:163), for God never lies (Num. 23:19; 1 Sam. 15:29).

False prophets are singled out for particular condemnation (Isa. 9:15; Jer. 23:9–32; Ezek. 13) since their lies may influence the people to oppose God's will. The penalty for false prophecy is death (Deut. 18:20–22; Jer. 28).

In the NT, the "father of lies" is the devil (John 8:44), and Paul condemns those who worship idols because they have exchanged the truth about God for a lie (Rom. 1:25). ***See also*** Perjury. J.U.

lyre. ***See*** Music.



Lysanias (li-say´nee-uhs), identified in Luke 3:1 as tetrarch of Abilene in the days of John the Baptist. Luke gives the date as the fifteenth year of Tiberius (i.e., A.D. 28 or 29), but the only Lysanias otherwise known as a ruler in the region died in 36 B.C. Thus, unless there was another Lysanias, Luke is in error. ***See also*** Abilene.

Lysias, Claudius. ***See*** Claudius Lysias.

Lystra (lis´truh), a city in the region of Lycaonia, about twenty-five miles south-by-southwest of Iconium in central Asia Minor. Its location was unknown until 1885, when a Roman altar was found, still in place, inscribed with the city's Latin name ("Lustra") indicating that it was a Roman colony. Lystra remains unexcavated, but surface finds indicate settlement as early as 3000 B.C. Ca. 6 B.C., Augustus made the city a Roman stronghold against mountain tribes in the region. The Lycaonians had a district language, and a temple to Zeus graced the city of Lystra (Acts 14:11–13). Paul and Barnabas stopped here during the first journey and were mistaken for gods (Acts 14:6–23), and Paul returned later with Silas, when he recruited Timothy as a companion (Acts 15:40–16:4). ***See also*** Lycaonia; Timothy. Opposite: The Virgin Mary and Child; Greek icon, ca. 1600.

M

M, a symbol designating material found only in the Gospel of Matthew; it also designates the hypothetical source of this material. The Matthean narratives dealing with Jesus' birth and postresurrection appearances are included in this material. ***See also*** Synoptic Problem, The.

Maacah (may'uh-kuh; sometimes Maachah in the KJV; meaning uncertain). **1** A small state south of Mt. Hermon, apparently encompassing the northern half of the Golan Heights, bounded by the other non-Israelite state of the Golan, Geshur, on its south. The Transjordanian tribes of Israel (Reuben, Gad, the half-tribe of Manasseh) failed to conquer Maacah and Geshur (Josh. 13:11, 13; cf. 12:5; Deut. 3:14). Subsequently, the king of Maacah joined the Ammonites and Arameans in their unsuccessful war against David (2 Sam. 10:6, 8; 1 Chron. 19:7). Following its defeat, Maacah probably became tributary to David (2 Sam. 10:19). Maacah and Geshur were evidently absorbed into the expanding Aramean kingdom of Damascus after the time of Solomon. **2** The concubine of Caleb (1 Chron. 2:48). **3** The wife of Machir, Manasseh's son (1 Chron. 7:15–16). **4** The wife of Gibeon, or Jehiel, one of Saul's ancestors (1 Chron. 8:29; 9:35). **5** A princess of Geshur who married David and was the mother of Absalom and Tamar (2 Sam. 3:3). **6** The daughter of Absalom, who became the favorite wife of King Rehoboam and mother of Abijah (1 Kings 15:2; 2 Chron. 11:20–22), whom Asa finally deposed from her position of queen mother because of her involvement in idolatry (2 Chron. 15:16). **7** A son of Nahor, Abraham's brother (Gen. 22:24). **8** The father of Achish, king of Gath (1 Kings 2:39). **9** The father of Hanun who was one of David's mighty men (1 Chron. 11:43). **10** The father of Shephatiah, one of David's officials (1 Chron. 27:16). D.A.D.

Maaseiah (may'uh-see'yah; Heb., "the work of Yahweh"), a very popular Israelite name. More than a dozen Maaseiahs are mentioned in the Bible.

From the pre-exilic period: **1** One of David's levitical musicians (1 Chron. 15:18, 20). **2** A commander who joined Jehoida's temple conspiracy to make Joash king (2 Chron. 23:1). **3** An officer under King Uzziah (2 Chron. 26:11). **4** King Ahaz's son who was killed in the war with Israel (2 Chron. 28:7). **5** The governor of Jerusalem commissioned by Josiah to repair the Temple (2 Chron. 28:7). **6** The father of the priest Zephaniah (Jer. 21:1; 29:25; 37:3); he may be the same as 5. **7** The father of the false prophet Zedekiah (Jer. 29:21); he may be the same as 5. **8** The son of Shallum and keeper of the threshold (Jer. 35:4).

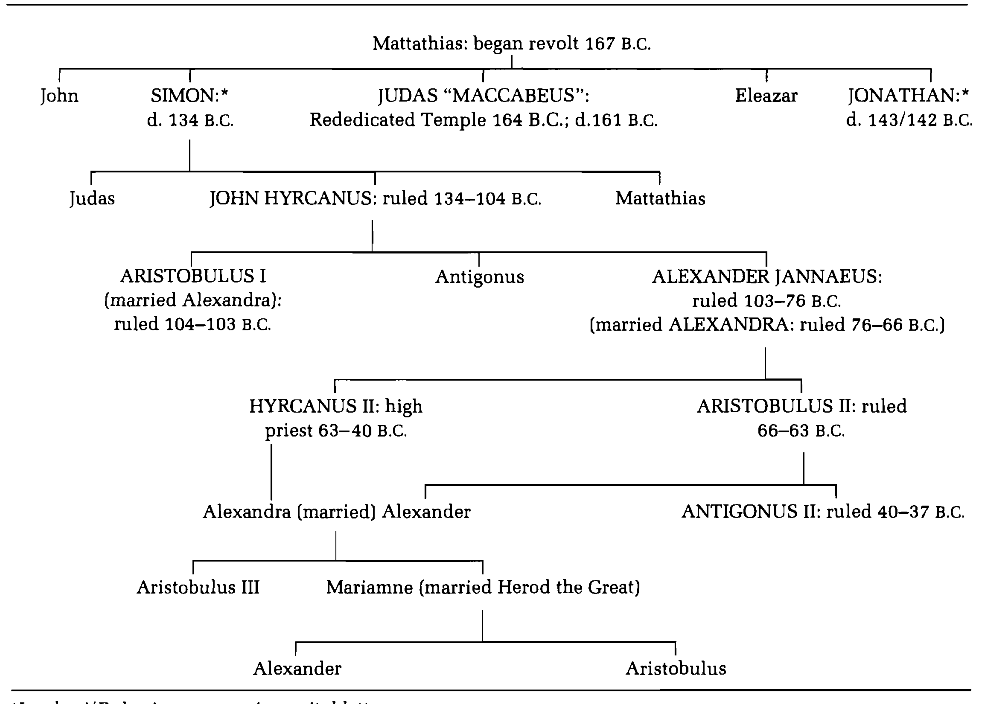
From the postexilic period: **9** Four Israelites, three of whom were priests, who agreed to put away their foreign wives (Ezra 10:18, 21, 22, 30). Two of these are probably the priests who participated in the dedication of Nehemiah's wall (Neh. 12:41–42). **10** Six other persons mentioned in Nehemiah, some of whom may be identical (3:23; 8:4, 7; 10:25; 11:5, 7). J.J.M.R.

Maccabees (mak'uh-beez), a family (properly the Hasmoneans) that provided military, political, and religious leaders for Judea during much of the second and first centuries B.C. The events leading to their rise to prominence were related to attempts by Antiochus IV Epiphanes, Seleucid king of Syria, to foster Hellenism in Judea by tyranically suppressing Judaism (see 1 Macc. 1–2; 2 Macc. 5–7). While many Jews, primarily members of the urban upper classes and including members of the Temple priesthood, supported hellenization, many others opposed it, and some, such as the group called "Hasideans" (1 Macc. 2:42; 7:13; 2 Macc. 14:6), fought actively against it.

Antiochus decreed that sacrifice to the Greek deities be offered in every Judean city and village, and, on the fifteenth day of the month Kislev (November/December) in the year 167 B.C., caused a pagan altar to be built on the Temple altar at Jerusalem, where, on the twenty-fifth of the same month, the first sacrifice to Zeus was made. (This was the "abomination that makes desolate" of Dan. 11:31; 12:11; see also 1 Macc. 1:54; 2 Macc. 6:1–5.) The arrival of officers to carry out Antiochus's decrees at the village of Modein, where an aged priest named Mattathias lived with his five sons, gave occasion for the outbreak of a spontaneous revolt that was to turn into a full-scale war. When Mattathias, in an act of anger, killed both the first Jew who approached the pagan altar to offer sacrifice and the royal official who presided, he and his sons (John "Gaddi," Simon "Thassi," Judas "Maccabeus," Eleazar "Avaran," and Jonathan "Apphus") were forced to flee to the hills. There they became the nucleus of a grow-

The earliest known representation of the Jewish menorah is depicted on a bronze coin minted during the reign of the Maccabean king Antigonus II, 40–37 B.C.

ing band of rebels against Antiochus. Mattathias died soon after the beginning of the revolt, leaving military leadership in the hands of Judas, whose surname "Maccabeus" (probably from the Aramaic word *Maqqabah,* meaning "hammer") became the source of the popular name given to the family and its followers.



Under Judas's brilliant leadership, what had begun as a guerrilla war turned into full-scale military engagements in which smaller Jewish forces managed to defeat much more powerful Syrian armies. Among Judas's most notable achievements were the recapture of Jerusalem (except for the Akra fortress, where the Syrian garrison continued to hold out) and the rededication of the Temple, after the defiled altar had been demolished and rebuilt. The date of the rededication, 25 Kislev of 164 B.C., with the attendant eight-day festivities, has since that time been celebrated annually as Hanukkah or the "Feast of Dedication" (see John 10:22). Antiochus Epiphanes' death also took place in 164, and, for a time, Judas continued successfully to press what was now a war for independence. His last great victory was over the forces of Nicanor at Beth-horon, on 13 Adar (Feb./March) of 161 B.C. In the autumn of the same year, Judas was killed in battle against the vastly superior army of Bacchides, under whose occupation the "pro-Greek" party gained ascendancy in Jerusalem.

The Maccabees, although set back by Judas's defeat and death, continued to fight under Jonathan, who sided with Alexander Balas against Demetrius in the ongoing struggle for succession to the Seleucid throne. While Jonathan succeeded for a time in reestablishing the ascendancy of his party in Judea, he was treacherously captured and later murdered by Tryphon in 143 or 142 B.C., leaving the leadership to Simon, who, by this time, was the only remaining son of Mattathias.

From the Syrians, Simon gained *de jure* recognition of the *de facto* independence of Judea achieved by his brothers. From the Jews, he received legitimation of the Hasmonean house as their political and religious leaders. On 18 Elul (September) of 140 B.C., in decrees that were publicly displayed on bronze tablets in the Temple, Simon was granted the hereditary titles of high priest, commander-in-chief, and ethnarch of the Jews. The Hasmonean dynasty had officially begun. In 134 B.C., Simon was murdered, along with his sons Judas and Mattathias, by his son-in-law Ptolemy, in a bid for power by Ptolemy.

Simon's remaining son, John Hyrcanus, after foiling Ptolemy's plan, was confirmed as high priest and ruled with distinction for thirty years (134–104 B.C.). During his rule, the Hasmonean state achieved its greatest territorial expansion and political power. At this time, the names

THE MACCABEES: A FAMILY TREE

**Leaders'/Rulers' names are in capital letters.*

"Pharisees" and "Sadducees" make their first appearance, designating rival parties within the Jewish community, and Hyrcanus's break with the former and support of the latter caused much acrimony.

Apparently, the first of the dynasty to assume the title of king was Aristobulus I (104–103 B.C.), who is reported, upon the death of John Hyrcanus his father, to have imprisoned three of his brothers, allowed his mother to starve in prison, and, later, to have caused the death of another brother. All of this was in order that he might assume sole power, contrary to the wishes of his father.

After the death of Aristobulus of a painful illness, his widow, Alexandra, freed the brothers and married one of them, Alexander Jannaeus, whose twenty-seven years of rule (103–76 B.C.) were marred externally by war and internally by conflict. Alexandra herself took the throne in 76, making her son Hyrcanus II high priest. Reversing the position of her husbands and father-in-law, she was favorable to the Pharisees, who now gained the upper hand over the Sadducees.

After Alexandra's death in 66 B.C., her sons, Aristobulus II and Hyrcanus II, became engaged in a struggle for power, in which Antipater, the military commander of Idumea, played a central role. Rome finally intervened in 63 B.C., when Pompey's legions captured Jerusalem. Aristobulus was taken to Rome as a prisoner to be paraded in Pompey's triumph, and Hyrcanus was left to rule in Jerusalem, no longer as king but as high priest, over a reduced territory (63–40 B.C.).

In a period of frequent intrigues and political upheavals, in which Antipater the Idumean and his son Herod played major roles, the Maccabean family came to an end with the execution of Antigonus II, who had ruled briefly (40–37 B.C.) with Parthian support. The future was with Rome and with Herod, who married Mariamne (granddaughter of both of Alexandra's sons) and later put her sons, other members of the family, and even Mariamne herself to death. ***See also*** Antiochus; Antipater; Hasmoneans; Herod; Seleucids, The. F.O.G.

Maccabees, the First Book of the, a history of the Maccabean revolt from the accession of Antiochus IV Epiphanes to the Seleucid (Syrian) throne in 175 B.C. until the death of Simon, one of the leaders of the Jewish resistance and then high priest and ethnarch, in 132 B.C. The struggle is the point of a clash between Hellenistic culture and the exclusivism of Judaism. The book was composed in Hebrew, sometime after the death of John Hyrcanus, Simon's son, in 104 B.C. but before the beginning of Roman rule in Palestine in 63 B.C. It is the primary source for the history of the period. The original Hebrew is no longer extant; however, the book has been preserved in Greek as a part of the Septuagint. It is considered one of the Apocrypha by Protestants, while Catholics classify it as one of the deuterocanonical writings.

The purpose of 1 Maccabees seems to be to legitimate the Hasmoneans (Maccabees) as rulers of Palestine in consequence of the contribution made to the liberation of Judea from Seleucid rule by the founders of the dynasty, Judas, Jonathan, and Simon, the sons of Mattathias. Maccabee means "the hammer" in Hebrew and is the nickname of Judas, possibly because of the hammerlike blows he dealt the enemy. It is applied more generally to the three brothers as well as to the revolt they led.

The story begins with the Hellenistic "reforms" instituted by the Hellenizers, members of the Jewish aristocracy (the "lawless men" of 1 Macc.), in association with Antiochus IV. These reforms turn Jerusalem into a Greek city-state under Greek law and lead to opposition by a large segment of the Jewish population. Antiochus responds by desecrating the Temple and attempting to extirpate Judaism in Palestine through violence. 1 Maccabees represents his motive as a desire to create a state religion rather than the need to suppress resistance to the new form of government, as in 2 Maccabees. At the forefront of the initial opposition are the *Hasidim* or "pious ones" (the Hasideans in 1 Macc.), the forerunners of the Essenes and the Pharisees. 1 Maccabees plays down their role in the revolt in favor of the

OUTLINE OF CONTENTS

The First Book of the Maccabees

I. Antiochus IV Epiphanes and the desecration of the Temple (175–167 B.C.; chap. 1)

II. Mattathias initiates the resistance (166 B.C.; chap. 2)

III. The struggle under Judas, who liberates the Temple but eventually perishes as a result of renewed efforts by Demetrius I to install Alcimus, one of the Hellenizers, as high priest (166–160 B.C.; 1 Macc. 3:1–9:22)

IV. Jonathan takes up the fight, driving the Syrians from the country, then becoming high priest (150 B.C.) as he takes various sides in the politics of the empire, and finally perishing as a captive (160–143 B.C.; 1 Macc. 9:23–13:30)

V. Simon follows Jonathan, becoming both ethnarch and high priest as the result of the acclamation of the Jewish people, securing virtual independence from the Syrians, and finally falling to an assassin's sword to be succeeded by John Hyrcanus, his son (143–134 B.C.; 1 Macc. 13:31–16:24)

2 MACCABEES

Maccabees—in fact, according to 1 Maccabees it would appear that all efforts not led by Judas, Jonathan, or Simon are automatically doomed to failure. On the other hand, the book of Daniel, which seems to have been produced by the Hasidim during this revolt, plays down the role of the Maccabees (see Dan. 11:34). The Hasidim would have been satisfied with religious freedom, while the Maccabees seek political independence and power. 1 Maccabees seems to be designed to justify their choice, possibly in the face of conflict between the Pharisees and the Hasmoneans in the first years of the following century.

First Mattathias, and then his sons, one after another, lead the resistance to the Syrians with their Greek ways. The Temple is liberated and cleansed in 164 B.C. under Judas, while Jonathan later becomes high priest. Simon finally secures liberty and becomes both high priest and ethnarch before his assassination by Ptolemy, the governor of Jericho, in 132 B.C. Aiding in the fight for independence is a protracted power struggle within the Seleucid Empire after the death of Antiochus IV in 163 B.C. as well as the emergence of Rome as a major power in the near east. These factors are apparent between the lines, although 1 Maccabees attributes the victory to the leaders' reliance on the power of God. The book is filled with allusions to the older biblical histories of Israel, going back to the period of the judges, in order to develop this interpretation. ***See also*** Apocrypha, Old Testament; Daniel, The Book of; Judith; Maccabees; Maccabees, The Second Book of the.

D.W.S.

Maccabees, the Second Book of the, a second history of the Maccabean revolt, written from a different perspective than 1 Maccabees. Where the latter is concerned to praise Judas, Jonathan, and Simon for their role in the liberation of the Jewish people from Seleucid oppression, 2 Maccabees focuses upon the insult to the Temple and its cult, for which it holds the Jewish Hellenizers primarily responsible. Judas Maccabeus is honored as the sole leader of the resistance. The narrative concludes with his defeat of Nicanor, the Syrian governor of Judea (14:12), ending a major threat to the sanctity of the rededicated temple, and Judas is even described at one point as a leader of the Hasideans (*Hasidim*), in curious contrast to their role in 1 Maccabees. The period covered by 2 Maccabees is about 180–161 B.C.

While 1 Maccabees is generally considered historically more reliable where the two are parallel, 2 Maccabees is of value because it describes in greater detail the Hellenistic reform and the origin of the revolt prior to the emergence of the Maccabees, and because it provides greater insight into the history of the Jewish religion. It represents an epitome, or condensation, of a five-volume history written by an otherwise unknown Jason of Cyrene probably sometime after 110 B.C. The original language was Greek, and the condensation has survived as a part of the Septuagint, or Greek version of the OT. Protestants treat it as a part of the Apocrypha, while Catholics classify it as one of the deuterocanonical books.

2 Maccabees is generally termed a "pathetic" history (from Gk. *pathos*, "emotion" or "feeling") because of the way in which it dwells

OUTLINE OF CONTENTS

The Second Book of the Maccabees

I. Two letters from Jews in Jerusalem to the Egyptian Jewish community concerning the new festival of Hanukkah (1:1–2:18)
II. The preface to the epitome (2:19–32)
III. The epitome, or summary, of Jason's history (3:1–15:36)
    A. A threat to the Temple during the high-priesthood of Onias III is thwarted by a supernatural manifestation (3:1–4:6)
    B. The Hellenistic "reforms" (4:7–50)
    C. The desecration of the Temple by Antiochus IV Epiphanes, here pictured as a response to a revolt against the Hellenistic reforms rather than, as in 1 Maccabees, an effort to impose a state religion on the Jews (chap. 5)
    D. Tales of martyrdom (chaps. 6–7; cf. 4 Macc.; *T. Moses* 9; and Wisd. of Sol. 2:12–5:23)
    E. Judas defeats Nicanor's first invasion (chap. 8)
    F. Antiochus is struck down by God and repents upon his deathbed, leading to the purification and rededication of the Temple by Judas (9:1–10:9)
    G. Judas defeats Timothy and Lysias under Antiochus V Eupator (10:10–11:38)
    H. Judas defends Jews in Palestine (chap. 12)
    I. Judas rebuffs an effort by Antiochus V to reinstall Menelaus, high priest during the Hellenistic reforms (chap. 13)
    J. Judas defeats and kills Nicanor (who has undertaken a second campaign) following a vision of the martyred Onias III, the pious high priest, in which Judas receives a sword to defeat his adversaries (14:1–15:36)
IV. The epitomist's conclusion (15:37–39)

upon the deaths of the righteous martyrs or the wicked king in a manner designed to evoke compassionate or contemptuous pity in the reader. The writer develops a theology of history in 6:12–17 that echoes the point of view of the Deuteronomistic school (see Judg. 2:11–23). Because the Jews themselves have profaned the Temple when the Hellenizers Jason and Menelaus used its treasure and vessels to buy the high-priesthood from Antiochus, God disciplines them by permitting Antiochus to desecrate the Temple (throughout the book God's punishment tends to fit the crime—see 4:38; 9:5–6; 13:8). Repentance, however, ensures that God will protect the Jews from their enemies by sending a leader like Judas and by responding from heaven with a manifestation of supernatural power in defense of Temple or people (2:21; 3:22–40; 5:18; 9:5; 10:29–31; 15:22–27). The righteous who perish in the process can expect the resurrection of the dead (7:9–11; 12:44; 14:46) and are able to intercede to heaven on behalf of the living (15:12). Sin offerings on the part of the dead are also possible (12:39–45). 2 Maccabees is thus an important piece of evidence for the development of the idea of the resurrection of the dead in the period between the composition of Isa. 26:19 and Dan. 12:2 (in the fourth or third and the second centuries respectively) and the origin of Christianity. ***See also*** Apocrypha, Old Testament; Judith; Maccabees, The First Book of the; Persecution; Resurrection; Temple, The. D.W.S.

Maccabees, the Third Book of the, a story of attempted genocide and divine deliverance set in the time of Ptolemy IV Philopator (221–203 B.C.). To celebrate his victory over Antiochus III at Raphia, Ptolemy attempts to enter the Temple in Jerusalem, inviting divine intervention. The rebuffed king returns to Egypt seeking to persecute Jews throughout his realm, first through registration and enslavement enforced by threats of death, and finally by transporting them to the hippodrome at Alexandria to be slaughtered by a herd of enraged elephants (cf. Josephus *Against Apion* 2:53–56, for the same story set a century later). The details are at times a chilling reminder of genocide in our own age. God intervenes through two angels (cf. 2 Macc. 3:25–26), and the elephants trample the king's army, leading to Ptolemy's repentance. As in Esther (to which 3 Maccabees bears some close resemblances), the Jews of Alexandria establish an annual festival to celebrate their deliverance.

The book is a "pathetic" history like 2 Maccabees; however, since it is set in the era prior to the Maccabees, it is misnamed. The narrative reaches its high points in the prayers of two priests, which evoke Solomon's Temple prayer in 1 Kings 8, emphasizing the centrality of the Temple and the efficacy of priestly prayers.

OUTLINE OF CONTENTS

The Third Book of the Maccabees

- I. Ptolemy's first threat (1:1–2:24)
  - A. Ptolemy attempts to enter the Temple after victory at Raphia (1:1–15)
  - B. General outcry and prayers of Jerusalem Jews (1:16–29)
  - C. Prayer of the high priest Simon (2:1–20)
  - D. Divine deliverance: Ptolemy is stricken (2:21–24)
- II. Ptolemy's second threat (2:25–4:21)
  - A. Ptolemy orders the registration and enslavement of Egyptian Jews (2:25–4:15)
  - B. Divine deliverance: the registration is thwarted (4:16–21)
- III. Ptolemy's third threat (5:1–7:23)
  - A. A threefold effort to destroy Jews with a herd of enraged elephants (5:1–47)
  - B. General outcry and prayers of Egyptian Jews (5:48–51)
  - C. Prayer of the priest Eleazar (6:1–15)
  - D. Divine deliverance: through the intervention of two angels, the elephants crush Ptolemy's army (6:16–21)
  - E. Ptolemy's repentance and the rejoicing of the Jews (6:22–7:23).

3 Maccabees was composed in a pseudo-classical Greek, probably by a Jew living in Egypt. The concern for the citizenship status of Egyptian Jews suggests a date in the late first century B.C. or possibly during the reign of the Roman emperor Gaius Caligula (A.D. 37–41), when a threat to the temple coincides with a crisis for Alexandrian Jews (see Philo *Embassy to Gaius*). The book has not been in use in the West, but was included in some manuscipts of the Septuagint (the ancient Greek OT) and is considered canonical by Eastern Orthodoxy. It has been included recently in the RSV edition of the Apocrypha because of its importance in the East. ***See also*** Apocrypha Old Testament; Septuagint; Maccabees. D.W.S.

Maccabees, the Fourth Book of the, work composed as a festival oration in memory of the martyrs mentioned in 2 Maccabees 6–7. Its theme is the rule of religious reason and the four cardinal virtues—prudence, temperance, courage, and justice—over the emotions, for which theme the priest Eleazar and the seven brothers with their mother become the prime examples. While the discussion of reason and the virtues reflects Stoic philosophy, the argument is decidedly Jewish, substituting for the Stoic

emphasis on the rule of nature (4 Macc. 5:8–9) obedience to the Mosaic law, which becomes the essence of true wisdom, as in Ecclesiasticus 24:23, and is defended as consistent with nature (4 Macc. 5:25–26).

After a discussion of reason and the emotions, illustrated in the manner of Hellenistic Judaism with biblical examples, 4 Maccabees turns to the story of the violation of the Temple from 2 Maccabees 3. The stories of the martyrdoms follow, longer and more graphic than their sources in 2 Maccabees. In an allusion to Isa. 53:8–12, Eleazar prays that his death may atone for the sins of others (4 Macc. 6:28–29; cf. Mark 10:45). In the climax to 4 Maccabees, the mother (whose role in 2 Maccabees is minimal) commits suicide to avoid defilement, demonstrating that in women as well as men reason and courage are capable of triumphing over emotions. The martyrs choose the eternal life of the soul in the presence of God over the preservation of this life (cf. Wisd. of Sol. 3–5), in contrast to 2 Maccabees, which anticipates the resurrection of the body and the restoration of physical life.

Composed in a florid Asiatic style of Greek, 4 Maccabees may come from the middle of the first century A.D., perhaps from the time of the Roman emperor Gaius Caligula (A.D. 37–41). Its place of composition is uncertain, but may have been Alexandria, Jerusalem, or Antioch. Although it has not been in use in Western Christianity, the book was included in some manuscripts of the Septuagint (the ancient Greek OT), has influenced the piety of Eastern Christianity, and is presently printed in an appendix to Greek Orthodox Bibles. While previously included among the Pseudepigrapha, it has been added to the RSV edition of the Apocrypha because of its importance in the East. ***See also*** Apocrypha, Old Testament; Septuagint; Maccabees; Wisdom of Solomon, The. D.W.S.

OUTLINE OF CONTENTS

The Fourth Book of the Maccabees

I. Introduction: reason rules over the emotions (1:1–3:18)
II. Seleucid threats to the Temple and to Judaism (3:19–4:26)
III. The story of Eleazar's martyrdom (5:1–7:23)
IV. The story of the seven brothers (8:1–18:19)
   A. The resistance of the seven (8:1–9:9)
   B. The martyrdom (9:10–12:19)
   C. The rule of reason in the brothers' martyrdom (13:1–14:10)
   D. The martyrdom of their mother (14:11–18:19)
V. Conclusion (18:20–24)

Macedonia (mas'uh-doh'nee-uh), a region in the northeastern part of the Greek peninsula. Originally the name designated only the great river plain at the head of the Thermaic Gulf. Here invaders of Dorian extraction established a united kingdom about 640 B.C. In the following three centuries this kingdom contended against its immediate neighbors (Illyrians, Thracians, and northern tribal groups) and against outside powers such as Persia, Athens, and Sparta. Although strongly influenced by Hellenic culture especially after 450 B.C., it retained its independence and slowly expanded, especially into the mountainous north. In the fourth century B.C. Philip II (359–336) annexed these contested northern areas and added the Strymon Valley and the Chalcidicean Peninsula to his kingdom to form the most powerful state in Greece. His son, Alexander III ("the Great") used this in turn as a base from which to conquer a vast empire stretching to Egypt and India. After Alexander's death (323 B.C.) this empire broke apart, and Macedonia itself experienced considerable dynastic strife during the next century and a half. Rome decisively defeated the Macedonian army at Pydna (168 B.C.) and in 148 B.C. established Macedonia as a province with its capital at Thessalonica. Roman engineers began immediately (146 B.C.) to construct an arterial military and commercial road, the Via Egnatia, from the Adriatic coast through Pella, Thessalonica, Amphipolis, Philippi, and Neapolis in Macedonia to Byzantium in Asia Minor; portions of this still survive. The apostle Paul probably traveled the Neapolis-Thessalonica segment (Acts 16:11–17:1). During the struggle for power at the end of the Roman Republic Macedonia suffered much devastation from the armies that traversed it, and major battles were fought at nearby Pharsalus (48 B.C.) and at Philippi (42 B.C.). Economic recovery began

under Emperor Augustus (27 B.C.–A.D. 14) and by A.D. 44 Macedonia no longer required direct imperial rule. It was then governed by a senatorial proconsul.

Alexander the Great's exploits are noted in 1 Macc. 1:1 and 6:2. Haman's identification as a "Macedonian" in the LXX version of Esther 9:24 (see also LXX Addition E, v. 10) probably serves to link this archetypal anti-Semite with the Greek archenemy of the Jews, Antiochus IV. Paul made his first European converts to Christianity in Macedonia (Acts 16:9–17:14). He himself recalls his initial journey (ca. A.D. 50) from Philippi to Thessalonica and then to Athens (1 Thess. 2:2; 2:17–3:2; Phil. 4:15–16) and says that he preached the gospel "as far round as Illyricum" (Rom. 15:19). He also mentions a second visit to Macedonia (ca. A.D. 55; 2 Cor. 2:13; 7:5; see also Acts 20:1–6). 1 Thess. 4:10 seems to presuppose the existence of other early Christian communities in Macedonia besides Philippi and Thessalonica; on the founding of the church at Beroea see Acts 17:10–12. ***See also*** Alexander; Illyricum; Paul; Philippi; Thessalonica. R.A.W.

Machaerus (muh-kee´ruhs), a fortress-palace some thirty-six hundred feet above the Dead Sea, about fifteen miles southeast of the mouth of the Jordan River. A fortress built on the site by Alexander Jannaeus (103–76 B.C.) was destroyed by Pompey's general Gabinius; it was then extensively rebuilt by Herod the Great to include a palace within the fortress. Because of its proximity to Arabia and its location above the north-south road from the Red Sea to Damascus, the site was regarded as strategically important by Herod Antipas, tetrarch of Galilee and Perea (4 B.C.–A.D. 39). According to the Jewish historian Josephus, Machaerus was the scene of the imprisonment and death of John the Baptist. Another account of John's imprisonment and death is found in Matt. 14:3–12 and Mark 6:17–29. ***See also*** John the Baptist.

M.K.M.

Machir (may´kihr; possibly Heb., "hireling" or "property [of God]"), a name held by two biblical personages. **1** The son of Ammiel from Lo Debar who harbored Mephibosheth, Saul's grandson (2 Sam. 9:4–5), and was an ally of David (2 Sam. 17:27). **2** Either the oldest (Josh. 17:1–2) or only (Num. 26:29) son of Manasseh. His mother was Aramean (1 Chron. 7:16) and his wife was named Maacah (1 Chron. 7:16). Some traditions claim that his sons conquered the Transjordan region of Gilead (Num. 32:39–40; Deut. 3:15) or even both Gilead and Bashan (Josh. 17:1), while other traditions suggest that they lived west of the Jordan (Judg. 5:14, 17). M.Z.B.

Machpelah (mak-pee´luh; Heb., "double"?), the burial place of Sarah, Abraham, Isaac, Rebekah, Jacob, and Leah. It is identified both as "the cave of Machpelah" (Gen. 23:9; 25:9) and "the field of Machpelah" (Gen. 23:17, 19; 49:30; 50:13); Abraham purchased it from Ephron the Hittite for four hundred shekels of silver. The account of the purchase is given in meticulous detail in Genesis 23 (Priestly document), emphasizing that their burial place was the only land that the patriarchs owned in Canaan. According to the biblical tradition, the field with its cave was located east of Mamre (Gen. 23:17), a city identified with Hebron (Gen. 23:19).

There is a long history of reverence for the place among Jews, Christians, and Moslems. The tradition concerning the site is mentioned in *The Testaments of the Twelve Patriarchs, Jubilees* (46:4–10), and in Josephus *Antiquities* (1.21.1; 2.8.2). Acts 7:15–16, on the other hand, places the tomb "that Abraham had bought" not in Hebron, but in Shechem. Josephus (*War* 4.9.7) reports that there were in his time impressive monuments of Abraham and the other ancestors in the town of Hebron. Herod had built a wall around the traditional burial place and probably had set up the monuments that Josephus describes. The Bordeaux Pilgrim (A.D. 333) describes a beautiful stone wall surrounding the cave in which the patriarchs were entombed. Other early travelers report seeing a church, and later ones, such as Muqsaddasi (A.D. 985), give accounts of the mosque and the cenotaphs. The Crusaders occupied the site and either converted the mosque to a church or constructed a new building. In the present day the site of ancient Machpelah is in the town of Hebron itself, and the walls enclose both a mosque and a synagogue. The surrounding walls, some 8 to 9 feet thick, are 197 feet long and 111 feet wide. Most authorities are convinced that this wall—except for the upper courses—is the one built by Herod. ***See also*** Hebron; Patriarch.

G.M.T.

Madeba (mad´uh-buh). ***See*** Medeba.

madness, a state of irrationality. In biblical times it was generally attributed to some other spirit or power taking over a person's mind. Saul is the primary example of someone afflicted with madness in the OT. When God's spirit left King Saul to rest on David, Saul was invaded by an "evil spirit" (1 Sam. 16:14–17). This spirit caused outbreaks of violence against David in which Saul attempted to kill him (1 Sam. 18:10–11; 19:9). However, God's favor toward David was shown in that no matter what Saul did, David continued to prosper. Psychologists might be tempted to diagnose Saul as manifesting symptoms of paranoia and manic depression. However, the biblical writer is interested in the story as evidence of the powerful, though sometimes dark and frightening, work of God's plan for

Israel. God's hand was behind the evil spirit that invaded Saul much as it was behind the outbreak of Saul's prophetic ecstasy (1 Sam. 10:6, 10).

This biblical picture of "madness" has some features in common with the frenzied personalities of Greek tragedy. There madness is also a mysterious combination of divine powers turned against the hero and internal forces that he or she cannot control or account for. Some physical symptoms of madness are roving about, wild rolling of the eyes, sweating, and foaming at the mouth. Madness is accompanied by terrifying visions. Mad persons do things that are contrary to all "good" human behavior, such as harming their friends and aiding their enemies. Stoning appears to have been the archaic response to the mad person. Perhaps the response was based in a magical attempt to heal the "contagion" brought into society by such unnatural behavior.

In the NT madness takes the form of demonic possession (e.g., Mark 5:1–13; 9:14–29). However, it was also brought up as a charge against Jesus by those who objected to his violation of their social or religious standards (e.g., Mark 3:21–22, because of his activity as an exorcist; John 8:48; in Matt. 11:18 it is also an accusation against John the Baptist). ***See also*** Devil; Magic and Divination; Saul. P.P.

Magadan (mag´uh-dan). ***See*** Magdala.

Magdala (mag´duh-luh), a thriving rural community (modern Tarichaeae) on the western shore of the Sea of Galilee between Capernaum to the north and Tiberias to the south. It appears to have been more romanized than Capernaum and to have contained a small synagogue. Mary "from Magdala" figures among Jesus' women disciples (Luke 8:2) and was among the first witnesses to his resurrection (John 19:25; 20:1, 18; Matt. 27:56, 61; 28:1; Mark 15:40, 47; 16:1; Luke 24:10).

Magdalene, Mary. ***See*** Mary.

magi (may´jī). ***See*** Wise Men.

magic and divination, means by which humans attempt to secure for themselves some action or information from superhuman powers. Magic is an attempt by human beings to compel a divinity, by the use of physical means, to do what they wish that divinity to do. Divination is an attempt to secure information, also by the use of physical means, about matters and events that are currently hidden or that lie in the future. The word "magus," from which the word "magic" is derived, came originally from Persia, where it designated a priestly class. From there, it spread to all nations in the Mediterranean world. Magical practices are as old as the written records of humanity, and, in the world of the Bible, they can be found in ancient Mesopotamian, Egyptian,

Daniel kneels before the angel Gabriel, who interprets a vision (Dan. 8); woodcut from the Cologne Bible (1478–80). Divination and the practice of magic are mentioned in the Bible but are also strongly opposed in both OT and NT.

and Greek documents. Although a systematic presentation of the theory of magic did not appear in the Greco-Roman literature until the third and fourth centuries of the Christian era, the general principles upon which the practice of magic was based were more or less accepted by all. These principles may be summarized briefly as follows:

A host of intermediary beings called demons exist between gods and humans. Depending on their proximity to the gods, demons possess divine power in diminishing measures. Those closest to the gods have bodies of air; those closest to humans, bodies of steam or water. Because of this descending order, the unity of the cosmos can be preserved. Otherwise, human and divine would be irreparably separated and no communication between the two would be possible. Everything is connected through the demons who mediate between the divine and the material. Magic rests upon the belief that by getting hold of demons in physical objects, the divinity can be influenced. The magician's art is to find out which material (metal, herb, animal, etc.) contains which divinity and to what degree. By using the element or combinations of elements containing a particular divinity in its purest form, a sympathetic relationship with the divinity will be established. If, however, elements offensive to a divinity are used, the result will be antipathetic. Thus magic can achieve either blessing or curse. The magician knows the secret and knows how to use it in the correct way with the best results.

Magic and the Biblical World: Because of the pervasive presence in the biblical world of magical beliefs and practices, one should not be surprised that such practices seeped into the lives of the Israelites and the early Christians. Even where magic was not intended, the need to speak about divine-human contact inevitably made use of the same vocabulary and concepts used in magic.

The most awesome power seemed to rest in the name of a divinity, because the name and its bearer were in the closest relationship to each other. The name of God, *YHWH,* was, therefore, never pronounced (Exod. 3:13–15). Jesus "has a name inscribed which no one knows but himself" (Rev. 19:12). The divine name could invoke blessing and drive away evil, so baptism in the early church was administered "in the name" of God and Jesus (Matt. 28:19), and healings were accomplished in Jesus' name (Acts 3:6).

It was believed that great power rested in those holy men who were in close proximity to God. Physical contact with such a person would have beneficial consequences. Thus Elijah could heal the son of the widow of Zarephath by stretching "himself upon the child three times" (1 Kings 17:17–24). The same miracle was repeated by Elisha with the son of the Shunamite (2 Kings 4:31–37). Jesus touched the hand of Peter's mother-in-law and she was healed (Matt. 8:14–15); he touched the eyes of the blind men and they received their sight (Matt. 9:29). The Holy Spirit was given through the laying on of the apostles' hands; this was the secret the magician Simon wished to learn (Acts 8:9–24). Anything in connection with such holy men absorbed and transmitted a portion of their power. Elijah's mantle parted the waters of the Jordan, and when Elisha put it on, Elijah's spirit rested on him (2 Kings 2:8–15). The garment of Jesus radiated and transmitted healing power (Mark 5:28–29), as did the handkerchiefs and aprons that people carried away from the body of Paul (Acts 19:11–12). Some believers even attributed beneficial properties to the shadow of Peter (Acts 5:15).

Of course, contact with "unclean" objects would have a negative effect; hence the many purificatory rites. Purification was achieved by the use of the correct rites and materials, among which particular power was attributed to blood (Lev. 14:25), water (Lev. 15:5), fire (Num. 31:23), but also to hyssop, scarlet thread, and many other agents (Ps. 51:7; Num. 19:18; Lev. 14:4). Since demonology is an integral part of the theory of magic, the biblical references to demons and exorcisms will reflect this kind of understanding.

Magic could be practiced on various levels. Accordingly, the Bible uses several words to refer to this occupation. On the highest level were the "Magi," the "wise men," of Matthew 2 and the "Chaldeans" of Daniel 1 and 2 who had priestly functions. Daniel was made "chief of the magicians" because "the spirit of the holy gods . . . light and understanding and wisdom, like the wisdom of the gods, were found in him . . . " (Dan. 5:11). On the lowest level were the "imposters" (2 Tim. 3:13) who played their tricks as do circus magicians today. Between these were the sorcerers, enchanters, and charmers who could cast spells and knew how to use herbs, potions, and drugs.

One of the earliest references to magic is the confrontation between Moses and the Egyptian magicians (Exod. 8:5–9:12). In the plains of Moab, Balak offered a great amount of money to Balaam to put a curse on the Israelites (Num. 22); curse and blessing are also in Deborah's song (Judg. 5). In the scapegoat ritual, by laying his hands upon the head of the goat, Aaron transmitted the people's sins to the animal (Lev. 16:2–22). Near the land of Edom, a bronze serpent made by Moses and placed on a pole was instrumental in saving the lives of the people (Num. 21:4–9; 2 Kings 18:4; cf. John 3:14–15).

Methods of Divination: With divination, in contrast to magic, one does not seek to alter the course of events, only to learn about them. The ancient world developed many devices by

which the veil of secrecy covering future events could be lifted. Oracles, such as the Pythia in Delphi, the oak trees of Dodona, or the Memnon of Thebes, were media chosen by the gods through which direct messages came. The future could also be divined by interpreting the signs that the gods sent, such as the flight of birds, eating habits of chickens, and the condition of the entrails, especially the liver, of sacrificial animals (such divination was practiced in the recently excavated city of Mari on the upper Euphrates, but see also Ezek. 21:21). Calling up the dead (necromancy) has survived to our day, as has the interpretation of dreams, which were believed to be major vehicles by which the gods sent messages. The casting of lots to determine the will of the gods was practiced all through the recorded history of humankind. So we read that God appeared to Abraham at the oak tree of Moreh (Gen. 12:6–7) and that the flight of arrows foretold a victory to King Joash (2 Kings 13:14–19). Saul resorted to necromancy when "the Lord did not answer him, either by dreams, or by Urim, or by prophets," and he had to consult the medium of Endor to bring up Samuel for him (1 Sam. 28). Joseph interpreted the dreams of Pharaoh (Gen. 41); Daniel those of Nebuchadnezzar (Dan. 2, 4). Joseph, husband of Mary, received messages in dreams (Matt. 1:20–21; 2:13), as did the wise men (Matt. 2:12), and Pilate's wife (Matt. 27:13).

This selection of references does not exhaust the importance of dreams, to which we may add visions (e.g., the vision of Samuel in the Temple, 1 Sam. 3; Peter's vision in Acts 10) which were so widespread that the word is used in the RSV more than one hundred times. During the early history of Israel, it was an accepted practice to "inquire of the Lord" (Judg. 1:1–2; 1 Sam. 10:22). This expression implies an oracle (similar to Delphi in Greece) where a question could be asked and a reply given by God through a medium. The Urim and Thummim (or ephod) were also oracular media, but answers were restricted to "yes" or "no" (1 Sam. 23:9–12; 30:7–8; Num. 27:21). The same results could be gained by casting lots (Lev. 16:8; Num. 26:55–56), and the OT preserves stories that show the same thing was done by Phoenicians (Jon. 1:7), Persians (Esther 9:24–26), and Romans (Matt. 27:35). The last reference to this sort of divination in the NT comes from the time when the eleven apostles replaced Judas with Matthias by praying and casting lots (Acts 1:26).

In spite of this seeming popularity, however, both magic and divination were strongly opposed in both OT and NT (Isa. 8:19; 44:25; 47:12–15; Deut. 18:10–12; Acts 8:9–24; 13:6–11; 19:13–20; Rev. 21:8; 22:15). The Bible teaches that humans have direct access to God, and the NT especially emphasizes that the role of demons and other intermediaries was made superfluous by Jesus Christ. ***See also*** Amulet; Dreams; Elijah; Miracles; Oracle; Simon Magus; Urim and Thummim. S.B.

magicians. ***See*** Magic and Divination.

magistrate, an official who exercised ordinary administration of the Roman Empire's cities. Magistrates quieted sedition (Luke 12:11), settled property disputes (Acts 16:20–22) and debts (Luke 12:58), and policed and jailed felons (Acts 16:35–38).

Magnificat (mag-nif´uh-kat; from the Lat. for "magnify"), the name of the best known of the several psalms that are incorporated into the birth narrative in Luke's Gospel (chaps. 1–2). The psalm (Luke 1:46–55), spoken by Mary, begins "My soul magnifies the Lord, and my spirit rejoices in God my Savior." In some early traditions of the text and from the witness of several of the early church fathers, Elizabeth, the mother of John the Baptist, is reported to have been the one who uttered this beautiful poem. Because the poem is obviously modeled after the song of Hannah (1 Sam. 2:1–10), many interpreters have argued that it was originally intended to be understood as Elizabeth's and that it originated among followers of John the Baptist. In all of the extant Greek manuscripts, however, and in most of the traditions of the church, the poem has been understood to belong to Mary, the mother of Jesus. Within the setting of the Lucan structure, it appears most likely that Mary is the one to whom it should be attributed.

The poem consists basically of praise to God: for selecting her (Mary) to be a participant in the mighty divine act; for God's care for the lowly, poor, and powerless (a strong Lucan theme and emphasis); and for God's bringing to fulfillment the promise made to Abraham in and through the coming of Mary's son.

The poem is quite beautiful and has been used in various settings in the liturgies of the Christian churches. ***See also*** Elizabeth; Hannah; Hymn; John the Baptist; Mary, The Virgin; Music. J.M.E.

Magog (may´gog). ***See*** Gog.

Magus (may´guhs), **Simon.** ***See*** Simon Magus.

Mahalalel (muh-hal´uh-luhl; Heb., "praise of El [God]"). **1** The son of Kenan and descendant of Seth (Gen. 5:12); the Greek form of the name is Mahalaleel (Luke 3:37). **2** A descendant of Judah of the clan of Perez (Neh. 11:4).

Mahalath (may´huh-lath; Heb., "mild"). **1** The granddaughter of Abraham, the daughter of Ishmael, and one of the wives of Esau (Gen. 28:9). **2** The wife of King Rehoboam of Judah (924–907 B.C.) and the granddaughter of David

(2 Chron. 11:18). **3** A term of unknown significance that occurs in the titles of Psalms 53 and 88. It may be a musical notation, referring to a melody or rhythm pattern, although even that remains speculation. ***See also*** Psalms, The.

Mahanaim (may′huh-nay″im; Heb., "the camp"), a city in Gilead, in the tribal territory of Gad near its border with Manasseh (Josh. 13:26, 30). It was also a levitical city assigned to the family of Merari (Josh. 21:38; 1 Chron. 6:80) and the capital of a Solomonic district (1 Kings 4:14). Strategically situated near the confluence of the Jordan and the Jabbok, Mahanaim was the city in which Ishbosheth and his supporters were based when David became king of Judah after Saul's death (2 Sam. 2:8, 12, 29). Ironically, David himself fled there during Absalom's revolt (2 Sam. 17:24, 27; 19:33; 1 Kings 2:18). Mahanaim's history thus shows it to have been a place of refuge, and this motif probably underlies its mention in Gen. 32:2 as the place where Jacob stayed before his encounter with Esau; when the "messengers of God" met him there Jacob said, "This is the [military] camp [*maḥanēh*] of God" (RSV: "This is God's army!"; cf. also 32:10). The exact location of the site is uncertain. ***See also*** Jabbok. M.D.C.

Mahaneh-dan (may′hun-uh-dan″; Heb., "camp of Dan"), the location in Judah where the Spirit of the Lord began to stir Samson (Judg. 13:25), and where the Danites encamped when they were en route to Ephraim (18:12). The exact location is unknown, but it was in the area of Zorah and Eshtaol (Judg. 13:25), west of Kiriath-jearim.

Mahath (may″hath), a Levite, the father (and grandson?) of Elkanah. He participated in the cleansing of the Temple during Hezekiah's reforms (2 Chron. 29:12) and later shared the responsibility of collecting the Temple offerings (2 Chron. 31:13). He may be the same Levite who belonged to the clan of Kohath (1 Chron. 6:35). Some writers suggest that he is identical with Ahimoth, the son of Elkanah (1 Chron. 6:25), but several different men called Elkanah are apparently grouped together here (1 Chron. 6:23–26; see vv. 34, 35, 36), confusing the proper relationships. ***See also*** Elkanah.

Maher-shalal-hash-baz (may′huhr-shal′al-hash″baz; Heb., "The spoil speeds, the prey hastens"), the second or third son of Isaiah to receive a symbolic name. His name assured Judah that it need not fear Damascus and Samaria, since they would soon be plundered (Isa. 8:1–4).

Mahlah (mah″luh). **1** One of the daughters of Zelophehad of the tribe of Manasseh. She and her sisters appealed to Moses and won the right to inherit their father's property since he had died with no male heirs (Num. 27:1–5; Josh. 17:3). Their appeal led to a statutory ordinance that allowed women the right of inheritance (Num. 7:7–11). A later appeal by other Manassehites who feared the dispersal of tribal lands under such a law brought a modification of the law that required the daughters to marry only within the family group of their tribe to be eligible for the inheritance (Num. 36:1–12). **2** A descendant of Manasseh (1 Chron. 7:18). ***See also*** Zelophehad. D.R.B.

Mahli (mah″li). **1** A Levite mentioned in the Priestly genealogy of Exod. 6:19 as well as in various lists of levitical families (cf. 1 Chron. 6:19, 29; 23:21; 24:26; Ezra 8:18). Num. 3:20, 33–36 reports that the Mahlites, together with the descendants of Mushi's brother, had specific responsibilities in the operation of the tabernacle. **2** Mahli's nephew, the son of Mushi, who was named after Mahli (if the notices in 1 Chron. 6:47; 23:23; and 24:30 are accurate).

Mahlon (mah″lon), the son of Elimelech and Naomi, Ephrathites from Bethlehem of Judah, with whom he emigrated to Moab "when the judges ruled Israel" (Ruth 1:1–2, 5; 4:9–10). He married Ruth, a Moabitess, but died childless. The book named after his widow, Ruth, tells how she ultimately bore a son who was regarded not only as heir to Mahlon's estate but also heir to that of Boaz, Ruth's new husband. The name may mean "sickly, diseased" in Hebrew.

Mahol (may″hol; Heb., "dance"), the father of the wise men Heman, Calcol, and Darda (1 Kings 4:31, Hebrew text 5:11). Some understand the phrase "sons of Mahol" to be a title meaning "members of the orchestra (guild)."

maid, a female of indeterminate age, sexual experience, and social status (Gen. 16:2; 24:16; Deut. 5:14; 22:14–17; Matt. 9:24; Mark 5:41–42; Acts 16:16). The word is also used by a woman as a humble self-designation before a superior (1 Sam. 1:11, 16; Ruth 3:9) and metaphorically of cities or countries and their inhabitants (Isa. 47:1; Jer. 31:4, 21; Amos 5:2).

mail. ***See*** Dress.

Makkedah (muh-kee′duh), one of sixteen cities in the Shephelah (an area southwest of Jerusalem) assigned to the tribe of Judah (Josh. 15:41). Its precise location is not known. Mentioned alongside Azekah (about twelve miles west of Jerusalem) as the end of Joshua's rout of the five kings attacking Gibeon, Makkedah is the place where those kings were found hiding in a cave and then slain. Joshua subsequently took the city of Makkedah and killed its king (Josh. 10:16–28). ***See also*** Azekah; Gibeon.

MALACHI, THE BOOK OF

Malachi (mal'uh-kī), **the Book of,** the last book of the prophetic corpus and of the Christian OT and one of the twelve Minor Prophets. The name of the book (Heb., "my messenger") derives from 3:1, where an eschatological precursor is announced: "Behold, I am about to send *my messenger*" (cf. 1:1; 2:7). The Septuagint (LXX) as well as other versions do not take the title as a personal name, and most scholars regard the author as anonymous. The brevity of the book and the fact that it shares the subtitle "oracle" with two sections of the end of the book of Zechariah (9:1; 12:1) have led some scholars to suggest that three anonymous collections of prophetic materials were edited together at the end of the Book of the Twelve.

Although the book of Malachi bears no chronological markers and refers to no concrete datable event, most interpreters have placed its date in the early Persian period between the reestablishment of the Temple in 515 B.C. and the mission of Nehemiah in 445; some date it more specifically to the reign of Xerxes I (486–464). Clues to this dating include the mention of a governor in 1:8 (likely Persian) and the assumption of a functional Temple sacrificial system.

Malachi delivers a harsh critique of the behaviors and attitudes of the priests and the people. Priests are accused of disrespecting God by offering inferior sacrifice. According to standard dating, this violation of normal cultic practice (1:7–10; 3:8) indicates a loss of religious devotion merely two generations after the rededication of the Second Temple. The people are accused of doubting God's justice (2:17) and of mistreatment of one another.

At least since the turn of the century, the most critically discussed passage of the book has been 2:10–16. V. 11 condemns Judah for "marrying the daughter of a foreign god," and in v. 16 God declares "I hate sending" (which is usually translated as "divorce"). Typically understood, this passage lambastes intermarriage with foreign women and the divorce of Judean wives, a practice that was later outlawed by the reforms of Ezra (Ezra 9:1–4; Neh. 13:23–27). Because this passage employs language used elsewhere in the OT in the context of accusations against idolatry, a few interpreters have claimed that the marriage described is not human but rather symbolic of Judah's religious infidelity.

In response to the community's transgressions and religious doubts, the prophet announces the imminent arrival of a "messenger of the covenant" (3:1), who will prepare the community for final judgment. The closing verses of the book (4:4–6; Heb. 3:22–24) have strong ties to the language and themes of the book of Deuteronomy (cf. Deut. 18:15–18), perhaps indicating that they were a later addition, either to the book itself, to the prophetic corpus, or possibly to the Pentateuch and Prophets together. Drawing on the model of Exod. 23:20, the concluding verses identify the eschatological precursor as Elijah, who is to return from heaven to reunite all Israel before the end time.

The verses and ideas that close the book of Malachi have left an indelible imprint on later Jewish and Christian messianic thought. Jewish tradition numbers Malachi the last of the prophets and a member of the Great Synagogue, and various rabbinic documents echo Malachi's anticipation that Elijah's return will precede the coming of the messiah. Combining Mal. 4:5–6 (Heb. 3:23–24) with Isa. 40:3, the Gospels link John the Baptist with Elijah (cf. Matt. 17:10–13). The recitative-aria-chorus sequence on Mal. 3:1–3 in Handel's *Messiah* equates the coming messenger of the covenant with Jesus.

Modern scholarly interest in the formation of the OT canon, the literary and sociological activity of the Second Temple period, and the rise

OUTLINE OF CONTENTS

The Book of Malachi

I. Superscription, identifying the work as an "oracle" and the origin of the message as "my messenger" (1:1)
II. Introductory oracle, contrasting the fortunes of Jacob-Israel with those of Edom-Esau (1:2–5)
III. Condemnation of the priests for corrupting worship and not properly teaching the Torah and covenant prescriptions to the people (1:6–2:9)
IV. Critique of the covenant faithlessness of Judah, who "married the daughter of a foreign god." The prophet exhorts the people to remain faithful to one another; if they do so, they will bear godly offspring (2:10–16)
V. Complaint that Israel has wearied God, and an announcement that God will soon come in judgment (2:17–3:5)
VI. Prophetic appeal for repentance, and an argument against the people's false testing of God by withholding tithes (3:6–12)
VII. Rebuke directed at those who spoke against God and God's faithlessness, and a promise that the God-fearers shall be remembered for righteousness while the evildoers shall be destroyed (3:13–4:3; Heb. 3:13–21)
VIII. Appeal to remember the Torah of Moses before the day of judgment, a day to be preceded by the advent of Elijah and his acts of restoration (4:4–6; Heb. 3:22–24)

of messianism have breathed new life into the study of the book of Malachi. When read in light of information on the Persian period, Malachi provides an important glimpse of life in Jerusalem in the first half of the fifth century B.C. Disappointed that the rebuilding of the Temple had not occasioned the kind of good life Haggai had predicted and that worshipers had soon lapsed in their performance of religious observations, the book decries the failings of the community. It nonetheless ends hopefully, enabling all to anticipate better times. ***See also*** Prophet.

J.M.O.

Malchiah (mal-*ki*´uh; also Malchijah; Heb., "my king is Yahweh"). **1** A descendant of Gershom (1 Chron. 6:40). **2** A priest (1 Chron. 9:12). **3** The head of the fifth course of priests at Jerusalem (1 Chron. 24:9). **4** Three men listed as having married foreign women (Ezra 10:25, 31). **5** One who repaired the Jerusalem Dung Gate (Neh. 3:14). **6** A jeweler who helped rebuild the Jerusalem wall (Neh. 3:31). **7** One who accompanied Ezra during the reading of the law (Neh. 8:4). **8** A man who sealed the Covenant (Neh. 10:3). **9** A priest who participated in the ceremony of the wall dedication (Neh. 12:42). Some of these individuals may have been one and the same (cf. 2, 9). M.A.F.

Malchishua (mal´*ki*-sh*oo*´uh; Heb., "the king is noble" or "help of the king"; KJV: "Malchishua"), the third son of Saul and Ahinoam (1 Sam. 14:49; 1 Chron. 8:33; 9:39). Nothing is known of his life other than that he was killed with his brothers by Philistines at the battle of Gilboa while in military service for his father (1 Sam. 31:2; 1 Chron. 10:2).

Malchus (mal´kuhs), in John 18:10, the high priest's slave (perhaps a Nabatean) whose right ear was severed by Peter when Jesus was arrested; he is not named in the other Gospels.

malefactor, a term in the KJV for "evil doer" (John 18:30; Prov. 24:19), "wrong doer" (1 Pet. 2:12; 4:14), and "criminal" (Luke 23:32–33; 2 Tim. 2:9).

mallow (mal´loh), any plant of the family *Malvaceae.* Biblical usage cites its characteristic fading (Job 24:24) and its relatively unpleasant nature as a food source (Job 30:4); it was used for food only in desperate circumstances.

Mallow.

Malluch (mal´uhk). **1** An ancestor of the levitical Temple musician Ethan (1 Chron. 6:44). **2** The son of Bani who married a foreigner (Ezra 10:29). **3** The son of Harim who did the same (Ezra 10:32). **4** A signer of the postexilic covenant (Neh. 10:4). **5** A priestly signer of the postexilic covenant (Neh. 10:27). **6** A priest who accompanied Zerubbabel (Neh. 12:2) in the return from Babylonian exile (ca. 530 B.C.).

Malta (mawl´tuh), ancient Melita, an island sixty miles south of Sicily, today comprising, with two smaller islands to the northwest, the nation of Malta. First occupied in Neolithic times (ca. 8000–4500 B.C.), it began to be colonized by Phoenicians in the early first millennium B.C. and passed under the control of Carthage from the sixth to the third centuries B.C. Although taken by the Romans in 218 B.C., Maltese culture retained its Punic identity, so that Acts 28:2 refers to the people as "natives" (RSV: Gk. *barbaroi,* "barbarians").

According to Acts 27:27–28:11, Paul was shipwrecked in a bay of Malta en route to Rome, spending the three winter months there. Roman inscriptions mention the principal local official as "first man" or "chief man" (RSV), just as Publius is called in Acts 28:7. The traditional site of Paul's landing is today called St. Paul's Bay, on the northeast coast of Malta. ***See also*** Paul; Publius. C.H.M.

mammon (mam´uhn; from Aramaic *mamôn,* "wealth"), a term used in warnings against preoccupation with wealth (Matt. 6:24; Luke 16:9, 11, 13). ***See also*** Wealth.

Mamre (mam´ree), an ancient Semitic name. **1** An Amorite ally of Abraham in his battle against Chedorlaomer and the coalition of four eastern kings (Gen. 14:13–24). Mamre was the brother of Eshcol and Aner (Gen. 14:13, 24). **2** A focal place in Abraham's movements about southern Palestine. Mamre is usually identified with modern Ramet el-Khalil, just north of Hebron. According to biblical tradition, Abraham built an altar at Mamre (Gen. 13:18). Such a shrine would explain Abraham's repeated return to Mamre and his many theophanic experiences there. Abraham purchased the nearby cave of Machpelah for a family tomb. Mamre was apparently named for Abraham's ally in battle (see 1 above). Perhaps this Mamre owned the land or had previously had a shrine there. At Mamre God told Abraham that Sarah would have a son (Gen. 18:1–15). There Abraham pleaded for Sodom and Gomorrah to be spared (Gen. 18:16–33). In the nearby cave of Machpelah the patriarchs and their wives were buried (Gen. 23:17–20; 25:7–10; 35:27–29; 49:28–33; 50:12–13). ***See also*** Machpelah. J.F.D.

man (as generic term). ***See*** Human Being.

Manaen (man´ee-uhn), an intimate friend or member of the court of Herod Antipas who was converted to Christianity and became a prophet and teacher in the church at Antioch (Acts 13:1). ***See also*** Antioch; Herod; Prophet.

Manasseh (muh-nas´uh), the son of Hezekiah and king of Judah (698–642 B.C.); he reigned longer than any other king of the house of David, fifty-five years. Manasseh is roundly condemned for his aberrant ways by the author of the book of Kings. He is accused of cancelling the altar reform of his father, allowing local "high places" to be rebuilt, and fostering the reintroduction of foreign cultic practices: "For he rebuilt the high places which Hezekiah his father had destroyed; and he erected altars for Baal, and made an Asherah, as Ahab king of Israel had done, and worshiped all the host of heaven, and served them. And he built altars in the house of the Lord, . . . And he built altars for all the host of heaven in the two courts of the house of the Lord. And he burned his son as an offering, and practiced soothsaying and augury, and dealt with mediums and with wizards" (2 Kings 21:3–6). This abandonment of Israel's law was not limited to the royal court; through Manasseh's example, idolatry spread abroad to the people of Judah and Jerusalem (2 Kings 21:9). Furthermore, according to the historiographic outlook of the book of Kings, whereby loyalty to the Lord is rewarded and apostasy punished, Manasseh was directly to blame for the destruction of Jerusalem and the exile of Judah, so great was his sin (2 Kings 21:12–15; 22:16–17).

As for the political history of Manasseh's age, little is reported in biblical sources. Assyrian sources refer to Manasseh as a loyal vassal for the better part of his reign. Thus the Assyrian king Esarhaddon reports that "the 22 kings of the western countries, the seashore and the islands," among them "Manasseh of Judah" did corvée work and furnished building materials for the reconstruction of the royal palace in Nineveh. This same monarch called upon his western vassals to construct the port town of Kar-Esarhaddon on the Phoenician coast after the destruction of Sidon in 676 B.C.

Some years later, during an early campaign of Ashurbanipal of Assyria to Egypt, Manasseh mobilized a Judean contingent to fight alongside of other national units who had been enlisted for service in the Assyrian army. Vassal dues included military service as well as steep payments in money and in kind. A fragmentary biblical tradition preserves references to Manasseh's imprisonment by the king of Assyria, who took him captive "with hooks and bound him with fetters of bronze and brought him to Babylon." There, Manasseh prayed to the Lord and was subsequently returned to his former position (2 Chron. 33:10–13). That Manasseh was suspected of disloyalty at least once during his long reign is very likely and this episode may be related to the unrest in the west in 671 B.C. at the end of Esarhaddon's rule in Assyria. (Some scholars think that Manasseh was implicated in the rebellion against Assyria of Shamash-shum-ukin in Babylon in 652–648 B.C.)

Judah's vassaldom to the Assyrian Empire, which in the seventh century B.C. stretched from the Nile to the Taurus Mountains and eastward to the Iranian plateau, can best account for the rampant idolatry recorded in the book of Kings for the reign of Manasseh. It is often put forward that Assyria required the adoption of imperial cults as part of the vassal service due the overlord. But Assyrian imperial policy made no such demands; on the contrary, foreign local cults flourished and were sometimes encouraged by the conqueror. Note the account of the "restoration" of the Israelite cult in Bethel by the king of Assyria for the well-being of the settlers of the province (2 Kings 17:24–34). The repeated commercial and military contacts by Judeans with the admixture of peoples in the empire was the seedbed out of which grew the cultic entanglements decried by biblical writers. Thus, the diminutive kingdom of Judah succumbed to the wave of a new general culture composed of Aramaic and Canaanite elements that united the entire Near East.

The story of Manasseh's repentance in 2 Chron. 33:10–16 is evidently historical fiction, for, if true, it obviates the need for the reform of King Josiah (2 Kings 22–23; 2 Chron. 34–35). The Chronicler has rationalized Manasseh's lengthy reign in terms that recall Ezekiel's doctrine of personal accountability (cf. Ezek. 18) and so does not impute Judah's fall to Manasseh.

Manasseh, the Prayer of. *See* Prayer of Manasseh, The.

Manasses (muh-nas´eez), the Greek form of the Hebrew *Manasseh*, a tribe (Rev. 7:6) and son of King Hezekiah in Jesus' genealogy (Matt. 1:10). *See also* Apocrypha, Old Testament; Manasseh.

mandrake (*Mandragora officinarium*), a plant of the nightshade family that spreads large spinach-shaped leaves in a rosette pattern. The flowers that form in the middle of the rosettes later become yellow-red fruits resembling tomatoes. Although considered a delicacy, it has an unusual smell and taste (Song of Sol. 7:13). The fruit of the mandrake may have produced strange effects since it was used medicinally as a narcotic or purgative. The woody root, resembling a human figure, supposedly indicated the plant's magical properties. Sometimes called a "love apple," it was purported to be an aphrodisiac and enhancer of fertility. Mandrakes were found in the wheat fields by Reuben and were the indirect cause of the birth of Zebulun (Gen. 30:14–20). P.L.C.

Mandrake.

maneh (may´neh, KJV; RSV: mina). *See* Weights and Measures.

manger, a box or trough, usually carved from stone, used for the feeding of animals (cf. Luke 13:15). Mangers could be found wherever animals were kept, either in a lower portion of a house or in a cave near a house or even beneath a house. In caves, the manger was frequently carved out of the wall. According to Luke 2:7, 12, 16, a manger was used as the bed for the infant Jesus after his birth in Bethlehem.

In the early traditions, the place of Jesus' birth was thought to have been a cave, although the Lucan account does not supply such information. Later (early fourth century A.D.), the Emperor Constantine erected a basilica over a cave in Bethlehem believed to be Jesus' birthplace, and this basilica evolved into the present Church of the Nativity. *See also* Bethlehem. J.M.E.

manna (man´uh, from Heb. *man*, Gk. *manna*), a food God provided for the Hebrews in the wilderness (Exod. 16:1–36; Num. 11:4–9). The manna was found each morning on the ground and is described as "a fine, flake-like thing, fine as hoarfrost" (Exod. 16:14). It is further described as being white (Exod. 16:31), like coriander seed (a small, globular, grayish-colored seed, Exod. 16:31), and like bdellium (a sticky resinous gum, Num. 11:7). Each Hebrew was to gather one omer (approximately two quarts) of manna each day, but two omers on the day preceding the Sabbath (Exod. 16:16, 22). The manna could be boiled in pots or ground into a meal and baked into cakes (Num. 11:8).

Manna that was left on the ground after the sun warmed the earth quickly disappeared. The Hebrews interpreted this as meaning that it melted (Exod. 16:21). The disappearance is more likely the work of ants, which remove any manna once the ground warms. Likewise, the description of worms in any excess manna (Exod. 16:20) is probably a description of the ants that would seek out and remove manna stored in the tents of the Hebrews. A jar of manna was kept, along with Aaron's budding almond branch, in the Holy of Holies beside the Ark of the Covenant (Exod. 16:33–34).

F. S. Bodenheimer has suggested that manna was the honeydew secretion of two kinds of scale insects feeding on the sap of the tamarisk. These insects ingest large amounts of plant sap, which is rich in carbohydrates but poor in nitrogen. The excess carbohydrate ingested in order to obtain the needed nitrogen is then excreted as honeydew. This honeydew is rich in three basic sugars and pectin. In the dry desert air most of the moisture quickly evaporates from the honeydew, leaving sticky droplets on the plants or ground.

Bodenheimer notes that the geographical area where manna was found according to the earliest writings of Scripture, from Elim to Rephidim, agrees well with his own observation of the limits of manna production. Bodenheimer also notes that the season of manna production begins in late May or early June, precisely the time indicated by the biblical account.

In the NT, Jesus is challenged to do great signs like the provision of manna in the wilderness. He responds that the manna, bread

of heaven, came as a gift from God, and that he (Jesus) was the bread of life (John 6:25–35). Similarly in Rev. 2:17, the faithful are promised some of the hidden manna, a reference to Jesus' offering the bread of life. ***See also*** Wilderness.

Manoah (muh-noh´uh), Samson's father, a Danite from Zorah. The narrative of the events surrounding Samson's birth (Judg. 13:2–25) depicts Manoah as incredulous and slow-witted in comparison to his wife: he wants the angel's revelation repeated (v. 8), he questions the angel to test his wife's truthfulness (v. 11), and when he finally realizes that the man is an angel, he is afraid that he and his wife will die—prompting her reassuring reasoning (vv. 20–23). According to Scripture, Manoah's tomb lies between Zorah and Eshtaol (Judg. 16:31), some fifteen miles east of Jerusalem. J.U.

man of lawlessness, an enigmatic phrase found in 2 Thess. 2:3. Of the many possible interpretations given in the scholarly literature, one plausible suggestion is that the man of "lawlessness" (or "rebellion") is an eschatological and representational figure who is to be manifested in the future and whose arrival will signify the culmination of the past, present, and future hostile forces standing in opposition to the apostolic ministry of the church, and, thus, of God. His appearance will climax the process the author of 2 Thessalonians refers to as "the mystery of rebellion" (2 Thess. 2:7). But since this moment has not yet arrived and the Lord Jesus has not yet destroyed him (2:8), those who argue that "the day of the Lord has come" (2:2) are in error. ***See also*** Antichrist, The; Thessalonians, The Second Letter of Paul to the. K.P.D.

manservant. ***See*** Servant.

mansions (KJV), rooms or home. Jesus, in view of his ascension, comforted his disciples by means of an analogy: "In my father's house are many rooms" (John 14:2; KJV: "mansions," NEB: "dwelling-places"). Since, in biblical thought, the earth is roofed by seven domelike heavens, there would be sufficient space for the divine householder's human family. Furthermore, the deity's earthly "house" (temple) had various compartments, and thus it seemed logical that its heavenly counterpart would have them as well. Extravagance ("mansions") is not intended by the Greek original, as is clear from the only other instance where this word is used in the NT: "We will . . . make our *home* with him (John 14:23; KJV: "abode," NEB: "dwelling"). ***See also*** Heaven. L.R.B.

mantle. ***See*** Dress; Tunic.

manuscript. ***See*** Texts, Versions, Manuscripts, Editions.

Maon (may´on; Heb., "dwelling," "refuge"), a personal and a place name. As is often the case in Scripture, a name that in one passage is used as a personal name in another passage is used as a place name. That is the case with Maon (1 Chron. 2:45; Josh. 15:55; 1 Sam. 25:2). He is one of a number of descendants of Caleb, all of whose names are also place names: Mareshah, Ziph, Hebron, and Bethzur (1 Chron. 2:42–50). Each of these places has been located by historical geographers with a six to twelve mile radius from Hebron. Some scholars identify biblical Maon with modern Khirbet el Ma'in, located twenty-five miles west-northwest of Beersheba, but the majority identify it with Tel Ma'in, which is located eight and a half miles south of Hebron. Nabal the Calebite was Maon's most celebrated OT resident (1 Sam. 25:2–42). J.G.G.

Mara (mair´uh; Heb., "bitter"), the name Naomi applied to herself to describe her fate (Ruth 1:19–21). ***See also*** Naomi; Ruth.

Marah (mair´uh; Heb., "bitterness"), the unpalatably bitter pools of water (whence the name) reached by the Israelites after they crossed the Red Sea and entered the Wilderness of Shur (Exod. 15:22; the Wilderness of Etham according to Num. 33:8). Thirsty and angry, the

Three Israelites complain to Moses that the water at Marah is bitter; Moses then turns to God who shows him a tree that will sweeten the water; detail from a thirteenth-century French illuminated Bible.

Israelites slandered Moses who, upon God's orders, turned the waters sweet by throwing wood into the brackish pools. Occurring so soon after the great miracle at the Red Sea, this incident not only gave evidence of Israel's tendency to doubt God (Exod. 15:24), but God's own propensity to test his chosen people (v. 25). Despite the many locations proposed as the site of Marah, none has gained the complete confidence of scholars; as a result, the location remains in doubt. ***See also*** Exodus. J.M.S.

maranatha (mair´uh-nath´uh, mahr´uh-nath´uh), an Aramaic expression transliterated into Greek (1 Cor. 16:22; *Didache* 10:6) meaning "Our Lord has come" (*maran atha*) or "Our Lord, come" (*marana tha*). The prayer, "Come, Lord Jesus" (Rev. 22:20), which is a Greek translation of this expression, favors the latter. The use of *maranatha* in 1 Cor. 16:22 indicates that this was an early prayer originating in the Palestinian church and that Jesus already in earliest times was probably referred to as *Mar* or "Lord."

marble, a metamorphic rock, composed of extremely compact crystallized limestone. Its veined and varicolored appearance made it highly desirable for architectural decoration and artistic use. Biblical use attests its functions in architecture ("marble pillars" in the palace of Ahasuerus, Esther 1:6, and marble floors there as well) and decoration (material gathered by David for use in the Temple, 1 Chron. 29:2). As part of the seer's vision of the destruction of "Babylon" (Rev. 18:12) marble was part of the precious goods no longer salable by merchants. In archaeological evidence, marble fragments attest its use in statuary during the Greco-Roman period (333 B.C.–A.D. 324) in addition to the more common uses in architectural decoration and construction from various periods. R.S.B.

Marcus (mahr´kuhs), the Latin form of the name Mark; it appears in the KJV in Col. 4:10; Philem. 24; and 1 Pet. 5:13. ***See also*** Mark.

Marduk (mahr´dy*oo*k). ***See*** Merodach.

Mareshah (muh-ree´shuh). **1** An important town in one of Judah's Shephelah (western) districts (Josh. 15:44); it was located approximately one mile south of Beit Jibrin, and is identified with modern Tel Sandahannah. Mareshah was among the towns fortified by King Rehoboam ca. 920 B.C. (2 Chron. 11:5–12). Near the end of the tenth century B.C., the armies of King Asa and Zerah the Ethiopian "drew up their lines of battle in the valley of Zephathah at Mareshah," a struggle that resulted in victory for the Judeans (2 Chron. 15:9–15). Eliezer, the prophet who spoke against the alliance between Jehoshaphat and Ahaziah, was from Mareshah (2 Chron. 20:37). This town's destruction was prophesied by Micah (1:15). During the exilic and postexilic periods (sixth–fourth centuries B.C.), southern Judah was absorbed into Edomite (or Idumean) territory; Marisa (Mareshah's Greek name) was a leading commercial and cultural center in this region. Its cosmopolitan population came under the control of Seleucid, Ptolemaic, Hasmonean, and Roman conquerors, and Marisa's history ended with the Parthian destruction in 40 B.C. (cf. 1 Macc. 5:66; 2 Macc. 12:35; Josephus).

While the environs of Mareshah/Marisa have been investigated in recent years by Israeli archaeologists, Tell Sandahannah was originally excavated by Bliss and Macalister in 1900. They recovered some material from the Iron Age (1200–1000 B.C.) but their major efforts focused upon exposing the architectural remains and layout of the Hellenistic city, whose final phase measured ca. 500 feet on each side. In addition to a full repertoire of Hellenistic pottery, coins, and inscriptions, some of the world's finest examples of rock-cut, elaborately painted tombs have been found at Marisa.

2 The firstborn son of Caleb, and the father of Ziph and Hebron (1 Chron. 2:42, Septuagint). In the Hebrew text, Caleb's son is called Mesha first, then Mareshah.

3 A son of Laadah, a descendant of Judah (1 Chron. 4:21). G.L.M.

Mari (mah´ree), the name of an ancient city uncovered by French archaeologists at modern Tell el-hariri, located on the right bank of the Euphrates River, just north of the modern Syro-Iraqi frontier. Since the first expedition of 1933–34, some thirty campaigns have unearthed major palaces and temples dating from the mid-third millennium to the early eighteenth century B.C. Mari was destroyed by Hammurabi of Babylon around 1765 B.C., and it never again rose to prominence.

History: Mari's location midway between the great powers of Sumer (Kish, Uruk, Eridu, Agade, Ur) and those of Syria (Ebla) allowed it to be a center for manufacture and trade during the third millennium. References to Mari as a major political power are therefore found in the archives recovered from these city-states. The documents from Mari of this period have not been fully published.

When, at the turn of the millennium, Sumerian culture began to give way to that of the West Semitic Amorites, Mari was ruled by *shakkanakku,* "governors." These brought prosperity to the city, and it was during their time that the foundation of the great palace was laid that was to last until Mari's fall. A chronology for these "governors" as well as a transition to the later so-called Lim dynasty have yet to be firmly established.

MARI

The Lim dynasty is better known to us, since its history can be reconstructed from the thousands of texts that date from 1825 to 1765 B.C. They tell of Yakhdun-Lim, who fortified cities all along the Middle Euphrates and who even led a military expedition to the Mediterranean; of his son (?) Sumu-Yamam, who was assassinated in a harem conspiracy, leaving Mari to the mercy of an ever scheming king of Assyria, Shamshi-Adad; of Yasmakh-Adad, son of the latter, who stayed in power for about twenty years, losing it approximately four years after his father's death; and of Zimri-Lim, son of Yakhdun-Lim, who came back to occupy his father's throne. Defeated by Hammurabi of Babylon, Zimri-Lim was the last major king of Mari.

Palace Life and Government: The twenty-year rule of Zimri-Lim is probably the most heavily documented of any king of ancient times, not only because we have hundreds of letters from him, his family, and his administrators, but also because we have dozens of documents dated to each month of his reign. Since we know the sequence of at least twelve years of Zimri-Lim's rule, we can reconstruct life in the palace of a major city-state during peace and war. During those years, the king and his retainers had two meals a day, consisting of a variety of breads, legumes, meats, fish, wine spiked with honey, beer, and sweets. Seasonal food included truffles and a variety of fruits. Ice was available, year-round, stored in underground buildings.

For entertainment, the king hunted lions and watched elaborate ballets. The king himself played a role in selecting the female dancers, since these were to enter his harem. It is likely that the courtiers listened to the reading of literary texts, but the examples recovered from Mari have not been published as yet. We can reconstruct a voyage that Zimri-Lim took when visiting Halab (Aleppo), where lived his father-in-law, king Yarim-Lim of Yamkhad. Very likely, he also went to Ugarit. The trip took at least four months and was punctuated by many stops at the courts of allies and vassals as well as by visits to local shrines.

The king had many wives and concubines at each of his four palaces along the Euphrates and Khabur rivers. First among these wives was Shiptu of Yamkhad, whom Zimri-Lim married late in his reign. We cannot be sure whether Shiptu bore him children, but Zimri-Lim had many daughters from other women. We can reconstruct the fate of at least a dozen of these daughters. Some married prominent court functionaries, others became priestesses—in Mari itself as well as in Sippar where they became "daughters-in-law" of the god Shamash. But most were given as wives to allies and vassals. Especially dramatic were the fates of Shimatum and Kirum. Both these sisters were married to the king of Ilansura, with tragic consequences for Kirum who seems to have lost her mind and had to be brought back home.

Inscribed statue of Ishtup-ilum, "governor" of Mari, second millennium B.C.

The king was the main administrator of Mari and its territories. He was helped by a private secretary, who accompanied him on his frequent trips, but above all by countless bureaucrats, male as well as female, in the palace and in the provinces. The more highly placed a functionary, the more diverse were the assigned duties. In fact, each major functionary seems to have been in control of a *bitum*—literally "a house"—wherein were to be found various artisans' quarters, supply storehouses, living quarters, and the like. In the provinces, the king's authority was communicated among others by the *shapitum*, "governor," the *merkhum*, "military representative (?)," the *suqaqum* and the *khazannum*, the king's delegates to tribal communities. Nonsettled elements constantly needed the king's attention, for some of these, in particular the Benjaminites, were constantly fomenting troubles.

Wars could take place at any time of the year although the more civilized ones were launched in the spring. The king usually delegated responsibility to a *rab amurrim*, "general," but he also went to the front. Armies could reach large numbers, with some engagements pitting fifty thousand men, raised from among all levels of the citizenry. Allies were expected to bring

their troops to battle. Heavy weaponry included battering rams, towers, and breach-mines, but the common soldiers used bows, javelins, swords, knives, and throw-sticks. They were protected by helmets, shields, codpieces, and in some cases, hauberks. The defeated were parceled out among the victors, with the king receiving the major share. Prisoners could be redeemed by their own communities or else they served at the victor's pleasure. The harem of a defeated king was simply taken over by the winning ruler.

Religion: As befits a major political power with ample resources to care and feed the gods, Mari worshiped many gods. Its temples also housed the gods of surrounding cities; these were released to their own shrines, seasonally or by appeal to the king, in order to gain the favor of the provincial population. We cannot state that in Mari one god dominated the others, but we can say that certain personnel gravitated to the worship of one deity and that certain deities were better approached for specific requests than others. It is certain that the goddess *Beletekallim,* for example, was favored by the females of the palace. On the other hand, when Zimri-Lim asked a favor from heaven, he wrote a brief but poignant letter to the river god Naru. Sacrifices took place daily; and although we have documentation for only a brief period during the reign of Zimri-Lim, we can recognize that the outlay of sacrificial animals was heavy. But in this way, sanctified meat was made available to members of the palace. (One recently published text is exceptional for establishing a ratio between animals that were to be slaughtered and those that were to be "released" upon making a vow [*ikribum*] to a deity.)

Gods were unpredictable in choosing a channel by which to communicate their message to the king. They could approach priestly as well as "secular" figures; they could choose male as well as female, young or old. They could relay their message through a trance, a dream, or a vision. The king never received that message directly, but rather through an intermediary who wrote the gist of the message on a clay tablet, but who also probably dispatched orally a more complete account. The king may have had as many as three different accounts from as many intermediaries. In order to verify the authorship of the message as well as the reliability of the medium, the king's diviners turned to various examinations of the entrails of sacrificial animals.

Mari and the Bible: Mari's direct bearing on Hebrew society as reconstructed from the Bible is slight. It is possible that some clans from the tribes, which are better known thanks to the Mari documents, eventually found their way to the area around Jericho; but the links for such a migration are broken. Mari does give us a rich repertoire of West Semitic names; it does inform us on the procedures for census taking, on the way prophetic pronouncements reached the king, and on the legal procedures required for adoption and for registering inheritance. But this information is available, albeit in poorer fashion, from Mesopotamian documents of many and differing periods. It is no longer prudent, therefore, to rely on Mari in order to formulate dates for the Hebrews' patriarchal period (ca. 2000–1750 B.C.). However, Mari's archives do allow us to reconstruct an ancient Near Eastern society in all its diverse aspects as well as in its uniqueness better than has heretofore been possible. We can therefore turn to Mari, rather than to contemporary paradigms, in search of models by which to evaluate and judge the social experiment that came to be known as Israel. ***See also*** Archaeology, History, and the Bible; Patriarch.

mark, an artificially inflicted sign on the body in the form of incision, tattoo, brand, or stamp. In the OT several kinds of distinguishing marks are mentioned. **1** The mark of Cain (Gen. 4:15), given as a protection, making the person of Cain inviolable. **2** The mark of the prophet (1 Kings 20:41), possibly an incision on the forehead. **3** Circumcision (Gen. 17:14; 1 Cor. 7:18), the most prominent mark identifying the Jew as belonging to God (cf. Isa. 44:5; 49:16). **4** The mark of a slave who did not wish to leave his master, whose earlobe was pierced by an awl (Exod. 21:6; Deut. 15:17).

In the NT only two instances can be mentioned. **5** The "marks of Jesus" that Paul bore (Gal. 6:17); these could have been scars from his sufferings for Christ (Acts 14:19; 2 Cor. 11:23–27). Paul, who called himself a "slave of Jesus" (Rom. 1:1), may also have had in mind the custom of branding a slave. **6** The "mark of the beast" (Rev. 13:16–18; 14:9–11; 16:2). The number 666 is thought to conceal the emperor Nero's name and the "mark" of the official imperial seal, necessary to conduct business. Accepting this mark was apostasy, as true Christians were marked with God's name upon their forehead (Rev. 3:12; 7:3; 14:1; 22:4; cf. Ezek. 9:4). S.B.

Mark (mahrk; Lat. *Marcus;* Gk. *Markos*), a popular Latin name borne by prominent Romans from Cicero to the emperor Marcus Aurelius. Mentioned eight times in the NT (Acts and several Letters; never in the Gospels), it customarily names one who accompanied the apostles Paul and Peter. In the account in Acts, a Mark, surnamed John, was the son of a woman (Mary) in whose house in Jerusalem Christians from the earliest period met for prayer, and to which Peter went, apparently as a matter of course, on his miraculous release from prison (Acts 12:12). Mark accompanied Saul (Paul) and Barnabas on

a journey from Antioch to Jerusalem with famine relief aid (Acts 12:25), but his untimely abandonment of a later missionary journey on which he accompanied Barnabas and Paul (Acts 13:5, 13) precipitated a dispute when Barnabas proposed taking Mark on another such journey. Paul's opposition to that course of action led to independent missionary journeys undertaken by Barnabas with Mark, and Paul with Silas (Acts 15:36–40). That is the last mention of John Mark in Acts. A Mark is mentioned by Paul, however, as one of five Christians who sent greetings to Philemon and some other recipients of that Letter (Philem. 24). If this is the same Mark, it indicates a later reconciliation with Paul. The same five Christians are also among the group that sends greetings to Christians in Colossae (Col. 4:10), where Mark is identified as the "cousin of Barnabas," an apparent reference to the Mark mentioned in Acts. A Mark is also identified by the author of 2 Timothy (4:11) as "very useful in serving me," and as "my son" in a Letter whose author is identified as the apostle Peter (1 Pet. 5:13).

Later traditions, assuming that all NT references were to the same person, identified this Mark as the author of the second Gospel, who, serving as Peter's interpreter in Rome, recorded, at the urging of Christians there, what he could remember of that apostle's preaching. Still later traditions claim that the Gospel, originally reported as written after Peter's death, was written during the apostle's life, and eventually it was claimed that it was written at Peter's urging. Other traditions make a "stub-fingered" Mark the first to preach in Egypt and the founder of Alexandrian Christianity. Sixth-century legends identify Mark as one of the seventy disciples of Jesus (Luke 10:1), the one who bore the jar of water (Mark 14:13), and the one in whose house the events of Pentecost occurred (Acts 2:1–4). Later legends portray his martyr's death and his reburial in Venice. That Mark 14:51–52 refers to the author of the Gospel is a modern conjecture. P.J.A.

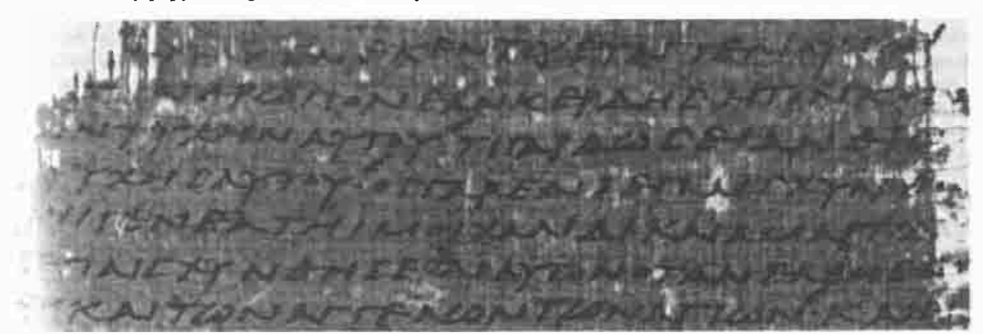
Mark, the Gospel According to, the Bible book believed by most (not all) scholars to be the earliest of the four NT Gospels. Thus, it was probably one of the sources used by the author of the Gospel of Luke (Luke 1:1) and was also used by the author of Matthew. Although the author remains unidentified in the Gospel itself, early tradition assigned it to Mark, a companion of the disciple Peter, who reportedly wrote down, in Rome, what he had heard Peter preach. The nature of the material in Mark, however, points to a period when it was circulated in oral form before the author collected it and wrote it down, so it is doubtful that Mark simply wrote down what he had heard Peter preach. Another early tradition identifies Alexandria in Egypt as the place of origin. Attempts to identify this Mark with person(s) who bore the name in other NT writings (Acts 12:12, 25; 15:37, 39; Col. 4:10; 2 Tim. 4:11; Philem. 24; 1 Pet. 5:13) are rendered less sure by the popularity of that name in Roman culture.

Date and Origin: Because of reference to the destruction of the Temple in Jerusalem (Mark 13:2), the date of composition may be around the time this event occurred, A.D. 70. Because it was written in Greek and interprets phrases in Aramaic (5:41; 7:34; 15:34), the language of Palestine, the original readers were not Palestinians. Explanation of Jewish customs (7:3–4) makes it equally likely that the original readers were Gentiles. Mark's faulty knowledge of Palestinian geography (7:31) puts the place of origin outside Palestine as well. Beyond that, it is difficult to be precise about the origins of the Gospel. By failing to include any self-identification in the text, the author indicated that such information was unnecessary to understand the story contained in it.

The impetus that caused the author to assemble and order the individual traditions about Jesus for the first time may have been furnished by the (imminent) fall of Jerusalem, which some interpreted wrongly as signaling the return of Christ (13:6, 22). Increasing opposition to believers may also have played a role in prompting its composition (8:34–38; 13:9–13). Misinterpretation of individual traditions about what Jesus said and did, something which did occur in Paul's congregations (see 1 Cor. 11:17–27), as well as popular misinterpretation of Jesus as head of a group of magicians (Mark 9:38; Acts 8:9–19) or of philosophers (Acts 17:16–20), may also have shown the need to place those traditions within an interpretative framework.

Jesus' Identity: Whatever the motivation was for composing this Gospel, the author shaped the traditions in such a way that they told the story of a Jesus who could only be recognized for what he truly was, God's own Son, after he had died on the cross. While the reader is informed of Jesus' identity at the very outset of the narrative (1:1), an identity confirmed by a voice from Heaven (1:11; 9:7) and the outcry of demons (1:24; 5:7), that identity is kept secret from Jesus' contemporaries until the moment of his death. The crowds, the religious authorities, and even the disciples fail to comprehend Jesus' true identity during his earthly career, despite the preaching and teaching he did and the miracles he performed. While Mark includes many traditions of miracles of Jesus, surprisingly enough they have little effect in leading people to a correct judgment about him. While trust in Jesus caused some to seek his miraculous help (5:23, 28; 10:47, 52), there is no indication that anyone was led to see Jesus as Son of God because of his miracles. The crowds, despite their enthusiasm for his miracles (1:33; 3:7–8) and teaching (4:1; 6:34), failed to identify him correctly, seeing in him a

 MARK, THE GOSPEL ACCORDING TO



The Evangelist page of the Gospel According to Mark from the *Lindisfarne Gospels* (ca. 700) depicts Mark holding his writings. Over his head is his symbol, the winged lion.

prophet (6:15) or a miracle worker (9:38) rather than God's Son, the Messiah (Christ). The religious authorities, despite their acquaintance with the religious traditions that allowed them to comprehend the meaning of what Jesus did and said (12:1–12, esp. v. 12) and thus to identify correctly who he was (14:61), nevertheless refused to accept their own conclusions as valid and saw in Jesus rather a blasphemer deserving of death (14:63–64). The disciples, who accompanied Jesus, heard him teach, and saw his mighty acts, in the end failed to understand who Jesus was and, despite occasional flashes of insight (8:29) and pledges of undying loyalty (14:29–31), in the end deserted and actively denied him (14:50, 66–72), thus leaving him to face the taunts of his enemies (14:65; 15:29–32) and his painful death (15:34, 37) alone and deserted.

Because it is this death and the ensuing resurrection, however, that provide the key to understanding Jesus, the inability to understand who he is prior to those events is not accidental in the view of the author of Mark. To those apart from his twelve disciples and others who followed him closely, things occur in riddles, which they are unable to comprehend, despite what they see and hear (4:10–12). Those who have known Jesus from his youth—his family and close acquaintances—are similarly unable to understand him. His family regards him as unbalanced (3:21), and those with whom he grew up take offense at him (6:3). Religious authorities, whose murderous intent is clear from the outset (3:6), oppose him at every turn, thus demonstrating the religious system they represent to be unfruitful (11:13). If lack of understanding from such quarters might ordinarily be expected and hence would not prove divine intent, one would not expect such lack of understanding from the disciples; yet it was precisely the disciples who not only do not understand (4:13; 8:21; 9:6), but who are prevented from understanding (6:52; 8:17–18). Before his death on the cross, therefore, even those who are in daily association with Jesus are unable to comprehend him. Indeed, even their apparently correct confession is demonically tainted and does not share the divine intent for Jesus (8:29, 32–33). Only after his death on the cross can a human being understand Jesus as the Son of God (15:39). Only after his resurrection will the disciples finally understand Jesus against the background of his divine glory (see 9:9 in relation to 9:2–8).

All of this means that for Mark's understanding of Jesus, the death on the cross was not a historical accident, but the direct will of God. Thus Jesus predicts three times the divine destiny that awaits him ("the Son of man must suffer") as well as the divine vindication

MARK, THE GOSPEL ACCORDING TO

OUTLINE OF CONTENTS

The Gospel According to Mark

I. Jesus appears, preaching the Kingdom of God with power (1:1–3:6)
  A. Beginnings—John the Baptist (1:1–13)
  B. Jesus' ministry introduced (1:14–45)
  C. Conflict with religious authorities (2:1–3:6)

II. Jesus' ministry in Galilee (3:7–6:6)
  A. True followers of Jesus (3:7–35)
  B. Teaching in parables (4:1–34)
  C. Working miracles (4:35–5:43)
  D. Conflict with his own (6:1–6)

III. Jesus begins his final journey to Jerusalem (6:7–8:21)
  A. Mission of the Twelve and John's death (6:7–29)
  B. Feeding and healing miracles (6:30–56)
  C. Teaching about the law (7:1–23)
  D. Healing and feeding miracles (7:24–8:10)
  E. Foes and friends misunderstand (8:11–21)

IV. Jesus heals blind eyes—teaching on discipleship (8:22–10:52)
  A. Blind eyes opened (8:22–26)
  B. First passion prediction and attendant events (8:27–9:29)
  C. Second passion prediction and attendant events (9:30–10:31)
  D. Third passion prediction and attendant events (10:32–45)
  E. Blind eyes opened (10:46–52)

V. Final week in Jerusalem (11:1–16:8)
  A. Jesus teaches in the Temple (11:1–12:44)
  B. On times before the end (13:1–37)
  C. Final acts of Jesus (14:1–42)
  D. Jesus tried and condemned (14:43–15:47)
  E. The empty tomb (16:1–8)

VI. Later epilogue: Jesus appears (16:9–20)

("and after three days rise again"; 8:31; 9:31; 10:33–34). Therefore despite the lack of any record in Mark of appearances of the risen Jesus (16:9–20, absent from the oldest manuscripts, is a later addition compiled from information in the other Gospels), it is clear that Jesus' prediction of his resurrection, like his predictions of his death, would surely be fulfilled (cf. 14:28; 16:7). Perhaps the absence of appearances of the risen Christ is Mark's way of saying that until the return of Christ in glory (13:26–27; 14:62), an event that will come only after cosmic imbalances have occurred (13:24–25—hence the impossibility of predicting its occurrence on the basis of human events, even for Jesus himself; 13:32), life will continue to be marked by persecutions and suffering for Jesus' followers (13:9–13), causing some to fall away (4:16–17).

Cross and Resurrection: Since for Mark the key to making sense of Jesus is his destiny of cross and resurrection, Mark's Christology (i.e., his understanding of Jesus) is shaped by that same key point. While Jesus is clearly the royal Son whom God anointed ("Christ" means "anointed") to be King (1:1, 11; 9:7; cf. Ps. 2:2–9), such titles cannot be understood apart from Jesus' destiny in the cross and resurrection. Rather, the title the author has Jesus use to describe himself in terms of his destiny in this narrative is "Son of man." This title, which also has royal overtones (see Dan. 7:13–14), is nevertheless defined in Mark as being tied to Jesus' destiny on the cross. It is used when Jesus predicts his Passion (8:31; 9:31; 10:33–34), his coming glory (14:62), and the purpose of his life (10:45). Because no human being can understand Jesus in that way before his crucifixion, no one uses the title except Jesus himself. While true estimates of Jesus may be given, they are not intended in an accurate sense by those who give them (Peter in 8:29–33; Pilate's inscription in 15:26; the religious authorities in 15:32). Only after the cross, which for Mark is Jesus' enthronement (the chief priests' acknowledgment in 15:32 is ironic; they speak the truth without intending to), is it possible to recognize in him the Son of God (15:39). Thus Mark's Christology stands also under the same interpretative rubric of cross and resurrection as does the rest of his narrative.

The author of Mark thus created a theologically rich narrative by combining earlier traditions about Jesus into a story for which he provided occasional summary statements (1:32–34; 3:7–12; 6:53–56). Sometimes the author placed similar traditions together (conflict stories, 2:1–3:6; parables, 4:1–34), sometimes he sandwiched one inside another (5:21–43; 11:12–25), and sometimes he combined them into repeated cycles (8:31–9:8; 9:30–41; 10:33–52, which contain a prediction of Jesus' fate, the failure of disciples to understand, instructions on discipleship, and a proof of Jesus' exceptional nature). In that way, the author made his points more by the way in which he positioned the earlier traditions than by writing his own narrative material. Perhaps he felt constrained to use the earlier traditions in such a way that his readers would recognize in his narrative familiar elements of the career of Jesus and so would be more inclined to accept this narrative. The result nevertheless shows the composer to have been a person of powerful theological understanding who told the story of Jesus in the light of Jesus' fate in the cross and resurrection. ***See also*** Gospel, Gospels; Mark; Synoptic Problem, The.

marriage, the physical and spiritual union of a man and a woman. Gen. 2:21–24, in which God fashions one wife for Adam, expresses the biblical ideal of monogamous marriage (see Mark 10:6–9). However, the patriarchs practiced polygamy (Gen. 29:15–30). They also took concubines, especially in cases in which the wife had difficulty in conceiving children (Gen. 16:1–2). In the legislation of the Torah, it is taken for granted that a man may have two wives and that relationships were not always harmonious between them (Deut. 21:15). The kings of Israel were known to have had large harems, although the prevailing form of marriage was monogamy.

The unmarried woman, living in her father's house, was transferred into her husband's jurisdiction by his payment of the "bride price" (Heb. *mohar*) to her father (Gen. 34:12). If a man seduced a girl, he had to pay the bride price as a penalty and make her his legal wife (Exod. 22:16).

It is clear from Gen. 34:12 that the bride price was separate from the other gifts presented by the groom's family to the bride's. When the family of Rebekah accepted the terms of her marriage, Abraham's servant responded by presenting costly gifts to her, her mother, and brother (Gen. 24:53).

Marriages were generally contracted at a young age and arranged by the parents or at least with their consent. It was common to marry within the clan, and first cousins were suitable partners (Gen. 24:4; 28:2). The Bible prohibits consanguineous marriage (Lev. 18). Priests were subject to even more stringent marriage regulations than ordinary Israelites, such as the prohibition of marriage with a divorcée (Lev. 21:7).

There was usually a betrothal period after which the marriage was celebrated (Deut. 22:23). David was promised the oldest daughter of Saul, Merab, but when the time of the marriage came, she was given to Adriel (1 Sam. 18:17–19). It is not certain if written contracts were in use, as they are not mentioned until Tob. 7:14.

The central ritual of the marriage ceremony itself was the symbolic bringing of the bride into the groom's house, followed by great rejoicing. Song of Sol. 3:11 describes the bridegroom as wearing a special crown given to him by his mother, and in Isa. 61:10 he wears a garland. A later description relates that the bride was escorted to meet the groom, and the groom came out with his friends accompanied by musicians and the sound of tambourines (1 Macc. 9:37–39). The bride wore her finest clothes, many jewels (Isa. 61:10), and a veil (Gen. 29:23–25; Song of Sol. 4:1). There followed a lengthy celebration with merrymaking, singing (Jer. 16:9), and feasting often lasting a week or two (Judg. 14:12).

Marital faithfulness was the ideal (Prov. 5:18–29). The prohibition of adultery is one of the Ten Commandments central to the moral code of the Torah (Exod. 20:14; Deut. 5:18). While it was certainly considered a wrong against one's neighbor, it was also a sin against God. Marriage, therefore, became the metaphor with which to describe the relationship between God and Israel (Hosea 3). Prostitution was strongly condemned and often appears as a metaphor for grave sins associated with idolatry (e.g., Exod. 34:15; Deut. 31:16; Judg. 2:17; Hos. 9:1). The married couple was expected to develop a bond of mutual love and respect, which they, in turn, would pass on to their children.

A marriage could always be ended by the husband upon the presentation of a written bill of divorce permitting the wife to remarry (Deut. 24:1–2). However, it is not stated specifically what constituted grounds for divorce. The *tannaim* (early rabbinic sages) argued over whether adultery alone constituted sufficient grounds, or whether the husband could divorce his wife for any reason. The latter view was accepted in later Judaism. Mark 10:2–9, however, totally rejects divorce.

If a man had intercourse with a virgin, he was compelled to marry her and could never divorce her (Deut. 22:29). Similarly, he could not divorce a wife whom he falsely accused of not being a virgin when he married her (Deut. 22:19). A woman who was married to a man, divorced, and married to another, could never remarry the first (Deut. 24:3–4).

There was no law among biblical Israelites that allowed the woman to initiate divorce. Although it is not mentioned, it is probable that a husband who divorced his wife forfeited the bride price and was no longer able to make use of the property the wife brought into the marriage.

The levirate law is specified in Deut. 25:5–10. The brother of a man who dies without a son had an obligation to marry the wife who was left, and "the first son whom she bears shall succeed to the name of his brother who is dead." Tamar, daughter-in-law of Judah, tried to force Judah to fulfill his obligation to provide a levirate marriage for her (Gen. 38), and the marriage of Boaz to Ruth was intended in some way to fulfill this same custom (Ruth 4:10).

Some of the sectarians of the Second Commonwealth period, including the Essenes, practiced celibacy by separating from their wives after fulfilling the commandment of procreation. While, according to many scholars, members of the Dead Sea sect appear to have been celibate, they also seem to have been married, and a marriage ritual is presented in their scrolls.

In the NT, marriage is often used figuratively in connection with the Kingdom of God (e.g., Matt. 25:1–13; Luke 14:16–24; Rev. 19:7, 9), but it is an institution for the present rather than the future age (cf. Mark 12:25; 1 Cor. 7:8). It is nevertheless not to be taken lightly (Mark 10:9; 1 Cor. 7:10–11; Heb. 13:4); divorce (which in the NT world the wife could also initiate; Mark 10:12; 1 Cor. 7:13), if permitted at all, is only for the gravest of reasons (Matt. 19:9). The negative view of marriage found in Paul's first Letter to Corinth is due to his expectation of the end of the present age, rather than to a negative view of the institution as such (e.g., 1 Cor. 7:26–31). ***See also*** Priests.

Martha (mahr´thuh; Aramaic, "lady" or "mistress"; feminine of "lord"), a close friend and follower of Jesus as attested by Luke and John. According to Luke 10:38–42 she invites Jesus into her home, apparently as head of the household. She is described as "busy with much service" (Gk. *diakonia*), presumably meal preparation, while her sister Mary sits at Jesus' feet and listens to his teaching. Martha asks Jesus to tell Mary to help her, but Jesus replies that while Martha is troubled about "many things," only "one thing is needful" (or "a few things, indeed only one" in some ancient versions). The reference to "many things" may be to dishes for the meal, or perhaps to different kinds of service as in Acts 6:1–6, with Martha's kind corresponding with the office of deacon in the church as known to Luke.

This story may have influenced the account of Jesus' anointing in a home in Bethany in John 12:1–8. Here Martha serves while her brother Lazarus sits at table with Jesus, and her sister Mary anoints his feet. That John's Gospel sees Martha as an important disciple of Jesus is clear from the story of the raising of Lazarus in Bethany (11:1–44). Martha is named first, before Mary and Lazarus, as loved by Jesus (11:5). Going out to meet him, she receives teaching concerning the resurrection, acknowledges him as Lord, and confesses faith in him as "the Christ, the Son of God" (11:20–27). Although she expresses confidence in Jesus and his ability to receive from God whatever he asks (John 11:22–27), she expresses doubt at the tomb of Lazarus (11:39). ***See also*** Bethany; Mary. W.M.

martyr (Gk. *martys*), a technical term in second-century Christianity for those who showed allegiance to Christ by their death. In the NT, the death of Stephen (Acts 22:20) and references to Christians who suffered death (Rev. 2:13; 17:6) carry some of the nuances of this later meaning. The earlier Greek term, however, is generally translated "witness" (see Acts 7:54–58; Rev. 11:2–11, which emphasize the prophetic witness rather than the death itself). ***See also*** Witness.

Mary (mair´ee; Gk. *Maria* or *Mariam;* Heb. *Marah,* "bitter" or "grieved," or *Miryam,* "rebellion"), a name borne by seven women in the NT, unless two or more are identical. **1** Mary, the mother of Jesus. ***See*** Mary, The Virgin. **2** Mary of Bethany, the sister of Martha and Lazarus (Luke 10:38–39; John 11:1). She appears once in Luke, sitting at Jesus' feet and listening as a disciple to his teaching (10:38–42). Martha objects that Mary has left her to serve alone, but Jesus commends Mary's choice as that "which shall not be taken away from her" (10:42). In John's version Mary anoints Jesus' feet with costly ointment and wipes them with her hair while Martha serves (12:1–3). Jesus defends her against Judas Iscariot's objection that the ointment could have been sold and the money given to the poor (12:4–8). John also mentions her as present with Martha at the death and raising of Lazarus (11:19, 20, 28–32). Others follow her when she goes out to Jesus (11:31), and her grief moves him deeply (11:33). **3** Mary Magdalene, or "of Magdala," mentioned first in every listing of Jesus' female disciples (Mark 15:40–41, 47; 16:1; Matt. 27:55–56, 61; 28:1; Luke 8:2–3; 24:10). She therefore seems to have been the leader of a group of women who "followed" and "served" Jesus constantly from the outset of his ministry in Galilee to his death and beyond. Matthew and Mark acknowledge them only immediately after Jesus' death, but Luke mentions their presence with the Twelve in Jesus' ministry in Galilee (8:1–3). Here Mary is included among the many women who provided for Jesus' ministry from their own means and among a smaller number "healed of evil spirits and infirmities." That she was healed of some serious affliction is expressed by describing her as one "from whom seven demons had gone out" (v. 2). She is foremost as a witness to Jesus' death according to all four Gospels (Mark 15:40–41, 47; Matt. 27:55–56, 61; Luke

Martha and her sister, Mary of Bethany; from a fifth-century ivory of the two watching the raising of their brother Lazarus from the dead (cf. John 11:17–44).

23:49, 55–56; John 19:25), to the empty tomb (Mark 16:1–6; Matt. 28:1, 6; Luke 24:1–3, 10; John 20:1–2), and in receiving the news or appearance of the risen Christ to tell to the disciples (Mark 16:6–7; Matt. 28:5–9; Luke 24:4–10). According to Luke the women's testimony was not believed but was later vindicated (24:11, 22–48). According to John 20:11–18 the risen Jesus appeared first to her and talked with her about his coming ascension (v. 17). She is characterized as an apostle in some apocryphal NT writings (e.g., *The Gospel of Philip*). She rivals Peter in that she receives revelations from the risen Christ to pass on to the rest of the apostles. **4** Mary, the mother of James, or of James and Joses or Joseph, or "the other Mary," among the women disciples at the cross (Mark 15:40; Matt. 27:55–56), with Mary Magdalene at the burial, empty tomb (Mark 15:47; 16:1; Matt. 27:61; 28:1), and first appearance of the risen Christ (Matt. 28:9). **5** Mary, the wife of Clopas, one of the women at the cross in John 19:25, often taken to be the same as Mary the mother of James and Joses. **6** Mary of Jerusalem, whose home was used as a meeting place for Jesus' followers after his death. Many were praying there when Peter arrived after his escape from prison to leave a message for James and the brothers and sisters (Acts 12:11–17). That no husband is mentioned may mean that she is the widowed head of the household and so perhaps leader of one of the house-churches mentioned in Acts 2:46. Rhoda, the "maid" or "little girl" who went to the door (v. 13), could be a slave member of the household, pointing to it as substantial. Mary's son John, also known as Mark, accompanied her nephew Barnabas (Col. 4:10) and also Paul on some of their missionary travels (Acts 12:25; 13:5, 13; 15:37–39). **7** Mary, one among many greeted by Paul in Rom. 16:1–16 and described as having "worked hard among you" (16:6), perhaps as a teacher or administrator (see 1 Cor. 12:28).

Swidler, L. *Biblical Affirmations of Women.* Philadelphia: Westminster, 1979. W.M.

Mary, the Virgin, the wife of Joseph, known as "the Virgin" because of her reported virginal conception of Jesus and perpetual virginity according to post-NT Mariology.

Paul refers to her obliquely in describing Jesus as "born of a woman, born under the law" (Gal. 4:4). "James the Lord's brother" in Gal. 1:19 suggests another son of Mary (but see below).

She is negatively portrayed in Mark, less so in Matthew, and positively in Luke. In Mark 3:21 Jesus' family seemingly accepts the verdict of the crowd that he is deranged and of the Jerusalem scribes that he is possessed by demons (3:21–30). When his mother and brothers come to seize him and ask for him, he characterizes those about him and those who do God's will as his family (Mark 3:33–35). Matt. 12:46–50 and Luke 8:19–21 contain the same story, but unconnected with the accusations and attempted seizure. Luke's wording in 8:21, "My mother and brothers are those who hear the word of God and do it," includes them in Jesus' true family.

In Mark 6:1–6 people of "his own country" take offense at him as "the carpenter, the son of

Mary and brother of James and Joses and Judas and Simon" and unnamed sisters (6:3; taken to be relatives, not siblings, by those holding to Mary's perpetual virginity). Jesus' response, "A prophet is not without honor, except in his own country, and among his own kin, and in his own house" (6:4), evidently includes his mother. Luke's version (4:16–30) excludes the reference to his mother, brothers, and sisters and identifies Jesus as "Joseph's son" (4:22).

Matt. 1:18–25 and Luke 1:26–56; 2:1–38 give differing birth stories, but both include the virginal conception, announced to Joseph in a dream in Matt. 1:18, 25, to Mary by the angel Gabriel in Luke 1:26–38. Mary accepts as God's servant the angel's announcement (Luke 1:38) and travels from Nazareth to Judea, to her pregnant kinswoman Elizabeth, who hails her as "blessed among women" and "the mother of my Lord" (1:39–45). Mary responds with a hymn of praise (1:46–55, the Magnificat). In Matthew Mary and Joseph are in Bethlehem at the birth, in a home where Mary and the child are found by wise men from the east, bringing precious gifts (2:1–13). Joseph takes Mary and Jesus to Egypt to escape Herod's slaughter of male children, eventually to settle in Nazareth (2:12–23). In Luke the couple travel from Nazareth to Bethlehem for a Roman census, where Mary gives birth (2:1–7), and angels and shepherds pay homage (2:8–20).

In Luke the scene moves to the Temple for after-birth purification and consecration of the firstborn (2:21–24). Here the aged Simeon and Anna acknowledge the Messiah's birth (2:25–38), with Simeon telling Mary, "a sword will pierce through your soul also" (2:35), perhaps characterizing her as hearing and doing God's word (cf. 1:38; 8:21 with Heb. 4:12). Luke also has a blessing on Jesus' mother from a woman in the crowd, which he applies to those who hear and keep God's word (11:27–28).

Luke tells of an exchange between the boy Jesus and his mother in the Temple, in which he places God above his parents (2:21–40). Luke also includes her among the women disciples praying in the upper room with the Twelve (Acts 1:41), and so also as one who received the Holy Spirit at Pentecost, as she did at Jesus' conception (Luke 1:35; Acts 2:1–4).

Jesus' mother is unnamed in John's Gospel. Her belief in Jesus' power is demonstrated at the wedding in Cana (2:1–11), though he initially resists her appeal (v. 4). She and his brothers accompany him to Capernaum (2:13). Later she is excluded from the brothers' unbelief (7:1–10), appearing at the cross with her sister, Mary (wife of) Clopas, Mary Magdalene, and the beloved disciple, whom Jesus commends to his mother as her son, and this "son" to her as "mother." She is then taken into his home (19:25–27).

The woman who gives birth to the Messiah in Rev. 12:2, 5 is not taken to be Mary, but as a symbol of God's people (Israel and the church) who bring forth the Christ. ***See also*** Magnificat; Virgin Birth.

Masada (muh-sah´duh; Heb. *mesadah,* "stronghold"), a rock forming a massive natural stronghold that stands in the Judean desert near the western shore of the Dead Sea, some twelve miles south of En-gedi. The site was probably first fortified by Alexander Jannaeus (103–76 B.C.), whose coins were found in abundance in the course of Yigael Yadin's excavations in the 1960s. Remains of Hasmonean building were not found, perhaps because they were completely engulfed by the much more extensive construction carried out by Herod the Great (ruled 40–4 B.C.). Herod the Great's military architects turned the entire top of the 1300-foot-tall rock into a walled citadel, abundantly provided with food and water storage facilities not only for a strong garrison but also for palaces for the king and his family. Masada was the place where the last group of Zealots held out in the First Jewish War, falling in A.D. 73 to a Roman attack made possible by the construction of a still extant ramp leading to the top. Yadin claimed that his excavation results basically confirmed Josephus' dramatic account of the suicide of Masada's defenders. ***See also*** Herod; Maccabees; Zealot. F.O.G.

Maskil (mas´kil), a Hebrew word of uncertain significance that appears in the headings of some thirteen psalms, Psalms 32, 42, 44, 45, 52, 53, 54, 55, 74, 78, 88, 89, and 142. Some current versions of the Bible leave the word untranslated, while others, in accordance with its apparent root meaning of "understand" or "ponder," translate it as "instruction" or the like. Scholars have suggested that *maskil* is possibly a technical term relating to the manner of a psalm's performance, and/or a class of composition. The latter hypothesis is supported by the Psalter's use of other apparent class names in parallel fashion, as well as by the appearance of the word in Amos 5:13, where it may designate such a class. ***See also*** Psalms, The. J.L.K.

masons, craftsmen who build with stone. They along with stonecutters and carpenters were brought from Tyre to build David "a house" (2 Sam. 5:11; 1 Chron. 14:1), Solomon the Jerusalem Temple (1 Chron. 22:15), to repair it (2 Kings 12:12; 22:6; 2 Chron. 24:12), and rebuild it (Ezra 3:7). It is unclear precisely when local talent could fully displace the imported expertise.

It is unclear just how such a technician functioned in ancient times. Worked stone was presumably the province of the stonecutters, as may have been the quarrying of the supply. Whether the division of labor came at the point

where prepared stone was put in place, with or without mortar, is unspecified. The term may also have applied to brickmasons, although the common use of mudbrick throughout the Near East for superstructures of defense walls as well as common housing walls would suggest broadly available skills for that task. It is also possible that the term applied to well or cistern cutters, those who engineered underground water tunnels such as those found at Jerusalem, Megiddo, and Gezer; builders of subterranean kilns such as that found at Hesban; cutters of tombs, whether shaft or chamber type; and builders of bridges, levelers of roadbeds through rocky terrain, and builders of stairs, layers of cantilevered rock roofs, and other tasks requiring some sort of special knowledge and skill.

Reuse of stone from earlier buildings is frequently evident in the archaeological material, and knowledge of the quality of the product was essential to a builder (note a metaphorical reference to this in Ps. 118:22).

Whatever the precise division of labor, the easy access to stone supply in Palestine (contrary to the situations in Mesopotamia and the lower Nile valley) and the successful craftsmanship in stonework are amply evident in the archaeological remains in the country. Elaborate stone gateways are a hallmark of Solomonic achievement at Hazor, Megiddo, Shechem, and Gezer. The improved tools developed once iron technology was mastered are evident in the superior accuracy of stonecutting and joints fitted in this period, although the Early Bronze Age (3000–2000 B.C.) temple remains at Ai (modern et Tell) bespeak the remarkable skill of earlier generations. Header-stretcher walls were especially characteristic of Iron Age II period constructions (such as the defense wall at Samaria), and marginally drafted stones of the walls of Herod's Temple at Jerusalem stand to this day. The Neolithic defense tower at Jericho was the precursor of a series of stone defense systems that because of their size, stability, and cost were most frequently reused by successive occupants. The large rock-cut access to water, such as at Gibeon (modern el-Jib), attests the long, patient application to a common social need in which such craftsmen participated.

R.S.B.

Masorah (muh-sor´uh; Heb., "transmission"), the traditional Hebrew text of the Bible, preserved in rabbinic circles, with detailed notes and annotations added in order to maintain it intact. The siglum MT ("Masoretic Text") refers to this form of the text of the OT.

Massa (mas´uh), the seventh son of Ishmael (Gen. 25:14; 1 Chron. 1:30) and an ancestor of a north Arabian tribe (associated with Tema). The attribution of the words of Agur (Prov. 30:1) and Lemuel (Prov. 31:1) to the region of Massa suggests Arabian sources for that material.

Massah (mas´uh), according to tradition the spring in the wilderness where Israel tested the Lord. Following the gift of manna to the people in the wilderness, the people of Israel complained against Moses about the need for water. The Lord instructed Moses to strike a rock with his rod in order to provide for their needs. Moses named the place Massah (and Meribah) because of the Hebrew word that means "testing" or "trial" (Exod. 17:7; Deut. 6:16; 9:22; 33:8; Ps. 95:8).

master, one who owns property or exercises authority. **1** An owner of property (Exod. 21:4, 28; Luke 16:13; Acts 16:16; 1 Tim. 6:1). **2** One who exercises political authority (Gen. 45:8–9; 1 Sam. 26:19). **3** The husband of a wife (Deut. 24:4; 2 Sam. 11:26). **4** A polite form of address (Gen. 24:18; 33:8; 1 Kings 18:7). The word is also used of God (Deut. 10:17; Ps. 136:3; Eph. 6:9) and of Jesus Christ (Luke 5:5; 2 Pet. 2:1). Christians are admonished to call no one master but Christ (Matt. 23:10).

Mattaniah (mat´uh-n*i*´uh; Heb., "Yahweh's gift"). **1** A levitical musician from the sons of Heman who was appointed to the Temple by David (1 Chron. 25:4). **2** An Asaphite Levite who participated in Hezekiah's reform (2 Chron. 29:13). **3** The last king of Judah, renamed Zedekiah by Nebuchadnezzar, who appointed him to succeed his exiled uncle (or brother; 2 Kings 24:17–25:7). **4** A Levite, son of Mica, who returned to Jerusalem after the Exile (1 Chron. 9:15). **5** Four postexilic Israelites who divorced their foreign wives in response to Ezra's proclamation (Ezra 10:26, 27, 30, 37). **6** A name also used for other postexilic figures whose relationship to one another cannot be determined with certainty; a Levite who came back to Palestine from Babylonian exile with Zerubbabel (Neh. 12:8), a guard of the gates (Neh.12:25), a priest (Neh. 12:35), and the father of Zaccur (Neh. 13:13). ***See also*** Zedekiah. F.E.G.

Mattathias (mat´uh-th*i*´uhs; Heb., "gift of Yahweh"), a common name, particularly in the Maccabean period. **1** A priest of the family of Joarib (1 Macc. 2:1) or Jehoiarib (see 1 Chron. 24:7) who, with his five sons, called "Maccabees," began the revolt against Seleucid rule in 167 B.C. in their Judean village of Modein. **2** His grandson, Mattathias the son of Simon, who was murdered at the same time as his father (1 Macc. 16:14–17). **3** Mattathias the son of Absalom, one of the army commanders under Jonathan (1 Macc. 11:70). **4** One of the envoys sent by Nicanor to Judas Maccabeus (2 Macc. 14:19). **5** A name included twice in Luke's genealogy of Jesus (Luke 3:25–26). ***See also*** Maccabees. F.O.G.

Matthew (math'yoo), one of the original twelve disciples called by Jesus. Matthew appears in all four of the apostolic lists (Matt. 10:2–4; Mark 3:16–19; Luke 6:14–16; Acts 1:13). The tradition of the "call" of Matthew is found in Matt. 9:9, where his occupation at the time of the call is identified as that of tax collector (cf. Matt. 10:3). In the parallel accounts (Mark 2:13–14; Luke 5:27–28), however, the name of the tax collector called is Levi (the son or brother of Alphaeus according to Mark). The use of different names in these parallel passages has given rise to long-standing debate as to whether "Matthew" and "Levi" refer to the same person. The absence of "Levi" in the apostolic lists of Mark and Luke-Acts (as well as in Matthew) causes some to argue for two persons. Most, however, have maintained that "Matthew" and "Levi" constitute a double name (as, for example, "Simon" and "Peter," "Saul" and "Paul") and thus have argued that the reference is to the same person. If Matthew and Levi are the same person, then Matthew is "the son (or brother) of Alphaeus" (Mark 2:14) and thus perhaps the brother of James (not James the brother of John and son of Zebedee), also one of the Twelve (Matt. 10:3; Mark 3:18; Luke 6:15; Acts 1:13). Tradition credits Matthew with having composed the Gospel bearing that name, but this is questionable. ***See also*** Alphaeus; Apostle; Disciple; James; Levi; Matthew, The Gospel According to; Publicans; Twelve, The. P.L.S.

The Evangelist page of the Gospel According to Matthew from the *Lindisfarne Gospels* (ca. 700) depicts Matthew seated, writing in a codex. His symbol, an angel, is behind him.

Matthew, the Gospel According to, a Gospel most likely written about A.D. 90 by an unknown Christian who was most probably at home in a church located in or near Antioch of Syria. The date of A.D. 90 commends itself because the destruction of Jerusalem appears to be an event that was rapidly receding into the past (22:7). Although the apostle Matthew may have been active in founding the church in which this Gospel originated (9:9; 10:3), the author exhibits a theological outlook, command of Greek, and rabbinic training that suggest that he was a Jewish Christian of the second generation (cf. 13:52). Antioch of Syria is most likely the place of writing (cf. 4:24) because the social conditions reflected in Matthew correspond with those that seem to have prevailed there: the church of Matthew was resident in a prosperous, urban, Greek-speaking area and subject to persecution from the side of a seemingly large population of both Jews and Gentiles (5:10–12; 10:17–18; 24:9–14).

Composition: For most scholars, the Two-Source Hypothesis still explains best the composition of Matthew. Apparently, the author drew upon two written sources: Mark, and a collection of sayings of Jesus called Q. In addition, he used traditions available only to him (M). From these, he fashioned a theologically sophisticated story of the life and ministry of Jesus. The formula at 4:17 and at 16:21 divides this story into three main parts: the figure of Jesus Messiah (1:1–4:16); the public ministry of Jesus Messiah and Israel's repudiation of him (4:17–16:20); and the journey of Jesus Messiah to Jerusalem and his suffering, death, and resurrection (16:21–28:20).

The context of this story of Jesus is the history of salvation. It extends from Abraham (1:1, 17) to the consummation of the age (25:31–46) and comprises two epochs. The first epoch is the time of the OT, which is the time of prophecy (11:13). The second epoch is the time of fulfillment (cf. 1:22; 26:56), which is the time of the earthly-exalted Jesus (1:23; 28:20). The time of Jesus encompasses the ministries to Israel of John the Baptist (3:1–2), of Jesus (4:17), and of the earthly disciples (10:7), as well as the ministry to the nations of the post-Easter church (24:14; 28:18–20). Still, central to this time is the ministry of Jesus himself, for the ministry of John prepares for it and the ministries of the pre-Easter and post-Easter disciples are an extension of it (10:1–8; 28:18–20).

Major Themes: Matthew's story of Jesus proclaims a central message. It comes to the fore in 1:23 and 28:20, passages that "enclose" the story (cf. 18:20). The message is that in Jesus, Son of God, God has drawn near with his eschatological Rule to dwell to the end of time with his people, the church. This message summons the reader to perceive that God is uniquely present and at work in Jesus and that,

OUTLINE OF CONTENTS

The Gospel According to Matthew

I. Jesus presented (1:1–4:16)
   A. Jesus as fullfillment of end-time expectations (1:1–25)
      1. Jesus' ancestors recalled (1:1–17)
      2. Jesus' birth announced (1:18–25)
   B. Birth of Jesus (2:1–23)
      1. Appearance of the Magi (2:1–12)
      2. Jesus taken to Egypt (2:13–15)
      3. Slaughter of the innocents (2:16–23)
   C. Jesus and John the Baptist (3:1–4:11)
      1. John baptizes in Judea (3:1–12)
      2. John baptizes Jesus (3:12–17)
      3. Jesus tempted by Satan (4:1–11)
      4. Jesus in Galilee (4:12–16)
II. Jesus' ministry (4:17–16:20)
   A. Jesus' ministry to Israel (4:17–11:1)
      1. Jesus calls disciples (4:17–22)
      2. Jesus teaches (4:23–7:29)
      3. Jesus does mighty deeds (8:1–9:34)
      4. Jesus commissions the Twelve (9:35–11:1)
   B. Israel's repudiation of Jesus (11:2–16:20)
      1. Israel repudiates Jesus (11:2–12:50)
      2. Jesus speaks in parables (13:1–52)
      3. Rejection of Jesus and the death of John the Baptist (13:53–14:12)
      4. Jesus feeds, heals, and teaches (14:13–16:12)
      5. Disciples confess Jesus as Son of God (16:13–20)
III. Jesus in Jerusalem (16:21–28:20)
   A. Jesus predicts his passion in Jerusalem and journeys to it (16:21–21:11)
   B. Jesus in the Temple (21:12–23:39)
   C. Jesus speaks about end times (24:1–25:46)
   D. Jesus' trial and crucifixion (26:1–27:66)
   E. Jesus risen from the dead (28:1–20)

in becoming Jesus' disciple, one becomes a child of God, lives in the sphere of his end-time rule, and engages in mission to the end that all people may find God in Jesus and become Jesus' disciples.

To perceive God as present and active in Jesus and become Jesus' disciple, the reader must "receive" Jesus. To encourage this, the author makes extensive use of the "rhetoric of comprehension," to wit: Matthew guides the reader to look with approval or disapproval as he shows whether or not characters in his story, in "seeing" or "hearing" Jesus, respond to him by "receiving" him and "doing" the will of God as Jesus teaches it. By urging the reader to identify with those characters who "receive" Jesus and "do" God's will, Matthew would persuade the reader to emulate their example.

In the first, or beginning, part of his story (1:1–4:16), the author presents Jesus to the readers. Initially, he describes him as the Messiah, Son of David, and Son of Abraham (1:1). Jesus is the Messiah because he is the Anointed One, Israel's long-awaited King (1:17; 2:2, 4; 11:2–3). He is the Son of David because Joseph adopts him into the line of David (1:16, 18–25) and he fulfills the eschatological expectations associated with David (9:27–31; 12:22–23; 15:21–28; 20:29–21:17). He is the Son of Abraham because in him the entire history of Israel attains to its culmination and the Gentiles, too, find blessing (1:17; 8:11).

Upon Jesus' birth, the Magi arrive in Jerusalem and ask where they may find the King of the Jews (2:1–2). To Herod and, later, to Pilate as well, the title King of the Jews denotes that Jesus is a throne-pretender or insurrectionist. The result is that Herod plots to have Jesus found and killed (2:13) and Pilate, later, hands him over to be crucified (27:26, 37). In Matthew's perspective, Jesus is in truth the King of the Jews, not, however, because he aspires to the throne of Israel or foments rebellion against Rome but because he saves his people by submitting to suffering and death (27:27–31, 37, 42).

John the Baptist is Elijah brought back to life, the forerunner of Jesus (3:1–12; 11:12). He readies Israel for Jesus' coming by calling Israel to repentance in view of the nearness of God's end-time Kingdom and the final judgment (3:2, 10–12).

The baptismal scene constitutes the climax of the first part of Matthew's story (3:13–17). After John has baptized Jesus, God empowers Jesus with his Spirit and declares him to be his unique Son whom he has chosen for messianic ministry (3:16–17). This declaration by God reveals that Jesus is preeminently the Son of God in Matthew's story. The significance of this title is that it points to the unique filial relationship that Jesus has to God; conceived and empowered by God's Spirit (1:18, 20; 3:16–17), Jesus is "God with us" (1:23), the one through whom God reveals himself to humankind (11:25–27) and who is God's supreme agent of salvation (1:21; 26:28).

Guided by the Spirit, Jesus submits to testing by Satan (4:1–11). Three times Satan endeavors to get Jesus to break faith with God. Jesus, however, resists Satan's temptations and shows himself to be the Son who knows and does his Father's will. Returning to Galilee, Jesus is poised to begin his public activity (4:12–16).

In the second, or middle, part of his story (4:17–16:20), the author tells of Jesus' ministry to Israel (4:17–11:1) and of Israel's repudiation

of him (11:2–16:20). Through his ministry of teaching, preaching, and healing (4:23; 9:35; 11:1), Jesus summons Israel to repentance (4:17; 11:20–21). Israel, however, repudiates Jesus (chaps. 11–12), yet wonders and speculates about his identity (11:3; 12:23; 13:55–56; 14:2; 16:14). Against the background of Israel's false views about Jesus' identity (16:14), the disciples correctly confess him to be the Son of God (14:33; 16:16).

In the third, or end, part of his story (16:21–28:20), the author depicts Jesus' journey to Jerusalem and his suffering, death, and resurrection. The passion predictions sound the theme (16:21; 17:22–23; 20:17–19), and the motif of the journey binds together disparate materials (16:21–21:11). In Jerusalem, Jesus makes the Temple the site of his activity, where he teaches, debates, and speaks in parables (21:12–23:39). Addressing the parable of the wicked husbandmen to the Jewish officials, Jesus raises the claim that he is the Son of God whom the officials will kill (21:37–39). In wanting to arrest Jesus for telling the parable (21:45–46), the Jewish officials show that they reject Jesus' claim.

At his trial, it is the claim of Jesus' parable to be the Son of God that the high priest puts to Jesus to secure his condemnation (26:63–66). When Jesus replies to the high priest's question in the affirmative (26:64), he is sentenced to death for blaspheming God. The irony is that God has indeed affirmed Jesus to be his Son (3:17; 17:5).

Upon Jesus' death, the Roman soldiers also affirm Jesus to be the Son of God (27:54). What the readers know that the soldiers do not is that the death of Jesus Son of God constitutes the climax of his earthly ministry and the act whereby he atones for the sins of humankind (1:21; 26:28). Atop the mountain in Galilee, Jesus appears to the disciples as the resurrected Son of God who remains the crucified Son of God (28:5, 16–20). Seeing Jesus as such, the disciples at last perceive not only who he is (16:16) but also what he has accomplished (26:28), and they consequently receive his commission to go and to make of all nations his disciples (28:18–20). Matthew's story ends, therefore, with both the disciples and the readers sharing the same perception of Jesus and receiving his commission.

Entwined with the story line of Jesus in Matthew is that of the disciples. Called by Jesus, his followers live in the sphere of God's end-time Rule and form a "family" (12:48–50) of the "sons of God" (5:9, 45) and of Jesus' "disciples" (10:24–25). This new family becomes the church (16:18; 18:17). The quality of life that characterizes the disciples is that of the greater righteousness (5:20). The disciples exhibit this quality when they are perfect (5:48), that is, when they are wholehearted in doing the will of God as explicated by Jesus (7:21). At the center of doing the will of God is the exercise of love (22:34–40). Loving as God loves, therefore, is of the essence of Christian existence (5:44–45). ***See also*** Abraham; Antioch; Baptism; David; Disciple; Gospel, Gospels; John the Baptist; Kingdom of God; M; Messiah; Q; Son of God; Synoptic Problem, The; Temptation.

Matthias (muh-th*i*ʹuhs), according to Acts 1:15–26, the successor among the Twelve Apostles to Judas Iscariot. After prayer, Matthias was chosen by lot over another candidate, Joseph called Barsabbas. According to Acts, both men had been with Jesus from the beginning of his ministry until his ascension. The NT contains no other reference to Matthias. ***See also*** Apostle; Barsabbas; Twelve, The.

Mattithiah (matʹuh-th*i*ʹuh; Heb., "gift of Yah [God]"). **1** A Levite who was in charge of baked goods in the Temple (1 Chron. 9:31). **2** A Levite gatekeeper of the clan of Merari during the reign of King David (1 Chron. 15:18). **3** A Levite musician during the time of David (1 Chron. 15:21); he is probably the same musician chosen to help celebrate the transfer of the Ark of the Covenant to Jerusalem (1 Chron. 16:5); and he is possibly also the same Levite of the clan of Jeduthan who was head of the fourteenth course of musicians (1 Chron. 25:3; 21). **4** A postexilic member of the clan of Nebo who took a foreign wife (Ezra 10:43). **5** One, probably a Levite, who was with Ezra at the reading of the law (Neh. 8:4). D.R.B.

mattock, an agricultural tool with a double-bladed metal head, often made with one blade attached at a hoelike angle and the other in an axelike position. Farmers used the mattock to loosen soil and dig weeds in fields and terraced vineyards (cf. Isa. 5:6; 7:5).

While the KJV uses "mattock" to translate three Hebrew words in three passages (1 Sam. 13:20–21; 2 Chron. 34:6; Isa. 7:25), the RSV uses mattock only in 1 Sam. 13:20–21, a passage that says the Hebrews were obliged to take their farm implements to the Philistines for sharpening. ***See also*** Farming; Metals; Tools.

maul, the term used in the KJV for the RSV's "war club" in Prov. 25:18, suggesting a mace or heavy stick used as a common infantry weapon in antiquity. It may have been topped by a heavy knob or hafted to a stone for increased ef-

ficiency. Some mace heads were inscribed or decorated with ceremonial or royal insignia.

Maundy Thursday, the Thursday before Easter on which Christians memorialize the last supper Jesus ate with his disciples. "Maundy" comes from Latin "mandatum (novum)," the words in John 13:34 (Vg) used in the service of foot washing observed in the Catholic Church on the Thursday before Easter. According to an ancient agricultural calendar evidently observed by Jesus, this was the date of Passover. According to the Roman Calendar, Passover occurred the following night.

meadow, a flat open portion of pasture or field. Suitable for grazing (Ps. 65:13; KJV: "pastures"), it also serves as a symbol for desolation in a prophetic curse on a seacoast population (Zeph. 2:6), its isolation and overgrown state compared to its former thriving life.

meal offering. *See* Worship.

meals, food taken at regular intervals, often in the presence of others. The ancient Israelite usually ate two meals a day, a light meal in late morning or at midday and a more substantial meal in the evening, around sunset. In ancient Palestine the normal diet might include the following foods: bread, cooked or parched grain (wheat, barley, millet), wine, cheese and curds (primarily from goats' milk), figs or fig cakes, grapes and raisins, dates, olives, wild honey, beans and lentils, melons, and cucumbers. Onions, leeks, and garlic supplied seasoning; olive oil was used for cooking. Poultry and eggs became common only relatively late in Israelite history. The NT indicates that fish was a common food in the first century. Except among the wealthy, meat was not part of the daily diet but was reserved for special occasions such as feasts or sacrifices (see Lev. 7:11–18). The Torah emphatically distinguishes between living creatures that may be eaten and those that may not (Lev. 11; Deut. 14). The Torah also stresses that meat to be eaten must be entirely drained of blood, for "the blood is the life" (Deut. 12:23; see Gen. 9:4; Lev. 17:14). Sheep and goats were the main sources of meat, and the tail of the sheep was considered a special delicacy.

Significance of Meals in Ancient Israel: In Israel, meals were much more than occasions for satisfying hunger, for it was understood that persons who ate and drank together were bound to one another by friendship and mutual obligation. Moreover, the meal could be intensely symbolic when it was eaten in conjunction with the making of a covenant between persons (e.g., Gen. 26:28–30; 31:43–54) or between God and his people (Exod. 24:9–11). The Israelite experience of eating "before the Lord" when one brought sacrifices and offerings (e.g., Deut. 12:6–7; 14:22–26) perhaps reflects the ancient view that through a sacred meal human beings can commune with the deity.

Especially when accompanied by wine and the entertainment of music and dancing (Isa. 5:12; Ecclus. 32:3–6; Luke 15:22–25), meals were fitting occasions for celebration and rejoicing (cf. Amos 8:10), and feasts often marked events of special significance, such as a sheep shearing (2 Sam. 13:23–28), a wedding (Judg. 14:10), or the return of an absent family member (Luke 15:22–24). The "appointed feasts" prescribed by Torah (e.g., Weeks) or tradition (e.g., Purim) were celebrations of God's beneficence on behalf of his people, the most important festal meal in Israel being, of course, Passover. The Passover meal proper came to be celebrated on the first evening of the seven-day Feast of Unleavened Bread, a feast tied closely with Passover in the Pentateuch and, with it, Israel's primary commemoration of the Exodus from Egypt (Exod. 12; Num. 28:16–25; Deut. 16:1–8).

Among the Jewish sectarians at Qumran on the western shore of the Dead Sea, the daily communal meal, which began with a priestly blessing of the bread and wine, bore special religious significance—perhaps because it anticipated the banquet of the new age when the two messiahs, priestly and royal, would be present (1QS 6:2–5; 1QSa 2:11–22). This expectation is reminiscent of Isa. 25:6–8, where a "feast of fat things" symbolizes God's eschatological salvation.

In NT Times: From scattered clues we can glimpse something of the etiquette that prevailed at banquets given by the well-to-do in NT times. It prescribed, for example, the proper kind of clothes to be worn by guests (Matt. 22:11–12), the obligations of the host to greet his guests with a kiss and provide for the washing of their feet (Luke 7:44–45; cf. Judg. 19:21), and the responsibilities of the banquetmaster (Ecclus. 32:1–2). In the Palestine of Jesus' day it was apparently customary to issue two invitations to a banquet—the first some days ahead of time and the second when the meal was ready (Luke 14:16–17). Once arrived, the guests were seated according to age or rank (cf. Luke 14:7–11).

In describing meals that Jesus participated in, the Gospels state that he reclined (at table). This expression indicates that in the Palestine of Jesus' day the Greco-Roman custom of reclining at formal meals had become widespread. (Amos 6:4–6 would seem to show that the practice of reclining at meals, perhaps of Mesopotamian origin, is even older.) On couches placed around a large table (or three tables placed to form an open-ended rectangle), guests and host reclined on the left elbow and ate with the right hand, body diagonal to the couch and feet extending off the back. Usually three persons reclined on one couch. The reclining posture at table explains how Luke could describe the woman with the ointment as standing behind

Jesus while anointing his feet (Luke 7:36–38). It also explains how, in the Gospel of John, Jesus could wash the disciples' feet as they ate (13:5) and how the beloved disciple could recline on Jesus' breast (13:23).

By NT times the blessing of the food at the beginning of a meal had become standard practice in Judaism; when wine was drunk, a prayer of thanksgiving over the cup concluded the meal. The Pharisees, in addition, insisted on the ritual washing of hands. Although Jesus blessed the food before eating, he and his disciples did not adopt the practice of handwashing (Mark 7:1–5; Luke 11:37–38).

In Jesus' Ministry: Jesus' table fellowship with his followers was an important feature of his ministry, and according to the Gospels his eating with "tax collectors and sinners" drew criticism from his detractors. Their accusation that he was a "glutton and a drunkard" (Matt. 11:18–19; Luke 7:33–34) suggests that, unlike John the Baptist, Jesus took pleasure in eating and drinking. His table fellowship was intended to symbolize for his companions the blessing of joyous fellowship in God's presence that would characterize the new age (cf. Matt. 8:11 with 11:18–19). According to one interpretation, in the Lord's Prayer Jesus taught his disciples to pray, "Give us this day tomorrow's bread"; so understood, this petition was a plea that God would allow a foretaste of future blessedness amid the afflictions and failures of the present age. It may be in light of the bread/banquet image of future blessedness that we should understand the Gospel stories about Jesus' feeding of the multitudes (Mark 6:30–44 and parallels; Mark 8:1–9 and parallels; John 6:1–14).

Several times in the gospels, especially in Luke, a meal is the setting for important teachings of Jesus (Matt. 9:10–13; Luke 7; 11:37–52; 14:1–24), and some of Jesus' parables have to do with a feast or feasting (Matt. 22:1–10; Luke 14:16–24; Matt. 22:11–13; Luke 15:11–32; cf. Matt. 25:10; Luke 16:19–21). As Matthew and Luke understand it, the parable of the great banquet (Matt. 22:1–13; Luke 14:16–24) is a story about the salvation that God offers the world.

Several appearances of the risen Jesus to his disciples occur in the setting of a meal. It was only when Jesus blessed and broke the bread that the eyes of Cleopas and his companion were opened so that they recognized him (Luke 24:30–31). In John 21 the Risen One gives his disciples bread and fish to eat beside the Sea of Galilee (vv. 9–13; see also Luke 24:41–43).

In Early Christianity: Meals continued to be crucially important in early Christianity. The book of Acts describes the Christians in Jerusalem after Pentecost as attending the Temple, breaking bread in their homes, and partaking of food "with glad and generous hearts" (2:46). The reference here may be to one of the two early Christian sacraments, the Lord's Supper, which was originally a full hunger-satisfying meal (note the phrase "after supper" in Luke 22:20 and 1 Cor. 11:25, implying a full meal). Having its origin in Jesus' last meal with his disciples before his death (itself to be viewed in the context of his regular table fellowship), the Supper was a commemoration of the crucified Lord and a means by which the risen Lord was present among each community of believers. By at least the middle of the second century the sacrament of bread and wine had been separated from the communal Christian meals, which in the letter of Jude are now called "love feasts" (12).

In the Revelation to John believers are invited to "the marriage supper of the Lamb" (19:9), but at the "great supper of God" the birds of the air will feed on the flesh of the world's kings, captains, and mighty men (19:17–18; cf. Ezek. 39:17–20). Thus in the last book of the Bible the banquet is an image of both God's greatest reward and his most awful punishment. ***See also*** Feasts, Festivals, and Fasts; Food; Lord's Supper, The; Passover. meat offered to idols. ***See*** Food Offered to Idols.

Medan (mee´dan), the third son of Abraham by Keturah (Gen. 25:2; 1 Chron. 1:32); the term may possibly also be a reference to the inhabitants of Midian.

Medeba (med´uh-buh), a city and surrounding territory located on a fertile plateau approximately six miles south of Heshbon and twenty-five miles south of Amman.

It is mentioned along with Heshbon and Dibon (Num. 21:30) in the account of the land taken by the Israelites from Sihon. The tableland of Medeba is part of the inheritance of Reuben (Josh. 13:9, 16). In a battle between Joab and an Ammonite-Syrian coalition, the Syrians encamped before Medeba (1 Chron. 19:7). In the Moabite Stone the Israelites are said to have occupied the land of Medeba for forty years. Mesha, king of Moab, claims to have recaptured and rebuilt it. It is included in Isaiah's oracle against Moab (Isa. 15:2). John, the oldest son of Mattathias, was ambushed by the sons of Jambri from Medeba during the Maccabean revolt against Syria, begun in 167 B.C. (1 Macc. 9:36). Jonathan and Simon, his brothers, took revenge by annihilating a wedding party of their enemies (1 Macc. 9:37–42). The Jewish historian Josephus relates that John Hyrcanus, Simon's son, captured Medeba after a six-month siege. He also says that Alexander Jannaeus took it along with other towns and that Hyrcanus II promised to restore them to Aretas, king of the Nabateans.

The Romans made Medeba a provincial town. It continued to flourish until the end of the Byzantine period (A.D. 640). During this period it was the seat of a bishopric and it is mentioned in the articles of the Council of Chalcedon (A.D. 451). The most impressive archaeological remains at Medeba are the mosaics, which date from the Byzantine period. The chief mosaic, the Medeba Map, dates from the sixth century A.D. It is now housed in the Greek Orthodox church in the town. ***See also*** Dibon; Heshbon; Mesha; Moabite Stone, The; Nabatea, Nabateans; Reuben. B.M.

Media (mee´dee-uh), **Medes** (meeds), the names of a place and people often associated with that of Persia (especially in the books of Esther and Daniel). Media became a province of the Persian Empire in 549 B.C. when the Medan overlord was conquered by Cyrus the Great. The area of Media appears as one to which deportees from the Northern Kingdom were taken in 722 B.C. (2 Kings 17:6; 18:11). Ecbatana (Agbatana), the Medan capital, located some four hundred map miles north of the Persian Gulf, became one of the administrative centers of the Persian Empire (Ezra 6:2). In the stories related in the book of Esther and in Daniel 5 and 6, the laws of Medes and Persians are described as unalterable (e.g., Esther 1:19; Dan. 5:28), a description that is evidently a folk-tale motif, related to the prohibition on altering laws found in numerous ancient legal texts (cf. Deut. 4:2; 12:32; Ezra 6:11). The Medes appear as the divine instrument of judgment on Babylon in Isa. 13:17; Jer. 51:11, 28; also with Elam in Isa. 21:2 (cf. Jer. 25:25 in a picture of total judgment on Babylon at the hands of all the nations).

Dan. 5:31; 9:1; and 11:1 introduce a "kingdom of the Medes" that existed between the fall of the Babylonians and the rise of the Persians. This has no historical basis. It may perhaps best be understood as expressing the fulfillment of those prophetic texts that envisage the overthrow of Babylon by the Medes. Acts 2:9 includes Media as one of the areas from which Jewish pilgrims have come to Jerusalem.

The history of the Medes before their empire was taken over by Cyrus is obscure at many points. They appear in numerous Assyrian inscriptions from the mid-ninth century B.C. onwards, established in the area of modern Iran and penetrating the Zagros mountains. Herodotus, the fifth-century B.C. Greek historian, has an account of their history, but appears to have no real knowledge of the chronology. The extent of their empire is a matter of debate; it was evidently fully developed in the seventh century B.C. The Medes took a major part in the eventual overthrow of the Assyrians, capturing Nineveh in 612 B.C. and sacking Harran in 610. In the early sixth century, the Medes came into conflict with the Lydians in Asia Minor, a conflict that was to be brought to a successful conclusion by Cyrus. Under the Persians, Media was a large province. It appears probable that the administrative title "satrap," associated particularly with the organization of the Persian Empire by Darius I, was of Medan origin. ***See also*** Cyrus II; Darius; Persia.

Medan nobles march up a stairway at Persepolis, bringing gifts to the Persian king Darius I (521–486 B.C.).

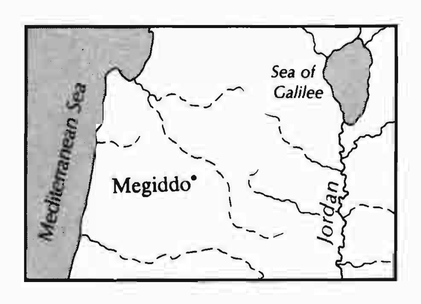
mediation, mediator, the activity and person performing it of functioning as a go-between or intermediary between two people or parties, in order to initiate a relationship, promote mutual understanding or activity, or effect a reconciliation after a dispute. In the study of religion mediation usually refers to a person who represents the community in worship and other contacts with divine beings. In the OT various figures in Israel's history mediate between God and humans and in the NT Jesus is the unique mediator who reconciles sinful humans to God.

In the OT: In the OT the priests are religious mediators between humans and God. Their functions include offering community and private sacrifices, praying and singing in the Temple, protecting the integrity of the holy places and rituals, and maintaining themselves in a state of ritual purity. All the religious regulations concerning priests, holy places, worship, and the

Temple were designed to render humans holy so that they could relate to a God who is holy. The priests themselves were consecrated to their special office (Exod. 29; Lev. 8) as mediators between the profane and the holy. Priests also blessed the people (Num. 6:22–27) and offered the first fruits brought to the Temple by the people (Deut. 26:1–10). The mediating function of the priesthood can be seen most clearly on the Day of Atonement, when the high priest alone entered the Holy of Holies, the inner chamber of the Temple, to offer incense in atonement for all the sins of the people during the past year (Num. 16).

Major OT leaders also mediated between God and Israel. Abraham sacrificed and prayed to God in the name of his clan (Gen. 12:7–8) and he also interceded on behalf of Sodom and Gomorrah (Gen. 18:22–33). Jacob sacrificed to God and received God's blessing on all his descendants in Israel (Gen. 35:1–15). Moses mediated between God and the Hebrews in Egypt, during the wandering in the desert, at Sinai, and when Israel sinned by worshiping the golden calf (Exod. 32:30–34). Joshua mediated between God and the people in the making of the covenant in Israel (Josh. 24:14–28), Samuel mediated the appointment of the first king (1 Sam. 8–12), and Solomon prayed in the people's name at the dedication of the Temple (1 Kings 8:22–53). The prophets who acted as God's messengers in bringing his word to the people also acted as mediators in effecting reconciliation between the people and God (Jer. 14:1–9). Finally, the Suffering Servant found in Second Isaiah 53, whatever his identity, atones for the sins of Israel and effects a reconciliation between God and Israel.

In the NT: In the NT Jesus is explicitly called a mediator in only four passages, one from the Pauline literature and three from Hebrews. "For there is one God, and there is one mediator between God and men, the man Christ Jesus, who gave himself as a ransom for all" (1 Tim. 2:5–6). In Hebrews Christ is three times said to mediate the new covenant between God and humans (Heb. 8:6; 9:15; 12:24). Hebrews also develops a notion that is found in the passage from 1 Timothy, namely, that Jesus redeems humans. All these statements in Hebrews are set in the context of the new temple in heaven where Christ is the high priest and the one perfect sacrifice. Jesus also mediates by praying for his disciples (John 17; Matt. 11:25–27), by healing, by teaching God's word, and by forgiving people their sins. All of Jesus' activities to save humans can be looked on as mediation between God and humanity (though the NT does not use that category to characterize Jesus' work and words). Consequently, believers are instructed to pray in Jesus' name to God (John 14:13). Many Pauline and Gospel passages say or imply that contact with God is through Jesus Christ and this implies mediation by Jesus. A.J.S.



Mediterranean (med'i-tuh-ray'nee-uhn) **Sea,** the large sea enclosed by the coasts of Europe, North Africa, Asia Minor, and Syro-Palestine. Its islands and coastal borders formed the basis for trade and the exchange of cultures as well as colonization and conquest from the second millennium B.C. on. Although there are occasional references to the Mediterranean Sea in the OT (e.g., Pss. 29:3; 104:25–26) lack of seaports kept the Hebrews from becoming seafarers. It remained a mysterious and forbidding part of their world.

Greek culture spread along the coastal areas of the eastern half of the Mediterranean. The coast of Spain and of Africa in the vicinity of Carthage and its colonies was romanized. People in these areas spoke Latin and adopted a Roman way of life.

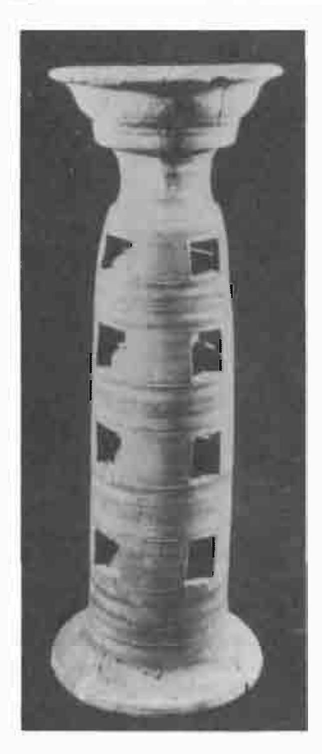
Surveys of shipwrecks in the Mediterranean show that the major period of trade extended from 300 B.C. to A.D. 300, with its peak in the middle of this period. Ships hugged the coast of the Mediterranean in sailing from one place to another. Roman ships could carry as many as three thousand amphorae (large jars used for storing grain, etc.). Ignoring risks from storms, it was possible to ship grain from one end of the Mediterranean to another for less than it would cost to cart the same amount seventy-five miles over land. Hence bulk goods were generally transported by sea. The apostle Paul frequently traveled on such ships (Acts 16:11; 20:6; 21:1–3) and was on one that was wrecked by a storm (Acts 27:13–44). ***See also*** Sea. P.P.

meek, the quality characteristic of humility when coupled with gentleness. The meek person not only does not threaten or challenge others but accepts others openly and confidently, e.g., Moses (Num. 12:3) and Jesus as teacher (Matt. 11:29). God promises his Holy Land to such persons (Ps. 37:11; Matt. 5:5). ***See also*** Humility.

Megiddo (mi-gid'oh), an important city in antiquity located in the Plain of Esdraelon in northwestern Palestine, now identified with modern Tell el-Mutesellim, about twenty miles southeast of Haifa and ten miles northwest of Jenin.

Strategic Location: Megiddo owes its importance to its strategic location, good water supply, and the fertile valley. Two important routes for armies and trade passed at its foot. From Jerusalem in the south, one passed through Shechem and then Megiddo alongside the Carmel range, to Acco on the coast and north to Phoenicia. The second linked Egypt with Damascus and Mesopotamia along the coast of Palestine by way of the Philistine and Sharon plains, passing through the Carmel range by way of Megiddo and then the Plain of Esdraelon (or Megiddo Plain). This is the easiest pass through the Carmel ridge, and throughout history Megiddo's location has made direct control of it a matter of singular strategic importance, from the armies of Thutmose III in the fifteenth century B.C. to General Allenby's march in World War I. Travelers and traders as well have passed through Megiddo from the Stone Age to the present.

In the Bible and Other Ancient Texts: Megiddo is mentioned in a number of Egyptian and Assyrian texts as well as in the Bible. One of the most important is the fifteenth-century B.C. annals of Thutmose III inscribed on the wall of the Temple of Karnak in Upper Egypt. Megiddo's defeat is described in detail, elaborating the battle plan, the booty of prisoners, chariots, and household goods, and the tribute of gold, silver, grain, and wine. The Barkal Stele erected at the Fourth Cataract of the Nile gives more details of this campaign.



Egypt's domination of Megiddo is attested in the later fifteenth century B.C. by two texts. In one of the Taanach Letters the king was ordered to send tribute to Megiddo. An Egyptian papyrus, Hermitage 116A, gives lists of emissaries who were supplied with provisions. Amarna Letter 244 was written by the prince of Megiddo concerning the threats to his town, and five other letters from Prince Biridiya to the pharaoh are known. An Egyptian letter of the nineteenth dynasty (end of the thirteenth century B.C.) describes the road from Megiddo to the coastal plain.

According to the OT, Joshua defeated a king of Megiddo (Josh. 12:21), and although the town was given to the tribe of Manasseh (Josh. 17:11; 1 Chron. 7:29), the Canaanites were not driven out (Josh. 17:12; Judg. 1:27). "At Taanach, by the waters of Megiddo" Deborah and Barak met the Canaanites (Judg. 5:19), but it may have been the time of David before the city was firmly in Israelite hands. Megiddo was in one of Solomon's administrative districts (1 Kings 4:12), and he fortified Megiddo along with Jerusalem, Hazor, and Gezer (1 Kings 9:15).

Although Megiddo is not mentioned in the Bible's description of Pharaoh Shishak's conquest in 918 B.C. (1 Kings 14:25, 26), it is listed among his conquests on the walls of the Amun Temple at Karnak, and a fragment of a stele bearing Shishak's name was found at Megiddo. Ahaziah, the king of Judah, died at Megiddo during Jehu's revolt (2 Kings 9:27). According to the annals of Tiglath-pileser III the northern part of Israel was captured in 733/32 B.C. and Megiddo was made the capital of one of the three Assyrian provinces. Finally, Josiah met his death at the hands of Pharaoh Neco near Megiddo in 609 B.C. (2 Kings

Part of the defensive wall overlooking the Jezreel Valley built by Jeroboam II at Megiddo in the eighth century B.C.

A painted cult stand with bowl from Megiddo, ca. 1200–1000 B.C.

23:29; 2 Chron. 35:22). This was probably the end of Megiddo's prosperity, as the town is not mentioned again in ancient texts. But its importance as a battleground is remembered in the NT as Armageddon (Heb. *Har Megiddon*, "The Mound of Megiddo"), the place of the final victory of God over all the forces of the world (Rev. 16:16).

Archaeological Excavations: Megiddo was first excavated by G. Schumacher for the German Oriental Society from 1903 to 1905. In a trench 20–25 meters wide he excavated the entire north-south length of the mound. He distinguished eight strata going back to Middle Bronze II (from the nineteenth century B.C.) and uncovered two large buildings dating to that time, the *Mittelburg* (German "middle stronghold") and the *Nordburg* (German "north stronghold"), as well as an Israelite palace. Extensive excavations on the east revealed a large Israelite building he called a sanctuary because of its stone pillars, and he made a number of soundings on other parts of the mound.

In 1925 the Oriental Institute of the University of Chicago undertook the most extensive excavations attempted in Palestine up to that time. Continuing until 1939, then interrupted by World War II, the original plan was to excavate the complete mound layer by layer down to bedrock. The enormous task had to be abandoned after the removal of the first four strata, and work continued largely in two areas, in the north in the vicinity of the city gates and in the east where bedrock was reached. In all, twenty strata were distinguished.

In addition to the limitations of time and money, the work of the University of Chicago expedition was hindered by changes of leadership, successively from C. S. Fisher, to P. L. O. Guy, to G. Loud. Their work was only partially published in three large volumes (*Megiddo I*, *Megiddo II*, and *Megiddo Tombs*) and several smaller monographs on the pottery, water system, ivories, and cult remains. Incomplete and inadequate publication led others, particularly W. F. Albright, G. E. Wright, and K. Kenyon to attempt to correct aspects of the chronology. Then from 1960 to 1972 Y. Yadin returned to the site to investigate the stratigraphy, and in 1974 A. Eitan studied further the remains on the eastern slope. Excavation has recently resumed under the direction of David Ussishkin, Israel Finkelstein, and Baruch Halpern of Tel Aviv and Pennsylvania State universities. The occupational history of the site is still distinguished by the twenty strata identified by the University of Chicago expedition, but various stratigraphical revisions must be made.

Evidence of Occupation, Strata XX–VIIA: Flint tools and bones may indicate a prepottery stage of the Neolithic period, and scattered potsherds testify to later Neolithic habitation. Segments of mudbrick dwellings, pits, ovens, and mixed pottery date various Chalcolithic settlements from the early fourth millennium to about 3200 B.C. (Stratum XX). Strata XIX–XV belong to the Early Bronze age (3200–2000 B.C.). To Stratum XIX (EB I) belongs the first of several sanctuaries in the eastern sector of the town, where there was a sacred area for hundreds of years. The temple was of the usual Early Bronze type, rectangular with the entrance on the long wall and an altar directly opposite. It also has a relationship to the Ghassulian sanctuary at En-gedi, and typical Ghassulian pottery alongside the EB I may indicate that the temple originated in the Chalcolithic period. A courtyard to the east was paved with flagstones, several layers of which had incised figures, mainly of hunting scenes, which are some of the earliest examples of local art in Palestine. The largest city wall in Megiddo's history belongs to Stratum XVIII–XVII; it was 8 meters thick with stone foundations preserved to a height of 4 meters. During Early Bronze III (Strata XVII–XVI) a large round altar, more than 8 meters in diameter and 1.4 meters high, was erected in the area of the earlier shrine. A flight of steps ascended the altar on the east and it was surrounded by a wall, within which were found a great quantity of animal bones indicating cultic sacrifice. Later in Early Bronze III (Strata XV), three new temples were erected, all of the broad-room type with the entrance in the long south side and the square altar opposite.

A Canaanite "high place" at Megiddo, ca. 2600–2300 B.C.

Strata XIV–X belong to the Middle Bronze Age (nineteenth–sixteenth centuries B.C.), with indications of Hyksos (rulers, perhaps Canaanite, who extended their control to Egypt, ca. 1720–1550 B.C.) dominance in Strata XII–X. In the sacred area stelae and bronze statuettes of Strata XIII–IX and large buildings of Stratum XII suggest a *bamah* (Heb., "high place") with nearby temples. The earliest city gate comes from Stratum XIII, and the typical Hyksos city gate with three sets of piers belongs to Stratum XI. The city wall was strengthened in Stratum XII, and modifications in this and the next stratum are of the usual Hyksos rampart and glacis type.

Ivory duck's head; fourteenth century B.C.

Ivory bull's head, found in the excavations of the palace at Megiddo, ca. twelfth century B.C.

The first of a series of palaces near the gate area belongs to Stratum X. The relative continuity in plan from Stratum XII to VIIA indicates rather peaceful and prosperous times extending through the Late Bronze Age. With the expulsion of the Hyksos, Megiddo came under Egyptian domination, and even Thutmose III's destruction of it about 1468 B.C. (end of Stratum IX) did not lead to decline. Stratum VIII (second half of the fifteenth century B.C. to the first half of the fourteenth) shows great material wealth with the expansion of the palace and its rich treasures of ivory plaques, jewelry, and beads. A fortified temple is now on the site of the earlier altars. This is the Amarna Age and the tablets portray the weak control exercised by Egypt. A fragment of a clay tablet containing part of the *Gilgamesh Epic* (a Babylonian story concerning the origins of the cosmos) found in the vicinity of the gate probably belongs to this time. The last period of the Late Bronze Age (Stratum VIIB) was separated from Stratum VIIA by destruction, but the same or very similar inhabitants reoccupied the site and reused the public buildings. From Stratum VIIA comes a cartouche of Ramesses III found on one of the carved plaques from a great cache of ivories, originally used as inlay decorations for palace furniture. This occupation ended in a great destruction, probably about 1130 B.C.

Evidence of Occupation, Strata VIB–I: Now in the Iron Age, the following settlement (Stratum VIB) was much poorer. However, extensive new building activity in Stratum VIA and late Philistine pottery may indicate Philistine presence. The destruction at the end of the eleventh century may be attributed to David's conquests.

MEGIDDO

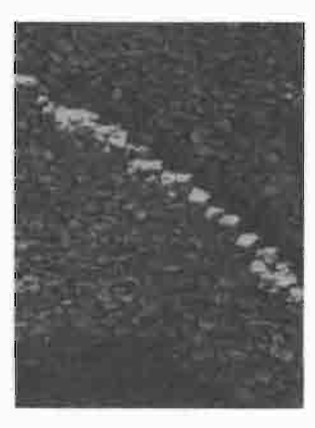
Egyptian pharaoh Shishak I listed the names of vanquished towns in Palestine—including Megiddo—within the "walls" depicted below the torso of each fettered prisoner on these reliefs at Karnak, tenth century B.C.

The VB occupation was again a period of decline, and its haphazard constructions may belong to the Israelites under David before the centralized planning of the royal cities of Solomon (tenth century B.C.). Recent excavations and research have done much to clarify the confused results of the early excavations for the Solomonic and later periods, but scholars differ widely on the stratigraphic and chronological conclusions.

Most scholars date Stratum VA/IVB to the time of Solomon and assign the six-chamber gateway and casemate city walls similar to those at Hazor and Gezer (1 Kings 9:15) to this period (others date the six-chamber gate to the following period with the offset-inset wall). These were contemporary with a palace or fortress that lay beneath the north stables and the offset-inset wall (formerly attributed to Solomon) and a "palace" in the south and a nearby building beneath the south stables. A third palace, which included a sanctuary on the south, is also assigned to Stratum VA/IVB by some scholars. In addition, the gallery (which was the earliest part of the city's water system, a narrow passageway lined with ashlar masonry leading down the southwest slope of the mound to a spring), has been shown stratigraphically to belong to the Solomonic constructions. Solomon's city met destruction at the hands of Pharaoh Shishak in 918 B.C.

Prosperity continued during the Omride dynasty in the first part of the ninth century B.C. (Stratum IVA). To it belong the offset-inset wall

Horn-shaped ivory vessel encircled with a gold band; fourteenth century B.C.



A Philistine pottery "pilgrim flask" found at Megiddo dating to 1100 B.C. may indicate Philistine presence during that period.

This box carved from a single piece of ivory and decorated with lions and sphinxes represents part of a hoard found in a twelfth-century B.C. palace.

Stairs leading up the side of a storage pit, which had a capacity of approximately 12,800 bushels, from the eighth century B.C.

with the four-chamber gate (the consensus of most scholars), the stable complexes (considered by some to be storerooms or barracks), and the subterranean water system with a vertical shaft and horizontal tunnel to the spring at the foot of the mound. Alterations and additions to the building complexes indicate continual occupation down to the time of the Assyrian conquest in 733 B.C.

Stratum III belongs to the Assyrian dominance, with numerous spacious private dwellings showing Eastern influence. The city gate now had two chambers. Stratum II, dating probably to the time of Josiah (639–609 B.C.) and Stratum I of the Persian period (ca. 538–333 B.C.) were unfortified. ***See also*** Esdraelon; Hazor; Taanach.

Melchizedek (mel-kiz´uh-dek; Heb., "king of righteousness"), the king of Salem (Jerusalem) and priest of God Most High who blesses Abraham as the latter returns from battle (Gen. 14:17–20). In Ps. 110:4, the incident is recalled, as God addresses the Hebrew king as "priest for ever after the order of Melchizedek." In later literature, Melchizedek is regarded as an ideal priest-king and, in the Dead Sea Scrolls, as a heavenly judge. In the Letter to the Hebrews, Melchizedek is a supernatural figure whose miraculous origin and indestructible life foreshadow the eternity of the Son of God (Heb. 5:6, 10; 6:20–7:22). ***See also*** Abraham; Jerusalem; King; Priests. Eighth-century B.C. limestone manger *in situ:* Megiddo.

Melita (mel´i-tuh). ***See*** Malta.

mem (maym), the thirteenth letter of the Hebrew alphabet; its numerical value is forty. In proto-Sinaitic inscriptions it was drawn as a pictograph of wavy water. This vertical zigzag is preserved in later forms of the letter, as in Phoenician and early Hebrew scripts. The old form can still be recognized in Latin "M" and in archaic and early Greek mu. In the late fifth century B.C. the form changed with the cursive Aramaic script. Medial and final forms evolved; these are the prototypes of the forms found in the classical Hebrew square script. ***See also*** Writing.

מ

memorials, various physical and abstract entities in the Bible such as stones, words, and days intended to serve as reminders to people and to God of some word or event. Theophanies (Gen. 28:18–22; cf. Exod. 24:4), God's splitting the Jordan River (Josh. 4:4–24), and serious sins (Num. 16:40) are commemorated through physical memorials. The celebration of the Passover day memorializes God's salvation of Israel (Exod. 12:14). In secular life, memorials mark gravesites (Gen. 35:20), especially when someone dies childless (2 Sam. 18:18; Isa. 56:5). Written words serve as memorials in the phylacteries (Exod. 13:9) and in the narrative of Amalek's defeat (Exod. 17:14). God is also reminded of his covenant with Israel by the written word (Mal. 3:16), though visual cues, such as the shoulder pieces of the ephod of the priestly breastplate (Exod. 28:12, 29) and the aural cue of the blasting trumpet (Num. 10:10), are also used. In the NT, prayer and alms can serve as a memorial (Acts 10:4), and Luke and Paul claim that the Last Supper is a meal intended to be repeated as a remembrance of Jesus (Luke 22:19; 1 Cor. 11:24). M.Z.B.

Memphis (mem´fis; KJV: "Noph"), an ancient (Old Kingdom, ca. 2700–2200 B.C.) capital of Egypt, located on the west bank of the Nile about fifteen miles south of modern Cairo, and a prominent political and religious city throughout the Pharaonic period (to 605 B.C.). The Hebrew form of the name is *Nōf* (once *Mōf*), from Egyptian *Mennufer.* Traditionally,

Memphis was founded by Menes, the first king, as the political center of a united Egypt. Memphis served also as a cult center of Ptah, a creator and artificer god; he not only created the world and all other gods, he also made things useful for human beings, such as shrines, cities, arts, and crafts. The Memphite theology, known from a relatively late text (ca. 700 B.C.), emphasizes Ptah's creative word. Memphis is mentioned in the prophetic books as symbolic of Egyptian power and idolatry, to be overthrown (Isa. 19:13; Ezek. 30:13), and as a place of exile or retreat for Israel (Jer. 2:16–18; Hos. 9:6). Indeed, the Egyptians settled many foreigners there. Although extensive remains existed as late as the medieval period, very little survives today. ***See also*** Egypt; Pyramid Texts, The. H.B.H.

Menahem (men´uh-hem), a king of Israel in the third quarter of the eighth century B.C. Menahem son of Gadi was a usurper from the former capital, Tirzah (2 Kings 15:14). He assassinated Shallum, who had slain his own predecessor one month earlier, and ruled in Samaria for ten years. The Assyrian annals indicate that "Menahem of Samaria" paid tribute to King Tiglath-pileser III during his first western campaign (743–738). The same incident is described in 2 Kings 15:19–20, where Tiglath-pileser is called by his Babylonian throne name, "Pul." There we are told that Menahem raised "a thousand talents of silver" by imposing a levy on the wealthy citizens of Israel. His purpose was to win the favor of Tiglath-pileser "that he might help him to confirm his hold of the royal power." The tax must have been resented, however. Menahem died soon afterward, and his son, Pekahiah, fell victim to a conspiracy within two years (2 Kings 15:25). P.K.M.

mene, mene, tekel, upharsin (mee´nee, tek´uhl, *yoo*-fahr´sin), the mysterious words written on the wall in Dan. 5:25. These words confound the Babylonian wise men but are interpreted by Daniel (vv. 26–28), who takes them as the Aramaic verbs *mn'*, "to number" (God has numbered your days), *tkl*, "to weigh" (you have been weighed and found wanting), and *prs*, "to divide" (your kingdom is divided between the Medes and the Persians). Most scholars think that the original text had only one mene and that the reference is to three weights or monetary units—the mina, the shekel (one fiftieth of a mina), and the half-mina. These in turn may have been intended as a slighting evaluation of successive Babylonian kings with Nabonidus and Belshazzar as the half-minas. Such references are lost in the present text of Daniel, which retains, however, the punning tendency inherent in the riddle (e.g., parsin is taken both as "divided" and as a reference to the Persians: see v. 28). ***See also*** Belshazzar; Daniel, The Book of. J.J.C.

Menorah (muh-nor´uh). ***See*** Lampstand.

Mephaath (mi-fay´ath), a site given to the Reubenites (Josh. 13:18; 21:37; 1 Chron. 6:79) located, like the settlements associated with it (Heshbon, Dibon), east of the Jordan. Jeremiah's oracle(s) against Moab include it as having suffered judgment (Jer. 48:21). Site identification has varied, but since a 1986 discovery of the name *Kastron Mefaa* (Gk., "Camp of Mefaa") in the mosaic floor of an eighth-century A.D. church, the place called Umm er-Rasas has achieved new prominence. It stands twenty miles southeast of Madeba in Moab.

Mephibosheth (mi-fib´oh-sheth), an intentionally distorted form of the original name Mippibaal (Heb., "out of the mouth of Baal"). Baal, which means "lord," was earlier used as a simple epithet for God, but because the epithet was also used for a major Canaanite deity, later scribes often replaced this element in proper names with the word *bosheth*, "shame."

Two men in the Bible bear this name. **1** A son of Saul whom David handed over to the Gibeonites for execution (2 Sam. 21:8–9). **2** Jonathan's son, the grandson of Saul, whom David spared because of his covenant with Jonathan (2 Sam. 4:4; 21:7). The names of the two individuals appear to have been confused, however, since according to 1 Chronicles, the real name of Jonathan's son was Meribbaal (8:34; 9:40).

David treated Mephibosheth with kindness (2 Sam. 9:6–13), but Mephibosheth's apparent disloyalty during Absalom's revolt angered David (2 Sam. 16:1–4). Only partly appeased by Mephibosheth's explanation, David divided Saul's property between Mephibosheth and his servant Ziba (2 Sam. 19:24–30). ***See also*** David; Jonathan; Saul. J.J.M.R.

Merab (mee´rab; Heb., "growth, increase"), the elder of Saul's two daughters (1 Sam. 14:49) whom Saul promised to David for fighting the Philistines, expecting that he would be killed in battle. When David returned, Merab had al-

ready been given to Adriel. Several Hebrew manuscripts and ancient translations mention that David gave Merab's sons to the Gibeonites for execution as an act of appeasement (2 Sam. 21:8–9; other texts read "Michal's," but see 2 Sam. 6:23).

Meraioth (mi-ray´yoth). **1** A descendant of Aaron identified as the son of Zerahiah (1 Chron. 6:6, 52) and the father of Amariah (1 Chron. 6:7, 52). **2** The father of Zadok, the son of Ahitub (1 Chron. 9:11), and an ancestor of Azariah the priest (Ezra 7:3; Neh. 11:11). **3** An ancestral priestly house (Neh. 12:15) in the days of Joiakim in postexilic Judah. It is possible that 1 and 2 are identical, and that 3 designates descendants from the family of 1 and 2.

Merari (mi-rah´ri). **1** The third son of Levi (Gen. 46:11; Exod. 6:16; Num. 3:17; 1 Chron. 6:1; 6:16; 23:6) and through his sons, Mahli and Mushi (Exod. 6:19; Num. 3:20; 1 Chron. 6:19; 23:21; 24:26), the eponymous ancestor of the levitical clan of the Merarites (Num. 3:33–37; 4:29–33; 1 Chron. 6:29; 6:44). The cities and territories allocated to the Merarites appear in Josh. 21:7, 34–40 and 1 Chron. 6:77–81. Prominent Merarites included Asaiah, who supervised the two hundred and twenty Merarites that David selected to help bring the Ark to Jerusalem (1 Chron. 15:6); Ethan, who was appointed as a musician for the occasion (1 Chron. 15:17, 19); Kish and Azariah, who assisted in Hezekiah's reform (2 Chron. 29:12); Jahath and Obadiah, who helped supervise Josiah's repair of the Temple (2 Chron. 34:12); and Sherebiah, Hashabiah, and Jeshaiah, who led Merarite contingents in the time of Ezra (Ezra 8:18–19). Merarites also served as gatekeepers for the Temple (1 Chron. 26:10, 19). **2** The father of Judith (Jth. 8:1; 16:7). M.A.S.

merchant. ***See*** Agora; Trade and Transportation.

Mercurius (muhr-kyoor´ee-uhs; Lat.; Gk. *Hermes*), a god who functioned variously as messenger of the gods; deity of thieves, tricksters, travelers, and athletes; and the god of science, eloquence, and the arts. Often he is represented as a young man wearing a winged hat and sandals and carrying a herald's staff. At Lystra, Paul is called Hermes (KJV: "Mercurius"), meaning the god of eloquence (Acts 14:12).

mercy, an attribute of both God and the good human being. Hebrew uses several words for "mercy," of which the most frequent is *ḥesed,* which means loving-kindness, mercy, love, loyalty, and faithfulness. Another Hebrew word and the Greek word for mercy in the NT refer to the emotion aroused by contact with undeserved suffering, that is, compassion and a deeply felt love for a fellow human being. In the OT mercy/loving-kindness is associated with the covenant obligation between God and humans. Humans must be faithful to the covenant and God binds himself to fidelity to the covenant by mercy and by grace (another Hebrew word used to mean mercy). Divine and human mercy are closely associated with justice and righteousness because all refer to behavior appropriate to a relationship.

In the NT God's merciful faithfulness is attributed to his sending of Jesus and saving his people (Luke 1:58; Eph. 2:4; Rom. 11:30–32). God's mercy toward the faithful will manifest itself at the final judgment (2 Tim. 1:18; Luke 16:24; James 2:13). Mercy is also recommended in human relationships through reference to the OT (Matt. 9:13), the promise of divine mercy (Matt. 5:7), and human example (Luke 10:37). Jesus shows mercy to the needy (Luke 17:13; 18:38) and mercy was incorporated into early Christian benedictions (1 Tim. 1:2). ***See also*** Justice; Love. A.J.S.

mercy-seat. ***See*** Ark.

Meremoth (mair´uh-moth), a name occurring several times in postexilic writings. It is difficult to tell whether these are different people or various references to the same person. **1** A Levite who returned from the Babylonian captivity with Zerubbabel (Neh. 12:3). **2** A Levite, the son of Uriah the priest; he inventoried the valuables brought back by exiles returning with Ezra (Ezra 8:33) and helped repair the walls of Jerusalem under Nehemiah (Neh. 3:4, 21). **3** A member of the clan of Bani who took a foreign wife (Ezra 10:36). **4** One who signed the covenant to keep the law (Neh. 10:5). D.R.B.

Meribah (mair´i-bah). ***See*** Massah.

Meribbaal (mair´ib-bay´uhl); Heb., meaning uncertain, perhaps "Baal [deity] is an advocate" or "hero of Baal"), the crippled son of Jonathan and grandson of King Saul (1 Chron. 8:34). The name usually occurs as Mephibosheth, an alteration of Meribaal where the name Baal, often associated with the Semitic fertility god, was replaced with the word "shame" (Heb. *bosheth;* 2 Sam. 4:4; 9:3–13). ***See also*** Mephibosheth.

Merneptah (muhr´nep-tah´), the son and successor of the long-lived Ramesses II. He ruled Egypt ca. 1213–1204 B.C. A victory hymn relative to his brief campaign in Canaan and southern Syria between 1212 and 1209, the "Israel Stele," has the earliest known reference to Israel. Israel, classified as a people, is boastfully described as laid waste, without survivor. Merneptah successfully withstood a major invasion by a joint force of Libyans and Sea Peoples and a rebellion in Nubia. ***See also*** Ramesses.

Merodach (mi-roh´dak), also known as Marduk (mahr´dook), a Mesopotamian god. Mero-

dach is mentioned in Jer. 50:2, where he is also referred to as Bel (cf. Isa. 46:1; Jer. 51:44). Several Babylonian names with Merodach as the theophoric element appear in the Bible: Evil-merodach, Merodach-baladan, and Mordechai. Merodach was the chief god of the city of Babylon and eventually of Babylonia. It appears that originally Merodach was a storm deity, the name Mar.udu.ak probably meaning "Son of the Storm." The biblical reading Merodach seems to be a more correct pronunciation than the conventional Marduk.

When in the Old Babylonian period Hammurabi managed to unite northern and southern Babylonia (albeit temporarily), Merodach was elected to the office of ruler of mankind by the gods An and Enlil (Codex Hammurabi 1.1). This election is a continuation of an old Mesopotamian practice whereby the god of the politically dominant city ruled the land for a time, ultimate power, however, residing with and reverting to the divine assembly and its leaders. Merodach, however, did eventually become the chief god of Babylonia, a ruler whose rule was absolute and not dependent upon the agreement of the divine council, some time in the latter half of the second millennium. He was thus transformed from a local god into a national or, more properly, a universal god. Merodach's cult spread to Assyria, though the Assyrians understandably had some difficulty assimilating it and defining an efficacious and stable relationship with Merodach and his city. Apparent threats to the prerogatives of the Merodach cult led the priests of Babylon to welcome and justify Cyrus's conquest (late sixth century B.C.).

Merodach's rise to absolute kingship of the gods is described in the *Enuma elish,* the Babylonian epic of creation. This work has been connected with Genesis 1 and other acts of, or allusions to, creation and God's conflicts with dragon/sea/chaos as well as to an assumed enthronement festival in Israel. The date of composition of *Enuma elish* has some bearing on its interpretation and its putative relationship to the Bible. Until recently an Old Babylonian date was assumed. More recently, dates in the latter half of the second millennium have been proposed. Thus the modern scholar W. G. Lambert argues that the work was composed after Nebuchadnezzar I restored the status of Merodach from Elam, while T. Jacobsen thinks that the conquest of the Sealand (the south) and its unification with Babylon and the north under Ulamburiash (fifteenth century B.C.) provide the background. However T. Abusch is now of the opinion that it is a mistake to ascribe the work to, and explain it as a consequence of, a period of Babylonian political ascendancy and would suggest that it was composed some time during the early first millennium in a period of political weakness of the city Babylon. ***See also*** Merodach-baladan. I.T.A.

Merodach-baladan (mi-roh´dak-bal´uh-duhn), the biblical form of Marduk-apla-iddina II, twice king of Babylonia (721–710 B.C.) and leader of the Chaldean tribe Bit-Yakin in southern Babylonia. The tribal area of Bit-Yakin was in the southeast of Babylonia around the great swamp; this tribe lived close to Elam and during the period of activity of Merodach-baladan, alliances between Bit-Yakin and Elam were forged and stood in opposition to the Assyrians.

Merodach-baladan was already active in the final years of Tiglath-pileser III and even then appears as an important Chaldean chief. Merodach-baladan seems to have been an able political and military strategist and leader. At the death of Shalmaneser V and the accession of Sargon II, Assyria faced serious problems in the west and in Babylonia. Merodach-baladan gained control of the Babylonian throne (721 B.C.) and detached Babylonia from the empire. The Assyrians did not achieve victory against the Elamites, allies of Merodach-baladan, at the Battle of Der, 720, and Merodach-baladan retained the Babylonian throne until 710.

During his reign he held sway over the Babylonian cities along the Euphrates and the Chaldean settlements in the south. He seems to have ruled Babylonia in a relatively efficacious and sympathetic manner and to have created

The Babylonian king Merodach-baladan, 721–710 B.C., investing one of his officials with a grant of land; inscribed boundary stone.

some unity among the Chaldean tribes. Still, in 710 the Assyrian king Sargon was able to defeat Merodach-baladan and conquer Babylonia. Merodach-baladan retreated to the south and the citizens of Babylonia welcomed Sargon. He continued fighting in the south at Dur-Yakin; even here he was defeated but again escaped. After the accession of Sennacherib to the Assyrian throne, Merodach-baladan again took Babylon in 703 for nine months. The Assyrians under Sennacherib routed Merodach-baladan, though the Chaldean had drawn the support and assistance of Elamites, Chaldeans, and Babylonians from a number of cities. Merodach-baladan took refuge in the southern swamps. In 700, Sennacherib directed a campaign against Bit-Yakin. Merodach-baladan fled to Elam, dying there before 694. Under Sargon and Sennacherib, Merodach-baladan's tribe Bit-Yakin suffered mass deportations by the Assyrians.

In 2 Kings 20:12–19 and Isa. 39:1–8 (cf. 2 Chron. 32:31), we are told of an embassy sent by Merodach-baladan to King Hezekiah of Judah in order to establish some sort of alliance and coordinate actions against Assyria. Although this text tells of the embassy after recounting events of Sennacherib's campaign against Hezekiah in 701, the embassy should be dated either to 705, the year when Sennacherib ascended the Assyrian throne, or even more probably to 714–713, at the time of the anti-Assyrian rebellion in Ashdod. ***See also*** Assyria, Empire of; Babylon; Merodach. I.T.A.

Merom (mee'rom; Heb., "height"), a city in Galilee that was the site of a defeat of the Canaanites by the Israelites (Josh. 11:5, 7). Merom is included in late second-millennium Egyptian lists of captured cities and was taken by Tiglath-pileser III in 733 B.C. Its exact location is not certain; suggestions include such modern sites as Tell el-Khureibeh and Meiron; in medieval tradition Joshua's victory is associated with the latter. (Madon [Josh. 11:1; 12:19] is often corrected to Merom, following the Septuagint.) M.D.C.

Merom, the Waters of, a major water source or stream near the city of Merom in Galilee. ***See also*** Merom.

Meroz (mee'roz), a town cursed in the Song of Deborah (Judg. 5:23) for failing to join the Israelites' fight against Sisera. Of uncertain identity, it was most likely somewhere in the Plain of Esdraelon or in the adjacent hills near the battle site.

Mesha (mee'shuh; Heb., "savior"). **1** A son of Caleb (1 Chron. 2:42; however, LXX: "Maresha"). **2** The ninth-century B.C. king of Moab who also bred sheep. After a long period of being subject to Israel, as was his father Chemosh-(yat?), and paying tribute to Ahab (2 Kings 3:4), he led a revolt (2 Kings 3); a Moabite inscription found at Dibon also describes an extensive building program. Although the accounts differ somewhat, it would appear that Israel's king Jehoram was unable to suppress the revolt, despite assistance from the kings of Judah (Jehoshaphat) and Edom. The Bible ascribes some of Mesha's success to his willingness to sacrifice his son, the crown prince (2 Kings 3:27). **3** A Benjaminite born in Moab (1 Chron. 8:9). **4** A place (Gen. 10:30). F.E.G.

Meshach (mee'shak), the Babylonian name given to Mishael, one of Daniel's three companions (Dan. 1:7). The etymology is uncertain, but a relation to Marduk, the god of Babylon, has been suggested. ***See also*** Abednego; Daniel; Shadrach.

Meshech (mee'shek). **1** The sixth son of Japheth (Gen. 10:2). His name, like the names of the fourth son (Javan) and fifth son (Tubal), is also the name for an area. **2** A region in Asia Minor. Meshech appears in Assyrian texts as Muski or Musku from 1200 B.C. onwards. The people of Musku were noted metallurgists and aligned with Tubal. There is little doubt that the frequent biblical association of Meshech and Tubal (Gen. 10:2; Ezek. 27:13; 32:26; 38:2–3; 39:1; 1 Chron. 1:5) reflects this ancient political alliance in mountainous, central Asia Minor. Midas, king of Musku, was an enemy of Sargon II of Assyria. J.G.G.

Meshelemiah (mi-shel'uh-m*i*'uh), a Korahite Levite who was the head of a family of gatekeepers in the time of David (1 Chron. 9:21; 26:1–2). He is probably the same person elsewhere called Shallum (1 Chron. 9:17, 19; possibly also v. 31) and Shelemiah (1 Chron. 26:14). A postexilic family group of gatekeepers were called "sons of Shallum" and are assumed to be descendants of Meshelemiah (Ezra 2:42; Neh. 7:45). However, the names Shallum and Meshallum were so common, especially after the Exile, that care is necessary in identifications. ***See also*** Shallum.

Meshullam (mi-sh*oo*l'uhm; Heb., "reconciled, perfected"). **1** The grandfather of the scribe Shaphan during the reign of Josiah (2 Kings 22:3). **2** The son of Zerubbabel (1 Chron. 3:19). **3** A Gadite who lived in Bashan (1 Chron. 5:13). **4** A Benjaminite, son of Elpaal (1 Chron. 8:17). **5** A Benjaminite, son of Shephatiah (1 Chron. 9:8). **6** A Benjaminite, father of Sallu (1 Chron. 9:7; Neh. 11:7). **7** A priest, son of Zadok, and father of Hilkiah (1 Chron. 9:11). **8** A priest, son of Meshillemith, and father of Jahzerah (1 Chron. 9:12). **9** A Levite of the Kohathite clan who assisted in Josiah's repair of the Temple (2 Chron. 34:12). **10** The son of Bani, a man who married a foreign woman in the time of Ezra (Ezra 10:29). He is perhaps the same Meshullam who opposed Ezra's marriage policy (Ezra 10:15) and sought Levites for Temple service (Ezra 8:6). **11** The son of Berechiah, who

helped build the wall of Jerusalem under Nehemiah (Neh. 3:4, 30). His daughter married Jehohanan (Neh. 6:18). **12** The son of Besodeiah who helped repair the Old Gate in Jerusalem under Nehemiah (Neh. 3:6). **13** One who stood on Ezra's left hand when he read the Torah (Neh. 8:4). **14** A priest who set his seal to the covenant in Neh. 10:7. **15** A chief of the people who set his seal to the covenant in Neh. 10:20. **16** The head of the priestly house of Ezra in the days of Joiakim (Neh. 12:13). **17** The head of the priestly house of Ginnethon in the days of Joiakim (Neh. 12:16). **18** A gatekeeper (Neh. 12:25). **19** A prince of Judah who took part in the procession dedicating the rebuilt wall of Jerusalem in the time of Nehemiah (Neh. 12:33). M.A.S.

Mesopotamia (mes´uh-puh-tay´mee-uh; Gk., "between the rivers"), the region bounded on the east by the Tigris River and on the west by the Euphrates River. The biblical term for Mesopotamia, Aram-naharaim, refers to the land east of the Middle Euphrates. Other terms in the Bible referring to regions of Mesopotamia include: Shinar, Kashdim (Chaldea), Ashur, and Bavel. Modern Iraq encompasses much of Mesopotamia.

Geographic conditions range from desert in the central region to forests in the surrounding high country. The combination of natural river levees and seasonally inundated alluvial flats creates the floodplain of the Tigris and Euphrates rivers, a region known as Babylonia in the second millennium B.C. This region supported woodland environment, comprised predominantly of the date palm. Scarce rainfall and erratic, violent flooding of the rivers made farmers in the region almost entirely dependent upon irrigation for crops.

The region is noticeably lacking in natural resources such as stone, wood, and metal ores. Trade for these items developed, with routes following the rivers. The route up the Euphrates would have been the one Abraham's family followed in their travels from Ur to Haran. Control of the river crossings reflected military and political power.

Mesopotamia was home to several population groups. The Sumerians entered the southern reaches of the alluvial plain, probably from the east and north. A Semitic group, the Akkadians, developed the first empire in Mesopotamia in the late third millennium B.C. Western Mesopotamia was home to the Amorites, another Semitic population that appears in the Bible.

The political divisions, Babylonia and Assyria, correspond to the southern and northern regions of Mesopotamia, respectively. The peripheral regions, particularly sites such as Mari and Ebla in the west and Nuzi in the north, contributed significantly to cultural and social developments in Mesopotamia proper.

Cultural developments originating in Mesopotamia are numerous. The Neolithic revolution (ca. 8000–4500 B.C.), which evidenced the domestication of plants and animals, took place in the eastern, upland reaches of Mesopotamia as well as in the uplands of Anatolia and the Levant. Writing originated in Mesopotamia, as evidenced by pictographic tablets from the southern city of Uruk, which date to the middle of the fourth millennium B.C. Its outgrowth, the cuneiform system of writing the Sumerian and Akkadian languages, flourished in Mesopotamia for three millennia and was adopted for writing Hittite and the West Semitic dialect Ugaritic. Mesopotamia also produced the first compilations of legal writings, including those of Hammurabi, Eshnunna, and Lipit-Ishtar.

The literary developments include works such as the Gilgamesh Epic. Numerous historical inscriptions found at sites in ancient Mesopotamia corroborate biblical accounts. The influence of Mesopotamian hymns and prayers can be felt in the later biblical literature. Artistic developments include sculpture, bas-reliefs, monumental architecture, glyptic art (engraving on fine stones), and fine textiles, which were traded as far away as Anatolia (modern Turkey). L.E.P.

messiah (muh-s*i*´uh; from Heb. *mashiaḥ*, "anointed one"), an anointed agent of God appointed to a task affecting the lot of the chosen people.

Early Usage: Though the Hebrew verb *mashaḥ* was often used of the anointing of men as kings over Israel (e.g., Saul, 1 Sam. 9:16; David, 2 Sam. 2:4, 7; Ps. 89:20; Solomon, 1 Kings 1:39, 45; Jehu, 1 Kings 19:16) or as priests (Aaron and his sons, Exod. 40:15; 28:41), the title *mashiaḥ* occurs less often. At first, it was employed for unnamed historic kings of Israel (1 Sam. 2:10; Pss. 2:2; 20:6; 28:8; 84:9) or for named kings, Saul (1 Sam. 12:3, 5; 24:7), David (2 Sam. 19:22; 22:51; 23:1; Pss. 18:50; 89:38, 51; 132:10, 17), Solomon (2 Chron. 6:42), Zedekiah (Lam. 4:20), and even for the pagan king Cyrus (Isa. 45:1). In the postexilic period, when the monarchy was no more, it was used of the high priest (Lev. 4:3, 5, 16; 6:22). Rarely it was applied to patriarchs or prophets (Ps. 105:15; 1 Chron. 16:22); once it may refer to Israel itself (Hab. 3:13).

David as God's chosen ruler of Israel was the one after whom the dynasty was named (2 Sam. 7:8–16). Yet once the dynastic rule was interrupted, when Jehoiakim died and his corpse was given "the burial of an ass" (Jer. 22:19) and his son Jehoiachin was carted off to Babylonian captivity, Jeremiah proclaimed that "no descendant of his shall sit upon David's throne" (36:30). He also prophesied the restoration of the Davidic dynasty, however: "Strangers would no longer enslave" the people of Israel; "instead they shall serve the LORD, their God, and David, their king, whom I will raise up for them" (30:9). Thus a future "David" was promised, but, significantly, the title *mashiaḥ* was not associated with his coming, even if he was called "a righteous shoot" of David (Jer. 33:15). Ezekiel also prophesied, "My servant David shall be king

over them, one shepherd for all of them" (37:24). None of the prophetic books of the OT uses *mashiaḥ* as a title for such a coming king.

In the second century B.C., the future "David" becomes an "anointed one." Jerusalem is to be rebuilt after the passage of seventy weeks: "until (one comes who is) an anointed one, a prince" (Heb. *mashiaḥ, nagid,* Dan. 9:25). For the first time in the OT the title appears, now in the sense of a future, expected anointed leader. Within a short time after the final redaction of the book of Daniel, Palestinian Jews who dwelt at Qumran recorded in their rule books their awaiting of the coming of a Messiah, and even of three expected figures: "They shall be ruled by the original precepts by which the men of the Community were first instructed, until there comes a prophet, and the Messiahs of Aaron and Israel" (1QS 9:10–11). The "prophet" was the one promised by Moses (Deut. 18:15, 18), the "Messiah of Aaron" was to be a priestly figure, and the "Messiah of Israel," a kingly, probably Davidic, figure. If there had been no clear teaching about the coming of a Messiah in OT writings prior to the book of Daniel, the promise of a future "David" and the Danielic promise of a coming "anointed one, a prince" clearly fed into that Palestinian Jewish belief current at Qumran in the first century B.C. about the coming of (an) individual(s) called "Messiah" (with a capital M). This mention of an expected messianic figure or figures in the Qumran literature is not isolated; see also 1QSa 2:14, 20; CD 12:23–13:1; 14:19; 19:10–11; 20:1; 4QpGen[a] (4Q252) 1:3–4; 4QMessApoc (4Q521) 1:1.

In the first-century B.C. *Psalms of Solomon* there is likewise the expectation of a "righteous king, taught by God," who will be "their king, the Anointed of the Lord" (Gk. *christos kyriou;* 17:32). The author prays that Israel will be purified "for the day of election, for the manifestation of His Anointed" (Gk. *christou autou;* 18:5). This ideal king reflects the current opposition to the non-Davidic Hasmonean dynasty. Similarly, the *Similitudes of Enoch* (*1 Enoch* 37–71), probably dating from the mid-first century B.C. but not attested in the Qumran Aramaic form of the book, link the day of judgment with an expected heavenly figure, a "Son of Man," also called a "Messiah" (*1 Enoch* 48:10; 52:4). The exploration of the Danielic image, "Son of Man," is the real focus of attention in this work; yet it provides a transitional usage between the corporate sense of "Son of Man" (Dan. 7:13) and the use of this phrase for an individual in the NT (for Jesus), who is also called Messiah.

"Messianic" has become a rubber-band adjective, often applied to expected figures who were not really "messiahs" in pre-Christian Jewish tradition. Hence one should beware of casting the "king from the sun" (in the Jewish *Sib. Or.* 3:652–56) as a "messianic" king of Israel, for the author may be referring to the seventh king in the Ptolemaic line as one who would bring great peace. Again, the figure to whom the titles "Son of God" and "Son of the Most High" are given in 4Q246 should not be referred to as a Messiah; they are not "messianic" titles in the Jewish tradition.

Jesus as Messiah: The Greek *christos* was used in the Septuagint (LXX) to translate Heb. *mashiaḥ*. In the earliest writings of the NT it has already become the second name of Jesus: Greek. *Iēsous Christos* (1 Thess. 1:11, 3; 5:9; Gal. 1:1; 1 Cor. 1:1). Only Paul inverted the names, *Christos Iēsous* (1 Thess. 2:14; 5:18), possibly because he perceived *Christos* rather as a title than a name. In any case, he used it clearly as a title in Rom. 9:5, identifying Jesus as the one who has fulfilled the Palestinian Jewish expectations of old. This titular use is also found elsewhere at times in NT writings: Acts 2:36 ("This Jesus whom you crucified, God has made Lord and Messiah"); cf. Luke 2:11.

Did Jesus use the title of himself? It is not easy to answer that question. *Christos* is missing from the sayings of Jesus in the early Gospel source "Q," and the Gospels consistently depict Jesus' reluctance to accept the designation "Messiah" without qualification. In the earliest Gospel, Peter's confession, "You are the Messiah" (Mark 8:29), is immediately corrected by Jesus' teaching that he is rather the suffering Son of Man (8:30–31). At his interrogation before the Sanhedrin, when asked whether he is "the Messiah," he answers in Mark, "I am" (14:62), but in the Matthean parallel, his answer becomes, "You have said so" (Matt. 26:64); and Luke completely rewords the high priest's question (22:67).

Although "Messiah" did not unambiguously denote a person who would claim the political position of "king of Israel," Jesus' execution as "the King of the Jews" (Mark 15:2, 26) makes that association with the title likely (recall the mockery scene, Mark 15:32). In fact, it was probably the title on the cross that became the catalyst for the use of "Messiah" as a title for Jesus crucified and raised from the dead.

Once it thus became a title for him, it was often used in the Gospel tradition, even retrojected into episodes that logically predated its catalytic emergence. Luke uses for Jesus the Jewish expression, "God's Messiah," even in the infancy narrative, and at several other points (Luke 2:26; 9:20; 23:35; cf. Acts 3:18). Matt. 1:16 and 17:17, 22 refer to Jesus "who is called the Messiah." Such passages may echo an early tradition that Jesus was at first called "Messiah" by others than himself.

That designation might well have been more like an epithet than a formal title or designation of political or religious office. It could easily have emerged in response to words and deeds of Jesus that were seen to carry with them the authority of divine commissioning. John 6:15 preserves a tradition in which the people react to the feeding of the multitude by seeking to

make Jesus "king." The Johannine trial narrative takes pains to explain that the "kingship" attributed to Jesus was not to be defined in political terms of this world (John 18:33–37; 19:12–15). Other episodes in the Gospels depict Jesus arousing expectations that he is to be identified with a future "deliverer" of the people: the entry into Jerusalem (Mark 11:1–10) and the purging of the Temple (Mark 11:15–19).

Christian Usage: After the death and resurrection of Jesus, "Messiah" took on a specifically Christian meaning as a title that referred only to Jesus, and it was used so frequently that its Greek form "Christ" became his second name. At times it was used alone as his name: "Christ" is the crucified agent of God, who has "died for our sins in accordance with the scriptures" (1 Cor. 15:3). It was used along with other titles for him: the risen "Lord" (1 Cor. 12:3), and "Savior" (Phil. 3:20), but none of these occurs with the same frequency. Acts 3:19–22 may preserve yet another early Christian use of "Messiah" for Jesus, as one expected to return in this capacity at the Parousia, a function elsewhere ascribed to him as "Lord" (1 Thess. 4:17; 1 Cor. 11:26; 16:22).

None of the uses of "Messiah" in Jewish writings of the period evokes the suffering or death of the person so designated. The juxtaposition of the confession of Jesus as "Messiah" with his teaching about the suffering Son of Man (Mark 8:27–33) undoubtedly brought it about that Luke came up with the idea of the "suffering Messiah": the messiah had to suffer before entering his glory (Luke 24:26; cf. 24:46; Acts 3:18; 17:3; 26:23). This Lucan notion is not derived from the "suffering servant" (Isa. 52:13–53:12), who is never referred to as "the anointed One of God."

The Christian confession that Jesus is "Messiah" played its primary role in Christian debates with Judaism. This role is already evident in the missionary speeches of Acts (Acts 2:31–32, 36; 3:18; 5:42; cf. 17:3; 18:5, 28). It is also evident in the Fourth Gospel: in Andrew's summons to Peter, John 1:41 preserves the grecized form, Messias, of the Aramaic Mesiha', together with a translation for Greek-speaking readers, "We have found the Messiah (which is translated Christ [or Anointed One])." Jesus' death is said to disqualify him in current belief because the Messiah was to "remain forever" (John 12:34). An uncertain crowd of Palestinian Jews wonders whether Jesus might be "messiah" (John 7:26–31; 10:24). Finally, "Messiah" is spoken as a confession of faith in Jesus as Son of God and Savior by those who became believers (4:29; 11:27; 20:31). When Johannine Christians were excommunicated from the Jewish synagogue for their faith in Jesus, the confession "Jesus is Messiah" became the identifying mark of the true Christian (9:22). It retained this function in the struggle against dissident Christians reflected in the Johannine Letters (1 John 2:22; 5:1). Justin Martyr's *Dialogue with Trypho* provides a mid-second-century example of the use of "Messiah" in Christian debate with Judaism (35.7; 39.6; 43.8; 47.4; 48.4; 108.2). ***See also*** Jesus Christ; Q; Son of God; Son of Man.

metals, malleable materials of varying degrees of strength, hardness, and value. Biblical references to metals are frequent but allusive. Tubalcain (Gen. 4:22) is known as a metalsmith. Palestine is described as "a land whose stones are iron, and out of whose hills you can dig copper" (Deut. 8:9; cf. Ezra 1:9–11). Tablets from excavations at Ebla in Syria report the transfer of gold and silver in large quantities (ca. 3200 B.C.). Hab. 2:18 has the RSV's only use of the word "metal" describing an idol made with human hands. Jerusalem's Temple reputedly housed 5,469 articles of gold and silver (Ezra 1:11). Palestinian metalworking sites included numerous mines, smelting and forging operations, and artifacts. ***See also*** Brass; Copper; Gold; Iron; Lead; Refining; Silver. R.A.C.

Methuselah (mi-th*oo*´suh-luh), the eighth member of the Sethite line from Adam to Noah: the son of Enoch, the father of Lamech, and the grandfather of Noah (Gen. 5:21–27; 1 Chron. 1:3). Methuselah lived for 969 years, the longest lived person in the Bible. The genealogy of Cain records that Methushael was the father of Lamech (Gen. 4:18); according to this genealogy Methushael was the great-grandson of Enoch.

mezuzah (muh-z*oo*´zuh), the doorpost of a city gate, sanctuary, or private house. The Israelites sprinkled the blood of the Passover sacrifice on their doorposts to avoid the killing of their firstborn (Exod. 12:7, 22–23). Samson pulled out the gate and gateposts of Gaza (Judg. 16:3). The Israelites were enjoined to write divine exhortations upon their doorposts, in addition to reciting and teaching them, and binding them to the hand and forehead (Deut. 6:9; 11:20). In Judaism, *mezuzah* came to indicate the container affixed to a doorpost in which scriptural passages were placed.

Mezuzah in an ivory case; Italian, fifteenth century.

Mica (mī´kuh; Heb., "who is like Yah [God]?"), a shortened form of Micaiah. **1** The son of Mephibosheth (Meribbaal) and Saul's great-grandson by Jonathan (2 Sam. 9:12); he is also called Micah (1 Chron. 8:34–35). **2** A Levite, the son of Zichri and father of Mattaniah, a postexilic inhabitant of Jerusalem (1 Chron. 9:15; Neh. 11:22); he is probably the same Levite who is elsewhere called the son of Zabdiel and father of Mattaniah (1 Chron. 11:17). He may also be the same Levite called Micaiah and the son of Zaccur and father of Mattaniah (Neh. 12:35). It is possible that these represent three different persons. **3** A Levite who signed the covenant to keep the law (Neh. 10:11); possibly the same as 2 above. ***See also*** Micah; Micaiah. D.R.B.

Micah (mī´kuh), a shortened form of the name Micaiah (Heb., "who is like Yahweh?"). Etymologically the name is an expression of praise to the God who is incomparable. The name is given to several different individuals in the Hebrew Bible:

1 The prophet Micah of Moresheth, a town some twenty-five miles southwest of Jerusalem, to whom the book of Micah is attributed. In addition to the information in Mic. 1:1, Jer. 26:18 reports that Micah came to Jerusalem in the time of Hezekiah, that is, during the last decade or so of the eighth century B.C., and announced the destruction of the city (cf. Mic. 3:12). His exact dates are unknown, but he would have been a contemporary of Isaiah of Jerusalem.

2 A man in the hill country of Ephraim, a central but mainly passive figure in the story of the migration of the tribe of Dan (Judg. 17–18). His mother consecrated eleven hundred pieces of silver "to the Lord" (Judg. 17:3) to make a graven image and a molten image, a strange act in light of the OT prohibitions against images and idols. He established a shrine, made an ephod and teraphim, and set up one of his sons as priest. When a Levite from Bethlehem ("of the family of Judah," Judg. 17:7) appeared, Micah hired him as priest at the shrine. When the tribe of Dan, seeking a place to live, sent spies into the hill country of Ephraim, they stayed with Micah, asking the Levite to consult the Lord concerning their journey. Hearing his good report, they completed their exploration to the north and returned to lead the Danites to their new territory. When the five spies, along with six hundred armed Danites, returned through the hill country of Ephraim they stole Micah's "graven image, the ephod, the molten image" (Judg. 18:17) and took the Levite with them to their new territory in the north. The story is thus basically a negative account of how the shrine in Dan was established.

3 According to the genealogy in 1 Chron. 5:5, one of the descendants of Reuben.

4 The son of Meribbaal who was the son of Jonathan (1 Chron. 8:34–35; 9:40), the same as Mica the son of Mephibosheth in 2 Sam. 9:12.

5 A Levite in the time of David, one of the sons of Uzziel (1 Chron. 23:20; 24:24–25).

6 The father of Abdon in the time of Joaiah (2 Chron. 34:20), named Michiah in 2 Kings 22:12. ***See also*** Micah, The Book of. G.M.T.

Micah, the Book of, one of the books of the twelve Minor Prophets in the Bible. The title comes from the name of the prophet to whom the book is attributed (Mic. 1:1). The book is a collection of prophetic addresses.

In terms of both form and content the book has two major sections, each organized thematically to move from prophecies of punishment to prophecies of salvation. The first section, 1:2–5:15, contains prophecies of punishment against the capital cities of Samaria in the

OUTLINE OF CONTENTS

The Book of Micah

I. Superscription (1:1)
II. First collection of speeches (1:2–5:15)
  A. Prophecies of punishment (1:2–3:12)
  B. Prophecies of salvation (4:1–5:15)
III. Second collection of speeches (6:1–7:20)
  A. Prophecies of punishment (6:1–7:6)
  B. Prophecies of salvation (7:7–20)

North and Jerusalem in the South in chaps. 1–3, followed in chaps. 4–5 by prophecies of salvation that see Mount Zion in Jerusalem as the center of the coming reign of peace. The second section, chaps. 6–7, has announcements of judgment in 6:1–7:6 and of salvation in 7:7–20. This part of the book begins with the Lord's trial proceedings against Israel (6:1–5) and focuses on the ruptured relationship between God and God's people. The concluding speeches of the book (7:8–20) announce reconciliation and renewal.

The prophet Micah was a contemporary of Isaiah of Jerusalem, the prophet behind most of Isaiah 1–39. The book's superscription (1:1) dates Micah in the reign of three kings of Judah: Jotham, Ahaz, and Hezekiah. The solitary external reference to Micah, in Jer. 26:18, reports that the prophet came to Jerusalem in the reign of Hezekiah. Other allusions within the book are consistent with a date in the time of Hezekiah, that is, the last decades of the eighth century B.C. Micah went from his home in the small town of Moresheth, about twenty-five miles southwest of Jerusalem, to speak the word of the Lord in Judah's capital city.

There has been considerable disagreement about how much of this book stems from the original prophet, but it is highly unlikely that all the addresses it contains were first delivered by Micah in the eighth century. Some commentators argue that Micah was exclusively a prophet of doom and that therefore all hopeful expressions come from a later time. How, these scholars argue, could the prophet who expected Zion to become a ruin (3:9–12) also promise that it would one day be the highest of the mountains of the earth (4:1–4)? A simple resolution of the question of authorship in terms of citing the prophet as negative and designating all positive expressions as secondary leaves too many questions unanswered. It is by no means certain that Micah himself had no positive vision for the future. Nevertheless, there is clear and strong evidence that the style, content, and historical perspective of some of the speeches reflect not the period of the Assyrian threat in the eighth century but the Babylonian exile in the sixth century B.C., and later. The style of 7:1–7 in particular is quite different from the first chapters of the book, and these prophecies of punishment very likely stem from centuries later than the time of Micah. Mic. 7:8–10 assumes that Judah has been destroyed by the Babylonians, and 7:11–13 has in view the rebuilding of the walls of Jerusalem after the return from Exile during the Persian period in the late sixth or early fifth century B.C. Moreover, 7:14–20 seems to take for granted the existence of the Second Temple in the postexilic period.

To summarize the message of the prophet Micah himself would require determining precisely what parts of the book originated with him. It is unlikely, for example, that the magnificent prophecy of peace and justice in 4:1–5 originated with Micah, since a virtually identical vision appears also in Isa. 2:2–5. This parallel underscores the fact that Isaiah and Micah share common traditions concerning the importance of Jerusalem as the center of God's rule.

It is not difficult, however, to recognize the sense of the book of Micah. Although it is the product of centuries of tradition, its message can be outlined in a relatively consistent fashion: because of their sins, and particularly those of people in powerful places, God is about to punish God's people by means of military defeat and exile. Later those people will be brought back to their land, and God will establish perpetual peace. Such a summary of the message as a whole should not be allowed to obscure the distinctiveness and importance of individual passages in the book, such as 6:6–8, in which the will of God for human beings is specified as doing justice, loving kindness, and walking humbly with God. ***See also*** Prophet.

Micaiah (mi-kay´yuh). **1** King Abijah's mother (2 Chron. 13:2), elsewhere called Maacah. **2** The son of Imlah, a prophet at Ahab's court (1 Kings 22). Ahab and Jehoshaphat, king of Judah, wanted to liberate Ramoth-gilead from the Aramaeans. Before going to war they consulted some four hundred prophets, all of whom assured them that God would grant victory. When Micaiah was summoned, however, he reported a vision of the Israelites wandering about the hills like sheep without a shepherd. He described a meeting of the divine council at which God had commissioned "a lying spirit in the mouth of all [the] prophets" (v. 22) to "entice Ahab, that he may go up and fall of Ramoth-gilead" (v. 20). Ahab ordered Micaiah cast into prison and proceeded with his plan for war. Although he took the precaution of disguising himself before going into battle, he was fatally wounded when "a certain man drew his bow at a venture" (v. 34), and the Israelites left the battlefield in disarray, as Micaiah had predicted. **3** One of the princes sent by Jehoshaphat to instruct the cities of Judah in religious matters (2 Chron. 17:7). **4** The father of Achbor, a member of Josiah's delegation to Huldah the prophetess (2 Kings 22:12). **5** The son of Gemariah and grandson of Shaphan, both friends of Jeremiah. When Micaiah heard Baruch read the scroll of Jeremiah's oracles, he reported it to his father and other court officials (Jer. 36:11–13), and they arranged to have it

read to King Jehoiakim. **6** The forebear of certain postexilic priests (Neh. 12:35), elsewhere called Mica (Neh. 11:17, 22). **7** A priest in the time of Nehemiah (Neh. 12:41). P.K.M.

Michael (m*i*´kay-uhl; Heb., "who is like God?"), patron angel of Israel, first mentioned by name in Dan. 10:13, 21; 12:1. In the NT he is mentioned in Jude 9, where he contends with the devil for the body of Moses, and in Rev. 12:7, where he is at war with the dragon. He figures prominently in Jewish writings of the intertestamental period, including the Qumran War Scroll. It is also used as a human name in 2 Chron. 21:2.

Michal (m*i*´kuhl; short form of Heb. *Michael,* "who is like God?"), Saul's younger daughter (1 Sam. 14:49), who became David's wife. Her love for David was exploited by Saul, who hoped to dispose of David by asking an unusual and difficult bridal price (1 Sam. 18:20–29). Like her brother Jonathan, she saved David from Saul's attempt to kill him, cleverly covering up his escape (1 Sam. 19:11–17). Saul later gave Michal to Palti (1 Sam. 25:44) but she was returned to David as part of a political bargain (2 Sam. 3:12–16). Michal and David quarreled over his behavior before the Ark (2 Sam. 6:12–23; cf. 1 Chron. 15:29) with tragic consequences for Michal. She died childless. ***See also*** David; Saul. J.C.E.

Michmash (mik´mash), a village located in the rugged hills of the territory of the tribe of Benjamin, about seven miles north of Jerusalem. It was on the north bank of the Wadi Suweinet opposite Geba, and together they guarded the pass to the Jordan Valley. Michmash stood almost 2,000 feet above sea level, and two rocky outcrops called Bozez and Seneh stood nearby on either side of the valley (1 Sam. 14:4, 5).

In this pass the Philistine power in the eastern hill country was broken (1 Sam. 13, 14). Saul had gathered troops in the hill country of Bethel (1 Sam. 13:2) when Jonathan killed the Philistine governor at Geba. The Philistines rallied their forces at Michmash with greatly superior numbers (the actual number is exaggerated; thirty thousand, or even three thousand [Septuagint] chariots could not possibly function in the terrain [1 Sam. 13:5]) and dispersed raiding parties to the west, north, and east (1 Sam. 13:5, 17). But then Jonathan led a surprise attack across the wadi and terrified the Philistines (1 Sam. 14:13–15). Saul and Jonathan pursued the Philistines who had been thrown into confusion (14:15), and drove them from the hill country (14:31). The account can be vividly followed, and although the text is sometimes unclear (for example, there is confusion between Gibeah of Saul and Geba), it is obviously told by someone familiar with the rugged terrain.

A northern attack on Jerusalem by the Assyrians is suggested by a poem in Isaiah 10 and Michmash is mentioned (v. 28). General Allenby is said to have driven the Turks from the area in 1917 by following the topography of 1 Samuel 13 and 14.

Michmash was inhabited after the Exile according to the lists in Ezra (2:27) and Nehemiah (7:31; 11:31). ***See also*** Philistines. N.L.L.

Michtam (mik´tam), a technical term of uncertain meaning introducing Pss. 16, 56–60, and probably Isa. 38:9. Although designated *miktab,* "letter," Isa. 38:9 closely resembles an individual lament or thanksgiving psalm and may be a late reflection of Sumerian letter-prayers. The LXX renders *michtam* as *stelographia,* "inscription on a stela." Possible etymologies include Hebrew *ketem,* "gold," and Akkadian *katamu,* "to cover" (by extension, "to expiate").

Midian, Midianites (mid´ee-uhn, mid´ee-uh-n*i*ts), a son of Abraham and his concubine Keturah (Gen. 25:1–2), and his descendants. When Abraham expelled Isaac's rivals "to the east country," Midian was included (Gen. 25:6). Thus, the Midianites were counted among the "people of the East" (Judg. 6:3, 33; 7:12), a general designation for the nomadic inhabitants of the Syrian and Arabian deserts. The "land of Midian" (Exod. 2:15) probably refers to the center of Midianite territory, that part of northwestern Arabia bordering the Gulf of Aqabah's eastern shore (cf. 1 Kings 11:18). The term "Midianite" probably identified a confederation of tribes that roamed far beyond this ancestral homeland, a usage that may explain the biblical references to Midianites in Sinai, Canaan, the Jordan Valley, Moab, and Transjordan's eastern desert. Apart from the OT, sources of information on the Midianites are few, and the nonbiblical texts are ambiguous. While it is still difficult to associate specific archaeological artifacts with this elusive people, archaeological surveys have identified ruins of many settlements in the Northern Hejaz, with some sites dating back to the Late Bronze/Iron I transition. Especially intriguing is a style of painted pottery that has been tentatively identified as "Midianite."

The first significant reference to the Midianites is a record of their involvement in the sale of Joseph into slavery, an account in which Midianites are closely associated or equated with Ishmaelites (Gen. 37:25–28, 36; 39:1; cf. Judg. 8:24).

Of great importance to the book of Exodus is Moses' sojourn in Midian. Moses went there as a fugitive from Egyptian justice (2:15), was befriended by Jethro, the priest of Midian (2:16; 3:1), and married Jethro's daughter Zipporah (2:21). While still in the general region of Midian, Moses was commissioned to lead the Hebrews out of Egypt (3:1–15; 4:19). Later, Moses' Midianite brother-in-law, Hobab,

guided the Israelites in the wilderness (Num. 10:29–32).

When the Hebrews were encamped in the Plains of Moab, the "elders of Midian" and the Moabite king Balak hired Balaam to curse their new enemies (Num. 22:1–7; cf. Josh. 13:21). Since the Midianites led Israel into idolatry and immorality at Shittim (Num. 25:1–7, 16–18), Moses was commanded to seek revenge by destroying the Midianite population in this region (Num. 31:1–12).

Following seven years of oppression by the people of the East, the Hebrew warrior Gideon soundly defeated the camel-riding Midianites. Many years later, Gideon's victory was recounted in Ps. 83:9, 11; Isa. 9:4; 10:26. ***See also*** Amalekites; Camel; Horeb, Mount; Ishmaelites; Jethro; Keturah.

midrash (mid´rash; from the Heb., "to search, inquire, and interpret"), the type of biblical interpretation found in rabbinic literature, especially the Talmuds and the midrashic collections, such as Midrash Genesis, Midrash Qohole. Midrashic interpretation pays close attention to the meanings of individual words and grammatical forms, elucidates one verse by another verse, and relates the teachings of rabbinic Judaism to the biblical text. Midrash assumes that the biblical text has an inexhaustible fund of meaning that is relevant to and adequate for every question and situation. In a wider sense, the word midrash is used for any interpretation which has such characteristics. ***See also*** Haggadah.

migdal (mig´duhl; Heb., "tower"), a military defensive tower within a city (Judg. 8:17; 9:51), on its walls (2 Chron. 32:5), or projecting outward from them (Neh. 3:25–27). A *migdal* might guard a gateway (2 Chron. 26:9) or stand isolated in front of a gate as a forward defense post (2 Chron. 14:7). The word also applies to observation towers, often connected with towns and located in strategic positions along highways or borders (2 Kings 17:9). Nonmilitary towers protected fields, vineyards (Isa. 5:2) or pasturage (Gen. 35:21). Metaphorically, *migdal* stands for shelter and protection (Ps. 61:3; Prov. 18:10), or for anything tall and graceful, as a speaker's wooden rostrum (Neh. 8:4), or a woman's nose, neck, or breasts (Song of Sol. 4:4; 7:4; 8:10). ***See also*** Cities; Defense; Tower; Walls. L.E.T.

A *migdal*, or defensive tower, at Arad, ca. 2500 B.C.

Migdol (mig´dol; Heb., "tower" or "fortress"), a city in northern Egypt cited in different biblical contexts. **1** An Israelite campsite landmark on the way out of Egypt (Exod. 14:2; Num. 33:7), in the eastern delta, possibly near modern Tell el-Maskhutah. **2** The location of a Jewish settlement in the time of Jeremiah (late seventh–early sixth century B.C.; Jer. 44:1; 46:14), possibly modern Tell el-Heir near or identical with 1 above. **3** The northern extremity of Egypt, used with Syene (modern Aswan) to designate all of Egypt (Ezek. 29:10; 30:6); it is probably the same as 2 above.

Migron (mig´ron; Heb., "steep"?), a town in the hill country of Judah. In 1 Sam. 14:2 Saul was at Migron "on the outskirts of Gibeah." Gibeah is probably a misreading for Geba across the valley from Michmash (see 1 Sam. 13:16). In Isa. 10:28 Migron is mentioned in association with Geba and Michmash as a point on the route of the invading Assyrians. The site is probably to be identified with modern Tell Miriam near Michmash. ***See also*** Geba; Michmash.

Mijamin (mij´uh-min). **1** The ancestral head of the sixth course of priests (1 Chron. 24:9). **2** A Levite who returned with Zerubbabel from the Babylonian captivity (Neh. 12:5); he is possibly the same Levite who took a foreign wife (Ezra 10:25) and signed the covenant to keep the law (Neh. 10:7). Some scholars think Miniamin refers to the same person (Neh. 12:17, 41), although the connection is not clear.

Mikloth (mik´loth). **1** A Benjaminite, the father of Shimeah (Shimeam) and son of Gibeon (1 Chron. 8:32; 9:37–38). **2** The chief officer under Dodai who was commander of twenty-four thousand men in King David's army (1 Chron. 27:4). This reference to Mikloth is not in some manuscripts and is omitted by some versions.

Milcah (mil´kuh). **1** The daughter of Haran, the wife of Abraham's brother Nahor (Gen. 11:29). She bore eight children, one of whom was Bethuel, father of Rebekah (Gen. 22:20–23) who

became Isaac's wife. **2** One of the five daughters of Zelophehad belonging to the tribe of Manasseh (Num. 26:33) who claimed before Moses that, since their father had no sons, his inheritance should belong to her and her sisters. Their claim was sustained by the Lord (Num. 27:1–7), so long as they married within the tribe (Num. 36:1–12). ***See also*** Bethuel; Haran; Zelophehad.
F.R.M.

Milcom (mil'kuhm; from the Semitic root *mlk,* "king"), the Ammonite form of Baal, the northwest Semitic god of fertility and the storm. He was closely related to the Phoenician Baals, Melcart and Molech, to whom human sacrifices, particularly children, were offered. The worship of Milcom was introduced into Jerusalem by Solomon (1 Kings 11:5, 33) and abolished by Josiah (2 Kings 23:13). ***See also*** Baal; Molech.

mildew (Heb., "yellow" or "pale"), generally a superficial growth on organic matter or plants by fungi of the *Erysiphaceae* or *Peronosporaceae* families. Viewed consistently as divine punishment (Deut. 28:22), its association with "blasting" and "fiery heat" suggests damage in the wake of destructive east winds (Sirocco). It is a tool of God's judgment (Hag. 2:17; Amos 4:9), and relief from it is a divine grace (1 Kings 8:37; 2 Chron. 6:28).

mile. ***See*** Weights and Measures.

Miletus (m*i*-lee'tuhs), a large port and commercial center at the ancient mouth of the Meander River on the west coast of Asia Minor. The city was originally founded by the Ionians about the

The Agean Sea from the site of ancient Miletus.

eleventh century B.C. The Persians controlled the port at least twice, but it was freed by Alexander the Great in 334 B.C. The city flourished during the Hellenistic and Roman periods (324 B.C.–A.D. 325), with four harbors and three market areas, of which one is the largest known market of the ancient Greek world. The enormous gate to this market has been removed to the Pergamum Museum in Berlin and rebuilt there. The Roman theater of Miletus, with a seating capacity of fifteen thousand, was situated on a peninsula between two bays and was known as one of the best in all Asia Minor. The temple of Apollo, the principal deity of the city, stood in front of the northern harbor. Paul stopped here on his way to Jerusalem for the last time and summoned the elders of Ephesus to come for a farewell address (Acts 20:15–38). A reference to another possible visit of Paul to the city can be found in 2 Tim. 4:20.
M.K.M.

mill, any of a variety of installations for grinding food grains (Isa. 47:2; Matt. 24:41) or other foodstuffs (Num. 11:8). The normal domestic form of a mill was a saddle quern of limestone or basalt and a hand-held grinding stone. The grain was placed on the saddle and rubbed by back and forth motions of the hand grinder until it reached the desired fineness. Larger communal or industrial installations comprised an upper (movable) and a lower (stable) millstone between which the grain would be placed or fed through a hollow in the upper stone. The upper stone was rotated by human (Lam. 5:13), prison (Judg. 16:21), or animal labor. It pivoted on a small anchoring protrusion of the lower stone's upper surface, working the grain outward toward the edges of the stones as grinding proceeded. Because of the importance of this equipment for everyday survival, Deuteronomic law prevented taking it as collateral (Deut. 24:6). Its commonplace role in life was

An olive press, or mill, from Capernaum.

such that absence of the sound of milling was a symbol of destruction (Rev. 18:22; Jer. 25:10). The everyday household grinding might be done by servants (Exod. 11:5), and the portability of an upper millstone is evident in its use as a weapon on occasion (Judg. 9:53; 2 Sam. 11:21). That it could function as a device for execution is reflected in Jesus' comment (Mark 9:42; Matt. 18:6; Luke 17:2). The necessary quality of hardness for good function is used symbolically in Job 41:24 concerning Leviathan, and its weight and size figure in its use in Rev. 18:21.

In addition to the countless examples of household grinders found in archaeological sites, Roman sugar mills have been identified in Transjordan both in the Jordan Valley and at the Roman installations of Khirbet Iskander.

R.S.B.

millennium, a thousand-year period or, generally, an era of permanent peace, joy, and blessings on earth or elsewhere. Psalm 90, praising the everlasting God, declares that a thousand years in his sight "are but as yesterday" (v. 4). Possibly on this basis, the author of *Jubilees* (4:30) concluded that Adam died on the "day" he ate the forbidden fruit after all, i.e., within the first thousand years. Following this clue, the writer of *2 Enoch* speculated that history consisted of a week lasting seven thousand years, after which the eighth "day" (i.e., thousand years) would be "endless" (33:1–2).

Early in the second century A.D., a Christian writer, concerned to explain to other Christians why the promised coming of Jesus and the new age had not yet occurred, suggested that with God (or Jesus) a thousand years is the same as a day (2 Pet. 3:8). This writer thought people were then living in "the last days" (3:3) so probably did not contemplate a continuous thousand-year period; rather he meant simply that God reckons time differently than humans do.

The writer of Revelation, vividly portraying the defeat of cosmic evil powers (and of Rome, Rev. 17:1–18:24), which, toward the end of the first century A.D., he expected soon to take place, looked for a thousand-year epoch within the framework of the coming eschatological events. During this time, Satan would be bound and sealed "in the pit," while those Christians who had withstood persecution and refused to worship the image of the beast (probably the Roman emperor) would reign with Christ for a thousand years (Rev. 20:1–6; cf. 2 Esd. 7:28, which anticipates a four-hundred-year period of messianic reign or rejoicing). After that, Satan would be loosed for a final onslaught, but then, with Death and Hades, he would forever be banished "to the lake of fire and brimstone" (20:7–14).

In Persian Zoroastrianism, time was visualized in three periods of one thousand years each, but such beliefs do not appear to have influenced biblical thought. Commonly, the term "millennium" is used to refer to that age when, at last, God's reign is to be established forever (or, in secular circles, to some sort of utopian era). ***See also*** Apocalyptic Literature; Eschatology; Kingdom of God; Messiah; Parousia; Satan.

R.H.H.

millet, a small-seeded annual grass (*Panicum miliaceum*) grown for both grain and stalks. In Ezek. 4:9 it is mixed with other grains and used in making bread. Millet was used for food for both humans and animals.

millo (mil'loh; Heb., "earthen fill"), a type of construction in which a building, a section of a city, or an entire site was elevated on an artificial platform of earth held in place by one or more walls. The earthen platform is the "millo" and the structure built on the platform is the "house of the millo" (Heb. *bêth-millô*). The fortress temple at Shechem was built on an earth filling obtained by cutting down the embankment fortification of the Middle Bronze Age city. This temple is probably the *bêth-millô* mentioned in Judg. 9:6, 20. Kathleen Kenyon's excavations on the eastern slope of the City of David indicate that during the Canaanite period the hill on which Jerusalem stood was too narrow to accommodate a growing population. It was extended by a "millo" construction. Stone walls were built parallel to the line of the hill, and the spaces between them were filled with earth, creating a platform that extended the hill eastward. After his capture of Jerusalem David rebuilt the interior of the city "from the Millo inward" (2 Sam. 5:9). The Jerusalem millo and the walls associated with it required frequent maintenance. Repairs by Solomon (2 Sam. 9:15, 24; 11:27) and by Hezekiah (2 Chron. 32:5) are recorded. King Joash was assassinated in one of the structures built on the Jerusalem millo (2 Kings 12:20). ***See also*** Jerusalem; Shechem. L.E.T.

mina (min'uh). ***See*** Money; Weights and Measures.

Minaeans (min-ee'uhnz), ancient people of Arabia in the region of Main in modern North Yemen. Like the Sabeans, they conducted trade throughout the Levant. Numerous Minaean inscriptions, some dated to the early first millennium B.C., have been found, mostly in Arabia but also as distantly as Memphis in Egypt and Delos. The Meunim or Meinim in 1 Chron. 4:41 and 2 Chron. 26:7 are identified in the Septuagint as Minaeans, as are the Ammonites in 2 Chron. 20:1 and 26:8, and Zophar in Job 2:11; these identifications are problematic and may be the substitution of a more familiar for a less familiar name. In Ezra 2:50 (see Neh. 7:52) the Meunim or Meinim are Temple servants. ***See also*** Seba, Sabeans. M.D.C.

mind, the English translation of various Hebrew and Greek words denoting the human capacity for contemplation, judgment, and intention. As intellect, mind makes possible the critical appraisal and selection of differing opinions. In this sense, mind may also describe one's own mind-set, attitude, or characteristic point of view (e.g., Phil. 2:2–5). In both the OT and the NT, "heart" is often used as the equivalent of "mind" and, indeed, is sometimes translated as "mind" (e.g., Isa. 65:17; Jer. 19:5). In the NT, Paul is especially concerned that the Christian's mind be transformed by a renewed dedication to the will of God (Rom. 12:2). ***See also*** Conscience; Heart.

R.A.B.

minerals, inorganic substances often obtained by mining. The Bible knows both precious and common minerals such as iron (e.g., Deut. 8:9; cf. Gen. 4:22; Josh. 6:19; Jer. 28:13; Acts 12:10) and copper (e.g., Job 28:2; Ezek. 24:11; Matt. 10:9) ores, beryl (e.g., Exod. 28:20; Ezek. 28:13; Rev. 21:20), onyx (e.g., Gen. 2:2; Exod. 36:9; Job 28:6; Rev. 21:20), and chrysolite (e.g., Ezek. 1:16; Rev. 21:20). ***See also*** Flint; Jewelry; Marble; Metals; Refining.

mines, excavations for the extracting of mineral ores. Job 28:1–11 has the most detailed description of mining in the Bible where terms are of a general rather than technical character. The subject is the inaccessibility of wisdom. By analogy wisdom is hidden as precious metals are hidden in the mountains. There is a "source" (RSV: "mine") for silver and a "place" for gold; iron is "taken" out of the earth; men (not miners) search underground for "stone" (RSV: "ore"), "cut" channels, "open shafts" in uninhabited valleys, "overturn" mountains, and "put [their] hand[s]" to flinty rock. As descriptive as the procedures are, they show a basic unfamiliarity with technical terms connected with mines and mining. In Deut. 8:9 the verb used for the mining of copper is the same word used elsewhere for digging a cistern or well. The term for a miner is simply "digger." Thus, the verbs "take" or "dig" reveal nothing of the process. Zech. 6:1 refers to "mountains of copper."

The lack of specificity about mines and mining is due likely to the paucity of mineral resources in Palestine. Geological explorations have shown adequate sources of materials for construction purposes generally underlying much of the land, but ore sources are concentrated in a few locations.

Five centers of ancient mining and metal production have been discovered in Israel and Jordan. **1** The Timna Valley region in the Wadi Arabah at the southern end of the Dead Sea down to the Gulf of Aqabah, where archaeologist Nelson Glueck discovered copper smelting furnaces at modern Tell-el-Kheleifeh. Beno Rothenberg (1960–83) discovered more than three hundred sites of ancient mining and

The semicircular area extending from the base of the hill marks the perimeter of a fourteenth–twelfth century B.C. smelting camp at Timna.

smelting in the Arabah. Glueck assigned his findings to King Solomon and later (tenth–sixth centuries B.C.). Rothenberg's researches specifically deny Solomonic use, showing instead copper mining and metallurgy from three periods: the fourth millennium B.C. (Chalcolithic, i.e., Copper-Stone Age); Egyptian workings of the fourteenth to the twelfth centuries B.C.; and the Roman period (second century A.D.). Most recently (1983) Rothenberg discovered a copper smelter, a workshop with crushing implements, mining hammers, crushed ore, and pottery from the Middle Bronze I period (just before the time of Abraham in the Bible, ca. 2000 B.C.). This is the first time extractive metallurgy of this period has been found in the Near East. In 1981 John J. Bimson wrote a defense of Glueck's dating of the Timna finds to the Solomonic period. **2** The 'Amram Valley, south of Timna in the Arabah; it has copper mines and industrial installations. **3** The Wadi Feinan and modern Khirbet e-Nahaš at the foot of the Edom mountains in southern Jordan; these have copper and iron mines as well as evidence of smelting sites. **4** Wadi es-Sabra in what is now Southern Jordan (Edom) about four and a half miles southwest of Petra, the northern capital of the ancient Nabatean kingdom. Here copper and iron mines were discovered by Glueck. Deposits of copper and veins of rich iron ore (tested to ca. 63.2 percent iron) were noted. **5** Mugharat Wardeh, about two miles from the Jabbok (Zerqa) River in southern Gilead (Ajlun region of modern Jordan), where the largest iron mine in Palestine was found. Evidence at the mine and an associated smelting site is from the Ayyubid-Mamluk period of Islamic history (ca. A.D. 1185–1250). Roman evidence on the site cannot be linked to the mining activity. While some think an earlier Philistine or Davidic use

of the mine is likely, no evidence has yet been found to prove the early dates.

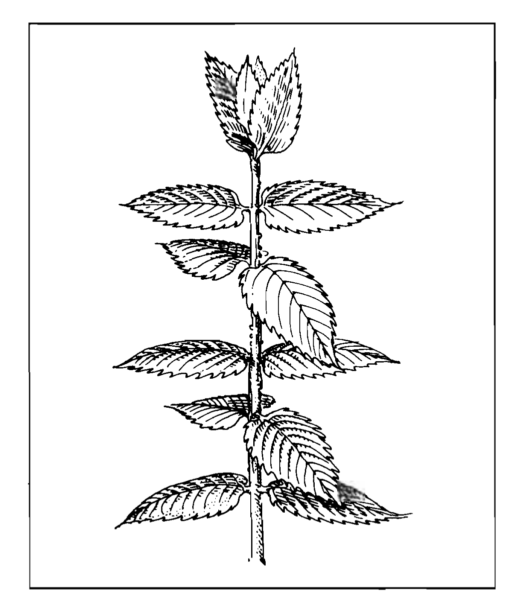
R.A.C.

minister, a person who serves. In the basic meaning of the term, there is no indication as to the arena or nature of the service. It might involve ministering as an assistant, as the young Samuel was to Eli (1 Sam. 3:1), as Joshua to Moses (Josh. 1:1), or as John Mark to Paul and Barnabas (Acts 13:5). Priests at the altar were ministers (Ezek. 45:4), but so was Onesimus when he cared for the needs of the imprisoned Paul (Philem. 13). Political leaders were viewed by Paul as ministers of God (Rom. 13:4), but Peter's mother-in-law, by attending to domestic chores, was also a minister (Mark 1:31). Those chosen to serve tables in the Jerusalem church were ministers (Acts 6:2), as was Paul when he collected relief funds for the poor (Rom. 15:25). A minister serves the need, whatever it is; to that end, in the NT, the whole church was to be equipped (Eph. 4:12), and by the standard of ministering to the hungry, naked, lonely, sick, or imprisoned all are judged (Matt. 25:44). Jesus not only taught that the great were those who ministered (Mark 10:43–44) but was a model of one who came not to be ministered to but to minister (Mark 10:45). The basic words translated "minister" all carry the idea of humble service: bondservant or slave (Rom. 1:1), one who pulls the oars (1 Cor. 4:1), worker (1 Cor. 9:13), and servant (Exod. 24:13; 2 Cor. 3:6). This last word, *diakonos* (Gk., "deacon"), is the most common term for minister in the NT.



While ministry was an obligation of all, certain persons were ministers in special ways. Priests were ministers in the Temple (Joel 1:13), and a synagogue had at least one minister (Luke 4:20). The NT contains lists of ministers including apostles, prophets, teachers, evangelists, and pastors (1 Cor. 12:28; Eph. 4:11), but precise definitions of duties are not clear. Likewise, bishops, elders, and deacons ministered in the churches (Phil. 1:1; Acts 20:17, 28; 1 Tim. 3:1, 8; Titus 1:5, 7), but lines of authority were not yet developed. The one thing clear in the NT is that all followers of Christ were to be ministers according to the teaching and example of Christ. ***See also*** Bishop; Church; Elders; Ordain, Ordination; Priests; Servant; Slavery.

F.B.C.

Minni (min′*i*), a state and people known as *Mannaya* (or *Mannay*) from Assyrian royal inscriptions beginning with Shalmaneser III (858–824 B.C.) and called Manneans. They lived in the eastern Turkish mountain territory south of Lake Urmia, part of modern northern Iraq. In Jer. 51:27 they were part of a coalition with Ararat (Urartu) and Ashkenaz (probably Scythians) from the same region that opposed Babylon.

Minnith (min′ith), one of the twenty cities taken from the Ammonites by Jephthah (Judg. 11:33). Its pairing with a southern tribal city, Aroer, as the opposite boundary would suggest a location somewhere in the northern sector, near modern Amman. The precise location is unknown but probably lies somewhere northeast of modern Hesban.

mint, a strongly scented herb used in cooking, medicinally as a carminative and stomachic, and on floors of synagogues as an air-freshener. In Matt. 23:23 and Luke 11:42, paying tithes on inexpensive mint symbolizes attention to details of ritual law as opposed to the "weightier matters . . . justice and mercy and faith."

Mint.

miracles, special interventions by God on behalf of humankind.

Miracles in the Old Testament: Miracles are closely associated with the creative and salvific deeds of God throughout OT tradition. These "powerful," "mighty," or "miraculous" deeds of salvation and creation take place through the action of God's Spirit and power. This mighty power of God, manifested throughout the history of Israel, is understood to be unique (Josh. 4:23–24; Pss. 77:14–15; 145:10–12; Jer. 16:21). It

was especially evident in the Exodus event. God's salvific will was often executed through the deeds of individuals specially gifted with God's Spirit and power. These "miracle workers" of the OT, such as Moses, Joshua, Elijah, and Elisha, were empowered with this Spirit to act as agents of God on behalf of God's people.

Background of New Testament Miracles: The miracle worker Jesus stands in this OT tradition as a Spirit-equipped agent of God. But a full understanding of the miracles of Jesus does not come from the OT alone. It is necessary to consider certain characteristics and thought patterns from the apocalyptic-eschatological milieu in which the NT took shape. Certain developments occurred in Jewish thinking about God and the problem of suffering and evil after the Babylonian exile. As ideas of the transcendence of God became more and more pronounced, the belief in angels as intermediaries between God and the world strengthened. One of the explanations of the origin of evil was that sin could be traced back to the "fall" or rebellion of some of the angels against the rule and authority of God. The world of spirits was divided in two: Satan (the Devil, Beelzebul) and the demons versus God and the faithful angels. These evil spirits not only tempted people to sin but also made them suffer from sickness and disease. Both sin and sickness, then, had a common demonic origin. Human lives could be controlled by Satan and the demons. Yet in Jewish apocalyptic thought God's allowance of demonic rule was considered temporary. There was hope that God's reign, perhaps through a specially anointed agent (messiah), would suddenly break into history and overcome the control of evil powers. The "end time" to be brought about by God would have cosmic repercussions extending to the evils affecting human lives.

Since there is a very close relationship between the creative and salvific activity of God, both would be involved in the coming of the End. People would be saved from the grip of evil powers and the created world would be transformed or "re-created." The end time would in some way correspond to the beginning of time. What God had originally intended at the creation of the universe would be restored and reach its fulfillment in the last days. Whatever had gone wrong in the lives of human beings would be rectified, restored, and brought to perfection.

The Miracles of Jesus: In the NT, the miracles of Jesus, mighty deeds of God's salvific and creative power, are understood to be one of the ways in which the final, decisive reign of God has come into history. Jesus' miraculous healing and exorcistic activity freed broken human lives from the bonds of demonic possession and restored diseased and corrupted human bodies to their intended state. Jesus' miracles demonstrated that the end-time kingdom of God, in which God would overthrow the power of Satan, had now arrived in the person of Jesus (Matt. 12:28; Luke 11:20). Likewise, the miracles performed by the disciples of Jesus served as signs of God's overthrow of Satan (Luke 10:17–18). The healing and exorcistic miracles of Jesus, then, contributed toward the actual bringing about of the kingdom of God.

The miracle of the healing of the leper by Jesus (cf. Mark 1:40–42) from the *Four Gospels*, a late twelfth-century illuminated manuscript.

The miraculous activity of Jesus was the activity of a Spirit-equipped eschatological agent of God. The miracles of Jesus flowed from the creative and salvific Spirit of God. Jesus was equipped with this Spirit at his baptism by John (Matt. 3:16–17; Mark 1:9–11; Luke 3:21–22). This same Spirit led and accompanied Jesus into his testing by Satan (Matt. 4:1–11; Mark 1:12–13; Luke 4:1–13). The victory of the Spirit-equipped Jesus over Satan in this testing indicated that a new, eschatological situation had arrived. His overcoming of Satan, the leader of demons, in these temptations prepared and made possible his later healing and exorcistic ministry.

Characteristics of Accounts: The literary genre of the account of a miraculous healing exhibits the same essential characteristics wherever it occurs: (1) the presence of a person (or representative of that person) in need of healing, including details that heighten the miraculous deed, e.g., the great length of the illness, previous failures at being healed, the horrible condition of the afflicted person, doubt about the

ability of the healer, or various effects the sickness has on members of the community or household; (2) the powerful words and/or actions of the healer, including various bodily manipulations such as touching the ears, washing the eyes, commands to walk, or dialogue with demons; and (3) the confirmation of the sudden healing, which often includes such details as a raised person eating again, the praise of those witnessing the event, a visible sign that demons have left a person, a return to previously impossible activity, and the like.

Although both the healings and the exorcisms of Jesus belong to this same literary genre, there are some slight differences. In an exorcism Jesus directly encounters and expels personified evil, a demon or demons, from a person held in demonic possession. Overcome by an external demonic force, the possessed person has no control over the sickness. While the sickness involved in a healing can be considered demonic in origin, the healings were the result of Jesus' direct encounter with the sick persons (or their representatives) and not directly with the demon(s) involved. The evil is intrinsic to the person and moral responsibility of some kind is involved, since sin and sickness were reciprocally related in the Jewish thought of the time (Matt. 9:1–8; John 9:1–2; but see Luke 13:1–4). Both healings and exorcisms thus concerned the overcoming of the demonic effects of sin and sickness. Jesus authorized his disciples to continue and extend his miraculous healing and exorcistic ministry (Matt. 10:1–8; Mark 3:13–15; 6:7–13; Luke 9:1–6; 10:9, 17–20).

The miraculous healings and exorcisms, then, were unique personal experiences of the salvation brought by Jesus. They were the means by which the eschatological reign of God became a reality in people's lives. They were events in which people of faith personally received the kingdom that had come in the person of Jesus. They were meant to bring others to faith in Jesus as the eschatological Savior sent by God.

Jesus' miracles of healing and exorcism have a variety of functions within the Gospels. An example of this variety can be seen in the healing of the man with the withered hand (Matt. 12:9–14; Mark 3:1–6; Luke 6:6–11), which serves as both a healing and a "controversy" or "pronouncement" story involving Sabbath observance. The various summaries of Jesus' healing and exorcistic activity indicate how essential and extensive these miracles were in his ministry.

There are significant differences in literary genre among what are commonly grouped together as "miracle stories." The healings and exorcisms of Jesus, for example, are not of the same literary genre as some of the so-called nature miracles—the miraculous multiplication of the loaves and fishes, the stilling of the storm, the walking on the sea, etc. Some of these other types of miracle stories are actually "epiphanies," sudden and dramatic manifestations of the hidden and more profound character of Jesus (cf. Mark 4:41). ***See also*** Apocalyptic Literature; Devil; Eschatology; Magic and Divination.

Miriam (mihr´ee-uhm), the sister of Moses and Aaron. We first hear of her when the infant Moses was placed in a basket on the Nile and his sister (not named here) watched from a distance; when the baby was discovered by Pharaoh's daughter, the sister offered to find a Hebrew wetnurse and fetched Moses' mother (Exod. 2:4–8). After the Exodus, Miriam had a prominent position among the women, for Exod. 15:20–21 records her leading the women in the victory song after the events at the Red Sea. Miriam is called a prophetess in this passage. She later considered her prophecy equal to that of Moses when she and Aaron complained about the marriage of Moses to the Cushite woman (Num. 12); for that, she was struck with leprosy and was healed a week later after Aaron asked Moses to intercede for her. Miriam died and was buried at Kadesh. In later biblical tradition the leprosy of Miriam

Miriam plays a timbrel and sings as other women dance before Moses and the Israelites (Exod. 15:20–21); thirteenth-century French miniature.

was presented as a caution to Israel (Deut. 24:9), and Miriam was remembered together with Moses and Aaron as leaders sent by God (Mic. 6:4). In postbiblical Jewish legends the prophecy of Miriam is stressed, and she was considered to have foretold the birth of Moses as savior of his people. T.S.F.

mirrors, reflective devices used primarily to view one's face. Archaeological discoveries throughout the Near East attest that during the biblical period mirrors were made not of glass but of highly polished metal, e.g., silver, gold, copper, or bronze. The KJV erroneously translates the Greek and Hebrew words for mirror as "molten looking glass" (Job 37:18) or "glasses" (Isa. 3:23). Other textual references would seem to demand the translation "metal mirror" since mirrors were even melted down (Exod. 38:8). The poor quality of the mirror, used metaphorically by Paul to denote a cloudy reflection (1 Cor. 13:12), seems also to suggest metal, rather than glass. Excavation has shown a wealthy woman's assemblage of toiletries to include a mirror, garment pins, bead and gold jewelry, fine perfume, and cosmetic dishes. In the Roman period, mirrors became more commonplace. Metal mirrors were round in shape, either of one piece or with a handle of bone, wood, or ivory. Often the handle was cast or carved in the form of the Egyptian goddess Hathor. S.L.R.

Mishael (mish'ay-uhl; Heb., "who is what El [God] is?"). **1** The son of Uzziel of the Kohathite clan of Levites (Exod. 6:22; Lev. 10:4). **2** One, probably a Levite, who stood with Ezra as he read the law (Neh. 8:4). **3** The Hebrew name of one of the young men taken captive to Babylon by Nebuchadnezzer along with Daniel; he was given the Babylonian name Meshach (Dan. 1:6–7; 2:17). ***See also*** Meshach.

Mishma (mish'muh; Heb., "a sound"). **1** The fifth of the twelve sons of Ishmael (Gen. 25:14). **2** A descendant of Simeon (1 Chron. 4:25–26).

Mishnah (mish'nah; from the Heb., "to repeat and to study"), a collection of rabbinic laws arranged in sixty-three tractates and six orders which cover agricultural tithes, public feasts, marriage (especially economic arrangements), torts, sacrifices at the Temple, and ritual purity. Created about A.D. 200 in Palestine under Rabbi Judah the Prince, the text underwent some evolution and was interpreted and its teachings modified by the Palestinian and Babylonian Talmuds. ***See also*** Halakah; Talmud.

mist, subterranean streams said to water the earth in Gen. 2:6. Storm-driven mist or fog is used as an image for those who are led astray into sin (2 Pet. 2:17); coupled with darkness it is used as a description of a person going blind (Acts 13:11).

Mitanni (mi-tan'ee), an important empire in northern Mesopotamia from about 1600 to 1330 B.C. It was also called Hanigalbat, Hurri, and Naharina. Its rulers came from a small Indo-Iranian aristocracy, though the population was largely Hurrian. They seem to have been responsible for the introduction of chariot warfare in the Near East.

From ca. 1520 to 1420 B.C., Mitanni struggled with Egypt for hegemony over Syria. At one point Mitanni's influence spread as far south as Palestine, contributing to the feudal structure of Canaanite society. Peace came in 1420 B.C., but despite the ensuing good relations with Egypt, Mitanni could not resist the new Hittite power to its west. After a prolonged struggle, the Hittite king Suppiluliuma (ca. 1380–1346 B.C.) defeated Tushratta, Mitanni's last great ruler; a century later Assyria destroyed what remained of the once great state. mite. ***See*** Money.

miter, headdress of the high priest. ***See also*** Dress.

Mithredath (mith'ruh-dath; Persian, "gift of Mithra"; also Mithridates, 1 Esd. 2:11, 16). **1** An official at the Persian court, "the treasurer," acting as Cyrus's agent in returning the Temple vessels to Sheshbazzar for restoration to Jerusalem (Ezra 1:8). **2** One of a group who sent a letter to Artaxerxes (Ezra 4:17). This letter appears to be distinct from the one that follows in 4:8–16.

Mitylene (mit'uh-lee'nee), the main city and harbor on the east side of the large island of Lesbos in the Aegean Sea, just off the northwest coast of Asia Minor. Paul and his companions stopped at Mitylene on their return trip to Jerusalem during the third journey as recorded in Acts 20:14. ***See also*** Lesbos.

mixed multitude (Heb. *'erev rav,* "great crowd"), those who left Egypt with the Israelites (Exod. 12:38). The similarity in sound to *'arov,* "swarms of flies" (Exod. 8:21–31), emphasizes the turmoil of the departure. In the postexilic period, Neh. 13:3 used *'erev* in a restricted sense for "those of foreign descent" who must be separated from the people.

Mizar (m*i*'zahr; Heb., "small"), a hill (KJV) or small mountain (Ps. 42:6), probably in the region of Mount Hermon and the water sources of the Jordan River. Its precise identity is unknown.

Mizpah (miz'puh; also Mizpeh; Heb., "watchtower"), the name of at least five places in Palestine. The name Mizpah occurs frequently with the definite article, "the watchtower, the Mizpah." "Watchtower," like the word "fort," must have been applied to many different sites. One help in differentiating the biblical references to Mizpah is

the addition of a regional designation: Mizpah of Judah, Mizpah of Gilead, Mizpah of Moab.

1 The land of Mizpah (Josh. 11:3, 8); this was in the north of Palestine near Mt. Hermon. After Jabin, king of Hazor, was defeated by Joshua, he fled eastward to the valley of Mizpah. This same Mizpah is defined a few verses earlier as the dwelling place of the Hivites, under Mt. Hermon.

2 Mizpah of Gilead, the name given to the site of the covenant between Laban and Jacob when Jacob returned to Palestine (Gen. 31:49). The popularly named "Mizpah Benediction" derives from Laban's request that God keep Jacob honest while Laban was absent and could not. The location was in Gilead, north of the Jabbok River. At this same Mizpah, the Israelites entered into covenant with Jephthah to be their leader (Judg. 11:11).

3 Mizpeh of Judah, one of the cities in the Shephelah assigned to Judah in the tribal division of the land (Josh. 15:38).

4 Mizpeh of Moab, an unknown site in Moab where David placed his parents under the protection of the king of Moab when Saul was pursuing him (1 Sam. 22:3).

5 Mizpah of Benjamin, a town on the border of Judah and Israel. It was the assembly point for the Israelite tribes going against Gibeah of Benjamin (Judg. 20:1–48). Mizpah was also on the circuit made annually by Samuel when he was judging Israel (1 Sam. 7:16–17). King Asa made Mizpah a fortified city after the heavy fighting between Israel and Judah (1 Kings 15:17–22). After the fall of Jerusalem at the Exile (587 B.C.), Mizpah became the Babylonian provincial capital. Gedaliah was made provincial governor but was assassinated at Mizpah by Ishmael and a band of nationalistic zealots.

This Mizpah has been identified with two modern sites, Nebi Samwil, about five miles north of Jerusalem, and Tell en-Nasbeh, about eight miles north of Jerusalem. Nebi Samwil has not been excavated, but all pottery remains from the area come from periods later than the monarchy (1025–924 B.C.).

Although no conclusive evidence proves that Tell en-Nasbeh is Mizpah, the site does fit well with the biblical and occupational history of Mizpah. Tell en-Nasbeh was excavated from 1926 to 1935 by W. F. Bade. The mound covers about 7 acres. Its occupation layers extend from the beginning of the Iron Age (1200 B.C.) to the Persian period (539–333 B.C.) with only slight evidence for permanent settlement outside these time periods.

One of the most important finds from Tell en-Nasbeh was the city wall. The entire length of about 2,165 feet was excavated. The wall was of the offset-inset type. It had nine or ten towers protecting it. The outer face of the wall ranged up to 40 feet high and averaged 16 feet thick. A fosse (i.e., a ditch) existed along portions of the outside of the wall, the only fosse known from the Iron Age in Palestine. The wall was also protected by a glacis, material forming an outer downward-sloping abutment at the base of the wall. This wall probably belonged to the fortified city of Asa's time (ca. 905–874).

The city gate belonging to this period was also well preserved. It had an opening nearly 14 feet wide. The massive wooden doors no longer remained; however, the door sockets and the door stop in the middle were found in place. On the inside and outside of the gate were open squares. Stone benches lined the outside of the gate and the inner rooms of the gate complex. Perhaps these benches were used by the elders as they decided the legal matters of the town.

Tell en-Nasbeh is one of the few Israelite towns to have been excavated almost completely. It thus provides a good picture of the fortifications, houses, public structures, tools, and utensils of Israel during the monarchy. J.F.D.

Mizpeh (miz´peh), a variant of Mizpah, which occurs four times in the NRSV translation. **1** A valley near Mount Hermon in Hivite territory marking the east boundary of the Israelites' pursuit of the coalition opposing them (Josh. 11:3, 8; see also Mizpah 1). **2** A Judean town allocated with others in the Shephelah region (Josh. 15:38; see also Mizpah 3). **3** A town assigned to Benjamin near its northern border (Josh 18:26; see also Mizpah 5). **4** A town in Moab, used by the Moabite king and visited by David to arrange secure quarters for his family (1 Sam. 22:3; see also Mizpah 4). Site identifications for the above other than broad regional designations continue to be largely uncertain.

Mizraim (miz-ray´im), one spelling of the Hebrew word for Egypt (in the KJV where the RSV has "Egypt" in Gen. 10:6, 13; 1 Chron. 1:8, 11). In some passages (1 Kings 10:28; 2 Kings 7:6; 2 Chron. 1:16–17) it may designate a region in southern Turkey (called "Musri" in Assyrian royal records of Shalmaneser III and others) from which horses were bred and exported. It was probably the region of Cilicia at the northeast corner of the Mediterranean Sea because of the mention of Kue (Cilicia; RSV) in the same connection.

Mnason (nay´suhn), "an early disciple" from Cyprus in whose home (either near or in Jerusalem) Paul and his companions lodged at the time of Paul's final visit to Jerusalem (Acts 21:16).

Moab (moh´ab). **1** Lot's son born from an incestuous relationship with his elder daughter. A similar relationship between Lot and his younger daughter produced Moab's half-brother, Ben-ammi (Ammon; Gen. 19:30–38).

2 The people descended from Moab, Lot's son. They were closely linked with their northern neighbors, the Ammonites, with whom they later shared a border. Moab is known from several ancient sources. According to the inscriptions of

Pharaoh Ramesses II (ca. 1250 B.C.), an Egyptian army passed through Moab and plundered some cities. According to the OT, contacts between Moab and Israel came in the attempt by Moses to negotiate a safe passage for the Israelites through Moabite territory, i.e., the plateau east of the Dead Sea bordered on the north by the Arnon River and on the south by the Zered (Judg. 11:17). Other sources note that Moab's territory was given to it by God (Deut. 2:9), yet the Moabite king Balak hired a prophet/diviner named Balaam to curse the Israelites (Num. 22–24). Israel camped in the plains of Moab before entering the promised land, territory north of the Arnon River extending as far north as "opposite Jericho" (Num. 35:1; Deut. 1:5). This brief sojourn was remembered as detrimental to Israelite religion (Num. 25).

Contact between Moab and Israel is mentioned in Judges, where a Moabite king named Eglon had extended his control over Benjaminites in the hill country and valley near the City of Palms (probably Jericho). This account is another indication that Moabite territory extended at times considerably north of the Arnon River. A left-handed Benjaminite assassinated Eglon, providing a period of peace for the region (Judg. 3:12–30). The story of Ruth is also set in the period of the judges and concerns the manner in which this Moabite woman came to Bethlehem, ultimately married, and became King David's great-grandmother. Both Saul and David fought with the Moabites, the latter subduing them (1 Sam. 14:47; 2 Sam. 8:2). Moab's history remains somewhat obscure in the accounts of the Divided Monarchy, Moab being mentioned only occasionally (2 Kings 3; 13:20; 24:2). Prophets often spoke against Moab (Isa. 15–16; Jer. 48; Zeph. 2:8–11).

The discovery of the Moabite Stone in 1868 helped illumine Moab's history during the ninth century B.C. It was written at the behest of the Moabite king Mesha, who is mentioned in 2 Kings 3:4. The inscription on the stone reveals that Moab had fallen under the control of the Omride dynasty in Israel but managed to free itself through armed struggle and the providential care of the national deity Chemosh. Mesha's capital was Dibon, modern Dhiban, about two miles north of the Arnon River.

Moab is also known from Assyrian records, which reveal that Moab paid tribute in the eighth century and that during the reign of Ashurbanipal in the seventh century a Moabite king led a campaign against Arab tribes who opposed Assyrian control of the Transjordan. These records presuppose a subservient but working relationship between the kingdom of Moab and the Assyrian Empire. According to the Jewish historian Josephus, the Babylonian Empire under Nebuchadnezzar ended what little autonomy Moab possessed (sixth century B.C.), and while there are no other records from the Persian period to assist historians about Moabite affairs, it seems probable that the Babylonian campaign put a decisive end to the political kingdom of Moab. Of course, the land was still known as Moab for centuries.

Something of Moab's language and culture is known from the Bible and the Moabite Stone. This information is supplemented by the work of modern archaeologists who have made explorations in the region. The chief Moabite deity was named Chemosh, a god known from other texts to have been venerated in northern Syria. The name appears on several seals of upper-class persons from the Iron Age. King Mesha describes Chemosh as angry with Moab and responsible for the nation's subjugation to Israel; however, Chemosh was also responsible for the victory over Israel. A religious rite of sacrificial dedication, the ban (Heb. *herem*) was practiced by the Moabites as it was in Israel. The language of Moab was similar to that of its neighbors Israel and Ammon.

The land of Moab is comparatively high in elevation, reaching points over three thousand feet above sea level, and it is comparatively well watered. Archaeological investigation suggests few large towns existed in ancient Moab, and the economy was based on cultivating wheat and barley, but above all on raising sheep and goats. Several cities are mentioned in either the Bible or the Moabite Stone, some of which can be identified with reasonable certainty. These include Madeba (modern Medeba), Dibon (modern Dhiban), and Kir (Kerak). ***See also*** Lot; Moabite Stone, The. J.A.D.

The Moabite Stone: Stele of Mesha, king of Moab (ninth century B.C.), containing an inscription important for study of the language and history of ancient Israel.

MOABITE STONE, THE

Moabite (moh'uh-bit) **Stone, the,** a black basalt stele found at Dhiban, Jordan (biblical Dhibon), bearing a thirty-four-line inscription of Mesha, the ninth-century B.C. king of Moab mentioned in 2 Kings 3:4. After its discovery in 1868 by the Alsatian priest F. A. Klein, the stone was shattered by the local Bedouin, but in subsequent years approximately two-thirds of the fragments were recovered by the French orientalist C. Clermont-Ganneau, who, with the help of an impression taken before the stone was broken, was able to reconstruct the monument, which is now in the Louvre. Because its language is closely related to biblical Hebrew and its script belongs to the same tradition as the earliest Hebrew documents, the inscription is an important source for the study of the language and writing system of ancient Israel as well as the history of the ninth century B.C.

The stele is dedicated to Chemosh, the god of Moab, in gratitude for Mesha's triumph over his enemies. Speaking in the first person, the king recounts his successes and achievements, beginning with the liberation of Moab from Israelite domination. He boasts of the recovery and rebuilding of the region of Medeba, which had been conquered by Omri, and the capture of nearby Israelite cities. Among the building projects recorded are those in Karhoh, the district of Dibon in which the monument was erected.

A small fragment of a second Moabite stone was found in Kerak, Jordan, in 1958. Its three incomplete lines show that it, too, was a royal inscription of the mid-ninth century B.C., probably another monument left by Mesha. The text reads: (1) [I, Mesha, son of Che]moshyat, king of Moab, the [Dibonite. . . .] (2) Chemosh *for*

THE MOABITE STONE:
A TRANSLATION OF ITS TEXT

(line 1) I, Mesha, son of Chemosh[yat], king of Moab, the
(2) Dibote (my father reigned over Moab for thirty years and I reigned
(3) after my father)—I made this high place for Chemosh in Karhoh [. . .]
(4) because he saved me from all the kings and caused me to triumph over all who opposed me.
(5) Omri, king of Israel, oppressed Moab for many years, because Chemosh was angry with his land.
(6) When his son succeeded him, he too said, "I shall oppress Moab." In my days he spoke *this way,*
(7) but I triumphed over him and his house, and Israel was utterly destroyed forever. Omri took possession of the entire land
(8) of Medeba, and [Israel] lived there during his days and half the days of his son—forty years; but
(9) Chemosh restored it in my days. I built Baal-meon, making a cistern in it, and I built
(10) Kiryathaim. The men of Gad had lived in the land of Ataroth since ancient times, and the king of Israel had built
(11) Ataroth for them; but I fought against the city and captured it, slaying all the people of
(12) the city *for the satisfaction of* Chemosh and Moab. I brought back from there *the altar-hearth of its beloved [god],*
(13) dragging it before Chemosh in Kerioth, and I settled men of Sharon and men of
(14) Maharith there. Then Chemosh said to me, "Go capture Nebo from Israel!"
(15) So I went by night and fought against it from the break of dawn until noon. I captured
(16) it and slew them all—seven thousand men, boys, women, girls,
(17) and maidservants—for I had devoted it to Ashtar-Chemosh. I took from there *the utensils*
(18) of Yahweh, dragging them before Chemosh. The king of Israel had built
(19) Jahaz, and he lived there while he was fighting against me. But Chemosh drove him out before me.
(20) I took from Moab two hundred men, all its poor citizens, and exalted them in Jahaz; I took possession of it in order
(21) to annex it to Dibon. It was I who built Karhoh, both the forest wall and
(22) the summit wall; it was I who built its gates and I who built its towers;
(23) it was I who built the palace and I who made both the reservoirs for water inside
(24) the town. There were no cisterns inside the town at Karhoh, so I said to the people, "Each of you make
(25) a cistern for himself and his house!" Also, it was I who cut *beams* for Karhoh using
(26) Israelite captives. It was I who built Aroer; it was I who made the highway in the Arnon;
(27) and it was I who built the high-place temple, for it had been torn down. It was I who built Bezer—for it was in ruins.
(28) [. . .] the men of Dibon armed for battle, for all Dibon is (my) bodyguard. I made
(29) one hundred [. . .] reign as kings in the towns that I annexed to the land. It was I who built
(30) [. . .] Medeba, Beth-diblathaim, and Beth-baal-meon, where I exalted *the herdsmen*
(31) [. . .] *the sheep* of the land. As for Horonaim, [. . .] was living there [. . .]
(32) [. . .]. Then Chemosh said to me, "Go down and fight against Horonaim!" So I went down and [fought against it.

(34) [. . .].

Key: *[ ]: restored material at break in the stone; [. . .]: text missing; italic: translation of text uncertain; ( ): additions for English sense.*

grazing land, because [. . .] (3) [. . .] him. And behold, I made the [. . .]. P.K.M.

Modein (moh'deen), the home of the Hasmonean family, about twenty-three miles northwest of Jerusalem (1 Macc. 2:1), where the Maccabean revolt began (1 Macc. 2:15, 24–35). ***See also*** Hasmoneans; Maccabees.

Modin (moh'din). ***See*** Modein.

Moladah (moh'luh-duh), a town assigned to Judah (Josh. 15:26), specifically allocated to Simeon (Josh. 19:2), and located near Beer-sheba. It was also resettled in postexilic times (Neh. 11:26). Tentative identification proposed for Khirbet el-Waten eight miles east of Beer-sheba is based on philological association with childbearing and its proximity to Beer-sheba (Josh. 19:2).

mole, the term in the KJV for the RSV's "chameleon" in Lev. 11:30 but used in Isa. 2:20 for a burrowing rodent symbolic of a desolate habitat (with bats). The term designates burrowing animals of the family *Talpidae,* and the word in Isa. 2:20 may be the mole-rat, *Spalax typhlus,* a molelike burrowing rodent 6 to 9 inches long. It lives in darkness, like bats, but apart from the verse in Isaiah, the two are not usually associated.

Molech (moh'lek), the epithet of a deity to whom children were offered as sacrifices. That Molech is a deity, not the name of a type of offering, is clearly indicated by Lev. 20:5. Isa. 30:33 reveals that the word was originally "king" (Heb. *melech*) but was later given a pejorative vocalization (*molech*) from "shame" (*boshet*). Molech should not be identified with Milcom, an Ammonite god (Molech in 1 Kings 11:7 should probably be emended to "Milcom"; cf. vv. 5, 33 and 2 Kings 23:13). What god is intended by Molech is unclear since the title "king" (*melech*) can be used in many divine names. The names of the gods Adrammelech and Anammelech (2 Kings 17:31) to whom the Sepharvites offered their children by fire contain the element *melech* and may show more specifically what divinities were intended by Molech.

Children were dedicated ("passed over") and burned to Molech at the Tophet in the Valley of Hinnom near Jerusalem. This practice with Molech specifically mentioned is found in only four passages (Lev. 18:21; 20:2–5; 2 Kings 23:10; Jer. 32:35). This type of offering without mention of Molech is found abundantly elsewhere (Deut 12:31; 18:10; 2 Kings 16:3; 17:17, 31; 21:6; Jer. 7:31; 19:5; Ezek. 16:21; 20:26, 31; 23:37; 2 Chron. 28:8; 33:6).

Some scholars have suggested that the terms "passing over" children to Molech and "burning in fire" indicate a dedication of the children to the god's service rather than actual sacrifice. Jer. 19:5, however, calls such dedications "burnt offerings" and Ezek. 23:37–39 calls the act "slaughter" and says the children were given to the deity as food. Hence, offerings to Molech must be considered actual sacrifices (cf. Ps. 106:37–38).

This worship may be of Phoenician origin, but the connection is not entirely certain. Deuteronomy explains it as the custom of the indigenous population of Canaan. The Israelites practiced this type of worship from about 735 B.C. until about 575 B.C. The references to it in Jeremiah and Ezekiel show that Josiah's reforms did not entirely eradicate it. ***See also*** Cults; Syncretism; Worship. D.P.W.

molten metal, metal cast by being poured over a form or into a mold. The process was used for several components of Solomon's temple built by Hiram of Tyre, including the pillars, capitals, and basin known as the "molten sea" (1 Kings 7:15, 16, 23). The Bible describes several molten images used as idols (see Judg. 17:3–4; Isa. 40:19; Hos. 13:2), including most prominently the golden calf (Exod. 32). Worship of such objects, which the Bible associates particularly with Canaanite and Assyrian religions (Num. 33:52; Nah. 1:14), is prohibited to Israel (Exod. 20:4; Lev. 19:4; Deut. 27:15).

Money

A COMMODITY used as a medium of exchange or a designation of value. In the OT, money took different forms including metals, goods, and livestock. In the Apocrypha and the NT, coined money, legally authorized by governments, became the standard of exchange for goods, services, and payment of taxes.

Money in the Ancient Near East: In Gen. 47:14–17, Joseph "gathered up all the money that was found in the land of Egypt and in the land of Canaan, for the grain" that was bought in time of famine. This "money" would actually have been precious metals—in the form of wire, rings, ingots, and lumps—or cattle, horses, and other animals when metallic money was unavailable. Hoards of metal used as bullion have been found at sites throughout the Near East. Barter in commodities was just as acceptable as payment in precious metals (including gold, silver, copper, and sometimes lead).

Bronze coin with the name of Agrippa (I); minted in Jerusalem ca. A.D. 37–44, obverse.

The archaeological record in Israel illustrates the practices current during the biblical period. Strata at most sites from the period ca. 1300–587 B.C. contain little evidence of metal coins used as money. Excavated metal objects include armor, weapons, and jewelry. Each piece of precious metal had monetary value, so that earrings, pins, or other adornments also functioned as money. Money took on many forms, including bar ingots, pieces of cut metal, wire, coils of wire, foil, and rings. Hoards of these items have been found at major sites such as Gaza, Shechem, Megiddo, and Beth-shan.

Standards for weighing money varied from place to place. In Gen. 23:16, Abraham purchased a burying place from Ephron the Hittite for 400 shekels of silver, "according to the weights current among the merchants." The Babylonian standard would probably have been used in this transaction, because it was the most commonly employed commercial standard in the ancient Near East. This standard set guidelines for transactions between Mesopotamia, Syro-Palestine, and Egypt. Specifically, the Babylonian weight standard set 1 silver shekel equal to 8.25 grams of metal, which supported the following ratio: 1 talent = 60 minas = 3600 shekels. This denominational division lasted into the Hellenistic period.

A Babylonian *minna* from the reign of Nebuchadnezzar II.

Ancient texts include receipts for goods sold in local and international commerce. For example, an ox would commonly cost 1 gold shekel, which was equal to 15 silver shekels or approximately 2 tons of grain. Solomon dealt in horses and chariots with the kings of the Hittites (Kue) and the kings of Aram (1 Kings 10:28–29); the horses were priced at 150 silver shekels and the chariots at 600 silver shekels. At this rate, four horses would purchase one chariot.

Origins of Coinage: The first metal objects coined as money were probably produced in Asia Minor in the late seventh or early sixth century B.C. According to Greek tradition, Croesus, king of Lydia, was the first

A bronze coin minted by the Roman emperor Titus ca. A.D. 79–81 to commemorate the ending of the Jewish revolt; reverse. At the bottom left a mourning Jewish woman is depicted.

monarch to strike coins in silver, gold, and electrum (a naturally occurring alloy of silver and gold). The earliest coins bore no inscriptions and did not circulate widely. Their use spread quickly, however, thanks to Persian domination of the entire eastern Mediterranean basin by the late sixth century B.C. The silver *sigloi* of Darius the Great copied coins of eastern Greek manufacture and were used throughout the Persian Empire. Persian gold *darics* were struck by the central government, while the silver *sigloi* were minted by local satrapies and met local monetary needs.

The Greeks quickly adapted to using coined money. Their neighbors, however, were slow to accept coins. Weighed amounts of metal continued to facilitate trade in most large commercial centers. Minted metals initially benefited governing bodies more than merchants or financiers. As trade increased and more wealth was attained, the functions of government changed and became more complex, requiring a greater number and kind of official transactions with the populace. Early minted coins obviously facilitated commerce, but even more they simplified all manner of governmental transactions, including the payment and receipt of taxes, temple tariffs and maintenance, payment of mercenaries and soldiers, and the construction of public works. Scholars have argued that this conversion from bullion enabled local communities to simplify all of their monetary transactions. Thus, coined metal at first remained near its point of origin and was used for particular governmental purposes. Soon, however, coins were traded just as any other valuable objects. Differing weight standards among Babylonians, Persians, Phoenicians, and Greeks slowly merged in the fifth and fourth centuries B.C. until Alexander the Great established a single standard for all coinage used from Greece to India. Foreign trade and internal commerce were greatly enhanced by coined money but had little to do with its origins.

Money in the OT: Among the oldest references to "money" in the OT are descriptions of transactions carried out by the Hebrew patriarchs. Abimelech harmed Sarah and paid restitution to her husband, Abraham (Gen. 20:14–16). Abimelech paid Abraham "sheep and oxen, and male and female slaves" that were the equivalent of "a thousand pieces of silver," apparently vindication for whatever evil had been done.

Biblical references to money include prices paid for land, prophetic injunctions against corruption in the marketplace, and obligations to the Temple. For example, after a woman gave birth to a child, she underwent a period of purification including the offering of "a lamb a year old . . . and a young pigeon or a turtledove . . . and [the priest making] atonement for her" (Lev. 12:6–8). Such "Temple taxes" were common in ancient Israel and elsewhere; the animals could be purchased with metals or in kind. Elaborate tariffs covered the range of services rendered by religious institutions; for instance, the Marseille Tariff inscription details costs in a Punic (Carthaginian colony) setting of the fourth century B.C., which probably corresponded to an analogous Hebrew custom. The monies were used for priestly maintenance and upkeep of temples and related institutions.

Jehoash, king of Israel in the late ninth century B.C., institutionalized support for the Temple using monies assessed to individuals and

From left to right: Double shekel from Sidon, late fifth or early fourth century B.C., obverse; gold shekel from Tyre, early fourth century B.C., obverse and reverse; gold coin from Egypt, during the reign of Ptolemy IV, reverse.

monies "a man's heart" prompted him "to bring into the house of the LORD." The priests were instructed to use this money to repair the Temple (2 Kings 12:4–5). The uncoined metals were probably collected, weighed, melted down into small ingots, and measured according to royal standards. The ingots were used to pay the workmen.

From the time of the United Monarchy (ca. 1000 B.C.), male Israelites were subject to periods of mandatory government service either in the army or in public works (1 Kings 5:13). They also paid taxes to meet the costs of government and foreign tribute exacted against the nation (2 Kings 23:35).

The Hebrew word usually used for "money" (*kesef*) literally means "silver." Silver was more common than gold, which had to be imported from Egypt or Anatolia, so most biblical transactions used silver. Achan reported to Joshua on spoils taken from Jericho (Josh. 7:21) including money in the form of rings and bars. The gold Job received from his family when his riches were restored (Job 42:11) included rings. The use of actual coined money in Syro-Palestine began under Persian influence after 539 B.C., when Babylon fell to the Persians and Medes and the East came into greater contact with the Greek world. Hebrew weights already carried denominational markings that were regulated by religious authorities to ensure against corruption and fraud (see Prov. 16:11; 11:1). It was only a matter of time before the same authorities produced locally made coins struck on denominational standards.

By the late fifth century, more and more foreign currency appeared in the markets of Gaza, Tyre, Sidon, and Jerusalem. When authorities struck coins, merchants found that they no longer had to weigh the "shekel" because the governmental stamp verified its weight. Coinage made trade simpler and more efficient. The Phoenician cities of Tyre, Sidon, Aradus, and Byblos struck their own coins before 400 B.C., while Gaza produced coins imitating Athenian *tetradrachms* by the early fourth century. As Persian control of the western provinces waned through the fourth century, Jewish authorities in Jerusalem and Samaria also struck small coins to supplement larger denominations minted elsewhere.

No coins found in Palestine predate the late sixth century B.C. The necessity of coining money was resisted, especially inland from the port cities, where conservative usage of metal rings and bars persisted. In Ezra 2:68–69, not only had the Israelites rebuilt Jerusalem, but families made freewill offerings for the refurbishing of the Temple, giving the treasury "sixty-one thousand darics of gold, five thousand minas of

Silver drachma minted during Persian control of Palestine, fourth century B.C. The reverse (bottom) bears the Aramaic inscription *Yehud*, the name of the Persian satrapy of Judea.

A bronze shekel of Tyre from the Hellenistic period; obverse.

silver, and one hundred priests' garments." The *daric* was the principal gold coin at this time, weighing 8.4 grams and punched with a die depicting the Persian king shooting a bow.

Before the end of the fourth century, Jewish authorities struck small silver coins with the approval of the Persian government. The coins read in Hebrew *yehud* ("Judah"). Persian authorities later issued some similar coins themselves. The period 375–332 B.C. was a time of political upheaval; the Phoenician city-states led two abortive revolts resulting in Persia's imposing severe sanctions upon local rulers, including the revocation of minting privileges. This necessitated the issue of coins with "ethnics" (i.e., phrases identifying the minting authority of the coin) in Aramaic (the Persian diplomatic language) rather than Phoenician or Hebrew, since Persian satrapy officials assumed mint functions. Already, the scenes depicted on the coin flans were assuming nationalistic functions. A war galley with battering ram symbolized the Phoenician city of Sidon. Athenian coinage represented Athens as the center of Greek culture and thought by depicting the head of its patron deity, Pallas Athena, and the owl with an olive branch, symbolic of the Athenian *polis*.

Most of the *yehud* coins were bronzes, struck between 360 and 332 B.C. One example bears the name of *yehiz-qiyyah*, high priest when Alexander the Great came to Jerusalem in 332 B.C. Another silver coin bears the name of *yohanan*, high priest in Samaria—a coin that may have been struck in defiance of Persia (ca. 340 B.C.) during a revolt led by the Phoenicians and Cypriots.

Money in the Apocrypha: After 332/1 B.C., no coins were struck in Palestine until the Maccabean revolt, except in official mints of Alexander the Great at Acco and Tyre. In 168 B.C., Jews once again won minting privileges. Under Alexander Yannai (Gk. *Ioanaeus;* Eng. "Jannaeus"), Maccabean leader from 103 to 76 B.C., coins were struck in Jerusalem with the obverse showing a flower (probably a lily) and the "ethnic" *yehonatan hammelek* ("Jonathan the king"); on the reverse was an anchor with the Greek inscription *basileos alexandrou* ("belonging to Alexander [the] king"). These coins, struck in lead and bronze, were small change and circulated with larger coins produced in other Hellenistic mints. Jonathan later overstruck his coins, altering the title "king" to "high priest and friend of the Jews," for he was not of David's line and some Jews argued that he had no right to the throne. The other Hasmonean rulers continued to issue coins in bronze supplementing Alexandrine issues until Rome seized power in 37 B.C.

A bronze coin minted at Jerusalem ca. 37–34 B.C. during the reign of Herod the Great; obverse (top) and reverse.

Money in the NT: Roman coinage was one of the means used by the imperial government to hold the Roman Empire together. Imperial mints were authorized in many regions because the official mint within the capital city could not meet the monetary needs of such a vast empire. Herod the Great struck coins on Roman standards with the inscription (in Greek) *herodou basileos* ("belonging to Herod [the] king"). He dated his coins and opened mints in Jerusalem and Tiberias on the Sea of Galilee. Concurrently, Roman procurators coined money locally to supplement imperial coinage, which came principally from Rome, Alexandria, and Antiochia (in Syria). Local denominations were the small change. Their types depicted neutral symbols such as grapes or a cornucopia, nonreligious symbols that would not anger the Jewish

populace, even though Romans preferred religious symbols on their coins. The mints of Antiochia and Caesarea in Cappadocia supplied Judea with the large silver coins such as the *denarius* mentioned in the NT. One *denarius* was the usual salary paid to a laborer for one day's work (Matt. 20:2). It was also the Temple tax in Jesus' time and was probably the coin referred to in Matt. 22:21 ("Render therefore to Caesar the things that are Caesar's"), since a likeness of the emperor appeared on the obverse. Following the revolt of A.D. 66–70, the Temple tax increased to a half-shekel (= two *denarii*).

A shekel of the Bar Kochba revolt, ca. A.D. 132–135; reverse.

It is impossible to estimate in modern terms the value of these ancient coins. The KJV translators used English designations such as "farthing" and "penny," but these are misleading and provide only a relative guide to the coins' values. The coins paid to Judas Iscariot (Matt. 26:15) were probably silver shekels from Tyre or Antiochia. Thirty pieces (approximately equal to 120 *denarii*) were considered compensation ("blood money") for an accidentally slain servant (Exod. 21:32). The "widow's mite" was a Greek *lepton* (Mark 14:42), the coin of least value then in circulation. It was half a Roman *quadrans* or a Jewish *peruta* and would have been smaller than a U.S. dime. Any of these coins, ranging in size from 8 to 40 millimeters in diameter, could have been used in Jerusalem around A.D. 30. The cosmopolitan nature of the city made exchange of funds a complex matter.

The money changer's role was significant because he served as financier and banker, often sitting at the gate of the city or a building (such as the Temple) to perform the exchanges required for commerce. When a money changer exchanged Antiochian *tetradrachms* for local *shekels,* a fee of four to eight percent was exacted. When adult males came to the Temple to pay their half-shekel Temple tax, rabbinic instruction insisted that it be paid in silver *didrachms* of Tyre. The money changers were needed to complete the transaction. According to the Mishnah (*Seqal.* 1:3), this tax was collected in the month preceding Passover and for twenty days immediately before the feast in the Temple precincts themselves. When Jesus "cleansed the Temple" (Matt. 21:12–13; Mark 11:15; Luke 19:45–46), money changers may have been collecting this tax for the public welfare. Jesus' action would have been disruptive to the public order and to the authorities managing the religious affairs of the Temple, including the chief priest and the Sadducees. Money changers sometimes cheated when assisting in transactions selling sacrificial animals. Rabbi Simeon reduced the number of obligatory sacrifices (*Ker.* 1:7) in an attempt to eliminate this fraud in the mid-first century A.D. Money changers also functioned as bankers paying interest on held deposits, even though this was contrary to Jewish laws against usury (*Seqal.* 1:6).

Silver shekel from the revolt against Rome, with Hebrew inscription. *Top:* "Jerusalem the Holy." *Bottom:* "Shekel of Israel sh[nat] g[imel]" ("year three," i.e., A.D. 68).

In the later first century, Roman coinage was interrupted by the Jewish revolt from A.D. 66 to 70. Coins were struck with the Hebrew legend *shekel israel* ("shekel of Israel"). Issued on the Athenian standard, the reverse depicted three pomegranates and the words *yerushalayim qadesha* ("Jerusalem [is] holy"). When the Romans put down the revolt, Vespasian and Titus authorized commemorative imperial coins with the Latin inscription *judaea capta* ("Judah [is] captured").

Coins continue to be found by archaeologists at sites all over Palestine. The coins help excavators date the stratigraphic levels of sites because of

the "ethnics" and the dates of the coins. Coins struck in NT times were not dated in the same way that modern coins bear the year in Arabic numerals. Coins are dated by their inscriptions, including the name of the minting authority and the religious symbolism on the reverse side. Each coin has its own history, which illuminates biblical history and daily life in Jewish and early Christian communities.

monogamy. ***See*** Marriage.

monotheism (mon´uh-thee-iz´uhm), the belief that there is only one deity. Most major religions of the biblical world were polytheistic: they had many deities. Israel was exceptional for its emphatic recognition of one God only. This was an essential affirmation of Judaism and part of the foundation of Christianity.

In Ancient Israel: It is not clear how Israel's monotheism originated. Certain trends in Egyptian religion of the second millennim B.C. tended to universalize one single deity, and theoretically these could have influenced Moses; but the wide difference in character between these phenomena and the God of Israel counts against their relevance. It is not intrinsically probable that external religious developments inspired this aspect of Israelite faith. Nor is it easy to see how monotheism could have evolved out of an earlier polytheism by some process of selection and rejection; there are not really enough texts to demonstrate this. It has often been argued that some historical experience, such as deliverance from Egypt, led Israel to recognize Yahweh as the uniquely active and saving deity. Yet no texts depict this event as a sudden or cataclysmic passage from faith in many gods to faith in one.

It seems more natural to consider Hebrew monotheism as primitive but originally tribal. From the earliest relevant times there were Israelite groups for whom it was natural or axiomatic that a people had one deity who was their special god. This may not have been unique; the Moabites may have been similar. The groups in Israel that early insisted zealously on one God may have been small; traditions of the early Levites and the Kenites are a probable trace. Eventually the logic of monotheism succeeded in imposing itself upon the nation through dominant religious traditions. It came to be hardly thinkable that a Jew would be other than a monotheist.

Biblical monotheism was group-centered and practical rather than theoretical. It did not prevent the occasional speaking of other gods as if they existed or had control of other lands or peoples (e.g., Exod 12:12; Num. 33:4; Josh. 24:15; Judg. 10:6). Elements of their mythology continued to be used. Names used for them were used for the true God also; but the proper and most used term for Israel's God was his personal name, Yahweh. Monotheism had an element of zealotry, insisting fiercely on the oneness of God and his name. And, considered seriously, this reduced other gods to nonentities, with no power or reality.

Polytheism of some kind, especially perhaps in the form of a female consort for Yahweh, continued to attract many in Israel, and polemic against it in the Bible was continual (e.g., Judg. 6:30–32; Isa. 27:9). It was attacked as being foreign (Jer. 5:19), as a return to the old Canaanite gods (Judg. 10:6–9), as being linked with repellent ritual, sexual, and moral practices (Hos. 4:12–13), as being associated with the worship of objects of wood and stone (Isa. 44:9–17), and as having brought historical disaster on the people (Mic. 1:2–7). Above all, the ethical demands of Yahwistic religion were made to depend on the requirement of monotheism. These elements are especially interlinked in Deuteronomy, probably a reform document that unites the oneness of God (cf. the all-essential *Shema* of Deut. 6:4) with the insistence on the one and only holy place. Isaiah 40–55 combines a strong emphasis on monotheism with a stress on the role of the one God as creator of the world and ruler of all its parts. Polytheism is continually ridiculed, but in a way that suggests it is no longer deeply understood or felt as a serious temptation. After the return from Exile monotheism was scarcely challenged in Israel.

In the NT: In the NT the monotheistic convictions of Judaism are taken for granted. The "first of all the commandments" according to Jesus is the *Shema,* the affirmation of the oneness of God (Mark 12:29). The NT Letters also emphasize the oneness of God (1 Cor. 8:6; Eph. 4:6; 1 Tim. 2:5) and correlate it with the one Lord or mediator and the one faith and baptism. The term "God" is applied to Jesus only rarely and with reserve; in the synoptic Gospels this is true also of "Son of God." Jewish opponents are not represented as criticizing Christianity for abandoning monotheism. Nevertheless the close association of Jesus with God seems to lead toward the seeing of monotheism in a different way, wherein deity has inner distinction as well as unity. The implications of this are not yet worked out within the NT and only beginnings toward an answer are presented. ***See also*** Polytheism. J.B.

months. ***See*** Time.

moon, the earth's natural satellite. In the Bible, the moon is perceived in several ways. Gen. 1:16 records that the moon, called the lesser light, was created to shine at night as a counterpart to the greater light, the sun, which shines during the day. Pss. 8:3 and 136:9 describe the moon as part of God's handiwork. As a marker of the night sky, it is described in Jer. 31:35. It is viewed as a symbol of permanence in Pss. 72:5; 89:38; 121:6; and Heb. 3:11. Along with the sun and the stars, the moon bows down to Joseph in his dream in Gen. 37:9. Joshua commands the sun and moon to stop in their courses during his encounter with the Amorites (Josh. 10:12, 13).

Apocalyptic references to the moon are numerous and speak of it as an object that will darken because God's light, a metaphor for his rule, will be everlasting (Isa. 60:19, 20; Job 25:5; Eccles. 12:2; Ezek. 32:7). Joel (3:4) prophesies

that the moon will turn to blood before the coming of the Messiah. Similarly, in the Mesopotamian conception, an eclipse of the moon was taken as a portent of evil.

In the NT, the moon is also viewed as a herald of the Messiah (Mark 13:24; Luke 21:25; Acts 2:16–21). In Rev. 21:23, the moon is seen as superfluous since the Lamb will light Jerusalem.

Terms: Hebrew has two terms for moon: *yareakh* and *levonah*. The first is a common Semitic term, appearing as *yrkh* in Phoenician and as *arkhu* in Akkadian, where it is also the usual word for "month" or one lunation. *Yerakh* also means month in Hebrew.

Levonah is a derivative of "white." In most biblical references, *levonah* is used in parallelism to *shemesh,* "sun," to describe the brilliant luminosity of the moon (Song of Sol. 6:10; Isa. 30:26). But in Isa. 24:23, *levonah* is used in parallelism to *bosh,* "shame," to evoke an image of colorlessness accompanying embarrassment.

In referring to the new month, the biblical author uses the term "new, renewal" (Heb. *khodesh*) rather than either of the standard terms for moon. Terms for the lunar crescent refer specifically to the first and fourth crescents.

Calendar: The calendar employed by the Hebrews of the OT was based entirely on observation. The determination of years was based on solar observations, whereas months were determined by lunar observations. Only the festivals Passover and Sukkoth are celebrated at the approach of the full moon. These holidays come as close as is possible in the luni-solar system to marking the vernal and autumnal equinoxes, respectively. Of all the months, only the beginning of Tishri (Sept.–Oct.) was singled out as a special day. The biblical text does not use the term "head of the year" (Heb. *rosh hashanah*) for it. Tashritu, the corresponding month in the Babylonian calendar, was similarly treated.

According to early rabbinic sources, the new moon was originally fixed by proclamation of witnesses regarding the reappearance of the moon's crescent. If the crescent had not been sighted on the thirtieth day of the month, the new moon was proclaimed for the thirty-first day. Beacons were kindled on the Mount of Olives to mark the arrival of the new moon crescent. This system was extended throughout the Diaspora until the Samaritans began to light misleading beacons to confuse the calendar and the observance of the new moon. The high court countered this attack on rabbinic authority by sending messengers to remote communities with the announcement of the new moon.

Worship: Pronouncements against worshiping the moon, decried as pagan practice, are issued in Deut. 4:19 and 17:3. 2 Kings 23:5 records Josiah's command to the high priest, Hilkiah, to eliminate worship of the moon. Isa. 1:14 ("your new moons and your appointed feasts my soul hates") condemns misuse of the cult, including new moon rituals; though it is possible that specific paganizing practices are alluded to.

In spite of these denunciations, evidence for cultic celebration of lunar phases is found in the biblical text. Num. 28:11–15 preserves a ritual calendar that details monthly offerings for the moon. This passage is still read in traditional synagogues on the Sabbath when the new moon is pronounced. Num. 10:10 and Ps. 81:4 instruct the population to sound the horn at the new moon as a way of offering praise to God. The new moon is celebrated by David and Jonathan (1 Sam. 20). Remnants of lunar celebration are evidenced in the celebrations and gatherings in the historical passages in 1 Chron. 23:31; 2 Chron. 8:13; 31:3; Ezra 3:5; and Neh. 10:33. Most of these include mention of the Sabbath. It appears that at the time of the new moon, all commerce was halted (Amos 8:5) and the prophet was not consulted (2 Kings 4:23).

The importance of the moon in worship in the ancient world varied in degree and by location. In Mesopotamia, lunar worship was already firmly established by the beginning of recorded history. Records from lunar cult observances taking place in the chapel of the *ursakar,* "new moon crescent," date to 2400 B.C. New moon festival offerings are attested at pre-Sargonic Lagash and Sargonic Nippur. In the Neo-Sumerian period (2100–2000 B.C.), lunar festivals were regularized with observances marking the first, second, and fourth quarters of the moon. A fourth festival occurring on the twenty-fifth day of the month, and not corresponding to a lunar phase, was added in the early second millennium B.C. The lunar festivals survived well into the first millennium B.C., when as many as eight festivals were observed in the course of one lunation.

Two important Mesopotamian centers for moon worship, Ur and Harran, figure prominently in the patriarchal narratives. Ur was the homeland of Abraham's father, Terah. After leaving Ur, the family went to Harran, where Terah died (Gen. 11:31, 32). The city god of both Ur and Harran was called Nanna in Sumerian, Sin (Su'en) in Akkadian. His headdress consisted of four pairs of horns topped by a crescent moon. The crescent resembled a boat, and Nanna was sometimes called the "shining boat of Heaven." His sphere of activity is hard to define. He is seen as a wise god, the originator of life, the leader and guardian of humankind and the lord of destinies. He is considered the father of the sun god. His consort is known as Ningal, "great lady" in Sumerian, and as Nikkal in Aramaic and Phoenician. The text "Nikkal and the Kathirat" relates the marriage of Nikkal to Yarikh, as the moon god was known in Ugaritic.

The names of two ancient Israelite cities, Beth Yerakh and Jericho (Heb. *Yerikho*) are derived from a word for moon and probably indicate the existence of lunar worship at those sites at some early—presumably Canaanite (cf. the god

Yarikh)—period. ***See also*** Feasts, Festivals, and Fasts. L.E.P.

Mordecai (mor´duh-kī; from Akkadian *Marduk, Merodach*). **1** One of the exiles who returned to Jerusalem with Zerubbabel (Ezra 2:2; Neh. 7:7; 1 Esd. 5:8). **2** The hero of the book of Esther. Mordecai raised his orphaned cousin Esther and enabled her to become the queen of King Ahasuerus of Persia. But Mordecai

Mordecai, astride a horse, being conducted by Haman through the open square of the city as told in Esther 6:1–11; panel at the third-century A.D. synagogue at Dura-Europos.

aroused the anger of the king's vizier, Haman, by refusing to bow down to him. Haman therefore plotted to have Mordecai and all the Jews of Persia killed in revenge. Mordecai prompted Esther to appeal to Ahasuerus to spare her people. Ahasuerus, who had belatedly honored Mordecai for saving his life, was outraged to learn of the plot. He ordered Haman's execution and allowed the Jews to destroy their enemies. This deliverance is now celebrated in the Jewish festival of Purim, called the "Day of Mordecai" in 2 Macc. 15:36. Noting the historical problems the book raises, scholars consider the story of Esther to be fictitious. While this view is undoubtedly correct, the identification of an official named Marduka in the court of King Xerxes I (485–465 B.C., generally identified as Ahasuerus) suggests to some a potential historical basis for the existence of Mordecai. ***See also*** Esther; Haman; Purim, The Feast of. M.A.S.

Moreh (mor´eh; Heb., "teacher, oracle-giver"; in positive sense, sometimes of God), a place name, suggesting a location for divine instruction—an activity often connected to prominent trees. **1** The terebinth (a large tree resembling an oak) at the sacred site near Shechem where Abram built an altar commemorating God's appearance to him (Gen. 12:6–7; note a fine wordplay between *moreh* and *nir'eh,* "appear"). Deut. 11:30 uses it as a landmark for the Gerizim-Ebal pass; in Gen. 35:4 (here: "oak"), it is probably where Jacob buried idols near Shechem. The Diviners' Oak in Judg. 9:37 may also designate this tree, here with a negative connotation ("divining" was forbidden in Israel, Deut. 18:10, 14, and elsewhere). Trees in Josh. 24:26 and Judg. 9:6 were inside Shechem; the Moreh tree lay outside. **2** Moreh Hill—again suggesting a place to receive oracles—the extinct volcano opposite Mount Gilboa at the east extremity of the Jezreel plain, where Midian encamped against Gideon's forces (Judg. 7:1). ***See also*** Ebal; Gerizim; Oak; Terebinth. E.F.C.

Moresheth, Moreshethgath (mor´uh-sheth, mor'uh-sheth-gath´), the prophet Micah's home village (Jer. 26:18; Mic. 1:1), located near the city of Gath (the compound name; 1:14). Identification as Tell ej-Judeideh seven miles northeast of Lachish and west of Tekoa is still most common. Micah's use of the compound name may indicate possession by or close geographic association with Gath; or the compound may mean "bride of Gath," if *moresheth* is understood as "bride of," a possible meaning for this Hebrew word.

Moriah (muh-rī´uh). **1** An unidentified site in rugged terrain three days' travel from Beer-sheba where Abraham was to sacrifice Isaac (Gen. 22:2). **2** The rocky hill in Jerusalem where Solomon built the Temple (2 Chron. 3:1), a possibly deliberate cross-identification by the Chronicler with David's purchased threshing floor (2 Sam. 24:18–25). In that way the Temple, built on land belonging to David, could be associated with him, even if he was not allowed to build it (2 Sam. 7).

morsel (KJV: "sop"), a fragment or piece, usually of bread. In lieu of eating utensils small pieces of bread were the primary means of conveying food from bowl to mouth. Eating from the same bowl involved the participants in a convenant-like friendship. To "break bread together" and then betray the friendship was universally acknowledged as contemptible (Ps. 41:9; Matt. 26:23; Mark 14:18–20; John 13:18–30). That is why Judas's betrayal of Jesus was an especially grievous offense. Whether Jesus offered to Judas a special morsel ("this morsel," John 13:26) or simply a morsel is uncertain.

mortar. 1 The grinding vessel in which a pestle was the crushing instrument (Prov. 27:22; Num. 11:8). Archaeological examples of stone mortars range from large grain grinders to delicate spice and cosmetic versions. **2** The sealer between

courses of stone or brick, whether a natural material like bitumen (Gen. 11:3) or a prepared compound (Exod. 1:14). A hint of the preparatory process as trampling is reflected in Isaiah's metaphoric reference (Isa. 41:25), and Jeremiah's oracle against Egypt used stones buried under mortar as a figure for the successful Babylonian conquest of the land (Jer. 43:9). Nahum 3:14 sees treading mortar as a preparation for defense, and Zephaniah uses it as a proper noun for a location in Jerusalem where silver traders functioned (1:11). Its precise location is uncertain, though the upper Tyropoeon Valley has been suggested. Archaeological evidence for mortar includes examples of mud, bitumen, and plaster compounds. R.S.B.

mortgage. *See* Loan.

mosaic, a decoration made by inlaying small pieces of different colored materials (such as tile, stone, glass, or marble) to form patterns or pictures. Mosaic inlays can be found on floors, walls, and even furniture.

The earliest known mosaics have been found in lower Mesopotamia and date to the fourth millennium B.C. These patterns, called cone mosaics, were formed by placing small painted cone-shaped tiles into mud plaster on walls.

A mosaic dating to ca. 400 on the floor of the church at Tabgha commemorates the miracle of Jesus feeding the multitude (Matt. 15:32–38).

Designs of triangles, diagonals, chevrons, and zigzags were formed. These early mosaics may well have been intended to imitate carpets and wall tapestries. The Sumerians from this same region used mosaics also to decorate musical instruments, game boards, and furniture.

Apparently the Hebrews of the OT era made very little use of mosaics, although some mosaic-like ivory inlay pieces have been recovered from the excavation of Samaria. In Palestine, mosaics became more prominent during the Roman-Herodian period. Beautiful examples of Herodian mosaics have been uncovered at Masada and in recent excavations of the old Jewish Quarter of Jerusalem.

Mosaics reached their peak as an art form during the Byzantine period (A.D. 300–1451). Both Jewish synagogues and Christian churches were richly decorated with mosaics during this era. A beautiful third-century mosaic has been excavated recently at Sepphoris. The beautifully detailed face of a woman shows a flush on the cheeks, lipstick or moist lips, and jeweled earrings. The Medeba Map, a map of the Holy Land found in Medeba, Jordan, originally contained 1.5 million cubes, indicating the size and detail found in some mosaics.

In Ravenna, Italy, the churches of St. Apollinarius and St. Vitalis preserve magnificent sixth-century Byzantine mosaics. The Dome of the Rock, built by the Ummayad conquerors of Jerusalem in A.D. 691 over the site of the Temple, is covered with mosaics inside and outside. It is an excellent example of early Arab mosaics. J.F.D.

Moses (moh′zis), the first and preeminent leader of the Israelites, who led the people out of Egypt to the threshold of the promised land; he is also the lawgiver and the archetypical prophet. He is the dominant individual character in the OT narrative from Exodus through Deuteronomy. The text speaks of him in superlatives: "And there has not arisen a prophet since in Israel like Moses, whom the Lord knew face to face" (Deut. 34:10). For all his greatness, however, Moses never loses his humanness, displaying anger, frustration, and lack of self-confidence in addition to his leadership abilities, humility, and perseverance.

Birth and Family Background: The first information readers are given about Moses concerns his birth, in secret, to an unnamed Levite couple (Exod. 2:1–10). Because of the Egyptian decree to kill all newborn Hebrew males, the child was first hidden by his mother and then cast adrift on the Nile in a watertight container. As his sister watched a short distance away, Pharaoh's daughter found him, whereupon the sister stepped forward to suggest an appropriate nurse for the infant—none other than his natural mother. Thus the child was raised by his own mother and then returned to Pharaoh's daughter who adopted him and named him Moses (Heb. *mosheh*), which the Bible explains as meaning "Because I drew [from the root *mashah*, 'to draw'] him out of the water" (Exod. 2:10). (But the name may actually be an Egyptian one meaning "is born"; cf. the last component of Egyptian names like Thutmose, Ahmose, etc.)

This story resembles folktales found throughout the world of babies who averted ordained death, were hidden or raised by surrogate par-

Moses leading the Israelites safely across the Red Sea and the Egyptians caught in the water; page from the tenth-century *Paris Psalter.*

ents, and returned or emerged to play a major role in their societies. The closest analogy is "The Legend of Sargon," an Akkadian text that recounts the birth of Sargon of Agade. According to this text Sargon's mother bore him in secret, placed him in a basket of rushes sealed with pitch, and floated it down the Euphrates. It was found by Akki, the drawer of water, who raised the child as his own. The goddess Ishtar protected the child and he grew up to become a great king. The existence of such a story suggests that Exod. 2:1–10 is not to be regarded as historical, but rather as a conventional motif—a story of a special birth. The Bible's more usual special-birth motif involves a "barren mother," i.e., a woman who had difficulty conceiving but finally gave birth to a special child (cf. the birth stories of Isaac, Jacob, Joseph, and Samuel). But since Exodus 1–2 stresses the fertility of the Israelite women and the increase of the Israelite population, a "barren mother" story would have been out of place here. So instead a different type of special-birth story occurs.

The legendary quality of the story is further emphasized by the fact that none of the characters is named (except Moses). It is from Exod. 6:20 (cf. Num. 26:59; 1 Chron. 6:3; 1 Chron. 23:13) that we know that Moses' father was Amram, his mother Jochebed. His brother Aaron, older by three years, is first mentioned in Exod. 4:14, then in Exod. 6:20, and his age is given in Exod. 7:7. Miriam, the sister, is omitted from the genealogy in Exod. 6:20 but is named in the ones in Num. 26:59 and 1 Chron. 6:3.

Nothing is known of Moses' childhood. He reemerges as a young man who identified himself with his brethren, the enslaved Israelites. In an attempt to protect one of them he killed an Egyptian and was forced to flee Egypt. He sojourned in Midian, married Zipporah, a daughter of Jethro (also called Jether, Reuel, and Hobab), a Midianite priest. Their first son was Gershom (Exod. 2:22); a second son, Eliezer, is mentioned in Exod. 18:3–4 (cf. 1 Chron. 23:15).

Moses as Prophet: It is in his role as prophet that Moses stands out above all others. The verse cited in the opening paragraph, Deut. 34:10, refers to this aspect of him, as do Num. 12:7 and others. The contact between God and Moses was closer and more direct than between God and any other prophet.

Moses' Call: Apparently unprepared for his prophetic mission, Moses' attention was caught by a burning bush. Slowly his reaction changed from curiosity to awe as he realized that he was in God's presence (Exod. 3:1–6). Yet Moses was reluctant to accept the task of bringing the Israelites out of Egypt and gave a series of excuses for which God provided retorts ranging from assurances of God's help to the appointing of Aaron as Moses' assistant. Although initial reluctance is typical of a number of prophets, e.g., Jeremiah, and in an extreme form, Jonah, the picture we get of Moses here is a combination of humbleness and stubbornness.

Signs and Wonders: In addition to words of encouragement and the foretelling of future events, God gave Moses a sign to convince him that he was truly being commissioned (Exod. 3:12). Moses also received proofs for the Israelites and for the Egyptians that God had indeed sent him. To convince the Israelites Moses was told the name of God in the famous and difficult phrase "I am that I am" (Exod. 3:14; cf. also 6:3), and shown a series of wonders he will perform for them: changing a rod into a serpent and back to a rod again; making leprosy appear and disappear from his hand; and changing water into blood. The first of these wonders was also performed before Pharaoh; the last was transformed into the first of the ten plagues.

The plagues themselves (Exod. 7–11) can be construed as signs—proof to the Egyptians of God's superior power. They also served as a form of punishment to Pharaoh and his people for having dealt harshly with the Israelites. It is not only Moses who performed wonders; Aaron was sometimes the one to set the plague in motion through his action, as in the first, second, and third plagues. Both Moses and Aaron threw soot toward the sky, bringing the plague of boils. Moses himself brought the hail, the locusts, and the darkness by stretching his hand or rod upward. Even the Egyptian magicians were credited with some power to work wonders; they could duplicate some of the early wonders but apparently could not undo them. They could cause a rod to become a serpent, make water turn to blood, and produce frogs; but their serpent was swallowed by Aaron's,

MOSES

never to revert to a rod, and they could not remove the blood or the frogs. They recognized God's power, however, only when they were unable to duplicate his wonder—in the plague of gnats (or lice; Exod. 8:16–19).

Wonders may be harmful or beneficial. On the wilderness journey for the Israelites' benefit Moses divided the sea (Exod. 14:21–15:21), turned brackish water into sweet water (Exod. 15:22–25), and produced water from a rock (Exod. 17:1–7). His raised hands ensured victory over the Amalekites (Exod. 17:11–12). In the book of Numbers it is recounted that Moses provided the people with meat (11:1–35) and with fresh water (20:2–11).

Many of these wonders resemble the wonders of other prophets, e.g., Elijah and Elisha. It should be stressed that in all of these cases the power to perform wonders does not originate with the individual, nor is it the result of magical manipulations (as in the case of the Egyptian magicians); the power to work wonders comes from God. It is he who causes the wonder through his human agent. Thus it is God who dictates the action and God who enables it to be accomplished. Some of the plagues and the provisioning of Israel in the wilderness are achieved by God directly, without any actions on the part of Moses or Aaron (e.g., the swarm of flies in Exod. 8:20; the quails and the manna in Exod. 16:13); others are initiated by a specific human gesture. But even in the latter case God is at work behind the scenes, as is evident from Exod. 9:23: "Then Moses stretched forth his rod toward heaven; and the Lord sent thunder and hail . . . " (cf. also Exod. 10:13; 14:21).

Spokesman and Intercessor: A prophet functions mainly as a spokesman, a "forthteller." Ironically it is the power to speak well that Moses initially claimed to lack, so he could therefore not be effective as a spokesman before Pharaoh. As a concession, God appointed Aaron to be a spokesman for Moses, even as Moses was a spokesman for God (Exod. 4:14–16; 7:1). Yet the man who was "slow of speech" is credited with the magnificent speeches of Deuteronomy as well as with all manner of discourse in the Exodus–Numbers narrative. At times it becomes difficult to distinguish between the roles of Moses and Aaron, as both speak and perform actions. We will, therefore, refer to Moses in the following discussion even though it is sometimes Aaron who actually does the talking.

Moses spoke for God to the Israelites and to Pharaoh. His first task was to persuade the Israelites that he was truly God's representative, and it is to this end that Aaron performed the signs that God had provided to Moses. The brothers were successful; the people believed them. Yet later, after the Egyptians had increased their workload and made conditions harsher, the people lost confidence in their leader and Moses complained to God that he would never be able to convince Pharaoh to do what he requested if he could not convince even the Israelites (Exod. 6:12). Despite this weak beginning, Moses and Aaron went again and again to Pharaoh to deliver God's message. And, since the channel of communication operated in both directions, Moses relayed Pharaoh's wishes to God. When Pharaoh pleaded for the removal of the frog plague, Moses entreated God and the frogs were removed. The same occurred in the case of the flies, the hail, and the locusts.

It is, of course, to the Israelites that Moses was sent as prophetic spokesman, and it is to them that he continually conveyed God's commands. These ranged from information about the journey, encouragement, and chastisement, to instructions on how to collect the manna. In fact, everything that Moses said can be viewed as emanating from God. This applies to Moses' most important discourse: the giving of the law. The giving of the law is an aspect of Moses' prophetic function.

As he did in the case of Pharaoh, Moses served as the link between the Israelites and God; he interceded with God on behalf of the people. The first occurrence is in Exod. 5:22–23 after the Israelites' suffering had increased. A crucial intercession took place in the golden calf episode. Here Moses assuaged God's anger by suggesting that if God punished his people it would be construed by the Egyptians as a weakness on God's part—his inability to protect the Israelites in the wilderness. This, and a reminder of the promise made to Abraham, convinced God to withdraw his anger (Exod. 32:11–14). On another occasion when God's anger was manifest, the people cried to Moses to plead for them. When he prayed on their behalf they were spared (Num. 11:2). Even when Moses' own position was threatened—when the people wanted to stone him and appoint a new leader—Moses still reacted to God's anger at this by reminding him, as he had before, that the other nations would perceive the destruction of Israel as a weakness of God. Here, too, Moses was successful in obtaining at least a partial pardon (Num. 14). Other instances occur in Miriam's leprosy (Num. 12); Korah's rebellion (Num. 16); and the copper serpent incident (Num. 21).

Intercession is part of the prophetic aspect of Moses; he is a link between God and human beings. The most dramatic evidence of Moses as an intermediary occurred at Sinai. Moses had, already long before, been commissioned by God to represent him, but in Exod. 20:19 the people, fearing direct contact with the divine, commissioned Moses to represent them before God.

Moses indeed fulfilled his task as spokesman well, working to the benefit of God and the people. In fact, he is so often a spokesman for someone else that very often we lose sight of his own personal needs and desires. So apparently it must be with a prophet and a national leader.

Lawgiver and Judge: The law is a central feature of the Pentateuch and so the lawgiver assumes importance. It is Moses who gives the law, which originates from God, to Israel. As we have suggested above, the giving of the law need not be considered a separate function of Moses, but rather part of his prophetic function. Thus Moses brought the law engraved on tablets and proclaimed the laws and ordinances that constitute a significant part of Exodus, Leviticus, Numbers, and Deuteronomy. Even before the revelation at Sinai Moses instructed the people about the celebration of the Passover and the observance of the Sabbath.

On a more practical level, Moses served as judge and arbiter (this being a function of his role as national leader as well as interpreter of God's law). At first he was the sole judge, but at the suggestion of his father-in-law, Jethro, he instituted a system of lower judges for lesser matters; the difficult cases were brought to Moses (Exod. 18).

One such case involved the inheritance rights of Zelophehad's daughters. Since there was no precedent for daughters to inherit land, Moses consulted God. The response was that in the event that a man had no sons, his daughters should inherit his land so that his name and holdings might be perpetuated. God thus ruled in favor of the claim of Zelophehad's daughters (Num. 27). But in the sequel (Num. 36) the leaders of the tribe of Manasseh (Zelophehad's tribe) approached Moses with their concern: if the daughters were to marry men from other tribes, then the land would eventually be passed on to their children and thereby lost to the tribe of Manasseh. Thus the purpose of the original ruling would be thwarted; the land would be alienated from its original owner and tribe. Moses acknowledged the legitimacy of the concern of the Manasseh representatives and ruled that, while the daughters could inherit their father's land, they had to marry within their own tribe. Here we see the development of legal application in action. We also get some insight into the sensitivity with which Moses dealt with all parties concerned.

National Leader: Moses was sent to lead the people out of Egypt, and there is no question that he was a successful leader. He took a mixed multitude and under his guidance they were shaped into a national entity. Moses led the people from encampment to encampment and directed them when conflicts with other nations arose. Like most leaders, he was subjected to complaints and grumblings and even rebellions (e.g., Exod. 16), and he was called upon to provide solutions to problems and psychological encouragement.

At times Moses himself appears discouraged, and this allows us to see him in a more human light. For instance, in Exod. 17:4, after complaints about water, Moses sought help from God saying, "What shall I do with this people?"

Moses before the burning bush, loosening his sandal in response to God's command in Exod. 3:5; from the mosaics at the Monastery of St. Catherine, Sinai, sixth century A.D.

Even more vivid is the portrayal of Moses' frame of mind in Numbers 11. Displeased with the people's actions and with God's anger, Moses felt that he had been made to appear at fault, and that his burden was too heavy for him. At this point God allowed the burden of leadership to be shared by seventy elders who received a measure of God's spirit.

It often happens that attacks on a leader come from those closest to him, and so it was with Moses. Resentment of his special bond with God was voiced by his own brother and sister (Num. 12), and a major rebellion was instigated by Korah, a member of Moses' own tribe (Num. 16). But with God's help Moses was able to weather these attacks on his position.

Death and Burial: Ironically, although Moses must certainly be judged successful in his mission, he himself was not permitted to partake of this success; he was not granted the privilege of entering the promised land but could only glimpse it from across the Jordan. At this crucial juncture a new leader, Joshua, was appointed by God. When it was time for Moses to die, he ascended Mt. Nebo, in Moab, and, after viewing the future home of the Israelites, expired. The text records that "he," that is, God, buried Moses and that no person knows his burial place (Deut. 34:6). So, like his birth, Moses' death has a specialness attached to it.

This is emphasized by the ideal lifespan, 120 years, and his lack of any signs of aging. In death, as in life, Moses was superior yet modest, singled out by God for special closeness yet never totally removed from his human context.

The Historicity of Moses: Our only source of knowledge about an individual named Moses is the Bible. Archaeology has not unearthed objects bearing his name, nor do ancient Near Eastern documents contain references to him. Therefore, judging his historicity, like the historicity of other early biblical figures, depends on one's view of the historicity of the Bible, especially the Pentateuch where the preponderance of Mosaic references are found. The historicity of the Pentateuch is a vexed question in biblical scholarship. Based on inconsistencies and doublets, scholars have isolated separate sources dating from different periods. Because some of the Moses stories show inconsistencies (e.g., in some of the wilderness narratives) or occur in doublets (e.g., intercessions in Exodus and Numbers), it is difficult to know which material is historically authentic, if any. Most scholars think that the most reliable references to Moses come from the J and E sources, the two earliest.

Some scholars have gone further and isolated four different themes or traditions connected with Moses: the exodus from Egypt, the revelation at Sinai, the wandering in the wilderness, and the entrance into the Promised Land. These themes, according to modern scholars like M. Noth and G. von Rad, originated in separate settings among various tribes and preserve different historical experiences. It would then seem doubtful that the same leader could have figured in all of them. According to this view there is a gap between the original themes/traditions and the picture presented even in the earliest sources of J and E.

This difficulty is refuted by those who suggest that even if the traditions developed independently, it is not impossible that Moses originally had a place in all of them. Each tradition developed differently, and so each developed a different view of Moses as well. Thus different aspects of the same person are preserved in different traditions.

Another problem is posed by some: in one of the earliest references to the Exodus, the poem in Exodus 15, Moses is not mentioned. By the same token, references to Moses outside of the Pentateuch (especially in prophetic and hymnic literature), even in connection with exodus or Sinai motifs, are relatively few. Thus the historicity of the man, as opposed to the events, is called into question. But this does not mean that Moses was actually a negligible or nonexistent person; it results simply from the fact that prophetic and hymnic literature is concerned with God and Israel, not with individuals, and therefore it highlights very few historical personages.

It is unlikely that a quick consensus will be reached concerning the historicity of the Pentateuch. Indeed, it might be better if this concern were replaced by concern for its literary and religious aspects. Here there is no need to rely on the hypothetical reconstruction of sources or traditions. The Pentateuch makes abundantly clear (and it is not contradicted by references elsewhere in the Bible) that there was one person who, at least from the point of view of Israel's literary-religious tradition, played a major role at the crucial point when the nation was born and its religious norms established. The importance of Moses, like the importance of all great national heroes, transcends his historicity.

Moses in the NT: Because of the towering significance of Moses as the mediator of God's law to the chosen people, it is not surprising that in the NT Moses is mentioned principally in connection with the law. That is true both in the Gospels (Matt. 19:7; Mark 7:10; Luke 16:31; John 1:17) and in the Letters of Paul (Rom. 9:15; 10:19; 1 Cor. 9:9; 2 Cor. 3:13). He is also citied as exemplary for his faith in God (Heb. 3:2; 11:24) and is regarded as having announced beforehand the coming of Jesus as Messiah (Acts 3:22; 26:22). Indeed, the traditions contained in the writings of the NT are unanimous in the estimation of Moses as one specially chosen by God to free God's people and give them God's law. ***See also*** Biblical Criticism; Exodus; Law; Sources of the Pentateuch; Prophet; Torah.

Most High, the usual translation of a Hebrew adjective meaning "high" or "exalted" when applied to God. Taken from Canaanite culture (cf. Gen. 14:19–20), it became a popular name for God in the OT (e.g., Pss. 7:17; 21:7; 91:1), and, in Greek translation, appears also in the NT (e.g., Mark 5:7; Luke 1:32; Acts 7:48). ***See also*** God.

mote. ***See*** Speck.

moth, a term denoting any small, winged butterfly-like insect; in the Bible it always refers to the insects that eat clothes. As such, it is a symbol of decay and human frailty (Job 4:19; 13:28; Ps. 39:11; Isa. 50:9; 51:8; Hos. 5:12). In the NT, it is a symbol of the transitory nature of earthly riches (Matt. 6:19, 20; Luke 12:33; James 5:2).

mount, mountain, a high land mass projecting above the surrounding area. Mountains are a dominant feature of the biblical landscape and accordingly have influenced greatly the way of life and beliefs of the ancient peoples inhabiting this land. Mountains have important effects upon the climate, population, economic life, and state of civilization of the region in which they occur, e.g., regions on their windward side have greater rainfall, while those on the leeward side are arid.

Mountain Chains in Palestine: In Palestine there are two formidable mountain chains. West of the Jordan River lie the great western highlands. This chain, running north-south, is an extension of the mountains of Lebanon and comprises three distinct ranges separated by plains and valleys: the Galilee, Ephraim and Judah, and in the south, the Negev. The Carmel mountains near Haifa are an east-west spur of this chain. East of the Jordan River, the eastern highlands rise even more precipitously above the Rift Valley, extending from Mt. Hermon in the north through biblical Gilead, Amman, and Moab to Edom in the south.

The north-south orientation of these mountains dictated the major routes of communication, i.e., the road system, which likewise, to a large extent, determined settlement patterns. Major trade routes spanned the country north-south forming a land bridge between the great empires of Egypt to the south and Syro-Mesopotamia to the north. This bridge facilitated the movement of trading caravans and of invading armies. East-west communication was limited to gaps between the mountain ranges.

Mountains are frequently referred to in the biblical text as dwelling places (Gen. 36:8), places of refuge (Gen.14:10; Judg. 6:2; Matt. 24:16), lookouts (Matt. 4:8), landmarks (Num. 34:7), assembly sites (Josh. 8:30–33; Judg. 9:7), military camps (1 Sam. 17:3), cemeteries (2 Kings 23:16), geographical boundaries (Josh. 15:8), places of ambush (Judg. 9:25), scenes of battle (1 Sam. 23:26), sanctuaries for the animal world (Ps. 11:1), pastures (Luke 8:32), and the habitat of goats (Ps. 104:18) and birds (1 Sam. 26:20).

The term "mount" is applied to an isolated mountain or a notable peak or specialized summit within a range, e.g., Mounts Ebal, Seir, Gerizim, Gilboa, Hermon, Nebo, Tabor, Sinai or Horeb, Carmel, Olives, Zion, and others. That each of these mounts has religious associations should come as no surprise, for throughout the ancient world mounts or mountains were imbued with religious significance and symbolism.

Sinai and Zion: Despite the injunctions against deifying mountains in Hebrew religion (Ezek. 18:6, 11, 15; Jer. 3:2, 6; Hos. 4:13)—God was to be worshiped exclusively without restriction to any specific location—sacred mountains are

Mount Gilboa, 1696 feet above sea level, overlooks the Jezreel Valley.

attested in the biblical text. Two mountains inextricably associated with God are Mount Sinai or Horeb and Mount Zion. It is on Mount Sinai where the covenant between God and Israel was sealed (Exod. 19:24), where Moses spoke to God (Exod. 19:3, 10; 24:9), and where God revealed his presence (19:16, 18). Mount Zion was another favored abode of God (Pss. 68:16; 84:5). These traditions clearly demonstrate the influence of Near Eastern mountain myth and specifically Canaanite mythology on Hebrew religion. Prior to the discovery of Ugaritic texts where Mount Zaphon, the sacred mountain of the Canaanite god Baal, is mentioned, the Hebrew word *Zaphon* was always translated "north." Now that we know the correct meaning of the word, we find that Mount Zion in Jerusalem is equated with Mount Zaphon: "Mount Zion in the far north" (Ps. 48:2, RSV) should read "Mount Zion is the heights of Zaphon." The use of Zaphon as a proper name clarifies other passages as well where sacred mountains are referred to, e.g., "Zaphon and Amana, thou has created, Tabor and Hermon joyously praise thy name" (Ps. 89:12). References to the "mountain of the Lord" and to the sacredness of mountains are extremely numerous (Gen. 22:14; Exod. 3:1; Deut. 11:29; Josh. 8:30; 2 Kings 4:25; Isa. 2:2; Isa. 8:18; Ezek. 28:14).

In the NT: In the NT, Jesus makes it clear that the worship of God was not restricted to any particular mountain (John 4:2–24). Yet, mountains figure prominently in contexts of worship, prayer, and events of great religious significance. The Sermon on the Mount exemplifies this continuing tradition (Matt. 5:1–7:29). Jesus' temptation occurred on a very high mountain (Matt 4:8) as did his transfiguration (Mark 9:2); for his own prayer and devotion, Jesus sought the mountains (Matt. 14:23; Mark 6:46; Luke 6:12; 9:28; John 6:15). The Mount of Olives was the setting for Jesus' entry into Jerusalem (Mark 11:1; Luke 19:29); his betrayal occurred on the lower slopes at Gethsemane (Matt. 26:30–56; Mark 14:26–50); and it is reported that the Mount of Olives was the site of his ascension (Luke 24:50; Acts 1:9–12). Mount, Sermon on the. ***See*** Sermon on the Mount, The.

mourning rites, the rituals practiced upon the death of a relative or national figure or in times of national crisis. Death was acknowledged by rending the clothes and dressing in sackcloth. These practices were followed by Jacob when he was presented with the bloody coat of his son Joseph (Gen. 38:34). When Job was informed of the death of his children, he "rent his robe, shaved his head, and fell upon the ground, and worshiped" (Job 1:20), and his friends wept, rent their robes, sprinkled dust upon their heads, and sat on the ground with him for seven days and seven nights (Job 2:12–13; cf. 2 Sam. 13:31). In Micah we find mention of lamentations while naked (1:8) and the cutting off of one's hair (1:16; cf. Ezek. 27:30–31). Jeremiah expects the mourners to make themselves bald and cut themselves (Jer. 16:16), while Leviticus specifically prohibits shaving, cutting the hair, tattooing, or the making of gashes in the skin on account of the dead (Lev. 19:27–28).

Ezekiel was commanded by God not to mourn the death of his wife. "Bind on your turban, and put your shoes on your feet; do not cover your lips, nor eat the bread of mourners" (Ezek. 24:17). A contrast between times of mourning and times of joy (Isa. 61:3) enumerates the wearing of ashes and the abstention from anointing oil as signs of mourning. Further, no ornaments were to be worn (Exod. 33:4). Friends of the mourner sat in grief with him (Job 2:12–13) and gave him a meal of bread and wine to console him (Jer. 16:7). Formal lamentations or elegies (Heb. *kinot*) were recited, as at the death of Josiah when "singing men and singing women" performed as professional mourners (2 Chron. 35:25).

Mourning rites are also attested in the Bible in times of national calamity. After the defeat of Ai, Joshua rent his clothes and put dust upon his head (Josh. 7:6) as did Mordecai when he received the news that Haman was planning to exterminate the Jewish people (Esther 4:1–3). In addition, Mordecai went out into the city "wailing with a loud and bitter cry," and the Jews of the city fasted as well. Psalms 74, 79, and the book of Lamentations are elegies (Heb. *kinot*) for the destruction of Jerusalem and the Temple.

Various mourning periods are specified in the narratives ranging from seven days (Gen. 50:10), to three weeks (Dan. 10:2), to "many days" (Gen. 37:34). Although a captive woman must mourn for a month (Deut. 21:13), a definite period of mourning is not commanded anywhere else in the Bible. The Talmud legislated several periods of mourning, each less intense than the previous one, to bring mourners gradually out of their grief lest they mourn excessively. The period of *aninut* lasted from the announcement of death until the burial. Mourners were forbidden to take meat or wine and to perform certain commandments, both as a sign of grief and as a way of giving full attention to the burial preparations. After the burial, the period of *shiv'ah* lasted for seven days. Mourners rent their clothes, sat upon the ground, and did not labor, receiving condolences from the community. During the period of *sheloshim*, the first thirty days, mourners did not cut their hair or attend social or festive gatherings. The entire year following the death of a parent was marked by the abstention from joyous events.

There are no specific instructions for mourning in the NT, although the custom of communal mourning for the dead did continue (Mark 5:38; John 11:33). ***See also*** Sackcloth. L.H.S.

Moza (moh´zuh). 1 The son of Caleb and his concubine (1 Chron. 2:46), a name considered by some to be adapted from a place-name associated with Judah. 2 The son of Zimri (1 Chron. 8:36; 9:42) and the father of Binea (1 Chron. 8:37; 9:43), listed as descendants of King Saul.

Mughara, Wadi el (m*oo*g-hahr´ah, wah´dee el; Arabic, "Caves, Valley of the"), caves also known as the Carmel Caves, lying on the western slope of the Carmel promontory, just eighteen miles south of Haifa. Within this valley, which opens upon the vast coastal plain, there are three major caves of interest for prehistoric research: Mugharet el-Wad ("Cave of the Valley"), Mugharet et-Tabun ("Cave of the Oven"), and Mugharet es-Sukhul ("Cave of the Kid"). The site became famous as a result of British excavations carried out by Dorothy Garrod in 1929–34. Discoveries of prehistoric cultural materials show a continuous development from a hunter-gatherer society (Tayacian), ca. 150,000 B.C., to a society of incipient agriculturalists (Natufian), ca. 10,000 B.C.

The largest cave, Cave of the Valley, is 71 meters long. Early human skeletal and cultural remains dating from the Mousterian to the Natufian periods were encountered inside the cave, while Natufian occupation extended to the wide terrace in front. This important Natufian site included architectural remains, burials with bodies in flexed position with necklaces of dentalia on the skulls, and the first art objects to appear in Palestine. The Cave of the Oven and the Cave of the Kid both revealed important human skeletal remains bearing on the relative chronological position of Neanderthal and modern human forms. In the Cave of the Kid, the expedition uncovered eleven skeletons evincing characteristics of both Neanderthal and modern (*Homo sapiens*) forms. The evidence from Carmel raises the question whether in the Near East *Homo sapiens* evolved from, or was contemporary with, Neanderthal forms.

S.L.R.

mulberry (*Morus nigra*), a long-lived tree whose heart-shaped leaves and dense, spreading branches provide shade. The small blackberry-like fruit produces a dark red juice which is referred to as the "blood" (RSV: "juice") of the mulberry in 1 Macc. 6:34. The white mulberry, the leaves of which are used to feed the silkworm, is a more recent import from China and Persia. The references to the mulberry (KJV; RSV: "balsam") in 2 Sam. 5:23–24

The Carmel Caves (Wadi el Mughara), where excavations have revealed cultural remains from ca. 150,000–10,000 B.C.

and 1 Chron. 14:14–15 are thought to apply instead to aspens, trees whose leaves stir noisily in the slightest breeze. The mulberry is also identified as the sycamine of Luke 17:6, which is not to be confused with the sycamore, or mulberry fig. ***See also*** Sycamine; Sycamore. P.L.C.

mule, the hybrid offspring of a donkey and a horse, normally a jackass and a mare. While its lack of understanding was proverbial (Ps. 32:9), the mule's strength, endurance, and docility made it ideal for transporting goods (2 Kings 5:17; 1 Chron. 12:40) and riding (Isa. 66:20). From their earliest appearance in the OT (2 Sam. 13:29), mules are usually associated with royalty (2 Sam. 18:9; 1 Kings 1:33, 38, 44). Since the law prohibited the breeding of hybrids (Lev. 19:19), it is likely that mules were imported into Israel (1 Kings 10:25; Ezra 2:66; Neh. 7:38; cf. Ezek. 27:14). Mules are not mentioned in the NT. ***See also*** Animals; Horse; Trade and Transportation. G.L.M.

mummification, an elaborate embalming technique practiced in ancient Egypt, which spread to some extent south and east to Nubia. Early in Egypt's history people observed that bodies buried in the warm, dry sand, and thus dried out, were often well preserved. This experience, coupled with the Egyptian belief in bodily resurrection, prompted the development of intentional, careful means to preserve the body. For that matter, burial in the sand prior to proper interment remained a practice in Egypt for many centuries, especially for the poor. By the later Old Kingdom (ca. 2300–2200 B.C.) there was a well-developed mummification process for wealthy burials, and the techniques were significantly improved by the time of the New Kingdom (sixteenth century B.C.).

The expensive, protracted process took about seventy days and involved removing the brain tissue (usually through the nostrils), taking out the major organs, preparing the body interior, and covering the body with natron to help dry it out prior to the final cleansing, padding, and wrapping with many layers of cloth. (The primary organs were separately preserved in special jars or boxes.) There were also less elaborate alternatives. One more modest process involved injecting the body with oil and treating it with natron. The oil was subsequently drained out, bringing with it the dissolved interior organs. In the cheapest style, the embalmers merely cleansed the body and treated it with natron prior to the wrapping. The precise embalming practices varied with time and place as well as in expense. The fully treated body was then placed in a coffin, often rather elaborate, and transported to the tomb for the "Opening of the Mouth" ritual by which the body regained the powers of speech, hearing, and sight, making it ready for new life. Mummification was extended to include the embalming of various animals sacred to particular deities. Sacred animal cemeteries with literally thousands of burials are known from many sites.

Genesis reports that Israel (Jacob), who died in Egypt, was embalmed by the physicians, a process requiring forty days (50:1–4), and that Joseph, who also died in Egypt, was embalmed and placed in a coffin (50:26). The Genesis references reflect the more elaborate process described above. Mummification was not practiced by the Israelites, although it continued among the Coptic Christians of Egypt to a limited extent. ***See also*** Burial; Embalming; Jacob; Joseph. H.B.H.

Muppim (muh´pim). ***See*** Shephupham.

murder, the taking of another human being's life illegally. Protection from killing is a central part of God's covenantal blessing to Noah after the Flood; God himself will seek blood for a human being's blood, whether the latter is shed by an animal or another human being (Gen. 9:4–6), for human beings were created in God's image. In the Decalogue, God prohibits killing (Exod. 20:13; Deut. 5:17), the sanction here too being understood as divine.

Forms of Legal Liability: Whereas such moral condemnations are widely drawn, the forms of legal liability were carefully defined. Causing death by direct physical contact in principle rendered the killer liable to death (Exod. 21:12), but the possibility of asylum was available in cases of accident (Exod. 21:13, the origin of our notion of "an act of God"; Deut. 19:15 exemplifies this with the case of the flying axehead) but not cases of premeditation, such as ambush (Exod. 21:13) or previous hatred (Exod. 21:14; Deut. 4:42; 19:4, 6, 11; Josh. 20:5; Num. 35:20). Direct killing with an instrument liable to cause death also took the offender outside the protection of the asylum laws (Num. 35:17–19). Homicide in the course of a sudden quarrel was viewed as comparable to accidental homicide (Num. 35:22–23). But the protection afforded by the asylum was limited. According to one understanding of Deut. 19:6, it commenced only when the offender reached one of the designated cities of refuge, but Num. 35:12 and Josh. 20:9 seek to protect the accused en route, which accords with the motive of avoiding the shedding of innocent blood (Deut. 19:10). Once the offender reached the city of refuge, there would be an adjudication (Num. 35:24); according to Josh. 20:4, it took place at the city gate, and the fugitive would not be admitted to the city in advance of it. If the offender was found to have acted without premeditation, the avenging kinsman (Heb. *go' ayl hadam,* interpreted by some as a public official) would be turned away from the city (Josh. 20:5); if not, the offender would be handed over (Deut. 19:12), to be executed by the kinsman. Where protection was granted, it extended only within the boundaries

of the city of refuge (Num. 35:26–27). On the death of the high priest, the offender was free to return home (Num. 35:28).

It is likely that this system was designed to monitor and control customary practices whereunder the kin of the deceased were free to exact blood vengeance or accept a ransom (Exod. 21:30), subject to the offender's recourse to temple sanctuary, probably at the local shrine (Exod. 21:13). Even then, offenders might be dragged from the altar to their death (Exod. 21:14), at this stage apparently without any legal proceedings. The later system restricted the rights of the kin, not only by requiring formal adjudication when the accused sought asylum, but also by banning the acceptance of ransom (Num. 35:31–32) and requiring the evidence of two witnesses (Num. 35:30). The residual role of the kinsman as executioner might still lead to abuse (including the acceptance of ransom).

At least by the time of Ezra (mid- to late sixth century B.C.), with the loss of autonomy and the territory of most of the cities of refuge, the adjudication of murder became entirely a matter of state regulation, to be administered by judges appointed by Ezra under the authority of the Persian king (Ezra 7:25–26). Capital jurisdiction apparently was removed from Jewish courts under the Romans, one rabbinic tradition dating this to A.D. 30 (*y. Sanh.* 1:1; but see *b. Sanh.* 37b). Nevertheless, the Mishnah dealt with the law of murder largely on the basis of the biblical texts. But where the court found the accused parties guilty, after they had fled to the city of refuge, they were to be beheaded under authority of the court, rather than be handed over to the kin for execution (*m. Mak.* 2:6; *m. Sanh.* 9:1). The biblical tests of intention were replaced in the Mishnah by a requirement that those accused be warned by witnesses immediately before they commit the offense, and that they acknowledge such warning—a clear indication of the rabbinic distaste for capital punishment, explicitly found elsewhere. The alternative for the rabbis was a system of imprisonment (*m. Sanh.* 9:5), perhaps with a hint of divine judgment as to the ultimate fate of the accused, who was placed on a diet of "the bread of adversity and the water of affliction" (Isa. 30:20).

Special Situations: The "Covenant Code" considers a number of situations that fall outside the paradigm case of murder and that in modern law would be treated as presenting problems of causation, manslaughter, or justification. When death occurs after the victim has risen from the sick-bed and walked outside, the offender is not regarded as the cause of death (Exod. 21:18–19). Where death has been caused by an ox and the owner is blameworthy because he had been warned of previous incidents but did not keep the animal in, the owner is responsible for the death (Exod. 21:29). Homicide is justified where a thief is caught breaking in at night (Exod. 22:2–3). A master is not entitled to kill his slave outright, but if disciplinary measures lead to the slave's death a day or so later, the master is exempt (Exod. 21:20–21). By contrast, David was held morally, if not legally, accountable for the death of Uriah, although David's personal role was restricted to the giving of the orders that led to Uriah's death (2 Sam. 11–12).

There is little trace of collective responsibility in the biblical sources on murder. The elders of the nearest city were required to deny participation and knowledge, as part of a ceremony of expiation, where the victim of an unknown killer was found in the country. The denial is sufficient to rebut the prima facie suspicion; the expiation removes the pollution of the land by the innocent blood. Despite the RSV translation (Deut. 21:1–9), there is no suggestion of "guilt" on the city for the killing. The same rationale underlies the case of the householder who fails to furnish his roof with a parapet (Deut. 22:8): if someone falls from it, there will be innocent blood in the house. There is no suggestion here of legal liability (unlike the case of the ox owner), nor even of moral liability that may occasion divine punishment (again despite the RSV use of "guilt of blood").

In the NT, Jesus reiterates the prohibition against murder (Matt. 19:18), whose source is Satan himself (John 8:44). Indeed, to hate another human being is reckoned as murder by Jesus (Matt. 5:21–22; cf. 1 John 3:15). ***See also*** Law; Robbery. B.S.J./P.J.A.

murrain (muhr´en; KJV; RSV: "plague" in Exod. 9:3), an obsolete term for infectious diseases afflicting animals and plants.

Mushi (my*oo*´sh*i*), the son of Merari and grandson of Levi. He was the ancestral head of a major subdivision of the Merarite clan of Levites, the Mushites (Exod. 6:19; Num. 3:20; 26:58).

Mushites (my*oo*´sh*i*ts). ***See*** Mushi.

Music

Round-bottomed, silver, stringed harplike instrument found in the royal graves at Ur, ca. 1339 B.C. (It may be incorrectly reconstructed from two different instruments. The sound box from an even earlier lyre is shown in the section of color photographs.)

INSTRUMENTAL AND VOCAL SOUNDS having rhythm, melody, or harmony. Secular and sacred music played no less a role in the lives of the people of biblical times than it does in our own day. It added to the pomp of national celebrations, bolstered the soldier's courage, enlivened work and play, lent comfort in times of sadness, and provided inspiration in religious expression. The sound of early Near Eastern music would seem less strange to the modern ear than previously thought. Though we are not informed about ancient rhythms and tempos, we do know that heptatonic, diatonic scales, familiar to us from Western music, also existed in antiquity. A number of stringed instruments would have produced sounds similar to modern small harps, lyres, and lutes. Other instruments, notably woodwind, percussion, and the simpler stringed instruments, were merely less sophisticated forms of modern orchestral or folk instruments, and some are still in use in the traditional cultures of the contemporary Near East.

Mesopotamian and Egyptian Music: On the earliest Sumerian clay tablets from Uruk (ca. 3000 B.C.) appears the pictographic sign for the typical boat-shaped Sumerian harp; and the earliest depiction of this instrument is found on a seal impression from Chogha Mish (modern southwest Iran) dating ca. 3200 B.C. An actual example of such a harp, together with nine ornamented lyres and a set of silver pipes, was found at Ur—the traditional home of Abraham—in the royal graves of Queen Pu-Abi and her retinue (ca. 2650 B.C.). An inlaid panel that once decorated one of the lyres shows an animal orchestra, a common early folk theme, that included a lyre-playing donkey, a clapping and singing bear, and a jackal keeping time with a sistrum and a percussion instrument. By the end of the third millennium, textual evidence, including collections of divine hymns, hymns to temples, and hymns to and for the kings of the third dynasty of Ur—featuring many musical terms—attests even more directly to a well-developed Sumerian musical tradition.

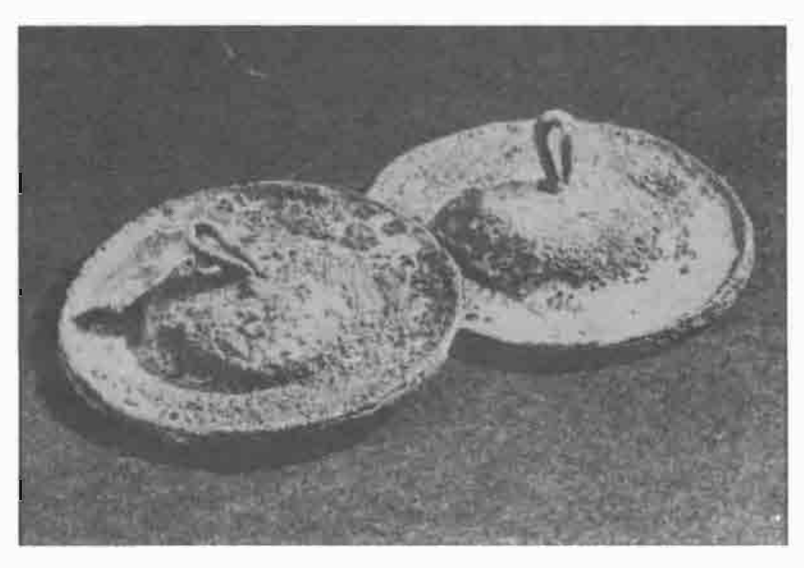
Statue of a singer discovered at the royal palace at Mari; third millennium B.C.

Even more is known about Assyrian and Babylonian music in the second and first millennia. Illustrations, particularly first-millennium Assyrian reliefs, depict a varied assortment of instruments, and encyclopedic lists of names of instruments were compiled in the scribal schools. A large repertoire of hymns, laments, and liturgical litanies gives some notion of the use of song in religious ritual, especially those that were provided with labels indicating their type or purpose or the nature of their accompaniment or manner of performance.

Mesopotamian sacred and courtly music was apparently performed or directed by families of professional musicians, perhaps not unlike David's levitical guilds of musicians. Professional musicians were trained in the temple schools, and it was probably such musician-

A man dances to the music of clappers, pipe, and lute; limestone relief from Carchemish, ninth–eighth century B.C.

scribes who set down on cuneiform tablets dating from ca. 1800 to ca. 500 B.C. the Mesopotamian theory of music, whose details have gradually come to light over the last several decades. Assyriological and musicological research has shown that the Mesopotamian musical system knew seven different heptatonic-diatonic scales, one of them like our own major scale; the Mesopotamian material therefore provides evidence for the antiquity of Western music some fourteen hundred years before the earliest Greek sources. One complete piece of music whose explicit notation uses technical Akkadian interval names followed by number signs was found at ancient Ugarit in Syria; the piece is a Hurrian cult hymn to the moon goddess Nikkal and dates to ca. 1400 B.C.



Egyptian music also has a long history, with graphic and written remains stretching from ca. 3000 B.C. to Roman times. More importantly, many instruments depicted in illustrations or mentioned in written documents have actually survived intact and serve as a valuable source of comparative data for the study of both Mesopotamian and biblical instruments. These include several types of lyres, harps, and lutes, a copper and a bronze trumpet from the tomb of Tutankhamen (1347–1338 B.C.), true end-blown flutes as well as double reed-pipes of both the clarinet and oboe varieties, and many percussion instruments such as drums, cymbals, sistrums, bells, rattles, and clappers.

Hebrew Secular Music: Biblical references to music begin with the mention of Jubal, "the father of all those who play the lyre and pipe" (Gen. 4:21). It is no coincidence that his name is related to the Hebrew word for "ram" (*yobel*), from whose horns the primitive signal-horn (*shophar*) was made.

References to the popular enjoyment of music are common in early biblical history. It was always a part of celebrations, whether a farewell party complete with "mirth and songs, with tambourine and lyre" (Gen. 31:27); a joyous homecoming (Judg. 11:34); or the feasts of the idle rich, who spend their days with "lyre and harp, timbrel and flute

A blind harpist playing his instrument; detail of a relief from the tomb of Paätenemheb Saqqara, ca. 1212 B.C.

A pair of bronze cymbals from Megiddo, ca. 1200–1000 B.C.

and wine" (Isa. 5:12). Singing accompanied work as well as play, and many work songs or chants have been recorded, e.g., those of the well diggers (Num. 21:17–18), the watchman (Isa. 21:12), and the pressers of grapes (Jer. 25:30; 48:33).

Warfare gave rise to martial songs. Such heroic ballads were probably set down in the lost "Book of the Wars of the Lord" (Num. 21:14) and the "Book of Jashar" (Josh. 10:13; 2 Sam. 1:18), and were no doubt sung by itinerant minstrels and bards (cf. Num. 21:27–30). Miriam sang of Moses' final defeat of Pharaoh (Exod. 15:20–21); and Deborah celebrated Israel's victory over Jabin with a song of triumph (Judg. 5). Samson exulted over his slaying of the Philistines (Judg. 15:16) in a rhythmic victory chant like the one the women sang back and forth at Saul's homecoming (1 Sam. 18:6–7). But Israel was not always victorious, and songs were also composed for fallen heroes, such as David's moving lament for Saul and Jonathan (2 Sam. 1:19–27).

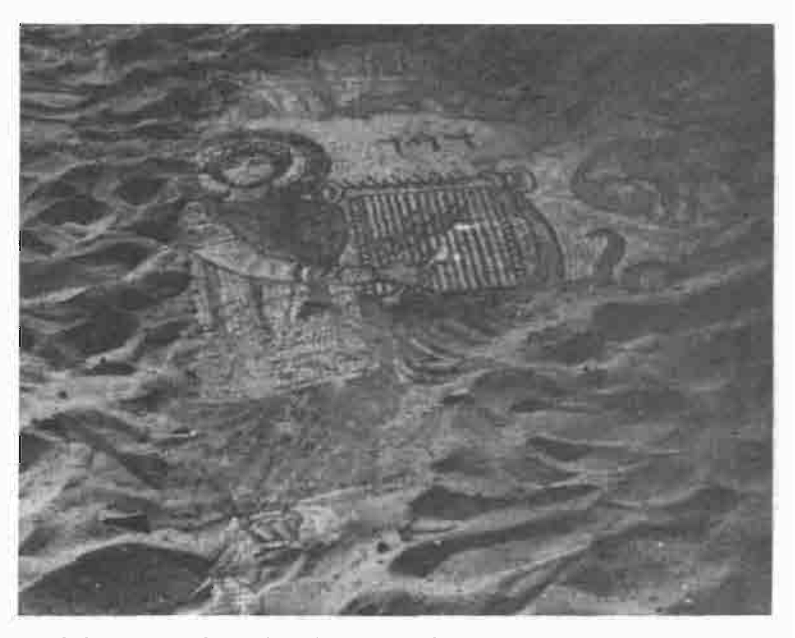
A seated harpist playing; Mesopotamian terra-cotta plaque, 1800–1500 B.C.

Hebrew Sacred Music: Music was not apparently an important part of Israelite religion in the early days of biblical history. With the monarchy (after ca. 1040 B.C.), however, and the growth of the Temple came professional musicianship both at court (1 Kings 1:34, 39–40; 10:2; Eccles. 2:8) and in religious ritual. Some have expressed doubts that the organization of Temple ritual and liturgy, as described in 1 Chronicles 15 and 16, was the sole handiwork of David; and doubt has also been cast on his role in the composition of the Psalter. Certainly the David reported in the OT is a larger-than-life figure, and the levitical guilds of musicians established by him may have attempted to enhance their own prestige and prerogatives by attaching his name to some of the works of others. But there are too many indications of David's skill as a musician to discount his traditional accomplishments without more solid evidence. He was a composer of songs and lamentations, a skilled lyre player (1 Sam. 16:16–18), an inventor of instruments

(Amos 6:5), a valued court musician (1 Sam. 19:9), and even a dancer (2 Sam. 6:14–15). The literary record of his many abilities is foreshadowed only by that of the Sumerian king Shulgi of Ur (2093–2045 B.C.), who celebrated his own remarkable talents in music, athletics, and statesmanship in a number of finely crafted hymns. In any event, Temple music doubtless featured both trumpet calls (cf. Num. 10:10; Ps. 98:6) and the singing of songs of thanksgiving, praise, and petition following the sacrifices (2 Chron. 29:20–30). At the reestablishment of the Second Temple (late sixth century B.C.), the descendants of the original levitical musicians (Ezra 2:41) reassumed responsibility for the music of the liturgy, and the influence of those hereditary guilds can be seen in the references to their founders in the psalm headings. Some idea of how the vocal music may have been performed may be gotten from the structure of many psalms. Refrains and acclamations (e.g., "Hallelujah"), divisions into strophes, and above all the common devices of poetic parallelism all strongly suggest types of responsorial or antiphonal performance.

A lyre with twelve strings connected by an oblique crossbar decorates a brown jasper seal (seventh century B.C.) from Jerusalem.

Musical Instruments: Much of what is known about the instruments of the Bible comes from literary evidence: the Scriptures and their earliest translations, and the descriptions and comments of the rabbis, church fathers, and classical authors. Additional evidence has come from archaeological discoveries, both the remains of actual instruments and the abundant pictorial representations of instruments and musical scenes from throughout the entire Near Eastern and Mediterranean world. Even so, identifications are difficult and usually represent merely the best guesses that biblical scholarship presently has to offer.



The *shophar,* or ram's horn, is the most frequently mentioned biblical instrument, and the only ancient instrument still in use in the synagogue. The word may ultimately come from the Akkadian name for

A bronze flute player from Byblos dates to the second millennium B.C.

David, the "sweet psalmist of Israel," depicted playing a lyre in a sixth-century floor mosaic at the synagogue at Gaza.

the ibex, or wild goat, but the instrument was usually made from the horn of a ram, sometimes softened with heat and straightened or shaped. It was a simple instrument that could only produce two or three notes, and it was used mostly for signaling, especially in times of war (Judg. 3:27; 6:34; Neh. 4:18–20) or of national celebration (1 Kings 1:34; 2 Kings 9:13).

A bronze figurine of a woman playing a long-necked lute (twelfth century B.C.); found at Beth-shan.

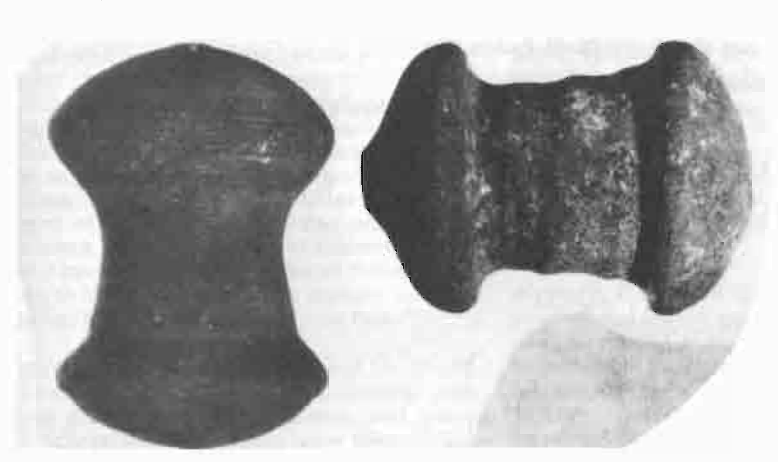
The trumpet (Heb. *khatsotsrah*) was made of metal, either bronze or silver. It was probably a short, straight instrument, with a high, bright tone and a range of only four or five notes. Its early uses are well summarized in Num. 10:2–10. It was played by the priests, usually in pairs, but occasionally in large choirs (2 Chron. 5:12–13), and it numbered among the sacred gold and silver utensils of the Temple (2 Kings 12:14; cf. Num. 31:6).

The *kinnor,* David's "harp," was actually a lyre, a portable rectangular or trapezoid-shaped instrument with two arms, often of unequal length and curved, joined at the top by a cross-piece; the strings were of roughly the same length (unlike a harp's). This instrument was popular all throughout the ancient Near East, and the word itself appears in the cuneiform vocabularies of ancient Ebla in Syria (ca. 2400 B.C.), and in Assyrian, Hurrian, Hittite, Ugaritic, and Egyptian texts. It was an instrument of joyful celebration, generally used to accompany singing.

Another stringed instrument, always mentioned together with the lyre, was the *nebel,* either a kind of angular harp with a vertical resonator such as is often depicted on first-millennium Assyrian reliefs, or another kind of lyre with an unusual waterskin-shaped sound-box known only from depictions on coins from the Bar-Kochba period (A.D. 132–135). The RSV usually translates it "harp" (but also "lute" in Ps. 150:3).

The principal biblical wind instrument was the *khalil* (RSV: "flute" or "pipe"), which consisted of two separate pipes of reed, metal, or ivory, each with its own mouthpiece containing either a single (clarinet-type) or double (oboe-type) reed. The pipes were played together, one probably acting as a drone accompaniment. The *khalil* was primarily a secular instrument, generally used on joyful occasions (1 Kings 1:39–40; Isa. 5:12), but it was also suitable for mourning (Jer. 48:36; Matt. 9:23).

The *ugab* is usually considered another kind of pipe, perhaps a true flute, though the Septuagint considers it a stringed instrument. It is mentioned together with other stringed instruments in Gen. 4:21 and Ps. 150:4.



Percussion instruments included the *toph*, a small tambourine without jingles (also called a "timbrel," "tabor," or "tabret"), small bronze cymbals 4 to 6 inches in diameter, which may have been played with an up-and-down motion, and a kind of noisemaker (2 Sam. 6:5), variously translated as "castanets," "rattles," "sistrums," or "clappers." The bells attached to the high priest's robe (Exod. 28:33–34; 39:25–26) are better translated as "metal jingles," since true bells with clappers were unknown in Israel before the ninth century B.C. They served a protective rather than musical function.

A trumpeter from Carchemish, ninth century B.C.

In Dan. 3:5, 7, 10, and 15 appears a list of instruments reportedly played by the court musicians of the Babylonian king Nebuchadnezzar (604–562 B.C.). They are either Aramaic terms or Aramaic forms of Greek words, and the identification of most of them is still not entirely certain. They probably included a curved horn, a flute or, less likely, a Panpipe, a lyre, a small boat-shaped harp, and a second kind of lyre or possibly an early type of zither. The last term (RSV: "bagpipes") is an Aramaic form of the Greek word *symphonia*, which may simply mean several instruments "sounding together," and therefore "music."

Four different instruments are mentioned in the NT, the double-pipe (RSV: "flute"), the lyre (RSV: "harp"), the trumpet, and the cymbals. The "noisy gong" mentioned by Paul in 1 Cor. 13:1 probably refers to the large brass vases that were placed at the rear of Greek theaters to help amplify the actors' voices.

The Psalm Headings About two-thirds of the psalms designate their authorship in their headings: either David, the "sweet psalmist of Israel"

Pottery rattles found at Tell Beit Mirsim typify those used from the second millennium to the ninth century B.C. They were filled with one or more small pellets to make noise.

(2 Sam. 23:1), or, with only a few exceptions, founders of families of levitical musicians connected with the original establishment of the Temple liturgy. Other terms and expressions in the headings refer more directly to musical matters, the nature, purpose, or manner of performance of individual compositions.

Some songs are called "psalms," from the Greek translation of Hebrew *mizmor;* both terms refer to a song with instrumental accompaniment. Other titles include "song" (Heb. *shir,* a word ultimately derived from Akkadian and Sumerian), "song of praise," and the common word for "prayer" (also applied to the misplaced psalm Hab. 3). The meanings of the untranslated terms *Maskil* and *Miktam* are unknown; they come from roots meaning "to have insight" and "to cover, conceal." *Shiggaion* in Ps. 7 (and Hab. 3) is related to the Akkadian word for a kind of lament or cry of woe.

Some comments refer to the manner of a psalm's performance, e.g., "upon stringed instruments [*neginoth*]" or "for the flutes [*nehiloth*]"— although these translations are not entirely certain. *Alamoth* (Ps. 46) and *Sheminith* (Pss. 6; 12) may refer to a type of harp tuning and the playing of a melody an octave higher. *Mahalath* (Pss. 53; 88) may refer to a type of dance, perhaps to a rhythm.

Also found in the headings are song cues, the titles or opening words of popular older songs to whose tunes the psalms were to be sung, e.g., "Hind of the Dawn" (Ps. 21), or "Lilies" (Ps. 45).

The frequently occurring word *Selah,* which appears within or at the ends of certain psalms, is probably also a kind of performance indication. The word's meaning is unknown, but based upon the translation of the Septuagint it is thought to indicate a pause in the singing, possibly signaled by the sounding of cymbals. At such points musical interludes may have occurred, or a different group of performers may have taken up the singing.

Music in the NT: In addition to the names of several instruments (see above, "Musical Instruments"), there are some references in the NT to singing in the context of worship (Eph. 5:19; Col. 3:16b), although there is no indication of who did the singing or when in the worship service it occurred. The references to singing by the inhabitants of heaven in Revelation (e.g., 4:10) and the hymnic fragments cited (e.g., 4:11; 5:9; 7:15–17; 11:17–18) may provide an insight into the kind of music that was used in early Christian worship.

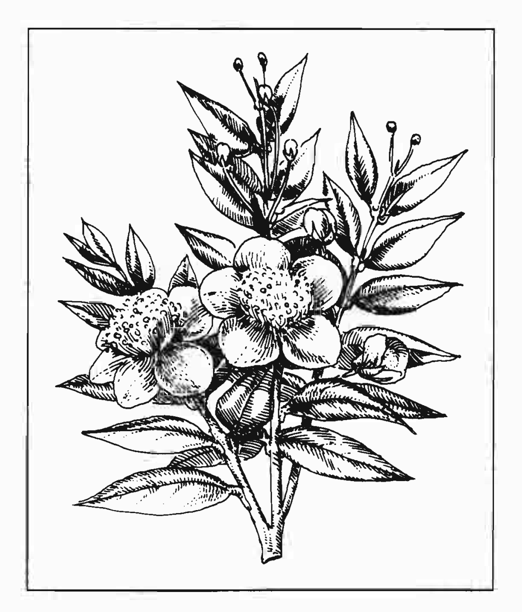
mustard, a common plant used for oil, as a condiment, and as a pot-herb. While it is hyperbole that mustard is "the smallest of seeds . . . the greatest of shrubs" (Matt. 13:31; Mark 4:31; Luke 13:19), in both the parable of the mustard seed and in the statement about faith (Matt. 17:20; Luke 17:6) the mustard seed's significance lies in its size relative to the mature plant or to a mountain. The Kingdom of God has small beginnings, but it blossoms manyfold. For faith however small, nothing is impossible.

Muth-labben (my*oo*th-lab´ubn), a word in the heading of Psalm 9 that may have served as some sort of notation for its musical performance. ***See also*** Psalms, The.

Myra (m*i*´ruh), a principal city of Lycia in southwestern Asia Minor, where Paul's company changed ships on the way to Rome (Acts 27:5–6), probably at its port of Andriaca. The apocryphal *Acts of Paul and Thecla* recounts that Paul preached in Myra. A later bishop of Myra, St. Nicholas, was the origin of the Santa Claus legend and remains today the patron saint of Greek sailors. The site, occupied by modern Dembre, has ruins of a theater, tombs, and inscriptions, all from Roman times, attesting to Myra's importance for commercial navigation in antiquity. ***See also*** Lycia; Paul.



myrrh (muhr; from Heb. *mor* and Gk. *murra, samodendron,* or *smurna),* an aromatic gum that grows in Arabia, Abyssinia, and India. Highly prized from earliest times (Gen. 37:25), it was used in incense (Exod. 30:23) and as a perfume for garments (Ps. 45:9) or for a lover's couch (Prov. 7:17). It was part of the cosmetic treatment used to purify young girls for the king's bed (Esther 2:13), and it was also used in embalming (Mark 15:23; John 19:39). Myrrh appears among the items of luxury trade flowing into Babylon (Rome) as it meets its doom (Rev. 18:13). Along with gold and frankincense it exemplifies the rich gifts brought to the infant Christ by the Magi from the East (Matt. 2:11).

P.P.

myrtle (*Myrtus communis*), a large ornamental evergreen shrub that grows in dense copses along rivers and streams. Its greens were used to adorn the booths at the Feast of Tabernacles (Neh. 8:15). The fragrant leaves were also used in perfume manufacture. The myrtle is a symbol of peace, joy, generosity, and justice. The name "Hadassah" is derived from the Hebrew word for myrtle, *hadas* (Esther 2:7).

Mysia (mis´ee-uh), the region of northwestern Asia Minor along the Hellespont and the Aegean Sea. Paul passed through two towns in the area, Troas (Acts 16:8, 11) and Assos (Acts 20:13). Pergamum was also in this region (Rev. 1:11; 2:12).

mystery, that which is secret, hidden, or beyond normal human understanding, although it may be revealed or disclosed to certain people. **In the OT and Judaism:** God, "the Lord," had secret knowledge he revealed when he chose (Isa. 48:3, 6; Amos 3:7). God's knowledge was a "mystery" because some of it was not known,

Myrtle.

and even when known, was not always understood. God delivered it in person (Gen. 17:1), or through an angel (from heaven, Gen. 22:11; on earth, Num. 22:23), through dreams (Gen. 20:3), or through "the Spirit of the Lord" (2 Sam. 23:2). To the OT prophets, revelation occurred when "the word of the Lord" came to them (Jon. 1:1) and/or they had visions (Ezek. 1:1; Dan. 2:19); even with visions, the Spirit could be the source (Ezek. 2:2). In Daniel and some of the books of the Pseudepigrapha, divine mysteries are sealed in books in heaven, but God will make known the contents at the end of this age.

The Israelites believed that divine knowledge was needed to solve human problems; it provided laws for relations with God and among humans, rules for priestly ritual, and explanations of sin, injustice, and foreign domination. Early prophets explained evil as God's punishment of Israel for its sins. In the eschatology (beliefs about the end of this age) in Daniel and later books, the secret, divine plan is that a new age will come, at which time the wicked will be punished, righteous Jews rewarded, and God will rule permanently over a perfect earth. Even misfortunes fit God's purposes, for they purify the sufferers and ensure their inclusion among the happy righteous. The wicked are blinded to these mysteries of God (Wisd. of Sol. 2:21–22). The Essenes at Qumran believed that God was still revealing his mysterious knowledge to them. Numerous Jewish writers retold history to make it fit God's plan.

Several aspects point to a literary development of the traditions about God's "mystery." "The word of the Lord" contains divergent views (e.g., the content and interpretation of the Law and the proper attitude toward Gentiles); often the visions follow a standard literary pattern and contain literary sources. Some Jewish (and Christian) "revelations" consist of reinterpretation of OT prophecy.

In Christianity: In the NT, the use of the Greek word for "mystery" or "secret" (*mysterion*) is founded on Jewish eschatology. To the Jewish concept of God's secret plan are added the Christian beliefs that the time is fulfilled and that the Messiah or Christ is Jesus. Evidence of the Jewish connection is the idea that God kept his mystery hidden for ages but revealed it to the ancient prophets and the Christian apostles (Rom. 16:25–26; 1 Cor. 2:7; 4:1; Eph. 3:9; Heb. 1:1–2; 1 Pet. 1:10–12; Rev. 10:7). Often the mystery was the heart of the Christian gospel under various names: "mystery of God" (Col. 2:2; Rev. 10:7); "mystery of his will" (Eph. 1:9); "mystery of Christ" (Eph. 3:4; Col. 4:3); "mystery of the gospel" (Eph. 6:19); "mystery of the faith" (1 Tim. 3:9); "mystery of our religion" (1 Tim. 3:16); "word of God" (Col. 1:25–26; cf. 1 Cor. 2:7 [literal translation]: "we speak the hidden wisdom of God in a mystery").

Some Christian problems were explained as mysteries, e.g., the question of whether Jesus was the Christ. Mark 4:11–12, which is placed between the parable of the sower and its interpretation, tries to explain why so few people understand "the secret [literally, mystery] of the Kingdom of God"; the reason given is that Jesus preached to them in parables (here understood as "mysteries") to prevent them from understanding! Actually, parables were used to clarify, not obscure, teaching (Matt. 13:51; cf. Mark 4:33). Elsewhere, NT authors give the cause of Jewish disbelief as God's hardening their hearts, claiming this as a fulfillment of Isa. 6:9–10 (see Matt. 13:14–15; John 12:40). Paul explained the nonbelief of Jews as "a mystery": God has hardened part of Israel "until the full number of the Gentiles come in [believe]" (Rom. 11:25–26).

Other Christian problems, too, were treated as mysteries: the nature of the general resurrection (1 Cor. 15:51–55); the time of Jesus' return

The birth of Mithra, god of light and obedience, whose cult was a major rival in popularity to early Christianity.

and the disbelief of many (2 Thess. 2:1–12); the question of whether salvation is also intended for Gentiles (Eph. 3:4–6; Col. 1:25–27). The meaning of a passage in the OT can be a mystery, as is Gen. 2:24 in Eph. 5:31–32. Speaking in tongues is uttering "mysteries in the Spirit" (1 Cor. 14:2). The revelation of mysteries (except in the synoptic Gospels) is ascribed to the Spirit, not to Jesus' teaching (1 Cor. 2:7–10; Eph. 3:4–5).

In Mystery Religions: "Mystery" had a very different sense in pagan mystery religions, which were prevalent around the Mediterranean in the late Hellenistic age (ca. 100 B.C.–A.D. 300). They were called "the mysteries" because of their secret initiation rites, which united new members with the deity so that they would live forever. The Eleusinian and Samothracian mysteries were Greek in origin. Orphism and the cult of Dionysus probably came to Greece from Thrace. The cults of Isis, Mithra, Cybele/Attis, Adonis, and the Syrian goddess originated in the Near East; they became mystery religions after contact with the Greek mysteries.

Similarities between Christianity and the mysteries have raised the question of how much the latter influenced the former. Some argue that they had no influence, while others claim that Christianity was another mystery religion. Gentiles from the mysteries may have joined Christianity in large numbers, for it offered personal, eternal salvation, and added the threat of an imminent judgment day. Such new members would have tended to bring in features from their former religions.

Some similarities, however, have entirely independent origins. Adonis and Osiris were said to have died and returned to life, but such beliefs were not the cause of the faith in Jesus' resurrection. The belief in Jesus' ascension did not arise from the tradition that Mithra ascended into the heavens in a chariot with the god Sun. Although some mysteries practiced a type of baptism, Christian baptism originated in the Jewish-Christian environment.

In post-NT times, however, some entirely new features were contributed to Christianity by the mysteries. In art, Mary was on occasion portrayed like the nursing Isis, and pictures of Jesus as the Good Shepherd often showed stylistic elements that also appear in representations of Attis and Hermes. Jesus is also on occasion portrayed as the god Sun. Some historians even speculate that Jesus, trained in the synagogue, would not have commanded drinking blood and eating human flesh, even symbolically, and that the Lord's Supper ritual must therefore have been introduced by gentile converts. Justin Martyr (ca. A.D. 150) remarked on its similarities to rituals in Mithraism. A later, Christianized Gnosticism also used and reinterpreted some aspects of the mystery cults. ***See also*** Angel; Apocalyptic Literature; Dreams; Eschatology; Essenes; Gnosticism; Prophet; Pseudepigrapha; Resurrection; Revelation; Tongues, Speaking with; Vision.

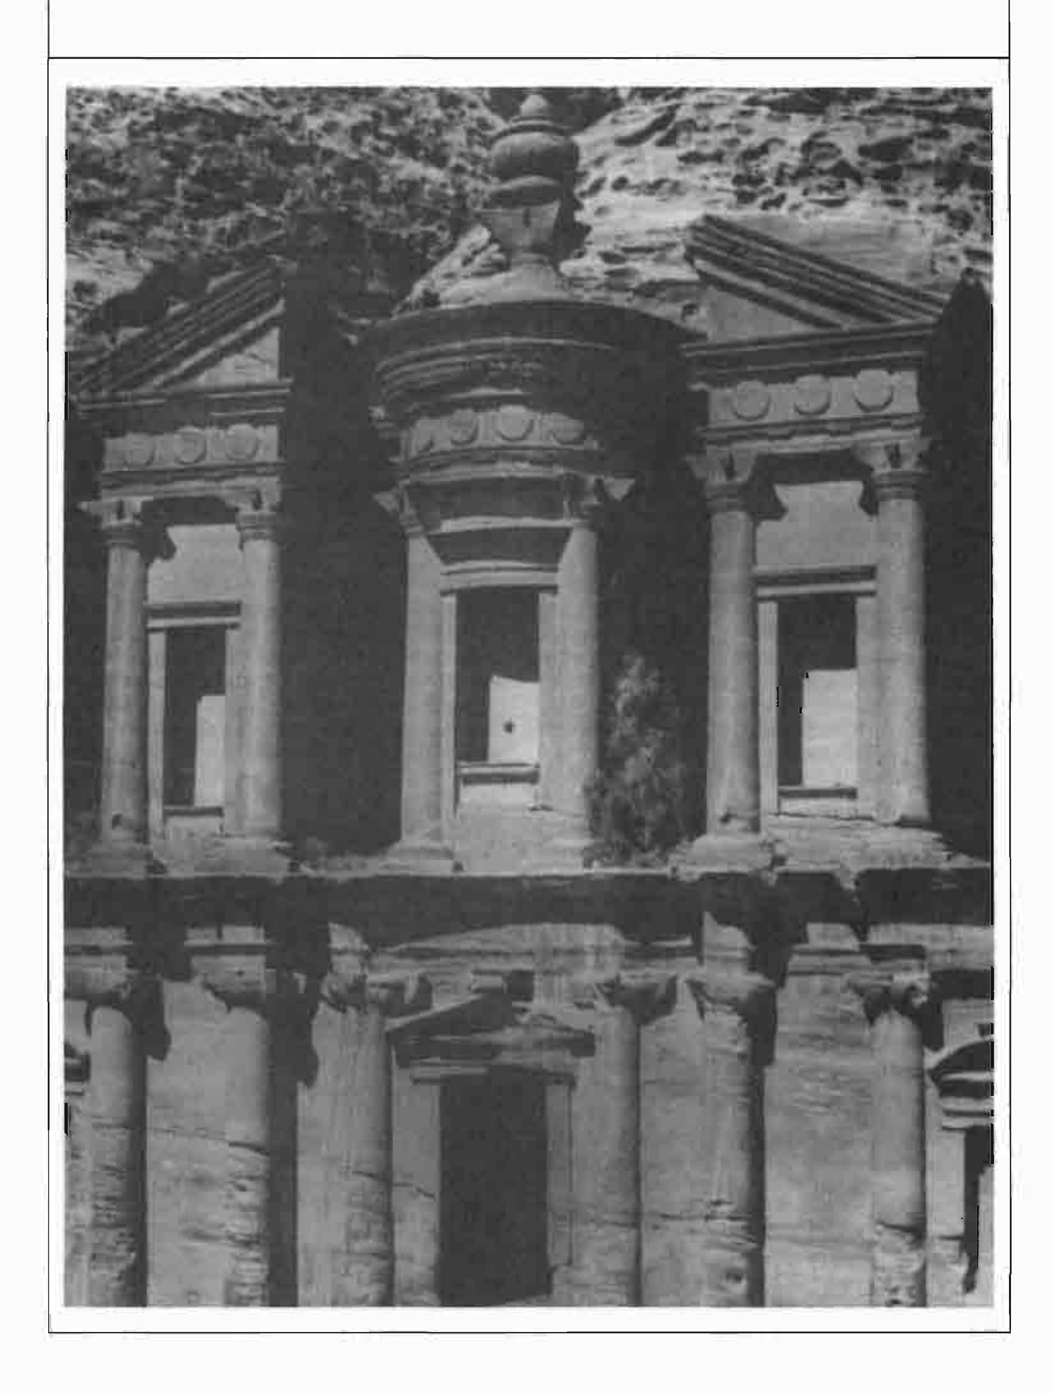
H.M.T.



mystic, one who has a direct experience of the divine presence, an intimate and transforming communion or union with God. OT prophets, especially Ezekiel, seem rooted in this experience, which is also suggested by several psalms (e.g., Ps. 73:23–26). Traces of mysticism are sometimes identified in the Pauline Letters (2 Cor. 12:2–4; Gal. 2:20), especially where Paul speaks of union with Christ.

myth (Gk. *mythos*), a word that occurs in the NT, where it refers to false and foolish stories that are to be rejected as misleading and dangerous: 1 Tim. 1:4 ("myths and endless genealogies that promote speculations rather than the divine training that is known by faith"); 4:7 ("old women's profane myths"); 2 Tim. 4:4 (opposite of "the truth"); Titus 1:14 ("Jewish myths and commandments of those who reject the truth"); and 2 Pet. 1:16 ("cleverly devised myths"). Scholars often use "myth" in a more general sense to refer to stories about supernatural

beings or events, etiological stories about origins, stories that embody a group's ideals or sentiments, and the like. In the twentieth century, some, such as Rudolf Bultmann, have used "myth" to refer to thought and language that depict otherworldly realities in objective terms as though they were this-worldly phenomena and thus, at least in principle, subject to the same empirical methods of knowledge as any other objects. ***See also*** Demythologizing. W.W.

Opposite: An example of Nabatean architecture, carved into a sandstone mountain at Petra. Originally used as a temple to Dushara, the structure was reused by early Christians as a chapel.

N

Naamah (nay´uh-muh). **1** A daughter of Lamech and his wife Zillah, and the sister of Tubal-Cain (Gen. 4:22). **2** One of the cities that was included in Judah's "inheritance," i.e., its portion of the promised land (1 Kings 14:21, 31). **3** An Ammonite wife of Solomon and the mother of Rehoboam, who succeeded Solomon to the throne of Judah (1 Kings 14:21, 31; 2 Chron. 12:13).

Naaman (nay´uh-muhn). **1** A son (Gen. 46:21) or grandson (Num. 26:40) of Benjamin; the ancestor of the Naamites. **2** A leper cured by the prophet Elisha (2 Kings 5). Naaman was the commander of the army of the king of Syria or Aram (Damascus) in the time of Elisha. Having learned of the reputation of the Samarian holy man from a captured Israelite girl who waited on his wife, Naaman resolved to go to Israel to seek a cure for his leprosy. He obtained permission from his king, who gave him a letter for the king of Israel asking that Naaman be healed. The letter, however, alarmed the Israelite king. Knowing that he lacked the power to heal Naaman, he suspected that the Aramaean king was trying to provoke a quarrel. Eventually, however, Elisha heard of the king's concern and summoned Naaman to his house. When he arrived, he sent instructions that he should dip himself in the Jordan seven times. At first Naaman, who had expected the prophet to heal him in person, was angry and disappointed, retorting that Damascus had its own rivers, the Abana and Pharpar, that were better than any in Israel. Finally, however, his servants persuaded him to follow Elisha's instructions. He washed in the Jordan and was healed, whereupon he returned to Elisha and vowed to sacrifice to no god but Yahweh from that time on, requesting a load of the local soil so that he could worship the Israelite god in Damascus. Although Elisha explicitly refused any reward from Naaman, his servant Gehazi pursued the departing Aramaean and deceitfully procured a gift in his master's name. Elisha, however, was aware of his servant's deceit and proclaimed that Naaman's leprosy would be transferred to Gehazi and his descendants forever.

The healing of Naaman's leprosy is mentioned in Luke 4:27 in the context of a controversy between Jesus and the people of Nazareth. Jesus, who is regarded with suspicion because he has done great things in Capernaum but not in his home town, cites "Naaman the Syrian" as an example of a foreigner who received divine help even when lepers in Israel did not. P.K.M.

Naamathite (nay´uh-muh-th*i*t), the tribal or geographic identity of Job's "friend" Zophar (Job 2:11; 11:1; 20:1; 42:9). As a man of or from Naamah, his origins most likely were in central Arabia (Naamah in the Nejd mountain region) or southern Arabia (the location of a Sabean clan named *n'mt*).

Naarah (nay´uh-ruh). **1** A city on the border of Ephraim near Jericho (Josh. 16:7); it is probably the same as Naaran (1 Chron. 7:28). It is tentatively identified as modern Tel el-Jisr, about three and a half miles northwest of Jericho. **2** One of the wives of Ashhur, a descendant of Judah (1 Chron. 4:5–6).

Nabal (nay´buhl; Heb., "fool"), a Calebite who acquired much wealth from raising sheep and goats in Carmel and who was married to a beautiful woman named Abigail. Shortly after the death of Samuel when David and his men were encamped in the Wilderness of Paran, David sent messengers to Nabal requesting food for his soldiers. Even though David's men had done no harm to Nabal's sheepshearers, Nabal (true to the meaning of his name) responded to the request with insults. As David gathered his men to avenge this impropriety, Abigail went out to meet David with provisions and with a plea for mercy. When Abigail reported David's favorable response to her husband the morning after a drunken feast, Nabal became ill and died ten days later. His death not only prevented David from committing an evil act of revenge but also provided him with Abigail to be his wife and the mother of his son Chileab (1 Sam. 25:1–42; 2 Sam. 3:3). ***See also*** Abigail. F.R.M.

Nabatea, Nabateans (nab´uh-tee´uh, nab´uh-tee´uhnz), a region and a people east and southwest of the Dead Sea that played a significant role in the politics and economics of the intertestamental and NT periods of Palestine and Transjordan. Attempts to identify the Nabateans with Nebaioth, the eldest son of Ishmael (Gen. 25:13; 28:9; 36:3; 1 Chron. 1:29; Isa. 60:7) or

Finely decorated Nabatean "eggshell" pottery found at Moa in the Aravah Valley in modern Israel, first century A.D.

with the Nabaiateans of Ashurbanipal's records are at best inconclusive.

Origin and Language: Apparently originating in the northwestern Arabian Desert, the Nabateans seem to have moved into Edom about the sixth century B.C., as the Edomites themselves (later to become known as Idumeans) were migrating into Judah and the Negev. By the fourth century B.C., the Nabateans had occupied the southern part of Transjordan, the Wadi Arabah, and the southern Negev, nominally subject to Persian rule, but asserting their independence after the defeat of Persia by Alexander the Great and warding off a Greek attempt at conquest in 312 B.C.

Although apparently Arabic by blood, the Nabateans soon came to speak a dialect of Aramaic, the *lingua franca* of the Persian Empire, and developed their own elongated cursive version of the Aramaic uncial (i.e., capital letter) block script. The cursive version is known primarily from funerary and votive inscriptions. Apparently nomadic tribespeople originally, they developed a sedentary lifestyle as they settled into the region that came to be called Nabatea. They built new cities in the desert, including Petra, Acdat, Shivta, and Mamshit, and developed older Edomite and Moabite towns as fortresses to protect their far-flung caravan routes, the principal source of their wealth. To support the population of these desert cities, highly sophisticated water-gathering systems were invented, which allowed the agricultural exploitation of the Negev, in particular, on a scale unmatched until modern times. Only the Islamic invasion of the seventh century A.D. brought an end to this desert heritage of the Nabateans.

Religion and Art: Nabatean religion was dominated by a supreme god, Dushara (perhaps meaning "He of Seir"), later identified with the Hellenistic Dionysus or Zeus, and by el-Uzza, later identified with the mother goddess Atargatis, symbolized by a dolphin. The most significant Nabatean temples have been found at Petra, Khirbet el-Tannur, and in the Wadi Ram in Jordan.

Artistically, the Nabateans excelled in the production of exquisitely painted "eggshell" pottery, the most beautiful of their time in the Levant. Their monumental architecture, a melange of Greek and Roman classical styles more remarkable for its scale and feats of carving in the living rock of Petra than for genuinely original creativity, is nonetheless profoundly impressive in the middle of the Edomite desert.

Political History: Little is known of Nabatean political history from the end of the fourth century B.C. until the reign of the first known king, Aretas I (ca. 169 B.C.). One of the pretenders to the high-priesthood of Jerusalem, Jason, fled after a revolt by the Jews against the Seleucid (Syrian) king Antiochus IV eastward across the Jordan, where he was imprisoned by "Aretas the ruler of the Arabs" (2 Macc. 5:8). Aretas I is also mentioned in an inscription found at Elousa in the Negev along the Petra-Gaza road. The Nabateans also appear in 1 Macc. 5:25 and 9:35 as friendly to Judas Maccabeus and his brother Jonathan.

The names, numbers, and times of reign of the following kings are disputed by scholars, but a possible reconstruction of the series is as follows: civil war among the Seleucids following the death of Antiochus VII (129 B.C.) appears to have allowed the expansion of Nabatean control. A Nabatean Malichus I is known only from coins, but an Erotimus (ca. 110–100 B.C.) seems to have warred against both Egypt and Syria. In 96 B.C., Aretas II appears as an ally of Gaza against Alexander Jannaeus of Judea. Obodas I, son of Aretas, and then Rabel I continued hostilities against the Hasmonean and wrested control of parts of Moab and Gilead from him. Aretas III (87?–62 B.C.), by defeating and killing the Seleucid Antiochus XII in battle, gained a considerable reputation throughout the area and was invited to become ruler of Coelesyria, the first Nabatean to rule over Damascus, where he added to his name the title "Philhellene." In the civil conflict that followed the death of Queen Alexandra in Judah in 68 B.C., Aretas III, at the urging of the Idumean Antipater, entered the fray on behalf of her elder son, Hyrcanus II. Pompey's envoy Scaurus, however, negotiated a solution that sent Aretas back to Nabatea and gave Syria to Rome and Jerusalem to Aristobulus II, Alexandra's younger son, for the moment. In 62 B.C., Scaurus invaded Nabatea, but through Antipater's negotiations, retreated after Aretas's payment of three hundred talents in tribute.

Malichus II (47–30 B.C.; or Malichus I, 62–30, by another reckoning) was involved by Antipater on the side of Julius Caesar against Pompey's supporters in 47 B.C. in Egypt. Antipater married a Nabatean woman, Kufra or Kypros, who bore him Phasael, Joseph, Pheroras, Herod (the Great), and Salome.

When Herod took over Judea in 40 B.C., he appealed to Malichus for help against the invading Parthians but was turned down. The Romans did help him and also forced Malichus to pay a tribute to Herod for favoring the Parthians. Cleopatra VII of Egypt, ever conniving, managed to set Herod and Malichus against each other, but in such a way as to weaken both so that their mutual hostility continued until Malichus' death.

Obodas II (or III; 30–9 B.C.) was almost completely overshadowed by his brother Syllaeus, a plotter of the first rank. After Herod turned down Syllaeus's request for the hand of Herod's sister Salome, Syllaeus was sent by Obodas as guide for a disastrous Roman expedition under Aelius Gallus into Arabia and Ethiopia in 25–24 B.C. Later, in 9 B.C., Syllaeus afforded protection for bandits from Trachonitis who raided Herod's kingdom, and refused to repay a loan of

fifty talents he owed Herod. When Syllaeus departed for Rome, Herod attacked the robbers' stronghold, winning Caesar's disfavor. When Obodas died, Syllaeus tried in Rome to overturn the succession of Aretas IV in his own favor and simultaneously plotted the assassination of Herod. Herod discovered the plot, sent Nicolaus of Damascus to Rome to plead his case, and Syllaeus finished by losing his head.

Aretas IV (9 B.C.–A.D. 40) gave his daughter in marriage to Herod's son Antipas in a mutual effort to heal Jewish-Nabatean relations. It was under the reign of this Aretas that Nabatean commerce and influence attained its peak, with Aretas himself even visiting Rome. About A.D. 28, Antipas divorced his Nabatean wife to marry Herodias, eventually occasioning the execution of John the Baptist according to Matt. 14:1–12 and Mark 6:17–29. Aretas attacked Antipas's forces, defeating them in a skirmish, but bringing on the threat of Roman intervention in A.D. 37. It was also under this Aretas that Paul's life was endangered in Damascus ca. A.D. 34–35 (2 Cor. 11:32–33; cf. Acts 9:23–25).

Another Malichus (III?; A.D. 40–70) aided Titus against the Jews with a thousand cavalry and five thousand archers. Rabel II (A.D. 70–106) brought a period of peace, but Nabatea was incorporated into the Roman province of Arabia by the Roman governor of Syria, Palma, under the emperor Trajan in A.D. 106, ending Nabatean independence.

Nabatean culture continued to exist, however, contributing significantly to Roman and later Byzantine civilization in the area, particularly in desert agriculture, even after caravan routes had shifted away from the area. Petra itself suffered a series of disastrous earthquakes in A.D. 110, 303, 363, 555, and 750, and was gradually forgotten by the civilized world (except for a short-lived Crusader fortress) until its rediscovery in the nineteenth century. Excavations at Petra have been carried out sporadically since 1965 by British and American expeditions. ***See also*** Antipater; Arabia; Aretas IV; Herod; Maccabees; Petra; Seleucids, The.

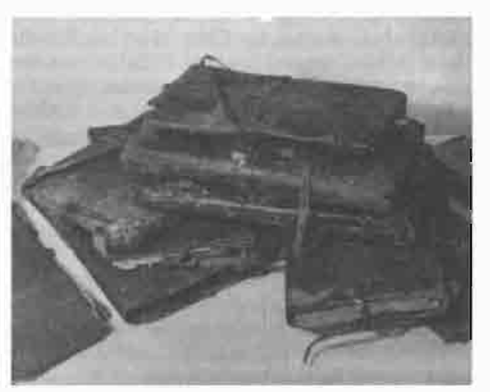
Nablus (nab'luhs). ***See*** Neapolis.

Nabonidus (nab'uh-n*i*'duhs), the last of the Chaldean monarchs and last native king to rule Mesopotamia in antiquity. He held the throne from 556 to 539 B.C. until displaced by the Achaemenid Cyrus II. Though the cuneiform documentation for Nabonidus is rich, the reconstruction of his personality and rule still lacks many details. He seems to have been at once a military leader of no small merit, a "learned antiquary" interested in the past of his country, and a religiously dedicated person (though not a fanatic). Nabonidus was born in Harran, in northern Mesopotamia. His name, Nabu-na'id, which in Babylonian means "the god Nabû is extolled," is remarkable when one observes that he was a passionate devotee of the moon god, Sin, whose sanctuary, Ehulhul in Harran, was restored by himself and his mother, Adad-guppi'. A strange fact of his life is his ten-year sojourn in the desert town of Teima, in the Arabian peninsula, while his son, Belshazzar, ruled in his stead in Babylon. Nabonidus is not mentioned in the Bible, but Daniel 4, which speaks of the madness of Nebuchadnezzar, is possibly a reflex of a Babylonian propaganda piece against Nabonidus by the priests of Marduk in the city of Babylon objecting to the elevation of Sin of Harran at the expense of their deity. Aramaic scroll fragments from Qumran record a tale of a Jewish advisor to Nabondius who encouraged him to worship the one Deity rather than the gods fashioned from metal and wood. ***See also*** Daniel; Daniel, The Book of; Nabopolassar. D.B.W.

Nabopolassar (nab'uh-puh-las'uhr), the Babylonian founder of the Chaldean dynasty (626–539 B.C.). Most of the twenty-one years of his rule (626–605 B.C.) are attested in the *Chronicles of Chaldaean Kings* by D. J. Wiseman (London: British Museum, 1956). Nabopolassar (Babylonian *Nabû-apli-uṣur,* "O Nabû, preserve the heir!") does not mention his father's name, which indicates he was not originally of royal blood. The early years of his reign saw him battling the Assyrian occupiers of Babylonia. Later, in league with the Medes and possibly the Scythians, his efforts culminated in the fall of Nineveh in 612 B.C. Though Nabopolassar's name is not mentioned in the Bible, this defeat of the Assyrians is celebrated in the book of Nahum. Nabopolassar's son, Nebuchadnezzar II, defeated the Egyptians at Carchemish shortly before the death of his father (see Jer. 46:2; 2 Chron. 35:20). ***See also*** Nebuchadnezzar. D.B.W.

Naboth (nay'both), the owner of a vineyard adjacent to a royal estate in Jezreel (1 Kings 21). Ahab the king wanted to buy the vineyard, but it was patrimonial property and Naboth refused to sell it. Seeing that Ahab was despondent, Jezebel, his wife, wrote to the elders of Naboth's village demanding that Naboth be charged with cursing "God and the king" (cf. Exod. 22:28) by two witnesses (cf. Deut. 17:6; 19:15). In accordance with the prescribed penalty for blasphemy (Lev. 24:16; cf. Deut. 17:2–7), therefore, Naboth was stoned to death by the villagers. Ahab hurried to Jezreel to confiscate Naboth's property, but there he encountered the prophet

Elijah, who pronounced God's judgment on him. Every male in Ahab's house would perish, and his dynasty would come to an end. As for Jezebel, she would be eaten by dogs in the territory of Jezreel.



The biblical narrative interprets the fall of Ahab's dynasty as divine punishment for the crimes committed against Naboth. Ahab himself responded to his condemnation with penitence and was spared (1 Kings 21:27–29), but his son Joram was slain by the usurper Jehu, who cast his body on the plot that had belonged to Naboth and proclaimed Elijah's oracle fulfilled (2 Kings 9:24–26). Shortly afterwards Jezebel also perished in the predicted manner (2 Kings 9:30–37). P.K.M.

Nadab (nay´dab), the firstborn son of Aaron and Elisheba and the brother of Abihu, Eleazar, and Ithamar (Exod. 6:23). As sons of the priest descended from Levi, the four were trained and ordained to be priests as well (Exod. 28:1).

Nadab and his brother Abihu seem to comprise a pair somewhat distinct from their brothers. On one occasion, these two eldest sons of Aaron were invited to accompany Moses and their father Aaron to the summit of Mount Sinai where, along with seventy elders representing the people, they saw God and ate and drank in God's presence (Exod. 24:1, 9–11). At another time, the two sealed their doom when they offered "unholy fire" to the Lord during the sojourn at the foot of Mount Sinai. For offering what the Lord did not command, the brothers were consumed by divine fire (Lev. 10:1–2), leaving Eleazar and Ithamar to serve as priests with their father (Num. 3:4). ***See also*** Aaron; Abihu. F.R.M.

Nag Hammadi (nahg´ huh-mah´dee), a town in Upper Egypt near ancient Chenoboskion. In 1945 peasants discovered nearby a collection of texts that have shed important light on the religious history of the first Christian centuries.

Bound papyrus codices found at Nag Hammadi in 1945.

The find consists of thirteen papyrus volumes or codices, which are bound like modern books. Two codices, XII and XIII, are only partially preserved; the remainder are complete, although the texts within them are often fragmentary.

Language and Date of the Texts: The forty-five works in the collection survive in Coptic, the form of late Egyptian written in Greek characters and used in early Christian Egypt. The dialect of most of the texts is Sahidic, although there are frequent deviations from its standard literary form. Two codices, I and X, as well as part of Codex XI, are written in another dialect, Subachmimic. The works of which these Coptic texts are translations were originally composed in Greek. Papyrus fragments in Greek of texts such as *The Gospel of Thomas* and *The Sophia of Jesus Christ* have been discovered at Oxyrhynchus in Egypt.

Dates on papyri used as backing for the leather covers of the codices indicate that the codices in their final form were transcribed in the fourth century. The original Greek texts were composed earlier, many in the second and third centuries and some possibly in the first.

Content: The library contains works of diverse genres, including sayings collections (*The Gospel of Thomas* and *The Sentences of Sextus*), homilies (*The Gospel of Truth*), letters (*The Epistle of Peter to Philip* and *The Treatise on the Resurrection*), acts (*The Acts of Peter and the Twelve Apostles*), expository treatises (*The Tripartite Tractate, Marsanes, Allogenes*, and *The Valentinian Exposition*), prayers (*The Prayer of the Apostle Paul, The Prayer of Thanksgiving*, and *The Three Steles of Seth*), apocalypses (*The Apocalypse of Paul, The Apocalypse of Adam, The Apocalypse of Peter*, and *The First and Second Apocalypses of James*), riddling revelatory proclamations (*The Thunder*), dialogues between Jesus and his disciples (*The Apocryphon of John, The Sophia of Jesus Christ, The Dialogue of the Savior*), and an exegetical work (*The Exegesis on the Soul*).

Diversity also characterizes the theology of the collection. Many works provide important primary evidence for Gnosticism. Some texts, such as *The Gospel of Truth, The Tripartite Tractate*, and *The Valentinian Exposition*, are clearly associated with the Christian Gnostic school named for the influential second-century teacher Valentinus. Many other works are more difficult to place in the history of Gnosticism. The speculative system of *The Apocryphon of John*, which is preserved in three copies at Nag Hammadi, resembles the system of the so-called Barbeloites described by Irenaeus (*Adversus Haereses* 1.29), but it is impossible to correlate the bulk of the texts with the numerous Gnostic sects listed by Irenaeus and the other church fathers. Some texts (e.g., *Eugnostos, The Apocalypse of Adam, The Thunder*) are clearly Gnostic, but not explicitly Christian. Others have only a superficial Christian veneer (e.g., *The*

Sophia of Jesus Christ, which is clearly a Christian reworking of the tractate *Eugnostos*). The hypothesis has been advanced that many of these works with little or no Christian content represent an early form of Gnosticism called by modern scholars "Sethian," after the prominence of Seth, the son of Adam, in some of the texts. Still other tractates are not directly related to Gnosticism. There are, for example, Hermetic works (*Asclepius* 21–29, *The Discourse on the Eighth and the Ninth*), pagan sayings collections (*The Sentences of Sextus*), and even a short selection from Plato's *Republic*. The library also includes some non-Gnostic Christian texts, such as *The Teachings of Silvanus* and possibly *The Authentic Teaching*.

Thus the collection does not represent any single Christian or non-Christian school or sect. Why the texts were assembled remains unclear. The library may have been collected for the purpose of combating heresies, although it is more likely that the tractates represent the somewhat pious reading of somewhat heterodox monks in Upper Egypt. A connection with the Pachomian monastery at Chenoboskion has been suggested but not definitely proven. It is perhaps significant that the texts generally display an ascetic ethos, with none of the "libertinism" attributed to some Gnostic groups by the church fathers. Such asceticism is particularly prominent in *The Book of Thomas the Contender*, which probably has affinities with Syrian Encratite circles. Such an ascetical orientation may indicate some connection with a monastic environment. It is unclear why the collection was hidden, although ecclesiastical pressures in the late fourth century to enforce doctrinal orthodoxy and a limited canon of scripture were probably at work.

Significance: The texts from Nag Hammadi have made important contributions to the study of early Christianity. Works such as *The Gospel of Thomas*, *The Dialogue of the Savior*, and *The Apocryphon of James* provide new data for the exploration of early traditions of the sayings of Jesus. Isolation of the "Sethian" texts has stimulated a reassessment of the categories in which the Gnostic movement is understood. Earlier Sethian texts (e.g., *The Hypostatis of the Archons*, *On the Origin of the World*) afford new information about the Jewish roots of Gnosticism and its connection with the origins of Hekhaloth and Merkavah mysticism. Later Sethian texts (*Allogenes*, *Marsanes*, *Zostrianos*) display significant affinities with third-century Neoplatonic circles interested in speculation about the spiritual world and means of spiritually "ascending" to it. Some of the texts have provided intriguing parallels to materials in the NT. *The Trimorphic Protennoia* displays a revelatory pattern revolving around the notion of the "word" of God that resembles the prologue to the Gospel of John. The tractate *Melchizedek* contains speculation on the mysterious priest from Genesis 14 who plays a role in Hebrews 7. Such evidence has revived debates about the relationship of Gnosticism to the NT. *The Gospel of Philip*, a loose collection of materials from disparate sources, has focused attention on sacramental practice and theology among Gnostics. The Valentinian texts provide new materials for understanding the history of this important school of Christian Gnostics in the second and third centuries. Some scholars have attributed one of the texts, *The Gospel of Truth*, to Valentinus himself, who was active in Rome in the mid-second century. While that attribution remains hypothetical, the work is a masterpiece of meditative homiletics from the second or early third century. Other Valentinian works (e.g., *The Tripartite Tractate*, from the third century) display both sensitivity to orthodox criticism of Gnostic theology and growing philosophical sophistication in elaborating Gnostic ideas about the nature of God and human destiny. The collection as a whole has not permitted a definitive resolution of the controversial issue of the relationship between Gnosticism and earliest Christianity, but the texts clearly demonstrate the existence of a non-Christian Gnosticism in the first two centuries of the Christian era.

The entire Nag Hammadi collection is available in facsimile form and in English translation. Critical editions with translations and commentaries are available for most of the tractates, but much detailed work remains to be done in analyzing the texts and integrating them into the history of early Christianity. ***See also*** Gnosticism; Thomas, Gospel of.

H.W.A.

Nahalal (nay'huh-lal), a town of Zebulun (Josh. 19:15) assigned to the Levites (Josh. 21:35), but shared by Canaanite inhabitants (Judg. 1:30; "Nahalol") whom Zebulun was unable to expel. The location is uncertain, but it may be modern Tell en-Nahl on the Kishon River near modern Haifa.

Nahaliel (nuh-hay'lee-uhl; Heb., "torrent valley of God"), a stopping point of the Israelites (Num. 21:19) during the wilderness wandering in the Transjordan, probably modern Wadi Zerqa Ma'in which discharges into the Dead Sea north of the Arnon River.

Nahash (nay'hash; Heb., "serpent"), a name occurring several times in the narratives deal-

ing with Saul and David. An Ammonite king named Nahash besieged Jabesh-gilead and thus provided the Benjaminite Saul an opportunity to solidify his kingship over Israel (1 Sam. 11). Perhaps this is the same Ammonite king who was kind to David (2 Sam. 10:2) and whose sons Hanun (2 Sam. 10:4) and Shobi (2 Sam. 17:27–29) had contact with David. The name is also given to a relative of David, though the relationship is not clear (see 2 Sam. 17:25).

Nahath (nay'hath; Heb., "descent"). **1** The son of Ruel and grandson of Esau; he was a chieftain of the Edomites (Gen. 36:13, 17). **2** A Levite of the clan of Kohath and grandson of Elkanah (1 Chron. 6:26). While some scholars take Elkanah here (v. 26) to be the same as the one listed in the genealogy of Samuel (v. 35) and then equate Nahath with the Toah mentioned there (v. 34; or Tohu, 1 Sam. 1:1), the verses where Nahath occurs (1 Chron. 6:22–27) are an abbreviated genealogy that is not at all clear. Such an identification of Nahath with Toah is thus questionable, although possible. **3** A Levite who shared the responsibility of collecting the Temple offering during the reign of Hezekiah (2 Chron. 31:13). ***See also*** Elkanah. D.R.B.

Nahor (nay'hor; KJV: "Nachor" in Josh. 24:2 and Luke 3:34). **1** A descendant of Shem, and the son of Serug and father of Terah (Gen. 11:22–25; 1 Chron. 1:26; Luke 3:34). **2** The son of Terah and the brother of Abraham (Gen. 11:26–27; Josh. 24:2) who married Milcah (Gen. 11:29). This Nahor, grandson of 1 above, was the parent of twelve sons (equivalent to tribes) by his wife Milcah and a concubine, Reumah (Gen. 22:20–24). Of these, the tribes born to Milcah were probably the subsequent Aramaean tribes living north and east of Palestine. The tribes born to Reumah were considered less closely tied to Israel, and probably lived north of Damascus. It may have been to this territory that Abraham subsequently sent his servant ("to the city of Nahor," Gen. 24:10) to obtain a wife for Isaac. In addition to the marriage of Isaac to Nahor's granddaughter Rebekah (Gen. 14:15, 24), the relationship of these tribes is further indicated by their worship of a common God (Gen. 31:53). **3** A city ("the city of Nahor," Gen. 24:10) mentioned frequently in the Mari texts that was located east of the upper reaches of the Balikh River, a northern tributary of the Euphrates. This would put the location in modern southern Turkey or northern Syria, probably south and east of Haran (Gen. 29:4–5). R.S.B.

Nahshon (nah'shon), the son of Amminadad and the leader of the tribe of Judah during the wilderness wandering (Exod. 6:23; Num. 1:7; 10:14). He is also an ancestor of David and stands in the lineage of Jesus through Joseph (Ruth 4:20; Matt. 1:4; Luke 3:32).

Nahum (nay'huhm; Heb., "consolation, compassion"), **the Book of,** the seventh book in "The Book of the Twelve," the so-called Minor Prophets of the OT. Nothing is known about the prophet, and even the place of his birth, Elkosh, has not been identified with any certainty. It is likely that Nahum was a central prophet functioning within the Temple cult in Jerusalem. The book belongs to the so-called oracles against the nations and as such was probably motivated by political aims. The book was written in the half century between 663 and 612 B.C. These dates are fixed by the reference in 3:8 to the fall of Thebes (663) and the fact that Nineveh was destroyed in 612. A date for the book close to the actual fall of Nineveh is frequently assumed, though an earlier date is certainly possible. If the revolt of Manasseh is not to be dismissed as a figment of the imagination of the author of Chronicles, the situation as it existed in Judah ca. 652–648 fits the occasion rather well. The basis for such a revolt on Manasseh's part would have been the conviction that Assyria's days were numbered. The book of Nahum presents precisely that message and may have been used to persuade the Judean king to take part in such a revolt—the assurance that Assyria's fall was certain, in fact that it was ordained of God the Divine Warrior. The book would then have taken on deeper meaning as part of the theological basis for the subsequent resurgence of Judean independence under Josiah, especially after the death of Ashurbanipal in ca. 630. The final destruction of Nineveh in 612 would have been the ultimate fulfillment of this prophecy and would thus explain its inclusion in the canon.

In its present canonical form, the book of Nahum is closely related to the books of Jonah and Habakkuk. The books of Nahum and Jonah are the only two books in the Hebrew Bible that end in a question, and both are closely connected structurally with what follows: Jonah with Micah and Nahum with Habakkuk. Moreover, both Nahum and Jonah have the city of Nineveh as their subject, with Nahum addressing the destruction of that city and Jonah its salvation. The book of Nahum is best read as a complement to the book of Jonah. The books of Jonah and Nahum may be read as midrashic reflection on the so-called attribute formula in Exod. 34:6–7, with Jonah focusing on God's compassion and Nahum on God's wrath. Jonah presents God as "compassionate, gracious, . . . abounding in steadfast love" (Exod. 34:6–7a), whereas Nahum presents God as the "one who punishes sons and grandsons to the third and fourth generation for the iniquity of their fathers" (Exod 34:7b). Original terms of compassion are transformed in Nahum into terms of war: "who maintains kindness (Heb. *noser*)" becomes "who rages (*noter*) against his enemies" (cf. Lev. 19:18); "great in kindness (*rab khesed*)"

becomes "mighty in power (*gadol koah*)"; and "slow to anger (*'erek 'appaim*)," which appears in both contexts, appears to take on the meaning of "long of anger" in Nahum. In short, the book of Nahum is itself a reinterpretation of a central text from the Torah in a moment of need so far as Israel's national security is concerned. Though Yahweh is merciful and slow to anger, this time his patience toward those who flaunt him has run out. In short, Nahum focuses on the "dark side" of God, while Jonah portrays God's mercy and compassion toward the same wicked city of Nineveh. Both aspects are essential for an understanding of the divine nature.

OUTLINE OF CONTENTS

The Books of Nahum and Habakkuk

I. A Hymn of theophany (Nah. 1)
II. B Taunt song against Nineveh (Nah. 2–3)
III. C The problem of theodicy (Hab. 1)
IV. B´ Taunt song against the "wicked one" (Hab. 2)
V. A´ Hymn of theophany (Hab. 3)

Nahum and Habakkuk are so closely connected in context that the two may be outlined as a single literary unit: The opening hymn of theophany (Nah. 1:2–8) is in the form of a cipher adapted from an original acrostic on the first half of the Hebrew alphabet (cf. Ps. 9), which presents the two sides of God's character: he is slow to anger but he will vent his wrath against those who defy him. The appearance of the Divine Warrior is presented in mythic imagery with the cosmos returning to chaos in the day of God's wrath. The cipher in 1:2–8, which continues in 1:9–10, together with 2:10, the structural center of the book, summarizes the content of the book as a whole (the first line begins with the first letter of the Hebrew alphabet, the second line with the second letter, and so on):

I am the exalted Yahweh, and (I am) in the presence of sin;
in a flood (I am) about to bring a full end—completely.
What will you devise against Yahweh?
a full end he himself will make;
distress will not come a second time.
For (you will be) like dry entangled thorns;
and (though you are) like soddened drunkards,
consumed (you will be) like dry stubble—completely.
Desolation and dissipation and dilapidation,
and hearts faint and knees give way—
And anguish is in all loins and all their faces;
they are gathered as boughs for burning.

In the taunt song (Nah. 2–3), sometimes described as an ode on the fall of Nineveh, the language is graphic, depicting in vivid form scenes of horror and vengeful rejoicing because Assyria is finally experiencing the atrocities it inflicted on others.

In its poetic form the book of Nahum has no superior within the prophetic literature of the OT. The vivid and rapid succession of images gives it a peculiar power. It delineates the swift and unerring execution of God's fury against his merciless foes and those of his own people. At the same time, it also points rather sharply to God as the sure refuge and security for those who obey and trust him. Few interpreters have expressed the essential message of Nahum more clearly than Martin Luther when he wrote: "The book teaches us to trust God and to believe, especially when we despair of all human help, human powers, and counsel, that the Lord stands by those who are his, shields his own against all attacks of the enemy, be they ever so powerful" ("Lectures on the Minor Prophets," in *Luther's Works* [St. Louis: Concordia Publishing House, 1975], 18:282). ***See also*** Habakkuk, The Book of; Nineveh.

D.L.C.

nails. 1 The small horny plates covering the fingertips (Deut. 21:12; Dan. 4:33). **2** Devices for fastening construction materials together (1 Chron. 22:3). In construction history, early wooden pegs as fasteners were replaced by copper and bronze nails (ca. 3000 B.C.), but the introduction of iron technology (ca. 1200 B.C.) made much harder nails available and opened the possibility of multistoried buildings. Proverbial fastening strength was used metaphorically for wisdom (Eccles. 12:11), for permanence (Isa. 41:7), or for futile confidence (Jer. 10:4). Crucifixion was carried out sometimes using nails to fasten the condemned to the posts, graphic evidence of which was found north of Jerusalem in an ossuary containing foot bones fastened to wood with iron nails. While the synoptic Gospels do not mention nailing Jesus to the cross, such an understanding of Jesus' crucifixion underlies the request of "doubting Thomas" (John 20:25) when he was informed that Jesus had risen from the dead.

R.S.B.

Nain (nayn), a village identified with modern Nein six miles southeast of Nazareth at the foot of Givat ha-Moreh in the Valley of Jezreel (cf. Judg. 7:1). In later Jewish sources, the town was

called Naim (Heb., "pleasant"). Here Jesus resuscitated the widow's only son (Luke 7:11–17). Ruins of a medieval church remain in the village, and to the southeast are ancient rock-cut tombs.

Naioth (nay´yoth), a place in or near Ramah in the tribal area of Benjamin, a short distance north of Jerusalem, where David, fleeing Saul, took refuge with Samuel and the prophets associated with him (1 Sam. 19:18). Saul's messengers, sent to Naioth to take David, became imbued with the prophetic spirit, as did Saul himself when he followed (1 Sam. 19:20–24).

names, nouns by which entities are identified. The Bible is the main source for the proper names of ancient Israel. Biblical narratives preserve a wide variety of personal and geographical names (PNs and GNs, respectively). These are augmented by geographical and genealogical lists in early and late sources which, when handled critically, can provide much accurate information.

Another valuable source of Israelite proper names is the corpus of ancient Israelite inscriptions, preserving hundreds of names, some not attested in the Bible. Most important for the OT period are the ostraca and stamp seals. An increasing number of names from the intertestamental and NT periods are being discovered in Aramaic, Hebrew, and Greek inscriptions on seals, tombs, ossuaries, ostraca, and papyrus documents. These augment the names attested in the NT and contemporary Jewish writings. Israelite PNs and GNs are also sporadically attested in non-Israelite ancient Near Eastern inscriptions.

Productive comparative study is possible due to the large quantity of proper names available in ancient Semitic languages related to Hebrew, such as Eblaite, Amorite, Ugaritic, Phoenician, Ammonite, Moabite, Edomite, Aramaic, and later Arabian dialects. Akkadian (Semitic) and Egyptian names, although preserved in great numbers, are less similar in style and form, but along with names in Hurrian, Hittite, Persian, and later Greek and Latin sources, they have proven beneficial in understanding difficult and foreign names in the Bible.

Personal Names: The majority of Israelite names, and ancient Semitic names in general, had a readily understandable meaning. That parents consciously chose a child's name is implied by the content of these names, many of which are translatable sentences.

Compound names, usually consisting of two elements, are attested in a variety of grammatical constructions, especially statements, which occur in nominal, adjectival, and verbal forms. Interrogative and imperative constructions are infrequent. Most compound PNs are theophoric, containing a divine name (DN) or title. The most common DN in Israelite PNs was Yahweh (Jehovah is an anglicized, hybrid form of this), appearing as Jo-/Jeho- or -iah/-jah. The next most attested element was the generic *el,* meaning "god" (El was also the DN of the head of the Canaanite pantheon). Titles such as *adon* ("lord"), *baal* ("master," also a Canaanite DN), *melek* ("king"), *zur* ("rock") as well as kinship terms like *ab* ("father"), *ah* ("brother"), and *am* ("kinsman/[paternal] uncle") were sometimes used instead of a DN. Confusion can arise, however, regarding elements used both generically and as DNs, such as *baal, el,* and several others; or with kinship terms, which might be associated with a deceased relative rather than a deity.

Different types of compound PNs include: names expressing parents' recognition of divine assistance, such as Mattaniah ("gift of Yahweh"), Elnathan/Nathanael ("God has given [this child]"), and Shemaiah ("Yahweh has heard [the parents' prayer]"); names expressing parental desires for the child, such as Jeberechiah ("may Yahweh bless [this child]"), Ezekiel ("may God strengthen [this child]"), and Jehiel ("may God preserve [this child]"); names expressing parents' convictions, such as Elijah/Joel ("Yahweh is [my] God"), Uzziel ("God is my strength"), Adoniram ("my lord is exalted"), and Ahimelek ("my [divine] brother is king"); and names reflecting circumstances at the child's birth, such as Ben-oni ("son of my sorrow," Gen. 35:16–20), and Ichabod ("where is the glory?" 1 Sam. 4:19–22). Names like Menachem ("comforter") and Eliashub ("God restores") may suggest that a newborn was regarded as a substitute for a deceased family member.

The elements of a compound name could also be employed singly, making a shortened, or hypocoristic form, as in Mattan, Nathan, Uzzi, and so on. There were other types of simple or one-element PNs too. Some were originally animal or plant names like Caleb ("dog"), Deborah ("bee"), Jonah ("dove"), Tamar ("palm tree"), and Allon ("oak"). Others reflected circumstances at birth, such as Haggai ("[born on] a festival day") and Becorath ("firstborn"); physical characteristics, like Zuar ("little one") and Laban ("white [fair-skinned]"); or qualities hoped for, as in Amon ("reliable"). Evidence available from the NT and contemporary Jewish writings indicates that these types of simple and compound PNs continued in use, but with a trend toward hypocoristic forms of the latter. There was also a greater tendency toward adopting a foreign name or a name showing foreign influence.

Geographical Names: Although many of the features discussed in relation to PNs apply to GNs as well, GNs are in certain ways more difficult to treat. Some are very old and their meanings are obscure (true of a few PNs too). Also, many of the names of cities, rivers, and mountains preserved in the Bible, Semitic for the most part, were in existence before the Israelites entered Canaan and were merely adopted by them, as with Jerusalem, Megiddo, Mt. Hermon, and the Jordan River. Other GNs were changed

by the Israelites, as in the case of Laish becoming Dan (Judg. 18:29), while new sites received new GNs. Inferences from biblical GNs concerning Israelite religion are limited since Israelite GNs follow the basic typology of pre-Israelite Caananite GNs, making it impossible to discern whether many names were Israelite creations or merely adoptions. The NT similarly reflects the continuation of many GNs, the replacement of others, such as Herod's renaming of Samaria as Sebaste, and the formation of new ones. It is possible to trace many of these ancient GNs into Arabic forms today.

As with PNs, GNs of both simple and compound form existed. However "sentence" GNs are attested in the Bible infrequently, as are theophoric GNs. Examples of the latter include Beth-el ("house/temple of God/El"), Beth-dagon ("house/temple of Dagon"), and Baal Hazor ("lord/Baal of Hazor"; this latter type was usually short for a fuller form with "beth" in the first position). "Beth," with the meaning "house/place," also occurred in nontheophoric GNs, as in Beth-marcaboth ("house/place of chariots") and Bethlehem ("house/place of bread/food"). Other compound GNs contain an element referring to the environment, such as *beer* ("well"), as in Beer-sheba; *en* ("spring") as in En-gedi; *abel* ("meadow") as in Abel-meholah; and *emeq* ("valley") as in Beth-emeq.

Many simple GNs also referred to natural features, including Ramah and Ramoth ("height[s]"), Gibeah and Gibeon ("hill"), Horeb and Negeb ("dry"). Names based on structures include Mizpah ("watchtower"), Succoth ("booths"), Geder ("wall/enclosure"), and Gath ("wine press").

GNs were also named after people, as with Nobah (Num. 32:42) and Dan (Judg. 18:29), or in relation to an event, as with Bochim ("weepers," Judg. 2:4–5) and Ebenezer ("stone of help," 1 Sam. 7:12). Plant and animal names were employed as GNs too, such as Tamar ("palm tree"), Shimir ("thorn"), En-rimmon ("spring of the pomegranate"), Ephron ("gazelle"), Akrabbim ("scorpions"), and En-gedi ("spring of the goat").

Value of Names: The value of these ancient names for biblical studies is found in the variety of cultural clues they provide. For example, theophoric PNs indicate which deities were important to various societies in the polytheistic ancient Near East. The majority of Israelite theophoric PNs contained either a form of the DN Yahweh, or to a somewhat lesser extent, the generic term *el*. Names of Israelites in the Bible living between the Exodus and the Babylonian exile (thirteenth through early sixth centuries B.C., excluding those whose sole attestation occurs in Chronicles, Ezra, or Nehemiah) reveal that only a small percentage of the population of ancient Israel had PNs containing a foreign DN, even during times of proclaimed apostasy. PNs in Israelite epigraphic sources corroborate this point with similar evidence.

Theophoric PNs are also a valuable guide to qualities associated with a given deity. PNs containing the DN Yahweh depict him as: strong, glorious, noble, righteous, gracious; king, father, brother, light; someone who creates, gives, strengthens, remembers, knows, blesses, protects, saves, judges, restores, and so on.

Name studies help chart various cultural trends, such as: preferred grammatical forms of names in different periods; similar categories of GNs used by pre-Israelite Canaanites and Israelites; the small number of theophoric PNs attested for women in the Bible; more frequent use of kinship terms and certain divine titles in PNs through the time of the United Monarchy (ca. 1004–926 B.C.); fads in the popularity of some PNs; the increased foreign influence on names by the NT period; and the increased practice of papponymy, naming a child after its grandfather. Papponymy was part of a growing tendency evident from the Persian period (late sixth century B.C.) onward, to select PNs previously borne by relatives or well-known biblical characters, rather than ones that "meant" something.

The use of patronyms, common among ancient Semites, is amply attested in the Bible and in Israelite inscriptions. Well-known biblical examples include Joshua the son of Nun and Simon Bar-Jona ("son of Jonah"). Other forms of identification included GNs, as in Goliath of Gath and Jesus of Nazareth, and professions, as in Simon the tanner and Shimshai the scribe.

The Bible also illustrates the significance and power associated with certain names and with the act of naming. Obedient Israelites would be "called by the name of the Lord" (Deut. 28:10). God's messengers spoke in God's name (2 Sam. 12:7; Acts 4:18). Representatives of a human authority similarly spoke in his name (1 Sam. 25:5; Esther 3:12). Changing another's name displayed the power of the changer and the allegiance owed by the one whose name was changed. Names changed by God include Abram, changed to Abraham (Gen. 17:5); Sarai, to Sarah (Gen. 17:15); and Jacob, to Israel (Gen. 32:28). According to Mark 3:16 Jesus gave the name Peter (Gk., "rock-like") to Simon. PNs changed by a human authority include Eliakim, to Jehoiakim (2 Kings 23:34); Mattaniah, to Zedekiah (2 Kings 24:17); and Daniel, to Belteshazzar (Dan. 1:6, 7). D.M.P.

names of God in the New Testament. The names used by NT authors to refer to God reflect the fact that the NT was written in a Greek-speaking culture primarily on the basis of a tradition and terminology inherited from the OT and Judaism as mediated by the Septuagint (LXX). This tradition was significantly modified both by the early church's understanding of the teaching of Jesus and by its understanding of the person of Jesus as the definitive expression of God.

God: The most common designation for deity in the NT (1318 times) is the Greek word *theos* ("god"), often used by the LXX (more than 4000 times) primarily as the translation of the usual Hebrew word for God, *Elohim*. This word was also used by the LXX for the pagan gods, just as it was the standard word for the gods of the Greeks and Romans of NT times. Although the NT writers sometimes use "god" for the pagan gods (e.g., 1 Cor. 8:5) and on rare occasions apply it theologically to the glorified Christ (e.g., John 20:28), the vast majority of cases refer to the God revealed in the history of Israel and in the person of Jesus. Thus, "the God and Father of our Lord Jesus Christ" is a frequent designation (e.g., Rom. 15:6).

Lord: In the OT, the chief designation for God is the individual and personal name "Yahweh," translated *kyrios* (Gk., "Lord") in the LXX and "the LORD" by several English versions. This name was used by OT authors more than 6000 times, compared to about 2500 times for *Elohim*, "God." The NT continues to use "Lord" for God (about 100 times), primarily in quotations from the LXX (e.g., Mark 1:3; 12:11; Acts 2:34) and in set phrases such as "hand of the Lord" (Luke 1:66). But the vast majority of the 719 occurrences of *kyrios* ("Lord") in the NT refer to Jesus, usually as the exalted Christ (e.g., Acts 2:36; John 20:28). Thus, the two most common OT designations for deity, "God" and "Lord," are used in the NT not only for God but also ("God" only rarely) for Jesus as the exalted Lord of the church's faith. A much less common word for "Lord" in the LXX, *despotēs* ("lord," "sovereign," "master") is also used in the NT both for God (Luke 2:29; Acts 4:24; Rev. 6:10) and for Christ (Jude 4; 2 Pet. 2:1).

Father: The common ancient Near Eastern idea that the deity is the father of the clan or nation was appropriated sparingly by Israel, which understood it in an adoptive, not biological, sense (Exod. 4:22–23; Hos. 11:1–4). Although "Father" never became a common name for God in the OT, it was used more freely in the later OT period (e.g., Isa. 63:16) and especially in post-OT Judaism. "Father" was also a common name for God among the Greeks, being applied to Zeus, for example, not only because of his rulership among the gods but also because of his love and care (e.g., Plutarch *Moralia* 167d). This general designation of God as "Father" is found only rarely in the NT (e.g., James 1:17: "Father of lights"—the heavenly bodies). It was the person and teaching of Jesus that played the formative role in the NT's language of God as "Father." For Jesus, "Father" was the principal and most frequent designation for God. He used not only the common Jewish "our Father" (e.g., Matt. 5:45; 6:9) but also the intimate family word for God in his native Aramaic language, "Abba," which was also appropriated in the later liturgical practice of the church (Mark 14:36; Rom. 8:15; Gal. 4:6). Not only did the concept of God as Father express the personal relationship to God affirmed by Jesus and the church (e.g., Matt. 11:25–27); in that cultural setting, "father" included especially the connotation of obedience, agency, and inheritance. Those who address God as "Father" acknowledge God as the one to whom absolute obedience is due (Matt. 7:21; 26:42) and themselves as the agents who represent God and through whom God works (Matt. 11:25–27; John 10:32) and who are God's heirs (Rom. 8:16–17). The view that Jesus' use of "Abba" was absolutely unique, that it would have been scandalous to other Jews, and that it expressed his own Christological consciousness as the unique Son of God—a status that he then "conferred" on his disciples—is now often considered too extreme a statement. If Jesus' usage was not absolutely unique or able to carry all of the Christological weight formerly claimed by some scholars, it was distinctive enough to make a profound impression on the early church, which preserved his practice even in Greek (Mark 14:36; Gal. 4:6; Rom. 8:15).

The God of the Fathers: This significant OT title for God, as well as the more particular phrase of the same meaning, "the God of Abraham, Isaac, and Jacob," is found in the NT only in a single quotation (Matt. 22:32; Mark 12:26) and in the book of Acts. It emphasizes the continuity of the faith of Israel and that of the church, that the God of present experience is the same God who was known by the ancient patriarchs. Luke-Acts, which is especially interested in pointing out this continuity, thus uses the title four times (Acts 3:13; 5:30; 7:32; 22:14). In Paul and the literature dependent on him, this title is replaced by "the God and Father of our Lord Jesus Christ" (Rom. 15:6; 2 Cor. 11:31; Eph. 1:3, 17; Col. 1:3; 1 Pet. 1:3).

The Almighty: The LXX had translated two Hebrew expressions in the OT that probably originally meant "God, the one of the mountains" (NRSV: "God Almighty") and "Yahweh ['Lord'] of Hosts" with the more philosophical and formal *pantokrator* ("Almighty"), which the Greeks had also used for their gods. Jesus and the NT authors seem to avoid this appellation, which is found only in 2 Cor. 6:18 and nine times in Revelation, mostly in self-designations of God or in ascriptions of praise in a liturgical context.

Alpha and Omega: These are the first and last letters of the Greek alphabet and thus represent God as the Beginning and the End, the source and goal of all creation, and thus the *only* God. The phrase itself is not found in the OT, but the basic formula from which it is derived is found in Isa. 44:6 and 48:12. In the NT, only the author of Revelation uses this name for God (1:8; 21:6); he also applies it explicitly, however, to Jesus Christ (22:13; cf. 1:17; 2:8).

The Holy One: This OT title for God, especially in Isaiah, explicitly refers to God only once in the NT (Rev. 16:5). It is used of Jesus in Mark

1:24; Luke 4:34; and John 6:69. In 1 John 2:20, the reference may be either to God or to the exalted Christ.

General Terms: The common impersonal words for God in Greek, *ho theios* ("the deity") and *theotes* ("deity") are absent from those LXX books derived from the Hebrew canon of the OT, and *theotes* is found only once in the remainder of the LXX (Wisd. of Sol. 18:9). Correspondingly, "Deity" as a term for God is found in the NT only in Paul's address to the Athenians (Acts 17:29) and in Col. 2:9.

The line between explicit names for God and more general designations is sometimes difficult to draw. Among the more common general designations used in the OT that are adopted in significant ways by NT authors are "King" (e.g., Matt. 5:35; 1 Tim. 1:17; 6:15), "Judge" (e.g., John 8:50; Heb. 12:23), and "Savior" (e.g., Luke 1:47; 1 Tim. 1:1; 2:3; 4:10), all of which are applied more frequently to Jesus Christ than to God.

In the NT period, many Jews expressed their reverence for the explicit names for God by substituting periphrastic ways of speaking of God. This practice is reflected to some extent in the NT, especially in the sayings of Jesus, though Jesus did not hesitate also to make use of the explicit names for God. Among such periphrastic and reverential names for God are "the Blessed One" (Mark 14:61), "the Power" (Mark 14:62), "Heaven" (Luke 15:18 and often in the Matthean phrase "kingdom of heaven," which means "kingdom of God"), and "the Majestic Glory" (2 Pet. 1:17). In addition, God is sometimes referred to by using the passive voice (the "divine passive," e.g., Matt. 5:4, 6, 7, 9; Luke 6:38; 12:20, 48) and the impersonal "they" (e.g., Luke 16:9) although such structures tend to be obscured by the English translation. ***See also*** Abba; Alpha; Father; God; Lord; Omega.

names of God in the Old Testament. The names, titles, and metaphors for God in the OT reflect Israel's setting in the ancient Near East, the theological variety of OT traditions, and the social settings and institutions that shaped religious life. What unites these many appellations and titles, which are a central feature of Israel's dynamic religion, is not monotheism in a strict sense. While there were pre-exilic trajectories such as the emerging wisdom tradition in which monotheistic tendencies were present, the articulation of the existence of only one God found clear expression for the first time in Second Isaiah during the Exile (sixth century B.C.). Yet even before the Exile, Israelites believed that the God who had elected them, entered into community with them, and shaped their destiny also demanded their undivided obligation and loyalty. It was this conviction that led OT theologians (priests, prophets, court historians, and sages) to transform the variety of deities, divine appellations and epithets, and their defining characteristics into references to and descriptions of the God of Israel.

The Personal Name for God: In the ancient Near East, great significance was attached to personal names, for they revealed character and identity and signified existence. People's names indicate who they are, how they conduct themselves, and how their lives are lived. The revelation of a divine name and its continued use were of substantial importance for a people, for it was the means by which the deity could be approached and known. The name was the key to revelation.

Yahweh. The most important name for God in the OT is the Tetragrammaton, YHWH (occurs 6828 times), usually pronounced "Yahweh," though the known pronunciation was lost in the postexilic period. This name occurs in all writings except Qoheleth (Ecclesiastes), Esther, the dialogues of Job (chaps. 3–27), and probably Canticles (the Song of Solomon). Its short forms occur in many personal names (e.g., Isa*iah*, Jerem*iah*, *Jo*nathan). Due to the increasing sanctity attached to the name and the consequent desire to avoid misuse, the title *Adonai* (Heb., "my great Lord") was pronounced in place of the tetragrammaton. In written texts, the vowels of Adonai were combined with the consonants YHWH to remind readers to pronounce *Adonai* instead of Yahweh. Thus, the incorrect hybrid "Jehovah" arose from Christian misunderstanding in the late Middle Ages. The respect for the sanctity of the personal name of God is often reflected in modern Jewish practice.

The origin of the name Yahweh (usually translated "LORD" in English Bibles) remains uncertain. It is possible that the worship of Yahweh was borrowed from another people, perhaps the Kenites/Midianites. Even the biblical sources are divided at this point. The Yahwist source ("J") traces to the primeval period the revelation of the name Yahweh to human beings (Gen. 4:26), while the Elohist source ("E") and the Priestly source ("P") honor Moses as the first to receive the knowledge of this name (Exod. 3:14 [E]; 6:2–3 [P]). In the latter two sources, this deity is identified with the God of the ancestors (Exod. 3:13, 15; 6:3–4). In both contexts, there is the look ahead to liberation from slavery and guidance into the land of Canaan. Whatever the specific meaning of Yahweh, this association with liberation provides the core of its theological import. The meaning of the name most probably derives from the imperfect form of the Hebrew verb "to be." In Exod. 3:14 (E), God responds to Moses' question about his identity with the ambiguous statement, "I am who [or what] I will be." In E's connection of the name with the Hebrew Qal (simple) stem of the "to be" verb, the meaning appears to connote divine mystery (cf. Gen. 32:22–32) and freedom. A variation of this same interpretation understands the name to signify God's presence. Another interpretation connects Yahweh

with the Hebrew Hiphil (causative) verbal stem and thus understands God's name to mean "He causes to be what exists [or happens]"; i.e., Yahweh is creator and ruler of history. It is this latter meaning that is more likely. Through the Israelites' encounter with God in nature and history, faith in God as the one who created the world, shaped human destiny, elected them to be the covenant people, and liberated them from slavery was actualized. Each pronouncement of the name Yahweh was a succinct expression of this faith. In worship, God is accessible and encountered by this name. Through the revelation of this name, God makes community possible. Through this name, God both graciously gives and jealously sets forth the divine claim.

Yahweh Sabaoth. This compound name, often rendered as "Lord of Hosts," occurs 279 times in the OT. Sabaoth derives from a Hebrew word meaning "hosts" that may refer to earthly hosts, i.e., armies, or to heavenly hosts, i.e., armies comprised of stars, angels, and even deities stripped of power. Taken in the sense of "hosts" or armies, the name may have originated in holy war and thus could have expressed a polemic against astral cults: Yahweh rules the heavenly armies. The name was eventually understood as a plural of intensity, "Lord Almighty," or an abstract plural, "powerfulness," thus neutralizing the existence of the celestial gods. The Septuagint (LXX) captures this more abstract meaning in its translation, "Lord Almighty."

Generic Names for God: *Elohim* is one of three common generic names for God in the OT, occurring almost 2600 times. The term is a plural, probably of *El* or *Eloah*, Hebrew words for "god," and on occasion means "gods" (e.g., Exod. 20:3). Most often it is a plural of majesty for Israel's "God" (e.g., Gen. 1:1) and thus is translated in the singular. Unlike the term El, Elohim is not found in other Semitic languages. The Elohist used the name to refer to God from the time of the ancestors (Gen. 15) to the call of Moses in Exodus 3, when Elohim was identified with Yahweh. The Priestly source uses Elohim for God from creation (Gen. 1) to the covenant of Abraham (Gen. 17). While the name was used in most traditions, periods, and regions, it was especially favored in northern Israel.

Eloah (Heb., "god") is the second generic name for deity in the OT, though it is found only 57 times, the great majority of which occur in Job (41). Because Job and his three "comforters" are non-Israelites, the poet may have used this generic word for God to avoid the specific Israelite conceptions of covenant and salvation history associated with the name Yahweh. Job, a part of wisdom literature, prefers to speak of the universal dominion of creation theology and the common problem of human suffering.

El (Heb., "god"), occurring some 238 times in the OT (including compounds), is the common Semitic name for deity in ancient Near Eastern cultures, save for Ethiopic. Every divine being was properly designated by this generic name. In the texts discovered at Ugarit (modern Ras-Shamra), El is also the personal name of the head of the pantheon. As creator and father of the gods, El possessed the authority of the divine decree that ordered the world of gods and human beings. Various appellations and titles were combined with El, probably in localized traditions associated with particular sanctuaries (see below). Polytheism and the worship of El were major components of both Canaanite and Israelite ancestral religions. In the settlement of Canaan, the tribes of Israel began to assimilate Canaanite religious centers and to associate their religious traditions with Yahweh, the one who had liberated them from Egypt. This meant that Israel's God came to assume many characteristics of the Canaanite El and was often called El, especially in the ancestral narratives in Genesis, in the Psalter, and in Job.

Appellations with El: According to P (Exod. 6:3), *El Shaddai* (Heb., "God, the One of the Mountain[s]") was worshiped by the patriarchs Abraham, Isaac, and Jacob (Gen. 17:1) down to the time of Moses (Exod. 6:3). The combined name occurs 31 times in the book of Job, and only 17 times elsewhere in the OT. In the mythologies of the ancient Near East, gods often resided on a cosmic mountain that was the center of the earth. Shaddai came to be identified with El, the head of the Canaanite pantheon, and then with Yahweh (Exod. 6:3; Ezek. 1:24). The LXX translated Shaddai as "Almighty." Thus, many English Bibles translate El Shaddai as "God Almighty."

El Elyon (Heb., "God Most High"), originally a compound for the high god El, was worshiped in Jerusalem before David's conquest (ca. 1000 B.C.). In Genesis 14, Melchizedek is the priest-king of Jerusalem who blesses Abraham in the name of "God Most High, Maker of Heaven and Earth," the "God who gave Abraham's enemies into his power." In J's rendition of this story, El Elyon is identified with Yahweh. After the Israelite takeover of Jerusalem, the El Elyon tradition is associated with Yahweh (Ps. 47:2–3).

El Olam (Heb., "God of Eternity") was the Canaanite god of Beer-sheba. After this religious center was incorporated into Israelite religion, the title came to designate Yahweh (Gen. 21:33).

El Berith (Heb., "God of the Covenant") was the Canaanite god of Shechem (Judg. 9:46). In Joshua 24, the Deuteronomic historians placed the covenant renewal ceremony at Shechem following the conquest of Canaan. In the Deuteronomistic History, the covenant became the basis for the tribal league during the period of the judges (eleventh century B.C.).

El Roi (Heb., "The God of Seeing/Divination") was a localized deity of a sacred spring (Beer-la-hai-roi) whose water sustained Hagar in the desert and inspired her to see a divine vision (Gen. 16:13–14). J connects this story with

Yahweh, who promises Hagar a son (Ishmael) who will have many descendants.

In summary, the local Canaanite gods, including El, the head of the pantheon, were worshiped in sanctuaries eventually taken over by Israel. Canaanite religious traditions were eventually applied to Yahweh. In this theological process, Yahweh, the God of liberation from Egyptian slavery, merged with Canaanite gods, especially the high god El, who legitimated a stratified social system of city-states ruled by local dynasts. This combination provided a critical tension—theological, political, and social—that characterized Israelite religion throughout the OT.

Social Titles for God: The changing social constructions of Israel also provided important titles for God.

Adonai (Heb., "my great Lord") is a plural of majesty derived from the singular *Adon* (Heb., "lord"), a title of respect used to address a social superior (e.g., king, husband, or slave owner). In the postexilic period, Adonai came to replace the name Yahweh in common worship because of the increasing sanctity associated with the latter name (e.g., Job 28:28).

Baal (Heb., "lord") is also a title designating a social superior (e.g., leader, owner, or husband). In Canaanite religion, Baal was the name of the storm god of fertility who brought rain and military victory. This god rivaled Yahweh for Israel's devotion, as especially noted in prophetic literature (e.g., Hosea). While certain theomorphic names may indicate that some Israelites identified Baal with Yahweh (e.g., Meribbaal, the son of Jonathan), the term was generally avoided because of strong pagan associations (cf. Hos. 2:16–17).

Royal Titles: Other important titles derived from the Israelite family, including father (Deut. 32:6), brother (1 Sam. 14:3: Ahijah [Heb., "brother of Yahweh"]), kinsman (Gen. 31:41: "kinsman [or fear] of Isaac"), and redeemer (Ps. 19:14). These titles may have originated in patriarchal religion where the personal deity of the head of the clan became the protector of the group (Exod. 3:6: "the God of my father"). The "redeemer" was the next of kin responsible for delivering the relative from hard times (Lev. 25:25). While God is not explicitly called "mother" or "sister," the OT does use feminine images to speak of God. God is depicted as a mother who conceives, bears, and gives birth to Israel (Num. 11:12; Deut. 32:18) and as a midwife (Ps. 22:9–10). These images demonstrate that the OT does not limit and confine God to the masculine gender. ***See also*** Baal; Deuteronomistic Historian; El; El Bethel; El Shaddai; Elohist; Father; God; King; Lord of Hosts; Priestly Writer(s); Ras-Shamra; Shepherd; Sources of the Pentateuch; Yahwist. L.G.P.

Nannar (nan´ahr; Heb., "lightgiver" from Sumerian *Nar-nar),* a term for the Sumerian god Sin, identified as the moon. Sin was worshiped at Ur in south Mesopotamia. ***See also*** Sumer.

Naomi (nay-oh´mee; Heb., "my pleasantness"), one of the major characters in the book of Ruth. Naomi, her husband Elimelech of Bethlehem, and their two sons went to Moab in a time of famine (Ruth 1:1–2). The sons married Moabite women but both sons and Elimelech died (1:4–5). Naomi decided to return to Bethlehem and urged her daughters-in-law to remain with their families in Moab (1:8–14). Ruth refused, vowed loyalty to Naomi, and returned with her to Bethlehem (1:16–17). There, Naomi encouraged Ruth to ask protection of Boaz, a kinsman of Elimelech (chap. 3). Boaz redeemed Elimelech's property and married Ruth in accordance with levirate law (chap. 4; cf. Deut. 25:5–10). Their son, Obed, preserved Elimelech's line and later became the grandfather of King David. ***See also*** Ruth. M.A.S.

Naphtali (naf´tuh-li; Heb., meaning uncertain), second son of Jacob and Bilhah (Gen. 30:7–8) and eponymous ancestor of the Israelite tribe of that name. Naphtali's territory was bounded on the west by Asher, on the south by Zebulun and Issachar, and on the east by the river Jordan and the Sea of Galilee. This territory Naphtali shared with Canaanites (Judg. 1:33). Its northern location is reflected in the position it occupied along with Dan and Asher on the north side of the Tent of Meeting (Num. 2:25–31).

In the period of the Judges, Barak, son of Abinoam, from Qedesh in Naphtali, successfully led a force of ten thousand against the army of Sisera (Judg. 4:6–10, 12–16) and twice the tribe of Naphtali answered the call of Gideon to battle invading Midianites (Judg. 6:35; 7:23). During Solomon's reign, the administrative officer in charge of Naphtali was son-in-law to the king; and Hiram of Tyre, the son of a widow from the tribe of Naphtali, is credited with the manufacture of the bronze/copper work commissioned by Solomon for the Temple (1 Kings 7:13–47; but according to 2 Chron. 2:13–14 it was Huramabi of the tribe of Dan). The only craftsman designated by name in the account of Solomon's building activity, Hiram's skill is described in terms reminiscent of those employed to describe the abilities of Bezalel, the master craftsman of the tabernacle in the wilderness (Exod. 31:3; 35:31) and the "shoot from the stump of Jesse" (Isa. 11:2). In the period of the Divided Monarchy, Naphtali was invaded by Ben-hadad of Syria at the request of Asa of Judah during the course of the war between the latter and Baasha of Israel (1 Kings 15:16–20). Later, during the reign of Pekah of Israel, Tiglath-pileser III invaded Naphtali and deported its population to Assyria (2 Kings 15:29). In the course of the Maccabean wars, forces of

Demetrius of Syria, intent upon removing Jonathan from office, reached Qedesh (Naphtali) in Galilee and were met by Jonathan, who managed to turn a near defeat into victory (1 Macc. 11:63–64, 67–74).

Naphtali in Poetic Sources: 1 The Blessing of Jacob (Gen. 49:21). As it stands, the text is obscure, but if one changes certain vowels in the final word it yields the following translation: "Naphtali (though) born a mountain-ewe, gives birth to lambs of the fold." The poet thus contrasts Naphtali's prior state of independence with its state of political dependence in the period of the poet. **2** The Blessing of Moses (Deut. 33:23). "Naphtali, sated with favor, and filled with Yahweh's blessing, possess the sea and the south(?)!" The final word, *darom,* translated "south," is suspect in so early a poem, for it is found otherwise only in the late books of Ezekiel, Job, and Ecclesiastes. If, with the alteration of its first letter, it may originally have read *marom,* "highland" (cf. Judg. 5:18), then the blessing has reference to the tribe's well-favored territory from the Sea of Galilee to the Galilean highlands. **3** The Song of Deborah (Judg. 5:18). Along with Zebulun, Naphtali is lauded for its participation in the war against Sisera. ***See also*** Tribes, The. S.G.

napkin, cloth used for wiping perspiration from the face (Acts 19:12, "handkerchief") or to wrap an object (Luke 19:20). John 11:44 and 20:7 mention the custom of wrapping the head of a corpse. Its position in John 20:7 may be an indication that Jesus' body had not been stolen from the tomb (see v. 2b; Matt. 28:11–15).

Narcissus (nahr-sis´uhs), person mentioned in Rom. 16:11 as one whose "family" included Christians. Perhaps a house-church met in his home but not all of the family were Christians. It is unlikely that the reference is to a freedman of the Emperor Claudius by this name.

nard. ***See*** Spikenard.

narrative criticism, or narratology, a branch of literary criticism that has as its object the study of the formal features of narrative texts. It is based on communication models of speech-act theory: the text conveys the message that the author would deliver to the reader (in the ancient world, however, receivers of texts were not so much "readers" as "auditors"). To use the categories of M. H. Abrams (*The Mirror and the Lamp*, 1953), narrative criticism may be described as "objective" in nature in the sense that it is text-oriented. It can thus be contrasted with redaction criticism, which is "expressive" (author-oriented), with reader-response criticism, which is "pragmatic" (reader-oriented), and with historical criticism, which is "mimetic" and aims at reconstructing events that transpired in the "real world." Unlike structuralism, the focus in narrative criticism is on the surface features of the text, and, unlike advocates of deconstruction, narrative critics generally regard the text itself as stable. The goal is to analyze the "story world" of the narrative, and "meaning" arises, not in the attempt to discern the intentions of the author or to capture the affective force of the text, but in the encounter of the reader with the text.

This is not to say that the historical context in which a text was written plays no role in narrative criticism. True, because the flesh-and-blood authors and original readers (auditors) of biblical narratives tend to recede behind these works, narrative critics deal with them only as they can be inferred; it is, therefore, with "implied authors" and "implied readers" that narrative critics have to do. Still, if the presupposition be granted that it is legitimate to aim at reading a narrative as first understood, then the critic must assume, to the extent possible, the position of the implied reader(s). To do this, the critic must be aware of both the rhetorical strategies embedded in the text and the so-called extratext. The extratext, as defined by J. A. Darr (*On Building Character*, 1992), comprises whatever skills and knowledge that persons of a particular culture would need to possess so as to be able to read or hear a narrative competently. The importance of this is that the critic, to construe the meaning of a narrative, must first construe the implied reader(s). At this point, narrative criticism overlaps with historical criticism on the one hand and with a type of reader-response criticism on the other.

Critics think of a narrative as comprising two parts: the "story" and its "discourse" (S. Chatman, *Story and Discourse*, 1978). The story is "what" is told; the discourse is "how" the story is told. In Genesis 37–50, for instance, the story is that of Joseph and his brothers. The story, in turn, encompasses three elements: "events," "characters," and "settings." Characters are the dramatic persons (e.g., Abraham or Paul in Acts) or groups (e.g., the twelve disciples in the Gospels) that appear in a story, and "characterization" is the art of making these persons lifelike by "showing," "telling," or "commenting on" who they are, what they say and do, or what happens to them. Settings mark the time, place, or social circumstances in which characters act. And events are the string of actions that stretches the length of the story. They constitute the story's "plot." To create a plot, the author arranges events in a temporal, causal, or topical sequence so as to elicit particular cognitive, ideological, and emotional response(s) from readers. In biblical narratives, as in narratives by and large, plots can be expected to turn on "conflict" (e.g., Saul vs. David, Jesus vs. the religious leaders).

The discourse of a narrative encompasses the whole array of means (e.g., language, style, and rhetorical strategies) by which an author tells a

story. Key aspects of the discourse are the "narrative voice" and "point of view." The narrative voice, or narrator, is the invisible speaker that tells the story. In the Bible, narrators may be said to be "reliable," for they espouse the same system of values or standards of judgment as the implied author. In greatest measure, biblical narrators look back on events and tell about them from a "bird's-eye view" in the "third person" and in "past time," proving themselves to be both "omniscient" and "omnipresent" relative to their stories.

Point of view exists on several planes: the "ideological" (or "evaluative"), "phraseological," "spatial and temporal," and "psychological" (B. Uspensky, *A Poetics of Composition*, 1973). The most basic point of view is the evaluative, which constitutes the conception of reality that governs a story and determines what is "true" or "false," "right" or "wrong." In biblical narratives, the evaluative point of view is represented by the reliable narrator or the protagonist (e.g., Moses or Jesus), who is typically shown to speak and act on the authority of God. The phraseological point of view focuses on the speech or diction that distinguishes the narrator or characters of a narrative. As a rule, the speech of characters is indicative of their evaluative point of view. The spatial and temporal point of view concerns the position in time and space from which characters or events are observed or described. In the Gospels, the place from which all four narrators tell their respective stories is in the time between the resurrection of Jesus and his Second Coming. And the psychological point of view refers to knowledge on the part of a narrator or character about what some other character thinks, sees, hears, intends, feels, or otherwise experiences.

How do biblical narratives "work"? On the one hand, the implied author employs an overall rhetorical strategy aimed at persuading the implied reader (auditor) to adopt the author's evaluative point of view. For example, the overall rhetorical strategy Matthew employs in his Gospel story is the "rhetoric of comprehension": as he guides the reader to look on with approval or disapproval, Matthew shows whether or not characters, in "seeing" and "hearing" Jesus, "understand" him aright and respond to him by "receiving" him and "doing" the will of God as Jesus teaches it.

On the other hand, as the implied reader (auditor) follows a narrative, he or she becomes involved in processes known as "consistency-building" and "defamiliarization" (W. Iser, *The Act of Reading*, 1978). Consistency-building is the persistent effort on the part of the reader to make sense of a narrative and to comprehend its significance; in the case of Matthew, the reader strives to grasp his evaluative point of view. To the extent that the reader accomplishes this, however, he or she is exposed to defamiliarization: in experiencing what is unfamiliar within the world of the narrative, the reader is led to view aspects of his or her own familiar world in a new way. Matthew's Gospel, for example, defamiliarizes its readers by casting the story of Jesus in an eschatological light and indicating what life is like when people live as disciples of Jesus in the sphere of God's inbreaking rule (3:2; 4:17, 23; 9:35; 24:14). ***See also*** Bible; Biblical Criticism; English Bible; Hermeneutics; New Testament; Old Testament; Reader-Response Criticism.

Nathan (nay'thuhn; Heb., "gift [of God]"). **1** A prophet in the court of David. Three significant events are recorded about him. In 2 Samuel 7 (and 1 Chron. 17) it says that David consulted with him on his intention to build a temple to house the Ark of the Covenant (v. 2). In a revealing statement on the prophet's knowledge of God's will, Nathan at first assumed that God approved of this plan (v. 3) but then was told by God that David's wish would be fulfilled only by his son (vv. 4–5, 12–13). The reason for the postponement of the erection of the Temple is indicated in vv. 6–16. In the past, God's presence in a tent was appropriate to accompany the children of Israel on their wanderings. However, now that the Israelites were settled (v. 10), and God had initiated with David a permanent human rulership over Israel (vv. 11, 16), the proof of the establishment of this permanence and security—the reign of David's heir—would be the proper symbolic time for the building of a house to the Deity (v. 13). Additionally, peace obviates the necessity for God (and the Ark) to lead the Israelites into battle (v. 9; cf. 1 Chron. 22:7–10). The assurance in this prophecy of the unconditional eternality of the Davidic dynasty (vv. 12–16) captured the popular imagination during First Temple times (ca. 950–586 B.C.) and obstructed the attempts of the later prophets to affirm the primacy of the conditional Sinai covenant in order to bring the people to repentance.

After David committed adultery with Bathsheba and arranged Uriah's death (2 Sam. 11), God sent Nathan to rebuke David (2 Sam. 12). Nathan, through the parable of the poor man's ewe lamb (vv. 1–4), trapped David into accusing himself and acknowledging his own guilt (vv. 5–6, 13). David's "measure for measure" punishment is threefold (vv. 10–14): violence will be a constant family companion (witness Amnon, Tamar, and Absalom); his wives will have public intercourse with another (2 Sam. 16:22); and the son of the illicit union must die (2 Sam. 12:18). Like the episode of Naboth's vineyard (1 Kings 21), this story illus-

trates the unique ability of Israel's prophets to confront the monarch with moral crimes. Unlike other royalty in the ancient Near East, who ruled absolutely and often capriciously, the Israelite king was subservient to the Torah of God (note that the sentence pronounced by David upon the rich man in 2 Sam. 12:6 is identical with Exod. 22:1).

In 1 Kings 1, readers are afforded a rare behind-the-scenes view of the machinations of royal succession. Here, Nathan, without hint of divine instruction, is the king-maker, setting the stage and directing dialogue (vv. 13–14), manipulating David to crown Solomon his successor. Not that Nathan is acting immorally; rather, David is too feeble to act on his own and must be led onto the proper path.

The Chronicler mentions the writings of Nathan as part of his source (1 Chron. 29:29; 2 Chron. 9:29) and partly attributes to his authority the musical role of the Levites in the Temple (2 Chron. 29:25).

2 A son of David (2 Sam. 5:14; Zech. 12:12; 1 Chron. 3:5; 14:4), and Jesus' ancestor in Luke 3:31.

3 The father of one of David's warriors (2 Sam. 23:26).

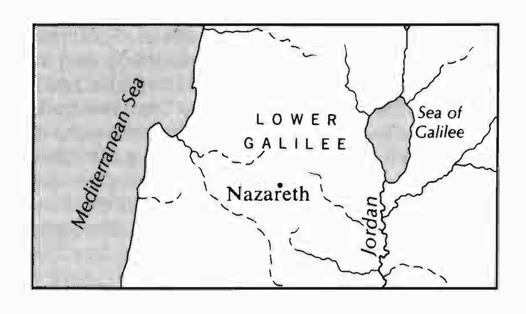
4 The brother of another of David's warriors (1 Chron. 11:38).

5 The father (sometimes identified with the prophet) of one of Solomon's officers (1 Kings 4:5).

6 The father of one of Solomon's priests (1 Kings 4:5; but see 1 Chron. 2:34–36 where the same [?] Nathan is a descendant of an Egyptian servant).

7 Two men at the time of Ezra (Ezra 8:16; 10:39). ***See also*** Bathsheba; David; Prophet; Solomon. J.U.

Nathanael (nuh-than'ay-uhl). **1** A priest required by Ezra to put away his foreign wife (1 Esd. 9:22). **2** An ancestor of Judith (Jth. 8:1). **3** One of the chosen disciples of Jesus mentioned only in John's Gospel; brought to Jesus by Philip (John 1:43–51; cf. 21:2). Described by Jesus as "an Israelite indeed, in whom is no guile," Nathanael is characterized as resolute in his devotion and piety to God. Nathanael's confession is exemplary: "Rabbi, you are the Son of God! You are the King of Israel!" Nathanael is also noted, however, for his earlier scornful question, "Can anything good come out of Nazareth?" Because his name is absent from the apostolic lists in the other Gospels and Acts, many scholars have identified him with one or another of those listed, most commonly Bartholomew. ***See also*** Apostle; Bartholomew; Disciple; Philip; Twelve, The. P.L.S.



nations, large political divisions, normally of homogeneous ethnic populations. Both the OT and the NT teach God's sovereignty over the nations. God appointed them (Deut. 32:8); before him they are nothing (Isa. 40:7) and to them He will be a light (Isa. 42:6; Luke 2:32). The chief snare of "the nations" is their gods (Deut. 7:22–26), which are accounted as mere idols (Ps. 96:5) and not true gods (Isa. 44:12–20; 45:14). Non-Israelite peoples are often grouped together under the rubric "nations" (e.g., Exod. 34:24; Deut. 11:23; Josh. 23:13).

Natufian (nuh-t*oo*'fee-uhn), an archaeological designation for a people or period at the upper edge of the Paleolithic Age, 10,000–8,000 B.C. The Natufians are named after the Wadi en-Natuf near Jerusalem where excavation first revealed their distinctive tool forms. Since that time numerous manifestations of this culture have been found throughout Palestine and even in Syria. It is these peoples who, following the final retreat of the last glaciers of the Ice Age, first began to intensify their collection of wild grains, i.e, took the first tentative steps toward the domestication of plants and animals. Their sickle blades and food-grinding equipment reflect this greater awareness and exploitation of the environment. Besides rock shelters, they occupied open-air, apparently permanent dwelling places, as evidenced by the settlement of Mallaha. The first art also appeared at this time. They are the earliest people known to have occupied the Holy Land. S.L.R.

Nazarene (naz'uh-reen), a term applied to Jesus in all four of the Gospels and in Acts and, in one passage, also applied to the early Christians. The Greek word has two different spellings, perhaps deriving from different roots in Hebrew or Aramaic, but both are apparently understood, perhaps erroneously, as references to Nazareth, the home of Jesus. In most instances, the RSV translates the term by the English phrase "of Nazareth" (but cf. Matt. 2:23; Mark 14:67, where it is rendered as "Nazarene"). In Acts 24:5, the word, in the plural, is applied to the early Christians, and it apparently continued in use for some time as one of several designations for Christians. ***See also*** Christian; Jesus Christ; Nazareth; Way. J.M.E.

Nazareth (naz'uh-rith), the place from which Jesus' mother came (Luke 1:26) or the place in which he grew up (Matt. 13:54; Luke 4:16; Luke 2:4, 51; Matt. 2:23). Nazareth was an insignificant agricultural village not far from a major trade route to Egypt, the *Via Maris*. It is not mentioned in the OT, Josephus, or rabbinic writings. Not surprisingly, Jesus' Nazareth origins are held up to scorn by those skeptical of his mission (John 1:46).

A Hebrew inscription found at Caesarea lists Nazareth as one of the villages in which the priestly divisions (cf. Luke 1:8–9) were resident after the Jewish revolt. Some scholars think that

this notice attests to the piety attributed to Nazareth, which has not produced any remains with pagan symbolism.

The village appears to have occupied 40,000 square meters and to have had a population of 1,600 to 2,000 persons in Jesus' time. The major settlement in the area appears to have occurred in the second century B.C. No layout of the village or its houses has been discovered, although the typical dwelling would probably have consisted of a small group of rooms around a central courtyard, and some houses may have had a second story.

According to legend, there was a Jewish-Christian community in Nazareth during the second and third centuries A.D. However, the early pilgrims were not much interested in Nazareth. In the sixth century A.D. legends about Mary sparked interest in the site, where one now finds the Church of the Annunciation and a well designated as "Mary's Well or Fountain." P.P.

Nazirites (naz´uh-rits; Heb., "dedicated" or "consecrated [ones]"), men or women who entered a consecrated state upon their own or a parent's vow (Num. 6:1–21; 1 Sam. 1:1–11; Judg. 13:1–7). There were three main conditions for entering and remaining in this holy state: refrain from the fruit of the vine and other intoxicants, not allow a razor to touch one's hair for one's term as a Nazirite, not go near a dead body—not even that of one's own father or mother (Num. 6:1–7). In the last condition the rigor is comparable to that required elsewhere only of the high priest (cf. Lev. 21:10–12 and 21:1–4). The first condition was also a distinguishing feature of the Rechabites (Jer. 35). Upon completion of a term the Nazirite could drink wine (Num. 6:20), and some were tempted to do so before (Amos 2:10–11).

The Bible sets forth an elaborate ritual for reconsecration, should a Nazirite become unclean through contact with a dead body (Num. 6:9–12), and for bringing the period of consecration to an end (vv. 13–20). The Mishnah in the tractate named *Nazir* puts the minimum term at thirty days.

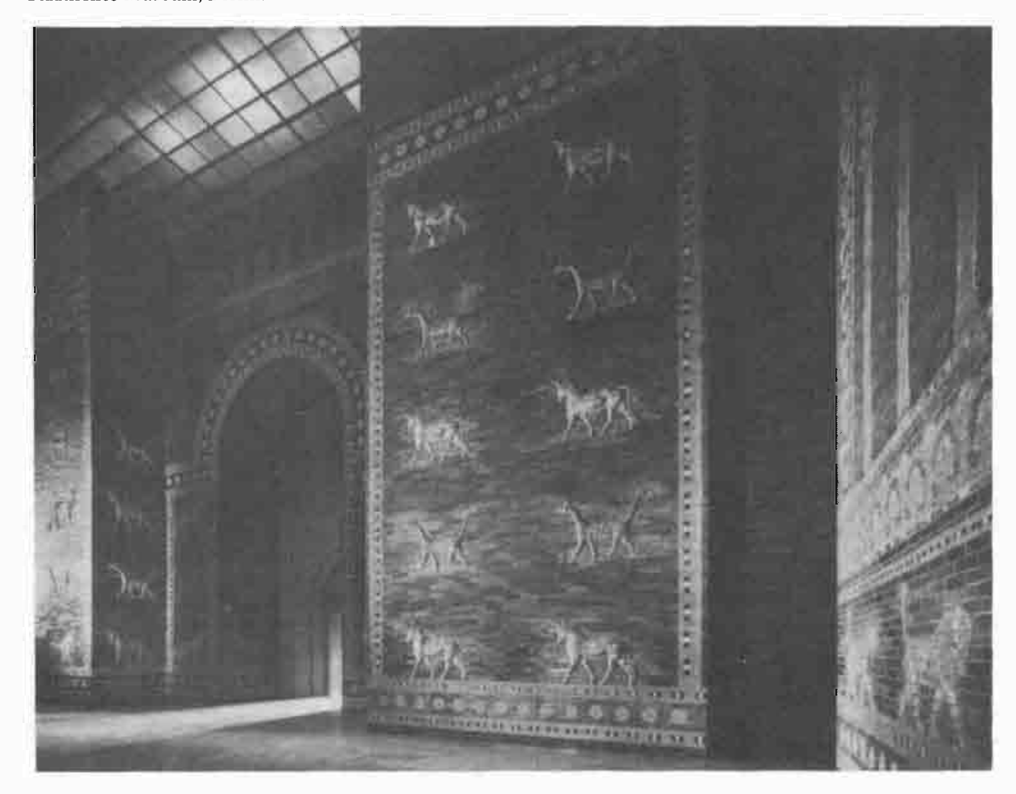
Joseph is called a *nazir* (Gen. 49:26; Deut. 33:16). Samuel is not explicitly named one but the wording of the vow made by his barren mother, Hannah (1 Sam. 1:11), strongly suggests he should be counted a Nazirite. Samson is the most famous, explicitly named Nazirite; and much of the irony and pathos of the narrative cycle lies in Samson's gradual loss or deprivation of his special God-given status (Judg. 13:7; 16:17). Both Samuel and Samson were consecrated by vows uttered when they were still in their mothers' wombs. In the NT it is likely that one of the significances attached to Jesus' being called a "Nazarene" (Matt. 2:23) is that he too should be viewed as a Nazirite in the sense of being consecrated to God from the womb. J.G.G.

Neapolis (nee-ap´uh-lis; Gk., "New City"), the name of many Greco-Roman towns founded near ancient sites, e.g., Naples, Italy. Neapolis in the NT is the seaport, modern Kavalla, for Philippi, ten miles inland (Acts 16:11). Noteworthy also is Flavia Neapolis, modern Nablus, founded about A.D. 72 by Vespasian just west of ruined Shechem in the Gerizim-Ebal pass; Justin Martyr was born near there in A.D. 100. Early Neapolis coins depict a colonnade, a stairway up Gerizim, and temples on the summits. Remains of Roman and Byzantine times are encountered frequently in Nablus, including water works, tombs, and a small theater. The Samaritan community that reveres Mt. Gerizim still lives there. ***See also*** Gerizim; Philippi; Samaritans. E.F.C.

Nebaioth (ni-bay´yoth), the firstborn son of Ishmael (Gen. 25:13; KJV: "Nebajoth"; 1 Chron. 1:29) and Esau's brother-in-law (Gen. 28:9; 36:3). As a tribe Nebaioth's descendants were as famous for their herds of sheep (Isa. 60:7) as was the tribe of Kedar, and they may have been the *Nabaiati* mentioned in the records of the Assyrian kings Tiglath-pileser III and Ashurbanipal in the eighth and seventh centuries B.C.

Nebat (nee´bat), the name of the father of Israel's king Jeroboam I (ca. 924–903 B.C.; 1 Kings 11:26). He is identified as an Ephraimite from Zeredah, modern Deir Ghassaneh, about ten miles west of Shiloh. He is mentioned several times in 1 and 2 Kings and 2 Chronicles.

Nebi Samwil (neb´ee sam-weel´; Heb., "the prophet Samuel"), a settlement on a high promontory (2,935 feet above sea level) commanding a direct visual surveillance of the main road from the coast up to Jerusalem on the west and the main north-south hill country route that lay just east of it. It was five miles northwest of Jerusalem and according to late tradition was the site of Samuel's burial.



Nebo (nee´boh). **1** A Babylonian god (Isa. 46:1) considered the son of Marduk. His statue was paraded with Marduk's in Babylon at the New

Year Festival, setting the context for Isaiah's taunt (Isa. 15:1–9). He was associated with water, writing, and speech. Of the last six kings of Babylon, three carried his name in their personal names, *Nabo*polassar, *Nebu*chadnezzar, and *Nabo*nidus. **2** A Moabite city (Num. 32:3, 38), probably modern Khirbet Mekhayyet, about five miles southwest of Hesban. It was part of Sihon's kingdom (Num. 21:26–30). Assigned to the tribes Reuben and Gad (Num. 32:3), it was Moabite under Mesha (mid-ninth century B.C.) and it figured in the prophecies of both Isaiah (15:2) and Jeremiah (48:1, 22). **3** A mountain promontory (Deut. 32:49) from which Moses was called to view Canaan at the time of his death, modern Jebel en-Nebu, 2,740 feet above sea level, and about 4,030 feet above the Dead Sea whose north edge lies below it to the west. As part of the Abarim range (Num. 33:47), the promontory is conspicuously visible from Hesban but is accessible most easily from Medeba five miles southeast. The most panoramic view of the Jordan Valley and land to the west is from a lower promontory across a saddle to the northwest, modern Ras es-Siyaghah. Byzantine churches and other installations continue to be excavated by Franciscan teams in this area. **4** The ancestor of some returning exiles (Ezra 2:29; 10:43; and possibly Neh. 7:33) who may have been associated with a town in Judah, Nuba, six miles northwest of Hebron. R.S.B.

Nebuchadnezzar (neb´uh-kuhd-nez´uhr), the name of four kings now known to us from ancient Mesopotamia. The first was the king of the Second Dynasty of Isin (southern Mesopotamia), who ruled 1124–1103 B.C. He is known as Nebuchadnezzar I. The king mentioned in the Bible is known as Nebuchadnezzar II by modern scholars. The Behistun inscription (western Iran) of Darius I (522–486 B.C.) tells of two contenders for the throne (522 and 521 B.C.) who bore the name Nebuchadnezzar (called by moderns III and IV, though some doubt has been raised concerning the existence of the last).

Nebuchadnezzar II ruled Babylonia from 605 to 562 B.C. He was the son of Nabopolassar, founder of the Chaldean dynasty. Nebuchadnezzar II was the most powerful and longest reigning king of the Neo-Babylonian (625–539 B.C.) period. He brought the city of Babylon and

Bulls alternating with serpent-dragons adorn the walls of the Ishtar Gate, built in Babylon by Nebuchadnezzar II (ruled 605–562 B.C.) and now reconstructed in the Staatliches Museum, Berlin.

the southern Mesopotamian state of Babylonia to the pinnacle of their power and prosperity.

The name *Nabû-kudurri-uṣur* means "O Nabu, preserve the offspring [lit., 'boundary-stone']." From this Babylonian form, the alternate biblical spelling Nebuchadrezzar is taken.

The major competitors for power in the days of Nebuchadnezzar II were Media (northwest Iran) and Egypt, always with great-power ambitions for ports and trade in the Levant (Syria, Lebanon, Israel). Nebuchadnezzar's marriage to a daughter of the king of the Medes held the alliance with that power secure until after Nebuchadnezzar's death. As for Egypt, Pharaoh Neco suffered a defeat at the hands of Nebuchadnezzar at the city of Carchemish in 605 B.C., from which he did not recover (2 Kings 24:7).

Much information about the early rule of Nebuchadnezzar II comes from the *Chronicles of Chaldaean Kings* (D. J. Wiseman; London: British Museum, 1956). However, of the forty-three years of the reign of Nebuchadnezzar II, only those up to 594 B.C. are preserved. Other records tell of the conquest of Tyre (571 B.C.; cf. Ezek. 27:12) and the invasion of Egypt in Nebuchadnezzar's thirty-seventh year (reported by a fragmentary British Museum tablet; see Ezek. 29:19–21). Accounts indicate that Nebuchadnezzar was an able but cruel ruler (cf. 2 Kings 25:7) who stopped at nothing to subdue peoples who stood in his path of conquest.

Amēl-Marduk (Evil-Merodach), Nebuchadnezzar's son, ruled from 562 to 560 B.C. According to accounts in 2 Kings 25:27–30 and Jer. 52:31–34 he recognized King Jehoiachin and allocated an allowance for him "all the days of his life." Babylonian clay tablets mentioning the disbursement of oil to Jehoiachin, five sons of the king of Judea and other Judeans confirm in a dramatic manner this Scriptural statement.

Building projects sponsored by Nebuchadnezzar included the beautification of Babylon, his capital, the construction of fortification walls in addition to those already in place, and the improvement of Marduk's temple in Babylon, Esagila. There is extant a list of the personnel of the court of Nebuchadnezzar II, showing the complex infrastructure of the royal palace.

From the perspective of biblical Israel, the events associated with the reign of Nebuchadnezzar II that had the most lasting effect upon their destiny were the destruction of Judea, the conquest of Jerusalem, the setting to the torch of the Temple of Solomon, and the exile to Babylonia (597–581 B.C.). The reflection of these events and the events that led up to them can be seen in the biblical materials in 2 Kings and 1 and 2 Chronicles, taken with Jeremiah. Related materials may be found in Ezra, Nehemiah, and Esther. Daniel 1–5 represents an account of Jews in the court of Nebuchadnezzar, along with apocalyptic visions.

Jeremiah, the great prophet who was an eyewitness to the destruction of the Temple, counseled submission to Nebuchadnezzar, whom he viewed as the instrument of the Lord's wrath. In time, Jeremiah wisely foresaw, Nebuchadnezzar's own land would face its day of reckoning as well (Jer. 27).

It is thought by some scholars that Daniel 4, which records the madness of Nebuchadnezzar, may have incorporated accounts pertaining to the less well-known Babylonian monarch of this same dynasty, Nabonidus. ***See also*** Daniel; Daniel, The Book of; Jeremiah, The Book of; Nabonidus. D.B.W.

Nebuzaradan (neb′uh-zuh-ray″duhn), a Babylonian high official who, in 586 B.C., oversaw the destruction of Jerusalem and its Temple (2 Kings 5:8–22). He supervised personally the disposition of the captured property and population in Judah: vessels used in worship and appurtenances of precious metals were carried off as spoil to Babylon. The poorest people of the land, the refugees behind Jerusalem's walls, were permitted to resume their pursuits as "vinedressers and fieldworkers." The leaders of the rebellion against Babylon, the high priest and the surviving royal officials, were transferred to Riblah where they were summarily executed. Nebuzaradan exiled the remainder of the city's populace; an exception was made in the case of the prophet Jeremiah who was permitted to stay behind as counselor to the new governor Gedaliah (Jer. 40:1–6).

Nebuzaradan's official title, "chief cook" (often incorrectly rendered "chief executioner"), is attested both in Hebrew (*rab ṭabbāḥ îm*) and in Akkadian (*rab nuhatimmu*). Nebuzaradan is listed second among the courtiers of King Nebuchadnezzar on a Neo-Babylonian administrative document. ***See also*** Gedaliah; Jeremiah, The Book of. M.C.

Neco (nee″koh; KJV: "Necho[h]") **II** (610–595 B.C.), king of Egypt during the twenty-sixth (Saite) dynasty (ca. 664–525 B.C.), and successor to the very successful Psammetichus I (664–610 B.C.) who established Egyptian control in Philistia during part of his reign. Neco became pharaoh during the last days of the Assyrian Empire when it was precariously clinging to life in north Syria. As a former Assyrian vassal with expansionist ideas and concerned to limit Babylonia (Chaldea) as a possible successor to Assyrian dominance, Egypt sent a major sea and land expedition to north Syria in 609 B.C. to aid Assyria against the Babylonian forces. In doing so Neco encountered King Josiah of Judah at Megiddo (2 Kings 23:29); Josiah was presumably acting either for Judean independence and thus against Egypt, which was seeking to become dominant in the area, or in the interest of Babylonia against Assyria. Josiah died as a result of

that encounter, but the Egyptian forces were not successful in the attempt to install the Assyrian remnant in Haran. Yet with Assyria no longer a factor, Egypt was, for the moment, the dominant power in southern Syria and Palestine.

On his return from north Syria about three months later, Neco summoned Jehoahaz (Shallum), king of Judah, whom the Hebrew people had anointed as successor to his father, Josiah, to Riblah, deposed him, put him in bonds, and carried him off to Egypt. Neco assigned Judah a heavy tribute and installed Jehoiakim (formerly Eliakim) as successor to his younger brother. In 605 B.C. Neco again battled Babylonia in north Syria, at Carchemish, losing decisively. Shortly thereafter Jehoiakim switched his allegiance to Babylonia, who came to control all of Syro-Palestine.

Apart from his ambitious undertakings in Syro-Palestine, Neco, building on his father's foundation, expanded the Red Sea trade and tried to reestablish commercial contacts with Punt (Somalia). Although he stayed out of Syro-Palestine after 605, he sent a major expedition into Nubia, initiated an extensive canal project in the eastern Nile delta, and successfully resisted the Babylonian attempt to invade Egypt in 601–600 B.C. ***See also*** Jehoahaz; Jehoiakim; Josiah.

H.B.H.

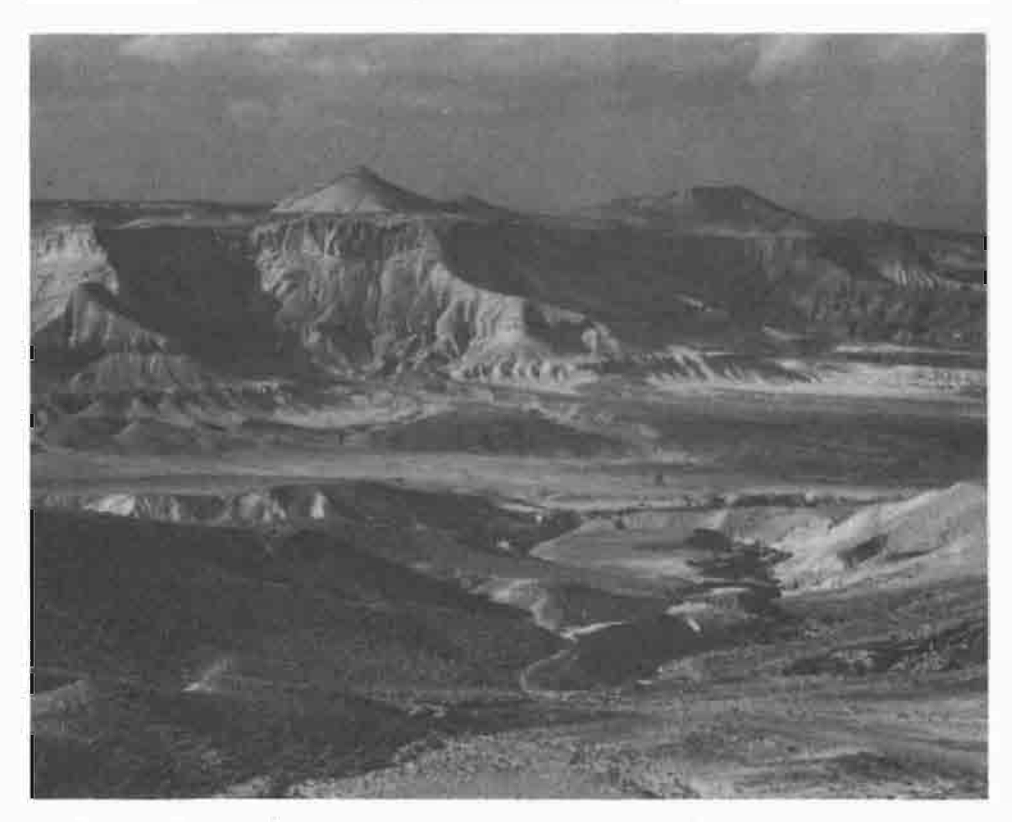
necromancy. *See* Magic and Divination.

needle's eye, a hyperbolic reference (Mark 10:25 and parallels) in a saying of Jesus on the difficulty of a rich man entering the Kingdom of God. There is no evidence for the view that it referred to a narrow gate in the walls of Jerusalem.

needlework, embroidery or other fine sewing. Needlework was used on the screen for the entrance to the tabernacle (Exod. 26:36) on blue, purple, and scarlet material with fine twisted linen. The same combination was specified for the screen at the gate of the court (Exod. 27:16) and Aaron's girdle (Exod. 28:39; see also Exod. 36:37; 38:18; 39:29). Knowledge and skill of fine needlework was found throughout the ancient Near East and still marks the dress garments of women in villages where distinctive patterns distinguish regions and sometimes specific towns. Fine needles of bone, copper, and bronze have been found in various archaeological contexts, confirming the widespread use of the skill.

R.S.B.

neesings (from "neeze," a Scottish term for "sneeze"), a term in the KJV where the RSV has "sneezings" in Job 41:18.



Negeb, the (neg´eb; Heb. *negev,* "dry, parched, south country"), the southern part of Judah, and the largest region in the modern state of Israel. The Negeb forms an inverted triangle with its base roughly following a line from Gaza past Beer-sheba to the Dead Sea. The line then runs south from the Dead Sea through the Wadi Arabah to the Gulf of Aqabah at Elath, and from there northwestward to Gaza. The Negeb is a hot, dry region that receives less than 8 inches of rainfall annually. Although dry, some portions of the Negeb can sustain limited agriculture; more usual is the pasturing of flocks.

Some evidence of settlement in the Negeb dates back as early as the Paleolithic period (100,000–10,000 B.C.). And scattered settlements are found from the Neolithic (10,000–4,000 B.C.) and Chalcolithic (4,000–3,000 B.C.) periods. In Middle Bronze Age I (2,000–1,800 B.C.), hundreds of unwalled settlements are found in the Negeb. Several factors seem to have led to the establishment of permanent settlements in the harsh climate of the Negeb. First, the presence of sufficient water from springs, wells, oases, or cisterns of sufficient capacity permitted settlement in many areas. Second, the proximity of important trade routes also led to permanent settlement. Towns would naturally be established to meet the needs of travelers and to protect the route. Third, many of the settlements or towns on the trade routes of the Negeb were established, or at least maintained, as fortresses. Numerous Iron Age fortresses with casemate walls have been discovered.

Several highways went through the Negeb. The most important was the Via Maris, the coastal road, which connected Egypt through Palestine with Mesopotamia and Anatolia. The Via Maris skirted along the western edge of the Negeb near Gaza. Three other north-south roads went through the Negeb. One ran from Jerusalem and Hebron to Beer-sheba and Nissana, and then connected with the Via Maris. Another road came from Hebron to Arad, Hormah, and then to the oasis at Kadesh-barnea. The third road followed the Wadi Arabah from the Dead Sea to Elath/Aqabah. The main east-west road was the Way to the Arabah, from Kadesh-barnea to Bozrah (modern Buseirah) in Edom. Just west of Kadesh, it connected with the Way to Shur, another route to Egypt. A minor road connected Elath with Kadesh; another connected Arad, Hormah and Beer-sheba with the Dead Sea eastward, and the Via Maris westward.

The Hebrews spent much of the wilderness wandering period (ca. 1290–1250 B.C.) around the oasis of Kadesh-barnea in the southern Negeb (Deut. 1:19, 46). The Amalekites, a seminomadic people, also lived in the Negeb (Num. 13:29).

During the period of the monarchy (Iron Age II, 1020–587 B.C.), many small villages and fortresses were established in the Negeb. The fortresses guarded the southern borders of Judah. The many villages and more intensive agriculture in the region suggest an expanding

The Negeb, the "dry, parched, south country," where the Israelites spent much of the wilderness wandering period.

population during the monarchy so that marginal land had to be farmed. These farmers knew the technique of terrace farming.

After the fall of Judah and during the Exile, the Edomites gained control of the Negeb. However, the area had limited population until the arrival of the Nabateans in the last couple of centuries B.C. The Nabateans resettled many sites and built additional villages. They were very adept at farming and pasturing the dry region by careful water conservation. Only during the Byzantine period did the Negeb support a larger population. After the Arab conquest, the Negeb declined and has supported only limited population until modern times. ***See also*** Kadesh; Wilderness. J.F.D.

Neginah (neg´i-nuh), apparently a term for a stringed instrument (cf. 1 Sam. 16:16, 23; Isa. 23:16). *Neginah* appears in various Psalm headings (Pss. 4; 6; 54; 55; 61; 67; 76) as well as at the end of the "Psalm of Habakkuk" (Hab. 3:19). Presumably it designates in these instances the manner of performance or accompaniment.

Nehemiah (nee´huh-m*i*´uh; Heb., "Yahweh comforts"), **the Book of,** in the Hebrew Bible, the second part of Ezra-Nehemiah, but a separate OT book in English translations. Many consider Ezra-Nehemiah as forming one work with Chronicles, but the nature of that relation is disputed. Nehemiah 8 and possibly 9 continue the story of Ezra from Ezra 7–10; this section is now enclosed within the Nehemiah narrative, though it is not entirely clear where the division is to be made. Thus, the book consists of several sections: chaps. 1–7, Nehemiah's commission and first governorship; chaps. 8–9, Ezra's reading of the law and a psalm of distress; chap. 10, a new covenant; and chaps. 11–13, the repopulation of the city of Jerusalem, dedication of the walls, and Nehemiah's second governorship. Various lists also appear whose relationship to their contexts is not entirely clear.

Dating Nehemiah's Activity: Nehemiah's activity is set in the reign of a Persian ruler Artaxerxes. It appears probable that this is Artaxerxes I (465–424 B.C.). If so, Nehemiah's first governorship began about 455 and lasted until 433 (Neh. 2:1; 13:6); his second began at an unspecified date after this. The decision for Artaxerxes I depends largely on the corre-

NEHEMIAH

lation with Sanballat of Samaria, whose sons were active in the later years of the fifth century B.C., as is shown by the Elephantine papyri. But there may have been more than one Sanballat who was governor of Samaria, so the possibility that Nehemiah belongs to the reign of Artaxerxes II (405/4–359 B.C.) cannot be ruled out. Josephus, the first-century A.D. Jewish historian, relates the story of Nehemiah separately from and after that of Ezra.

The Narrative: The book of Nehemiah is narrated in the first person. This is evidently a stylized form, like some royal inscriptions, designed to glorify this national hero; it may therefore be rather misleading to describe this material as a "memoir," as is often done. The passages that invited a blessed memory for Nehemiah (5:19; 6:14; 13:14, 22, 29, 31) are akin to votive texts, requesting divine blessing on particular individuals.

The story of Nehemiah can be summarized in the following way: Nehemiah, cupbearer to the king, is distressed at the ruined condition of Jerusalem. As a result he prays to God and then appeals to the Persian king, who grants him a commission and support to rebuild the walls of Jerusalem (1:1–2:8). Nehemiah's encounter with opposition and his survey of the walls and organizing of the rebuilding (2:9–3:2) are followed by opposition narratives involving Sanballat of Samaria, Tobiah of Ammon, Geshem of Arabia, and others (chaps. 4; 6). The reason for the opposition is not clear, nor is it entirely evident that the three main opponents really worked in concert. Indeed, Tobiah even appears to have had substantial support for his opposition to Nehemiah from within Jerusalem (6:17–19). Nevertheless, Nehemiah is shown as a governor engaged in reform and protection of the distressed (chap. 5). The account of the completion of the walls (7:1–3) has its real sequel in the narrative of their dedication (12:27–13:3). This narrative sequence is interrupted by an account of the repopulation of the city, introducing a list of the restored community (7:6–73) also found in Ezra 2. The story of Ezra in chaps. 8–9 further interrupts the narrative sequence of Nehemiah. Chap. 10 lists the subscribers to a new covenant and lays out its requirements. The repopulation theme is then resumed in 11:1–12:26, a passage that incorporates various lists of officials. 13:4–31 describes Nehemiah's second period as governor, noting the further opposition of Tobiah and his associates in Samaria, Nehemiah's reorganization of tithing, his insistence on Sabbath observance, and his action against foreign marriages.

There are many problems of interpretation in the Nehemiah narrative: among them are the sequence of events, the reasons for opposition, and the relationship of Nehemiah's activity to that of Ezra. The material concerning Ezra clearly constitutes a separate source, now partly integrated into the larger work.

Later traditions (Ecclus. 49:13; 2 Macc. 1–2) show further glorification of Nehemiah; in the latter he becomes the restorer of Temple and city after the Exile, and the collector of the Hebrew Scriptures. These roles are very similar to those elsewhere attributed to Ezra; comparable traditions related to the two founder figures seem to have developed among different groups within Judaism. In some circles Nehemiah was seen as a great patriotic hero. The presentation in the book of Nehemiah attributes to him royal and prophetic characteristics: prophetic actions (5:13) and royal-style activity in legal and religious reform (chaps 10; 13). A historical assessment is difficult to make. ***See also*** Chronicles, The First and Second Books of the; Sanballat; Tobiah.

OUTLINE OF CONTENTS

The Book of Nehemiah

- I. Nehemiah's commission and first governorship (1:1–7:73)
  - A. Nehemiah receives commission from Persian king to rebuild walls of Jerusalem (1:1–2:8)
  - B. Initial steps: opposition from non-Jews, secret survey of walls, organization of Jews for rebuilding (2:9–3:32)
  - C. Opposition from non-Jews and defensive tactics of Nehemiah (4:1–23)
  - D. Nehemiah's economic reforms among Jews (5:1–19)
  - E. Walls completed despite plots against Nehemiah by non-Jews (6:1–7:3)
  - F. Concern for repopulating Jerusalem: census of returned exiles (7:4–73)
- II. Religious observances in response to the law (8:1–10:39)
  - A. Ezra reads the book of the law to the people (8:1–12)
  - B. Resulting celebration of Feast of Booths (8:13–17)
  - C. A psalm of distress: public confession of sin (9:1–37)
  - D. A new covenant to keep the law and support the Temple (9:38–10:39)
- III. Further organization of the Jewish community (11:1–13:31)
  - A. Repopulation: lists of people and officials living in Jerusalem (11:1–12:26)
  - B. Dedication of city walls and arrangements for Temple revenues (12:27–13:3)
  - C. Nehemiah's second governorship: reforms in keeping with the law (13:4–31)

Nehiloth (nee'huh-loth), an instrument named in the KJV heading of Psalm 5; the RSV renders it "flute."

Nehushta (ni-hoosh'tuh), wife of king Jehoiakim of Judah and mother of king Jehoiachin (2 Kings 24:8). As queen mother she played an important role in the royal court; therefore she was exiled to Babylon along with her son (2 Kings 24:12) and the members of other prominent families.

Nehushtan (ni-hoosh'tuhn), the name of the copper serpent destroyed during the religious reforms of King Hezekiah (727–698 B.C.; 2 Kings 18:4). It was a cult symbol that stood, most likely, in the Temple court in Jerusalem for the people who assembled there. The account in Num. 21:8–9 states that its form was that of a (Heb.) *saraf,* or "fiery serpent." It appears to have been an apotropaic object, protecting those bitten by serpents (cf. Num. 21:4–9; John 3:14). Many modern scholars assume that it entered the Jerusalem cult from the Canaanite heritage.

neighbor, in the OT one who lives nearby (Exod. 12:4; Jer. 12:14; Prov. 27:10) or, figuratively, one who is a fellow Israelite (Exod. 2:13; 1 Sam. 28:17). In the latter sense, one is also termed "brother" (Lev. 25:25; Deut. 15:2–3; Neh. 5:1).

As members of a community united by divine covenant, law, and teaching, the Israelites' obligations to God were reflected in their moral obligations to each other. They were to be "a kingdom of priests and a holy nation" (Exod. 19:6). Thus, they were commanded concerning each other not to covet their neighbor's wife or possessions (Exod. 20:16–17; Deut. 5:20–21); not to hold a neighbor's garment for pledge past sunset (Exod. 22:25–26); not to steal, deal deceitfully, swear falsely (Lev. 19:11), or defraud (v. 13); not to gossip, or to be passive while injustice is being done to another (v. 16); not to hate one another (v. 17), to avenge or bear a grudge (v. 18), to take usury (Lev. 25:36–37), or to enslave (v. 39); not to oppress (vv. 43, 46), to withhold loans or charity (Deut. 15:7–11), or to ignore a neighbor's stray animal or lost property (Deut. 22:1–4). The Israelites were obligated to each other for the property placed in one's care (Exod. 22:6–14), "to love your neighbor as yourself" (Lev. 19:18), to help the poor through free loans (Lev. 25:35), or hiring the poor for pay (vv. 39–40), and the like. One who has harmed his neighbor will be punished in kind (Lev. 24:19–20, 22). God will destroy those who slander their neighbors (Ps. 101:5; cf. Prov. 11:9). To despise one's neighbor is to be devoid of wisdom (Prov. 11:12) and to sin (14:21). According to Zechariah 3:10, in the messianic age neighbors shall dwell together in peace.

When Jesus quoted Lev. 19:18, he broadened it beyond the bounds of fellow Israelites, as he made clear in the parable of the good Samaritan (Luke 10:27–37). For that reason, references in the NT to loving one's neighbor are to be understood as referring to any human being (e.g., Rom. 13:8–9; Gal. 5:14; James 2:8). ***See also*** Ethics. J.U.

Nekoda (ni-koh'duh). **1** A family group ("sons of Nekoda") of Temple slaves (Nethinim) who returned from the Babylonian captivity with Zerubbabel (Ezra 2:48; Neh. 7:50). **2** Another family group who also returned but who could not prove their ancestry (Ezra 2:60; Neh. 7:62). ***See also*** Nethinim.

Nemuel (nem'yoo-uhl). **1** A descendant of Reuben of the clan of Pallu (Num. 26:9). **2** A son of Simeon and head of the clan of the Nemuelites (Num. 26:12; 1 Chron. 4:24). He is also called Jemuel (Gen. 46:10; Exod. 6:15).

Neolithic (nee-uh-lith'ik; Gk., "new stone") **Age,** the latest of the three subdivisions of the Stone Age (beginning about 500,000–200,000 B.C.; cf. Paleolithic [ending ca. 25,000–12,000 B.C.]; Mesolithic [ca. 12,000–8000 B.C.]), during which pottery was invented and villages were formed. In Palestine it comprises generally the years 8000–4500 B.C. It was followed by the Chalcolithic period (4500–3000 B.C.) and the Bronze Age (3000–1200 B.C.).

Nepheg (nee'fig). **1** One of the sons of Izhar among the descendants of Levi, and brother of Korah and Zichri (Exod. 6:21). **2** One of David's sons born in Jerusalem to his enlarged household of wives and concubines (1 Sam. 5:15; 1 Chron. 3:7; 14:6).

Nephilim (nef'uh-lim), people of the pre-Flood generation, the offspring of daughters of men and divine beings (Gen. 6:1–4). Their generation and their conduct seem to have provoked the Flood as punishment (Gen. 6:5–8:22). In Num. 13:33 the Israelite spies describe the inhabitants of Hebron as Nephilim, so large and powerful that "we seemed like grasshoppers." The name could mean "fallen ones" and allude to stories in related cultures of rebellious giants defeated by the gods in olden times (cf. Isa. 14:12). ***See also*** Giant.

Nephtoah (nef-toh'uh), a water source on the boundary of Judah (Josh. 15:9) with Benjamin (Josh. 18:15). It is identified as modern Lifta with its spring three miles northwest of Jerusalem.

Ner (nuhr; Heb., "light"), the name of the Benjaminite father of Abner, Saul's military commander (1 Sam. 14:50–51; 26:5, 14). Nothing else is known of his life, and his relation to Saul is unclear. Suggestions include that he was Saul's uncle (1 Sam. 14:50, derived by textual adjustment there and at 1 Chron. 8:33) or that he was Saul's grandfather (by considering Kish to be a son of Ner in 1 Sam. 9:1; see also 1 Sam. 10:14–15).

Nereus (nee´ri-*yoo* s), a Christian who, with his sister, is greeted by Paul in Rom. 16:15. Possibly they are children of Philologus and Julia. ***See also*** Julia.

Nergal-sharezer (nuhr´gal-shuh-ree´zuhr), a Babylonian official. The name occurs three times in Scripture (Jer. 39:3 [twice], 13) as being among the officers present in Jerusalem during and after the siege of 587 B.C. The first occurrence is followed by what may be his official title; in the second and third, he is designated "Rabmag." A Rabmag official is mentioned in contemporary Neo-Assyrian and Babylonian documents as *rab-mugi* (meaning unknown). The Babylonian *Nergal-šar-uṣur* means "O Nergal, preserve the king!" Neriglissar is the anglicized form of the name taken from the Greek Nargalasar, with variants in the Septuagint at Jer. 46:3 and in the Masoretic Text at Jer. 39:3. Caution is advised regarding the proposed identification of the Nergal-sharezer of the Jeremiah passages with the future king of Babylonia (ruled 559–556 B.C.) of the same name since the name is borne by persons other than the king and no patronymic is given here. D.B.W.

Neri (nee´r*i*), an ancestor of Jesus (Luke 3:27).

Neriah (ni-r*i*´uh; Heb., "light of Yah [God]" or "Yah is light"), the father of Baruch, the scribe and associate of Jeremiah (Jer. 32:12; 36:4–32), and also the father of Seraiah, an officer of King Zedekiah (Jer. 51:59). ***See also*** Baruch.

Neriglissar (nuhr´ ig-lis´uhr). ***See*** Nergal-sharezer.

Nero (nihr´oh; A.D. 37–68), Roman emperor (ruled A.D. 54–68), the son of the fourth wife of the emperor Claudius, Agrippina. Nero would eventually murder his mother and wife Octavia in order to marry the beautiful Poppea, whom he also later murdered. The early part of Nero's reign, while Nero was under the influence of the philosopher Seneca, promised a rule of moderation in which the senate would have restored to it the powers usurped by Claudius. A change in Nero's conduct occurred in A.D. 62 and he tended toward public brutality and sexual licentiousness and demanded public adulation as a god. The handsome young emperor of the early coins changed into a somber figure, mouth shrinking into fat cheeks and an increasingly protruding chin.

The profile of the Roman emperor Nero portrayed on bronze sestertus (ca. A.D. 65).

Nero came under increasing criticism for his preoccupation with artistic activities such as drawing, painting, participating in musical and theatrical contests and for his preoccupation with chariot races. He mounted an artistic tour of the Greek East and also portrayed himself as following in the footsteps of Alexander the Great. However, Nero had none of the latter's interest in the conduct of war. He used the wealth of the empire to buy popularity with gifts of money to the praetorians and later to the populace of Rome, who were also pacified with cheap or free corn. A fire in Rome in A.D. 64 enabled Nero to use the land to build a grand palace, "the gold house." When Nero needed a scapegoat for the fire, he ordered the brutal execution of a number of Christians. Both the apostles Peter and Paul probably lost their lives in this persecution.

Faced with revolts in Britain, Gaul, and Spain and increasing unpopularity at home, especially among the army, which disliked this effeminate emperor, a despairing Nero fled Rome and took his own life. However, legends later circulated in the eastern provinces that Nero would return. Christian hostility to Nero as the epitome of excessive Roman power and brutality is evident in Revelation 13. The number of the beast, "666," forms an acronym for his name (Rev. 13:18). ***See also*** Revelation to John, The. P.P.

nests, the abode of birds. The term is used frequently in OT passages in both a literal and a metaphorical sense. The theme of birds and their nests or making nests reflects the awareness and deep appreciation of the natural world

commonly found in the literature of the ancient Near East, e.g., it is forbidden to harm a hen by taking her from her nest (Deut. 22:6). Assyria is likened to one robbing a nest (Isa. 10:14). Numerous species and their nests are referred to: an eagle stirring up her old nest (Deut. 32:11); doves building nests on the sides of the mouth of the gorge (Jer. 48:28); nests of the great owl and vulture on deserted sites (Isa. 34:15); nests of swallows on altars (Ps. 84:3).

Metaphorically the term "nests" is often used to refer to the abode of human beings: the people of Lebanon make their nests in the cedars (Jer. 22:23); the cautious man strives to set his nest on high (Hab. 2:9); and in a nest one shall grow old (Job 29:18). S.L.R.

Nethanel (ni-than´uhl; sometimes Nethaneel; Heb. *natanel*, "God gives"). **1** The son of Zuar (Num. 1:8) and commander of 54,400 men (2:5; 10:15) who took part in the dedication of the altar of the tabernacle (7:18–23). **2** The fourth son of Jesse, and a brother of David (1 Chron. 2:14). **3** A priest who was to blow the trumpets before the Ark (1 Chron. 15:24). **4** A prince of Judah sent by King Jehoshaphat (ca. 874–850 B.C.) to instruct all the cities of Judah in the "book of the law of the Lord" (2 Chron. 17:7–9). **5** A Levite, the father of Shemaiah (1 Chron. 24:6). **6** A Levite, the son of Obed-edom, a gatekeeper in the Temple (1 Chron. 26:4). **7** One of the Levites who contributed to the Passover offering in the time of Josiah (late seventh century B.C.; 2 Chron. 35:9; 1 Esd. 1:9). **8** The son of Pashhur, and a priest who married a foreign wife while in exile (Ezra 10:22; 1 Esd. 9:22). **9** The head of the priestly house of Jedaiah in the days of the high priest Joiakim (late sixth–early fifth century B.C.; Neh. 12:21). **10** A priest who took part in the dedication of the rebuilt wall of Jerusalem (Neh. 12:36). S.R.

Nethaniah (neth´uh-n*i*´uh; Heb., "God gives"). **1** The father of the man Ishmael who first joined, then attacked and killed Gedaliah, the ruler of Judah appointed by Babylonia (2 Kings 25:23, 25; Jer. 40:8–41:18). **2** A Temple musician, the son of Asaph (1 Chron. 25:2, 12). **3** A Levite sent by King Jehoshaphat to teach in Judah (12 Chron. 17:8). **4** The father of Jehudi, a messenger for Jeremiah (Jer. 36:14).

Nethinim (neth´in-im), a class of Temple servitors known from the books of Ezra, Nehemiah, and Chronicles. The term is derived from the Hebrew root *ntn* in the sense of "to give someone over into Temple service." Later traditions identified the Nethinim with the Gibeonites who tricked Joshua into sparing them (cf. Josh. 9). When their ruse was discovered it was decreed (Josh. 9:27) that they serve as hewers of wood and drawers of water for the community and the altar. Ezra 8:20 mentions the Nethinim "whom David and his officials had set apart to attend the Levites." Either the service of the Nethinim was organized in David's time, or he provided captives or other foreigners who joined this class. Jewish tradition mentions that 538 Nethinim returned from the Babylonian Exile. Scholars are divided as to whether the Nethinim were actually slaves, property of the Temple, or simply servitors like the Levites (cf. 1 Chron. 9:1–2). The mention of "the Kerosite" in the Arad ostraca may indicate the presence of Nethinim in the pre-exilic period (cf. Ezra 2:44; Neh. 7:47). At Ugarit there was a class of cultic servitors called *ytnm*, one of whom has a name that appears in the list in Ezra 2:45–46. It is therefore possible that the Nethinim were an international guild skilled in cultic arts who attached themselves to Israel in an early period. Similar also to the Nethinim in function are the *shirku*, known from Neo-Babylonian documents. According to the Mishnah (*Qidd.* 4:1), Nethinim could marry priests, Levites, or Israelites. Most likely, the Nethinim had been assimilated into Israel by Second Temple times (ca. 530 B.C.–A.D. 70) and they were no longer recognizable as a distinct class. L.H.S.

Netophah (ni-toh´fuh), a Judean hill village near Bethlehem (1 Chron. 2:54; Ezra 2:21–22; Neh. 7:26). It was the home of two of David's mighty men, Maharai and Heleb (2 Sam. 23:28–29; 1 Chron. 11:30). It was also the home of Gedaliah's supporter Seraiah, after Jerusalem's fall to Babylon (586 B.C.; 2 Kings 25:23; Jer. 40:8–9). Various levitical and other returnees from exile in Babylon counted it their home (Ezra 2:22; Neh. 7:26; 1 Chron. 9:16). It may be modern Khirbet Bedd Faluh some three and a half miles southeast of Bethlehem. The modern spring ʻAin en-Natuf may reflect the name.

nets. ***See*** Fish.

nettle, any of a group of stinging or thorny plants, usually of the genus *Urtica*. It is a symbol of desolation and inaccessibility (Prov. 24:31; Isa. 34:13; Hos. 9:6; Zeph. 2:9). In Job 30:7 nettles serve as protection for Job's opponents.

new birth. ***See*** Conversion.

new covenant, the term given by Jeremiah to a new arrangement between God and human beings in which the law would be written in their hearts rather than on tablets of stone (Jer. 31:31–33). It is also an alternate translation of the Greek words (*kainē diathēkē*) that are normally translated "New Testament." Christians see in Christ the beginning of the new covenant between God and human beings of which Jeremiah spoke. ***See also*** New Testament.

new moon. ***See*** Feasts, Festivals, and Fasts; Moon.

New Revised Standard Version (NRSV), a late twentieth-century English translation of the Bible. ***See also*** English Bible, The.

New Testament, the collection of writings comprising the second portion of the Christian Scriptures, the first part being the Old Testament (OT).

Origin of the Name: "New Testament" (NT) is a variant translation of "new covenant." The background of the concept is Jer. 31:31–34, a passage influential in both the Qumran community and early Christianity (1 Cor. 11:25; 2 Cor. 3:6; Heb. 8:8–13; 9:15; 12:24; cf. Luke 22:20 in some manuscripts). In the latter, the term new covenant is used of a new declaration of God's will in Jesus, not, at this early period, of Christian writings.

The transfer of the terminology to a collection of Christian writings was a natural extension, however, given Paul's use of "old covenant" to refer to the writings of the Mosaic covenant (2 Cor. 3:14), usage followed in the second century by the Christian writer Melito of Sardis. The transition may be tracked in an unnamed anti-Montanist writer of A.D. 160–180, quoted by the fourth-century church historian Eusebius, who speaks of not wanting to add to "the word of the new covenant of the gospel"; in Tertullian (second and third centuries A.D.), who says, "If I fail in resolving this article [of our faith] by passages which may admit of dispute out of the Old Testament, I will take out of the New Testament a confirmation of our view . . . both in the gospels and in the [writings of the] apostles"; and the great Christian scholar Origen's contention, "we take in addition, for the proof of our statements, testimonies from what are believed by us to be divine writings, that is, from that which is called the Old Testament and that which is called the New." By the fourth century, it was common practice to refer to the then canonical Christian writings as the NT.

Contents of the Canon: Although disagreements among Christians about the contents of the NT are fewer than about the OT, unanimity has not been reached (e.g., some branches of the Syriac church do not include 2 Peter, 2 and 3 John, Jude, and Revelation; certain Protestant scholars, following Martin Luther, who would not accept Hebrews, James, Jude, and Revelation as of equal authority with the rest, argue for a "canon within the canon," a smaller core that is truly normative within the larger twenty-seven-book whole). Roman Catholics by virtue of the Council of Trent (April 8, 1546) and most Protestants by virtue of custom (e.g., Anglican Articles 6: "All the books of the New Testament as they are commonly received, we do receive") accept a twenty-seven-book NT that corresponds to the list of Bishop Athanasius of Alexandria in A.D. 367.

The NT writings, when classified according to type, fall into three groups: biographical/historical (four Gospels, Acts), epistolary (Pauline Letters, Hebrews, general or "catholic" Letters), and apocalyptic (Revelation). When classified according to subject matter, the NT writings are grouped in terms of those that give accounts of the life of Jesus (four Gospels), the one that tells of the origins of the church (Acts), and those that represent the beginnings of Christian theology (Letters, Revelation). When classified as by the early church fathers, the NT consists of the Gospel (the four) and the Apostles (Acts through Revelation).

Order of the NT Writings: The NT writings are not arranged in the order of their composition. No certainty attaches to the chronology of NT writings, and opinions differ widely. At most, one can say that they fall into two groups: (1) the genuine Letters of Paul (here opinions range from the seven undisputed letters—Romans, 1 and 2 Corinthians, Galatians, Philippians, 1 Thessalonians, Philemon—to as many as ten, only the Pastorals [1, 2 Tim., Titus] being almost universally regarded as non-Pauline), which fall between the late forties and the early sixties, and (2) the remainder of the NT books, which fall between 65 and 150. If the NT's order was that in which the writings were penned, Paul's Letters would come first.

The present order of the NT is roughly chronological insofar as the subject matter is concerned. The life of Jesus (Gospels) precedes the history of the early church (Acts); the Letters reflect the life of the early Christians; and Revelation closes the canon with a grand vision of the ultimate future, paradise regained. Within this overall arrangement, the Gospels come first in the order Matthew, Mark, Luke, and John. Although this is only one of the seven orders in use in the ancient church, it was adopted by the Council of Laodicea (A.D. 363) and reflects an early tradition preserved by Origen that this was believed to be the order of the composition of the Gospels. This opinion was not that shared by all the fathers (e.g., Clement of Alexandria, according to Eusebius, who places Mark after Matthew and Luke). The Pauline Letters follow Acts and are arranged according to two principles. First, the Letters to the seven churches are separated from those to the three individuals. Then, within each category, the order is generally in terms of descending length. The one exception is that Galatians precedes Ephesians, although the latter is slightly longer. This arrangement of Jerome and Athanasius is but one of six ancient orders. The general or "catholic" Letters (James; 1, 2 Pet.; 1, 2, 3 John; Jude) circulated in antiquity in half a dozen different orders. Our order possibly reflects Gal. 2:9 (James, Cephas/Peter, John).

The arrangement of the whole (Gospels, Acts, Paul, general Letters, Revelation), one of seven orders in the ancient church, is that of the

Council of Carthage in 397 and was adopted by the Council of Trent (mid-sixteenth century). It places the historical books first, using Acts as an introduction to the apostolic Letters (Paul, Hebrews, general Letters) in order to emphasize the unity of the church, with Revelation last as the Christian's vision of the future hope. The various component parts of what later became the NT were associated with the parts of the OT (2 Pet. 3:16; all Paul's Letters and the other scriptures; First Apology of Justin Martyr: memoirs of the apostles or the writings of the prophets), and the NT as a whole was patterned after the Law and the Prophets (Tertullian: "the law and the prophets she [i.e., the church] unites in one volume with the writings of the evangelists and apostles"; similarly Irenaeus).

The different divisions of the material within the NT books are not ancient. The chapter divisions are usually attributed to Cardinal Hugo de San Caro, who in A.D. 1248 used them in preparing a Bible index, but he may have borrowed them from the earlier archbishop of Canterbury, Stephen Langton. The modern verses derive from Robert Estienne (Stephanus), who, according to his son Henry, made the divisions while on a journey on horseback from Paris to Lyons. They were first published in Stephanus's Greek Testament of 1551 and first appeared in an English translation of the NT in William Whittingham's version of 1557. The first complete Bible in English with our verses was the Geneva Bible of 1560. The punctuation in the modern text is an editorial decision, there having been almost no punctuation in the ancient manuscripts. Likewise, the paragraphs in some versions are a modern editorial decision. Sometimes these divisions are an aid to understanding; sometimes they are a hindrance.

The Language of the NT: The NT books were all written in Greek, not classical Greek but Hellenistic Greek, with kinship both to the literary and to the unliterary *koine* (i.e., the Greek spoken in the Mediterranean basin ca. 300 B.C.–A.D. 300), as well as openness to influences from the Greek OT, the Septuagint. Although Jesus and his earliest followers probably spoke Aramaic, in their present form in the Gospels even the words of Jesus are given in a Greek form. The writings that comprise the NT are products, then, not of original Aramaic-speaking Christianity but of later Greek-speaking Christians. The original readers/hearers were Greek-speaking peoples, mostly Christians, some Jewish Christians and some Gentile Christians, with thought worlds that differed greatly from one another. The idioms through which Matthew, John, Paul, Hebrews, James, and Revelation communicate are as different as daylight and darkness, even if the words of all are Greek.

Authorship: The authors of most NT books are unknown except in the most general terms. At least seven Letters can be linked with the apostle Paul. The others associated with his name are usually attributed to his disciples who followed the common Mediterranean practice of writing in the name of a revered teacher. Of the two Letters claiming to be from Peter, only one (1 Peter) has any chance of being linked to the apostle; the other (2 Peter) is perhaps the latest writing in the NT, often dated as late as A.D. 100–150. The four Gospels, Acts, Hebrew, and the three Johannine Letters make no claim as to their authorship. Second-century Christians, beginning with Papias (A.D. 140), linked the First Gospel with Matthew, one of the Twelve, and the Second Gospel with Mark, a disciple of Peter. Irenaeus (ca. A.D. 180) continued Papias's views about Matthew and Mark and added his belief that Luke, the follower of Paul, put down in a book the gospel preached by that apostle, and that John, the Beloved Disciple, published his Gospel while residing in Asia. By the time of Irenaeus, Acts was also linked with Luke, the companion of Paul.

Clement of Alexandria (ca. A.D. 190–202) expresses the Egyptian view that Hebrews was by Paul in Hebrew and that Luke translated it into Greek. Origen (early third century) is aware of the claim that 1 John was written by the apostle John and of the problems with linking 2 and 3 John with the apostle. Although the Letters of James and Jude and the Revelation to John claim to come from James, Jude, and John, the unanswered question is: which James, which Jude, and which John? As early as Justin Martyr (mid-second century), Revelation was attributed to the apostle John. As late as the fourth century, James and Jude were treated among the disputed books, something unlikely if the writings were apostolic in origin. On the basis of the evidence supplied by the writings themselves, as opposed to that offered by the church fathers, little can be said about the identities of the authors of most of the NT writings. From the point of view of authority for the church, however, authorship is irrelevant. It is a document's presence in the canon that is decisive.

Authority: None of the authors of NT books wrote with any thought that his contribution to early Christian life would be something that would eventually be collected into a body of Scripture that would be authoritative for all Christians in all times and places. Each wrote with specific recipients and a specific situation in mind. In this sense, all of the NT documents are occasional literature. At the same time, in many cases it is clear that the authors wrote with a definite sense of the authority of their contributions. In 1 Cor. 9:9, 14, the words of Jesus are regarded as authoritative alongside the Law. Paul wrote with a sense of setting forth an authoritative teaching, one applicable for all his churches (1 Cor. 4:17; 7:17; 11:16; 14:33). Rev. 22:18–19 is the clearest statement claiming divine authority in the NT. Luke-Acts, in setting forth the true tradition of Jesus as passed down through the apostles to the Ephesian elders

(Acts 20:17–35), implies the normative status of this tradition (and in a Gospel-Apostle form). Later canonization merely functioned as ecclesiastical confirmation of the individual author's conviction.

The NT writings were not immediately gathered into a canon of Scripture. From our vantage point, they are only the cream selected from a much larger body of Christian literature of antiquity that included what we know as the Apostolic Fathers, the Apocryphal NT, and the Apologists. The selection process was gradual. Sometime near A.D. 100, Paul's Letters were probably collected and published for the larger church. This collection would have possessed authority for the circles in which it was used.

By the middle of the second century, a collection of the four Gospels was made. At this time, Luke was separated from Acts so that thereafter Acts had a life of its own. If one takes seriously the claim of Tertullian, some type of Christian canon existed before Marcion—a canon that the heretic cut down to his own canon of an expurgated version of Luke and ten "corrected" Letters of Paul. If one does not accept Tertullian's claim, then by the end of the second century, partially in reaction to Marcion, a NT canon of some sort existed. This canon was a collection of collections (the four-fold Gospel, the Pauline Letters, and Revelation, which was itself a collection of seven letters and seven visions), with the Pauline Letters introduced by Acts and supplemented by several general Letters to counter Marcion's exclusive focus on Paul. The Christian writings that were produced within a period of seventy-five to one hundred years, in contrast to the period of nearly one thousand years for the production of the OT documents, were now on the road toward acceptance in a twenty-seven-book NT canon normally used by Western Christians today. The first time that we know of a list containing precisely these twenty-seven books is in Athanasius's Easter letter of A.D. 367.

Early Manuscripts and Later Editions: We do not possess any autographs (originals) of NT writings. We have only copies of copies of copies. There are about five thousand Greek manuscripts of the NT that exist in part or in whole. The earliest are the papyri (e.g., P^{46}, an early-third-century copy of most of Paul's Letters and Hebrews; P^{66}, a copy of parts of John from A.D. 200; P^{72}, a third-century copy that includes Jude, 1 and 2 Peter; P^{75}, a copy of much of Luke and John from about A.D. 200). The next oldest are the uncials, written on vellum (leather scraped smooth). They are called uncials because of the block capital letters in which they are written. The uncial manuscripts include Codex Vaticanus, or B, a fourth-century manuscript originally containing the entire Bible, and Codex Sinaiticus, or, א, another fourth-century manuscript of the entire Bible. The latest manuscripts are the minuscules, dating usually from the ninth century and later, so called because they are written in a cursive script. On the basis of these handwritten manuscripts, modern Greek NTs are made, and from the modern Greek NTs translations are made into English and other languages. The first printed edition of the Greek NT was that of Erasmus in 1516. Today, the two most widely used Greek NTs are those of Nestle-Aland and the United Bible Societies, which in their twenty-sixth and third editions, respectively, agree in their text of the NT.

The New Covenant: The NT speaks about the new covenant God established with his people (as foretold in Jer. 31:31–34). Whereas the covenant instituted through Moses at Sinai was based on the gracious initiative of God in the Exodus (Exod. 20:2; Deut. 5:6) and was broken by a faithless people (Jer. 31:32), the new covenant is rooted in God's grace in and through Jesus the Christ (1 Cor. 11:25) and is enabled by a new ingredient. In the new covenant, God not only graciously set people in relationship with himself but also acted at Calvary, on Easter, and at Pentecost so as to assume responsibility for his people's faithfulness to the relationship. This good news is variously expressed in the Christian Bible: for example, God puts his law within his people, writing it on their hearts (Jer. 31:33); there is a new covenant, not in a written code but in the Spirit (2 Cor. 3:6); the Christians' righteousness or faithfulness to the relationship is enabled by the indwelling Christ whose faithfulness to God in the days of his flesh is now lived out in and through the believers (Phil. 3:9; Col. 1:27); life in the new covenant is an abiding in Christ in which he abides in the believers, enabling them thereby to bear fruit (John 15:4–5). ***See also*** Aramaic; Bible; Biblical Criticism; Canon; Chronology, New Testament; Covenant; Gospel, Gospels; Greek, New Testament; Letter; Septuagint; Texts, Versions, Manuscripts, Editions; Theology, New Testament.

New Testament quotations in patristic authors. The use of the NT by the early Christian writers (up to the fifth century) is important to the study of the NT in three major ways: first, their allusions to or citations of the NT documents (and other early Christian literature) provide vital information for the study of the development of the NT canon; second, they provide crucial data for NT textual criticism (the study of the transmission of the text of the NT and the search for its original form); and, third, they elucidate the history of interpretation, both of the science of interpretation as a whole as well as of individual passages.

The NT Canon: The most difficult period for the reconstruction of the history of the NT canon is that from the writing of the documents themselves (ca. A.D. 50–95) up to the latter part of the second century (ca. A.D. 180). This is also the period of the greatest flexibility in the use of these documents in the church. The reason for this is due mostly to the fact that the need for such specifically Christian authority was a developing process, and therefore the use of the documents as authority for the church reflects this development.

The earliest writers outside the NT (Clement of Rome [A.D. 96]; Ignatius of Antioch [ca. A.D. 115]; the author(s) of the *Didache* [ca. A.D. 100?]) regularly cite the OT as Scripture, inspired of the Holy Spirit, but they merely mention, or allude to the content of, the documents that are later to become the NT. Thus Clement tells the Corinthian church at the end of the first century to "pick up the letter of the blessed apostle Paul. . . . Under the Spirit's guidance, he wrote to you about himself and Cephas and Apollos" (*1 Clem.* 47:2–3). This is a clear reference to our 1 Corinthians, which means that at the end of the first century this Letter of Paul was being read by the churches both in Rome and Corinth. Clement also cites the teaching of Jesus as authoritative. For example, he cites some sayings (*1 Clem.* 13:2) that have clear affinities with Luke 6:36–38; however, the differences are so noteworthy that it seems clear that he is not citing Luke but rather still has access to similar (probably oral) traditions that had earlier been available to Luke as well. Thus Clement is clear evidence that Jesus and Paul had continuing authority in the church at the end of the first Christian century; however, it is likewise clear that the author of Clement did not yet think in terms of a *New* Testament.

This same attitude generally prevails in the available writings throughout the first half of the second century. However, at the same time one can see some developments in attitude toward these documents that would eventually become the NT. For example, Polycarp of Smyrna, in his Letter to the Philippians (ca. A.D. 135), alludes to, or loosely quotes from, several of the NT documents (Matthew, Mark, Luke, Acts, the Pauline Letters, Hebrews, and esp. 1 Peter); and these are so thoroughly interwoven throughout the whole Letter, in precisely the same manner as citations from the OT, that there can be no question that his spiritual life had been deeply nourished by these books. This is also true of Justin Martyr (ca. A.D. 155), who cites profusely from an apparently harmonized version of the first three Gospels.

By the time one comes to Irenaeus of Lyons and Clement of Alexandria toward the end of the second century, the concept of canonicity has now clearly emerged. Both Irenaeus and Clement cite the NT documents in such a way as to make it clear that for them they held authority in the same way as the OT, and Irenaeus in particular specifically argues for the "canonicity" of the fourfold Gospel. In the next generation, Tertullian in North Africa and Origen in Alexandria (and later Caesarea) both cite and use the NT as the documents that form the fountainhead of the Christian faith. Indeed a part of Origen's legacy to the church are his commentaries and homilies on most of the NT books, a few of which are still extant. (It should be noted that there will be yet another century and a half before the final shape of the NT canon has been determined.)

NT Textual Criticism: The quotations of the NT by the early Christian authors are an especially valuable source for the science that attempts to reconstruct the original text of the NT. Such quotations are a third line of evidence for this task, along with the Greek manuscripts themselves (actual copies of the Greek NT) and the early versions (the earliest translations of the NT into such languages as Latin, Syriac, and Coptic). The value of the patristic citations is that they give us datable evidence from specific points of geography, so that one may have a fairly good idea of the nature of the NT text in that region at a given time in history.

There are also some difficulties with this evidence, however, especially in evaluating it. First, there is a problem with the writers themselves: one cannot always be sure whether an author is copying from his Bible or citing from memory. Furthermore, the citing habits of authors are about as diverse as one meets in contemporary sermons. Some quotations are very precise: others are close, but reflect lack of concern for exactness; still others are notoriously loose. Second, there is the fact that the writings of these authors have themselves also gone through a long process of transmission, so that

one cannot always be sure that our extant copies now represent exactly what the author wrote or whether the biblical citations were modified by the copyists to conform to later texts.

Nonetheless, after all of these factors are taken into consideration, there still remains enough certain evidence to help put some pieces into place. During the second century the citing of the NT tended to be more relaxed, quite in keeping with the development of the canon itself. That is, although in this early period the documents were clearly authoritative, they had not yet attained a full canonical status, so an author, who may have tended to cite the OT rather exactly, cited the NT documents much more loosely. In fact, it is this phenomenon that is partly responsible for a large number of the variant readings that exist in the textual tradition. But by the time of Irenaeus, Tertullian, and Origen all of this had changed. Origen, in particular, cites his NT generally with great precision and is a significant witness for the text as it circulated in Alexandria in the first half of the third century, and later in Caesarea, where he moved in A.D. 230 and lived out the rest of his life (he died ca. 255). And even among the later writers with the loosest kinds of citing habits, such as Epiphanius of Salamis (ca. 310–403), who cites some texts in as many as seven different ways and seldom ever cites precisely, one can still determine the general character of the NT they used.

What we learn from this evidence is that two distinct forms of the NT text existed in the East and West. The last authors in the West to write in Greek (Hippolytus of Rome and Irenaeus) both used Greek texts that looked very much like those that lay behind the earliest Latin versions. Tertullian, and all subsequent writers in Latin, are clearly dependent on these Latin versions.

A different picture emerges in the East. A distinct text emerged in Egypt that looks very much like a good preservation of the original texts themselves. This text is found in Origen, as well as in the earliest Greek manuscripts from this area. However, when Origen moved to Caesarea, he began to use a NT there that differed considerably from that in Alexandria. A similar, somewhat mixed text can also be found in other early writers from this area (Eusebius of Caesara [265–340], Epiphanius [ca. 310–403], Basil [ca. 330–379], the Gregorys [fourth century]). At a still later date a text was being used by Chrysostom in Antioch (A.D. 347–407) and then in Constantinople that looked much like that of Basil and the Gregorys, but had been modified considerably, so that it was about seventy-five percent along the way to the text that would eventually dominate in the Greek church and that lay behind the King James Version of the NT.

The History of Interpretation: The actual use of the NT for theology and church practices is a vast area of research in its own right. Most writers used their Bibles in a variety of ways, depending on the kind of circumstances to which they were addressing themselves.

There had in fact been a long tradition in Judaism that had learned to accommodate Scripture to culture and contemporary thought forms by allegorizing the biblical text. Philo of Alexandria (first century B.C.–first century A.D.) had especially paved the way for this in the Diaspora, and methods like his were also in vogue among the influential Christian teachers from this city (Clement and Origen). The result was that much of the church, with the notable exception of the school at Antioch beginning in the third century, learned to interpret Scripture in this fashion.

Thus, in the learned Origen, for example, one can find this remarkable interpretation of Jesus' "going down to Capernaum" in John 2:12, based partly on a desire to harmonize John with Matthew and Luke and partly on his "spiritual" reading of the Fourth Gospel: since this word seems to stand in contradiction to the accounts of Jesus' movements in Matthew and Luke, one must look for a meaning different from the literal one. The answer is to be found in the meaning of the name "Capernaum," which means "field of consolation." Therefore, what John meant was that after the wedding in Cana Jesus went down to "console those whom he was training to become disciples."

But far more often common sense tended to prevail, and Scripture was appealed to, and quoted, because of what appeared to be its plain meaning. This is especially true of quotations in the form of exhortations (e.g., Polycarp, *Phil.* 2:3: ". . . remembering what the Lord said as he taught: 'Judge not that you be not judged,'" citing Matt. 7:1), or in appeals to the events of Christ's life and ministry, or to the basic theological statements of the Christian faith. Such common sense also prevails in the course of controversy, especially among Christians, where the plain meaning of the text is frequently appealed to over against what is believed to be the distorting of the text by one's opponents.

Patristic writers were as capable of citing texts out of context as are moderns and therefore often seemed to miss their original point; but overall the citation of the NT among the church fathers was an expression of good sense. The most useful of all these citations for modern study of the NT are to be found in John Chrysostom (d. A.D. 407), who was schooled in Antioch and later became appointed preacher in Antioch and then patriarch in Constantinople. His homilies are models of diligent search for the intended meaning of the text and of courageous application of that meaning to his contemporaries. Because of this his comments on the NT found in his many homilies of most of the NT books are still worth reading, and often he

provides keys to the meaning of the Greek text that might otherwise have been lost to history.
A Bibliographic Note: Because of the importance of these early citations of the NT both for the study of the NT text and for the history of interpretation, an index of several volumes is currently being prepared under the auspices of the Centre d'Analyse et de Documentation Patristiques (Paris, 1975–), entitled *Biblia Patristica, Index des Citations et Allusions Bibliques dans la Littérature Patristique.* This index is particularly thorough and includes every imaginable allusion to a NT passage, as well as citations and adaptations of various kinds. For the complete indexes of the patristic writers and their works, one should consult the *Clavis Patrum Graecorum* (for the Greek writers; 3 volumes; Turnhout [Belgium]: Brepols, 1976–1984) and the *Clavis Patrum Latinorum* (for the Latin writers; Brugge [Holland]: Beyaert, 1961). For further information on the church fathers themselves, their lives, works, and theology, see J. Quasten, *Patrology* (3 vols.; Westminster, MD: Newman Press, n.d.). ***See also*** Canon; Texts, Versions, Manuscripts, Editions. G.D.F.

New Testament theology. *See* Theology, New Testament.

New Year Festival (Heb. *Rosh Hashanah,* "the beginning [lit. 'head'] of the year"), the festival celebrated on the first day of the month of Tishri (Sept.–Oct.), the seventh month of the Jewish calendar. Basic regulations for the observance of the New Year Festival appear in Lev. 23:23–25 and Num. 29:1–6. These texts refer to the festival as "a holy convocation" or "the day of trumpet blasts." It is a day of rest on which no work is to be done. Sacrificial offerings include one young bull, one ram, and seven male lambs together with their respective cereal offerings. In addition, a male goat is to be sacrificed as a sin offering.

There is some confusion in the biblical tradition concerning the New Year Festival. The first of Tishri is nowhere designated as New Year's Day in the Bible. The term *Rosh Hashanah* appears only in Ezek. 40:1 where it refers to the general time of the year, but not specifically to the New Year Festival. According to Exod. 12:2, the month of Abib, later known as Nisan (March–April), is the first month of the year, but no New Year Festival is prescribed for the first of Nisan. The first of Nisan, however, is the beginning of the eleven-day Babylonian New Year Festival. This has prompted some scholars to suggest that the biblical New Year originally fell on the first of Tishri but at some time, probably during the Babylonian exile, the observance shifted to the first of Nisan to conform with Babylonian practice. Others argue that the original New Year was in the spring and later shifted to the autumn. A third position distinguishes two types of New Years. The first of Nisan was the regnal New Year, by which the reigns of kings were reckoned, and the first of Tishri was the religious or agricultural New Year for reckoning the liturgical calendar. In this respect, it is noteworthy that the Mishnah (*Rosh. Hash.* 1:1) identifies four New Years, including the first of Nisan, the New Year for kings and festivals, and the first of Tishri, the New Year for agriculture and reckoning the reigns of foreign kings.

Another issue concerns the relation of the biblical New Year Festival to the Babylonian New Year or *akitu* festival. This festival, held in the spring from the first to the eleventh of Nisan, emphasized the renewal of creation and kingship. The celebration featured a liturgical recitation and reenactment of the Babylonian creation epic in which Marduk, the city god of Babylon, defeated the chaos monster Tiamat and set the cosmos in order. The festivities also included a ritual procession around the city, a ritual humiliation of the king, and a ritual marriage of Marduk atop the ziggurat of Babylon. At the end of the festival, the king received the tablets of destiny that assured his rule for another year. Some scholars have attempted to argue that a similar New Year Festival was observed in Jerusalem during the monarchical period, but the evidence does not support such a claim. It is more likely that the biblical New Year Festival was a harvest celebration associated with the Day of Atonement (Lev. 23:26–32; Num. 29:7–11) and the Festival of Booths (Lev. 23:33–43; Num. 29:12–38; Deut. 16:13–15; cf. Exod. 23:16; 34:22). ***See also*** Babylon; Nisan; Tiamat; Time; Tishri. M.A.S.

Nicanor (n*i*-kay´nuhr). **1** Son of Patroclus, one of the king's friends (1 Macc. 3:38; 2 Macc. 8:9), a Syrian general assigned by the Seleucid king Antiochus IV Epiphanes to suppress the Maccabean uprising in Judea. He was associated with two other high officers, Ptolemy (the son of Dorymenes) and Gorgias. Both 1 Maccabees 4 and 2 Maccabees 8 tell, although with somewhat different details, the story of Judas Maccabeus's rout of their forces near Emmaus in 166 B.C. Nicanor returned later with another army but was decisively defeated in the battle of Beth-horon on 13 Adar (March), 161 B.C. Judas Maccabeus's triumph on what came to be known as "Nicanor Day" and the mutilation and exposure of Nicanor's remains end the account in 2 Maccabees victoriously; in fact, however, swift retaliation by the Syrian commander Bacchides a few months later at Beroea brought Judas's life to an end. ***See also*** Maccabees; Seleucids. **2** According to Acts 6:1–6, one of the seven appointed by the Jerusalem church to administer the daily distribution of food. F.O.G.

Nicodemus (nik´uh-dee´muhs), a Pharisee, a teacher of Israel, and a ruler of the Jews as de-

scribed in the Gospel of John. Nicodemus questions Jesus (John 3), later defends him (7:50–52), and finally appears with Joseph of Arimathea to prepare his body for burial (19:39).

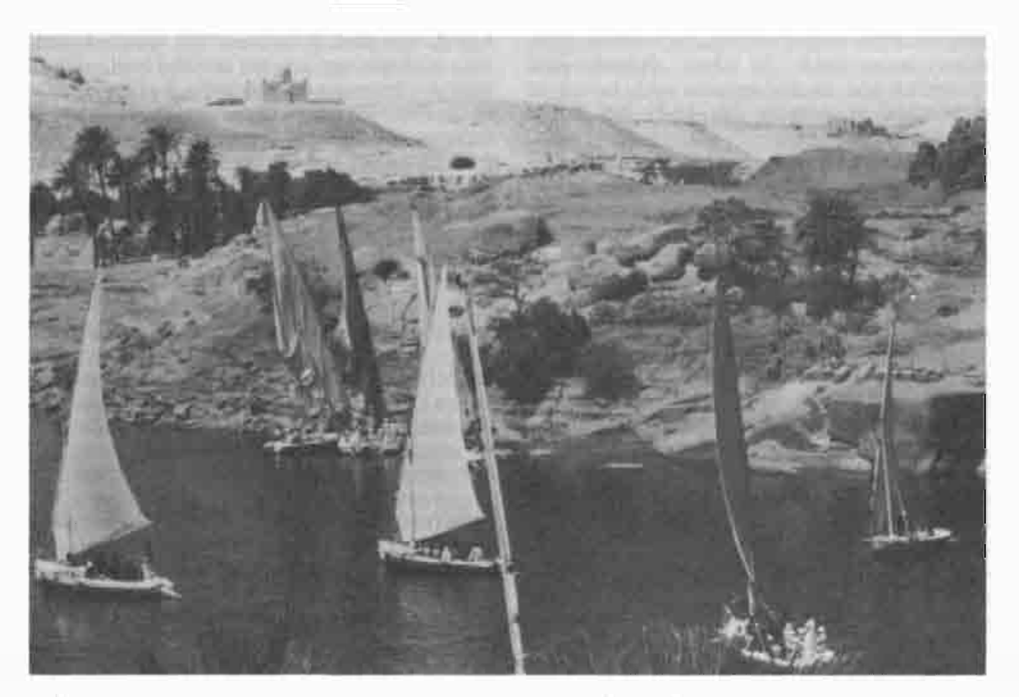
Mentioned only in the Fourth Gospel, Nicodemus plays a significant role in that he apparently personifies a learned Jewish constituency that was well disposed toward Jesus but did not understand him adequately (John 3) and had not reached the point of confessing him publicly as the Christ. Perhaps Nicodemus and Joseph of Arimathea, who is said to be a disciple of Jesus secretly "for fear of the Jews" (19:38), represent exactly the kind of timid disciple the author of John wished to persuade to come out openly for Jesus. Yet, the initial confusion of Nicodemus, who could not comprehend Jesus' talk about being born anew or from above (3:4, 9), was never explicitly overcome. At most, the Evangelist allowed for the possibility that it would be. ***See also*** Joseph; Regeneration. D.M.S.

Nicolaitans (nik´uh-lay´uh-tuhnz), a religious sect in Ephesus and Pergamum whose members were denounced in Rev. 2:6, 15 for eating food sacrificed to idols and for sexual license. The church fathers considered them followers of Nicolaus of Antioch mentioned in Acts 6:5 and founders of libertine Gnosticism, which remained active beyond the second century. Though this suggestion is possible, not many scholars would regard it as historically reliable. ***See also*** Revelation to John, The; Ephesus; Pergamum.

Nicolaus (nik´uh-lay´uhs; KJV: "Nicolas"), one of the seven men selected in the early days of the Jerusalem church to administer the distribution of food to the poor, including the widows, under the supervision of the apostles (Acts 6:1–6). His designation as a "proselyte" indicates that he was a Gentile. ***See also*** Hellenists; Proselyte.

Nicopolis (ni-kop´uh-lis; Gk., "city of victory"), according to Titus 3:12, the place Paul hoped to winter in and where he asked Titus to join him. The request is strange, however, in a letter instructing Titus concerning his ministry in Crete (Titus 1:5). Several towns were named Nicopolis, but this reference is almost certainly to the town founded in Epirus (west-by-northwest of Corinth) by Octavian in 31 B.C. commemorating his victory over Antony at nearby Actium. 2 Tim. 4:10 may indicate that Titus joined Paul in Nicopolis and then went to Dalmatia, but this notice (see also 1 Tim. 3:14) can hardly be harmonized with itineraries of Paul or Titus suggested by Acts and Paul's acknowledged letters. ***See also*** Titus. J.L.P.

Niger (n*i*´guhr), another name for Simeon, a leading prophet or teacher in the church at Antioch (Acts 13:1). ***See also*** Prophet; Simeon.



night, the period between the darkness that falls after the sun has set and the beginning of the light that precedes the dawn. It is a metaphor in the Bible for a time of danger (Ps. 91:5) and of sadness (Ps. 30:5); of the absence of God (John 9:10; cf. 13:30) and the presence of death (Luke 12:20); of visions (Dan. 7:7) and of dreams (Matt. 2:12) that communicate divine things. For that reason, in the description of the new Jerusalem, the seer affirms that there will be no more night (Rev. 21:25; 22:5), since God will be present with his people, to protect and communicate with them. ***See also*** Time. P.J.A.

nighthawk, one of a number of birds regarded in the OT as unclean and thus unfit for human consumption (Lev. 11:13–19; Deut. 14:12–18). Its exact identity is unknown; some have conjectured it designates some species of owl.

Nile (n*i*l), the great river of Egypt flowing north from its sources in Lake Victoria in Uganda and in the highlands of Ethiopia, a distance of 4,037 miles, the entire length of the Sudan and Egypt, to the Mediterranean. The two major branches, the White Nile (from Lake Victoria) and the Blue Nile (from Ethiopia), merge at Khartoum, with one modest tributary somewhat farther to the north and none at all in Egypt itself. Beyond Khartoum the Nile flows through several cataracts, inhibiting navigation but not preventing it. The last cataract is at Aswan, the beginning of the Nile Valley proper. (Because the Nile flows from south to north, the southern Nile valley is referred to as Upper Egypt.) From here on the Nile flows north in a well-developed valley with cliffs on either side almost as far as Cairo, and the river becomes important for its overflow and the hydraulic irrigation of the adjoining floodplain. Within the Nile Valley the river is fairly constant at about six-tenths of a mile in width, whereas the valley varies from six to nine miles across.

Most of the agricultural land is on the west bank, since the river generally flows closer to the eastern cliffs. The wider western floodplain benefits, in a number of areas, from secondary channels of the river. The best known of these is the Bahr Yusuf, which formerly flowed into the Faiyum, a large, well-watered area with a permanent lake somewhat south of Cairo, extending about fifty miles into the western desert. From Cairo (the area of ancient Memphis and On) the river fans out into a great delta, ultimately over one hundred and fifty miles wide. (The delta is referred to as Lower Egypt.) Here the ancient branches were rather more numerous than today, as several are dried up, including the Pelusiac branch, that were first encountered by travelers from Palestine into Egypt.

Today the delta has a high water table and extensive areas occupied by lakes and swamps. Presumably the situation was similar in antiquity. Following the spring rainfall in the highlands of

Sailing boats in a contemporary photograph of the Nile in front of the Elephantine Island near Aswan, Egypt, the beginning of the Nile Valley proper.

East Africa, the Nile at Aswan rises over 18 feet and reaches its peak flow in mid-September, with the low point coming in late April. Prior to the building of the modern dams the Nile overflow brought a tremendous amount of new sediment and minerals each year (about 185 million tons) and therewith renewal for the agricultural land. But an inundation that was too high, too low, or unseasonal could mean disaster. Nonetheless, almost all the people lived in the Nile Valley or the delta and owed their very existence to the Nile. Even in the delta the yearly rainfall is 8 inches or less, and in the southern Nile valley there is virtually no rain.

The Nile is also the major highway of Egypt. Movement north and south along the floodplain was certainly possible, but on any extensive journey frequent crossings of the Nile were required. Heavy goods of course were transported on the river. Indeed, the great building projects of Pharaonic Egypt were dependent on easy movement of massive loads by Nile barges. During the inundation the Nile could deliver great loads to virtually any site along the valley. The importance of Nile transport is indicated by the representations of boats in tombs, the burial of special boats alongside the pyramids, and the provision in the temples of storage places for the boats used by the gods in their journeys. It was the Nile that bound Egypt together.

In biblical times the sources of the Nile were unknown. The Egyptians themselves had practical knowledge of the Nile well into the Sudan, but the Nile was so essential to them and so mysterious that it was also seen in special ways. In some texts the floodwaters of the Nile are described as rising out of caverns at the Aswan cataract. Even the Nile in the delta area was thought to have a special origin near On (Heliopolis). Special nilometers were maintained at strategic points, such as near Memphis in the north and on the island of Elephantine at Aswan, so as to estimate in advance the height of the inundation. As Egyptian power expanded southward into Nubia, additional observation points were established at the second and even the fourth cataracts. But even with advance warning a high Nile might prove destructive and a low Nile remain insufficient.

The Nile inundation, the river's dynamic essence, was personified in the god Hapy. Hapy, the Nile's fecundity, was represented as a well-fed figure, apparently both male and female, often colored green or blue, the colors of life. Hapy is a representative of Nun, the primeval water itself. But it is striking that although Hapy is depicted in most of the temples, Hapy had no special temple. The seasonal festivals recognizing the Nile took place at a number of points along the river, with various offerings, amulets, and figurines. At times there was even human sacrifice to the Nile.

The Nile was well known in biblical tradition and to the biblical writers. There are many references to the Nile and its impressive flooding, unlike any rivers of Palestine (e.g., Jer. 46:7–8;

Amos 8:8). Punishment of Egypt might mean that God would dry up the Nile (Isa. 19:5), and the ultimate arrogance of the Pharaoh was his claim that "my Nile is my own; I made it" (Ezek. 29:3). In the time preceding the Exodus, Pharaoh commanded that every Hebrew male child should be cast into the Nile (Exod. 1:22), though Moses was providentially rescued by being placed in a basket of bulrushes (Exod. 2). The signs and wonders, including turning Nile water into blood (Exod. 4:9; 7:14–22), struck at the very lifeline of Egypt. ***See also*** Egypt.

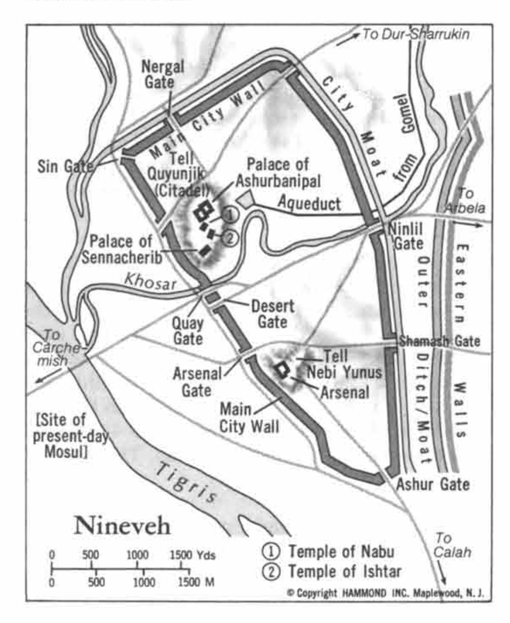
H.B.H.

Nimrim (nim´rim), a desert stream. The waters of Nimrim (Heb., perhaps "leopards") are said to be desolate (Isa. 15:6; Jer. 48:34). They are identified as those of either Wadi en-Numeira on the east side of the Dead Sea near its southern end or the Wadi Shu'eib seven miles north of the Dead Sea. Based on the context, however, the former would seem to be the more plausible location. ***See also*** Dead Sea.

Nimrod (nim´rod), an ancient Mesopotamian king and conqueror mentioned in Gen. 10:8–12 (cf. 1 Chron. 1:10) and Mic. 5:6 (cf. Heb. 5:5). In the latter passage, the "land of Nimrod" is a poetic term for Assyria. Nimrod is the son of Cush, which in Gen. 10:8 seems to mean Cossea, the country of the Kassites in Mesopotamia. Nimrud is the name of several places in Mesopotamia, including Nimrud, ancient Calah. The biblical Nimrod is the first powerful king on earth; the first cities of his kingdom were the famous Babylon, Erech, and Accad in Babylonia, and Nineveh and Calah in Assyria (v. 10). Like another fabled figure of the ancient Near East, Gilgamesh, he was a mighty hunter "by the favor of the Lord" (Heb., "before the Lord"). Nimrod appears in the Yahwist source in Genesis, a source interested in "culture heroes" and founders of cultural and political institutions (see Gen. 4:17–26). Nimrod would then be the hero-founder of the great Eastern empires that threatened Israel during much of its existence.

Whether Nimrod reflects a single historical person, and if so, who that person was, is debated by scholars. Some suggest that Nimrod is derived from the god Ninurta, but the Bible portrays him as flesh and blood. More plausible is the suggested derivation from Tukulti-Ninurta I of the thirteenth century B.C., the first Mesopotamian to rule effectively both Babylonia and Assyria. Certainty is impossible. The Bible may have intended only a corporate figure of a great king.

R.J.C.



Nimrud (nim´rood). ***See*** Calah.

Nimshi (nim´shi), the grandfather of Jehu, king of Israel (i.e., the Northern Kingdom; 2 Kings 9:2, 14). While Nimshi seems in some places to be designated as the father of Jehu ("Jehu the son of Nimshi," 1 Kings 19:16; 2 Kings 9:20), the word "son" is most likely used more broadly in these passages to mean "descendant." ***See also*** Jehu.

Nineveh (nin´uh-vuh; from Assyrian *Nina* or *Ninua*), one of the oldest and greatest cities of Mesopotamia. Ninevah was the capital of Assyria at its height from the time of Sennacherib, who assumed the throne in 705 B.C. to its fall in 612 B.C. and subsequently a symbol of Assyria's utter collapse. The city was located on the east bank of the Tigris River opposite Mosul. Its ruins consist of a number of small mounds and two large tells in an 1800-acre enclosure surrounded by a brick wall almost eight miles in circumference. The main focus of excavations has been the larger of the tells, Quyunjik ("little lamb"). The smaller tell, Nebi Yunus ("the prophet Jonah"), marks the traditional site of the tomb of the prophet Jonah and is occupied by a modern settlement.

Name and History: The *Ninua* of cuneiform sources goes back to an earlier form, *Ninuwa*, which would seem to underlie the received biblical writing. In addition to the syllabic spelling, the cuneiform texts also occasionally use a pseudologographic form, *Nina*, which is the combination of two signs (AB + HA) that represent an enclosure with a fish inside. This reading is of particular interest in light of the prophet Jonah being swallowed by a large fish (Jon. 1:17).

Plan of the site of ancient Ninevah; a modern mapmaker's reconstruction based on available evidence.

Another line of folk interpretation is found in Greek literature where the city is called *Ninos,* after a legendary hero by that name. It has been suggested that the name of the city was connected in some way with a goddess associated with fish. From the Akkadian period on, the city was dedicated to the "Ishtar of Nineveh."

Though the city was occupied from prehistoric times and rebuilt repeatedly by kings of the Middle Assyrian period, the city reached the height of its fame at the turn of the eighth century B.C., when Sennacherib made Nineveh the capital of the expanding Assyrian Empire. When Assyria subsequently held sway over Egypt, under Esarhaddon and Ashurbanipal, Nineveh was the most powerful city in the world. Nonetheless, its end was but decades away. In 612 B.C. the city fell to the combined forces of the Babylonians and the Medes. Some twenty-five centuries later the discovery of the great library of Ashurbanipal in the ruins of Nineveh would furnish the clues for the recovery of the intellectual and spiritual treasures of ancient Mesopotamia.

In the Bible: The earliest biblical mention of Nineveh is in the Table of Nations (Gen. 10:11), which claims Nimrod as the city's founder. Parallel passages in 2 Kings 19:36 and Isa. 37:37 mention Nineveh in conjunction with the assassination of Sennacherib by his two sons. The end of Nineveh is proclaimed by two contemporary biblical prophets, Zephaniah and Nahum. Though Zephaniah's prophecy is brief and incidental (Zeph. 2:13–15), the book of Nahum in its entirety is directed against the city, under the title "An Oracle Concerning Nineveh." Nahum's poetic work describes the fall of Nineveh in unexcelled imagery and power.

Another biblical work centering on Nineveh is the book of Jonah, but here historical facts are reshaped in the interests of a remarkable narrative story with an unforgettable moral lesson. Such literary touches as the "king of Nineveh" (3:6) and the city being so large that "a journey of three days" (3:3) was required to cross it belong to the narrative world of that particular story. Nonetheless, in its own way the book of Jonah, too, witnesses to the glory that once was Nineveh. Here, curiously, the people of Nineveh are unusually responsive to the message of God's prophet. They proclaimed a fast and put on sackcloth, "from the greatest of them to the least of them" (3:5), before the news had even reached the "king of Nineveh," who then followed suit (3:6). These Ninevites would arise again at the Last Judgment to condemn the generation of Jesus (Matt. 12:41; Luke 11:30–32). ***See also*** Assyria, Empire of; Jonah, The Book of; Nahum. D.L.C.

Ninlil (nin´lil), a Mesopotamian mother goddess, the wife of Enlil and goddess of Nippur. Ninlil was originally a grain goddess. An original form of Ninlil was Sud, daughter of Nisaba and Haia; Sud was associated with the Sumerian cities Shuruppak and Eresh. An important Sumerian historiographic document, the Tummal inscription, lists the various kings who restored the Tummal, a Ninlil sanctuary near Nippur, and brought the goddess there. In Assyria, Ninlil became a wife of the national god, Assur. The marriage of the goddess to Enlil is recounted in the Sumerian compositions "Enlil and Ninlil" and "The Marriage of Sud." In her new role as wife of Enlil, she assumed the Sumerian name Nin.lil, "Lady Wind." An Akkadian form of Ninlil was Mulliltu; in the Assyrian dialect of Akkadian, Mulliltu appears as Mulishshu, and this form reappears as the theophoric element in the name Adrammelech (2 Kings 19:37; Isa. 37:38), the murderer of the Assyrian king Sennacherib. ***See also*** Enlil; Nippur. I.T.A.

Nippur (ni-p*oo*r´; Sumerian Nibru), a city in central Babylonia. The city occupied a special place in the political and religious life of Mesopotamia, especially in the period prior to 1500 B.C. Its god was Enlil. The god, his priests, the temple, and the city possessed special political prerogatives; a set of mythological and theological images and forms developed around the god and temple, and this Nippur tradition influenced the cultural life of the Babylonians and Assyrians. In the sixth century B.C., Nippur served as a major area of settlement for the exiled Judeans.

The core city consists of two main sections: the eastern section (containing the sacred areas of the Enlil complex, Inana temple, and North temple) and Tablet Hill. Based on the finding of Ubaid pottery remains in soundings and on the surface, Nippur seems to have been settled already in the Ubaid period. Certainly the city can be traced back almost to the beginning of the Uruk period (Uruk XIV), ca. 3500 B.C.

Sometime in the early third millennium B.C., Nippur was the central meeting place of a league of cities. Here, under the aegis of Enlil and his priesthood, representatives of major cities met in assembly and decided upon joint actions and offices of the alliance of cities. Located between the cities of the north and south, Nippur was regarded as the seat of the chief god of the Babylonian pantheon, Enlil, and it became an important religious and political center. From this evolved its later role in the monarchy. Thus, for example, during the later Ur III–Isin periods, the ruler of the country was legitimated and charged by Enlil. Regular ritual journeys to Nippur by god (e.g., Nanna) and king were carried out in order to induce Enlil to bestow yearly blessings of abundance and prosperity upon the ruler and the land. The control of Nippur often amounted to legitimacy for a claim of rule over all of Babylonia (Sumer and Akkad).

Nippur was a major scribal center. Much of Sumerian literature known to us comes from

This plan of ancient Nippur, which indicates the locations of the temple, city walls, gates, and canals, appears on a clay tablet fragment.

the remains of scribal schools from the Old Babylonian period. Eventually Babylon attained first political and then religious preeminence, thus replacing Nippur. In the attempt to attain legitimacy and to create connection with earlier traditions, Babylon incorporated and built upon the traditions of Eridu. Assyria, on the other hand, linked up more directly with Nippur; thus the god Assur is identified with Enlil, Ninlil becomes one of his wives, and Enlil's son Ninurta takes on a significant role in Assyria.

In the late eighth and seventh centuries B.C., Nippur was generally pro-Assyrian (Nippur supported Assyria even when Babylon and other northern cities were antagonistic or indifferent). Nippur served as an Assyrian garrison city in Babylonia during the wars between the Assyrians and Babylonians. It remained loyal even during the ascendancy of Nabopolassar. Eventually taken, the city and region were largely destroyed. Hence the Babylonians settled the Judean exiles in the region of Nippur in order to repopulate and rebuild the area. Autonomous settlement allowed the exiles to retain their ethnic identity and resist assimilation. In the Achaemenid period (seventh to fourth centuries B.C.) the business records of the Murashû family found in Nippur mention a considerable number of Jews participating in various economic activities. ***See also*** Enlil.

Tadmor, H. *A History of the Jewish People.* Ed. H. H. Ben-Sasson. Cambridge: Harvard University Press, 1976. Pp. 160–164, 173. I.T.A.

Nisan (*ni*´san), the first month of the OT year (Esther 3:7; Neh. 2:1). Nisan is an Akkadian loan word and forms part of the Babylonian system of lunar month names taken over by the Jews some time after the Exile. Akkadian *nisannu,* itself a Sumerian loan word, corresponds to the Sumerian month name Bára.zag.gar, the first month in the Nippur system that became standard for Babylonia during the Old Babylonian period. Nisan falls in the spring (March–April) and corresponds to the earlier Hebrew designation *'abib* (Exod. 13:4; 23:15; 34:18; Deut. 16:1). The festival of Passover is celebrated in mid-Nisan, and it also marks the time of Jesus' crucifixion (cf. Matt. 26:17–19).

No (noh), the Hebrew name for Thebes, Egypt's magnificent capital city during much of the second and first millennia B.C. Located in Upper Egypt some 330 miles south of modern Cairo, the metropolis included vast monumental temple and palace complexes along both banks of the Nile, much of which is still visible today in the ruins of Luxor, Karnak, Qurneh, and Medinet Habu. After its zenith in the Middle and Late Kingdoms (ca. 1570–1085 B.C.) the city continued to enjoy periods of ascendancy until its violent and bloody conquest by the Assyrians in ca. 663 B.C. Nahum (3:8–10) alludes to Thebes's conquest, and both Jeremiah (46:25) and Ezekiel (30:14–16) pronounced doom upon the city during their day. D.A.D.

Noah (noh´uh), the son of Lamech (Gen. 5:28–29); the grandson of Methuselah; and the ninth descendant from Adam via Seth. The story of Noah is found in Gen. 6–9. His birth is the first recorded after Adam's death. Noah and

his household are the sole human survivors of the Flood, which God brought upon the world to punish human sin. Noah, sole righteous man of his era (5:9; 7:6; cf. 6:8), was chosen, with his entourage, to perpetuate life on earth.

According to the account attributed to the Priestly author (P), Noah was commanded to build an ark and take along male and female pairs of every terrestrial and flying species (6:19–20), while according to the so-called Yahwistic account (J), Noah was commanded to take along seven pairs of clean animals and flying species, but only two pairs of unclean animals (7:2–3). All remaining nonaquatic life perished when God loosed heavenly and subterranean waters for forty days and forty nights (7:11–23). Noah's ark floated for ten months, alighting atop the Armenian mountains of Ararat—Babylonian Urartu (7:14–8:5). After sending a raven (unsuccessfully) and a dove (successfully) to scout the area, Noah emerged with his family onto land, performed sacrifices, and received God's (here Yahweh's) promise not to send more floods (8:15–22). A rainbow appeared as a sign of God's new covenant with humankind, and Noah received laws prohibiting bloodshed and consuming of lifeblood (9:1–17 [P]). As the first man to plan a vineyard, Noah grew drunk one day and was seen naked by his son Ham. Ham's brothers Shem and Japheth averted their eyes and covered their father. Noah cursed Ham's son Canaan for his indiscretion, condemning him to serve his brothers (9:18–27). The transfer of the curse to Canaan presumably reflects a later attempt to justify the dominion over the Canaanite sphere by the Hebrew descendants of Shem. Remarkably, the blessing and curse in 9:26–27 is Noah's sole utterance throughout the story.

The story is skillfully woven from two sources. The Yahwistic (J) source prefers the divine name "Yahweh," a ready-made ark, a forty-day flood (with forty days between the ark's alighting and its unsealing), and an emotionally expressive deity. The Priestly (P) source prefers the name "God," shows Noah commanded to build the ark to specific dimensions, depicts a 150-day flood (and 150-day ebbing) and a dispassionate, legally minded deity. The vineyard episode is a tradition originally unrelated to the Flood. The overall story is symmetrical, centering on expansion and recession of the waters. Noah, shown midway between nomadic and agriculturalist existence, echoes the thematic concerns and biases of the Cain and Abel story (Gen. 4:2–16), among others.

Noah's nearest ancient Near Eastern parallel is the Babylonian Utanapishtim, who recounts to Gilgamesh (*Gilgamesh* Tab. 11) experiences of a great flood that remarkably resemble Noah's. Unlike Noah, Utanapishtim obtains immortality. Noah is mentioned alongside Job and Daniel in Ezek. 14:14 as one famed for righteousness.

Noah is mentioned several times in the NT (e.g., Matt. 24:27–28; Luke 3:36; Heb. 11:7). 1 Peter compares Noah's deliverance from floodwaters to the deliverance from sin through Christian baptism (3:20–21). ***See also*** Flood, The; Genesis. J.W.R.

Nob (nob), a city in the territory of Benjamin (Neh. 11:31–35; Isa. 10:27–32) known as "the city of the priests" (1 Sam. 22:19). Nob developed as a religious center following the destruction (late eleventh century B.C.) of the sanctuary at Shiloh. David is said to have sought assistance from Ahimelech and the priests of Nob when he was outlawed from Saul's court, receiving some of the holy "Bread of the Presence" for his soldiers and the sword of Goliath for himself (1 Sam. 21:1–9; cf. Matt.12:1–8; Mark 2:23–28; Luke 6:1–5). When King Saul learned through an informer, Doeg the Edomite, that Ahimelech had "inquired of the Lord" for David, he ordered the death of the priest and his clergy. The king's guard refused to carry out the order, but Doeg the Edomite complied, slaughtering eighty-five priests and putting all of the city of Nob to the sword (1 Sam. 22:6–23). Abiathar, the son of Ahimelech, was a survivor of this massacre, thereafter being the recipient of David's favor (hence the confusion of priest's names in Mark 2:26). It is evident from Isa. 10:27–32 that Nob was located not far from Jerusalem on the north and within eyesight of that city. ***See also*** Benjamin; David; Saul. J.D.P.

Nod (nod), the land of Cain's self-imposed exile, "east of Eden" (Gen. 4:16), otherwise unknown. The Hebrew etymology suggests a "homeless" or "aimless" place.

nomads, a word derived through Latin from a Greek term meaning "to pasture, distribute," referring to those who remain unsettled in place, preferring rather to wander freely about without permanent residence. Nomadic life is sometimes imposed by the limitations of climate on people. This is still true in parts of Africa as well as the Near East and in other parts of the world as well, particularly in central Asia and the outback of Australia. Excessively romantic views of nomads obtain in modern minds partly because their life is distant from centers of observation, and partly because early theories on the nomadic background of certain biblical characters and events were poorly informed.

Nomadism as seen in the Bible is largely pastoral, that is, people traveled with flocks of sheep and herds of goats, asses (for transport, if not for trade), and (after about 1200 B.C., the beginning of the Iron Age in Syro-Palestine) camels in search of food and water. By contrast, references to oxen or cattle show clear agricultural settings, where both water and forage were more ample, neither being in sufficient supply for such animals in true nomadic conditions. Even the groups dependent on sheep and goats for life support may have operated in a dimorphic social order, that is, using settled villages with normal village facilities for part of the year and foraging more broadly for pasture and water during the rest of the year. In most territory inhabited by nomads there is sparse water and sparse pasture for year-round survival, thus forcing occupants to forage widely to keep flocks and families alive. The tendency was to take the family with the flock for ease of security to both, and living conditions in such times required mobile housing, minimal amounts of baggage limited to necessities, and usually grouping of travelers for mutual assistance and security from attack. Knowledge of where water and pastures were available was vital to survival, and since tribal territorialism frequently extended to such outlying nomadic circuits it was also necessary to know which tribes were friendly and which were not. The degree to which real transhumance (the alternation of agricultural and pastoral nomadic life by a portion of the population of a site) functioned has only begun to be studied in Near East archaeological research. Clear evidence of a variety of arrangements is still observable among modern inhabitants of the Near East, where bedouin visitors often move into a neighborhood of stable water supply for short periods of time, arranging to graze their herds over recently cut grainfields belonging to the local farmers for the duration of their stay. Presumably the farmers get their return in the locally distributed manure from the nomad flocks.

The portrait of Israelites in the wilderness, grazing flocks in and around Kadesh-barnea (Num. 20–33), was no doubt nourished by the agriculture and social structures around the oasis. Pure nomadism, therefore, is difficult to find in biblical history. The debate about the nomadic life of the patriarchs is surely offset by their frequent settlements for longer or shorter periods of time in the agricultural and urban centers of Canaan (note Abraham at Shechem [Gen. 12:6] and Hebron [Gen. 13:8], Isaac at Gerar [Gen. 26:6], Jacob with Laban's family [Gen. 29–31], and the move from Canaan to Egypt [Gen. 46:1–7]). Moses' sojourn with the Midianites (Gen. 2:16–22; 3:1) comes close to presenting nomadic life, except that there is such sparse information that the impression may derive from the simple absence of evidence. Recent studies of tribal life have indicated that tribes function in urban as well as in agricultural societies, suggesting that tribal identities portrayed in connection with Israelite settlement in Canaan had little or nothing to do with nomadism as such.

The study of relations between settled and nomadic biblical populations has also only begun. New archaeological data on traditionally nomadic periods such as Early Bronze IV (ca. 2500–2000 B.C.) from sites in the Sinai, the Jordan Valley, and the Transjordan (such as Khirbet Iskander) may clarify the matter in the future, but for the present, modern claims about the strong moral, religious, military, and social role of nomads in biblical history ought to be held in cautious and modest reserve. R.S.B.

Noph (nof; KJV; RSV: "Memphis"), a city in Egypt (Isa. 19:13; Jer. 2:16; 44:1; 46:14, 19; Ezek. 30:13, and, following the Hebrew text, Ezek. 30:16). ***See also*** Memphis.

NRSV, abbreviation for the New Revised Standard Version of the Bible. ***See also*** English Bible, The.

numbers, symbols used to designate quantity. The Egyptians and the Sumerians had advanced number systems and mathematics by the beginning of the third millennium B.C. The Egyptian system was decimal. The Sumerian system was a combination of a decimal and a duodecimal (12) or sexagesimal (60) system. Remnants of the duodecimal and sexagesimal systems are evident in our time system (24 hours, 60 minutes, and 60 seconds), degrees of a circle (360), and our units of dozen (12) and gross (144). The same system originally lay behind our calendar with 12 months, each with basically 30 days, for a 360-day year.

The Hebrews used the decimal system but did not develop their own symbols until the postexilic period (539 B.C. on). In all pre-exilic

An ostracon with numbers written in both Egyptian hieratic script and Hebrew; pieced together from fragments found at the fortress at Kadesh-barnea.

inscriptions, numbers are either represented by Egyptian symbols or are written out. The Arad inscriptions regularly used Egyptian symbols for numbers. The Samaria ostraca (fragments of pottery) more frequently had the number written out. Letters of the Hebrew alphabet were first used for numbers on coins in the Maccabean period (168–40 B.C.)

Symbolism and Significance: Some numbers in biblical usage had symbolic meaning. Seven probably represented completeness and perfection, as seen in the seven days of creation and the corresponding seven-day week, climaxing with the Sabbath (Gen. 1:1–2:4). Even the land was to have a Sabbath, lying fallow in the seventh year (Lev. 25:2–7). In Pharaoh's dream, there were seven good years followed by seven years of famine (Gen. 41:1–36). Jacob worked seven years for Rachel; then, when he was given Leah instead, he worked an additional seven (Gen. 29:15–30). The finest-quality silver was described as having been refined seven times (Ps. 12:6).

A similar use of the number seven can be seen in the NT. There are seven churches mentioned in Revelation 2–3 and seven deacons in Acts 6:1–6. To Peter's question concerning forgiveness, Jesus responds that we are to forgive not seven times, but seventy times seven (Matt. 18:21–22).

Multiples of seven were also important. After forty-nine years came a Jubilee year, when all Jewish bond-servants were released and land that had been sold reverted to its former owner (Lev. 25:8–55). The OT speaks of seventy elders (Exod. 24:1, 9). Also, Jesus sent out the seventy (Luke 10:1–17). Seventy years was to be the length of the Exile (Jer. 25:12; 29:10; Dan. 9:2). A period of seventy weeks of years was to culminate in the coming of the messianic kingdom (Dan. 9:24).

Three also indicated completeness. The created order has three parts: heaven, earth, and underworld. The godhead is described in terms of three: Father, Son, and Holy Spirit. Three major feasts appear in the religious calendar (Exod. 23:14–19). Also prayer was urged three times daily (Dan. 6:10; Ps. 55:17). The sanctuary was divided into three parts: vestibule, nave, and inner sanctuary (1 Kings 6:2–22). Three-year-old animals were prized for special sacrifices (1 Sam. 1:24; Gen. 15:9). Jesus said the Son of man would be in the grave for three days and three nights (Matt. 12:40).

Four was also a significant number. There were four cardinal directions, four corners of the earth (Isa. 11:12), and the four winds (Jer. 49:36). Four rivers flowed out of Eden to water the world (Gen. 2:10–14). Surrounding God were four living creatures (Ezek. 1:10; Rev. 4:6–7).

Forty, a frequently occurring multiple of four, represented a large number or a long period of time. Forty days and nights of rain (Gen. 7:12) flooded the earth. Likewise, Jesus was tempted in the wilderness for forty days (Mark 1:12). Forty years represented approximately two generations. During the forty years of Israel's wilderness wandering, all the adults who had rebelled against God died (cf. Num. 14:20–23). At age forty, a person reached maturity (Exod. 2:11; Acts 7:23). No more than forty lashes could be imposed on an offender (Deut. 25:3).

In the Talmud, Midrashim, and the Cabala, a system of numerology called *gematria* developed. *Gematria* attempted to discover hidden meaning for words based on the numerical values of the letters. The Hebrew letters of the name Eliezer, Abraham's servant, have a numerical value of 318. Gen. 14:14 says that Abraham took 318 trained men to pursue the kings from the east. The Midrash notes that Abraham had but one helper, Eliezer, since Eliezer has the numerical value of 318. In a similar pattern, the number 666 in Revelation is often taken as a *gematria* for the emperor Nero.

Not all number usage in the Bible was symbolic. The pattern *x, x+1* appears frequently as a device of emphasis in parallelism. A good example may be seen in Prov. 30:18–19 with three and four:

> *Three* things are too wonderful for me;
> *four* I do not understand:
> the way of an eagle in the sky,
> the way of a serpent on a rock,
> the way of a ship on the high seas,
> and the way of a man with a maiden.

J.F.D.

Numbers, the Book of, the fourth book in the Pentateuch (the first five books of the OT). The designation "Numbers" comes from the name of the book in the Septuagint and is reflected in the name for the book in the Talmud. The title is probably drawn from the account of the census with which the book begins (1:2). The book is unique in the Pentateuch, being composed of diverse literary types such as historical narrative (chaps. 10–14; 16–17; 20–25; 31–32), statistical information (1–4; 7; 26), itinerary (33), poetry (20:14–18, 27–30; 23:7–10, 18–24; 24:4–9, 15–24), and ritual and legal prescriptions and descriptions (3–10; 15; 18–19; 27–30; 34–36). The framework of the book is a historical narrative describing preparations in the wilderness of Sinai for the journey to Canaan (1:1–9:14), the journey from Sinai to Transjordan (9:15–25:18), and preparations for entering into Canaan (26:1–36:13).

The contents of the book derive from the JE (Yahwist-Elohist) and P (Priestly) traditions. JE covers much of the narrative material and includes 10:29–33, 35–36; 11:1–12:16; 13:17b–20, 22–24, 26b–31, 33; 14:1b, 4, 11–25, 39–45; 16:1b–2a, 12–15, 25, 26b, 27b–34; 20:14–22a; 21:1–25:5; and portions of 32:1–33:49. Other narrative material and the ritual and legal prescriptions (as well as 22:1 and portions of 32:1–33:49) are attributable to P. It has been recently argued that the P material is actually composite, consisting of the P tradition proper and material from the H ("Holiness") school (connected with the so-called Holiness Code of Lev. 17–26). H material makes up the majority of the legal material in chaps. 1–10; 15; 18, excluding the core of the laws about the suspected adulteress and Nazirite in chaps. 5–6. The H school has added to the basic P regulations about corpse contamination and festivals

OUTLINE OF CONTENTS

The Book of Numbers

- I. Preparations for travel (1:1–9:23)
  - A. Censuses and camp organization (1:1–5:4)
    1. First census of Israelites (1:1–54)
    2. Arrangement of camp (2:1–34)
    3. Census and duties of Levites and Aaronides (3:1–4:49)
    4. Exclusion of impure (5:1–4)
  - B. Laws and cultic preparation (5:5–9:14)
    1. Restitution offering; the suspected adulteress (5:11–31)
    2. The nazirite; priestly blessing (6:1–27)
    3. The chieftains' gifts (7:1–89)
    4. Appointment of the Levites (8:1–26)
    5. The lamp stand and Passover (9:1–14)
- II. Travels (9:15–25:18)
  - A. From Sinai to Kadesh (9:15–20:13)
    1. Preparations (9:15–10:35)
    2. Complaint about food; quail (11:1–34)
    3. Complaint of Miriam and Aaron (12:1–16)
    4. Scouting the land and people's complaints (13:1–14:45)
    5. Laws: offerings, Sabbath work, and wearing the fringe (15:1–41)
    6. Rebellion of Korah, Dathan, and Abiram (16:1–40)
    7. Complaint and plague after rebellion (16:41–17:12)
    8. Laws: duties and portions of priests and Levites (18:1–32)
    9. Laws: corpse contamination (19:1–22)
    10. Complaint about water (20:1–13)
  - B. From Kadesh to the steppes of Moab (20:14–25:18)
    1. Edom refuses passage (20:14–21)
    2. Aaron succeeded by Eleazar (20:22–29)
    3. Defeat of king of Arad (21:1–3)
    4. Complaint about food; serpent plague (21:4–9)
    5. Miscellaneous travels (21:10–20)
    6. Defeat of Sihon (21:21–32)
    7. Defeat of Og (21:33–35)
    8. Balaam's prophecies and Balak's capitulation (22:1–24:55)
    9. Baal of Peor idolatry (25:1–18)
- III. Preparations for conquest (26:1–36:13)
  - A. Second census (26:1–65)
  - B. Laws for promised land (27:1–30:16)
    1. Inheritance of daughters (27:1–11)
    2. Joshua appointed (27:12–23)
    3. Festivals (28:1–29:39)
    4. Vows of women (30:1–16)
  - C. War with Midian (31:1–54)
  - D. Settlement of Reuben, Gad, and half of Manasseh in Transjordan (32:1–42)
  - E. Summary of travel (33:1–49)
  - F. More laws for promised land (33:50–36:13)
    1. Boundaries and mode of inheritance (33:50–34:29)
    2. Levitic cities and homicide (35:1–34)
    3. Retention of inheritances in tribes (36:1–13)

(19:2a, 10b–13, 20–21; 28:2b, 6, 22–23, 30, 31a; 29:5–6, 11, 16, 19, 22, 25, 28, 31, 34, 38). It has also contributed to the spy episode (13:1–17a; 14:26–35), Korah's rebellion and the aftermath (16:1a, 2b–11, 16–24, 26a, 35; 16:36 [Heb. 17:1]–17:12 [28]), and other stories (20:1–13, 22b–29; 25:6–18; 27:1–23).

The materials in the book come from a period much later than that which they describe. They also show conflation of different versions of the same story, and folkloric elements run throughout the book. Because of these aspects, the book cannot be taken as an accurate account of history. It is valuable, however, as a reflection of the perspectives of later Israelite tradition. ***See also*** Hexateuch; Sources of the Pentateuch.

Bibliography

Levine, Baruch A. *Numbers 1–20.* Garden City, NY: Doubleday, 1993.

Milgrom, Jacob. *Numbers.* Philadelphia: Jewish Publication Society, 1990. D.P.W.

Nun (nuhn), Joshua's father, thus an Ephraimite (e.g., Exod. 33:11; "Non" in 1 Chron. 7:27). The extra-biblically attested name means "fish."

nun (nuhn), the fourteenth consonant of the Hebrew alphabet, used by the KJV to head the fourteenth section of the acrostic Psalm 119, vv. 105–12.

Nunc Dimittis (nuhnk di-mit´is), one of several poetical pieces or psalms included in Luke's account of the birth of Jesus (chaps. 1–2) in order to emphasize the significance and joy that surrounded Jesus' coming. The Nunc Dimittis (Luke 2:29–32) is a hymn of joy and praise attributed to Simeon, a truly pious man who had been waiting to see God's great act of deliverance on behalf of all people. The poem receives its name from the first words of the Latin version (English: "Now let . . . depart"). This poem centers upon one of the major emphases of Luke-Acts, that is, God's salvation for all people, Gentiles as well as Jews. It has found a significant place in the liturgies of the Christian churches. ***See also*** Hymn; Music; Simeon. J.M.E.

nurse, a woman who breastfeeds a child or one who takes care of another. Hebrew mothers usually nursed their own children (Gen. 21:7; 1 Sam. 1:23; 1 Kings 3:21; 2 Macc. 2:27; cf. Song of Sol. 8:1). Moses' mother was hired to nurse her child (Exod. 1:15–2:10, esp. 2:7–9). Weaning usually occurred about age three and was sometimes accompanied by festivities (Gen. 21:8; 1 Sam. 1:23–24). Occasionally wet nurses were employed. They served in royal families (Exod. 2:7–9; 2 Kings 11:2; 2 Chron. 22:11), and Rebekah had a wet nurse, Deborah, who remained with her all her life (Gen. 24:59; 35:8). Distinguishable from the wet nurse (Heb. *meineqet*) is the attendant to whose care the child was entrusted (*'omenet*). A nurse had charge of Mephibosheth, Saul's five-year-old grandson (2 Sam. 4:4). Naomi became Obed's nurse (Ruth 4:16). This role could also be filled by a man (*'omen,* 2 Kings 10:1, 5; Esther 2:7; metaphorically of kings, Isa. 49:23). The nurse is a symbol of nurture, care, and protection. Thus it is not surprising to find Moses and, by implication, God spoken of as a nurse (Num. 11:12). Moses' rhetorical questions there point to Yahweh as the one who conceived the people and is responsible for their nurture (cf. Deut. 32:13–14). Paul refers to himself as a nurse to the Thessalonians (Gk., *trophos,* 1 Thess. 2:7). J.C.E.

nuts, the fruits of various trees both native and exotic to Palestine. The "garden of nuts" (KJV) referred to in the Song of Sol. 6:11 is probably a walnut orchard (*Juglans regia*). The nuts presented as gifts in Gen. 43:11 are pistachios (*Pistachia vera*), still a favorite food in the Near East today. The almond (*Amygdalis communis*) is another popular nut mentioned by name in the same passage. ***See also*** Almond.

Nuzi (n*oo*´zee), an ancient city in what is now northeastern Iraq, situated about ten miles southwest of Kirkuk. The site, modern Yoghlan Tepe, had been occupied from prehistoric times but had experienced a rapid decline after the fall of the Mitanni Empire. A small body of texts was found in the Old Akkadian, Ur III, and Old Assyrian levels (late second, early first millennium B.C.) at which time the city was named Gasur. Several thousand tablets were found in

One of the Nuzi tablets from ca. second half of fifteenth century B.C., which help reconstruct Hurrian cultural life during the early biblical period.

the later levels of the Nuzi period when the site was dominated by Hurrians. These tablets span a period of four generations and can be dated to the second half of the fifteenth century B.C. Additional Nuzi-type tablets have been unearthed recently at Tel al-Fahhar (ancient Kurruhanni) located about nineteen miles southwest of Nuzi. These Nuzi tablets are one of the primary sources of knowledge of Hurrian customs and practices, and aid scholars in understanding the cultural situation of early biblical history. Since the homeland of the biblical patriarchs in the middle Euphrates Valley was the object of substantial Hurrian penetration but little pertinent epigraphic material has come to light from this region, scholars look to Nuzi for data that would be valid by extension for the Hurrian areas of Haran and Nahor. However, since the Nuzi texts constitute one of the rare private archives from Mesopotamia, especially distinguished in its quantitative representation of family law, it is often difficult to discern whether the Nuzi sociolegal institutions are uniquely Hurrian or reflect common Mesopotamian practice. ***See also*** Mesopotamia. B.L.E.

Nympha (nim'fuh). ***See*** Nymphas.

Nymphas (nim'fuhs; KJV; RSV: "Nympha"), a Christian member from Laodicea to whom Paul extends greetings (Col. 4:15). Ancient manuscripts vary as to whether Nympha (feminine) or Nymphas (masculine) is the correct reading. House-churches such as the one that met in the home of Nympha(s) were a common phenomenon in the early stages of Christianity (Philem. 2; Rom. 16:23).

Opposite: The Black Obelisk of the Assyrian king Shalmaneser III (ruled 858–824 B.C.). Although its shape is inspired by Egyptian obelisks, it does not taper to a pyramid. The second row depicts "Jehu, son of Omri." A detail of this appears with the color photographs.

O

oak, an acorn-bearing tree noted for its great size. The oak has been revered and has both historical and mythological associations as a symbol of strength. Among the more than three hundred species worldwide are the Palestinian and Tabor oak trees, as they are popularly known in biblical lands. The evergreen Palestinian oak has small leathery leaves edged with tiny thorns. It is in the hill country at an elevation of 1,000 feet where forests of oak at one time dominated the biblical landscape. In northern Transjordan stood the luxurious forests of biblical Bashan; "of oaks of Bashan they made your oars" (Ezek. 27:6), and "Wail, oaks of Bashan, for the thick forest has been felled!" (Zech. 11:2). Oak forests likewise carpeted Gilead and parts of Edom, upper Galilee, and Carmel.

At lower altitudes, in the coastal plain, lower Galilee, and interior valleys, the Tabor oak represented the climax vegetation. It is a deciduous, high-outbranching tree with large leaves. The Plain of Sharon was at one time covered with an impenetrable oak forest which was compared with the lush forests of Carmel and the Lebanon (Isa. 33:9; 35:2).

Although much of the forest land was cleared in antiquity, today one still sees stands of oaks in the hill country and the occasional lone oak or terebinth, "sacred tree," still preserved. As a sacred, venerable, mighty tree, the oak is associated with worship (Gen. 13:18), with sacrificial offerings (Hos. 4:13), long life (Isa. 6:13), death (the Absalom passage, 2 Sam. 18:9–10, 14), and sanctuaries ("the oak in the sanctuary of the Lord" at Shechem, Josh. 24:26). S.L.R.

oath, a statement by which people give assurance that they have spoken the truth or by which they obligate themselves to perform certain actions. God is usually invoked as guarantor of the oath, with the expectation that a broken or false oath will be punished. Oaths thus are a holy ritual and to swear falsely is to profane God's name (Exod. 20:7; Lev. 19:12). Swearing by God's name was most solemn (Matt. 26:63), but people also swore by holy things (Matt. 5:36; 23:16–22) and by raising their right hands (Rev. 10:5–6). Covenant ceremonies demanded the swearing of oaths (Gen. 26:28).

The Hebrew word for "oath" comes from the number seven, the sacred and magical number in Hebrew culture. In Genesis 21 seven lambs are used as witnesses to a covenant. Oaths and curses (a related type of statement) are often indicated in the Bible by abbreviated formulae, such as "May the Lord do thus and so if . . . " (1 Sam. 3:17; 14:44) and "As the Lord lives . . . " (1 Sam. 19:6). A full oath ritual for the wife suspected of adultery is found in Numbers 5. Peter responds to the inquiries of people in the high priest's courtyard with a simple denial, an oath and a curse (Matt. 26:69–74). The NT also contains a tradition, similar to one found among the Essenes, that one should not swear oaths (Matt. 5:34; James 5:12). ***See also*** Covenant; Curse and Blessing; Witness. A.J.S.

Obadiah (oh'buh-d*i*'uh; Heb., "worshiper" or "servant of Yah[weh]"), a common biblical name used of at least eleven biblical personages including the prophet Obadiah and a high royal official allied with the prophets during Ahab's reign (1 Kings 18:3). The name is used of premonarchical, monarchical, and postexilic people (i.e., the entire time span of the OT). Its popularity is also indicated by its use in five seals, a Samaria ostracon, and in three Hellenistic Egyptian papyri. Any faithful worshiper could be called God's servant (Ps. 113:1), though the title is usually used of special personages such as Moses (Num. 12:7) or David (1 Kings 11:34). The name thus expresses the parents' hope that the child would be loyal to God. Names expressing the same sentiment are common in the ancient Near East and are found in Phoenicia, Ugarit, and Mesopotamia. ***See also*** Obadiah, The Book of. M.Z.B.

Obadiah, the Book of, an OT book, the fourth of the twelve Minor Prophets. It is the shortest book in the OT with only twenty-one verses. Its main theme is Edom, Judah's neighbor to the south, whose punishment is predicted for participating in the destruction of Jerusalem in 586 B.C. While oracles against the nations are an important part of biblical prophecy, it is unusual for an entire book to concern itself with foreigners; only the book of Nahum, which focuses on Assyria's downfall, is similar.

OUTLINE OF CONTENTS

The Book of Obadiah

I. The inevitable destruction of Edom (1–9)
II. The wrongs perpetrated by Edom against Judah (10–14, 15b)
III. The future restoration of Israel and destruction of the nations (15a, 16–21)

This short book is unusually difficult. It abounds in philological problems, and the Hebrew text is often impossible to translate as it stands. The book offers no information concerning Obadiah; we do not even know his father's name or when and where he prophesied. It is unclear if the book is a unity. Vv. 1–6 are parallel to the anti-Edom oracle in Jer. 49:14–16, 9–10; the middle section of Obadiah has no such extensive parallels; and most of the last

seven verses focus on the nations in general rather than on Edom. Either a single prophet spoke using various styles and themes, or several prophecies touching on Edom were collected in the book under the common name of Obadiah. It is difficult to date the book or its sections with much precision, though Obadiah was certainly composed after the destruction of the First Temple in 586 B.C. (cf. Mal. 1:2–4). This sixth–fifth-century dating is consistent with the author's extensive familiarity with various prophetic motifs.

The first section (vv. 1–9), which is the most difficult part of the book, describes Edom's pride by using unusually vivid imagery. Its theme of Edom's punishment for excessive pride is reminiscent of Ezekiel's oracle against Tyre (Ezek. 28). The second section twice recalls the "brotherly" relationship between Edom and Israel (vv. 10, 12), and contains at its center an unusual string of eight prohibitions recalling Edom's hostile acts in 586 B.C. (vv. 12–14). This section is concluded by a promise for complete retribution against Edom in a measure-for-measure fashion (v. 15b). The destruction of Edom is forever and unconditional (v. 10), in contrast to typical prophetic oracles against Judah, where destruction is partial and often conditional. The final section is rich in allusions to earlier prophetic material: the nations drink poison (v. 16; cf., e.g., Jer. 25:15–16), a remnant remains on Mount Zion (v. 17; cf., e.g., Isa. 37:32), and Israel is a destructive fire (v. 18; cf. Isa. 10:12–19). Like v. 10, v. 18 emphasizes that the destruction of Edom will be complete: "there will be no remnant." After a concluding formula at the end of v. 18 ("for the LORD (YHWH) has spoken"), the last three verses, which are in prose, in contrast to the rest of the book, which is in poetry, move beyond Edom to describe a general territorial restoration of Judah and Israel. The final verse, however, returns to Edom, predicting the judgment of "Mount Esau." The book concludes more generally, declaring that YHWH's kingship will be actualized (v. 21b).

The exact events that are referred to in Obadiah are difficult to reconstruct given the paucity of historical material about Judah and its neighbors in the late monarchy and the bias of those sources that are extant. In any case, Obadiah fits squarely with the traditions preserved in Lam. 4:21–22; Ps. 137:7; and 1 Esd. 4:45, which suggest extensive participation by the Edomites in the Babylonians' destruction of Jerusalem. One has to imagine that any Edomite involvement was particularly resented by the Judeans, who felt a kinship to the Edomites, as reflected in the narrative about the twin brothers Jacob and Esau, who were the "ancestors" of the Israelites and the Edomites, respectively (Gen. 25:24–26). This strong resentment explains how this book came to be written and preserved, though the more generalized ending of the book, which emphasized victory over "all the nations" (v. 16) and YHWH's sovereignty (v. 21b), was also helpful. ***See also:*** Edom.

Bibliography

Wolff, Hans Walter. *Obadiah and Jonah.* Minneapolis, MN: Augsburg, 1986.

M.Z.B.

Obed (oh'bid; Heb., "worshiper"). **1** A man about whom there is no story in the Bible apart from the record of his birth to Ruth and Boaz (Ruth 4:13–22). Obed nevertheless assumes significance in both OT and NT for his genealogical role as the father of Jesse and grandfather of David (1 Chron. 2:12) and hence an ancestor of Jesus (Matt. 1:5; Luke 3:32). **2** The son of Ephlal and the father of Jehu, mentioned in the genealogy of the tribe of Judah (1 Chron. 2:37–38). **3** One of the mighty men in the list of King David's armies (1 Chron. 11:47). ***See also*** Boaz; David; Jesse; Ruth.

F.R.M.

Obed-edom (oh'bid-ee'duhm; Heb., "worshiper of Edom"). **1** The name of a Gittite in whose house David stored the Ark of God for three months. During the transport of the Ark from Baale-judah (or Kiriath-jearim) to Jerusalem, Uzzah, one of David's men, touched the Ark and died. Unwilling to continue with the Ark into Jerusalem, David left it in the house of Obed-edom, who was then blessed because of its presence (2 Sam. 6:6–12; 1 Chron. 13:13–14). **2** One of the Levite gatekeepers at the tent of meeting who, along with others, led with lyres the procession that brought the Ark of God from the home of Obed-edom the Gittite to Jerusalem (1 Chron. 15:18, 21). When the Ark was set inside the tent in Jerusalem, Obed-edom the Levite was appointed one of the ministers of the Ark (1 Chron. 16:5). ***See also*** Ark; Kiriath-jearim; Uzzah.

F.R.M.

obedience, submitting to the will or authority of another. The OT has no separate word meaning "obey." "Obey" translates the Hebrew "to hear" (Gen. 22:18; Isa. 42:24). The concept is also expressed as "keeping" or "observing" the commandments (Exod. 16:28; 34:11) and "walking" in God's ways (1 Kings 11:33). God punishes disobedience by exile, e.g., from the Garden of Eden (Gen. 3:22–24) or from the Promised Land (Deut. 4:25–28), but God forgives and restores (Deut. 30:1–5).

In the NT Christ is obedient to God (Rom. 5:19; Phil. 2:8; Heb. 5:8), and Christians are called to obedience of faith (Rom. 1:5; 16:26), obedience to Christ (John 3:36; Heb. 5:9), and obedience to the gospel (Rom. 10:16; 1 Pet. 4:17). The NT also reflects Roman social-political order in calling for obedience to the state (Rom. 13:1–5) and, in later writings, obedience of slaves, children, and wives within the house-

hold (Eph. 5:21–6:9; 1 Pet. 2:13–3:7). ***See also*** Commandment; Law. J.D.

obeisance, a gesture made by kneeling and placing one's face to the ground (cf. Josh. 5:14); it may be repeated several times for emphasis (Gen. 33:3; 1 Sam. 20:41). The gesture indicates submission, servitude, and respect to one's superior (1 Sam. 25:41; 2 Sam. 24:20); it can also express gratitude (2 Kings 4:37) and is thus appropriate as an act of worship (2 Sam. 12:20). The verb for obeisance can be used as a metonym for the worship of God and is found in this sense in prohibitions against idolatry (Exod. 20:5; 1 Kings 9:6).

obelisk, a four-sided free-standing pillar, normally monolithic, tapering inward as it rises, terminating in a small pyramid. Obelisks were produced in Egypt from at least the latter part of the Old Kingdom (fifth dynasty, late third millennium B.C.) until the Ptolemaic period (late fourth century B.C.). Associated especially with the cult of the sun god Re, whose primary worship center was On (Heliopolis), obelisks were apparently seen as resembling the rays of the sun, the podium being the primeval hill over which the sun rose, and became symbolic of royal rejuvenation. Jer. 43:13 refers to the obelisks of Heliopolis, literally "the pillars of the sun temple which is in Egypt." As a pair flanking a temple entrance, two obelisks represented the rising and setting sun; as models in tombs they related to resurrection. On, Thebes (center of the cult of Amun-Re), and Pi-Ramesse (a capital of Ramesses II) had major obelisks, products of the eighteenth–twentieth dynasties (ca. 1546–1085 B.C.), the tallest of which exceeds 105 feet. The obelisks elsewhere were generally shorter. Some obelisks were themselves, as divine symbols, objects of a cult. Obelisk-type pillars, inspired by Egyptian models, were erected at Byblos (Phoenicia) and at other Syro-Palestinian sites. There are now more major Egyptian obelisks in Rome than in Egypt; one was even moved to New York's Central Park. ***See also*** Egypt; On; Re. H.B.H.

oblation, an offering presented to God, usually consisting of a nonliving object in contrast to an animal sacrifice, e.g., meal (Lev. 2:4), first fruits (v. 12), or land for the sanctuary (Ezek. 48:9). The prophet Isaiah denounces vain oblations (Isa. 1:13, 16–17). ***See also*** Worship.

Oboth (oh´both; Heb., "fathers"), a place on the Israelite route in the wilderness, associated with Punom and Zalmonah (Num. 33:41, 42), which the Israelites reached after leaving Egypt (Num. 21:10, 11). Its location remains uncertain due to debate about the route the Israelites took. Based on a presumed identification of Punon, some have suggested 'Ain el-Weiba, on the western edge of the Arabah Valley.

occupations, activities by which people earned their livelihood. ***See also*** individual entries.

Ochran (ok´ruhn; Heb., "trouble[?]"; KJV: "Ocran"), the father of Pagiel, Moses' assistant from the tribe of Asher (Num. 1:13; 2:27; 7:72, 77; 10:26), who carried out the functions of giving offerings, helping take the census, and leading the tribal march.

Oded (oh´did; meaning uncertain). **1** The father of the prophet Azariah (2 Chron. 15:1). **2** A prophet of Israel in the reign of Pekah (735–732 B.C.). He persuaded the army of Israel to treat the captives from Judah kindly and to return them to their countrymen (2 Chron. 28:9–15).

offering for the saints. ***See*** Contribution for the Saints.

offerings. ***See*** Worship.

Og (og), the king of Bashan whose territory lay north of the river Jabbok. He was defeated by the Israelites at Edrei before they crossed the Jordan River to enter the land of Canaan (Num. 21:33–35; Deut. 1:4; 3:1–13). Israelite tradition identifies him as the last remnant of the Rephaim, a race of giants who inhabited Canaan prior to the Israelite settlement. This tradition is supported by mention of his great bed of iron located in Rabbah of the Ammonites (Deut. 3:11). This was probably a tomb, a dolmen constructed with basalt blocks. His territory was occupied by the tribe of Manasseh. ***See also*** Rephaim. M.A.S.

Oholah (oh-hoh´luh), **Oholibah** (oh-hohl´i-bah; Heb., "she of the tent" and "my tent is in her"), the names of the allegorical sisters spoken of by the prophet Ezekiel (Ezek. 23); Oholah represents Samaria and Oholibah represents Jerusalem. After a youth of prostitution with the Egyptians, Oholah turned her lust upon the Assyrians and was eventually taken advantage of and destroyed by them. Oholibah surpassed the harlotries of her sister, defiling herself with the Assyrian and Babylonian lords. She, too, will suffer punishment for her lewd ways, for God will not ignore the faithless idolatry of Samaria and Jerusalem. A.B.

Oholiab (oh-hoh´lee-ab; Heb., "the father's tent"), a Danite craftsman and fabric artisan who worked with Bezalel in the design and construction of the tabernacle (Exod. 31:6; 38:23).

Oholibamah (oh-hoh´li-bah´muh; Heb., "the tent of the high place"). **1** The daughter of Anah and wife of Esau (Gen. 36:2, 5). **2** A descendant of Esau and a clan chieftain of the Edomites (Gen. 36:41; 1 Chron. 1:52).

A man crushes olives, source of oil in the biblical world, using a restored ancient stone press. Once crushed, the olives were placed in special baskets for the oil to drip through.

oil, in the Bible, olive oil. Oil of varying qualities was produced by different stages of production. The best oil—beaten oil (cf. 1 Kings 4:11)—was produced by placing olives that had been crushed (for example, by treading on them, Mic. 6:15) in baskets and letting the oil drip through. An oil of a lesser quality was obtained by beating the olive pulp and applying pressure. The pulp could be ground again and squeezed another time to obtain still more oil.

Oil was a basic part of the diet. That the widow at Zarephath had only a jar of flour and a jar of oil indicates this (1 Kings 17:12–16). It was a basic component in bread making. As an extension of its use in foods, oil was a basic component in cereal offerings (cf. Lev. 2). Any type of oil could be used for these, except for the cereal offering that accompanied the daily burnt offering. In this beaten oil had to be used (Exod. 29:40; Num. 28:5). Cereal offerings in which the element of joy was missing lacked oil and incense (Lev. 5:11; Num. 5:15).

Oil was also used for cosmetic purposes. Oil could be compounded with perfumes to make aromatic ointments (cf. Esther 2:12; Song of Sol. 1:3; 4:10). Mourners did not use oil on their bodies during their period of sadness (2 Sam. 14:2; Isa. 61:3; Dan. 10:2–3). It was an expression of gladness, refreshment, and pleasure (Pss. 23:5; 104:15). Oil was used as an emollient to soften skin of wounds (Isa. 1:6) or to treat leather shields (Isa. 21:5).

Oil was used in the religious anointing of objects and persons. Jacob anointed sacred pillars (Gen. 28:18; 31:13; 35:14). The special anointing oil was applied to Aaron, his sons, and various pieces of tabernacle furniture (cf. Exod. 29; 30:22–33). Oil was put on the right ear, thumb, and toe of a healed leper as part of his purification (Lev. 14:10, 12, 15–18). Kings were anointed (1 Sam. 10:1; 16:13; 1 Kings 1:39). Prophets, too, apparently received an anointing (1 Kings 19:16). A recipe for the composition of the priestly anointing oil is given in Exod. 30:22–25.

Oil was employed as fuel for lamps. The oil for the lamp in the tabernacle was to be beaten oil (Exod. 27:20; Lev. 24:2). In the NT oil is used in healing rites (Mark 6:13; James 5:14).

Oil is used to indicate fertility of land (Deut. 33:24; Job 29:6) and with wheat and new wine to indicate agricultural blessing and abundance (Deut. 7:13; 11:14). ***See also*** Anoint; Food; King; Lamp; Ointments and Perfumes; Priests; Prophet.

D.P.W.

oil tree, the term used by the KJV in Isa. 41:19 where the RSV has "olive." Various terms used in the Septuagint indicate an unclear or at least inconsistent identification of what the Hebrew word used in Isa. 41:19 designated. The true olive *Olea europaea* is most likely, but species of pine and cypress have been suggested by other scholars. The Hebrew is literally "tree of oil," but pine or cypress would lend itself better to the Temple carvings than "olivewood" (cf. 1 Kings 6:23, 31–33).

ointments and perfumes, soft unguents or salves and aromatic scents commonly used in the ancient Near East for anointing, for medicinal purposes, for beautification, in incense, and in Egypt, for embalming. Most ointments contained a base of olive oil, to which aromatic spices, especially myrrh, were added (Exod. 30:23–25). Archaeological excavation has brought to light a great variety of small delicate flasks and jars that undoubtedly served as containers for cosmetics, ointments, and perfumes. The most precious containers were of alabaster (Matt. 26:7) and were often small jars with a lid and pedestal base, or vials with a sealed neck. Anointing the head with oil was a common form of hospitality (Pss. 23:5; 92:10; 133:2), though Mary Magdalene anointed Christ's feet (Luke 7:46). Ointments were a precious commodity and symbolized a sacred consecration. Kings were anointed (1 Sam. 10:1; 2 Kings 9:1; 1 Kings 1:39), as was the tabernacle (Exod. 30:26–29). Similarly well attested are the uses of ointments for healing (Isa. 1:6; Luke 10:34; Jer. 8:22) and for perfume (Ruth 3:3; 2 Sam. 12:20; Song of Sol. 1:3).

Perfumes were likewise regarded as precious and served not only cosmetic uses but were also a main ingredient of incense and the sacred anointing oil. Often referred to as spices (Exod. 25:6; 35:28), aromatic sources derive from plants such as frankincense, myrrh, cinnamon, and saffron. The spice trade was an extremely profitable one and caravans plied the routes between Africa, India, Arabia, and Near Eastern ports (Ezek. 27:22; Gen. 37:25; 1 Kings 10:10). Fragrances made women attractive (Esther

2:12), provided a pleasing scent to clothes and furniture (Song of Sol. 4:11; Ps. 45:8), and flavored wine (Song of Sol. 8:2). The blending of several perfumes was an important component of formulas for the sacred incense and anointing oil (Exod. 30:22–25, 34–35). S.L.R.

Old Gate, the, a gate in the wall of Jerusalem restored by Nehemiah (Neh. 3:6; 12:39), probably in the west, possibly in the north wall. Its precise location and identification remain unclear.

old prophet, the, an unnamed prophet (1 Kings 13:11) who lived in Bethel during the reign of Jeroboam I (ca. 926–907 B.C.). Hearing of a Judean prophet, also unnamed, who had uttered a prophecy against an altar in Bethel, the old prophet went in search of him. When he found him and heard that God had forbidden the Judean prophet from delaying in Israel, the old prophet lied to him about a word of the Lord that had come to him, brought the unnamed Judean prophet to his own dwelling, and thus caused the Judean prophet's death because of disobedience to God's word (1 Kings 13).

Old Stone Age. ***See*** Paleolithic Age.

Old Testament (from Gk. *diatheke,* "testament" or "covenant"), the first section of the Christian Bible, in its Protestant form identical in contents but not in order to the Hebrew Scriptures that constitute the Bible of Judaism. It is remarkable that the Bible of Christianity includes the Scriptures of another religion, Judaism. This was the case from the very beginning. Christianity arising from within Judaism and founded on the acceptance of a Jewish messiah, took it for granted that the sacred books of Judaism were authoritative. In fact, the earliest Christian writers, whose books became the NT, regularly appealed to those Scriptures to establish the truth of their new faith. This was so even though the limits of the Jewish Bible were not finally established until the end of the first century A.D.

Some of the earliest Christians thought in terms of an old and a new covenant (2 Cor. 3:14; Heb. 8:7), but it was the church fathers Tertullian (ca. A.D. 160–230) and Origen (ca. A.D. 185–254) who first used the term "Old Testament" for the pre-Christian Scriptures as a whole. On the basis of the contrast between old and new, then, the Old Testament (OT) is conceptually—if not in size—the first half of the Christian Bible.

Old Testament Canons: The simplest definition of the OT is that it is part of the Christian canon, a formally recognized list of sacred books. However, whereas all Christian communities accept that definition, its precise application is by no means simple, because various churches include different books in their particular canons of the OT. The Protestant OT includes the same thirty-nine books as the Bible of Judaism, but in

"Nash Papyrus": Oldest O.T. manuscript, prior to the discovery of the Dead Sea Scrolls, ca. 150 B.C. It contains the Ten Commandments and the *Shema* (Deut. 6:4).

a different order. In addition to these thirty-nine books, the Roman Catholic OT includes several other books and additions to books. These are Tobit, Judith, Wisdom of Solomon, Ecclesiasticus, Baruch, Prayer of Manasseh, 1 and 2 Maccabees, 1 Esdras, three additions to the book of Daniel and one to Esther. Sometimes the Letter of Jeremiah is listed separately and sometimes as part of Baruch, and the book of 2 Esdras was also included in the Latin Vulgate. The OT of the Eastern churches is slightly different still. In the Protestant Bible, the books that are in the other Christian OTs but not in the Bible of Judaism are identified as the Apocrypha and printed in a separate section, either between the Old and New Testaments or following the New Testament (NT).

The differences between the OT canons can be explained by the history of the Bible in the different religious communities. The foundation for the development of all of the canons is the Bible of Judaism. It consists of three parts, corresponding to the stages of their acceptance as sacred Scripture. They are in Hebrew the Torah, the Nebiim, and the Kethubim, or, in English, the Law, the Prophets (Former and Latter), and the Writings. With the exception of a few chap-

ters in Aramaic, all the books were written in Hebrew. In the Hellenistic age (325–63 B.C.) the Jewish communities outside of Palestine, especially in Alexandria, began to translate first the Torah and then the other books into Greek. It was the Greek version of the Hebrew Scriptures, along with the additional books in the Catholic Bible, that became the OT of the early Christian church.

As a comparison of the tables of contents of Jewish and Christian Bibles shows, not only was the early Christian Bible larger than that of Judaism, the order of the books was different. The Greek and subsequent versions begin with the Pentateuch, which corresponds to the Hebrew Torah. Then follow the historical books, including those such as 1 and 2 Chronicles, which are in the Writings at the end of the Hebrew Bible. Next come the wisdom books and finally the prophetic books. The organization of the Greek OT—and therefore of the Christian OT—appears to be a chronological one: listed first are books that treat the past, then those concerned with the present, and finally those focused upon the future. Moreover, presumably as a result of Hellenistic influence, the Greek version organizes genres more consistently in each of its parts than does the Hebrew Bible: narratives, then poetry, then prophecy.

The three-part Protestant Bible (OT, Apocrypha, NT) is the result of the efforts of the reformers Martin Luther and John Calvin. During the Reformation of the sixteenth century, as the Reformers called for reliance upon Scripture over church tradition, they returned to what they considered the earlier form of the OT, the books held sacred in Judaism. They retained the order of the books established in the Greek version followed by the early church, but separated out the books not in the Hebrew Bible and identified them as the Apocrypha, thus diminishing but not denying their authority. Protestants have continued to be ambivalent about the authority of this part of the Bible.

Authority: The OT is a religious book both in terms of its origin and its continued use in communities of faith. Its various parts deal with matters of human life and experience in the context of ultimate and transcendent meaning, that is, in terms of the ways and will of God.

It is important to keep in mind that to identify this document as "Old Testament" is to consider such religious meaning within a Christian context. That is to say, for the Christian churches the OT does not stand alone but only as part of the Bible as a whole. That is not true, of course, when Judaism considers the same books as the Bible, or when the writings are read and studied only for their historical or literary contents. Yet for communities and individuals of faith, both in Christianity and in Judaism, these books comprise religious documents, significant in varying degrees for the life and practice of contemporary individuals and groups.

The question of the authority and meaning of the OT—as a particular aspect of the issue of the authority of the Bible—has been treated variously over the centuries. The earliest Christians and their Jewish contemporaries assumed that the Hebrew Scriptures contained the word of God and took their authority for granted. In the first few Christian centuries, the OT came to be read more and more spiritually and Christologically through the lens of the NT. The Israelite figures and texts were seen as types or prophecies or promises of what was to happen with the coming of Christ. Realizing that the ancient words had to be interpreted and applied in ever new situations, the church before the Reformation came more and more to understand the Bible through tradition, including the creeds and the decisions of church councils. The Reformation intended that all matters of Christian faith and practice should be authorized by the Bible alone.

That the Bible, including the OT, is the word of God may be understood in very different ways. It was only in the nineteenth century that a doctrine of verbal inspiration developed. This view, that every word of the Bible was directly inspired by God, arose in part as a reaction against biblical criticism, which in its study of the human origins of the Bible seemed to understand the Bible's authority in terms of its power to inspire and guide in the context of everyday as well as religious experience. Some have serious doubts about the importance of the OT in relation to the NT, thus keeping alive a debate as old as the second century A.D.

The influence and importance of the OT, as part of the Bible, are both deep and wide. Translations of the Bible have helped to shape the development of languages, from the English of the Authorized or King James Version to those of new nations of the twentieth century. The art, literature, and even worldview of a great many cultures are deeply indebted to this ancient document.

Literature: The OT is not a single, unified document of a single type or by a single author, nor does it claim to be. Instead, it is a veritable library of ancient Israelite literature. If as a whole it is to be identified by a single category, it would have to be called an anthology, a collection of diverse literary works. One way to better understand that anthology is to classify its parts according to literary genre or type.

In broad terms, the various books and their parts may be identified as narratives, law, poetry, wisdom reflections and proverbs, corporate and personal prayers, and apocalypses. Although many of the specific works are quite distinctive, none of these types is unique to the OT; examples of all can be found among other ancient Near Eastern literature. Some books consist entirely or almost entirely of one type whereas others include several.

David (bottom center) slaying Goliath (cf. 1 Sam. 17); illuminated manuscript, twelfth century.

The Pentateuch and the historical books are mainly narrative, though other types of literature will be found within them. Genesis includes poetry and Exodus both poetry and law. A narrative, broadly defined, reports past events. Narratives that include a plot, description of a setting, and characterization of the participants are stories. Whatever their specific point or purpose, stories mean to create interest and hold the attention of hearers or readers by the creation of tension and its eventual resolution.

Many of the OT narratives must be identified as histories, though not without some qualification. Accounts such as those in the books of Samuel and Kings report and interpret the public events of the past, and in that sense they are history. Yet in addition to being guided by the facts, so far as they could be determined, the writers relied on oral tradition, only some of which would have been seen as historically reliable by modern standards. Even more important, these ancient writers interpreted all events theologically. Thus they tended to write theological or salvation history, not history in the modern sense. Moreover, the accessibility to and the interest in accurate and detailed information varies considerably among the individual books and narratives of the OT. One of the tasks of modern historical study of the OT is to determine to what extent and how such documents can be used to reconstruct the events of the past.

Among the other narrative works of the OT are short stories, tales, and stories with a lesson, such as Ruth, Esther, Judith, Tobit, and Jonah. Contained within the narrative books are individual stories of different types, such as family sagas, and etiologies, that is, narratives that explain places, names, or practices in terms of their origins.

Its first five books and even the OT as whole have been identified as "the law," but as a type of literature the term must be used more narrowly and precisely. As the story from creation to the entrance into the promised land is told, virtually all of ancient Israel's laws were understood to have been revealed by God to Moses at Mount Sinai. This means that they are understood in the framework of the covenant between God and Israel, as the stipulations by which the people continued to be God's people. Moreover, the covenant was established and the law given to a people whom the Lord had brought out of Egypt. Laws are found in collections, such as the Decalogues in Exodus 20, 34, and Deuteronomy 5, the Book of the Covenant in Exodus 21–24, or the Holiness Code in Leviticus 17–26. For the most part, the individual laws are of two kinds, casuistic and apodictic. The casuistic is case law in two parts, the statement of a condition and then its legal results: "When someone borrows an animal from another and it is injured or dies, . . . full restitution shall be made" (Exod. 22:14, NRSV). Such formulations are found in all other ancient Near Eastern laws; an example is the code of Hammurabi. Apodictic laws are different in their inclusive and absolute character. They consist of a single short sentence, either a command or prohibition: "Honor your father and your mother" (Exod. 20:12, NRSV); "You shall not steal" (20:15, NRSV).

The OT poetic books include Psalms, Job, Proverbs, Ecclesiastes, Song of Songs, Ecclesiasticus, and the Prayer of Manasseh. Most of the prophetic books are in poetry as well, but in their poetic form as well as their contents they are quite different from the ones listed here.

Most modern translations enable readers to recognize and better understand texts that originated in Hebrew poetry by printing the lines in verse form. The most important mark of Hebrew poetry, parallelism of lines or other parts, can then be noted:

> Why do the nations conspire,
> and the peoples plot in vain? (Ps. 2:1, NRSV)

This is an example of synonymous parallelism, with "nations" in the first line paralleled by "peoples" in the second, and "conspire" paralleled by "plot in vain."

Another characteristic of Hebrew poetry is its meter or rhythm, which appears to be based not on the length of syllables but upon patterns of accented syllables. The most easily recognizable meter is that used for the dirge, which alternates lines of three and two accents. Israelite poetry also made use of wordplays, assonance, and other rhetorical devices.

Wisdom literature, whether in the form of short sayings such as those found in Proverbs 10–30 or longer compositions such as Job, was written mainly in poetry. One also finds lyrical

poetry, that is, lines meant to be sung, ranging from the love poetry of Song of Songs to the liturgical songs of the Psalms. Among the liturgical songs are individual and communal laments or complaints, thanksgiving songs, hymns, and royal psalms.

The prophetic books, Isaiah, Jeremiah, Ezekiel, and the twelve Minor Prophets, contain some of the most distinctively Israelite literature, although prophets and prophecies were known in the ancient Near East generally. Behind the development of the books stand the prophetic figures themselves, individuals who announced the word of God concerning the immediate future, whether that future contained disaster or salvation.

The most common genres in the prophetic books are speeches. As a rule they are short, poetic addresses to the people as a whole, to a group, or even to an individual. When the prophets announced judgment they usually indicated the reasons for divine punishment in terms of the sins of those addressed. Remarkably, the prophets ordinarily present these speeches as the direct word of God as it has been revealed to them. In addition to speeches, most prophetic books also contain shorter or longer narratives and sometimes prayers, words addressed to God.

The apocalypse is a distinctive type of literature that arose in the late OT period. It is represented in the OT only in the book of Daniel, though there are somewhat similar materials in Isaiah 24–27 and Zechariah 9–14. An apocalypse is a long and elaborate report of a vision of the course of history and of its end. It generally is marked by a strong sense of the struggle between the powers of good and evil, belief in angels and demons, and in the resurrection of the dead. Such literature was widespread in the last two centuries B.C. and the first century A.D.

Origin and Growth: Relatively few of the books of the OT contain direct information concerning their time and place of origin or their author. Church and synagogue tradition remembers Moses as the author of the Pentateuch, but the books themselves contain no such claim. Most of the works of the OT are anonymous and undated. Consequently, if one wishes to understand the literature better by placing it in historical context, one must investigate all of the evidence at hand. Such investigation shows that in most cases it was a long and often complicated road from the first oral or written stages in the growth of a book, through its use in ancient communities of faith, to its subsequent acceptance as sacred Scripture. Many books, such as those of the Pentateuch, are composite works; that is, the words of more than one author have been combined to form the present book. Most of these writers or editors are anonymous, though in many cases their work can be dated. In a great many instances, what we have now in writing once was passed on as oral tradition. This would have been the case with many of the individual stories in the book of Genesis, many of the individual laws, and most of the short prophetic speeches. Moreover, works such as Psalms arose for use in public worship, including group singing. On the other hand, some books such as Job and probably Isaiah 40–55 arose as the written compositions of individual poets or prophets.

Moses (center), *The Well of Moses,* by Claus Sluter at Dijon, France, 1395–1406.

The development of the written literature of the OT spanned more than a thousand years, and even more if one includes the oral traditions that preceded the written material. Some of the oldest works, most likely poetry such as Exod. 15:21, probably arose before 1000 B.C., and the latest ones, such as the book of Daniel, in the last century or two B.C. But even that was not the end of the story. What originated in Hebrew was translated first into Greek and then into other languages such as Latin. Then in the modern age, beginning in the sixteenth century, a variety of new translations rendered into the vernacular of most peoples have been produced and printed. ***See also:*** Apocalyptic Literature; Bible; Canon; Law; Poetry; Prophet; Sources of the Pentateuch; Texts, Versions, Manuscripts, Editions. Old Testament quotations in the New Testament.

Introduction: The OT is quoted in the four Gospels, Acts, Romans, 1–2 Corinthians, Galatians, Ephesians, 1–2 Timothy, Hebrews, James, and 1 Peter. It is alluded to in every book of the NT except Philemon and 2 and 3 John. By one count, there are at least 2,000 clear uses of the OT in the NT. How a quotation is identified and distinguished from an allusion is a matter of dispute. In Mark, as few as 18 and as many as 57 quotations, along with about 160 allusions, have been enumerated by different scholars. Paul has about 100 quotations and many more allusions. Revelation has no quotations but over 400 allusions to the OT and is suffused with OT terminology and imagery.

The sacred books of the Jews were equally sacred to the first Christians, who were themselves either Jews or Gentiles who became thoroughly familiar with the Bible. The books of the OT are referred to most frequently as "the writing(s)" and also as "the oracles (Gk. *ta logia*) of God" (Rom. 3:2; Acts 7:38; 1 Pet. 4:11; Heb. 5:12; *chrematismos* in Rom. 11:4). The Pentateuch, the Prophets, and the Psalms (which are often treated as prophecy) are cited most frequently. For example, Isaiah is favored by Paul and the Gospels; Psalms is favored by Hebrews.

Modes of Reference: OT influences on the NT may be found in quotations, allusions, narrative parallels, themes, and language. Explicit quotations are often introduced by a formula such as "it is written" (Mark 7:6; John 2:17) or "it is said" (John 7:42). Some formulas contain and others lack the name of the book or speaker. Sometimes an unnamed prophet is invoked (Matt. 1:22–23; 2:5). In introducing quotations, the NT authors refer to a variety of speakers, including God (Heb. 1:1, 13), the divine oracle (*chrematismos;* Rom. 11:4), OT figures speaking in the Holy Spirit (Mark 12:36; Acts 28:25), and OT authors speaking through books attributed to them (Rom. 10:19, 20; 11:9). Other OT quotations have no introductory formula (Mark 4:12; 8:18) or receive a narrative introduction (Mark 12:36). Occasionally an introductory formula is used where no explicit OT passage is quoted (Matt. 2:23; John 7:38). Frequently more than one OT passage is blended into a mixed quotation (Mark 1:2–3, 11; 13:24–25; Matt. 11:10; 27:9) or a series of quotations is cited (Heb. 1; Rom. 10; John 12:38–40). A fulfillment formula is a special feature of at least ten quotations in Matthew (1:22–23; 2:15; 2:17–18; 2:23; 4:14–16; 8:17; 12:17–21; 13:35; 21:4–5; 27:9). One of these is followed by a quotation not found in the Bible (2:23). Several other passages have also been suggested as fulfillment passages (2:5–6; 3:3; 11:10; 13:14–15; 26:54, 56). In John, five quotations are introduced as fulfillments (12:38; 13:18; 15:25; 19:24, 36), and the fulfillment formula is used three times without an OT quotation (17:12; 18:9, 32).

Allusions, which are difficult to define precisely, are found in many contexts in the NT. Where an OT passage or theme is the subject of a sustained argument, a writer may include allusions to the passage or its context in the course of the exposition. A good example of this is found in Paul's argument on Abraham in Romans 4. Very often, however, allusions consist of suggestive words and phrases (e.g., Luke 1:25, alluding to Gen. 30:23). In many cases OT words, terms, phrases, metaphors, and symbols are used as a natural mode of expression by writers whose minds are thoroughly familiar with the Bible. For example, Luke-Acts is noted for its use of Septuagint (LXX) style and phrases; the writer of Revelation draws constantly on the OT, creating a new composition out of a wealth of biblical allusions, images, metaphors, and symbols; and the author of John draws upon many OT metaphors and symbols such as shepherd/sheep imagery (John 10) and manna (John 6).

Narrative parallels in which the situation and action of NT events match those of the OT may be seen in the infancy narratives (Matt. 1–2; Luke 1–2), which share patterns with the Jacob/Israel stories, the Moses and Exodus accounts, and the births of the patriarchs and Samuel. Luke models stories about Jesus on the Elijah/Elisha cycle (Luke 7), and Mark's passion narrative invokes Psalm 22. Claims that NT narratives have been wholly created out of OT narratives have not been substantiated, but NT authors clearly produced written versions of traditional stories in reliance on OT literary models.

OT themes related to creation, Adam, the patriarchs, Moses, the Exodus, David, and the like appear frequently in the NT. Prophetic themes concerning God's promises, sin, punishment, restoration, the remnant, salvation, God's servant and Messiah, and the like form the backbone of NT theological reflection on God, Jesus, and Christian life. Themes may be adduced with very little allusion to the actual text (e.g., Cain as an example of hatred in 1 John 3:12). Usually, however, themes and allusions go together, as in Romans 4 on the faith of Abraham and in Hebrews 7 on Melchizedek.

Finally, OT language, imagery, concepts, and cultural presuppositions pervade the NT documents to such an extent that the NT cannot be understood without the OT. As in any living tradition, the OT material is recontextualized and reinterpreted to serve new but related purposes by the NT authors.

OT QUOTATIONS IN THE NT

Text Form of Quotations: The Bible manuscripts discovered among the Dead Sea Scrolls (DSS) testify to multiple textual forms for many biblical books. These textual variants manifest themselves in the OT quotations found in the NT. Some quotations adhere more closely to one or another Greek version, some to a Hebrew version, and some to both or neither. Some of the textual variety may be explained by the way authors used Scripture. They often quoted imprecisely from memory, adapted OT texts to their new contexts in NT books, and conflated OT texts to produce a new passage based on OT words and phrases. In general, NT authors modified OT quotations in subtle ways, relying on the biblical text, Christian oral tradition, Jewish interpretative traditions, and their own understanding of biblical history.

Though most NT books contain a variety of text types in their OT quotations, they generally manifest an affinity for versions of the LXX. Specifically, Mark, Luke, and the early Gospel source Q frequently adhere to the LXX. Matthew, in reliance on Mark and Q, also uses the LXX, but his fulfillment quotations have a mixed text closer to the Hebrew. All of his quotations show the effect of editorial reworking in subtle ways. Paul agrees with various versions of the LXX more often than not and seldom quotes Hebrew versions that disagree with the Greek. But he frequently uses versions that agree with neither the LXX nor the Hebrew. Similarly, Hebrews works with the Greek OT but draws from text types found in both the Alexandrian and Sinaitic manuscripts and from texts of the Greek unavailable to us now. John contains four quotations that agree fully with the LXX and others that agree partially. Other quotations agree with the Hebrew, and some agree with neither the Greek nor the Hebrew versions available to us.

Uses of Scripture: OT quotations, allusions, and language are marshalled by NT authors for a variety of purposes that include an understanding of God's activities, of the status and roles of Jesus Christ, and of the principles and practices that should govern Christian life. These understandings of Jesus and Christian life are worked out in sayings, scriptural expositions, apologetic stories and arguments, polemics, moral exhortations, and liturgical formulations. Of special interest is the relationship of the followers of Jesus to Israel and to OT Law.

Many OT passages are used to explain and validate the special status of Jesus, with certain texts used in several NT books. The basic exaltation text is Ps. 110:1, which is quoted in the Gospels, Acts, the Pauline Letters, and Hebrews. Jesus' relationship with God as son is supported by Ps. 2:7, quoted in Acts 13:33; Heb. 1:5; and 5:5, and alluded to in a probably pre-Pauline formula in Romans 1:4. The same text may lie behind the divine words at the baptism of Jesus in Mark 1:11, though they mainly reflect Isa. 42:1. Passages from Psalm 118 are applied to Jesus in Acts 4:11; 1 Pet. 2:7; and twice in the synoptic Gospels and John (Matt. 21:42; Mark 12:10–11; Luke 20:17; Matt. 21:9; Mark 11:9; John 12:13). Jesus' future function as the exalted Messiah is expressed in terms of the "one like a son of man" (Dan. 7:13) in Matt. 24:30; Mark 13:26; and Luke 21:27. In Matt. 26:64; Mark 14:62; and Luke 22:69, Dan. 7:13 is combined with Ps. 110:1; in Rev. 1:7, it is conflated with Zech. 12:10. Daniel 7 is alluded to frequently in the Gospels and Acts. Jesus' suffering and execution are explained and justified with passages from Isaiah, Zechariah, and certain psalms that concern the righteous person who suffers. Almost every verse of Isaiah 53 is quoted or alluded to in connection with Jesus' sufferings, and the other suffering servant songs are cited as well. Isaiah 53 may lie behind the pre-Pauline statement in 1 Cor. 15:3 that "Christ died for our sins in accordance with the scriptures," and the passion predictions in, e.g., Mark 8:31. Isaiah 53 is also used for ethical teaching. Words from the suffering servant passage (Isa. 53) are used in a description of Christ in 1 Pet. 2:21–25, not to prove that his sufferings accord with God's plan as revealed in Scripture but for the sake of moral example. Zech. 9:9 is applied to Jesus' entry into Jerusalem in Matt. 21:5 and John 12:15, and Zech. 12:10 is applied to the crucifixion in John 19:37. Zech. 13:7 appears in Matt. 26:31 and Mark 14:27. Ps. 41:9 is alluded to in Mark 14:18 and quoted in John 13:18 to account for the treachery of Judas. Ps. 22:1 provides Jesus' cry of dereliction in Matt. 27:46 and Mark 15:34, and Ps. 22:18 is applied to the parting of Jesus' garments in all four Gospels (fully quoted in John 19:24). Psalm 69 is also widely used in connection with the Passion, principally in John 2:17; Acts 1:20; and Rom. 15:3 (cf. also Rom. 11:9–10).

The rejection of Jesus' followers by the majority of Jews and Gentiles is mitigated by reference to certain OT passages. Isa. 6:9–10 is quoted in Matt. 13:14–15; Mark 4:12; John 12:40; and Acts 28:26–27. Similar words in Isa. 29:10 are quoted in Rom. 11:8 along with words from Deut. 29:3. Paul also quotes Isa. 29:14 in 1 Cor. 1:19. From the point of view of faith, Jesus is both the precious cornerstone (Isa. 28:16, quoted in 1 Pet. 2:6) and the rock of offense (Isa. 8:14, quoted in 1 Pet. 2:8). These two quotations are conflated by Paul in Rom. 9:33 and may be alluded to in Matt. 16:18 and 16:23. Both Paul (Rom. 10:6) and John (12:38) quote from Isa. 53:1 in connection with rejection of Jesus. Speeches in Acts that are addressed to Jewish audiences (e.g., 2:14–36; 7:2–53; 13:16–41) are much richer in OT quotations and allusions than are those addressed to Gentiles and serve an apologetic purpose in the face of Jewish rejection of Jesus' followers. Numerous scriptural quotations also appear in Romans 9–11, where Paul is concerned with the Jewish rejection of

Jesus, and again in 1 Peter 2. These passages argue that Jewish rejection of Jesus is not a count against the Christian proclamation, because it is part of the fulfillment of what God has made known in Scripture. For example, Hab. 1:5 serves as a warning against rejection of Paul's teaching in Acts 13:41. Similarly, it is applied to the opponents of the Qumran community in 1QpHab 2:1–9. Hab. 2:4 ("the righteous shall live by his faith") is used as a key affirmation of justification in Paul (Gal. 3:11; Rom. 1:17) and as an exhortation to perseverance and faithfulness in Heb. 10:38 (just as in 1QpHab 8:2–3 it is applied to the Qumran community's observance of the law and faithfulness to the Teacher of Righteousness).

In relationship to the law, quotations of the OT occur either in matters of controversy or in order to confirm the law. Disputes concerning the Sabbath (Matt. 12), purity laws (Matt. 15), and divorce (Matt. 19) are argued in terms of scriptural laws and examples. The double love commandment is created from two OT texts (Deut. 6:4; Lev. 19:18) in Mark 12:28–31. The Beatitudes (Matt. 5:3–12) incorporate OT allusions, but these are not formal quotations. Paul argues for gentile freedom from the law using a series of intricate interpretations of scriptural quotations (Gal. 3–4).

The perenetic sections (i.e., moral teaching) of the Letters show familiarity with Jewish moral teaching. This explains why the same quotation sometimes appears in the work of two different authors. Thus, Prov. 10:12 ("love covers all offenses") is found, somewhat revised, in both 1 Pet. 4:8 and James 5:20. Deut. 32:35 ("Vengeance is mine") occurs in Rom. 12:19 and Heb. 10:30. In 1 Pet. 3:10–12, there is an extended quotation of Ps. 34:12–16, which provides the basis for the surrounding exhortation. Paul, in Rom. 12:20, makes similar use of Prov. 25:21–22. Paul also appears to know Jesus' use of Lev. 19:18 to summarize the law (Rom. 13:8–10; cf. James 2:8, where it is quoted with allusions to the wider context of Lev. 19).

Jewish liturgy included not only the reading of psalms and lessons from the OT but also the use of hymns and prayers that incorporate scriptural phrases and allusions. It can safely be assumed that from the earliest days Christian worship carried over many of these forms. In the NT, this influence, which occurs also in Jewish wisdom and apocalyptic contexts, is seen chiefly in the doxologies (e.g., Rom. 1:25; 9:5; 11:36; Rev. 4:8, 11; 5:9–10, 12, 13) and perhaps in the Beatitudes (Matt. 5:3–10). The hymn of the four living creatures in Rev. 4:8 is based on Isa. 6:3 and includes an allusion to Exod. 3:14.

Arguments Based on Scripture: Besides the use of Scripture as proof-texts, the NT contains examples of arguments conducted entirely in terms of scriptural interpretation, notably in the major Pauline Letters and in Hebrews. Thus, Paul argues justification by faith in Galatians and Romans on the basis of Scripture because his opponents share his respect for it and must be defeated on their own ground. In Galatians 3 and Romans 4, direct quotations from Genesis are subjected to detailed analysis, and further allusions are adduced in the process. An important distinction is made in Gal. 3:16 by pressing the exact meaning of the words. Another example is the allegory of Hagar and Sarah in Gal. 4:21–31, where the main argument depends on allusions to Genesis 16 and 21, but Isa. 54:1 is adduced to support the interpretation. Other instances are the allusions to Israel in the wilderness (1 Cor. 10:1–13) and the highly complex exposition of Exodus 33–34 in 2 Corinthians 3, contrasting the old and new dispensations by means of an *a fortiori* argument. In Hebrews, the argument of the entire Letter depends on the contrast between old and new. Quotations and allusions are taken up with regard to Moses (chap. 3), the promised land (chap. 4), Melchizedek (chap. 7), the covenant (chap. 8), and the sacrificial system (chaps. 9–10). Apocalyptic passages (e.g., Mark 13; Rev.) make a sustained use of images and phrases from the OT to create a new symbolic presentation of the plan of eschatology on a cosmic scale. Many of the biblical images used in Revelation can be paralleled in Jewish apocalyptic writings. The central figure of the "Lamb that seemed to have been slain" (Rev. 5:6) as the image of Christ is derived from imaginative use of Isa. 53:7 and other sacrificial passages used in connection with the death of Christ.

Sources and Background of OT Interpretation: Although the use of the OT in the NT has distinctive features, it is comparable in many ways to interpretative procedures used in Jewish and Hellenistic literature. NT writers most probably drew upon rich exegetical traditions in Judaism and early Christianity both written and oral. Although the hypothesis of a widely disseminated, early Christian collection of testimonies remains unproven, it is probable that Christian teachers and missionaries had settled on certain OT passages that were especially helpful in explaining and defending the teachings about Jesus and, following the Greek custom, may have excerpted passages in private, written notes.

NT interpretation of the OT and use of OT quotations have much in common with the presuppositions, approaches, and techniques found in Qumran "pesher" commentaries and later rabbinic midrashic collections and Targums. Comparison must be made with rigor and caution, however. The designation of NT interpretations as "midrashic" has little explanatory value without detailed exposition. Since rabbinic midrashic traditions and targumic traditions have been preserved only in collections dated long after the NT, claims that NT writers were influenced by these traditions must be supported by Second Temple evidence from the DSS and so-called Apocrypha

and Pseudepigrapha. The rabbinic rules for interpretation (listed as seven, thirteen, and thirty-two rules in different versions), themselves partly derived from Hellenistic exegetical practices, are an *ex post facto* categorization of exegetical procedures rather than a set of rules that were followed.

Similarities and differences between Jewish and NT interpretations are illuminating and productive for NT interpretation. Paul explains one OT passage by adducing others (Rom. 10:18–21) and uses a very common *a fortiori* argument (Heb. *qal wa-homer*) in 2 Cor. 3:11, "For if what faded away came with splendor, what is permanent must have much more splendor," as does John (7:23). The discourse on the Bread of Life in John 6:25–59 is an extended midrashic exposition of the text quoted in 6:31, "He gave them bread from heaven to eat" (cf. Exod. 16:4, 15; Ps. 78:24; John's text is not an exact quotation). 1 Cor. 10:4 alludes to a midrashic tradition that the rock followed Israel in the wilderness and thus shows that this tradition was known in the first century.

Some quotations show features found in the Targums, the Aramaic translations of the Scriptures used in synagogues where Aramaic was the language of the people. As the translation, originally given orally, followed the reading of the lesson in Hebrew, it is often paraphrastic and explanatory, sometimes modernizing the ideas to make them more relevant to the congregation. Paul has examples of this in 1 Cor. 10:1–14 (the theme of Israel in the wilderness applied to temptations of Christians) and Rom. 10:6–8 (Deut. 30:12–14 adapted and applied to Christ).

The DSS have presuppositions and procedures in common with NT documents. According to the *Covenant of Damascus* (CD) 6:19, the community regarded itself as the people of the New Covenant, and according to the *Manual of Discipline* (1QS), this was specifically to "prepare the way of the Lord" (8:14, quoting Isa. 40:3). Messianic prophecies are applied not only to the messiah of Israel, who is the legitimate king of the line of David, but also to the community as a whole. Thus, Amos 9:11 is applied to the Messiah in the *Florilegium* or *Eschatological Midrash* from Qumran Cave 4 (4QFlor 1:12), but refers to the "congregation" in CD 7:6–17. The Psalms are treated as prophecy and so are given an eschatological interpretation. Thus, Ps. 2:1–2, on the raging of the nations against God's anointed one, is interpreted in 4QFlor 1:19 as follows: "Interpreted this saying concerns [the kings of the nations] who shall [rage against] the elect of Israel in the last days." "The elect" is plural, meaning the whole community, not just the messiah, as the psalm ("his anointed one") implies. Behind this method of interpretation is the idea of God's plan, kept secret in past ages, but revealed in a "mystery" (Heb. *raz*) to the prophets and now coming to pass in the last times. There is also a Christian expression of this idea (Col. 1:26). The biblical commentaries found among the DSS expound the Prophets and Psalms through a verse-by-verse exposition of the text in relation to the history and eschatological expectations of the community. Similarly, many of the quotations of the Prophets and Psalms in the NT are applied to Jesus and the church in relation to the eschatological plan of God, though not in commentary form.

The citation of brief and long quotations from memory and the use of anthologies as well as original texts was common in Greco-Roman literature. Greek and Latin authors adapted texts to the grammar and style of the literary context in which they used them. They freely omitted irrelevant or contradictory phrases and sentences and sometimes added words and interpretative comments. Similar phenomena are found in NT quotations from the OT. A text may be telescoped so as to concentrate attention on the particular point at issue or to leave out matter that appears unsuitable to the interpretation. Thus, in Matt. 12:18–21, part of Isa. 42:3–4 is omitted from v. 20 because it seems to contradict the quietness of Jesus' ministry. The versions of Isa. 6:9–10 in both Mark 4:12 and John 12:40 are greatly abbreviated in different ways. Conflation (combination and mixture) of texts usually involves some adaptation of the text to make the quotations fit together. Paul does this frequently. Matthew's account of the death of Judas Iscariot (Matt. 27:9) includes a composite quotation of Zech. 11:12–13 that involves phrases from Jer. 32:6–15 and 18:2–3. This seems to be the reason that it is attributed to Jeremiah in the fulfillment formula.

In summary, each of the quotations, allusions, and uses of the OT in the NT requires detailed study in order to determine its exact meaning and purpose in context. The NT authors used OT verses, language, narrative patterns, imagery, and symbolism in a multitude of complex ways to respond to a wide variety of internal needs and external challenges to the early Christian communities. They interpreted Scripture in a robust and serious manner, innovating in continuity with an ever growing and changing tradition. ***See also*** Hermeneutics; Messiah; Midrash; New Testament; Old Testament; Scrolls, The Dead Sea; Targums.

olive, an evergreen tree and its fruit, an oval-shaped oil-bearing drupe. As today in Mediterranean regions, the olive in antiquity was the fruit par excellence; either the fresh fruit or its oil found a place at every meal. The olive tree was so highly regarded in antiquity—its fruit was a mainstay of the diet, it was ubiquitous to the biblical landscape (Deut. 8:8), even clinging to rocky hillsides, and it was long-lived and venerable—that it is no wonder it assumed an almost mythical character. The tree became a symbol of fertility (Ps. 128:3), beauty (Jer. 11:16; Hos. 14:6), divine blessing (Deut. 7:13), peace and bountifulness (Gen. 8:11), and it was inextricably associated with Jesus (the Mount of Olives [Mark 14:26; John 8:1]).

With an increased awareness among archaeologists of the necessity to collect paleobotanical specimens, we now know a great deal more about the origins of agriculture in the Near East. It has long been known that cereal cultivation (generally equated with a surge toward settled life in the Neolithic period, ca. 8000–4500 B.C.) preceded fruit tree husbandry. It is now evident that olive cultivation, well established in the Early Bronze Age (third millennium B.C.), had its origins in the preceding proto-urban age. The earliest known domesticated olives have been recovered from fourth-millennium B.C. Chalcolithic sites, e.g., at modern Teleilat Ghassul near the northern tip of the Dead Sea. Fruit tree cultivation in this area would necessarily have involved irrigation, a relevant fact supporting domestication. The olive pit is easily identifiable and, despite some overlap, domestic varieties are generally larger than their wild relatives. Besides actual floral remains, evidence for an established olive oil industry in the Early Bronze Age appears in the form of Egyptian texts that mention imports from Canaan and in the large basins and jars probably used as containers and transport vessels. At Ras-Shamra, ancient Ugarit, similar basins have been found in association with an oil-pressing installation, dated to the Late Bronze Age (ca. 1500–1200 B.C.).

Olive.

Numerous olive oil installations have been found throughout the biblical lands. The basic technology, with some variation, involved two separate processes: the olives were crushed, then subsequently squeezed. The first process required a huge stone crushing wheel, which was set on edge, pivoted on a vertical beam, and rolled on top of a circular stone basin upon which the olives were placed. A few rotations of the wheel were sufficient to crush the olives. Treading the olives was another method (Mic. 6:15). The crushed olives were then placed into special baskets and set so the oil drained into a basin; this was the "first oil" or "beaten oil," the oil used for lighting lamps (Exod. 27:20). The oil-pressing operation consisted of a beam to which stone weights (average weight: 300 kg.) were attached and a vat that included a deeper depression beside it to collect the oil. Pressure from the beam on the olives in the vat squeezed the oil out of the olives. Eventually the sediment and water settled while the pure oil rose to the surface.

With its characteristic gnarled trunk and lancelet bluish green leaves and white undersides, the olive tree thrives in the Mediterranean climate of hot, dry summers and cool, damp winters. It can survive for a thousand years; some specimens are said to date from the Roman period. The tree was propagated through grafting (Rom. 11:17–24). These shoots at the base of the parent tree are compared to a family blessed with many children (Ps. 128:3).

There was hardly a phase of life not touched by the olive tree. It was used for food (Num. 11:8), for fuel for lamps, as a medicine (Isa. 1:6; Luke 10:34), as an anointing oil (1 Sam. 10:1; 2 Kings 9:3; Isa. 61:1), in sacrifice (Lev. 2:4; Gen. 28:18), and its wood was used for furniture (1 Kings 6:23, 31–33). The olive branch was the first vegetation seen by Noah after the Flood (Gen. 8:11); in Greek mythology the olive was a gift from the goddess Athena to humankind. Today the olive branch remains an emblem of peace and bountifulness. S.L.R.

Olives, Mount of, a high hill to the east of Jerusalem. It is a comparatively good area for growing olives in the poor land surrounding Jerusalem. Rabbinic tradition claimed the olive branch was brought to Noah from this mount, which escaped the flood (*Midr. Gen.* 3:6). An area of the mount was appropriately called

Gethsemane (Heb., "oil press"), probably being a garden area where the fruit of the mount was processed (John 18:1). Jesus often prayed here (Matt. 26:36; Mark 14:32; Luke 22:39–46).

Pilgrims, like Jesus, who could not find lodging in the city stayed on the mount (John 18:1; Luke 22:39). Jesus preferred the Bethany area of the mount (Matt. 21:17).

The mile-long Mount of Olives dominates Jerusalem, rising 230 feet above the Temple Mount. It is part of a Senonian limestone range of hills protecting Jerusalem that resulted from a bifurcation of the highland ridge dividing two miles north of the city and uniting again just south of it. The Mount of Olives is the central section of the ridge's eastern branch, being separated from the city by the Kidron Valley. The section north of it is called Scopus, "lookout." The southern section begins after the Mount of Olives descends to the level of the Temple Mount. This is known as the Mount of Offense because Solomon built pagan shrines here (1 Kings 11:7).

The Mount of Olives was Jerusalem's watchtower. Every approach from Transjordan as well as from the north and south is visible from it. Some have suggested that the mountain to which Jesus was taken from Jerusalem (Matt. 4:8) and "led up" from the Judean desert (Luke 4:5) to view the kingdoms of the earth may have been this mount.

Jerusalem also communicated to the world from here by signal fires, as when the beginning of each month was announced. Isaiah may have had this mount in mind as the place for announcing the king's coming (Isa. 40:9). This "high place" was a natural location for the first sanctuary in the Jerusalem area, Nob (1 Sam. 21:1; 2 Sam. 15:32). This probably was in the area of the present-day Augusta Victoria Hospital.

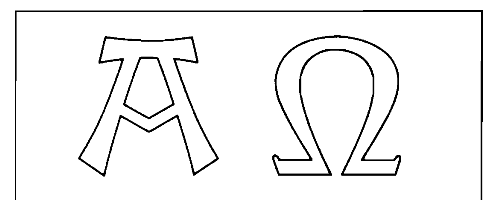
This natural bulwark against attack from the east was further strengthened by two villages at the base of its slope facing the Judean desert, Bahurim at the junctions of Mount Scopus and Mount of Olives on the north, and Anania or Bethany near the descent to the Mount of Offense on the south.

Bethphage fortified the center of the mount. This was the terminal of the Jericho road. From this strategic location Jesus entered Jerusalem at the completion of his ministry (Matt. 21:1; Mark 11:1; Luke 19:29).

Because the Temple was totally open to view from the mount, people were to be mindful of their conduct there. The red heifer was slaughtered on the mount as the high priest looked into the Holy of Holies. A bridge linked the eastern gate of the Temple Mount with the Mount of Olives. Because burial inside the city was forbidden, the mount gradually filled with tombs, in part due to the belief that on the last day the dead would rise to gaze on the Holy Place. The author of Revelation may refer to this mount as the place from which the descent of heavenly Jerusalem is observed (Rev. 20:10).

As a bulwark whose penetration meant the destruction of Jerusalem it became a symbol of the way of defeat. David climbed the mount in humiliation as he fled from Absalom (2 Sam. 15:13–30). The description of Jesus' coming to the mount on the night of his betrayal may echo this story (John 18:1). Isaiah pictures the Assyrians advancing to Nob, whence the city was cursed (Isa. 10:32). The way to exile across the mount established this as the way of defeat. Ezekiel pictured Jerusalem's departed glory resting here before it disappeared (Ezek. 11:23). *The Testament of Naphtali* uses the mount as the place of the vision that showed the various conquests of the city until the Hellenistic period (325–63 B.C.; *T. Naph.* 5:1–8). Jesus also used the mount as his podium for pronouncing judgment over the city (Luke 19:37–44; Matt. 24:3; Mark 13:3). Some have seen the stationing of the Tenth Legion of Rome on the mount in A.D. 70 as part of the fulfillment of his prophecy (Josephus *War* 5:69–70).

Hope rose that the defeat of Jerusalem would be reversed and that the Lord would return to his city (Ezek. 43:2; Isa. 40). Zechariah pictures God on that day standing on the mount, which will be divided as he enters the city. Following his entry, this now useless defense work will be leveled (Zech. 14:4, 10). The geographic outline of the synoptic Gospels is influenced by this vision, as Jesus travels from Jericho to the Mount of Olives on his way to cleanse the Temple.



The association of the mount with the departure and return of God's glory provides the natural setting for the ascension of Jesus and of his promised return (Luke 24:50; Acts 1:12). ***See also*** Bahurim; Bethany; Bethphage; Gethsemane; Jericho; Jerusalem; Kidron; Nob. B.E.S.

Olivet (ol´i-vet). ***See*** Olives, Mount of.

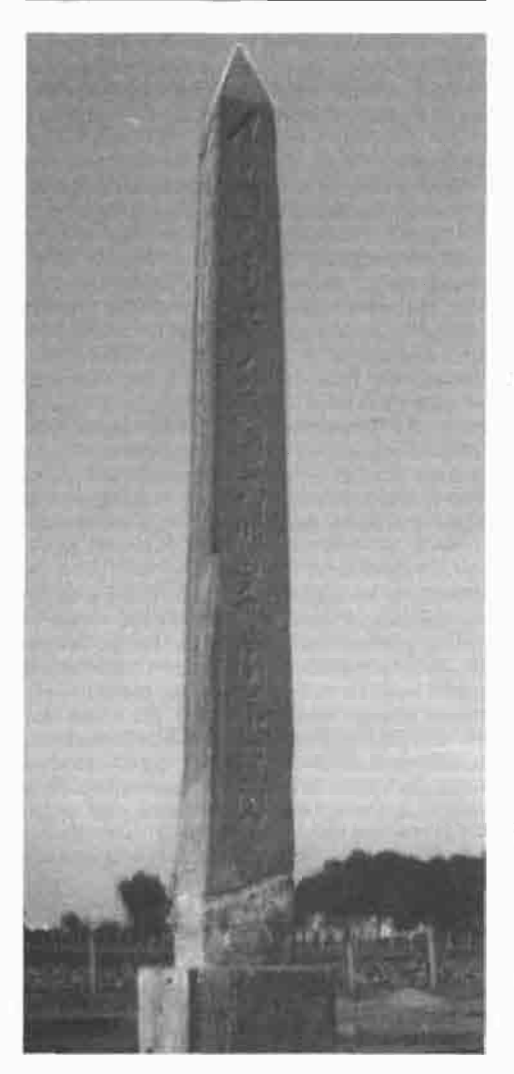
Olympas (oh-lim´puhs), a man in Rome whom Paul greets along with other members who may be in the same household (Rom. 16:15).

omega (oh-meg´uh), the long "O" sound and the last letter in the Greek alphabet. It thus came to mean "last." It is used symbolically with alpha (the first letter in the Greek alphabet) in Revelation to refer to God and Christ (1:8; 21:6; 22:13). ***See also*** Alpha.

The letters *alpha* (left) and *omega.*

omer (oh´muhr). **1** A dry measure equaling one-tenth of an *ephah* (ca. three-fifths of a bushel; Exod. 16:36). **2** The first sheaf (Heb. *'omer*) of barley harvested in the spring which was to be brought to the priest who performed an elevations offering with it at the sanctuary on the "day after the Sabbath" (Lev. 23:9–15). Originally, "Sabbath" may have referred to the first Saturday after the initial harvest, although there is no certainty on that. Later, the *'omer* ritual became dependent on the fixed date of the Feast of Unleavened Bread. ***See also*** Feasts, Festivals, and Fasts; Weights and Measures.

Omri (om´rī; Heb., meaning uncertain; possibly, "worshiper of Yahweh"), the sixth king of Israel (ca. 876–869 B.C.), a contemporary of King Asa of Judah and founder of a dynasty that included his son Ahab (ca. 869–850), Ahaziah (ca. 850–849), and Joram (ca. 849–842). According to 1 Kings 16:23, Omri ruled Israel for twelve years, six of them in Tirzah. The background to his ascent to the throne in Tirzah was the extinction of Baasha's dynasty and the subsequent power struggle among the high officers of the army. When Zimri, an army officer, assassinated Elah, son of Baasha, "all Israel" made Omri "the captain of the host," king of Israel. Omri and "all Israel" with him captured Tirzah, with Zimri taking his own life. The power struggle continued between Omri and Tibni, son of Ginath (1 Kings 16:21–22), each supported by "half of the people," and ended with the latter's death.



Of all Omri's deeds after he became king of Israel, the only one mentioned in the Bible is the founding of a new capital at Samaria, which marked a new chapter in the history of the Israelite kingdom. From a historical point of view, Omri was to the kingdom of Israel what David before him was to the United Kingdom. Both brought stability and prosperity to a troubled land by establishing a dynasty in a neutral political center. Archaeology has demonstrated the fact that Samaria was unoccupied until Omri's time and has revealed a high quality of workmanship under the reigns of both Omri and Ahab. The name "Omri" became an established term in Assyrian documents to indicate the Israelite kings even after the death of Omri and his descendants. Jehu, who founded a new dynasty in Israel, is called by Shalmaneser III "the son of Omri"; and Assyrian annalists continue to refer to Israel as the "land of (the house of) Omri" for a hundred years after the end of his dynasty.

According to the stele of Mesha, king of Moab, Omri gained possession of Madaba in Transjordan. Such successes were the result of a policy of mending quarrels and establishing peaceful relations with his neighbors. The prolonged war between Judah and Israel was terminated with the kings of the Davidic line accepting (at least temporarily) the existence of the Northern Kingdom. Omri entered into an alliance with Ethbaal, king of Sidon, which was sealed by the marriage between Ahab, Omri's son, and Jezebel, Ethbaal's daughter. The triple alliance between Israel, Judah, and Phoenicia served as a counterweight to the threat of Aram-Damascus, which continued to influence affairs even in Samaria. There were "bazaars" in Samaria belonging to Damascus already in Omri's time (1 Kings 20:34), and Israel was forced to grant special privileges to Aramean merchants.

Ostraca (fragments of pottery on which people have written) of this period, unearthed at the "ostraca house" in Samaria, include both Yahweh and Baal names, indicating syncretism and apostasy in line with the negative assessment of Omri on the part of the Deuteronomic historian (1 Kings 16:25–26). ***See also*** Ahab; Jehu; Mesha; Samaria, City of; Shalmaneser. D.L.C.

On (on; Egyptian, "city of the pillar"). **1** An ancient city and religious center in northern Egypt whose ruins (modern Tell Hisn and Matariyeh) are located in the suburbs of modern Cairo, 7 miles northeast of the center of the city. On, called in Greek Heliopolis ("city of the sun"), was Egypt's center of sun worship, where the solar god Re (Atum) was venerated. The Temple of Re in On was the next largest temple in all Egypt, surpassed only by that of Amun in Thebes. The city was famous for its obelisks (thus its name), one of which still stands there today, almost four thousand years old. Two of On's obelisks, erected there by Thutmose III in the sixteenth century B.C., now stand in Western countries, one in Central Park of New York City, the other on the Thames embankment in London.

In the Bible, Joseph married an Egyptian girl named Asenath, the daughter of Potiphera, priest of On (possibly the high priest there; Gen. 41:45, 50; 46:20). According to the Septuagint, On (Heliopolis) was one of the cities in Egypt built by the Israelites (Exod. 1:11). Isa. 19:18 may contain a reference to On in its prediction that the "City of the Sun" (according to some Hebrew manuscripts) will be one of the five cities in Egypt where Hebrew-speaking worshipers of Yahweh will dwell. (In the second century B.C. there was a community of Jews and a Jewish temple in Leontopolis, just north of Heliopolis.) In his oracle concerning Egypt, Jeremiah predicts that Nebuchadnezzar will destroy the temples of Egypt and will demolish the "pillars" (i.e., obelisks) of the "Temple of the Sun," probably referring to the Temple of Re in On (Jer. 43:13). Ezekiel predicts that judgment will befall the city of On (written *'awen,* perhaps as a pun; *'awen* in Hebrew meaning "trouble, wickedness") and that the inhabitants will be taken into captivity (Ezek. 30:17). According to later Christian tradition the Holy Family lived in Heliopolis during their sojourn in Egypt, and an ancient well and a sycamore

Obelisk of Pharaoh Senwosret I (1971–1926 B.C.) at modern Tell Hisn, near Cairo, and site of biblical On.

tree at the site are associated by local tradition with events of the family's visit.

2 The son of Peleth, a leader of the tribe of Reuben who joined the rebellion of Korah against Moses in the wilderness (Num. 16:1). ***See also*** Egypt; Joseph. D.A.D.

Onam (oh´nuhm; Heb., "vigorous"). **1** The son of Shobal and grandson of Seir the Horite (Gen. 36:23). **2** The son of Jerahmeel, a descendant of Judah (1 Chron. 2:26, 28).

Onan (oh´nuhn; Heb., "power," "wealth"), the second son of Judah and the daughter of a Canaanite named Shua (Gen. 38:4; 46:12; Num. 26:19). After the death of Er, Judah's firstborn, Judah instructed Onan to perform the levirate marriage rite with Er's wife, Tamar. Onan failed in this duty and apparently let his semen go to waste (presumably by *coitus interruptus*), an act displeasing to God and for which he was slain (Gen. 38:8–10). The Judahite genealogy in 1 Chron. 2:3 does not mention the death of Onan. ***See also*** Marriage.

Onesimus (oh-nes´uh-muhs; Gk., "useful"), the slave of Philemon for whom Paul made an appeal in his Letter to Philemon. Onesimus, who was alienated from his master, visited Paul (probably in Ephesus) apparently to seek the latter's service as a mediator. During the visit, Paul converted Onesimus to Christianity, thus becoming his spiritual father (Philem. 10). Paul sent Onesimus back to Philemon with the Letter, which urges Philemon to receive Onesimus as "a beloved brother" (Philem. 16), that is, as a member of the church, and "no longer as a slave" (i.e., to be manumitted). Although Onesimus had formerly been "useless" to his master, he had now become "useful" to both Philemon and Paul (Philem. 11). The conclusion that Onesimus was released for service to Paul's mission is supported by the description of him in Col. 4:9 as "the faithful and beloved brother." The notion that he is to be identified with the Onesimus who was bishop of Ephesus some sixty years later is fanciful (a tradition identified him as the bishop of Beroea). More likely, the prominence of Onesimus in the church led to the use of his name by later leaders. Melito of Sardis (mid-second century) wrote to his "brother Onesimus." In the fourth century, two other bishops bore the name "Onesimus." ***See also*** Paul; Philemon; Philemon, The Letter of Paul to. W.R.B.

Onesiphorus (on´uh-sif˝uh-ruhs), a Christian who is commended for special kindnesses to Paul, both in Ephesus and during Paul's Roman imprisonment (2 Tim. 1:16–18), and whose "household" is twice mentioned (2 Tim. 1:16; 4:19). These references may imply that Onesiphorus had died (cf. 2 Tim. 1:18).

Ono (oh´noh), a town near the southern end of the Plain of Sharon. It was built by Benjaminites (1 Chron. 8:12), is to be identified with modern Kefr Ana, and is mentioned in the Karnak list of Pharaoh Thutmose III. Along with Lod it was reoccupied after the Exile (Neh. 11:35) and Nehemiah's enemies waited to meet him in the plain of Ono (Neh. 6:2).

onycha (on´i-kuh; Heb., "nail," "claw," "husk," or "flap"), an ingredient for incense (Exod. 30:34), probably from a marine shellfish.

onyx, a type of quartz with varicolored bands. Onyx is the usual RSV translation of a Hebrew

word (*shoham*) that designates a precious stone, found in the land of Havilah, according to Gen. 2:12, and ranked with gold of Ophir (Job 28:16). It heads the list of precious stones provided by David for the Temple (1 Chron. 29:2). The two stones on the shoulders of the high priest's ephod were onyx (Exod. 28:9–12) and so was the eleventh stone on his breastpiece (Exod. 28:20). In Ezek. 28:13 "onyx" translates a different word (Heb. *yashepeh,* called "jasper" in Exod. 28:20), while *shoham* is translated "beryl." Onyx appears in Rev. 21:20 (Gk. *sardonyx*) as one of the twelve jewels adorning the wall of the heavenly Jerusalem. P.A.B.

Ophel (oh´fel; Heb., "hill"), the ridge extending south between the Kidron and Tyropoeon valleys that was fortified by David after his capture of Jerusalem (2 Chron. 27:3; 33:14). Repaired by Nehemiah after the Exile (Neh. 3:26–27), it was also the dwelling of some Temple personnel (Neh. 11:21). It has been most recently excavated by Yigal Shiloh.

Ophir (oh´fuhr), a people descended from Shem (Gen. 10:29; 1 Chron. 1:23). The land of these people is designated by the same name (1 Kings 9:28; 10:11) and was a famous source of gold (Job 22:24; 28:16; Ps. 45:9; Isa. 13:12).

The location of Ophir is uncertain. Suggestions have ranged from Africa to India and Arabia. It could be reached most easily by ship (1 Kings 9:28; 10:11), and speculations about cargo sources have led to associate Ophir with Punt in Africa. The association with some other names has been used in support of an Arabian identification. ***See also*** Tarshish. R.S.B.

Ophrah (of´ruh). **1** A town belonging to the Abiezrite clan of the tribe of Manasseh (Judg. 6:11, 15), the home of Gideon (Judg. 6–8), and the scene of Abimelech's slaughter of his seventy brothers (Judg. 9:5). Its location is disputed. Proposed identifications include: modern et Taiyiba, in the territory of Issachar, east of Mt. Moreh; Affula, on the western flank of Mt. Moreh; and the Iron Age site of et Taiyiba, in the hills of Manasseh, ca. four and a half miles south of Megiddo. **2** A town of Benjamin (Josh. 18:23; cf. 1 Sam. 13:17), identified with modern Taiyiba, four miles northeast of Bethel; it is evidently the Ephron of 2 Chron. 13:19, Aphairema of 1 Macc. 11:34, and Ephraim of 2 Sam. 13:23 and John 11:54. **3** A descendant of Judah (1 Chron. 4:14). D.A.D.

oracle, a message from a god, usually in response to an inquiry; also the sacred precincts whose powers made it possible for the oracle-prophet to consult the god. The Greco-Roman world knew three types of oracles: the oracle obtained through the casting of lots; the dream oracle obtained by sleeping in the sacred precincts, usually connected with healing; and the inspired oracle by which an oracle-prophet responded to inquiries. Though oracles were associated with a

Ancient site at Delphi, Greece, of one of the best-known oracles of the Greco-Roman world.

place, other prophets, diviners, and soothsayers might be employed by the state to give advice and to travel with the army, or they might set up practice in the local marketplace.

The lot type of oracle occurs in the OT as *urim* and *thummim* (1 Sam. 14:41; 28:6; Exod. 28:29; Deut. 33:8; Lev. 8:7; Num. 27:21). Acts 1:26 reports that lots were cast to decide who would replace Judas, who committed suicide after betraying Jesus. Dream oracles are reflected in Saul's attempt to consult Samuel before a battle (1 Sam. 28:7–25) and the interpretation of dreams by "the wise" (Gen. 40:8; 41:25, 39; Dan. 2:19–47; 5:11–12). They guide Joseph (Matt. 1:20; 2:13, 19) and the early community (Acts 10:10, 30; 9:10). Inspired oracles could either respond to inquiries or be unsolicited prophecies. Some Israelite prophets were attached to the Temple. Other "free prophets" pronounced oracles of salvation and judgment in a cultic setting (cf. Jer. 4:10–12; Ezek. 18:9–13). Paul relates a healing oracle (2 Cor. 12:9) and oracles about the last days (1 Cor. 15:51–52; 1 Thess. 4:16–17a). Other oracles predict suffering (1 Thess. 3:4; Acts 21:11; 11:28; 18:9–10; 23:11; 27:23–24). ***See also*** Lot, Lots; Magic and Divination; Prophet; Urim and Thummim. P.P.

oral materials, sources, and traditions, stories, songs, poetry, and other materials of varying types and lengths that circulated in oral or written form and on which the final texts of the OT and NT are based. In ancient Israel stories about Abraham, Isaac, Jacob, Moses, the Exodus, the wilderness wanderings, and the conquest of the land of Canaan were told again and again by parents to their children (see Exod. 12:26–27; 13:14–15; Josh. 4:6–7) and by skilled storytellers to larger gatherings of the community. Later stories dealt with judges (such as Deborah, Gideon, and Samson), kings (Saul, David, Solomon, and their successors), prophets (such as Samuel, Nathan, Elijah, and Elisha), and other key figures and events.

Also many songs (e.g., Gen. 4:23–24; Exod. 15:1–18, 21; Num. 21:17–18; Judg. 5), laws, proverbs, psalms, and especially most prophetic utterances arose orally. Remembering such traditions was a valued skill.

As these materials were handed down from generation to generation, they underwent change by becoming embellished, refined, and reinterpreted. Traditions that had similar content or style were brought together into, for instance, a cycle of stories about Abraham, a collection of laws (e.g., the Covenant Code in Exod. 20:22–23:19 or the Holiness Code in Lev. 17–26), or a series of prophetic utterances about a certain theme (e.g., those in Mic. 1–3 or in Mic. 4–5).

Such collections of traditions could in turn become sources for the later writings that we have in our present OT. Four great sources probably lie behind our Pentateuch: about the time of Solomon (latter half of the tenth century B.C.) the Yahwistic source (commonly called J), beginning with Gen. 2:4b and continuing through Genesis, Exodus, and Numbers, was probably compiled out of many of the early oral traditions; the Elohistic source (called E), also in Genesis, Exodus, and Numbers, emerged perhaps a century later and drew more on traditions from the Northern Kingdom than did the southern J; D, the source for much of Deuteronomy, brought together mostly the northern laws during the seventh century; and P, the Priestly source to be found from Genesis 1 through Deuteronomy 34, was a postexilic (late sixth–early fifth century B.C.) combination of both narratives and laws. Each of these sources has a distinctive point of view and style. They all eventually became combined into the Pentateuch as we know it.

Many other sources existed for other parts of the OT. A few times they are even mentioned: the Book of the Wars of the Lord (Num. 21:14); the Book of Jashar (Josh. 10:13; 2 Sam. 1:18); the book intended for Joshua (Exod. 17:14). In Isa. 8:16 the prophet orders preservation: "Bind up the testimony, seal the teaching among my disciples." Jeremiah 36 recounts an interesting story of the gathering of some of his utterances. There is also a striking incident described in 2 Kings 22–23 about a written source—often thought to be the source D—that is found and then is used in King Josiah's religious reformation.

Oral traditions and written sources preceded the final form of much of the NT as well, although this process was only decades long in contrast to the centuries during which some of the OT grew. After the death of Jesus the early believers spoke repeatedly about his life, ministry, and death. They recounted many of his sayings, including terse paradoxes (e.g., Mark 10:31), proverbs (e.g., Matt. 6:27), prophetic statements (e.g., Mark 1:15), and comments about law and piety (e.g., Mark 3:4). Equally important were the numerous parables and miracle stories.

Such materials, originally oral, became collected into various sources on which the writers of the Gospels later drew (Luke 1:1–4). A careful comparison of the similarities and differences among Matthew, Mark, and Luke suggests at least the following sources: various short writings about Jesus to aid in the preaching and teaching ministry of the early church, serving as the primary sources for Mark, certainly the first Gospel to be written; a sayings source commonly called Q (for German *Quelle*, "source") with some two hundred verses that Matthew and Luke have in common but that are not in Mark; another source on which only Matthew drew; and also one distinctive to Luke. The Gospel of Mark itself served as one of the primary sources for Matthew and Luke. However, the Gospel of John, although written after the

other three, did not seem to use them as sources but rather drew directly on older oral traditions. Paul probably wrote his Letters without benefit of many sources other than some sayings of Jesus (e.g., 1 Cor. 7:10–11) and some church formulations, such as the christological hymns in Phil. 2:6–11 and Col. 1:15–20.

Oral tradition was handed down among Jewish scribes and rabbis after the close of the OT era. This occurred mainly in the form of interpretations of the Torah—expositions of its legal stipulations (*halakah*) and sermonic expansions of its narrative parts (*haggadah*). These were transmitted orally for centuries and finally achieved written form in compilations known as the Mishnah and the midrashim. ***See also*** Sources of the Pentateuch. D.A.K.

ordain, ordination, to establish, determine, or appoint by one with authority to do so. As primary authority, God ordains in the sense of establishing the moon and stars (Ps. 8:3), appointing creatures for special purposes (Jon. 1:17; 4:6–8), setting geographical boundaries (1 Chron. 17:9; Acts 17:26), establishing governments (Rom. 13:1), and fixing the time of judgment (Acts 17:31). God is sometimes portrayed as so totally sovereign that events are described as foreordained, such as the salvation of the faithful (Rom. 8:29–30; Acts 13:48) and the damnation of the wicked (Jude 4). Within God's sovereign purpose, according to the NT, Christ's special place is ordained in the sense of appointed (Acts 3:20; Heb. 1:2) and designated (Rom. 1:4).

Those with authority derived from God also ordain. Angels ordained the law (Gal. 3:19), Moses (the law) appointed priests (Heb. 7:28), and David and Samuel appointed gatekeepers (1 Chron. 9:22).

Persons who received authority to perform special religious duties were ordained for those tasks. Jeremiah was appointed a prophet (Jer. 1:5), priests in Israel were ordained (Heb. 5:1), the Twelve were appointed by Jesus to preach and heal (Mark 3:14–15), elders were appointed by Paul and Barnabas (Acts 14:23) and by Titus (Titus 1:5), and persons were appointed by churches to various other duties (Acts 6:3; 13:2–3; 15:2). Paul not only understood himself ordained to be an apostle (Gal. 1:15) but that all who ministered in the Church were appointed to that service by God (1 Cor. 12:28). In the NT, acts of ordination involved laying on hands (Acts 6:6; 13:3; 1 Tim. 4:14), prayer (Acts 6:6; 13:3), and fasting (Acts 13:3). In time, as ministry became more institutionalized, so did rites of ordination. ***See also*** Minister. F.B.C.

ordeal. ***See*** Magic and Divination.

Oreb and Zeeb (or´eb, zee´eb), two Midianite princes whose names in Hebrew mean "raven" and "wolf." They were killed by the Ephraimites in Gideon's battle against the Midianites (Judg. 7:24–8:3). Their death was com-

The Orontes River with Tell Nebi Mend, biblical Kadesh-on-the-Orontes, in the background.

memorated by "the rock of Oreb" and "the press of Zeeb," and their crushing defeat was invoked by the psalmist in Ps. 83:11.

Orion (oh-*ri*´uhn), a constellation thought in ancient times to resemble the mythological hunter for whom it is named; it contains two stars of the first magnitude, Betelgeuse and Rigel. The constellation lies south of Gemini and Taurus. God's creation of Orion is cited by Amos (5:8) and Job (9:9; 38:31) as evidence of God's overwhelming majesty. ***See also*** Pleiades.

ornaments. ***See*** Amulet; Breastpiece; Dress; Jewelry; Magic and Divination.

Ornan (or´nuhn). ***See*** Araunah.

Orontes (or-on´teez), the principal river of western Syria (modern Nahr el-'Asi, "the rebellious river"), which originates on the eastern side of the Lebanon range and flows for two hundred fifty miles north through Syria into southern Turkey, where it turns southwest and enters the Mediterranean below Antioch-on-the-Orontes (modern Antakya). It thus forms the northern part of the great Rift Valley which continues south through the Jordan Valley, the Dead Sea, and the Arabah into the Red Sea and east Africa. The Orontes Valley is extremely fertile, and together with its strategically important geography this accounts for the number of major cities situated in it. These include: Riblah (see 2 Kings 23:33; 25:6, 21); Kadesh-on-the-Orontes (modern Tell Nebi Mend), the site of a battle between Egyptians and Hittites in ca. 1286 B.C.; Emessa (modern Homs); Hamath (modern Hama); Qarqar, where in 853 B.C. a coalition of Syrian kings together with Ahab of Israel fought with the Assyrian King Shalmaneser III; Alalakh (Tell 'Atshana); Antioch (Acts 11:19; 13:1); and Seleucia, Antioch's port. ***See also*** Antioch; Hamath; Riblah. Orpah (or´puh). ***See*** Ruth.

Osee (oh´see). ***See*** Hosea, The Book of.

Oshea (oh-shee´uh). ***See*** Joshua.

Osnappar (os-nap´uhr), an Assyrian noble who resettled non-Jewish people in the cities of Samaria (Ezra 4:10) after the fall of Israel in 722 B.C. He may be the same as the Esarhaddon of Ezra 4:2, or it may be his son, Ashurbanipal, both of whom were kings of Assyria in the seventh century B.C.

ossifrage (os´uh-frij; Lat., "bone breaker"; KJV; RSV: "vulture"), an unclean bird (Lev. 11:13; Deut. 14:12) associated with other birds of prey.

ossuaries (from Lat. *os* or *ossum*, "bone"), small chests used for gathering human bones after the corpse had rotted. Ossuaries are usually made from limestone with average dimensions of 20–30 inches by 12–20 inches by 10–16 inches. Ossuaries became popular in Palestine in the first century B.C. and were used at least until the fourth century A.D. Corpses were placed in the wall niches of burial caves. After the corpse had disintegrated, the bones were gathered into an ossuary, which was placed either in a smaller niche or on the floor. Ossuaries, many of which were found at the site of ancient Beth-shearim, were often decorated with engravings and identified with the name of the deceased and a warning not to disturb the bones. Not all persons were subject to secondary burial in ossuaries. Some were placed in the ground and others in permanent coffins. The diversity in burial practices may reflect both practical questions of space and changes in the views of afterlife. ***See also*** Burial. A.J.S.

Limestone ossuaries engraved with decorative motifs such as these were sometimes used for "second burials" in ancient Palestine.

Ostia (os´tee-uh), a Roman city at the mouth of the Tiber River. It was the principal harbor for Rome during the first and second centuries A.D. Alexandria in Egypt, the source of the grain supply for Rome, was three weeks away by sea. Until the harbor was made deep enough for seagoing ships, they had docked at Puteoli, 138 miles from Rome. Grain then had to be carted overland, an expensive undertaking. The natural harbor at Ostia had been filled with silt so

that a large ship there would have had to anchor outside and transfer cargo to barges, a considerable risk in stormy weather. Julius Caesar (100–44 B.C.) planned to enlarge Ostia, but the actual project was not undertaken until Claudius (emperor A.D. 41–54) constructed a large artificial harbor three miles north at Portus. Trajan (emperor A.D. 98–117) completed a second harbor in A.D. 104 beside that constructed by Claudius and the following years marked the peak of Ostia's prosperity. Because those harbors were not completed when Paul was taken to Rome, he landed at Puteoli (Acts 28:13).

Construction of the artificial harbor required dredging 200 acres and constructing concrete breakwaters, lighthouses, wharves, and unloading facilities. In the ancient city itself one could find warehouses, granaries, offices for the imperial administration, banks, stores, eating places, bakeries, bars, and apartment buildings of red and yellow brick. The imports coming into the harbor were grain, fruits, fish, meat, hides, oil, wine, minerals, jewelry, lumber, glass, paper, dyes, clothing, spices, ointment, and perfumes. Shipowners complained that the lack of exports to carry out cost them money. They were provided with incentives in the form of special insurance against shipwreck, tax exemptions, and citizenship for anyone who had been in the grain-carrying service for six years.

As befits a city with a polyglot population from all over the world, a number of shrines and temples were located there, the remains of which have been found in addition to those that served the imperial cult. A Serapis temple served sailors from the Levant. The first-century A.D. synagogue was redone in the second century and some eighteen Mithras shrines dating from A.D. 160 to 250 have been found. The Mithras cult appealed to the merchants, freedmen, and sailors in this city of approximately one hundred thousand persons. P.P.

ostraca (os´truh-kuh), plural of the Greek *ostrakon,* "potsherd." Potsherds provided a readily available medium on which to make hasty or informal notations in pen and ink during biblical times. Many prophetic oracles may have been preserved originally in the form of ostraca, written by disciples of the prophets. Since ostraca are virtually indestructible, numerous examples have been found by archaeologists. Several hundred ostraca were found at Masada, and over two hundred at Arad. The Samaria ostraca are receipts for taxes paid to

Remains of the fourth-century A.D. synagogue at Ostia.

This ostracon, one of two hundred ostraca found at Arad (ca. 600 B.C.), reads in part "to Nahum."

the governor of Samaria during the eighth century B.C. The eighteen Lachish Letters from the time of Jeremiah (sixth century B.C.) are military correspondence between Yaoush, the commander at Lachish, and a junior officer, Hoshaiah, in charge of a nearby garrison town. Numerous other sites have produced smaller numbers of ostraca. ***See also*** Arad; Lachish.

L.E.T.

ostrich, the largest living bird, but one incapable of flight. Of the four biblical words that have traditionally been translated as "ostrich," one (Heb. *bet-ya'anah*) is better translated as "owl" and another (Heb. *ḥasidah*) as "stork." The remaining two (Heb. *ya'ana* and *renamin*) are universally accepted as referring to the ostrich.

Although the ostrich used to inhabit the open steppes of Mesopotamia and Arabia, excessive hunting for plumes and sport caused it to become extinct in these areas; the last living bird was seen in 1941. Today it occurs in the wild only in Africa, where it is also bred for its leather on special farms.

The ostrich (*Struthio camelus*) stands up to 8-1/2 feet high. Although it has only rudimentary wings and is unable to fly, its elongated neck, long legs, and two-toed feet make it especially adapted to running and it can reach a speed of forty miles per hour. The cocks are taller than the hens and have a better developed plumage; the feathers were a much sought-for item. In antiquity ostrich eggs were eaten and the eggshells used to manufacture containers and ornaments. Its meat, however, was forbidden to the Hebrews (Lev. 11:16; Deut. 14:15).

Though living mostly on plant food, the ostrich can be considered an omnivore because it also eats insects and other small animals. The cocks are polygamous and their hens share for their eggs a communal nest, which is nothing more than a shallow pit dug into the sand. While the cock takes over the incubation of the eggs at night, the hens take turns during the day.

These peculiar habits have apparently puzzled people for a long time. A detailed description is given in Job 39:13–18, where the ostrich's characteristic way of waving its plumage is alluded to and it is reported to know no motherly love (v. 13). Its way of nest building is referred to (v. 14) and it is wrongly alleged that ostrich eggs are easily crushed (v. 15). The ostrich hen is supposed to be indifferent to her young (v. 16; this is repeated in Lam. 4:3). The ostrich is accused of stupidity (v. 17) and justifiably acclaimed to be quicker than a horse (v. 18).

I.U.K.

Othniel (oth´nee-uhl), one of the minor judges mentioned in Joshua and Judges. The son of Kenaz and brother of Caleb, Othniel won his niece's hand in marriage by capturing the city of Debir (formerly called Kiriath-sepher). This young woman, Achsah, proceeded to request that her father give her a field with ample springs of water. According to the story in Josh. 15:15–19, Caleb gave his daughter the upper springs and the lower springs (cf. Judg. 1:11–15). The other valiant deed attributed to Othniel was the defeat of Cushan-rishathaim, king of Mesopotamia (Judg. 3:7–11). This account is preserved in the usual Deuteronomistic framework (Israel sinned; God sent an enemy against it; repentance followed, as did deliverance). Likewise the standard formula concludes the story, specifically that the land had rest forty years.

J.L.C.

ouch, an obsolete term for "clasp," "bezel," or other "settings" for precious stones. It is used by the KJV for the RSV's "settings" (Exod. 28:11), "settings of filigree" (Exod. 28:25; 39:13, 16), or "filigree" (Exod. 39:13).

oven, a device in which retained heat is used to prepare food. Used mainly for baking bread (Lev. 2:4), an oven could also serve as a stove when a large cooking pot was placed upon it. The *tannur* (Heb.) consisted of a cylindrical clay structure seldom more than 2.5 feet in diameter and open at the top. A hole could be scraped out in the middle, and potsherds were sometimes plastered around the outside to retain the heat. When bread was baked a potsherd or stone could be placed over the top to enclose the oven. Ovens are commonly uncovered in Palestine when excavating domestic structures. Ovens were fired with any available fuel (cf. Matt. 6:30) and were used metaphorically to designate great heat (Ps. 21:9; Lam. 5:10; Hos. 7:6, 7). ***See also*** Bread.

N.L.L.

owl, a member of the Strigidae family of birds. Several species of owl occur in Palestine but their correlation with the biblical terms is problematic.

OWNERSHIP

The Hebrew word (*bet-ya'anah*) often interpreted as referring to the ostrich might more correctly be translated as "eagle owl" (*Bubo bubo*), the largest of owls. The Hebrew word in Ps. 102:6 (*kos*) is difficult to identify more closely but might be the "little owl" (*Athene noctua*) or the "tawny owl" (*Strix aluco*). The Hebrew term in Isa. 34:11 (*yansup*) probably refers to the "barn owl" (*Tyto alba*), though it is sometimes translated as "ibis." All three are included in the list of unclean birds (Lev. 11:16; Deut. 14:15). I.U.K.

ownership, the legal right of possession, which allows the one possessing it complete dominion over property to the exclusion of all others. The concept of ownership varies in different legal systems. In ancient Near Eastern law, this concept seems to have been defined in terms of varying degrees of possession and control. Thus, for example, scholars argue that the ancient pledge was purchased or owned by the creditor by virtue of the loan that represented a purchase price. This ownership of the pledge, however, was subject to the debtor's right of redemption upon repayment of the loan. The highest degree of ownership is the one that bestows upon the possessor the legal power to voluntarily relinquish control over the property to a third party. This degree of ownership was achieved only after the owner had been induced to sever all connection with the property and to relinquish all claims on it by gifts and money. Thus the purchase price did not serve merely as an objective sum of money whereby one acquired title to the property but primarily served as the inducement by which the seller's heart was fully satisfied to relinquish rights to the property. Echoes of this necessity to satisfy the seller's heart in order to obtain complete ownership may be found in the biblical account of Abraham's purchase of the Machpelah cave (Gen. 23). Although Ephron pretended to prefer presenting the land to Abraham as a gift, Abraham insisted on a final sale transaction, albeit at an exorbitant price, so that Ephron would be fully satisfied and thereby relinquish all claims to the cave.

Biblical Law: Biblical law does not restrict the transfer of ownership of movable property. It strongly disapproves, however, of the sale of land that would undermine the socioeconomic structure of ancient Israel's tribal and familial holdings, fixed at the time of the settlement of Canaan (thirteenth century B.C. and later). In Lev. 25:23, the irrevocable transfer of ownership of land is prohibited. This law is rooted in the religious concept of the divine ownership of the land, and it is safeguarded by the institution of the Jubilee Year and the law of redemption.

The Jubilee Year was the final year in a fifty-year cycle, consisting of seven Sabbatical Year periods. It effected the automatic release of sold land to the original owner of the patrimony. Accordingly, every sale of land was considered to be leased for the number of years remaining until the onset of the Jubilee Year. Hence the sale price was computed by the number of years for which the land would be leased (Lev. 25:13–17). According to the law of redemption, even before the Jubilee Year, the seller had the right to redeem the land from the purchaser whenever he could afford to do so. If the seller did not have the means, his next of kin could redeem the land (Lev. 25:25–28). Hence an impoverished man would often offer his land first to a relative (Jer. 32:9).

This right of redemption and automatic release in the Jubilee Year also extended to houses in unwalled villages. Houses in walled cities had only a one-year redemption period and were not subject to release in the Jubilee Year (Lev. 25:29–31). Thus, both the law of the Jubilee and the law of redemption limited severely the transfer of ownership of patrimonial land. This attitude against alienation of one's patrimony is expressed strongly in the monarchical period by Naboth, who refused to sell his vineyard to King Ahab (873–851 B.C.; 1 Kings 21:3). From this narrative, however, it may be learned that the crown had the right to confiscate and thereby acquire ownership of the property of one who had committed treason (1 Kings 21:16).

The nonlegal literature of the Bible records examples of land acquisition by purchase. The patriarchal narratives detail Abraham's purchase of the field and cave of Machpelah from Ephron in language that reflects ancient Near Eastern sale contracts (Gen. 23). Mention is also made of Jacob's purchase of land from Hamor (Gen. 33:18–20). The legal procedure for the transfer of property in pre-exilic Judah (pre-586 B.C.) is described in Jer. 32:6–16 and included the witnessed signing of a deed of purchase that was then placed in an earthenware jar for safekeeping. In Ruth 4:7–8, there is a terse reference to the symbolic act of removing one's shoe in the ratification of redemption and exchange transactions.

In the NT: There are no comparable regulations concerning ownership in the NT, where possession of goods and real property was simply taken for granted, as was their purchase (cf. Matt. 13:34–35) or selling (cf. Acts 4:34–37). The attempt of hired hands to gain property by eliminating the heir (Mark 12:7) seems to presume legal arrangements, but aside from some speculation, no evidence to explain such a practice has been found. It was also assumed that persons had the right to dispose of their possessions as they saw fit (cf. Matt. 20:15). Jesus did stress the need to use possessions for the benefit of those in need (e.g., Matt. 5:42), although that was not always the highest priority (cf. Mark 14:5–7). ***See also*** Freeman, Freewoman; Redemption of Land; Sabbatical Year; Slavery.

Oxyrhyncus (ok′si-ring′kuhs), an ancient Egyptian town (modern Behnesa) situated on the edge of the western desert, 120 miles south of Cairo. Excavated at the end of the nineteenth and the beginning of the twentieth century by B. P. Grenfell and A. S. Hunt, the site has provided literally bushels of Greek papyri, both documentary (i.e., official documents and correspondence) and nonliterary (i.e., personal letters, informal notes, etc.). By 1983, nearly fifty volumes of the Oxyrhyncus Papyri series had been published, presenting the Greek text, with introduction and notes, of more than 3,400 separate items. Among those that preserve fragments of biblical texts dating from the third and fourth centuries are a leaf containing part of Matthew 1, now at the University of Pennsylvania; parts of Romans 1 and 1 John 4, both at the Semitic Museum, Harvard University; parts of 1 Corinthians and Philippians, now in Cairo; and a leaf from Revelation, now at Princeton Theological Seminary. Also found at Oxyrhyncus were fragments of a papyrus codex preserving several logia (sayings) of Jesus now known to be part of the apocryphal *Gospel of Thomas*. ***See also*** Codex; Papyrus; Texts, Versions, Manuscripts, Editions. B.M.M.

Opposite: Philistine captives pictured on reliefs at Medinet Habu that celebrate the successful repulsion of the Philistine invasion of Egypt by Pharaoh Ramesses III, ca. 1190 B.C. The Philistines were one of the "Sea Peoples"; they eventually settled on the southern coastal plain of Canaan where they became one of Israel's principal rivals.

P

P, the siglum for the Priestly source, one of the four sources scholars believe they have found in the Pentateuch. It is concerned with religious ritual and exact specifications of time and measurement. ***See also*** Priestly Writer(s); Sources of the Pentateuch.

Paddan-aram (pay'duhn-air'uhm; KJV: "Padan-aram"), the name used by Priestly tradition for the northwest region of Mesopotamia, between the Khabur and Euphrates rivers. It is called Aram-naharaim (Heb., "Aram between two rivers") by the early J source (Gen. 24:10, RSV: "Mesopotamia"). In Assyrian *padana* was a road or garden; Aram refers to the people or land of the Arameans. Haran and perhaps Ur were located in Paddan-aram. Isaac's wife Rebekah was from there (Gen. 25:20), and Isaac sent Jacob back there to Rebekah's brother, Laban, to obtain a wife (Gen. 28:2–7).

Pagiel (pay'gee-uhl; Heb., "El [God] has met"), the leader of the tribe of Asher during the wilderness wandering (Num. 1:13; 10:26).

Pahath-moab (pay'hath-moh'ab). **1** A leader of the postexilic community who signed the covenant to keep the law (Neh. 10:14); he is probably understood as the head of the family groups below. He may also be the father of Hassub, one who worked to repair the walls of Jerusalem under Nehemiah (Neh. 3:11). **2** A large family group with two branches (the "sons of Jeshua" and the "sons of Joab") who returned with Zerubbabel from the Babylonian captivity (Ezra 2:6; Neh. 7:11). **3** A much smaller family group who returned with Ezra (Ezra 8:4). **4** A family group of which eight members took foreign wives. All of these family groups may be parts of the same clan. D.R.B.

paint, painting, a medium for and a means of applying color to surfaces, formed with various pigments in a liquid or paste matrix. In biblical usage it applied to cosmetic decoration of the eye (Jer. 4:30; 2 Kings 9:30; Ezek. 23:40) as well as to the normal modern practice of decorating a home (Jer. 22:14). Archaeological evidence shows it was used on pottery and on building interiors and exteriors. Israelite mention of it is sparse, however, possibly due to the legal prohibition against making images (Exod. 20:4; Deut. 5:8).

palace, the residence of a king or other dignitary. The frequent biblical references are to such royal residences (2 Chron. 2:1, 2), to their staffs (1 Kings 4:6; 2 Kings 20:18; 24:12), their facilities (Esther 1:5; 5:1; Dan. 4:29; 5:5), or their security forces (Luke 11:21). The examples available in the Near East from archaeological work (Luxor, Knossos, Mycenae, Persepolis, Boghazkoy) illustrate amply that palaces were elaborate, richly decorated, and heavily fortified.

Paleolithic (pay'lee-uh-lith'ik; Gk., "old stone") **Age,** the archaeological period dating from ca. 2,000,000–10,000 B.C. This period witnessed the cultural and technological development of humans from their first handmade tools to their arrival at the threshold of the domestication of plants and animals. The Paleolithic falls within the geological era known as the Pleistocene or Ice Age. The earliest human remains discovered in the Near East, probably *Homo erectus,* come from this period and from the site of Ubeidiya near the southern tip of the Sea of Galilee. Important Neanderthal and *Homo sapiens* remains came to light in the caves of Mt. Carmel.

Palestine (pal'uh-stin), the territory along the eastern coast of the Mediterranean Sea traditionally known as the land of the Bible (see Map 1 in the section of color maps).

Name: Besides "Palestine" there are several other designations for this area: the Holy Land, the promised land, the land of Israel (Heb. *'eretz ysrael*), and Canaan. The common name in the Bible for the promised land is Canaan; it is also the ancient name. Ironically the name "Palestine" is derived from the name of the Philistines, the traditional enemies of the Israelites. Originally a designation for the southern coastal strip where the Philistines had settled in the twelfth century B.C., Palestine became the name for the

Aerial view of the Jordan River, which meanders for two hundred miles between the Sea of Galilee and the Dead Sea, three times the distance as the crow flies.

To the north, past the summit of Mount Gerizim in the central foreground, lies Mount Ebal, across the Shechem-Neapolis pass. The site of ancient Shechem lies in the center of the photograph.

entire region. The Greek historian Herodotus (fifth century B.C.) was the first to use *Palaistinē*, the Hellenistic Greek form of Philistia, in the inclusive sense.

After the suppression of the Bar-Kochba revolt in A.D. 135 the Roman emperor Hadrian expunged the name *Provincia Judea* and substituted *Provincia Syria Palaestina* or simply *Palaestina* (Palestine). By A.D. 400 three provinces had been established with the designations *Palaestina prima* and *secunda*, west of the Jordan River, and *Palaestina tertia*, east of the Jordan and north of the Arnon rivers. The main part of the province of Palestine was in Cisjordan, meaning west of the Jordan, but sections of Transjordan, meaning east of the Jordan, also belonged to the province of Palestine.

After World War I when the British ruled Palestine by mandate, they revived "Palestine" as the official title of the land west of the Jordan. In 1923 the British government divided Transjordan from Cisjordan, making Transjordan an emirate under British sovereignty.

Archaeologists, transcending political controversy, often use the title "Palestine" as an inclusive geographical designation for the region including modern Israel and the western sector of modern Jordan. Despite perennial disputes over boundaries in the Near East, the areas west and east of the Jordan have much in common with respect to history, geography, and archaeology. "Palestine" serves as a convenient term for all the archaeological periods of the biblical land, while the geographical term "Israel" would be inaccurate; this latter designation did not come into existence until the tenth century B.C.

Geography: Throughout history the political frontiers of the Levant (general term for countries along the eastern Mediterranean, including Palestine) have fluctuated considerably. Broadly described, the Levant is bounded on the north by the foothills of the Anatolian plateau, on the south by the Sinai desert, on the east by the Syrian desert and the Euphrates ("the great river" in the Bible), and on the west by the Mediterranean ("the great sea" in the Bible). These boundaries include the modern states of Israel, Jordan, Syria, and Lebanon. In round figures the Levant was no more than five hundred miles long and ninety-five miles wide. In accord with the traditional biblical formula "from Dan to Beersheba" Palestine would have been much smaller, about the size of Vermont. Natural

To the east, from the caves at Qumran, ancient home of the Essenes, lies the northern end of the Dead Sea, the lowest depression on earth.

boundaries surrounded Palestine on three sides: the desert on the east and south, the Mediterranean on the west. In biblical times the cities were more like villages, small in size and population. The population of either of the two capitals, Samaria and Jerusalem, probably never exceeded thirty thousand inhabitants. According to scholarly estimates, in the first half of the eighth century B.C. the population of the Northern Kingdom was about eight hundred thousand and of the Southern Kingdom about three hundred thousand.

Although Palestine was insignificant in size and poor in natural resources, its strategic, and at the same time vulnerable, location as a land bridge made it a vital region. It was situated at the crossroads of the ancient world, with Mesopotamia to the northeast and Egypt to the southwest. Armies and caravans traversed Palestine for centuries. Its geographical position immersed it in the political, commercial, cultural, and military activities of the whole region. Palestine was ruled by a succession of conquerors: Egypt, Assyria, Babylonia, Persia, Greece, Rome, Byzantium, the Moslem caliphates, the Crusaders, the Ottoman Turks, and the British.

Physical and historical geography cannot be separated; they go hand in hand. The former is concerned with the configuration of the terrain; the latter deals with people's use of the land and the impact of its geography on the life of the people. A country's geography determines to some degree its history and helps to explain the history. Related phenomena, such as topography, climate, soil, and natural resources, affect a country's internal history and may influence its international relations.

Palestine's geographical position between the sea and the desert had a distinct bearing on its history. The unbroken Mediterranean coast's lack of adequate harbors for anchorage discouraged maritime pursuits. The wilderness on the east made the people of Palestine vulnerable to the incursions of desert raiders.

Climate: Climate has a significant impact on daily life, especially on agriculture. The climate of Palestine is subtropical, characterized by dry summers and rainy winters. Seventy percent of the annual rainfall occurs between November and February. Precipitation varies greatly in different parts of the country; most of the rain falls along the coastal plain. The annual rainfall in Upper Galilee to the north is about 45 inches; in the Negeb to the south about 8 inches. Palestine's vegetation is greatly dependent upon the rainfall. Indicative of the vital importance of rainfall, Hebrew has several words for rain, distinguishing the "early" rain in the autumn, which softens the ground, preparing the soil for plowing and sowing, and the "latter" spring rain, which fosters the growth of the cereal grains. Dew, abundant along the coastal plain, is also vital for vegetation as it provides moisture where there is no rain (Deut 33:28).

Westerly winds prevail in Palestine, but there is also an unpleasant east wind from the desert to the south and southeast of Palestine; known as the *sirocco* (Italian), the *hamsin* (Arabic), and the *sharab* (Heb.), it is the "east wind" of the OT (e.g., Gen. 41:6; Exod. 14:21; Isa. 27:8). This oppressive, dust-laden wind blows in the early autumn and late spring and often persists for several days.

Economy: Deuteronomy describes Palestine as "a land of wheat and barley, of vines and fig trees and pomegranates, . . . a land whose stones are iron, and out of whose hills you can dig copper" (8:8–9). The economy of Palestine was basically agricultural and pastoral. Agriculture was conducted primarily in the north where the chief crops were wheat, barley, olives, grapes, and figs; the breeding of sheep and goats was done mostly in the south. In addition to domestic animals, there were foxes, jackals, hyenas, lizards, snakes, and scorpions. The lions and bears of biblical times are now extinct.

Palestine is not rich in raw materials, except for the iron mines in Transjordan and the copper mines of the Arabah in the south. The mineral products of Palestine are limestone, basalt, and clay. There is gypsum in the mountains of Galilee, sulphur in the environs of Gaza, bitumen from the Dead Sea, and glass sand near Beer-sheba.

Geology also had its part to play in the life of the people. The rocks of Palestine are basically limestone, chalk, basalt, and sandstone. Limestone, sedimentary rock consisting mostly of calcium carbonate, was the common building stone. Nari, a soft limestone easily quarried and dressed, was used to prepare ashlars and capitals in the construction of monumental buildings. Cenomanian limestone, the bedrock of Palestine, is impermeable; depending upon local geological conditions, waterproofing cis-

terns with plaster was often not necessary. Porous limestone traps water, and the resultant wells and springs are a boon for agriculture. Basalt, a dense volcanic rock, is common in Galilee, the Golan, and Bashan. Its water-resistant quality makes it excellent for constructing steps, thresholds, and orthostats. Basalt is also used for grindstones.

Natural Zones: Between the Mediterranean Sea to the west and the Syrian desert to the east, Palestine is divided into five natural zones, or topographical regions, running longitudinally, clearly evident on a relief map; they are, from west to east, the coastal plain, the Shephelah, the central mountain range, the Jordan Valley, and the Transjordan plateau.

The Coastal Plain. The coastal plain, rich in vegetation, is divided into the northern, central, and southern sections, a strip a hundred and thirty miles long, with Phoenician Tyre in the north and Philistine Gaza in the south. The main features of the coastal plain, narrow in the north and wider in the south, are (from north to south) the Plain of Acco, the Jezreel Valley, the Sharon, the Philistine coast, and the western Negeb. There are two coastal streams: the Kishon enters the sea just north of Mount Carmel; the Yarkon serves as a border between the Sharon and the Shephelah. The great international highway, the Via Maris (Lat., "the way of the sea"), runs the length of the coastline. This commercial route originated in Egypt, ran west to the Sea of Galilee, veered north to Hazor, and terminated in Damascus.

Jezreel, or Esdraelon ("Esdraelon," the Greek form of "Jezreel," designates the west section of the Jezreel Valley), is the broad and inviting valley connecting the coastal area and the Jordan Valley. This rich agricultural region is excellent for farming. The Plain of Sharon, the central portion of the coastal plain, extends for a distance of about forty-five miles from the Carmel range to Joppa. Forested in antiquity, the Sharon was not heavily inhabited in biblical times. Chariots operated in the valleys and the plains, whereas the infantry fought in the hills. The Philistine coast encompasses the fertile land between Joppa and the Wadi Ghazzeh (located about six miles south of Gaza). The Philistine pentapolis consisted of Gaza, Ashkelon, and Ashdod along the coast, Ekron six miles inland, and Gath (Tel Haror?). Although natural harbors were lacking in this area, Ashkelon was one of the greatest Mediterranean seaports from the Early Bronze to the Crusader period.

The Philistines, the most famous of the Sea Peoples, may have been Mycenaean Greeks. They arrived in southern Palestine for the first time about 1175 B.C. in the reign of Pharaoh Ramesses III. New archaeological data from excavations at Ashkelon and Ekron provide fresh insights into Philistine culture. Ekron was the largest industrial center for the production of olive oil in the ancient Near East. Contrary to the Bible's negative evaluation, the Philistines excelled in ceramics, urban planning, and architecture; they also contributed to naval technology.

The western Negeb (Negev) lies at the southern end of the coastal plain. Usually translated "south" from its position, "Negeb" means "dry land"; it designates the rugged territory between Beer-sheba and the Gulf of Aqabah. The biblical Negeb is the east-west zone from Gaza to the Dead Sea, known today as the northern Negeb. The Bible identifies the southernmost area of Palestine as the Wilderness of Zin (Josh. 15:1). The two prominent biblical sites located in the Negeb are Kadesh-barnea, where Moses and the Israelites spent thirty-eight years on their trek from Sinai to Transjordan, and Beer-sheba, where the patriarchs worshiped.

The Shephelah. The Shephelah, meaning "lowlands," is the range of limestone hills between the Philistine plain and the Judean mountains. These narrow foothills (twenty-eight miles long, nine miles wide) are "lowlands" from the vantage point of the Israelites living in the higher hill country to the east. Thickly settled in biblical times, the Shephelah is a fertile region. The principal cities in the Shephelah are Gezer in the north and Lachish in the south. As a buffer zone between the coastal plain and the mountains, the Shephelah was strategic in the defense of Palestine.

The Central Mountain Range. The next geographical zone is the central mountain range, also called the hill country. Situated between the Shephelah and the Jordan Valley, it is the geographical backbone of Palestine and supported the pastoral economy. The principal regions of the hill country are Galilee, Samaria, and Judah. Galilee, bounded on the north by the Litani River and on the south by the Jezreel Valley, was the principal focus of Jesus' public ministry. It is divided into Upper Galilee and Lower Galilee. The highest mountain regions (four thousand feet above the Mediterranean) in Palestine are in Upper Galilee, a terrain not conducive to agriculture; rolling hills and fertile soil characterize Lower Galilee.

In the OT the most famous and prosperous part of the country was the Northern Kingdom, known as Samaria; it is the geographical center of Palestine. The valley of Jezreel separates Samaria from Galilee. Deriving its name from the capital city of Israel, Samaria is rich in agriculture, especially grain, olives, and vines. Mount Ebal and Mount Gerizim are the two most conspicuous peaks among the hills of Samaria. In biblical times these mountains had both military importance and religious significance. Shechem (Nablus) was strategically located in the narrow pass between Mount Ebal and Mount Gerizim.

Judah designated the Southern Kingdom ruled by the Davidic kings; it was the least desirable region of western Palestine. In Greek

and Roman times (ca. 333 B.C.–A.D. 324) this southern region of Palestine was called Judea, the Greek form of Judah. The boundaries of both Judah and Judea fluctuated throughout history. David made Jerusalem, "the holy mountain," the capital city of the United Kingdom. With an elevation of 2,460 feet above sea level, Jerusalem is secured on three sides by valleys: on the east by the Kidron Valley, on the west by the Valley of Hinnom; the Tyropoeon is a central valley dividing the mount of Jerusalem into the more affluent Upper City (the western hill) and the Lower City (the City of David and the Temple Mount). Surrounded by hills, off the beaten track, and with only a limited water supply, Jerusalem was an unlikely capital. Its primary significance is religious, thanks to David.

The Jordan Valley. The unique feature of Palestine's geography is the Rift Valley (Ghor). Splitting the country down the middle, it extends from the foot of Mount Hermon to the Gulf of Aqabah. Palestine straddles this fissure, the largest geological fault on earth. The Rift, as well as Palestine's hilly topography and wadi system, militated against political unity or centralized rule; the terrain fragmented the country into separate tribes and other political entities.

The Jordan River flows down the middle of the Rift, whose average width is about ten miles. The Rift is composed of the Huleh Valley, the Sea of Galilee (Chinnereth), the Jordan Valley, the Dead Sea, the Arabah plain and the Gulf of Aqabah (Elath).

Ten miles north of the Sea of Galilee is the Huleh Valley; lying between the Litani River and Mount Hermon, it is mostly within modern Lebanon. The Sea of Galilee is prominently associated with the ministry of Jesus. The nomenclature of this freshwater lake is inconsistent. The earliest name for this lyre-shaped body of water was Chinnereth ("lyre-shaped"), derived perhaps from a fortified city at the northwest corner of the Sea of Galilee. It is also known as the "lake of Tiberias." Thirteen miles long and seven miles wide, the Sea of Galilee is about seven hundred feet below sea level. Fishing plays a major role in the region's economy.

The Jordan, the largest river in Palestine, meanders for two hundred miles between the Sea of Galilee and the Dead Sea, three times the distance as the crow flies. In its southerly course between the Sea of Galilee and the Dead Sea the Jordan drops about six hundred feet. The Yarmuk and Jabbok rivers are important tributaries of the Jordan from the east; there are no significant tributaries from the west.

The Dead Sea is another novel geographical feature of Palestine. It is so called because its high mineral content prevents the survival of marine life. In view of its concentration of sodium chloride (six times the oceans' salt content), the Bible refers to this body of water as the Salt Sea. On the other hand, the Dead Sea contains such useful minerals and natural resources as potash, bromine, phosphate, magnesium, calcium, and potassium. The Dead Sea, which has no outlet, extended fifty-five miles (now thirty miles) from north to south and is about ten miles wide. Thirteen hundred feet below sea level at its surface, the Dead Sea is the lowest depression on earth.

"Arabah" in the Bible designates the Rift Valley extending from the Sea of Galilee to the Dead Sea; today the term refers only to the continuation of the Rift between the Dead Sea and the Gulf of Aqabah (Elath), a distance of about a hundred and ten miles. Covered with alluvial sand and gravel, the Arabah is rich in copper deposits.

The Transjordan Plateau. The final zones are in Transjordan, coterminous with the modern Hashemite Kingdom of Jordan. The term "Transjordan" embraces the whole easterly region between the Jordan Rift eastward to the Syrian desert, with an elevation of two thousand feet in the highlands. Four main east-west tributaries cut the Transjordan highlands: the Yarmuk, the Jabbok, the Arnon, and the Zered. These bodies of water also serve as boundaries dividing Transjordan into discrete geopolitical regions: Bashan (north of the Yarmuk), Gilead (south of the Yarmuk), Ammon (between the Jabbok and Arnon), Moab (between the Arnon and the Zered), and Edom (south of the Zered). To the south of Edom lies the southern desert of Jordan.

The Yarmuk, the largest river in Jordan and the northernmost, is not mentioned in the OT. The Jabbok is the modern Nahr ez-Zerqa, "the blue river"; Jacob wrestled with an "angel" at the ford of the Jabbok near Penuel (Gen. 32:24–30). Wadi Mojib, the modern name of the Arnon, is a precipitous canyon associated with Moab. The Zered is identified with the Wadi el-Hesa, which divided Moab and Edom. On their way to Jericho, at the end of their sojourn in the wilderness, the Israelites crossed the Wadi Zered (Num. 21:12; Deut 2:13–14).

Transjordan is divided into three main sections: Bashan in the north; Gilead, Ammon, and Moab in the center; and Edom in the south. The King's Highway, a famous international trade and caravan route, extends from Damascus to the Gulf of Aqabah; it runs the length of Transjordan, passing through Bashan, Gilead, Ammon, Moab, and Edom. Transjordan has been the subject of intensive regional archaeological surveys during the past decade.

Bashan in the northern district of Transjordan parallels the Sea of Galilee; it is good pastureland. Several biblical authors commented on natural features of Bashan, suggesting prosperity and luxury (1 Chron. 6:71; Ezek. 39:18; Mic. 7:14). The black basalt so abundantly available in Bashan is used for building stones today as it was in biblical times.

The mountainous region of Gilead is most pleasant and is well known for its excellent

pasture. Gilead was forested in antiquity, and its trees may have produced the balm to which Jeremiah alluded (Jer. 8:22). David fled to Gilead when Absalom attempted to usurp his throne (2 Sam. 17:21–26). The prophet Elijah was a native of Gilead (1 Kings 17:1).

Ammon, Moab, and Edom constitute the three nation-states of Transjordan. The boundaries of Ammon in the north-central part of the country were never clearly defined. The citadel in modern Amman is the site of the ancient capital of Ammon. The territory of Moab in central Transjordan lies east of the Dead Sea. Both Kerak and Dhiban (Dibon) served as the capital cities of Moab. This region is known for wheat, barley, sheep, goats, and camels. The Israelites had a strong antipathy toward the Moabites, with whom they often contended.

Edom is the region in the rugged highland of Seir located in southern Transjordan. The biblical kingdom of Edom, also known as Seir, is situated on a high plateau thirty-five hundred feet above sea level. The characteristic shrub forests covering the mountains of Edom may account for the name "Mount Seir," meaning "hairy mountain" in Hebrew. The Edomite territory extended south of the Dead Sea on both sides of the Arabah, as far as the Gulf of Aqabah. Controlling the King's Highway, which brought trade from India and South Arabia to Egypt, the Edomites acquired great wealth. The abiding hostility between Edom and Judah is all too evident in the OT, especially among the prophets.

After the fall of Jerusalem in 586 B.C. the Edomites incurred the fury of the Judahites by occupying their land. Their encroachment westward into the land of Judah may have been occasioned by the invading Nabateans, an Arabic-speaking people from the desert who settled in Edomite territory, making Petra their capital. The Edomites of south Judah became the Idumaeans of Hellenistic and Roman times. Herod the Great (Luke 1:5) was an Idumaean.

Archaeologists on both sides of the Jordan River have been studying Edom and its people intensively. Archaeological excavations and surveys attest that the Judahites and Edomites intermingled in the seventh–sixth centuries B.C., when the Edomites were actually present in the territory of Judah. With the peace accord between Jordan and Israel, mutual cooperation is bound to shed new light on Edomite presence among Edom's traditional enemies.

Archaeological History: The advent of written records is one of the great dividers between the prehistorical and historical periods; it dates to about 3000 B.C. in the Near East. Field surveys are producing abundant material from the prehistoric periods to supplement earlier studies.

Old, Middle, and New Stone Ages. Artifacts from the Paleolithic period (Old Stone Age, ca. 1,000,000–14,000 B.C.) have been found on the surface of the ground at a number of sites in Palestine. In this period, humans were hunters and gatherers of wild plants. The Paleolithic period is represented in Palestine by the Mount Carmel man; caves on the western edge of the Carmel range have produced stratified evidence of Paleolithic and Epipaleolithic occupation.

The Epipaleolithic period (Middle Stone Age) began about 14,000 B.C. Several pertinent sites containing evidence of a microlithic flint industry are scattered throughout Palestine. The Natufian is an Epipaleolithic culture. It is so called from the valley of Natuf, about ten miles northwest of Jerusalem, where an important site attesting flints was excavated. The Natufians lived in caves, hunted, and harvested wild grain.

The Neolithic period (New Stone Age, ca. 8000–4200 B.C.) is well represented in the Levant; the study of several hundred sites has just begun. Beidha, near Petra in Transjordan, is an important Early Neolithic site; its earliest Neolithic levels date to about 7000 B.C.

Jericho is a key site for Neolithic culture. A clear distinction is made between Prepottery Neolithic A and B. Lasting during most of the eighth millennium, Prepottery Neolithic A is characterized by circular house structures, a lithic industry, and the domestication of wheat and barley. No longer nomads, the people lived in huts; agriculture was responsible for a sedentary form of life in Palestine. Prepottery Neolithic A ended abruptly; then followed Prepottery Neolithic B, from the late eighth to the seventh millennium; it, too, came to an abrupt end. Sites of this period existed all over Palestine. Characteristic of Prepottery B were the domestication of wheat and barley, domestic goats, and architecture consisting of more elaborate houses with multiple rooms of rectangular form grouped around courtyards.

One of the major Neolithic sites in the Near East was discovered at Ain Ghazal, a Prepottery Neolithic B village in the northeastern suburbs of Amman (Jordan). This site is three times larger than Jericho. A collection of modeled clay human statues and figures made of clay or plaster came to light at Ain Ghazal. These statues, dating to about 6200–6000 B.C., certainly bear a relationship to the remarkable find at Jericho of human skulls with features restored by plaster and shell incrustations.

Pottery first appeared in the Late Neolithic period (Pottery Neolithic A and B). It came from such sites as Jericho and Dhra, which is east of the Dead Sea.

Chalcolithic Period. Evidence from the Chalcolithic period (Copper–Stone Age, 4200–3300 B.C.) was first recognized at Teleilat Ghassul, near the northeastern end of the Dead Sea. Occupied in the Early Chalcolithic, Ghassul was a fully developed village site. Because of the discovery of Chalcolithic at Teleilat Ghassul, the culture is often referred to as Ghassulian. Similar important Chalcolithic remains were also excavated in Beer-sheba and the Negeb.

The transition between the Chalcolithic and the Early Bronze periods is sometimes referred to as the "Proto Urban" phase. In this period people lived in villages; they also introduced new pottery as well as new methods of burial in the form of rock-cut tombs with multiple burials.

Early, Middle, and Late Bronze Ages. The Early Bronze Age (ca. 3300–2300 B.C.) is well represented at sites such as Arad, Megiddo, and Jericho west of the Jordan, and at Bab-edh-Dhra east of the Jordan. Bab-edh-Dhra is well known for its large cemetery consisting of shaft tombs with multiple chambers in Early Bronze Age I, and of charnel houses of mud-brick in Early Bronze Age II–III. The Early Bronze Age III (2700–2300 B.C.) saw the full urban development of Palestine.

When the Early Bronze Age came to an end in 2300 B.C, an Intermediate Early Bronze-Middle Bronze period (ca. 2300–1900 B.C.), sometimes referred to as Early Bronze IV, followed. The material culture was seminomadic, nonurban, perhaps to be attributed in part to the incursions of pastoralists from Syria and Mesopotamia.

The Middle Bronze Age (ca. 1900–1550 B.C.) was a period of prosperity marked by the reappearance of urban civilization and characterized by well-built houses, massive fortifications, and walled towns. Dan, Hazor, Shechem, and Gezer are typical Middle Bronze sites. Egyptian and Mesopotamian written records from this period contain references to Palestine.

The Late Bronze Age (1550–1200 B.C.) was a time of Egyptian hegemony over Palestine; the quality of the material culture declined in this period. The year 1200 B.C. marked the advent of the Iron Age and the entry of the Israelites into Palestine. Iron did not come into common use in Palestine before the tenth century B.C. The remaining periods are the proper subject of biblical history.

Biblical Archaeologists: The first part of the nineteenth century marked the reawakening of scientific interest in Palestine. Foremost among the explorers of this era was the American Edward Robinson, whose historic travels in the Holy Land in 1838 and 1852 signaled the beginning of a new era in the geographical study of Palestine. While investigating the physical and historical geography of Palestine, Robinson also succeeded in identifying over a hundred biblical sites. Influenced by Robinson, the British established in 1865 the Palestine Exploration Fund for the systematic and scientific exploration of Palestine. The fund's geographical survey of western Palestine accomplished the mapping of more than ten thousand sites; the resultant Map of Western Palestine still serves as the basis for the cartography of Palestine. In 1900 the American Schools of Oriental Research was founded to enable American scholars to pursue biblical and archaeological studies in Palestine. P.J.K.

Pallu (pal′yoo; Heb., "conspicuous[?]"; KJV: "Phallu"), the second son of Reuben (Gen. 46:9; Exod. 6:14; 1 Chron. 5:3), father of the clan of Palluites (Num. 26:5) and father of Eliab (Num. 26:8). ***See also*** Eliab.

palm (*Phoenix dactylifera*), a tall, slender tree whose leaves fan out at the top like a plume. The date is its much-consumed fruit. The palm is especially hardy in arid environments since it has deep tap roots that effectively seek out the water table. This enables it to live a long life, bearing fruit for many years (Ps. 92:12–14). Palms are therefore especially characteristic of water sources and oases, thus the reference to them at the springs of Elim (Num. 33:9) and at Jericho, the oasis city of palms (Deut. 34:3). The botanical name, *Phoenix,* is derived from Phoenicia, the ancient land of palms.

Many parts of the tree were used. The fruit was consumed as a sweet. A fermented drink was made from the sap. The leaves were used as roofing for houses and for weaving mats and baskets. According to tradition, the leaves were also gathered and displayed as a symbol of joy and celebration on the arrival of Jesus into Jerusalem (John 12:13).

The upright and stately form of the palm suggests justice and nobility. The attractive array of leaves provided a decorative motif in Solomon's Temple (1 Kings 6:29, 32).

The Hebrew word for date palm, *tamar,* is used as a proper name in the Bible. As a place name, Tamar is referred to in Ezek. 47:18–19 and 48:28. Absalom's sister (2 Sam. 13:1) and daughter (2 Sam. 14:27) were both named Tamar. ***See also*** Date. P.L.C.

Palm Sunday, the Sunday before Easter, commemorating Jesus' entry into Jerusalem (Mark 11:8; Matt. 21:8; John 12:12 identifies the branches as palm).

Pamphylia (pam-fil′ee-uh), a district about eighty miles long and thirty miles wide in southern Asia Minor, bounded on the north by the Taurus Mountains, on the east by Cilicia, and on the west by Lycia. The Kestros River, which was navigable in the first century, flows through the district to the southern coast of Asia Minor. The climate along the coastal plain was uncomfortable and malaria was prevalent in that region. During the Maccabean period, Jews were apparently living in the area (1 Macc. 15:23), and Jews from there were reported in Jerusalem at Pentecost (Acts 2:10). In A.D. 74, the district became a Roman province and expanded its boundaries to include the northern highland region (Pisidia). Two cities in Pamphylia, Perga and Attalia, were visited by Paul and his companions during their first journey. At Perga, just five miles from the Kestros River, John Mark left Paul and Barnabas and returned to Jerusalem (Acts 13:13). A Roman road

through the district connected Perga with the main port of Attalia, which Paul and Barnabas used to board a ship bound for Antioch (Acts 14:24–26). Paul sailed past Pamphylia en route to Rome (Acts 27:5). ***See also*** Attalia; Perga.

M.K.M.

Pannag (pan´ag), the KJV transliteration of an otherwise unknown word as a place name (Ezek. 27:17). According to its context it may also be a commodity the Israelites sold to Tyre.

paper, material upon which writing was done (2 John 12), in antiquity made from the pith of the papyrus plant. ***See also*** Papyrus; Writing.

Paphos (pay´fos), a city located on a rocky plateau along the southwestern coast of Cyprus. In antiquity, "old Paphos" was the seat of the kingdom of Paphos and, in the city, possessed the principal temple of the Greek world for the cult of Aphrodite, who, according to legend, had been born of the sea foam along the nearby coast. At the end of the fourth century B.C., Nikokles, the last king of Paphos, founded a new city as his political and commercial capital eleven miles west on the coast. "New Paphos" continued to grow in importance as a capital during both the Ptolemaic and Roman periods. When Saul and Barnabas came to Cyprus on their first journey, it was in this capital city that they met the Roman proconsul, Sergius Paulus, and the Jewish prophet, Elymas (Bar-Jesus), associated with him (Acts 13:6–12). ***See also*** Cyprus; Elymas; Paulus, Sergius. Papyri, Oxyrhyncus. ***See*** Oxyrhyncus.

papyrus, an aquatic plant of the sedge family (*Cyperus papyrus*) that grew abundantly in the shallow waters of the Nile in the vicinity of the delta (Job 8:11). Resembling a stalk of corn (maize), the plant was used in a great variety of ways, not only in making "paper," but also for fuel, food, medicine, clothes, rugs, sails, ropes, and even a kind of chewing gum. According to the Roman antiquarian Pliny the Elder, "Civilization—or at the very least, human history—depends on the use of papyrus."

To manufacture a sheet of "paper," the stem of the mature plant was cut into sections about twelve to fifteen inches in length. After each of these was split open lengthwise, the core of pith was removed and sliced into very thin strips. These were laid lengthwise on a flat surface just overlapping each other and all facing the same direction; then a second layer, placed at right angles, was laid on top. The two layers were pressed or pounded together until they formed one fabric. The resultant sheet, when dried and smoothed with pumice, was light in color, strong, and flexible. If the sheet had been well made, there would be little difference in the smoothness and finish of the two sides. The size and character of these papyrus sheets naturally varied considerably with the quality of the papyrus. About twenty individual sheets would be joined together end to end to form a roll. From such a roll, pieces could be cut to the size needed for writing a letter, a bill of sale, a deed, or any other record. For a book of some considerable length, several rolls would be glued together; the Gospel of Luke, for example, would have required about thirty feet in length. Early in the second century, however, Christians came to prefer the format of the codex, or leaf-book, for their sacred books.

The price paid for a sheet or roll of papyrus was, of course, determined by its size and quality. In general, papyrus was relatively expensive,

Papyrus.

and economy-minded people would sometimes write on the back of a sheet or roll already used for other purposes.

Preserved by the dry climate of Egypt, literally hundreds of thousands of papyrus documents of all kinds have been found. Among papyrus copies of the books of the Greek Bible, some of the most noteworthy are those in the collections acquired by Chester Beatty (Dublin) and Martin Bodmer (Geneva). The former collection includes a fragmentary codex from the second century containing the Greek text of the books of Numbers and Deuteronomy and a codex of ten letters of Paul from about A.D. 200; the latter collection includes a codex of the Gospel of John from about A.D. 200, and another, dating from the third century, contains the Gospels of Luke and John. ***See also*** Codex; Oxyrhyncus; Texts, Versions, Manuscripts, Editions; Writing. Papyrus, Nash. ***See*** Texts, Versions, Manuscripts, Editions.

parables, very short stories with a double meaning. In the biblical tradition, the terms translated from Hebrew, Aramaic, or Greek by the narrower term "parable" should more accurately be translated by the wider term "metaphor." The basic distinction that the biblical tradition finds worthy of emphasis is that between literal and metaphorical language. In the context, the term "parable," therefore, must cover both aphorisms and stories, proverbs and riddles, dialogues and discourses, as long as these are metaphorical or figurative. In this understanding, the parables of Jesus range from metaphorical aphorisms, such as that on the kingdom and house divided in Mark 3:24–25, to metaphorical narratives, such as the one on the prodigal son in Luke 15:11–22, to metaphorical discourses, such as John 10. The biblical tradition's wide interpretation of parable in the sense of metaphor makes it possible to say with Mark 4:34 that all of Jesus' words are parables.

In the Aristotelian tradition, however, the distinctions are more detailed and more precise. In *The Art of Rhetoric* (2.20) Aristotle divides rhetorical proofs into general statements that can be used for deductive purposes, such as maxims and proverbs, and specific stories that can be used for inductive purposes. These latter stories can be either historical or fictional, and the fictional ones may be either possible, such as parables, or impossible, such as fables. For the Aristotelian tradition, then, parables are a very specific type of metaphor. They are realistic but metaphorical narratives.

The contemporary understanding of the parabolic genre is closer to the Aristotelian than the biblical tradition. For moderns, the three elements in a parable are narrativity, metaphoricity, and brevity; it is a very short story with a double meaning. On the surface level it speaks, say, of sowing or fishing, but on a deeper level it points to something else and it challenges one to discover that something else by close interpretation.

While the OT abounds in metaphors, aphorisms, proverbs, riddles, and other figurative discourse, it also contains parables in the narrower sense of a short story with a double meaning. The "Song of the Vineyard," found in Isaiah 5:1–2, is one such example. Its parabolic nature was recognized by Jesus when he fashioned his parable of the wicked husbandmen after it (Mark 12:1–11). Another example is the story Nathan tells David about the theft of a prized lamb (2 Sam. 12:1–4). In the Song of the Vineyard, the hearers are explicitly invited to participate in the story (Isa. 5:3–4), and David's reaction to Nathan's parable shows David's participation in that story as well. In each instance, the parable has attached to it its interpretation (Isa. 5:7; 2 Sam. 12:7–9), a feature also found in some NT parables (e.g., Mark 4:14–20 for Mark 4:3–9; Matt. 13:36–43 for Matt. 13:24–30). Despite the appearance of parables in the OT, however, it is with the sayings of Jesus that the biblical parable achieves its most widespread use.

Parables of Jesus: When the parables of Jesus are understood in the biblical tradition as including the full spectrum from metaphorical aphorism through metaphorical narrative to metaphorical discourse, the listing includes almost everything Jesus said. When they are understood in the Aristotelian and contemporary traditions as including only metaphorical narratives, the list on the accompanying table is the basic corpus. The list is given in terms of the number of independent sources for each parable; in those cases where the parable may have appeared in more than one source, that is also indicated (e.g., the parable of the mustard seed, which apparently appeared in Mark and in Q).

The distinction between metaphorical aphorism and metaphorical narrative is usually quite evident. The aphorism is a one-liner, such as Mark 10:25, while the narrative has, as it were, three acts: a beginning, a middle, and an end. But the narrative should also have a middle and end not absolutely and irrevocably contained in its beginning. This is a significant criterion in those intermediate cases where we have what looks like a metaphorical narrative but is really just a developed metaphorical aphorism, and some of these may even be present in the list in the accompanying table. They are quite common in Q (a source, posited by scholars, containing sayings of Jesus), where they reflect the theology of Wisdom offering herself, being either accepted or rejected, and rewarding or punishing accordingly. A classic example is the three successive acts of building, storming, and staying/falling in Q/Matt. 7:24–27 and Q/Luke 6:47–49. This is not a narrative but an explicit development of what is already implicit in the aphorism of Matt. 7:24 and Luke 6:47.

PARABLES

PARABLES OF JESUS

Mustard Seed (Mark 4:30–32; Matt. 13:31, 32; Luke 13:18–19; Q/Matt. 13:31; Q/Luke 13:18–19; *Gos. Thom.* 20)
Sower (Mark 4:3–8; Matt. 13:3–8; Luke 8:5–8; *Gos. Thom.* 9a)
Evil Tenants (Mark 12:1–11; Matt. 21:33–42; Luke 20:9–18; *Gos. Thom.* 65a [see also 66])
Harvest Time (Mark 4:26–29; *Gos. Thom.* 21d)
Leaven (Q/Matt. 13:33; Q/Luke 13:20–21; *Gos. Thom.* 96)
Great Supper (Q/Matt 22:1–4; Q/Luke 14:16–24; *Gos. Thom.* 64a)
Lost Sheep (Q/Matt 18:12–13; Q/Luke 15:4–6; *Gos. Thom.* 107)
Talents (Q?/Matt 25:14–30; Q?/Luke 19:11–27)
Wheat and Weeds (Matt. 13:24–30; *Gos. Thom.* 57)
Treasure (Matt. 13:44; *Gos. Thom.* 109)
Pearl (Matt. 13:45–46; *Gos. Thom.* 76a)
Net (Matt. 13:47–48; *Gos. Thom.* 8a)
Rich Fool (Luke 12:16–20; *Gos. Thom.* 63a)
Unmerciful Servant (Matt. 18:23–24)
Laborers in the Vineyard (Matt. 20:1–15)
Ten Bridesmaids (Matt. 25:1–12)
Good Samaritan (Luke 10:30–35)
Barren Fig Tree (Luke 13:6–9)
Tower Builder (Luke 14:28–30)
King at War (Luke 14:31–32)
Lost Coin (Luke 15:8–9)
Prodigal Son (Luke 15:11–32)
Unjust Steward (Luke 16:1–7 [or 8a])
Rich Man and Lazarus (Luke 16:9–31)
Unjust Judge (Luke 18:2–5)
Pharisee and Publican (Luke 18:10–13)
Children in the Field (*Gos. Thom.* 21ab)
Empty Jar (*Gos. Thom.* 97)
Assassin (*Gos. Thom.* 98)

In the basic parabolic corpus given in the table there are excluded not only metaphorical aphorisms and discourses but also those extended or developed metaphorical aphorisms that come closest in appearance to the metaphorical narratives so peculiarly characteristic of Jesus. Certain cases might still be argued one way or another, but, in general, the table lists Jesus' parables in the sense of figurative stories whose plot is not just the inevitable unfolding of the opening sentence.

Interpretation: Parables provoke interpretation. They do this by making one wonder how they apply to their referent. They also do it by making one wonder what their referent is.

In some cases the referent is quite clear from the context. This may be given before and/or after the parable, and the parable may even be applied to its referent in specific detail. This often happens, for example, in rabbinical parables exemplifying the answers to exegetical difficulties or moral problems. The insertion of Jesus' parables into their present Gospel positions often clarifies the referent by context in similar if less detailed fashion. Thus Luke connects the parables of the lost sheep, the lost coin, and the prodigal son, both to each other in 15:3–32 and to their present referent in 15:1–2.

The Roman road from Jericho to Jerusalem. The parable of the Good Samaritan is set in this region (Luke 10:30–35).

If one asks, however, about the original referent of the parables in the life of the historical Jesus, the question is much more difficult. One plausible working hypothesis is to connect all of the parables to his dominant theme of the Kingdom of God, to its gracious advent, its disturbing presence, and its challenging implications. This conjunction of Kingdom and parable is underlined by the parable of the mustard seed, for example (Mark 4:30–32; Matt. 13:31; Luke 13:18–19). We have three independent versions of this story and it appears as a Kingdom parable in all three. But even if one accepts the Kingdom as the original referent of Jesus' parables, one can still ask whether the Kingdom for Jesus is a future and apocalyptic event or a present and mysterious reality. The answer must take into account the serene and everyday normalcy of Jesus' parabolic imagery as against the necessarily extraordinary and unique imagery of apocalyptic discourse.

In their present Gospel locations, parables may be interpreted not only by general context but also by specific commentary from Jesus himself. Thus, on the one hand, Mark 4:13–20; Matt. 13:18–23; and Luke 8:11–15 interpret the parable of the sower, but the *Gospel of Thomas* does not; Matt. 13:37–43 interprets the wheat and weeds, but the *Gospel of Thomas* does not; and, on the other, *Gos. Thom.* 64b interprets the great supper, but Matthew and Luke do not. Those interpretations are most likely from the tradition rather than from Jesus himself, but their presence and especially their diversity sound an important warning. Parables demand interpretation, and multiple, diverse, and successive commentary is their destiny. The sower,

a parable of parabling the Kingdom, reminds us that misinterpretation is always possible but also that even faithful interpretation will be plural rather than univocal. The parable risks losing control over the hearer in the interest of participation by the hearer because the Kingdom of God is an interaction between the divine and the human. The parable is a most appropriate form for such a process. ***See also*** Good Samaritan; Gospel of Thomas; Jesus Christ; Kingdom of God; Prodigal Son.

Paraclete (pair´uh-kleet), the transliteration of a Greek term meaning "called to the side of" and hence "advocate" (cf. 1 John 2:1). Its importance derives from its use in the Gospel of John (14:16–17, 26; 15:26; 16:7–11; cf. 16:13–15), where Jesus promises his disciples that when he departs he will send them another Paraclete (RSV and NIV: "Counselor"; KJV: "Comforter"; JB and NEB: "Advocate") to remain with them. As the Fourth Gospel makes clear, the Paraclete is the Holy Spirit, or Spirit of Truth (14:17, 26). In fact, the Fourth Gospel's teaching about the Holy Spirit is set forth in terms of the Paraclete, who continues the work of Jesus himself (14:16–17), recalling things the earthly Jesus taught or revealing things he was unable to convey (14:26; 16:12–14). In John's view, this spiritual knowledge or insight, unavailable until after Jesus' death and resurrection, makes for the first time Christian faith and understanding fully possible. ***See also*** Holy Spirit, The; John, The Gospel According to. D.M.S.

paradise, a location or status of uninterrupted bliss. Some groups within Judaism had come to believe in life after death by the early second century B.C. They sought concrete images with which to express that new faith as an extension of traditional ideas. Since God had placed the first couple in an idyllic park (the Garden of Eden), it was plausible to assume that a similar location awaited the righteous after death. The Greek Bible referred to the Garden of Eden as "Paradise," and hence the term came to be used for the destination of the righteous. The word "paradise" is ultimately of Persian origin, and denotes a "park" or "forest." Since the Bible lands were often barren, it is not surprising that such an image would be meaningful.

Once this particular image was established, questions arose in the minds of the pious: where is paradise located? Is it an intermediate state prior to the resurrection, or is it the eternal home of the righteous thereafter? Various suggestions were made. For some thinkers, paradise was located in the remotest part of the earth, and for others it was in the lower part of the sky above.

NT writers generally accept the paradise image. Paul speaks of it in connection with his vision of the "third heaven" (2 Cor. 12:1–4), and Jesus suggested to the thief that both of them were destined for paradise at the moment of death (Luke 23:43).

Some passages, instead, suggest that the martyrs are immediately taken to the highest of seven heavens where they await the resurrection at "the altar" (Rev. 6:9–11; 7:9–17). Other passages imply that the dead, righteous and wicked alike, descend to the underworld and await the resurrection in a sleeplike state (Matt. 12:40; 1 Thess. 4:13–16). This is more in accordance with older biblical thought. Some writers suggest that, following the resurrection, the righteous will live in a paradise on earth and will feast from the "tree of life" (Rev. 2:7; 22:1–2). ***See also*** Death; Heaven; Resurrection; Sheol. L.R.B.

parallelism, a rhetorical device involving one or more linguistic repetitions or correspondences (grammatical, lexical, semantic, or phonetic) in adjacent lines or phrases. While present in prose, parallelism is more prominent in biblical poetry, where it often appears to be a basic structuring device. An example is Ps. 103:10: "He does not deal with us according to our sins, nor requite us according to our iniquities." In this verse the syntactic, semantic, and lexical correspondences between the two phrases are many and obvious (e.g., "deal with" "requite"; "sins" "iniquities"; "according to" "according to"). Other verses may have fewer correspondences but may still be considered parallel.

paralysis, one of the diseases Jesus heals (Matt. 8:5–13; 9:1–8; 12:9–14; Mark 2:1–12; 3:1–6; Luke 5:17–26; 6:6–11) to illustrate the arrival of the Kingdom of God and fulfill the expectation that in the eschatological age such defects in God's creation would be eliminated (see Isa. 35:5–6).

Paran (pay´ruhn), the wilderness site where the Israelites camped after they left Mount Sinai (Num. 10:11–12; 12:16), and from which spies were sent to reconnoiter Canaan (Num. 13:3–26). The return of the spies to Kadesh suggests that the location was south of Canaan along the north edge of the Sinai triangle. The association of Kadesh with the Wilderness of Zin (Num. 33:36) and Paran (LXX) reinforces the identification.

Gen. 21:21 designates it as Ishmael's home after his banishment. If 1 Sam. 25:1 accurately

reports David's visiting the place after Samuel's death, it suggests territory at the south edge of Judah. Similarly, if 1 Kings 11:18 accurately reflects the flight of Edomite Hadad from Midian through Paran to Egypt, it would confirm a location west of Edom and Midian in the same region.

References to Paran in Deut. 33:2 and Hab. 3:3 speak poetically of a mountain in which divine manifestation occurred. In those passages "Paran" refers to Mount Sinai. R.S.B.

parchment. *See* Writing.

pardon, the act by an empowered authority of reversing a sentence rendered under a verdict of guilty. This context of the legal system is not unrelated to the biblical understanding of pardon. At the heart of the matter for the biblical writers, however, is not the mere history of an idea or concept from the OT to the NT but the event and experience of a crucial reality. From the biblical perspective, the human creature is subject to the created order and accountable to the Creator for violations of this order. Human inability to perceive this is regarded as blindness and self-deception. The condition would be hopeless if the Creator were not mercifully disposed toward his creatures.

The OT believes that God is eager to pardon (e.g., Neh. 9:17; Jer. 36:3; Pss. 86:5; 130:4; Dan. 9:9), to find humility and repentance (2 Chron. 7:14; Ps. 86:5) and the will to change (Deut. 30; Num. 14:18; Josh. 24:19–21; 1 Kings 8:36; Ps. 51:12; Jer. 5:1–9). The provision for pardon as atonement/expiation has been made by God himself to remedy the condition of sin. Ezek. 33:10–16 is typical of the prophetic voice urging people to turn back to God for pardon (cf. also, e.g., Isa. 55:6–7). For both OT and NT, pardon and forgiveness are virtually synonymous.

In the NT Gospels, Jesus preaches a message of pardon (e.g., Luke 15), and the intercession of Jesus—especially his death (1 Cor. 15:3; Luke 23:34)—is proclaimed as the basis for seeking and receiving pardon. The community of faith is conscious of the intercession of its resurrected Lord (John 17) and prays for forgiveness (Matt. 6:12; Luke 11:4). There is no sin that cannot be pardoned (Mark 3:28–29 and parallels speak of that which is tantamount to the willful rejection of pardon; cf., however, 1 John 5:16–17; Heb. 6:4–8; 10:26–31). John the Baptist understood himself to be in the final hour of God's judgment; his baptism of repentance was the last hope for forgiveness and that quite apart from all sacrificial rites (Mark 1:4; cf. Matt. 3 and Luke 3; John 1:29–34). In the cup of the Lord's Supper, the new covenant in Jesus' blood is for the forgiveness of sins (Mark 14:24; 1 Cor. 11:25). Paul's theology of the cross sees forgiveness as the basis for a new beginning (2 Cor. 5:17; Gal. 1:4; 2:20; 6:15; Rom. 8:9–11). For John's Gospel, this forgiveness is carried out in the life of the community of faith (John 20:23). Finally, God's pardon is experienced through the work of his Spirit (1 Cor. 2:12–16; cf. Col. 2:12; Acts 2:38). The experience of pardon is also known as reconciliation (2 Cor. 5:18–21; Rom. 5:10–11; Col. 1:20) and peace with God (Rom. 5:1; 1 Thess. 1:1; 5:23). ***See also*** Atonement; Covenant; Expiation; Forgiveness; Guilt; Reconciliation; Redemption; Salvation; Sin. parent. *See* Family, The; Father; Marriage; *and such individual entries as* Athaliah; Deborah; Elizabeth; Hagar; Hannah; Mary; Rachel; Rebekah; Ruth; Sarah.

parental blessing, the blessing given by a father to his children, especially that given to his firstborn son. Normally given when the father is an old man nearing death (Gen. 27:2; 48:21; 49:1), this blessing forms part of his testamentary farewell to his children. A prime example of this in the OT is the blessing of the younger son Jacob by Isaac. In the Yahwist narrative, the blessing comes to Jacob by deception (Gen. 27), a motif that is absent from the Priestly version of the blessing (Gen. 28:1–5). In Israel's blessing of Joseph's sons, the motif of the choice of the younger son (Ephraim) over his older brother (Manasseh) reappears (Gen. 48:15–20). The parental blessings given to Jacob and Ephraim in Genesis are an element of the theology of blessing in the patriarchal narratives (cf. Gen. 12:2–3 to Gen. 27:29 and 48:19–20). An example from the Apocrypha of the parental blessing is Tobit's blessing of his son Tobiah (Tob. 5:17; 11:27). J.S.K.

Parmenas (pahr'muh-nuhs), one of the seven selected in the Jerusalem church to care for the widows and distribute food to the poor (Acts 6:1–6). He was probably a Hellenistic Jew. ***See also*** Hellenists.

Parosh (pay'rosh; Heb., "flea"; KJV: "Pharosh"). **1** The head of a family returning from Exile with Zerubbabel (Ezra 2:5; Neh. 7:8) after being exiled under Artaxerxes (Ezra 8:3). Some members of the family had married foreign women (Ezra 10:26); another descendant, Pedadiah, led repairs near the Water Gate (Neh. 3:25–26). **2** A signatory on the covenant of Nehemiah (Neh. 10:14); some conclude that this person is a descendant of the clan designated in 1. **3** Word occurring in 1 Sam. 24:14; 26:20 ("a single flea") as a metaphor for a very minor irritation and target.

Parousia (puh-r*oo*'zhee-uh), a Greek word meaning "coming," "arrival," or "being present." It occurs several times in the NT: Matt. 24:3, 27, 37, 39; 1 Cor. 15:23; 1 Thess. 2:19; 3:13; 4:15; 5:23; 2 Thess. 2:1, 8; James 5:7–8; 2 Pet. 1:16; 3:4, 12; 1 John 2:28. In most instances, the

term gives expression to the early Christian belief and expectation that Jesus will appear, in the future, as Son of Man, Christ (Messiah), or Lord. Frequently in these texts, Jesus is visualized as the one who will sit as judge on the coming day of judgment.

Broader and Narrower Usages: Modern scholars sometimes use the term "parousia," like the term "eschatology," more generally to indicate some or all of the other events associated with Jesus' expected future appearance in early Christian, especially NT traditions. Such other events sometimes include the resurrection of the dead, the return of the "saints" (or righteous Christians) with the risen Jesus, the transformation of the living (at any rate, those faithful believers who are still then alive), the time of judgment, the condemnation of the wicked to perdition, and the entering of those found righteous into the kingdom of God or the heavenly realm where they will enjoy eternal life together with the Lord. The prospect of eternal life "in the air" or in heaven, anticipated in John 14:2–3, 1 Thess. 4:13–17, and Phil. 3:20, is sometimes popularly called "the rapture," a nonbiblical term coined several decades ago.

In the NT, the term "parousia" is used more narrowly: in synoptic texts in connection with Jesus' references to the future coming or disclosure of the Son of Man, and in Pauline and other Letters with the future appearance of Christ or of the "Day of God." One passage possibly refers to Jesus' previous coming as his "parousia" (2 Pet. 1:16). Many other NT passages refer to Jesus' future coming, but without mentioning "parousia." In only one text (John 14:3) does Jesus say that he will come "again," and only Heb. 9:28 refers to his "second" coming. Jesus' future appearance is described most dramatically in Revelation (19:11–16), which thematically assures readers that Jesus has said he is coming *soon* and that the "time" is now "near" (Rev. 1:1, 3; 3:11; 22:10, 12, 20).

Signs or No Signs? A number of synoptic passages suggest that certain "signs" or preliminary phenomena may indicate that Jesus' Parousia or other parousia events are imminent (Matt. 24:4–34; Mark 13:5–20; Luke 21:8–28; cf. 2 Thess. 2:1–12; 1 John 2:18). Other texts state flatly, however, that no preliminary signs will be given (Mark 8:12; Luke 17:20–21; cf. Luke 17:23–24). Indeed, many NT texts call on readers to be ready because such events will take place without warning, and—implicitly if not explicitly—in the near future (see, e.g., Matt. 24:43–44; Luke 12:35–40; 1 Thess. 5:2–3; James 5:7–11; 2 Pet. 3:10; Rev. 3:3; 16:15).

Imminence or Delay? Nearly all NT writings contain statements to the effect that Jesus will come (and/or other parousia events will take place) within the lifetime of at least some of his hearers (or readers of the writings). The fact that he did not come (and that other central parousia expectations were not fulfilled) within the NT period is a matter of concern in a number of NT writings. The earliest indication of such concern is in the Pauline Letters, where Paul addresses readers' anxieties as to the fate of Christians who have died ("those who have fallen asleep") and the doubts of some as to whether there will be a resurrection; he assures them that Jesus' own resurrection was the "first fruits" of the more general resurrection to follow (1 Thess. 4:13–18; 1 Cor. 15:12–34). It appears that the author of the final chapter of John's Gospel attempts to reconcile a tradition to the effect that "the beloved disciple" (often thought to be John, the last of the generation of Jesus' followers) will not die before Jesus' return with the obviously problematic fact that "the beloved disciple" has died (John 21:20–23). More directly, the author of 2 Peter attempts to counter "scoffers," who point out that things remain the same as always, with various arguments accounting for the "delay of the parousia" (2 Pet. 3:3–9).

The "problem of the delay of the Parousia" in Luke (and Acts) has been of special interest to modern scholars. Hans Conzelmann proposed that the author of Luke-Acts visualized himself and his contemporaries as living "in the middle of time," though not, as this expression might suggest, halfway between Jesus' lifetime and his return as Christ (Messiah). Instead, according to Conzelmann, Luke intended his readers to understand Jesus as meaning that the Parousia was to be postponed indefinitely, and that they were now entering upon the era of the church. Several interpreters have challenged Conzelmann's proposal, noting, for example, that Luke and Acts contain many passages, some found only in these writings, stating that the Parousia or related events are to take place in the near future. Such texts may signify that the author intended *both* to explain the delay of the Parousia up to the time he was writing *and* to encourage his contemporaries to be prepared for the parousia events that might come upon *them* at any time. The latter emphasis is found in the other synoptic Gospels as well as in Paul's Letters and several other NT writings (e.g., Matt. 24:36–51; 25:1–13; 31–46; Mark 9:43–49; 10:23–31; 13:32–37; 1 Cor. 6:9–11; 7:25–31; Gal. 5:16–21; Phil. 3:17–21; 1 Thess. 5:1–22; James 5:7–12; 1 Pet. 4:1–17; 2 Pet. 3:11–18).

Such synoptic sayings, along with others that refer to the coming of the kingdom of God and related eschatological events in the then near, if not imminent, future could present serious problems for later Christian interpreters. Prophecy-oriented and millennialist evangelical interpreters generally read NT parousia texts to mean that the coming ("Second Coming") of Jesus and other events of the last days may now take place in the near future. But Jesus and the NT writers appear to have been addressing their own contemporaries. Could Jesus have been mistaken as to when the parousia events would take place? If he was mistaken about this, was

he also mistaken about other matters? Were his ethical teachings, so important to the Christian life, tied up with his parousia beliefs, and are they now therefore somehow discredited by the nonoccurrence of the Parousia? Or does Jesus' admission that only God knows its exact time (Mark 13:32) mean that all statements about its nearness are relativized? That Paul and other NT writers might have been mistaken appears to be less of a problem for modern Christian interpreters. Historically oriented interpreters are, of course, concerned as to what modern believers should make of those future expectations: whether they do or should mean something important, at least as symbols of transcendent and enduring hopes. Some of these questions are considered in other articles in this volume. ***See also*** Apocalyptic literature; Day of Judgment; Day of the Lord; Eschatology; Jesus; Kingdom of God; Messiah; Millennium; Paul; Son of Man; Resurrection; Revelation to John, The.

Parthians (pahr´thee-uhnz), an Iranian people. The northeastern region of Iran, known as Parthava since at least the seventh century B.C., became prominent when the Parni tribe of central Asia wrested it from the Seleucids. By the second century B.C., the Parni dynasty, traced to Arsaces I, had expanded throughout the Iranian plateau and beyond. They were strong enough to stop Roman expansion at the Euphrates in 53 B.C., although Trajan did later briefly occupy their capital at Ctesiphon. As a result of their rivalry with western powers, the Parthians became involved in Judean affairs, supporting Antigonus II as king in Jerusalem until Roman assistance enabled Herod to displace him. Luke reports some Parthians were present in Jerusalem at Pentecost (Acts 2:9). The Parthian Empire fell to the Sasanians early in the third century A.D. F.E.G.

partridge, a medium-sized, stout-bodied gamebird. The most frequent species of the partridge is the chukar partridge (*Alectoris chukar*), a medium-sized gamebird with red legs and red beak that lives in rocky terrain. Its typical cackling voice is similar to that of a clucking hen. When chased, it prefers to run, and only flies short distances.

In 1 Sam. 26:20 Saul's pursuit of David is compared to a partridge hunt. In Jer. 17:11, the partridge is wrongly accused of stealing other birds' young.

pascal (pas´kuhl; sometimes spelled paschal), "pertaining to Passover," a term usually applied to the lamb slaughtered for the Passover feast. According to the Gospel of John, Jesus was crucified the day the pascal lamb was slain (cf. 1 Cor. 5:7).

Paseah (puh-see´uh; Heb., "limper"; KJV: "Phaseah"), the personal name of three people, perhaps because they were all partially disabled. **1** The Judean son of Eshton (1 Chron. 4:12). **2** An ancestor of some Temple servants working in postexilic Judah (Ezra 2:49; Neh. 7:51). **3** The father of Joiada who, with Meshullam, repaired the Old Gate (Neh. 3:6).

Pashhur (pash´huhr; KJV: "Pashur" from Egyptian *pš-ḥr*, "Portion of [the god] Horus"). **1** A priest, son of Immer, and chief officer in the Temple; he opposed Jeremiah's prophecy, beat him, and put him in stocks. Jeremiah renamed him "Terror on Every Side," reaffirmed his own word of destruction, and prophesied personal exile to Babylon for Pashhur and his family (Jer. 20). **2** The son of Malchiah, who apparently was King Zedekiah's son. Zedekiah sent Pashhur to inquire of the Lord through Jeremiah (Jer. 21) while Nebuchadnezzar was making war against Judah. Jeremiah repeated God's word of destruction. The same Pashhur, a high official, accused Jeremiah of treason and recommended his death (Jer. 38). Later, among the priests who returned from exile was Gedaliah, a descendant of Pashhur, son of Malchiah (1 Chron. 9:12; Neh. 11:12, though of different generations). The descendants of Pashhur, distinct from the descendants of Immer, made up one of the important priestly families who returned from the Exile (Ezra 2:38; 10:22; Neh. 7:41). **3** The father of the Gedaliah who joined Pashhur, son of Malchiah, in the action against Jeremiah (Jer. 38:1); he was perhaps the same Pashhur as 1

The name "Pashhur" written in Hebrew on an ostracon from Arad, ninth–sixth century B.C.

above. **4** A high official who was contemporary with Nehemiah (Neh. 10:3). ***See also*** Jeremiah, The Book of. H.B.H.

passion, aroused or inflamed emotions. Apart from this normal meaning (Prov. 14:30; 1 Cor. 7:9; 1 Thess. 4:5) the term is also used to refer to the suffering and death of Jesus. Hence the expression "Passion narrative" is often used today to cover the whole account of Jesus' arrest, trial, and crucifixion in the four Gospels. Acts 1:3 is the only passage to speak of "his Passion." A number of other passages speak of the "necessity" that the "Messiah" suffer (Mark 8:31; Luke 17:25; 24:26, 46; 3:18; 17:3; Heb. 9:26). ***See also*** Cross; Trial of Jesus, The. P.P.

Passion Sunday, in the liturgical year the second Sunday prior to Easter and the Sunday that begins the Lenten season of Passiontide. With the reforms of the Second Vatican Council (1962–65), the period of Lent was simplified, for the Roman Catholic church, and the Sunday prior to Easter, formerly known as Palm Sunday, was renamed Passion Sunday. Other churches have also made this change, and on occasion both names are retained as Passion Sunday (Palm Sunday), or Sunday of the Passion: Palm Sunday.

Passover (pas´oh-vuhr), **the,** a religious festival commemorating God's deliverance of the Jews from bondage. The English term translates the Hebrew word *pesach* as used in Exod. 12:13, *"I will pass over you,* and no plague shall fall upon you to destroy you, when I smite the land of Egypt" (see also vv. 23, 27). The verb also may have the connotation "protect" in Isa. 31:5, although such a sense is probably already reflective of the Exodus (Isa. 31:3). Elsewhere in the Hebrew the verb means "hop, skip" (1 Kings 18:21, 26; RSV: "limp") or "limp" (2 Sam. 4:4; RSV: "lame," and see the noun form "lame" from the same root in Lev. 21:18; 2 Sam. 9:13; Isa. 35:6). Unconvincing attempts have been made by scholars to derive the etymology of *pesach* from Akkadian, Egyptian, and Arabic loan words. In the Bible, the noun *pesach* always refers to the sacrifice (Exod. 12:27) or the attendant festival (2 Kings 23:22).

Scholars have difficulty reconstructing the origins and historical development of the Passover festival due to the relative paucity of information in the Bible and elsewhere and the differing perceptions of the literary sources and traditions that marshal the evidence. The Bible contains eight chronological references to the Passover.

Biblical References: The first is to the Passover of the Exodus (Exod. 12:1–13:16), generally seen to be a pastiche of sources, the dominant one being P, the Priestly source. Since Exod. 12 starts out with a reference to the partaking of the paschal lamb in the first month of the year (vv. 2–10), Abib (March–April; 13:4), some scholars think that the Passover was originally a spring New Year festival, similar to the autumnal Feast of Tabernacles. On the 10th of the month each family was to choose a lamb (v. 3) to be slaughtered at twilight on the 14th (v. 6). The blood was to be smeared on the doorposts and lintel of the house (v. 7), which God would see and thus spare the inhabitants from the destruction of the Egyptian firstborn (vv. 12–13). The apotropaic (protective) nature of the rite is thus indicated. After roasting, all of the flesh of the animal was to be eaten in the house that night, but only by the Israelites and their circumcised slaves; the remnants were to be burned in the morning (vv. 8–10, 43–47). The people were to eat the sacrifice hurriedly, dressed to flee Egypt (v. 11). This day would be a memorial feast in perpetuity (v. 14). From the evening of the 14th until that of the 21st the Israelite houses would be clean of leaven, and only unleavened bread, *matzot,* would be eaten (vv. 14, 18–20). These days too would be celebrated yearly, although there is confusion on whether it would be celebrated already in the desert (implied in v. 17?), or only upon entering Canaan (13:5–7[E], and v. 10). The 1st and 7th days of eating the *matzot* would be shared assemblies, with no work allowed (12:16). The festival of *matzot* was also conceived as a memorial to the Exodus (12:17; 13:3, 9). It is incumbent upon parents to explain the significance of these feast days to children (12:26–27; 13:8; cf. 13:14).

The next reference is to the second year of the Exodus (Num. 9:1–14, identified as P and therefore late by most scholars): the Passover sacrifice and its attendant rites are kept in the wilderness of Sinai (vv. 3, 5). Those who were defiled by a corpse (vv. 6, 10) or too far away (vv. 10, 13) would keep the Passover with *matzot* and bitter herbs on the 14th day of the second month. A non-Israelite who dwelled among the tribes would also be required to observe the Passover (v. 14). The lateness of this passage is evidenced by the reference to the "too distant way" (v. 10), which assumes a central sanctuary (cf. Deut. 12:21; 14:24).

After entering Canaan in the days of Joshua (Josh. 5:10–12), at Gilgal on the plains of Jericho the Israelites performed the Passover sacrifice (v. 10), and on the following day they ate *matzot* and parched corn (v. 11; cf. Lev. 2:12). There is controversy over the dating of this passage. Those who see it as early contend that here is evidence of the unification of the Passover sacrifice with the eating of *matzot* within an historicized memorial to the Exodus already at Israel's incursion into Canaan. Those who see this passage as late (influenced by Deuteronomy) understand the reference as anachronistic.

A fourth reference is to the time of the judges and Samuel. In the midst of a description of

Joshua's Passover, 2 Kings 23:22 and 2 Chron. 35:18 allude to an exemplary Passover of earlier times.

Another refers to the time of Solomon, implied by 1 Kings 9:25 and stated in 2 Chron. 8:13 (the feast of *matzot*) and 31:26.

A sixth reference is to the days of Hezekiah (727–698 B.C.; 2 Chron. 30:1–27, not recorded by Kings): a Passover kept by royal decree in the second month due to impurity of the priests (v. 3), which was kept by Judah and some of the remnants of the northern tribes in Jerusalem (vv. 11–13). The priests purified the people (v. 16), and the Levites oversaw the slaughter of the paschal lamb (v. 17). The Passover was succeeded by the seven-day *matzot* festival accompanied by praise of God and music (v. 21). Three facts have convinced some scholars of the unhistorical nature of this passage: first, Kings records no such event; second, it appears to contain elements of Solomon's dedication and Josiah's Passover (2 Chron. 35:1–18); and, third, Hezekiah, like Josiah later, is seen to be concerned to make reforms in the north (2 Kings 23:15–20; 2 Chron. 34:33). However, 2 Kings 18:4 does depict Hezekiah's broad religious reforms, which would be consistent with an attempt at a proper Passover celebration.

A seventh reference is to the days of Josiah (639–609 B.C.; 2 Kings 23:21–23; 2 Chron. 35:1–19). In the eighteenth year of Josiah's reign, as part of his reforms based upon the newly found book of the covenant (2 Kings 23:21; cf. 22:8, 11; 23:2–3), he decreed the observance of the Passover in Jerusalem (cf. Deut. 16:2, 5–6), which is viewed by the historian as extraordinary (2 Kings 23:22–23). The author of Chronicles' expanded account (2 Chron. 35:1–19) adds that the Levites slaughtered and flayed the thirty thousand lambs and kids for the *pesach* given by the king and the twenty-six hundred given by the princes, as well as the cattle for the sacrifices (vv. 6–11). The priests purified the people with the sprinkling of the blood (v. 11). The *pesach* was roasted, but the other animals destined for the sacrifices were boiled (v. 13). Thus, Chronicles reconciles the discrepancies between Exod. 12:8–9, which commands roasting, and Deut. 16:7, which states that the *pesach* should be boiled. The seven-day feast of *matzot* accompanied the *pesach* (2 Chron. 35:17). The uniqueness of the event is reemphasized (v. 18).

A final reference is to the days of Zerubbabel (Ezra 6:19–22). After the dedication of the rebuilt Temple, during the sixth year of Darius (515 B.C.; Ezra 6:15–17), the returned exiles from Babylon observed the Passover. The purity of the community is emphasized (Ezra 6:20–21), in keeping with the concern for reinstituting proper worship after the Exile. As in 2 Chronicles 35, the Levites slaughter the *pesach* (v. 20). The seven-day feast of *matzot* was kept with great joy (v. 22).

Although dates are not adduced, it is apparent that the command in Deut. 16:2, 5–7 to observe the *pesach* "at the place which the Lord your God will choose, to make his name dwell in it" indicates a transition from the house ceremony (Exod. 12:46) to that of the Temple. Unfortunately, it is impossible to know the date of this transition, scholarly conjecture notwithstanding.

Extrabiblical References: In addition to the evidence from the Hebrew Bible, two ostraca and a papyrus refer to the meticulous celebration of the Passover in the Jewish community of Elephantine in Egypt in the fifth century B.C.

Origin and Significance: Much ink has been spilled concerning the nonhistorical prebiblical origins of the Passover. The most accepted position is that the *pesach* sacrifice originated in a seminomadic ceremony held in spring and fall when feeding grounds for the flock were alternated due to change of seasons. The ceremony thus would have been a petition for the deity's protection and favor during the time of migration. Another view ties the Passover in with a spring New Year's festival. There is considerable difference of opinion as to when the sacrifice from the flock was joined in ceremony with the offering of the first fruits of the barley harvest. The fact is, however, that the Bible knows of no such disparate origins. The historical aspects always appear together with these of agriculture and sheepherding, just as the feast of *matzot* is always joined to the *pesach*. This reality alone is evidence that all these elements came together at a very early stage of Israelite history.

The ultimate significance of the Passover, though, is not in its sociology or history, but in its unique role in the life of the Jewish people. It was and is the festival of freedom and redemption par excellence. Representative of God's love and saving acts, it always gave the people hope in the face of physical and spiritual oppression. As a family celebration, it served as a unifying bond from generation to generation. Its strength is seen in its emergence as the most important of Jewish festivals, in its three-thousand-year continuity, and in its continuing relevance to the needs of the people, whether it be freedom from social discrimination or the acquisition of religious liberty.

The traditions of God's love and of his saving acts prompted the nascent Christian community, according to the Gospels at the command of Jesus, to celebrate a thanksgiving (Gk. *eucharistia*) festival commemorating the Passover he celebrated with his disciples the night before his crucifixion (1 Cor. 11:23–26) and the saving effects of that death and subsequent resurrection (Matt. 26:17, 26–28). The centrality of that observance for the Christian faith, drawing on the Passover as the central observance of the Jewish faith, clearly shows how deeply rooted Christianity is in the historic life and faith of

the people of Israel. ***See also*** Exodus; Feasts, Festivals, and Fasts; Temple, The; Worship.

Pastoral Epistles. ***See*** Timothy, The First and Second Letters of Paul to and Titus, The Letter of Paul to. These three letters are called "pastoral" since they express a pastoral concern for the addressees, and because they exhibit a concern for the orderly pastoral care of Christian congregations.

Pathros (path´ros), Upper Egypt, the region south of Memphis and the Nile delta. There were Israelite exiles in Pathros (Isa. 11:11); Jeremiah and Ezekiel cried out against them (Jer. 44:1, 15; Ezek. 29:14; 30:14).

The Pathrusim were the people of Pathros and were described as descendants of Egypt (Gen. 10:14; 1 Chron. 1:12).

Patmos (pat´muhs), one of the Sporades Islands in the Aegean Sea. It lies about thirty-seven miles southwest of Miletus, a city on the coast of western Asia Minor. It is a small island, about ten miles long from north to south and six miles wide at its broadest point. In Rev. 1:9 John says that he was on Patmos "on account of the word of God and the testimony of Jesus." Early Christian tradition says that John was banished to Patmos by the Roman authorities. This tradition is credible because banishment was a common punishment used during the Imperial period for a variety of offenses. Among such offenses were the practices of magic and astrology. Prophecy was viewed by the Romans as belonging to the same category, whether pagan, Jewish, or Christian. Prophecy with political implications, like that expressed by John in the book of Revelation, would have been perceived as a threat to Roman political power and order. Three of the islands in the Sporades were places where political offenders were banished (Pliny *Natural History* 4.69–70; Tacitus *Annals* 4.30).

Patmos was the scene of at least some of John's visionary experiences and was probably the place where he wrote the book of Revelation. His banishment made communication in written form with Christians in Asia Minor a necessity. ***See also*** Miletus. A.Y.C.

patriarch, the male head of a family or a clan. In the OT the term conventionally and specifically refers to the key figures in the Genesis narrative, Abraham (Gen. 12–24), Isaac (Gen. 25–36), and Jacob (Gen. 25–36), who are reckoned as the progenitors and pioneers of biblical faith. The figure of Joseph (Gen. 37–50), set in a different literary mode from the other three, is not treated in the same sense in the development of the tradition and so is not included among the patriarchs.

Historical Persons: Whether the patriarchs were specific historical persons is a difficult question. Scholarly consensus maintains that these persons, their movements, and families are well rooted in the cultural, political, and economic fabric of the Near East. There is, however, a dissenting opinion from this consensus which holds the patriarchs to be literary fictions, but this is a distinctly minority judgment. American archaeological study has proposed a high degree of correlation between the patriarchal figures and the data of Mesopotamian culture. That synthesis has linked the patriarchs to various peoples of the Middle Bronze (2000–1500 B.C.) and/or Late Bronze (1500–1200 B.C.) period, with special reference to the Amorite, Hurrian, and Aramean movements. These correlations, however, are increasingly regarded as problematic. A most general connection seems reasonable, but precise correlations are eschewed by scholars.

Literary Tradition: The patriarchs are embedded in a complicated literary tradition. The materials of the book of Genesis have undergone an extensive evolution and/or editing process. That process seems to move from quite early tribal narrative memories to sophisticated and disciplined theological reflection. As a part of the process, there is no doubt that the patriarchal memories and persons have been subjected to stylization, imagination, and literary construction. The result is that the historical persons of the patriarchs cannot be separated from the narrative presentation in which they are cast. The patriarchs are therefore participants in a narrative memory that tends to minimize if not exclude the appropriateness of the historical question. In contemporary discussions, these literary questions tend to override the older historical questions.

Religious Discernment: The patriarchs are carriers of a distinctive religious discernment. They are the vehicle through which a peculiar revelation of God is made available to the community. Following the modern scholar Albrecht Alt, scholars view the "religion of the patriarchs" as a religion of God's guiding promise. This religion, sharply contrasted to the animistic religion (also hinted at in the book of Genesis), presents a God who goes with the designated community to lead, guard, and protect.

Theological Claim: Following such contemporary scholars as G. von Rad and W. Zimmerli, it is widely held that the promissory character of the patriarchal narratives marks the decisive theological claim of the OT. This promissory character is the decisive mark of Yahweh who is the God who makes promises and keeps them. This promissory character is the decisive mark of Israel who is a people summoned to hope

The island of Patmos, where early Christian tradition says that John of the book of Revelation was banished by the Roman authorities.

and to depart toward the promise. The subsequent theological use made of the memory of such promises goes well beyond the initial disclosure. See, for example, the uses made of it in the portions of the book of Isaiah written during the period of the Exile (41:8–10; 43:1–2; 51:2–3; 54:1–8) and in various texts of the NT (Rom. 4; Gal. 3–4; Heb. 11:8–22).

Wives of the Patriarchs: While we have used the conventional rubric "patriarch," such a designation is not without problem. It rightly focuses upon the three key actors in the Genesis narrative, but at the same time it neglects in each the primary wife—Sarah, Rebekah, Rachel—who figures prominently in the narrative. In each case, it is the "barren wife" (11:30; 25:21; 29:31) who becomes the pivotal point of interest in the narrative. In each case the gift of a child to the barren woman is the key turn that permits the story to advance and history to continue. The wives of the patriarchs emerge as important theological referents in the derivative tradition (cf., e.g., Jer. 31:15; Isa. 54:1–3; Matt. 2:18; Gal. 4:27; Heb. 11:11). They become the vehicles through which God does "impossible things" against the possibilities of the day (e.g., Rom. 4:17–21). Thus in the future it may be preferable to use the term "the ancestors" to include both the key male figures and the "barren" women who become mothers of faith. ***See also*** Abraham; Genesis; Isaac; Jacob; Pentateuch.

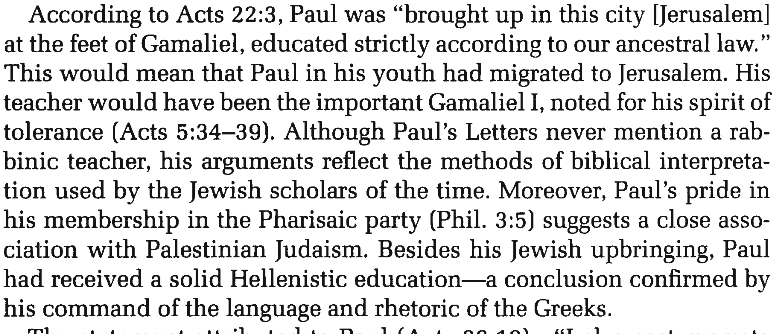
Paul

PAUL THE APOSTLE was the most effective missionary of early Christianity and the church's first theologian, sometimes called the "second founder" of Christianity. Known as "Saul" within the Aramaic-speaking community, he was usually called *Paulos* according to the Greco-Roman form of his *cognomen,* or family name. More than one-fourth of the writings of the NT have been attributed to him.



Third-century papyrus fragment of the book of Acts from Oxyrhynchus, Egypt.

Primary sources for Paul's life and thought are his Letters. The Acts of the Apostles, which presents biographical material about him, sometimes conflicts with the Letters and presents the particular theological perspectives of the author. Nevertheless, it constitutes a significant secondary source. Thirteen Letters in the NT are ascribed to Paul, but modern scholarship believes some of these were written by later followers of the apostle. As fully reliable sources, scholars depend on Romans, 1 and 2 Corinthians, Galatians, Philippians, 1 Thessalonians, and Philemon.

Early Life: According to Acts (21:39; 22:3), Paul was born in Tarsus, an important city of Cilicia. The date of his birth is uncertain, although it is usually estimated around A.D. 10. In a statement reported in Acts 22:28, Paul claims to have been born a Roman citizen (see 21:39). This would mean that he had inherited citizenship from his father (or some other ancestor). Citizenship assured certain privileges, among them the right to appeal to the imperial court (Acts 25:11, 21; 26:32; 28:19). Paul's use of Greek confirms his origin as a Hellenistic Jew of the Dispersion, at home in the urban culture of the Greco-Roman world. Paul's loyalty to his ancestral faith remained a mark of pride. He boasts, "circumcised on the eighth day, a member of the people of Israel, of the tribe of Benjamin, a Hebrew born of Hebrews" (Phil. 3:5).

According to Acts 22:3, Paul was "brought up in this city [Jerusalem] at the feet of Gamaliel, educated strictly according to our ancestral law." This would mean that Paul in his youth had migrated to Jerusalem. His teacher would have been the important Gamaliel I, noted for his spirit of tolerance (Acts 5:34–39). Although Paul's Letters never mention a rabbinic teacher, his arguments reflect the methods of biblical interpretation used by the Jewish scholars of the time. Moreover, Paul's pride in his membership in the Pharisaic party (Phil. 3:5) suggests a close association with Palestinian Judaism. Besides his Jewish upbringing, Paul had received a solid Hellenistic education—a conclusion confirmed by his command of the language and rhetoric of the Greeks.

The statement attributed to Paul (Acts 26:10)—"I also cast my vote against them [the followers of Jesus]"—is sometimes interpreted to imply that Paul had been a member of the Sanhedrin. This seems unlikely, since Paul could scarcely have omitted such an achievement from his list in Phil. 3:5. Similarly unlikely is the notion that Paul, as a young student in Jerusalem, had seen Jesus. Nowhere does Paul mention such an encounter, and his Letters evidence minimal knowledge

of the life and teachings of Jesus. Early in life, Paul learned the trade of tentmaking and leatherwork (Acts 18:3). Practice of this trade provided Paul with the means to support his missionary activity (1 Thess. 2:9; 1 Cor. 9:6).

Prior to his conversion, Paul had been a persecutor of the followers of Jesus. Acts reports that "ravaging the church . . . dragging off both men and women, he committed them to prison" (8:3). Paul "pursued them even to foreign cities" (26:11), receiving authority from the high priest to extradite the disciples of Jesus from Damascus (9:2; 22:5).

A medieval depiction of the dramatic conversion of Paul according to Acts 9: *(Top register, left to right)* The Lord calls Saul, who falls to the ground blinded and then is led to Damascus; *(center)* Ananias, instructed in a vision, then heals Saul's blindness; *(bottom)* Saul preaches in the synagogue; illuminated page from the First Bible of Charles the Bald (846).

A portrait of Paul by the Lombard artist Vincenzo Foppa, ca. 1490.

What jurisdiction the Jerusalem hierarchy had over inhabitants of distant cities remains unclear, and Paul's assertion that he was "still unknown by sight to the churches of Judea" (Gal. 1:22) raises questions about his persecuting activity in Jerusalem. Nevertheless, Paul's role as a persecutor is confirmed by his Letters: "I was violently persecuting the church of God and was trying to destroy it" (Gal. 1:13; see Gal. 1:23; 1 Cor. 15:9; Phil. 3:6). Paul's persecuting was motivated by his zeal for the traditions of his ancestors (Gal. 1:14). As a Pharisee, he would have been angered by the failure of the followers of Jesus to live strictly by the requirements of the law. He no doubt considered the identification of the crucified Jesus as messiah to be blatant blasphemy. Paul had expected a triumphant messiah, not one who bore the curse of the cross (Gal. 3:13). For Paul, the crucified Christ had been a stumbling block (1 Cor. 1:23).

As to his personal bearing, Paul reports that his critics say "his bodily presence is weak" (2 Cor. 10:10). Paul's physical weakness is epitomized by his "thorn in the flesh" (2 Cor. 12:7). On the basis of references from Galatians (4:13, 15; 6:11), the thorn has been variously interpreted to imply that Paul was afflicted by such disorders as malaria, eye trouble, migraine headaches, or epilepsy. In spite of this unidentifiable malady, Paul had the strength to overcome serious physical obstacles (2 Cor. 11:24–28). Paul was a person of strong emotional expression: once a zealous persecutor of the church, later a bitter foe of religious opponents (Gal. 5:12; 2 Cor. 11:13).

Conversion: In the vicinity of Damascus, Paul experienced a conversion. Although this experience is presented in the form of a call narrative like that of the prophets (see Jer. 1:4–10), it did involve a radical change in Paul's life. From this new perspective, he looks back on his "earlier life in Judaism" (Gal. 1:13), and considers his achievements as "a Hebrew of the Hebrews" to count as loss (Phil. 3:4–11). The conversion, however, did not involve turning to a new deity (see 1 Thess. 1:9), since Paul worshiped the God of the Hebrew Scriptures before and after. Moreover, Paul's conversion did not involve a serious moral trauma. Paul claimed that "as to righteousness under the law" he had been "blameless" (Phil. 3:6) before he accepted Jesus as Messiah.

According to his most extensive account (Gal. 1:11–17), Paul's conversion involved two main elements: the revelation of God's son and the commission to preach him to the Gentiles. The conversion is also reported three times in Acts (9:1–19; 22:3–16; 26:4–18). These accounts stress supernatural details: light and voices from heaven and Paul's blindness and recovery. They also observe that Paul's conversion was facilitated by a religious leader (9:10–18; 22:12–16) and that Paul was baptized (9:18; 22:16). For Paul, one feature was crucial for his life and apostleship: he had seen the Lord (1 Cor. 9:1); the risen Christ had appeared to him (1 Cor. 15:8). This vision engendered the conviction that the crucified Jesus was Messiah. It also demonstrated that God was accomplishing God's purposes through the crucified and risen Christ, as power working in weakness (2 Cor. 12:9), as the "first fruits" of the coming resurrection (1 Cor. 15:20).

Missionary Activity: The balance of Paul's life is devoted to responding to God's commission. The attempt to chronicle that life entails a number of problems. For example, Acts presents Paul as making five

trips to Jerusalem after his conversion (9:26; 11:30; 15:4; 18:22; 21:17), while the Letters notice only three (Gal. 1:18; 2:1; Rom. 15:25). Also, the Jerusalem conference is described in Acts 15:6–21 as if it had occurred early in Paul's missionary career, while in Gal. 2:1–10 it is said to have taken place fourteen (or perhaps seventeen) years after his conversion. The offering that Paul at the conference agreed to collect (Gal. 2:10) is scarcely mentioned in Acts (24:17, 26), but in the Letters it appears to be a major concern of the latter part of Paul's missionary endeavor (1 Cor. 16:1–4; 2 Cor. 8–9; Rom. 15:25–28).

In response to these problems, some scholars conclude that the conference was relatively late in Paul's career. Acts, in turn, appears to present at least one too many trips to Jerusalem (11:30). Some scholars believe Paul engaged in missionary work farther west (in Macedonia and Achaia) prior to the conference. For them, the fourteen years of silence (Gal. 1:21–2:1) are filled with activity. However, the missions to Macedonia, Achaia, and Asia can fit into the eight or ten years between the Jerusalem conference and Paul's imprisonment, and the sequence of events as presented in Acts is largely confirmed by data from the Letters.

Taking the Letters as primary (but not ignoring evidence from Acts), Paul's career can be summarized. After his conversion, he spent three years in Arabia (i.e., Nabatea; Gal. 1:17)—activity not mentioned in Acts. No doubt some of that time was spent in religious reflection, but Paul probably began to preach relatively soon. Unless he had been doing more than meditating, Paul would scarcely have had to flee from Damascus (2 Cor. 11:32–33; Acts 9:23–25). Three years after his conversion, Paul visited Jerusalem. Although the account in Acts presents him as going in and out and "speaking boldly in the name of Jesus" (9:28), Paul's own testimony is that he remained only fifteen days and saw none of the apostles except Cephas (Peter) and James (Gal. 1:18–20).

After this brief visit to Jerusalem, Paul engaged in missionary activity in Syria and Cilicia (Gal. 1:21). Acts 11:25–26 describes Paul's ministry in Antioch of Syria under the sponsorship of Barnabas, and Acts 13–14 recounts their mission to Cyprus and south-central Asia Minor (Antioch of Pisidia, Iconium, Lystra, and Derbe). At Lystra, Paul is reported to have been stoned (Acts 14:19)—an incident confirmed by 2 Cor. 11:25.

Gal. 2:1–10 and Acts 15:4–21 describe the same event: the Jerusalem conference. According to both accounts, the primary issue was the question of requiring circumcision of gentile converts, i.e., requiring Gentiles to become Jewish proselytes before they could become Christians. Both accounts agree, too, that the conference concluded that circumcision should not be required. According to Galatians, the leaders of the Jerusalem church approved Paul's mission, but requested him to collect an offering for "the poor" of the Jerusalem congregation (2:10; see 1 Cor. 16:1–4; 2 Cor. 8–9; Rom. 15:26). The account in Acts presents a picture of harmonious relations, whereas Paul's account hints at tensions between the Jewish and gentile wings of the church.

After the conference, Paul returned to Antioch (Acts 15:30), and Cephas (Peter) arrived shortly thereafter (Gal. 2:11). At first, Cephas ate with gentile members of the church, but when emissaries from James, the leader of the Jerusalem church, came to Antioch, Cephas withdrew table fellowship from the Gentiles. After the Jerusalem conference, the "circumcision faction" (Gal. 2:12) had apparently moved the church to

compose a letter (the so-called "apostolic decree") that required gentile Christians to observe Jewish food laws (see Acts 15:22–29; 21:25). The arrival of this letter in the hands of the emissaries from James probably led to Cephas's defection. Paul, upset by the failure of Cephas to recognize that the fellowship of the Lord's table depended solely on faith, "opposed him to his face" (Gal. 2:11).

The Cilician Gates, a pass through the Taurus Mountains, linked the Roman provinces of Cilicia and Cappadocia in Asia Minor. Acts records that Paul passed through this area on two journeys.

Paul's missionary work in the west is described in Acts 16–19 and confirmed by references throughout the Pauline Letters. Paul was accompanied by Silas (Acts 15:40) or, as Paul calls him, Silvanus. According to Acts, Paul revisited the churches of his earlier mission in Asia Minor and enlisted Timothy as additional coworker (Acts 16:3). The participation of Silvanus and Timothy is confirmed by the Letters (1 Thess. 1:1; 2 Cor. 1:19). Early in this mission, Paul worked in north Galatia and founded the churches probably addressed in the Letter to the Galatians (Acts 16:6; Gal. 1:2). In response to a vision (Acts 16:9–10), Paul and his companions crossed over into Macedonia where he evangelized Philippi and Thessalonica. At Philippi, Paul is reported to have been beaten with rods (Acts 16:22)—one of the three times he suffered this punishment (2 Cor. 11:25).

Traveling south by way of Athens (Acts 17:15–34; 1 Thess. 3:1), Paul arrived in Corinth (2 Cor. 10:14) where he labored for a year and a half (Acts 18:1–17). Shortly after his arrival in Corinth, Paul wrote 1 Thessalonians—perhaps the earliest book in the NT. At Corinth, Paul met Aquila and his wife Priscilla (or Prisca), who remained his friends and associates throughout his life (Acts 18:18; 1 Cor. 16:19; Rom. 16:3). At Corinth, Paul was also brought to trial before Gallio (Acts 18:12–17), the newly appointed governor whose accession to power can be dated at around 50 or 51. According to Paul's strategy, he began his mission in large urban centers, and then

Paul discoursing with bystanders who become intent listeners; eleventh-century enamel plaque.

enlisted fellow workers to help in spreading the gospel into the surrounding areas (2 Cor. 1:1).

After his Corinthian ministry, Paul moved to Ephesus, where he worked for two or three years (Acts 19:10; 20:31). From Ephesus, Paul wrote much of his Corinthian correspondence. An early letter, mentioned in 1 Cor. 5:9, 11, was probably lost. Paul wrote 1 Corinthians in response to problems in Corinth reported by Chloe's people (1 Cor. 1:11) and by a letter from the Corinthian church (1 Cor. 7:1). When relations between Paul and the Corinthians deteriorated, Paul seems to have made a quick trip from Ephesus to Corinth and back—a journey scholars call the "painful" or "sorrowful" visit (implied by 2 Cor. 2:1; 12:14; 13:1). This visit aggravated the conflict and provoked Paul to write the "severe" or "tearful" letter (2 Cor. 2:2–4; 7:8), part of which may be identified as 2 Corinthians 10–13. (Some scholars believe this section of 2 Corinthians constitutes a separate letter, written after 2 Corinthians 1–9). Also during the Ephesian ministry, Paul probably wrote the Letter to the Galatians. In Galatia, as in Corinth, the church had been invaded by opponents who preached a "different gospel" (Gal. 1:6), "another Jesus" (2 Cor. 11:4).

During the Ephesian ministry Paul was probably imprisoned (see 2 Cor. 1:8–11). Although the account in Acts 19 mentions no imprisonment, Paul says that he had suffered "far more imprisonments" (2 Cor. 11:23) at a time when Acts has reported only the incarceration at Philippi (16:24–39). From the hypothetical Ephesian imprisonment, Paul appears to have written Philippians and Philemon (Phil. 1:7, 13, 14, 17; Philem. 1, 9, 10, 13). An imprisonment in the less distant Ephesus (rather than Caesarea or Rome) would help to explain how the extensive exchange of information between Paul's prison and the church at Philippi (Phil. 2:25–30; 4:18) was possible. It would also make more feasible Paul's plan to visit the Philippians after his release (Phil. 1:26; 2:24). Similarly, a runaway slave from Colossae (Onesimus) would more likely have met Paul in Ephesus than in the more distant Caesarea or Rome, and Paul's intent to visit the owner of the slave (Philem. 22) is more plausible if Paul had been imprisoned in nearby Ephesus.

After leaving Ephesus, Paul moved on to Troas, and eventually to Macedonia (2 Cor. 2:12–13). There he met Titus, who brought him good news from Corinth (2 Cor. 7:5–7). In response, Paul apparently wrote 2 Corinthians 1–9—the so-called reconciliation letter. (However, some scholars believe this section of 2 Corinthians to be a collection of as many as five fragments.) Paul left Macedonia for Corinth, where he spent three months (Acts 20:2–3) and wrote Romans. From Corinth, Paul departed for Jerusalem with the offering he had agreed at the Jerusalem council to collect, anticipating trouble from Jews and Jewish Christians (Rom. 15:31). Biographical information from the Letters ends at this point. Acts, however, describes in detail Paul's final trip to Jerusalem (20:3–21:16), his imprisonment there (21:27–23:30) and transfer to Caesarea (23:31–26:32), and his voyage to Rome (27:1–28:16).

Some scholars who accept the pastoral Letters (1 and 2 Timothy, Titus) as genuine believe Paul was released from his first imprisonment (2 Tim. 4:16–17) and made another journey to the east. During this hypothetical journey, he is supposed to have visited such places as Troas (2 Tim. 4:13), Ephesus (1 Tim. 1:3), Miletus (2 Tim. 4:20), and Crete (Titus 1:5). According to this theory, Paul was back in the Roman

Ships in a storm on a third-century Roman relief. Acts 27 recounts a tumultuous storm and shipwreck on Paul's journey to Rome.

prison a second time when he wrote the Pastorals, anticipating martyrdom (2 Tim. 4:6–8). This reconstruction was apparently composed in an attempt to support the authenticity of the Pastoral Epistles. Although a tradition suggests that Paul had been released from Rome and visited Spain (*1 Clem.* 5:7), this tradition probably rests on Rom. 15:24, 28. More likely, Paul was executed at the end of his original Roman imprisonment, probably in A.D. 62.

Letters: Paul's writings are not literary epistles, but occasional letters, written to particular churches about particular problems. They were intended to be read to the assembled congregation (1 Thess. 5:27). Paul composed his letters according to the epistolary conventions of the day. The letter begins with an introductory salutation, usually followed by a paragraph of thanksgiving. Then comes the body of the letter where the particular concerns of the letter are addressed. Toward the end of the letter, Paul frequently discloses his travel plans. The letter ends with greetings and a benediction. With the letters, Paul employs various rhetorical forms. His style sometimes follows the patterns of classical rhetoric. He also makes use of the diatribe—the Hellenistic form of discourse whereby a speaker raises questions and proceeds to answer them (see Rom. 3:27–31). From time to time, formulas such as "I appeal to you" (Rom. 12:1; 1 Cor. 1:10) are introduced. Paul also includes traditional material: hymns (Phil. 2:5–11), confessions (1 Cor. 8:6), and liturgical expressions (1 Cor. 11:23–25). Paul dictated his letters (Rom. 16:22), and his oral style sometimes results in awkward or incomplete expressions (see Rom. 2:17–21).

In interpreting Paul's Letters, scholars attend to various problems. For example, they consider the integrity or unity of the Letters. Most scholars believe 2 Corinthians to be a composite of at least two letters, and some doubt the unity of Philippians. Some think that Romans 16 was not part of the original letter. The Letters were arranged in their present form by an editor who collected them around the end of the first century. Scholars also attempt to identify the opponents Paul faced in his various letters. Although efforts have been made to identify these universally as Judaizers or Gnostics, a variety of opponents were probably encountered in different situations. Recently, a sociological approach to the Letters has been employed. By this method, Paul's churches have been investigated within their cultural and social setting. For example, Paul's notorious restrictions of women (1 Cor. 14:33–36; 11:2–16) may have resulted from feminist disturbances in

Corinthian society—problems that did not exist in other situations where Paul's more typical Christological perspective was affirmed (Gal. 3:28). Also in recent times, attention has been focused on the Letters as literature—as literary compositions as well as historical documents.

Theology: Paul was not a dogmatic or systematic theologian. Even Romans, which presents a summary of Paul's gospel to a church that had not heard him preach, is not a systematic presentation of Christian doctrine. Although some interpreters suppose Paul's thought underwent gradual evolution, most agree that the central features of his theology took shape early and remained largely consistent. To be sure, his eschatology undergoes changes of emphasis, and his assessment of the law differs in different contexts. The background of Paul's thought is also debated. In general, his debt to Hebrew religion is acknowledged, but the question of his continuity and/or discontinuity with Judaism remains controversial. Paul's theological method owes much to the Pharisaic Judaism of his day, and his concept of righteousness is anticipated by the Dead Sea Scrolls. On the other hand, his view of the world is influenced by Hellenistic cosmology, and his Christological expressions reflect imagery borrowed from Hellenistic Judaism. Paul's belief that baptism accomplishes unity with Christ (Gal. 3:27) and that improper participation in the Lord's Supper causes sickness and death (1 Cor. 11:30) is reminiscent of ideas found in the Hellenistic cults. However, Paul is above all a biblical theologian; his primary intent is to interpret the revelation of the righteous God—the God of the Hebrew Scriptures.

Various attempts have been made to locate the center of Paul's thought. According to the traditional interpretation, the center is to be found in Paul's doctrine of justification by faith. Actually, the terminology that presents this doctrine is used almost exclusively in Romans and Galatians. The view of Albert Schweitzer—that the center of Paul's thought is his apocalyptic mysticism—has recently been revived. Apocalyptic thought, according to this view, emphasizes the real end of history. Paul, in adopting apocalyptic categories, intends to affirm the ultimate triumph of God.

Basically, Paul's thought is Christocentric. Fundamental to his theology is his acceptance of Jesus as Christ and Lord. Since the Messiah has come, the end of history is at hand (Rom. 13:11; 1 Cor. 10:11). The decisive eschatological event has already occurred in history (Gal. 4:4) in the death and resurrection of Christ (1 Cor. 15:20). Since the Messiah is identified as the crucified one, the cross is crucial to Paul's Christology (1 Cor. 2:2). Paul believes that through the crucified Christ the love of God is revealed (Rom. 5:8)—a revelation of the creator in the person of Christ (2 Cor. 4:6).

The other side of this revelation of love is the disclosure of God's wrath (Rom. 1:18). For Paul, wrath means judgment or alienation from God. Paul argues that the efforts by Gentiles and Jews to get right with God have failed (Rom. 1:18–3:20). As alienated from God, people are under the control of sin—a power that enslaves humanity (Rom. 5:21; 6:6) and results finally in death. The law did not overcome death, even though it promised life (Rom. 7:10). Although it reveals God's righteous demands (Rom. 7:12), the law shows people to be sinners (Rom. 7:13). Thus, the law is helpless as an instrument for salvation (Gal. 3:21); it even encourages people to seek to

establish their own righteousness by self-centered effort (Rom. 10:3).

According to Paul, the new revelation of God's righteousness is embodied in Christ (Rom. 3:21–22). This revelation is a gift of God's grace (Rom. 3:24). It demonstrates that God is righteous and that God bestows righteousness on people (Rom. 3:26). As a gift of grace, righteousness is conveyed even to sinners and Gentiles. In Paul's view, this forgiving grace of God does not compromise God's moral integrity or righteousness. The new revelation proves that God's gracious mercy and God's righteousness are one in Christ. This saving action of God is announced in the gospel—the powerful proclamation (Rom. 1:16) in which Christ is re-presented (Gal. 3:1). The response by which God's action is claimed by people is faith. Recently, some scholars have argued that texts traditionally read as calling for "faith in Christ" should be rendered "faithfulness of Christ" (e.g., Rom 3:22; Gal. 2:16). Although this interpretation notes the importance of Christ's obedience (Phil. 2:8), it tends to distract from Paul's emphasis on Christ as the object of faith (1 Cor. 21:24; 15:11–12; Rom. 10:14; Gal. 2:16). For Paul, faith is personal commitment to God's personal revelation—a response whereby one is crucified with Christ so as to receive a new identity (Gal. 2:19–20).

To persons who respond in faith, God grants a new relationship that is variously characterized as justification (Rom. 3:24, 26; Gal. 2:16), redemption (Gal. 4:5; 1 Cor. 1:30), and reconciliation (2 Cor. 5:18–19; Rom. 5:10). According to Paul, the resulting new situation can be characterized as a life of freedom and responsibility. The person of faith is free from wrath (Rom. 5), sin (Rom. 6), law (Rom. 7), and death (Rom. 8). In response to God's grace, the person of faith is called to ethical obedience. Ethics is central to Paul's thought; he believes the whole law is summed up in the command of love (Rom. 13:9; Gal. 5:14). The demand of love has its norm in Christ (2 Cor. 5:14); the law of love is the law of Christ (1 Cor. 9:21; Gal. 6:2). In the struggle for ethical obedience, the believer is aided by the Spirit—the gift that God has bestowed on people of faith in the last days (Rom. 8:4, 9–11; Gal. 5:25). The response of faith creates a community—the people of God (Gal. 6:16). Their central act of worship is the Lord's Supper—a common meal in which the community celebrates the presence of Christ and anticipates his coming (1 Cor. 11:23–26). In depicting the church as the body of Christ (1 Cor. 12:12–27; Rom. 12:4–5), Paul stresses the unity of the community and the interdependence of its members in carrying on the work of God begun in Christ.

Paulus, Sergius (paw'luhs, suhr'ji-uhs), the Roman proconsul when Paul and Barnabas visited Cyprus (Acts 13:5–12). He is pictured as an intelligent Gentile, sympathetic to the Christian gospel. According to Acts, he became a Christian after Paul caused the blindness of the hostile Jewish magician Elymas or Bar-Jesus. ***See also*** Cyprus; Elymas; Proconsul.

pavement. ***See*** Gabbatha.

pe (pay), the seventeenth letter of the Hebrew alphabet; its numerical value is eighty. In proto-Sinaitic inscriptions this letter was represented by a pictograph of either a mouth or a corner. The form developed in early Phoenician and Hebrew scripts, which are the prototypes of Latin "P" and Greek gamma. The Aramaic cursive script developed medial and final forms, and these are the ancestors of the classical Hebrew square forms of the letter. ***See also*** Writing.

פ

peace, a word with a wide range of meanings in both the OT and the NT. Its root meaning in the OT (Heb. *shalom*) is wholeness or well-being, and it can be used in both religious and secular contexts. It is used as a general greeting (Judg. 6:23; Ezra 5:7; Dan. 4:1) and as a farewell (Exod. 4:18; 2 Sam. 15:9). In these uses, it seems to indicate good wishes for the people addressed and friendly intentions on the part of the speaker. It is also used to indicate peace between nations as opposed to war (Josh. 10:1, 4; 1 Sam. 7:14; 1 Kings 5:12).

Peace is often associated with other terms. The OT speaks of "peace and security," usually from invasion (2 Kings 20:19; Ps. 122:7) and "peace and prosperity" (Deut. 23:6; Ezra 9:12). Here, peace is associated with material well-being, good harvests and safety from wild beasts and enemies (Lev. 26:6–10; Zech. 8:12). Peace is also found in conjunction with moral concepts. It is associated with truth in the sense of faithfulness (Esther 9:30; Zech. 8:16, 19). Above all, it is found in parallel with righteousness (Ps. 85:10; Isa. 60:17). Righteousness will bring peace (Isa. 32:17), but there is no peace for the wicked (Isa. 48:22; 57:21).

Peace is the gift of God (Lev. 26:6; 1 Kings 2:33; Pss. 29:11; 85:8; Isa. 26:12). The false prophets cry, "Peace, peace," at times when the true prophets know that God is not sending peace (Jer. 6:14; 8:11; Ezek. 13:10, 16). The OT speaks of God's covenant of peace in connection with priests (Num. 25:12–13; Mal. 2:4–6) and in connection with God's promises to Israel (Isa. 54:10). In Ezekiel, God's peace is the future or eschatological blessing (Ezek. 34:25–31; 37:26), and, in Isaiah, the Messiah will be a Prince of Peace (Isa. 9:6).

Throughout the various OT uses of peace as material well-being, righteousness, and as having its source in God, the emphasis tends to be relational: peace exists between people or between people and God. The idea of peace as individual spiritual peace with God or internal peace of mind is not an OT notion.

The Greek word for "peace" normally means simply the absence of war or conflict. In the NT, however, the word also acquires much of the range of *shalom* and some new, specifically Christian understandings. As in the OT, it is used in the Gospels as a greeting and farewell (John 20:19, 21, 26; Mark 5:34; Luke 7:50). This peace appears to be a concrete blessing which the disciples can give to others, but, if the others are unworthy, it returns to the disciples (Matt. 10:13; Luke 10:5, 6). Virtually all of the NT Letters include "peace" in their opening greeting, usually paired with "grace" (e.g., Rom. 1:7; 1 Cor. 1:3; 2 Cor. 1:2; Gal. 1:3).

The term is used in the NT to mean absence of strife among individuals or nations (Luke 11:21; 14:32; Rev. 6:4). It is also used for order and concord within the Christian congregation: Paul frequently exhorts Christians to be at peace with one another (Rom. 14:19; 1 Cor. 14:33; 2 Cor. 13:11; 1 Thess. 5:13; cf. also Mark 9:50). Christians should strive for peace with all people, Christian or not (Heb. 12:14). Paul writes, "If possible, so far as it depends upon you, live peaceably with all. Beloved, never avenge yourselves, but leave it to the wrath of God" (Rom. 12:18–19). Here and in Jesus' commands on not resisting evil and on loving one's enemies (Matt. 5:38–48; Luke 6:27–36), the NT advocates a nonaggressive stance.

The association between peace and material prosperity found in the OT is not stressed in the NT; rather, the connection between peace and spiritual blessing is emphasized. Peace occurs in association with righteousness (Rom. 14:17; Heb. 12:11; James 3:18), grace (Phil. 1:2; Rev. 1:4), mercy (Gal. 6:16; 1 Tim. 1:2), love (Jude 2), joy (Rom. 14:17; 15:13), and life (Rom. 8:6).

The spiritual blessings are from God. God is a God of peace (Rom. 15:33; Phil. 4:9; 1 Thess. 5:23; Heb. 13:20). The gospel can be described as the gospel of peace (Acts 10:36; Eph. 6:15). Christ's work is to bring peace. Christ's death has accomplished peace between God and humanity (Rom. 5:1; Col. 1:20) and peace between Jew and Gentile (Eph. 2:14, 17). Yet of greater value than peace is obedience to God's will. That is why in the Gospels Jesus also speaks of bringing not peace but a sword, creating division in families where some obey God's will by following Jesus, and others do not (Matt. 10:34–36; Luke 12:51–53).

Finally, in the NT, the notion of individual spiritual peace or peace of mind is found in a few passages. The peace of God (Phil. 4:7) or the peace of Christ (Col. 3:15) may rule people's hearts; a mind set on the Spirit is life and peace (Rom. 8:6). The God of hope may fill

one with joy and peace (Rom. 15:13). ***See also*** Reconciliation. J.D.

peace offering. ***See*** Worship.

pearl, a lustrous concretion formed by a mollusk consisting of the same material as its shell. It is the only gem produced by a living process.

Its association with gold and costly attire (1 Tim. 2:9), gold and precious stones (Rev. 17:4; 18:16), and other precious materials (Rev. 18:12) indicates that pearls were very valuable and highly esteemed in the Hellenistic world. As a result the twelve gates of the new Jerusalem are described as twelve individual pearls (Rev. 21:21) and entering the Kingdom of God is portrayed as finding a pearl of great price that is worth all one has (Matt. 13:45–46).

There are no clear references to pearls in the OT. R.H.S.

Pedahzur (pi-dah´zuhr; Heb., "the Rock [divine title] has redeemed"), the father of Gamaliel who was the leader of the tribe of Manasseh during the wilderness wandering (Num. 1:10; 10:23).

Pedaiah (pi-day´yuh; Heb., "the Lord has ransomed"). **1** The father of Joel, an officer of King David in charge of the western territory of Manasseh (1 Chron. 27:20). **2** The father of Zebidah, the mother of King Jehoiakim (2 Kings 23:36). **3** The third son of King Jehoiachin (Jeconiah) and father of Zerubbabel and Shimei (1 Chron. 3:18–19). According to Hag. 1:1, 12, 14; 2:2, 23; Ezra 3:2, 8; 5:2; and Neh. 12:1, Shealtiel, the brother of Pedaiah, was the father of Zerubbabel. **4** One of the men who assisted Nehemiah in rebuilding the wall of Jerusalem (Neh. 3:25). He was a son of Parosh, an important postexilic clan (Ezra 8:3; Neh. 7:8). **5** The grandfather of Sallu, a Benjaminite resident of postexilic Jerusalem (Neh. 11:7; cf. 1 Chron. 9:7). **6** A Levite appointed by Nehemiah as treasurer in the storehouse to distribute food to Levites (Neh. 13:13). **7** One of the men who stood at the left hand of Ezra during the reading of the Torah in Jerusalem (Neh. 8:4). M.A.S.

peg. ***See*** Pin.

Pekah (pee´kuh, a shortened form of the name Pekahiah, Heb., "Yahweh opened [the eyes]"). The two forms are distinguished in the Bible, however, since two successive kings of Israel had the same name. Pekah, the son of Remaliah, seized the Northern Kingdom's throne by murdering king Pekahiah, the son of Menahem.

2 Kings 15:27 assigns a twenty-year reign to Pekah, but he could hardly have ruled in Samaria longer than three years (735–732 B.C.), since contemporary Assyrian records show that Menahem was still on the throne in 737 B.C. One solution is to assume that Pekah had already begun to rule independently in Gilead prior to the murder of Pekahiah.

Pekah was the ally of King Rezin of Damascus, who may have supported Pekah's usurpation of the throne. In contrast to Menahem and his son Pekahiah, who had been submissive vassals of Assyria, Pekah supported Rezin's attempt to establish an anti-Assyrian coalition. Tyre and Philistia joined them, but Ahaz of Judah refused. A combined Aramean-Israelite army attacked Jerusalem in an attempt to replace Ahaz with a certain Tabeel, but the attempt failed (Isa. 7:1–10), and Assyria soon crushed the allies. Pekah himself was murdered by Hoshea, who managed to secure Assyrian confirmation to rule over what remained of Israel. ***See also*** Ahaz; Isaiah, The Book of; Rezin. J.J.M.R.

Pekahiah (pek´uh-h*i*´uh; Heb., "God opened [his eyes]," i.e., looked protectingly upon the child), the son of Menaham and king of Israel, the northern state, from 738 to 737 B.C. in its last, unstable period prior to the destruction of the capital, Samaria, in 722 B.C. After a brief reign he was assassinated by one of his officers of the same name, Pekah ben Remaliah, who then took the throne (2 Kings 15:23–26). It is possible that Pekah usurped both the throne and throne name of his predecessor. Pekahiah and his father were pro-Assyrian. With his death an anti-Assyrian policy was implemented, leading to war with Judah. R.J.C.

Pelaiah (pi-lay´yuh; Heb., "Yah [God] has performed a wonder"). **1** The son of Elioenai, descendant of David and in the royal lineage of the kings of Judah through Zerubbabel (1 Chron. 3:24). **2** One, probably a Levite, who explained to the people the law read by Ezra (Neh. 8:7). **3** A Levite who signed the postexilic covenant to keep the law (Neh. 10:10); perhaps the same as 2 above.

Pelatiah (pel´uh-t*i*´uh; Heb., "Yah [God] has rescued"). **1** A descendant of David and in the royal lineage of the kings of Judah through Zerubbabel (1 Chron. 3:21). **2** One of the leaders of the Simeonite clan of Ishi who drove out the Amalekites and settled on Mount Seir (Edom; 1 Chron. 4:42). **3** A leader of the people in postexilic Jerusalem who signed the covenant to keep the law (Neh. 10:22). **4** A corrupt leader in Jerusalem during the Exile seen by Ezekiel in a vision; he symbolized an attitude of arrogant false security and a misunderstanding of God's purposes in the Exile. His death represented God's judgment on such a distorted perspective (Ezek. 11:1–13). D.R.B.

Peleg (pee´lig), the ancestor of the Mesopotamian branch of the sons of Eber ("Hebrews")—those who lived by irrigation (cf. Heb.

peleg, "canal")—through whom Abram was descended from Shem (Gen. 11:16–26). "In his days the earth was divided" (Gen. 10:25), an allusion to the tower of Babel story, plays on a word meaning "divide" (*palag*). As an ancestor of Abraham (Gen. 11:16–26), he was also an ancestor of Jesus (Luke 3:35).

Peleth (pee'lith). **1** The father of one of the conspirators in Korah's rebellion (Num. 16:1). "Peleth," however, is probably a mistake for "Pallu" (cf. Num. 25:6, 8). **2** A Jerahmeelite (1 Chron. 2:33).

Pelethites (pel'uh-th*i*ts), a group of mercenaries who, along with the Cherethites, constituted David's bodyguard (2 Sam. 8:18; 23:23). Though their origins are obscure, the Pelethites probably had Aegean or Anatolian forebears, who, like the ancestors of the Cherethites and Philistines, settled on the coastal plain of Palestine at the time of the invasions of the Peoples of the Sea. David may have won their allegiance while he was in the service of the Philistine king of Gath (1 Sam. 27).

Pelge (pel'guh). ***See*** Peleg.

pelican, a large web-footed bird with a large bill and pouch beneath it for catching fish. Two species of pelicans can be seen seasonally in Israel today: *Pelecanus onocrotalus* and *Pelecanus crispus*. While the word "pelican" appears in lists of unclean birds (Lev. 11:18; Deut. 14:17), it is questionable whether that is a good translation. The Hebrew word so translated (*ga'ath*) means "one who vomits" and it seemed to fit the pelican well, since it was assumed (falsely) to regurgitate food for its young. "Scopsowl" has been suggested as a more appropriate translation.

Pella (pel'ah). **1** A city in Macedonia that was the home of its kings. **2** A major site in the Transjordan prominent as a city of the Decapolis (Matt. 4:25; Mark 5:20) in Roman times. Modern Khirbet Fahil, it stands in the lower foothills of the eastern edge of the Jordan Valley about eighteen miles south of the Sea of Galilee and about seven miles southeast of Beth-shan. Nourished by a strong spring at the south foot of the 100-foot-high, 400-yard-long tell, the site has been inhabited at least since Chalcolithic times (3000 B.C.). The site is currently under archaeological exploration by a combination of Australian and American excavators, and its history can only be sketched tentatively. It flourished in Canaanite occupation (Middle and Late Bronze Ages, 2000–1200 B.C.) and drew mention in the Tell el-Amarna letters (as Pehel, 1400 B.C.). Excavations in 1958 and 1967 brought evidence of occupation in the Iron Age I and Iron Age II periods (1200–600 B.C.). It was expanded and revitalized in Hellenistic times (334–63 B.C.), being taken from the Ptolemies by the Seleucids in 218 B.C. That trade flourished in this period is evident from recovered Rhodian jar handles. Capture by the Hasmonean Alexander Janneus (83–82 B.C.) may have inflamed anti-Jewish sentiment in the people. The Roman general Pompey took it in 63 B.C., launching another period of prosperous expansion. Evidence of Christian use of the city as refuge during the first Jewish revolt (A.D. 66–70) is still inconclusive. Byzantine occupation saw considerable expansion, as elsewhere in the period (Hesban, for example), reaching its greatest extent in the fifth and sixth centuries. Islamic occupation began in A.D. 635 and continued through the Middle Ages. Decline in the last few centuries led to its loss until rediscovered in the nineteenth century. ***See also*** Maccabees.

Columns stand at the site of ancient Pella of the Decapolis. In the background is the 400-yard-long, 100-foot-high tell.

Pentapolis (pen-tap'uh-lis; Gk., "five cities"), in Philistia a league of five cities ruled by five lords (Josh. 13:3; 1 Sam. 7:7). In Wisd. of Sol. 10:6 Pentapolis refers to the five cities of the plain (Gen. 14:2). Cyrene was part of a Pentapolis in Cyrenaica. ***See also*** Philistia.

Pentecost (pen´ti-kost; from the Gk., "fiftieth"), a religious observance that has roots in the OT and continues to be observed in both Judaism and Christianity.

As a designation for a particular religious observance, the Greek word appears only twice in the LXX, namely, in Tob. 2:1, and 2 Macc. 12:32. In the Hebrew OT, the customary name for the observance is the Feast of Weeks (Heb. *Shavuot*). It is regarded as the second of three obligatory observances, coming between Passover and Tabernacles (cf. Exod. 23:14–17; 34:18–24; Deut. 16:16; 2 Chron. 8:13). In Exod. 23:16, it is called "the feast of harvest, of the first fruits of your labor, of what you sow in the field." In Exod. 34:22, the Feast of Weeks is further defined as "the first fruits of wheat harvest." These phrases indicate that the Feast of Weeks was originally an agricultural festival, an occasion on which the community was expected to show gratitude to God for the first fruits, i.e., the early harvest.

Dating: The dating of this festival also suggests its original agricultural context. Deut. 16:9 says that it is to be dated seven weeks "from the time you first put the sickle to the standing grain." Lev. 23:15–16 directs: "And you shall count from the morrow after the sabbath, from the day that you brought the sheaf of the wave offering; seven full weeks shall they be, counting fifty days to the morrow after the seventh sabbath." Josephus calculated the date of Pentecost as the fiftieth day after the first day of Passover, and, in time, this manner of calculation became standard.

According to OT regulations, one was not allowed to work on the day of Pentecost. The sacrifice of various animals and of bread made from newly harvested grain was required (cf. Lev. 23:15–21; Num. 28:26–31).

In the Hellenistic period, (300 B.C.–A.D. 300) Pentecost began to lose its association with agriculture and came increasingly to be associated with the religious history of the Hebrew people. The book of *Jubilees,* continuing to refer to it as "first fruits" (22:1), identifies it with the covenant between God and Noah (Jub. 6:1–21; cf. Gen. 8:20–22; 9:8–17). It was probably after the destruction of the Temple in A.D. 70 that Pentecost was finally transformed into an observance of the giving of Torah on Mount Sinai. Exod. 19:1 was interpreted to mean that the interval between Passover and the arrival at Sinai was fifty days. Thus, in Judaism, *Shavuot* continues to be an observance of thanksgiving for Torah.

The NT shows clearly that Pentecost was celebrated in the first century and that it came to have a special Christian significance. In writing to the Corinthians, Paul says that he plans to stay in Ephesus until Pentecost (1 Cor. 16:8). Apparently, he expects his readers to understand his meaning, a fact that has led some interpreters to suggest that Pentecost had become a Christian observance as early as Paul's time. Paul does not make another explicit reference to Pentecost, but in Rom. 11:16 he appears to have the observance in mind when he speaks of offering a lump of dough as first fruits.

Pentecost in Acts: The book of Acts also speaks of Pentecost in connection with Paul's travels (20:16), but of greatest interest is the description of the first Pentecost after the death and resurrection of Jesus (Acts 2:1–42). In this passage, the apostles and others have convened in Jerusalem on the day of Pentecost. The author of Acts reports that there was a sudden sound "like the rush of a mighty wind" (v. 2) from heaven, followed by "tongues as of fire, distributed and resting on each one of them" (v. 3). As a result, the apostles began to speak in tongues, i.e., in languages that were understood by Jews and proselytes from many nations. The apostle Peter then interpreted the event as a fulfillment of the prophecy of Joel 2:8–32. He proclaimed that the last days had arrived and that Jesus had been raised from the dead, and he called for repentance. As a result, about three thousand persons were added to the group of believers.

Within the literary context of Acts, the events associated with Pentecost constitute the fulfillment not only of the prophecy of Joel but also of the promise of Jesus. In Acts 1:8, just prior to his ascension, the risen Jesus had said, "You shall receive power when the Holy Spirit has come upon you; and you shall be my witnesses in Jerusalem and in all Judea and Samaria and to the end of the earth." Thus, the events of Pentecost are presented in Acts as the fulfillment of this promise: on that day, the Holy Spirit did indeed come upon the apostles and empowered them to witness to Jesus the Christ. The event is celebrated in many Christian bodies on Pentecost Sunday, which is the seventh Sunday after Easter in the church calendar. ***See also*** Acts of the Apostles, The; Feasts, Festivals, and Fasts; Spiritual Gifts; Tongues as of Fire; Tongues, Speaking with. J.B.T.

Penuel (peh-ny*oo*´uhl; or Peniel; Heb., "face of God"), a city located on the Jabbok (modern River Zerqa), east of the Jordan. Here Jacob wrestled with a "man" (Gen. 32:24–31). Gideon was refused food by its inhabitants (Judg. 8:8–9) and later took revenge (Judg. 8:25). It was "built" by Jeroboam (ca. 924–903 B.C.; 1 Kings 12:25) and is probably listed as one of the cities conquered by Pharaoh Shishak (ca. 922 B.C.). Commenta-

tors locate it at modern Tulūl edh-Dhahab, particularly the eastern mound. In 1 Chron. 4:4 and 8:25 it is probably used as a personal name. ***See also*** Gideon; Jacob; Jeroboam I; Shishak.

people, peoples, terms used to translate a number of Hebrew and Greek terms referring to different kinds of social, ethnic, or cultural collectivities (the KJV does not use the plural "peoples" except in Rev. 10:11 and 17:15, causing some confusion cleared up by the RSV, which uses both "people" and "peoples"; see esp. Ps. 67:4; Isa. 55:4; 60:2). Interest in the origins of the various peoples of the world is evident in genealogies (Gen. 5, 10) and in the Tower of Babel story about the development of different languages (Gen. 11). In neither of these instances, however, are there careful distinctions drawn between geography and ethnography. Genesis 10 reflects an important division between peoples based on language groups. Semitic (from Shem) peoples (speaking Hebrew and Aramaic) were prominent in Palestine. Other Semitic peoples spoke Akkadian (Assyro-Babylonian) and dialects of Arabic (Minaean, Sabaean, and Ethiopic). The Egyptians, for the most part, constituted a Hamitic (from Ham) group. Indo-Aryans (from Japheth) constituted a third major division.

The most important use of the term "people" (Heb. *'am*) in the OT is as a sociocultural designation for the social entirety of Israel, in contrast to the term "nation" (Heb. *gôy*), which is used chiefly as a political term. This distinction is evident in Num. 23:9. "Lo, [Israel is] a people [*'am*] dwelling alone, and not reckoning itself among the nations [*gôyim*]." Israel is often simply called "the people" (Heb. *ha 'am*) or "the people of Yahweh" (Heb. *'am yēhwâh;* Judg. 5:11, 13; 1 Sam. 2:24). In the NT "the people of God" is sometimes used to describe the "old Israel" (Heb. 11:25; Matt. 1:21; Luke 1:68; Rom. 11:1–2) but is more importantly used as a designation of the church (Rom. 9:25–26; 2 Cor. 6:14; Titus 2:14).

In several instances in the OT "the people" refers to the community acting with authority in making covenants or declaring war (Judg. 5:2; 21:2, 15; 1 Sam. 4:4; 14:45). "The people" also designates a juridical community (Exod. 22:28; 23:11). Primary subgroups within Israel are also called "a people" (*'am;* Joseph in Josh. 17:14–17; Zebulun in Judg. 5:18).

The phrase "people of the land" occurs frequently in the OT, especially in Jeremiah, Ezekiel, 2 Kings, and 2 Chronicles, where it is probably a term designating the qualified male citizenry as opposed to the ruling class. In Ezra and Nehemiah (Ezra 10:2, 11; Neh. 10:30) it becomes a derogatory term aimed at those who were ignorant and nonobservant Jews by the standards of Ezra and Nehemiah. ***See also*** Amorites; Canaan, Canaanites; Hittites; Horites; Nations; Semites. F.S.F.

Peor (pee´or; Heb., "opening"), a mountain in Moab to which Balak took Balaam (Num. 23:28). It was apparently the site of a shrine to Baal (Num. 25:3, 5) with which Israelites were involved to their subsequent detriment (Num. 25:18; Josh. 22:17; Ps. 106:28). Its precise location is unknown.

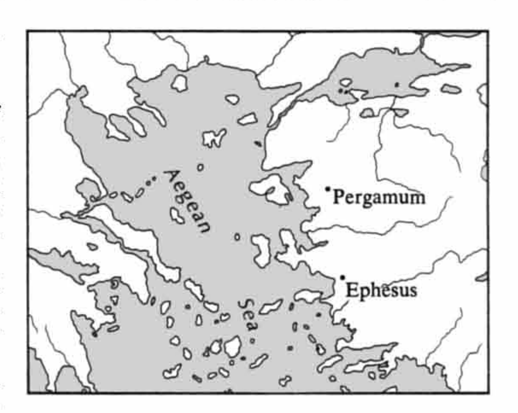
perdition (from the Lat. for "destruction"), a term referring to the origin or goal of those who are condemned to destruction in the final judgment. It is used of Judas (John 17:12) and of the Antichrist and his followers (2 Thess. 2:3; Rev. 17:8, 11). It is also used to translate the Greek "destruction" elsewhere in the KJV (Phil. 1:28; 1 Tim. 6:9; 2 Pet. 3:7).

Perea (puh-ree´uh; from the Gk. for "beyond"), area east of the Jordan River, i.e., "beyond the Jordan" (cf. Isa. 9:1). The name occurs nowhere in the Bible except once in a few manuscripts of Luke 6:17, but is frequent in the writings of the first-century historian Josephus. The biblical expressions "beyond the Jordan" and "across the Jordan" appear to be the equivalent of Perea in Matt. 4:15, 25; 19:1; Mark 3:8; 10:1; John 1:28; 3:26; and 10:40. The area was the scene of John's baptizing, and its people flocked to hear Jesus. Jesus and his disciples apparently used the Jordan Valley route from Galilee to Judea through Perea to avoid passing through Samaria.

Located on the eastern slopes of the Transjordanian plateau, Perea's northern boundary was just south of Pella. Its southern frontier ran from the Dead Sea to Machaerus, the fortress where John the Baptist died, up to the edge of the Moabite Plateau. The eastern boundary ran north-south about fifteen miles east of the Jordan River.

In OT times, parts of Perea belonged to Gilead, Ammon, and Moab. The region was conquered and Jewish laws and customs were introduced by the Hasmonean (Maccabean) kings in the second century B.C. but reorganized by Gabinius, the Roman proconsul of Syria, in 57 B.C. At the time of Jesus, Perea was predominantly Jewish and belonged, with Galilee, to the tetrarchy of Herod Antipas, whose administrative capital for Perea was named first Livias (after the wife of Caesar Augustus) and then Julias (after their daughter, the spouse of Tiberius). Nero gave the region to Herod Agrippa II, but at the latter's death ca. A.D. 100 it was absorbed by the province of Syria. ***See also*** Agrippa II; Antipas; John the Baptist. C.H.M.

Perez (pee´riz; Heb., "a breach"; KJV: "Pharez"), a son of Judah and Tamar; his twin brother was Zerah (Gen. 38:29). From him descended the Perezite branch of the Judah tribe (Num. 26:20; 1 Chron. 2:4–5). David was a Perezite and brought prestige to the group (Ruth 4:12, 18–19), and through this line Perez was an



ancestor of Jesus, according to the genealogy found in Matt. 1:3.

perfect, perfection, the English translation of words signifying, respectively, "being complete, sound, upright, or blameless" and "the attainment of maturity." In the OT, the most common Hebrew term for "perfect" can be applied to God as perfect in knowledge, justice, fidelity, and promise keeping (Job 37:16; Deut. 32:4; 2 Sam. 22:31; Ps. 18:30); his law is perfect (Ps. 19:7). Applied to persons, the same term means "blameless" (Gen. 6:9; Deut. 18:13), "upright" (Prov. 2:21), and observant of the law (Ps. 119:1). The NT Greek term for "perfect" can mean "mature" (1 Cor. 2:6; 14:20; Heb. 5:14), and the noun means "maturity" (Heb. 6:1). The command to be "perfect" in Matt. 5:48 ("merciful" in Luke 6:36) means to be complete or inclusive in love. Christ became perfect through his sufferings (Heb. 2:10; 5:9; 7:28). Nowhere are humans considered perfect, but readers are exhorted to be perfect (or whole) by steadfast faith (James 1:4). Paul says that he has not yet attained perfection (Phil. 3:12); that will be realized only in the life to come (Phil. 3:8–21). Perfection is a gift bestowed by Christ (Heb. 10:14). ***See also*** Justification; Righteousness; Sanctification. A.J.H.

perfume. ***See*** Cosmetics; Incense; Ointments and Perfumes.

perfumers (KJV: "apothecaries"), traders who compounded and dispensed a variety of aromatic substances. Perfumers played an important role in ancient Israel, where the aromatic oils and incense they compounded were required for religious as well as cosmetic and medicinal use, including embalming (2 Chron. 16:14). The holy anointing oil and the incense used in the tabernacle were the work of such perfumers (Exod. 30:25, 35; 37:29), who constituted a recognized guild in postexilic times (Neh. 3:8; TEV: "a maker of perfumes"), drawn from priestly families (1 Chron. 9:30). Perfumers are also mentioned in the royal household, as a class of female servants alongside cooks and bakers (1 Sam. 8:13). ***See also*** Incense; Ointments and Perfumes; Spices. P.A.B.

Perga (puhr´guh), a city near the Kestros River in the district of Pamphylia, about twelve miles inland from the southern coast of Asia Minor. Excavations at the site have brought to light an inscription indicating that the inhabitants considered Greek heroes of the Trojan War to be the founders of their city. Second-century coins minted in Perga depict a statue of Artemis Pergaia standing in a temple, evidence that the city must have been a cult site. It was at Perga that John Mark left Paul and Barnabas, on their first journey, to return to Jerusalem (Acts 13:13), and Paul and Barnabas preached here at the end of

that journey as well (Acts 14:24). ***See also*** Mark; Pamphylia. M.K.M.

Pergamum (puhr´guh-muhm), an ancient city in the region of Mysia in western Asia Minor. The modern village of Bergama, Turkey, now covers part of the ancient site. One of the seven messages of the book of Revelation was addressed to Pergamum (Rev. 1:11; 2:12).

The site was occupied from prehistoric times but became famous in the Hellenistic period. In the third century B.C., Pergamum became the center of an independent kingdom. Its cultural achievements were notable. King Eumenes II (197–159 B.C.) founded a library second only to that of Ptolemy Philadelphus in Alexandria. Pergamum also had a famous school of sculpture. Its wealth was based on agricultural surplus, silver mines, stock breeding, woolen textiles, and the making of parchment.

Pergamum was one of the most beautiful of Greek cities. Its public buildings were built on terraces on a steep mountain and culminated in the palace and fortifications at the acropolis. The whole is a magnificent example of Hellenistic city planning. In 133 B.C. the last king to reign in Pergamum, Attalus III, bequeathed his kingdom which comprised parts of Phrygia, Ionia, and Caria as well as Lydia and Mysia in his will to the Romans. After his death it was constituted as the Roman province of Asia with Pergamum as its capital. Under Augustus, the province was reconstituted as a senatorial province with a governor of consular rank who governed as proconsul. The capital was probably changed at this time to Ephesus; that is, the governor landed and resided there.

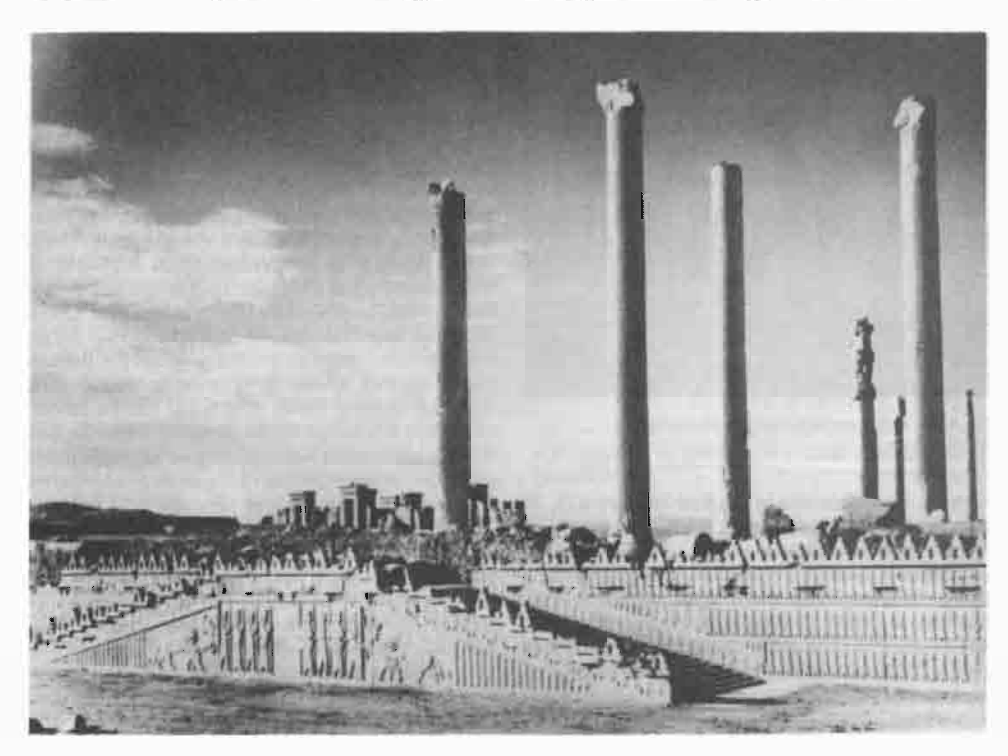
During the Roman period, a shrine of Asclepius, the Greek god of healing, was built in the lower city. It was a kind of spa at which both natural and supernatural modes of healing were employed.

In Rev. 2:13 Pergamum is described as the place where Satan's throne is. Revelation 12–13 suggests that Satan is linked with Rome. Even though Pergamum was no longer the governor's residence when the Revelation to John was

Remains of the ancient Temple of Asclepius at Pergamum.

written sometime late in the first century A.D., it was one of the cities in which he regularly held court. The governor alone held the right of capital punishment. The sharp two-edged sword of Christ mentioned in the greeting (2:12) and in the threat (2:16) is contrasted implicitly with the "sword" of the governor. Another connotation of "Satan's throne" may be that Pergamum was one of the oldest and most prominent centers of the imperial cult, i.e., the worship of the Roman emperor as a divine being, in the province. A.Y.C.

Perizzites (pair´i-zits), one of the older population groups of the land of Canaan, usually listed as one of the six or seven inhabiting the land (Exod. 3:8, 17; 23:23; 33:2; 34:11; Deut. 7:1; 20:17; Josh. 3:10; 9:1; 11:3; 12:8; 24:11; Judg. 3:5; 1 Kings 9:20; cf. Gen. 15:20). Occasionally they are mentioned with the Canaanites as the two native peoples of Canaan (Gen. 13:7; 34:30; Judg. 1:4–5). They evidently lived in the central highlands, particularly the forested hill country of Ephraim (cf. Josh. 17:15; Judg. 1:4–5). Their identity is uncertain. Some have connected them with the Hurrians; others with the Amorites. ***See also*** Canaan, Canaanites. D.A.D.



perjury, the utterance of a false statement under oath or affirmation. The Decalogue (Ten Commandments; Exod. 20:1–17) forbids both the swearing of false oaths and the bearing of false testimony (Exod. 20:7, 16; Deut. 5:11, 20; cf. Lev. 19:12; Jer. 7:9). False witnesses are to suffer the same punishment that they had hoped to inflict upon the others (Deut. 19:16–21). In the biblical law, there is no reference to witnesses' use of an oath to substantiate their testimony. Mention is made only of the assertory oath of litigants to establish their innocence in the case. For example, bailees will pronounce an oath to prove that they did not misappropriate the property given to them for safekeeping (Exod. 22:10). Should they have sworn falsely, the law allows them to rectify their wrongdoing by making full restitution, paying a fine, and bringing a sin offering (Lev. 5:21–26). In the NT, perjured witness against Jesus is reported (Mark 14:56–59). 1 Timothy notes that perjurers are among those for whom "the law" was laid down (1:10). ***See also*** Oath. B.L.E.

persecution, a term restricted to describing formal hostile activity against a specific group. Mob action against an individual (Acts 7:57–58) or clandestine plots (Acts 23:12–15) are not persecution. While Stephen's claim that all of God's prophets were persecuted (Acts 7:52) may be an exaggeration, there is evidence of severe harassment against them in pre-exilic Israel (Isa. 28:9–10; 50:5–6; Ezek. 33:32–33; Jer. 26:20–23; cf. 11:8–23; 1 Kings 19:10; 22:26–27). Yet the fact that a prophet like Nathan, despite his unpopular message, was respected (2 Sam. 12:1–15) shows that such harassment was sporadic and not part of official policy. Only when Antiochus IV Epiphanes (175–164 B.C.) tried to suppress customs necessary for Jewish religious identity can we speak of formal hostile activity against a specific group. Both Daniel and 1 Maccabees record his policy directed against Jewish dietary rules, circumcision, and other central practices. Those who refused to give them up were "condemned to death," i.e., persecuted (1 Macc. 1:41–61).

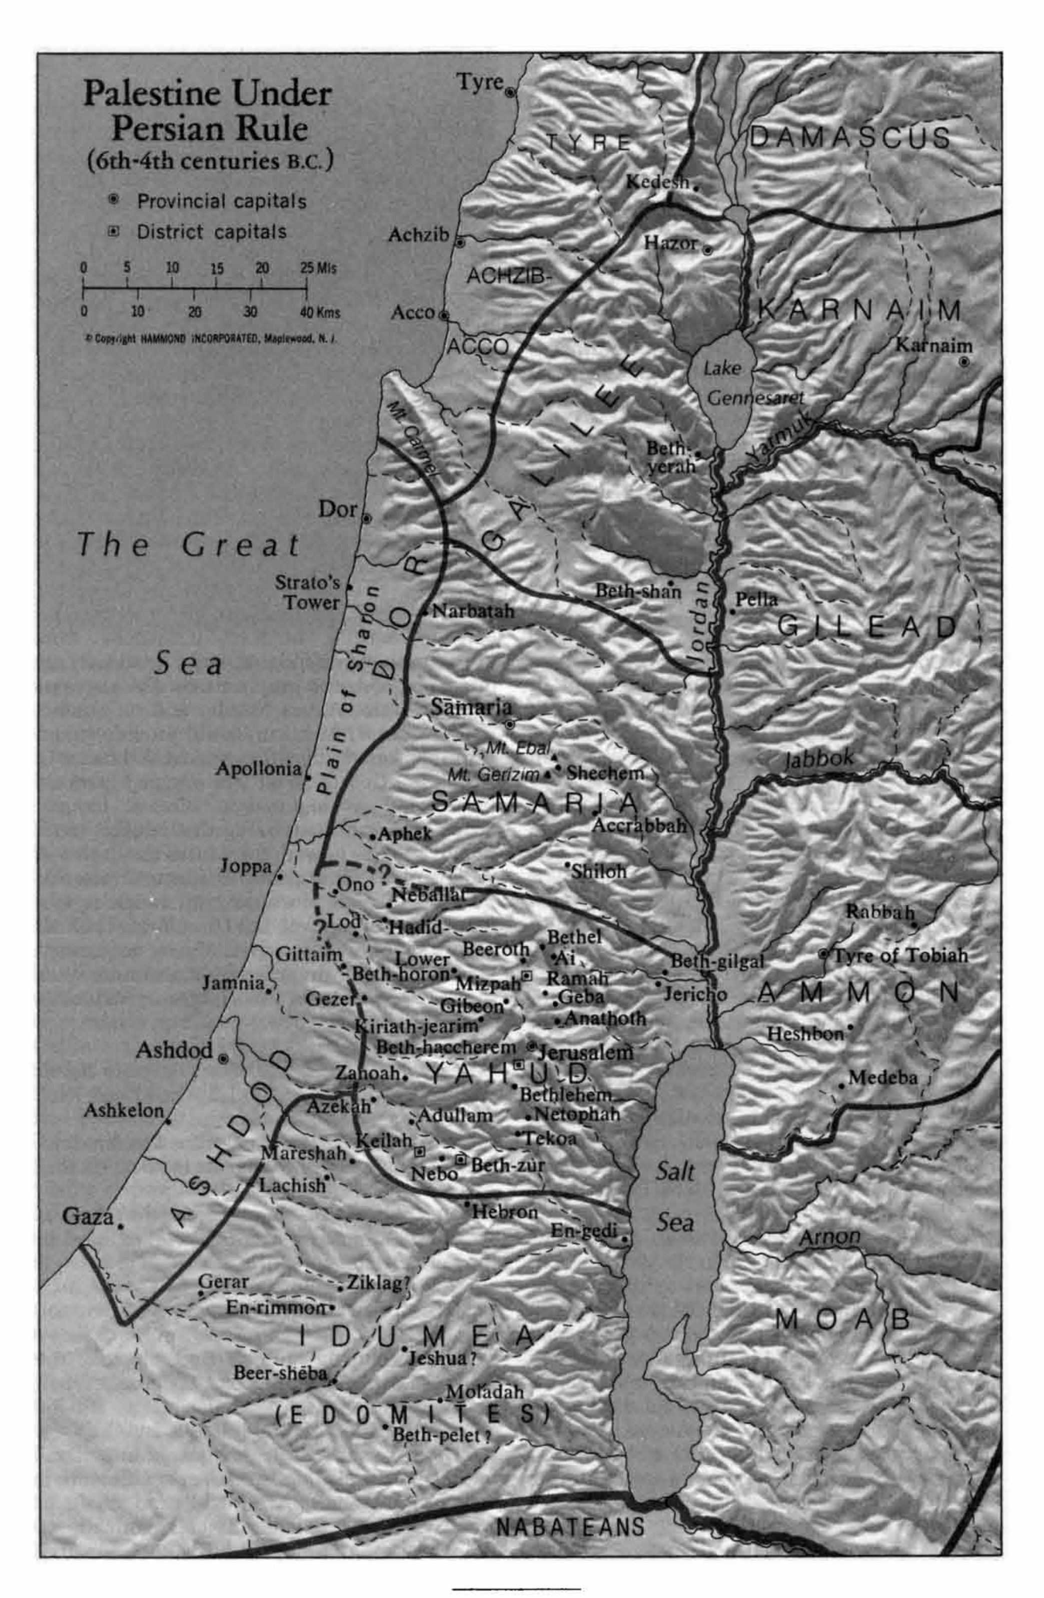
Jesus spoke of "persecutions" coming upon his followers (Matt. 5:10–12; 10:23). This is best understood as the domestic hostility in family and synagogue caused by conversion to a new faith. Jesus did "not come to bring peace, but a sword" (Matt. 10:34), dividing households and causing financial and social loss to his followers. Because of their distinctive faith, Jesus' followers might lose "house, brothers, sisters, mother, father, children, and lands" (Mark 10:29). The problem is domestic: "a man's foes will be those of his household" (Matt. 10:36).

Paul claims that he "persecuted" the church (1 Cor. 15:9; Gal. 1:13; Phil. 3:6). Acts 8 may be an exaggerated interpretation of this, for it is doubtful if Jerusalem Jews could force the imprisonment of unorthodox Jews in Galilee, much less in Damascus. Paul's harassment was probably on the order of a Pharisaic purist stirring up local synagogues to expel deviants or to report them to local magistrates as troublemakers (as was done against Paul the Christian; cf. Acts 14:19; 17:5–7; 2 Cor. 11:23–24). Jewish hostility to Christians became formal policy after the Roman-Jewish war (66–70). Johannine Christians tell of a formal synagogue policy to expel those who confessed Jesus as the Christ (John 9:22; 12:42–43; 16:1–2). Some scholars identify this with the *Birkath ha-minim,* the ban of excommunication on heretics whose imposition is associated with the Jamnia academy.

Little is known of Nero's alleged persecution of Christians after the fire in Rome in A.D. 64. Tacitus's account (*Annales* 15.44) is heavily biased against Nero and hence unreliable.

Overview of Persepolis; construction was begun by the Persian king Darius in the sixth century B.C.

1 Peter does not speak of a formal Roman persecution of Christians. It is only in the second century (ca. 110), at the time of Pliny the Younger (*Letters* 10.96–97), that we learn of a formal Roman policy to root out Christian beliefs. Pliny's letters to Trajan discuss imperial policy toward those who refuse to worship the emperor, less a religious than a political issue. This may be the background for the view of Roman hostility to Christians in Rev. 13–14, 17–18. J.H.N.



Persepolis (puhr-sep´uh-lis), Persian city mentioned in 2 Macc. 9:2 as a place whose temples Antiochus IV attempted to rob. This incident demonstrated the impiety evident in Antiochus's attack on the Jewish Temple at Jerusalem (ca. 175 B.C.), an impiety that resulted in his death in 2 Macc. (2 Macc. 5:21; 7:19).

Excavations have yielded two collections of tablets in Elamite from 509–494 B.C. and 492–457 B.C. These records deal with supplies and payments and suggest that Persepolis served as an administrative center by 509 B.C. at the latest. The massive terrace on which palatial buildings stand along with the fortifications stem from the reign of Darius I (the palace was begun about 520 B.C.). Darius, Xerxes, and other Persian kings are buried in the vicinity. However, the city was unknown in the western part of the empire. The Greeks only came to know of the city when it was taken by Alexander the Great (331–330 B.C.). Though the city had offered no resistance, Alexander ordered the great palace of Xerxes destroyed. This act may have been in revenge for Xerxes' burning the temples on the Acropolis at Athens.

The great palace at Persepolis shows no signs of having been inhabited. The only objects revealed by excavators are trophies such as might be captured in war. Nor does the complex contain sanitation facilities. Therefore, it would appear that the palace complex was used for ceremonial purposes. There may have been royal dwellings below the palace on the plain. Diodorus, a historian who wrote in the first century B.C., records a later complaint that the palaces at Persepolis had been built with spoils taken from Egypt (*History* 1.146).

Though the tablets record the presence of magi and offerings to the god Ahura-Mazada, there is no indication that the buildings constituted a cult center. The great treasury at Persepolis may have given rise to the story in 2 Maccabees. A number of sources do suggest that there was a temple of Anahita near Persepolis. Susa was the capital of the region.

Map opposite: The territory of the ancient Israelites became part of the Persian Empire when it was established in the sixth century B.C. As part of the Persian Empire, Judah was known as "Yahud."

The king may have come to Persepolis for some form of New Year festival. A report made to Darius shows that he was there during the winter of 495/94 B.C. The city was not rebuilt after its destruction by Alexander the Great.

P.P.

Persia (puhr´zhuh), an empire that at its height stretched from Greece in the west to India in the east. The Persian Empire came into being with the victories of Cyrus the Great over his Medan overlord (ca. 550 B.C.) and lasted until the conquests of Alexander the Great (ca. 330 B.C.). The origin and original locality of the ancestors of the Persians remain uncertain; links with Parsua, south of Lake Urmia (some 175 miles west of the southern end of the Caspian Sea), are possible, but more probable are those with Persis, east of the Persian Gulf, where Pasargadai and Persepolis, great centers of the Empire, were situated.

Rulers: The rulers of the Empire were: Cyrus (king of Anshan ca. 560 B.C., d. 530); Cambyses (530–522); Darius I (522–486); Xerxes I (486–465); Artaxerxes I (465–424); Xerxes II (424); Sogdianos (424–423); Darius II (423–405/4); Artaxerxes II (405/4–359/8); Artaxerxes III (359/58–338/37); Artaxerxes IV (338/37–336); and Darius III (336–330). Of these, Cyrus is hailed as the chosen deliverer of the Jews from Babylon (Isa. 44:28, "my shepherd"; 45:1, "my anointed") and as stirred up by God to rebuild the Jerusalem Temple (2 Chron. 36:22–23; Ezra 1:1–2; 3:7; 4:3). Cyrus's decree authorizing this was rediscovered in the archives by Darius I and reaffirmed (Ezra 5:1–6:15). The analogy of the Cyrus cylinder, which claims the Babylonian god Marduk chose Cyrus to restore his shrine in Babylon, suggests that the Persians asserted their rights to be royal successors in both Babylon and Jerusalem, and no doubt elsewhere.

The reign of Darius I provides the dating framework for the books of Haggai and Zechariah. Artaxerxes is mentioned in Ezra 6:14; 7:1; and 9:9 and in Neh. 2:1; 5:14; and 13:6. The story of Esther is set in the reign of Ahasuerus (Xerxes; 1:1–2). A later Darius (II or III) is named in Neh. 12:22.

Both Esther and Daniel refer to Medes and Persians together (Esther 1:3, 18–19; Dan. 5:8; 6:28), particularly to stress the unalterability of their laws. Dan. 5:31 and 6:28 distinguish a Medan from a Persian empire (cf. 10:1), but 8:20 treats the two as one. Dan. 10:13, 20–21, dealing with the conflicts of the empires, speaks of a "prince of Persia" against whom the angel Michael represents divine power on behalf of the Jews (cf. also 11:2). In a list of officials in Ezra 4:9–10, Persians and other peoples appear among those who were settled in Samaria and elsewhere by Osnappar (probably Ashurbanipal).

Lack of precision in statements about Persia suggests limited knowledge among the Jews of the background history. The impression of benevolent Persian protection is clear in some passages (e.g., Ezra 1:11; 5:5; 7:6, 9, 27; Neh. 2:8) but is not borne out by hostile material in Ezra 4:8–23 or by distress under Persian rule indicated in Ezra 9:9 and Neh. 9:36–37. Persia, like other ancient empires, taxed local populations heavily; imperial policy was dictated by strategic and economic needs, especially in wars against Egypt, which necessarily affected Judah, and against Greece. The Empire was skillfully administered, but rebellions were frequent, including those of satraps in the province Beyond the River to which Judah belonged.

Religion: The nature of Persian religion in this period remains a matter of debate. Although Zoroaster seems to have lived in the seventh century B.C., no certain date can be given for the activity of this great religious leader and hence for the time when his influence might be expected to appear; how far and when the particular emphases and practices of Zoroastrianism spread remains unclear. Influences from Zoroastrianism on Judaism and Christianity are often claimed; the emphasis on the supreme deity of light, Ahura Mazda, and on conflict with darkness, Ahriman, could provide stimulus to the belief in conflict against evil forces in which the God of Israel was engaged, perhaps influencing its expression. Biblical thought about God, while stressing that conflict, does not give to the power of darkness the degree of independence that seems to appear in Zoroastrianism. Nevertheless, in both religious systems, the triumph of light is affirmed. Other points of influence, especially in angelology, have often been proposed. ***See also*** Artaxerxes; Cyrus II; Darius; Ezra; Media, Medes; Nehemiah, The Book of.

pestle, a crushing instrument used in a vessel (mortar) to grind grain, spices, or condiments; it was usually short, hand-held, and made of wood or stone. It is used metaphorically in Prov. 27:22 for the impossibility of eliminating

PETER

Peter represented dictating to Mark, following an early Christian tradition; ivory relief.

a fool's weakness, since it belongs irreducibly to his nature.

Peter (pee´tuhr), a Galilean and one of the twelve disciples of Jesus.

Life and Legend: The Gospels all agree on certain pieces of information about Simon Peter. He had a brother Andrew, was by trade a fisherman, and was called by Jesus along with his brother Andrew as the first disciples. The Synoptics further report that Peter was a resident of Capernaum and spoke with the characteristic Galilean accent (Mark 14:70; Matt. 26:73; Luke 22:59). He was married (Mark 1:30; Matt. 8:14; Luke 4:2; 1 Cor. 9:5), and, oddly, his mother-in-law lived with his family. Jesus gave him a symbolic name, "Peter" or "Rock" (Mark 3:16; Matt. 10:2; 6:14) and commissioned him to be a "fisher of people" (Mark 1:17; Matt. 4:19; Luke 5:10). When the Synoptics record that Peter was sent out with the other disciples, his name appears first on the list of the Twelve (Mark 3:16; Matt. 10:2; Luke 6:16). All three Synoptics credit Peter with a speaking role at Jesus' transfiguration (Mark 8:29; Matt. 16:16; Luke 9:20). In contrast to the rich man who declined Jesus' invitation to discipleship, Peter spoke for the group about their renunciation of wealth (Mark 10:28; Matt. 19:27; Luke 18:28). Finally, the Synoptics concur about Jesus' prediction of Peter's denial (Mark 14:29–31; Matt. 26:33–35; Luke 22:36–38) and the fulfillment of the prophecy (Mark 14:66–72; Matt. 26:69–75; Luke 22:56–62). The basic facts of his life, however, are greatly embroidered in the various Gospels.

Each Evangelist gives a particular twist to the portrayal of Peter. Mark comments that Peter, along with James and John, was privy to special revelations of Jesus: he accompanied him to the raising of Jairus's daughter (5:37); Peter saw the transfiguration and even had a speaking role there (9:2–8); he received the revelation about the Temple and the coming of the Son of Man (13:3); he was supposed to "watch and pray" with Jesus in Gethsemane (14:33, 37); finally, Peter was singled out for revelation about the risen Jesus (16:7). Thus Peter became a special recipient of esoteric revelation and information. Luke adds three scenes that serve to confirm Peter's traditional status. When Peter was alone with Jesus in his boat overflowing with fish, Jesus singled him out as the new fisherman (5:10). At the Last Supper, Jesus revealed that Peter too would be attacked by Satan (22:31); but with Jesus' supportive prayer, Peter would turn and strengthen the brethren (22:32). Finally, the apostles acknowledged that the risen Jesus appeared uniquely to Peter (24:34). Matthew highlights the tendency of Mark to credit Peter with special revelations and charismatic activity. Beside the revelations mentioned by Mark, Matthew records that Peter learned special information about Jesus' teaching on purification rites (15:15) and about paying the Temple tax (17:24–27); and he was given special heavenly revelation to acknowledge Jesus as "Messiah, Son of God" (16:17). Moreover, he started to walk on water (14:29). This suggests that Peter's status and role according to Matthew was being established in two competing manners: traditional authority is credited him because he was with Jesus from the first and was authorized by him as "Rock"; and aspects of charismatic leadership are credited to him as well, namely, special powers, esoteric knowledge, and heavenly revelations. Matthew's special view of Peter, then, styles him as enjoying two distinct and often competitive ways of acquiring leadership. Peter bridges the world of flesh and spirit, Jesus' appointment and the Spirit's anointment.

The Fourth Gospel presents an entirely different picture. Andrew was called first in time (1:40–41) and brought his brother Peter to Jesus. Although Peter spoke publicly on behalf of the disciples (6:68–69), what he said was hardly the great synoptic confession at Caesarea Philippi. Peter was told that he did *not know* what Jesus was doing at the footwashing, but would understand only later (13:7). Because Peter did not know the identity of Jesus' betrayer, he asked a disciple closer to Jesus for this information (13:24). Peter and the beloved disciple ran to the empty tomb, but the latter ran faster and believed what he saw (20:5, 8). Even when fishing, Peter did not recognize Jesus on the shore, but

the beloved disciple did (21:4, 7). Only at the end of the appendix to the Gospel is Peter elevated to a leadership position (21:15–18). In the Fourth Gospel, then, Peter is neither privy to special revelations and esoteric knowledge nor does he enjoy a leadership position among the disciples, except at the very end. This suggests a conflict among leadership types in this particular community, which contrasts traditional apostolic with charismatic authority. As a type of the former, Peter is eclipsed by informed and courageous leaders who rise up in the second or third generation of disciples.

Mission: Paul reports the acknowledgment of the Jerusalem church that just as Peter was entrusted with the mission to the circumcised, so was Paul with that to the uncircumcised (Gal. 2:7). Yet it is a matter of debate just how accurate Paul was in this claim. The synoptic Gospels all acknowledge that Peter was acclaimed a "fisher" and that he was called Cephas or "Rock," labels that were not evidently culture specific. Matthew, moreover, tells that Peter was among those whom Jesus commissioned, "Go, make disciples of all nations" (28:18). Peter, moreover, is recorded as traveling to Antioch (Gal. 2:11), Corinth (1 Cor. 1:12; 9:5), and presumably to Rome (1 Pet. 5:13). He is reputed to have written letters to "the exiles of the Dispersion" in Asia Minor (1 Pet. 1:1), who are evidently Gentiles. Acts, moreover, tells the story of Peter's welcoming of Cornelius into Christian discipleship after he received a revelation about God's making all foods (and people) clean (10:15, 28, 34). In Acts 15:7, Peter claimed that God made use of his mouth to speak to the Gentiles. There is, then, diverse, consistent, and strong evidence for Petrine engagement with Gentiles.

Although one might infer that, since Peter was the apostle to the circumcised, he should keep kosher rules, the NT does not concur. At Antioch, Peter was eating at the common table with Jews and Gentiles alike (Gal. 2:12), presumably eating nonkosher foods with nonobservant people, which raised no problem with Paul or the Antiochians. Paul criticized him for withdrawing from this open table fellowship when Jewish Christians arrived. The issue is complicated for us because Mark records that the inner circle of disciples heard Jesus abolish dietary restrictions (7:17–19). Matthew even reports that Peter specifically asked Jesus to explain his remarks about purity (15:15), making him the recipient of this remarkable knowledge. Twice in his mission instructions, Luke recorded Jesus' telling Peter and the others to ignore dietary restrictions: "Eat what is set before you" (10:7–8). Thus, except for Paul, the rest of the NT agrees that Peter was authorized to serve a missionary role in the spread of the gospel to the Gentiles, both visiting them and eating with them.

Model: The synoptic Gospels all record Peter's follies and sins in varying degrees. Mark and Matthew recount that Peter objected to Jesus' first passion prediction, and was called "Satan" by Jesus (Mark 8:33; Matt. 16:23). All report Peter's shameful boast of loyalty unto death (Mark 14:29–30; Matt. 26:33–35; Luke 22:36–38). Mark records that Peter disobeyed Jesus' command in the garden and slept (14:33–34, 37–38); Matthew tells of the failure of Peter's faith when he began to walk on the water toward Jesus (14:28–31); and Luke mentions Peter's confession that he was a sinful man and, so, unfit to be a disciple (5:8). Yet these same Gospels tell of Peter's conversion, forgiveness, and confirmation by Jesus. The angel at the empty tomb singled out Peter as the object of a future meeting with Jesus (Mark 16:7), a privilege to be accorded a friend, not an enemy. Luke in particular recorded Jesus' "praying for Simon," who was being attacked by Satan; Jesus commanded Peter, after Peter himself had turned, to strengthen his brethren (22:31–32). In John, Peter three times confessed that he loved Jesus, balancing his triple denial (21:15–18). It is probably with a view to the tradition of Peter's sinfulness that Matthew identified him as the person who asks Jesus about the frequency of forgiveness within the group (18:21–22). Thus Peter regularly served as the type of a disciple whose weakness is made strong in Christ and as a lost sheep whose sinfulness is forgiven. He is a symbol of Jesus' basic mission: repentance and forgiveness.

Just as Paul could say, "Be imitators of me" (1 Cor. 11:1), so Peter is also cast in the role of a model, in this case, an antitype. Admittedly, he does not strike us as model when he denies the Lord (Mark 14:66–72; Matt. 26:69–75; Luke 22:56–62; John 18:17, 25–27). That scene, nevertheless, serves as an exhortation to the community: Jesus made the "good confession" before his Jewish judges, in contrast to Peter, who did not profess loyalty in crisis. Yet fidelity to Jesus and bold public confession of loyalty were celebrated as hallmarks of true disciples (1 Tim. 6:12–13). In time the story of Peter was amended so that he became a great *martys* (Gk.), or public witness, to Jesus. In Acts, Peter regularly stood before crowds, both friendly and hostile, to speak on Jesus' behalf. His *parrēsia* (bold public speech) confounded his opponents (Acts 4:13). Just as Paul's historical sin was transformed into a badge of status (Gal. 1:13; 1 Tim. 1:13–16), so was Peter's denial highlighted and eventually overcome by his role as public witness to Jesus.

Moreover, in the context where "leaving all" to follow Jesus was highly celebrated, Peter was reported as having "left all" to follow the Master (Mark 1:18; Matt. 4:20). Later, in contrast to the rich young man (Mark 10:21–22; Matt. 19:21–22), Peter became the model of the disciple who "left all things and followed" (Mark 10:28).

Part of the rhetorical structure of the Acts of the Apostles is the portrayal of both Peter and Paul as imitators of Jesus. Both served as bold witnesses to Jesus before friendly and hostile crowds; both performed miracles comparable to Jesus' healing of paralytics and raising of the dead; both experienced providential protection in their imprisonments; both escaped death at the hands of their enemies. Thus Peter in Acts 1–12 served as a model disciple, even an imitator of his Master and Lord.

Leadership: The Synoptics report that Peter was called first in time and commissioned first of the Twelve; he was given unique esoteric information, presumably for the group. His nickname, "Rock," is said to be a "foundation stone" for Jesus' group (Matt. 16:18). Other Christian documents speak of the church built on the foundation of the apostles and prophets (Eph. 2:20); the wall of the heavenly Jerusalem has twelve foundation stones, one for each of the twelve apostles (Rev. 21:14). Peter can, of course, be a "stumbling block" as well (*skandalon,* Matt. 16:23), but this only confirms his special position as "Rock" and "foundation stone."

All of the Gospels recount that Peter functioned as a spokesman for the group, either asking Jesus questions about his teaching (Matt. 15:15) or making the appropriate confession of faith for them (Mark 8:29; 10:28; John 6:68–69). In Acts, Peter again served as the spokesman for the group. He formulated what Christians confess about Jesus (2:32–36; 3:14–15; 4:10–12); he determined who was admitted to the group (10:34, 47; 15:7–11) and who excluded (5:1–11). He taught the "way" of discipleship, in that he prescribed "repentance and baptism" (2:38–41; 10:47) and presided over the sharing of goods within the group (4:34–5:11). He articulated a new theory of purity for the group (10:14–15, 28; 15:8–9).

Matthew contains a passage in which Peter was explicitly commissioned by Jesus for a unique leadership role. As one gifted with heavenly revelation, Peter was acknowledged as the "foundation rock" upon which Jesus built his *ekklēsia,* or public assembly. Peter was given the "keys to the kingdom of heaven," thus determining who entered and who stood outside by virtue of his power to "bind and loose" (16:18–19). The language unmistakably identified "Peter" in a unique leadership role. What is not clear is whether Matthew saw this continuing through time and whether Peter's leadership extended to the churches not specifically within the purview of Matthew's Gospel.

Even Paul, who admittedly promoted himself to the Galatians, reflects the image of Peter as enjoying special leadership in the early church. When Paul first came to Jerusalem after his espousal of Jesus, he conferred with Cephas (Peter, Gal. 1:18) who, by virtue of the context of Paul's remarks, must be considered an evident leader in Jerusalem and even the chief authority

Peter's threefold denial of Jesus as the cock crows (cf. Matt. 26:69–75); fifth-century ivory detail.

of Jesus' "way." Paul "visited" Peter, and it can be argued that this verb (Gk. *historēsai*) denotes "visit so as to gain information from," thus acknowledging Peter as the Gospels present him, the source of esoteric information about Jesus. Paul then described Peter as one of the "pillars" of the mother church (2:9); in a hyperbolic manner, Paul also indicated that the cosmos was divided between Peter and himself in terms of ethnic groups to be evangelized. Whether in friendship or conflict, Peter was singled out by Paul as having a distinctive leading role in the mother church, to whom all Gentiles owed unending thanks.

In many places, moreover, the Risen Jesus is said to have appeared to Peter first. The earliest written formula, which is reported by Paul in 1 Cor. 15:3–5, tells of two lists of Jesus' appearances: first, to Cephas, the Twelve, and five hundred brethren; then to James, "the apostles," and Paul. Each list functioned as the authorization of certain people with authority and status for leadership (1 Cor. 9:1). Thus, Cephas, or Peter, was the first in time to receive a commissioning appearance of the risen Jesus, a point that reinforced his being called first by the earthly Jesus. Luke records a similar appearance of Jesus to Peter (24:34), whereas Mark indicates that the angelic message contained a unique message to Peter (16:7), and the Fourth Gospel ends with a dramatic and explicit commissioning of Peter by the Risen Jesus to assume the role of "noble shepherd" of the group (21:15–18). The appearances of the Risen Jesus, then, constituted the ground for special status and leadership among the disciples; Peter always enjoyed the first or the most dramatic of these.

Petrine authorship of the two Letters ascribed to him is difficult to confirm or deny. Yet that may not be the point. He was considered by the early church as a worthy and authoritative speaker. Whether he addressed the churches of Asia Minor (1 Pet. 1:1) or in a more catholic vein spoke to all those who have "a faith of equal standing with ours" (2 Pet. 1:1), he was thought to have a legitimate voice to the wider network of Christian disciples. In his Letters, he speaks authoritatively about Christian faith in Jesus, about "the way" of discipleship, and about theodicy. 1 Peter in particular is often characterized as a compendium of catechesis and as a model of exhortation.

Death: Clement, purportedly writing from Rome at the end of the first century, reported that Peter and Paul both "were persecuted and contended unto death" (*1 Clem.* 5:1–6:1). If we accept the equation of "Babylon" with Rome in 1 Pet. 5:13, we have support for the claim of Peter's being there (see also Acts 28:14–31). Recent archaeological investigations under the basilica of St. Peter in Rome have uncovered dramatic evidence of an early shrine to Peter, which, because it was located in an ancient cemetery, was allegedly built over his grave. The tradition of Peter's martyrdom is echoed also in John 21:18–19. Yet we have no information whatsoever on how Peter got to Rome or the circumstances of his death. If Peter indeed traveled to Antioch and Corinth, it would not be surprising for him to travel also to Rome. ***See also*** Acts of the Apostles, The; Antioch; Capernaum; Galatians, The Letter of Paul to the; Matthew, The Gospel According to; Peter, The First Letter of; Peter, The Second Letter of; Resurrection.

Peter, the First Letter of, the first Letter attributed to the apostle Peter (1:1) and one of the seven "catholic" or general Letters in the NT. Commentators generally focus on three topics: baptism, suffering, and traditional exhortation. Although baptism is clearly important as the ritual of entrance into the Christian group (1:3; 3:20–21), the Letter is not recording an actual liturgy; and despite the many references to suffering (1:6–7; 2:18–25; 3:8–17; 4:12–19), it does not reflect a political Roman persecution of Christians. Rather, the Letter is a summary of accepted theology and traditional morality, resocializing Christians by affirming their new dignity in Christ, reminding them of the central truths of their faith (Christ's death and resurrection), and detailing the noble moral consequences that should follow from so noble a doctrine. Primarily, readers are exhorted to imitate their leader and Savior, Jesus, sharing both in his sufferings and in his resurrection. The Letter envisions converts from paganism who are suspect for their new loyalty and their consequent refusal to participate in civic festivals and associations related to the deities of their city.

Conversion as "New Birth": 1 Peter interprets conversion to the Christian God and to Jesus as "a new birth." Through numerous contrasts, the author indicates that a radical and complete change of identity and status has occurred in the lives of the new believers by their joining a new group, the covenanted people of God. Many of these changes reflect a positive status transformation of "sojourners" to citizens, of poor and dishonored to rich and honored, and of unclean outsiders to holy insiders. New members of the group have moved from no hope to true hope (1:21); impurity to purity (1:18; 4:3); slavery to freedom (1:18); perishability to imperishability (1:4, 23); ignorance to knowledge (1:14); flesh to spirit (4:6); death to life (1:3); disobedience to obedience (1:2, 22); "not my people" to "my people" (2:10); "no mercy shown" to "mercy shown" (2:10). Such language publicly honors the members of the group who seem not to have enjoyed honorable status in their society. As it confirms the benefits of belonging to the new group, it also exhorts the new members to live a life worthy of this calling.

This honorable new status was accompanied with "suffering." With new allegiance to the Christian God, old allegiances to family and to city deities were abandoned. Such a shift in loyalties signaled to outsiders a consequent weakening and abandoning of old ties to family, clan,

and municipality. As a result, Christianity and its adherents were suspected of attacking the basic institutions of the world (politics and kinship) and thus undermining the social fabric. The Gospels and Paul clearly indicate the strain new loyalties to Jesus put on families (Mark 10:29; Matt. 10:34–38; 1 Cor. 7:10–16). In a world of honor and shame, loss of reputation and honor (i.e., "suffering") would have a significant social effect on people's identity and behavior.

Many of the members of Peter's group appear to be "aliens" or people without the honor and support of family and civic ties. If Christians are "aliens" in terms of family and city (1:1, 17), they are nonetheless citizens in a new commonwealth (1:2), even of God's own family (1:3–5). The new identity of converts is given special attention in 2:1–10, where the author describes the new Christian order of the world and the special place that "alien" and dishonored Christians enjoy in it. Two parallel stories are told, that of Jesus and that of the church. Jesus is described as a Chosen Stone: God chose Jesus (2:6) and honored him by constituting him as the cornerstone of a new temple (2:7). This stone is precious to the only judge of honor and status, namely God; yet it is dishonored by being rejected by others (2:8). Similarly, Christians are a "chosen race, a royal priesthood, a holy nation" (2:9), all the honorable status markers that "aliens" and those alienated from family and city lack. Like Jesus, they are "living stones . . . built into a [new] spiritual house" (2:5). Like Jesus, they are precious to God, even if dishonored by their neighbors. Jesus' story, then, serves as a paradigm of how God apportions honor, the only honor that counts, and how this heavenly honor cancels out "suffering," which is shame and dishonor from one's neighbors.

Jesus' story continues in chaps. 2–3 as the pattern for interpreting positively the lives of Christians. Slaves may be "a royal priesthood" in the church, but they could still suffer from their earthly masters. Hence, they should find the true meaning of their negative experience by observing Jesus and imitating him (2:21), for his suffering was a means to glory and vindication. Suffering, moreover, comes even to the elect. Hence they should not return evil for evil (the way of honor among their neighbors, 3:9), but interpret their social dishonor as a "blessing" (3:15). If converts have to suffer, they should suffer as honorable and innocent persons (3:16–17). The basis for all this is the foundation story of Jesus in 3:18–22, which tells of his suffering and dishonor as well as his resurrection and enthronement in heaven.

The author, moreover, exhorts the converts to live as members of a new and royal household, a new family of God. Typical of NT exhortations is a code of household duties that spells out various aspects of the virtue of "justice" (Gk. *dikaiosynē*), whereby individuals recognize the rights and duties of others, especially those vertically above them in the ordered world of hierarchical authority: masters and slaves, husbands and wives, and parents and children (cf. Eph. 5:21–6:9; Col. 3:18–4:1). 1 Peter expands this to cover all the social relationships within the new group: all Christians are exhorted (2:11–17; 3:8–22); then slaves (2:18–25), wives (3:1–6), husbands (3:7), and elders (5:1–6). In substance, the converts are told to "be holy, for I [God] am holy" (1:16), that is, to practice the same respect for rights and duties as God does and to be sensitive to honor and status relationships. This "holiness" will result in living a life of a person "born anew to a living hope through the resurrection of Jesus" (1:3). Like the obedient Jesus who honored God, converts are to conform their lives and values according to the basic model of Jesus as he is described in 3:18–22.

Authorship and Date: While the Letter claims to come from the apostle Peter, the good Greek style of the document is hardly the level of literacy attainable by a Galilean fisherman. Yet this may be accounted for by the use of a scribal

OUTLINE OF CONTENTS

The First Letter of Peter

I. Letter opening (1:1–9)
   A. Address (1:1–2a)
   B. Greeting (1:2b)
   C. Thanksgiving (1:3–9)
II. Christian identity (1:10–2:4)
   A. Place in salvation history (1:10–12)
   B. Call to holiness (1:13–21)
   C. Entrance ritual (1:22–2:4)
III. As Christ, so Christian (2:5–10)
   A. Chosen stone (2:5–6)
   B. Precious, but rejected stone (2:7–8)
   C. Chosen people (2:9–10)
IV. Christian righteousness: reciprocal duties (2:11–3:22)
   A. To all (2:11–17)
   B. To slaves (2:18–25)
   C. To wives (3:1–6)
   D. To husbands (3:7)
   E. To all (3:8–22)
V. The future: results of Christian righteousness (4:1–19)
   A. Dead to flesh, alive in Spirit (4:1–6)
   B. The future (4:7–11)
   C. Purification and the church (4:12–19)
VI. Reciprocal duties continued (5:1–11)
   A. To elders (5:1–5)
   B. To all (5:6–11)
VII. Letter closing (5:12–14)
   A. Secretary (5:12)
   B. Greetings (5:13)
   C. Farewell (5:14)

secretary (5:12). The similarity of language and phrases in 1 Peter and Paul's Letters does not argue for dependence of 1 Peter on them, but probably results from both authors' drawing on a common stock of early Christian traditions. While 1 Peter clearly stands in the mainstream of early Christian literature, it was probably written in the waning years of the first century by a follower of Peter who wished to capitalize on the growing honor of the old apostle to address a new situation in Asia Minor, where presumably Peter either visited or was revered. Yet the suggestion that the historical Peter gave Silvanus (5:12) authority to write a document in his name also warrants consideration. Nevertheless, the situation alluded to in Asia Minor (see 1:2 and 4:12, which presumes a time late in the first century) would argue for a date subsequent to the traditional martyrdom of Peter in A.D. 64. The "Babylon" mentioned in 5:13 may well be the place of origin of the document and is generally understood as a cryptic reference to Rome (see Rev. 17:5–6). ***See also*** Baptism; Conversion; Peter; Peter, The Second Letter of; Rome.

Peter, the Second Letter of, a second Letter in the NT collection purported to be from the apostle Simeon Peter (3:1) and classified as one of the seven "catholic" or general Letters. Scholars generally acknowledge that the implied author, Peter (1:1), is not the real author, who is unknown to us. "Peter" becomes an appropriate implied author because he is recognized in diverse NT documents as the recipient of special revelations (Matt. 15:15–20; 16:17; 17:24–27; Mark 9:2–8; 13:3–37), unique appearances of Jesus (1 Cor. 15:5; Luke 24:34) and important visions (Acts 10:11–16). These traditional materials support the present claim of the implied author to have a special revelation about the Parousia (i.e., the return of Christ to judge, 1:16–18). The Letter is distinctive for (1) its relation to other early Christian documents: mention of Paul's letters (3:15–16), reminiscences of 1 Peter (1:2 [1 Pet. 1:2b]; 2:5 [1 Pet. 3:20]; 3:1 [1 Pet. 3:10]; 3:14 [1 Pet. 1:19]), and incorporation of materials from the Letter of Jude, as well as (2) diverse traditions from the early church: accounts of the transfiguration (1:16–18), biblical materials (2:4–8; 2:22; 3:8, 13), and a discourse about the Parousia (3:10). It contains, moreover, polycultural examples that would appeal to Greek and Judean audiences alike: fallen angels could be seen as analogous to Titans cast into Tartarus (2:4); Noah as analogous to Deucalion and Pyrrha (2:5); and the Parousia like the Stoic conflagration (3:10–13). The author, while writing a Letter, identifies as the occasion for the document another revelation of Peter's, namely his impending death (see John 21:18–19), which casts his remarks in the form of a farewell address (1:12–14), a form known equally to Greeks and Judeans. The real author, moreover, writes good Greek. Hence, we have a sophisticated document from a well-educated and literate author, who simply cannot be the fisherman from Capernaum.

Content and Purpose: The rhetorical situation of 2 Peter is one of crisis concerning the Christian understanding of the deity, namely, the doctrine of the Parousia and theodicy, or God's judgment, both to reward and to punish. The fiction of a farewell address serves as the rhetorical situation in which the implied author acknowledges the presence of heretics in his group: "false prophets" who speak peace when doom is imminent (2:1–3) and "scoffers" who mock "the promise of his coming" (3:3–4). These deviants argue from the delay of the day of judgment that God does not judge; from observing the eternity of the world, they maintain that it will never end. Furthermore, it appears that these heretics label the transfiguration as a myth made up to control human beings (1:16). In response to these polemics, the implied author issues an apology for God's sovereignty and power, i.e., a defense of theodicy. 2 Peter affirms that "God did not spare" the evil angels (2:4), Noah's generation (2:5), or Sodom and Gomorrah (2:6–8). As God once judged the world by water, so God can end it with fire (3:5–7). As noted above, these biblical examples could also be understood by Greeks in terms of their traditional myths (Titans, Deucalion, Phaeton). Hence the defense of theodicy is intentionally drawing upon historical examples from diverse cultural traditions. From these examples, 2 Peter concludes to the theological principle that God exercises a just judgment of reward and punishment: "God knows how to rescue the godly . . . and to keep the unrighteous under punishment until the day of judgment" (2:9–10). Moreover, he defends God's alleged "slowness" in judging. Divine time is mysterious, as the psalmist noted (3:8). God's apparent "slowness" is actually a benefaction, i.e., long-suffering that gives sinners time to repent (3:9). Paul, who is notoriously difficult to interpret, agrees with the author on divine long-suffering and time for repentance (3:15–16; Rom. 2:4–6).

Related to this defense of theodicy, 2 Peter mounts an apology for the Christian prophecy of Jesus' Parousia in terms both of its cosmological aspects of conflagration and regeneration and of its judgmental character when rewards and punishments will be meted out. The scoffers, who apparently deny all providential activity to the deity, also reject prophecy, especially prophecy about the Parousia. They label it a "myth" invented to terrify and control people. The author denies that Christian prophe-

OUTLINE OF CONTENTS

The Second Letter of Peter

I. Letter opening (1:1–2)
II. Patron's benefaction and client's response (1:3–11)
III. Fictive occasion of the letter (1:12–15)
IV. First apology: defense of prophecy (1:16–21)
V. Second apology: defense of divine judgment (2:1–10a)
VI. Shame on the opponents (2:10b–22)
VII. Third apology: defense of the end of the world (3:1–7)
VIII. Fourth apology: defense of "delay" as gift (3:8–10)
IX. Moral consequences of this doctrine (3:11–14)
X. Even Paul agrees (3:15–16)
XI. Letter conclusion (3:17–18)

cies of the Parousia are "cleverly concocted myths" (1:16), since the implied author, Peter, was an eyewitness when the prophecy was made. Implied in the argument in 1:16–18 is an ancient interpretation of the transfiguration as a prediction of the Parousia, when Christ in glory will reward and punish the good and the bad. Admittedly not our modern understanding of that event, it was frequently understood in this sense in Mark and the *Apocalypse of Peter.* The author claims to have been inspired, as was common with the figure of Peter, to see and hear the prophecy (1:16–18) and to interpret it correctly (1:20–21). He appeals, moreover, to a tradition accepted by Christians and not unknown to Greeks as the Stoic doctrine of conflagration and regeneration.

This prophecy summarizes the Christian doctrine about God and so serves as a defense of traditional theodicy. The world will come to an end on the day of the Lord (3:10–12), when a new heaven and a new earth will be formed (3:13). That day will be a day of judgment (3:10, 17). This doctrine in turn demands a high standard of ethical conduct, for on the day of judgment the living and the dead will be appropriately rewarded or punished (2:9–10). As a result, the author exhorts his group to ideal moral excellence as the appropriate response to the promise of rewards (1:3–10; 3:11–13) and warns his opponents of the shameful judgment that comes upon their sinful follies (2:11–22).

Date: Peter contains no indication of any place of origin or date. Because it knows many traditions, such as Petrine revelatory experiences, alludes to Paul's letters, and incorporates Jude's letter, we judge it to have been written late in the first century or early in the second century, after such traditions and documents had time to be disseminated. Moreover, the author apparently breaks his fictive cover by speaking of "the predictions of your prophets and the commandments of the Lord . . . through your apostles" (3:2), suggesting that he is a figure quite removed from the founding era of the early church. Although much of the discussion in the document defends the tradition of the Parousia, the central focus is a defense of theodicy, or the doctrine of divine providence. The apology for this doctrine about God, which is cast in terms intelligible to Greek and Judean, suggests a time quite removed from the founding of the group, a time when a more philosophical appreciation of the Christian faith was possible. All of this supports a late date for the document, even one well into the second century. ***See also*** Jude, The Letter of; Parousia; Peter; Peter, The First Letter of; Transfiguration, The.

Pethahiah (peth´uh-hi´uh). **1** The head of the family to which the nineteenth division of the priesthood was assigned in the time of David (1 Chron. 24:16). **2** A Levite who participated in Ezra's penitential service (Neh. 9:5). He was among those who agreed to divorce foreign wives (Ezra 10:23). **3** A Judahite of the time of Nehemiah, who was "at the king's hand in all matters concerning the people" (Neh. 11:24), which may mean that he served as an advisor on Jewish affairs at the Persian court.

Pethor (pee´thor), a place in Mesopotamia from which Balaam was called by Barak, king of Moab, to curse Israel (Num. 22:5; Deut. 23:4). Mentioned in the annals of Pharaoh Thutmose III of Egypt and King Shalmanezzar III of Assyria, it was a little south of Carchemish, on the other side (that is, the west side) of the Euphrates on the Sagur River. It may be modern Tell Ahmar.

Petra (pee´truh), capital of the Nabatean kingdom, forty-seven miles south-by-southeast of the Dead Sea. ***See also*** Nabatea, Nabateans.

Phalec (fay´lik, KJV; RSV: Peleg). ***See*** Peleg.

Phanuel (fuh´nyoo´uhl), the father of Anna, the aged Jewish prophetess who spoke of the future greatness of Jesus (Luke 2:36–38). ***See also*** Anna.

pharaoh (fair´oh), the Hebrew word for the title held by the king of Egypt. This word was used in the Bible either by itself or attached to

One of the Colossi of Memnon representing Amenophis III, 1403–1365 B.C. (New Kingdom Period); west bank of the Nile at Thebes.

the king's name (e.g., "Pharaoh Hophra," Jer. 44:30). It comes from two Egyptian words, *per* and *aa*. This Egyptian combination originally meant "great house," which was the name given to the royal palace in the third and the first half of the second millennia B.C. Starting in the reign of Thutmose III (1504–1450 B.C.) in the eighteenth dynasty, *per-aa* came to refer to the king himself, and from the reign of the twenty-second-dynasty ruler Shoshenq I (945–924 B.C.) on, the term can be found, just as in the Bible, prefixed to the king's name, e.g., "Pharaoh Shoshenq."

The king of Egypt was considered a god by his subjects. He was the embodiment of the royal falcon god Horus, and from at least the fifth dynasty (ca. 2494–2345 B.C.) on, he was looked upon as the son of the great sun god, Re. When he died, he became the god Osiris and joined the other divinities in the afterworld. Theoretically, all of the land of Egypt and its products belonged to the pharaoh (see Gen. 47:20), and his word was the law of the land. Throughout most of the third millennium B.C., the king ran the government with the aid of members of the royal family. Toward the end of the third millennium and into the early second millennium, more and more governmental authority became distributed among the nobles, and with the rise of the Egyptian empire in the eighteenth dynasty an enormous bureaucracy had to be established to handle the affairs of government. The chief officer in this bureaucracy was the vizier (Egyptian *tjaty*). The description given in Genesis 41–47 of Joseph's responsibilities under Pharaoh reflects the duties of a vizier.

Egyptian kings had five names, two of which were written within the elongated oval loops called cartouches by modern scholars. The second of these two names, e.g., Thutmose or Ramesses, is approximately equivalent to our modern family names. The first one was given to him at his enthronement; the throne name for Thutmose III, for example, was *Menkheperre*, "Established is the form of Re [the sun god]."

The king wore one of several crowns. The "White Crown" symbolized his dominance of Upper (southern) Egypt, while the "Red Crown" symbolized his rulership of Lower (northern) Egypt, and the "Double Crown" reflected his control over both Upper and Lower Egypt. The "Blue Crown," or war crown, was worn by the king when he went into battle. The king is often depicted holding a shepherd's crook and a flail across his chest as symbols of authority, while in battle scenes he usually holds a mace or a short, curved sword (the scimitar).

At least four, possibly five, pharaohs are mentioned by name in the OT. There are also many other references to unnamed Egyptian kings, a few of whom can be identified with more or less probability. The pharaohs mentioned by name are:

1 Shishak, the twenty-second (Libyan) dynasty king Shoshenq I (945–924 B.C.), who gave asylum to Jeroboam (1 Kings 11:40) and later invaded Palestine (1 Kings 14:25–26; 2 Chron. 12:1–9).

2 Tirhakah, the twenty-fifth (Kushite) dynasty king Taharqa (690–664 B.C.), who is mentioned in 2 Kings 19:9 and Isa. 37:9 as the "king of Ethiopia." Before he became king, he fought unsuccessfully against the Assyrian king Sennacherib in 701 B.C.

3 Pharaoh Neco, the twenty-sixth (Saite) dynasty king Neco II (610–595 B.C.), who defeated and killed Josiah at Megiddo in 609 B.C. (2 Kings 23:29; 2 Chron. 35:20–24), removed Josiah's son and successor, Jehoahaz, from the throne, and put Jehoiakim in his place (2 Kings 23:30–35; 2 Chron. 36:1–4). Neco ultimately lost all of Egypt's west Asiatic possessions to the Babylonian king Nebuchadnezzar (2 Kings 24:7).

4 Pharaoh Hophra, the twenty-sixth (Saite) dynasty king Waibre (Gk., "Apries"; 589–570 B.C.), whom Jeremiah said would be delivered into the hands of his enemies, just as Zedekiah, king of Judah, had been to the Babylonian king Nebuchadnezzar (Jer. 44:30).

5 So, the "king of Egypt" (2 Kings 17:4) to whom King Hoshea sent messengers just before he revolted against the Assyrians. This word may refer to the twenty-second-dynasty king Osorkon IV (ca. 727–720 B.C.), or it could come from an Egyptian epithet meaning "the Saite" and thus refer to the kings of the twenty-sixth (Saite) dynasty (664–525 B.C.).

Other, unnamed Egyptian kings who are prominently mentioned in the Bible include: **6** The pharaoh from the time of Abram (Gen. 12:15–20). **7** The pharaoh of the Joseph story (Gen. 39–50). **8** The "Pharaoh of the Oppression" (Exod. 1–2), whom many biblical scholars equate with Sety I (1291–1279 B.C.) or Ramesses II (1279–1212 B.C.). **9** The "Pharaoh of the Exodus" (Exod. 5–12), often identified by biblical scholars as Ramesses II (1279–1212 B.C.) or, somewhat less likely, his son and successor Merenptah (1212–1202 B.C.). **10** The pharaoh(s) who granted asylum to Hadad of Edom and gave Hadad his wife's sister in marriage (1 Kings 11:14–22). The first king may be the twenty-first dynasty pharaoh Amenemope (993–984 B.C.), while the pharaoh responsible for the second action may be Siamun (978–959 B.C.). **11** The pharaoh who took Gezer and presented the city as a dowry to his daughter when she married Solomon (1 Kings 9:16). This diplomatic marriage is also mentioned in 1 Kings 3:1; 7:8; 9:24; and 11:1. This pharaoh is probably the twenty-first-dynasty king Siamun rather than his successor Psusennes II (959–945 B.C.). ***See also*** Neco II; Ramesses; Shishak; So; Tirhakah.

Pharisees (fair´uh-seez), a group of particularly observant and influential Jews, mainly in Palestine, from the second century B.C. to the first century A.D. The name is obscure. It may mean "separate ones" in Hebrew, referring to their observance of ritual purity and tithing, or, less likely, "the interpreters," referring to their unique interpretations of biblical law. The Pharisees are described by two first-century sources, the NT and the historian Josephus, and also by rabbinic literature, which covers a broader period of time. Each source gives a different account of the Pharisees and modern descriptions differ widely depending on which accounts are accepted and how conflicts are resolved. The picture of the Pharisees derived only from the Gospels and formerly accepted as historical, that they were little more than legalists and hypocrites (Matt. 23) and were culpably blind to Jesus' message, has largely been discredited as early Christian polemic against Jewish and rabbinic leadership. The interpretation of the Pharisees as religious liberals emanated from modern Jewish apologetics and is ill suited to antiquity. Though a comprehensive and secure description of the Pharisees eludes us, some insight can be gained from each of the ancient sources.

According to Josephus: Josephus, a Jewish historian of the first century A.D. who wrote for non-Jews in Greek, calls the Pharisees "a choice [of life]" and a "philosophy." He gives some general characteristics of the Pharisees in contrast to the Sadducees and Essenes, recounts some of the activities and influence of the group, and mentions occasional influential Pharisees. According to Josephus, the Pharisees were the group most influential with the people, were noted for their accurate and therefore authoritative interpretations of Jewish law, and had their own traditions and way of life to which they were faithful. They had a simple standard of living and cultivated harmonious relations with others. On the issue of free will, a distinguishing factor among Greek philosophies, Josephus places the Pharisees between the Essenes and the Sadducees because they accepted the influence of both fate (or providence) and free will on human actions. They believed that the soul survives death and is punished or rewarded with another life.

Josephus grudgingly acknowledges the Pharisees' prominence in public life and says that he conducted himself in accord with their views. Since he valued domestic order and peace, Josephus criticizes the Pharisees' ascension to power under Queen Alexandra (76–67 B.C.) because they attacked their enemies and brought about domestic disorder. He disapproves of their opposition to Alexander Jannaeus and Herod as well as their meddling in the struggle over the succession to Herod. Though he often refers to their reputation as accurate interpreters of the law, he does not affirm it himself because he thought that priests were the authoritative interpreters of the law. In all of these activities, Josephus, who says that the Pharisees numbered six thousand in the first century, portrays them as a dissident political interest group seeking influence over society.

At no time do we learn how one "joined" this group and what was required to remain in it. It may have been like a Hellenistic school, teaching a way of life, or a sociopolitical faction competing for recognition and power within Judaism, or a movement seeking to influence Jewish thought and practice. The Pharisees exhibited various tendencies at different times; thus, they probably changed over the two centuries of their existence as different persons and groups of them exercised diverse roles in society.

In the NT: In the NT, the Pharisees play the role of Jesus' opponents and are almost always cast in a negative light, because they are presented as proponents of a way of living Jewish life that differed from Jesus' way. They are sometimes associated with the scribes but seldom with the elders and chief priests who are the leaders in Jerusalem. The Pharisees are presented as zeal-

ous observers of the law who are prominent among the people. The debates they enter are especially concerned with ritual purity, tithing food according to OT law, and correct observance of Sabbath. This agenda suggests that they shared table fellowship and were a private, voluntary organization. The Gospels understand them as learned in the law, and, like Josephus, they contrast the Pharisees with the Sadducees over belief in resurrection (Acts 23:1–8; Mark 11:18–26). When Paul wishes to identify his own relationship to Israel, he says that he was zealous, observant, and a Pharisee (Phil. 3:5; Acts 23:6). Each of the Gospels presents the Pharisees slightly differently. In Mark, the Pharisees are a group of lower social leaders competing with Jesus for influence with the people. In John, they are presented as established authorities who attack Jesus. In Matthew, they propound a competing reform program and are condemned as hypocrites (Matt. 23). In Luke-Acts, they are the observers of Jesus who do not understand him. In general, the Gospel writers, who wrote several decades after Jesus, manifest little accurate and consistent knowledge about Jewish leadership and groups from the period before the destruction of the Temple in A.D. 70.

In Rabbinic Literature: Rabbinic literature, which in its present form dates from A.D. 200 and later, contains three types of data regarding the Pharisees. The laws associated with the names of pre-70 Pharisees and with the schools of Shammai and Hillel, who are often seen as first-century Pharisaic leaders, concern ritual purity, tithing, and Sabbath observance, sectarian concerns that also surfaced in the Gospels. These laws may accurately be attributed to them, according to the contemporary scholar J. Neusner. Stories about these Pharisaic leaders present them as authoritative and dominant figures in Jewish society, religion, and politics. But since the rabbis who wrote these stories traced their lineage to the Pharisees, it is likely that they portrayed the Pharisees in their own image two or three centuries later. Another group of rabbinic texts speaks of the "separatists" (Heb. *perushim*), often presumed to be Pharisees. But sometimes this term refers to dissidents who clearly are not Pharisees, and sometimes it refers to ascetics. In passages where the Pharisees are contrasted with Sadducees, the Pharisees are scholars who accept the written and oral law. They are the leaders who set the law for Jewish society and the judges who enforce it. Yet this portrait fits the rabbis after A.D. 70 rather than the Pharisees in the Temple period prior to the fall of Jerusalem.

Though a full history and description of the Pharisees is impossible, some characteristics are probable. The Pharisees, like many other Jewish groups, were devoted to their own traditions on how to live a life faithful to Judaism. Their internal rules were sectarian with an emphasis on ritual purity, food tithes, and Sabbath observance. They were admired by the people, perhaps because their positions fit the popular views. Some were learned in the law, and some were politically powerful. In seeking to spread a renewed fidelity to the biblical law, they were inevitably promoting social and political change and thus functioned as a social movement that aroused opposition. ***See also*** Essenes; Josephus; Law; Rabbi, Rabbouni; Sabbath; Sadducees; Scribe.

Pharpar (fahr'pahr), one of the two rivers of Damascus according to 2 Kings 5:12. It is probably to be identified with the modern Nahr el-Awaj, which flows from Mount Hermon in an easterly direction and passes about ten miles south of Damascus. Together with the Abana (modern Nahr el-Barada) it waters the fertile Damascus oasis. ***See also*** Abana; Damascus.

Phasael (fah'see-uhl), the largest of three towers built by Herod the Great north of his palace in Jerusalem, named for his eldest brother, Phasaelus (or Phasael), who had died heroically in the Parthian War. Herod constructed this fortification into the Hasmonean wall defending the west side of Jerusalem.

When Titus razed Jerusalem in A.D. 70, according to the historian Josephus, he allowed to remain standing part of the west wall (to stand as a protection for the Roman garrison) and the three towers (to show later generations what a proud city had been overcome by the valiant soldiers of Rome). It appears to have been the remains of Phasael that were known in Byzantine times as the "Tower of David," although in more recent centuries that name passed to the Turkish minaret of the Citadel over the site of Herod's palace.

The base of the Phasael tower, as it stands today, is of Herodian ashlar masonry up to about twenty meters, with higher courses dating only from much later times. ***See also*** Herod; Phasaelis; Phasaelus. C.H.M.

Phasaelis (fuh-see'luhs), a town (modern Khirbet el-Fasayil) ten miles north of Jericho in the Jordan Valley. Built by Herod the Great in memory of his brother Phasael (Phasaelus), it was bequeathed by him to his sister Salome (4 B.C.), who left it to the Empress Livia, wife of the Roman emperor Augustus (A.D. 10). It appears on a sixth-century mosaic floor map from Madeba, Jordan.

Phasaelis should not be confused with Phaselis (fuh-see'lis), a Lycian port and recipient of the Roman consular letter concerning

Jews, ca. 139 B.C. (1 Macc. 15:23). ***See also*** Herod; Lycia; Phasael; Phasaelus.

Phasaelus (fuh-see'luhs), also Phasael. **1** Son of Antipater and elder brother of Herod the Great, governor of Judea from 43 until 40 B.C., when, having been treacherously delivered by the Parthians to Antigonus the Hasmonean, he killed himself in captivity. **2** His son, father of Cypros, wife of Agrippa I. ***See also*** Antipater; Herod; Maccabees.

Phaselis (fuh-see'lis). ***See*** Phasaelis.

Phicol (fi'kol), the commander of Abimelech's army. Phicol witnessed the agreements between Abimelech and Abraham and between Abimelech and Isaac (Gen. 21:22; 26:26). The meaning of the name is not certain; various Egyptian etymologies have been proposed. ***See also*** Abimelech.

Philadelphia (fil'uh-del'fee-uh), an ancient city (modern Alashehir, Turkey) in the region of Lydia in western Asia Minor. Philadelphia is one of the seven cities mentioned in the book of Revelation. It was founded by Attalus II, king of Pergamum (159–138 B.C.). Because of its strategic location, it served as a vital link in communication and trade between Sardis and Pergamum to the west and Laodicea and Hierapolis to the east. It was a center of agriculture, leather production, and textile industry. ***See also*** Hierapolis; Laodicea; Lydia; Pergamum; Revelation to John, The; Sardis.

Philemon (fi-lee'muhn), a resident of Colossae and owner of the slave for whom Paul makes an appeal in his Letter to Philemon. He was converted by Paul (Philem. 19), probably at Ephesus. He had been associated with Paul's mission, for he is described as "our dear friend and co-worker" (Philem. 1). Since he was able to host a congregation (Philem. 2) and prepare a guest room for Paul (Philem. 22), he was an individual of substance. Paul observes that Philemon was recognized as a person of faith and love toward Christ and the church (Philem. 4–7). ***See also*** Onesimus; Philemon, The Letter of Paul to. W.R.B.

Philemon, the Letter of Paul to, the shortest of Paul's Letters. It is a personal, not a private, letter; although written primarily to Philemon, it is also addressed to Apphia (perhaps his wife), Archippus, and the congregation that meets in Philemon's house (Philem. 1–2), probably in Colossae (Col. 4:9, 17). The letter makes an appeal on behalf of Onesimus, the slave of Philemon, who has wronged his master in some way (v. 18). Earlier interpreters explicated this situation according to certain legal assumptions: Onesimus is a fugitive slave, subject to severe penalty; he flees to Paul for asylum. More recently, scholars assume another situation, attested in Roman sources: a slave who has done something wrong and fears the wrath of his master seeks the service of a third party to intercede on his behalf.

According to this reading, Onesimus is not a fugitive, but a slave alienated from his master and seeking Paul's assistance in reconciliation. Paul, at the time (ca. A.D. 55) is in prison (vv. 1, 9), probably in Ephesus. In the course of Onesimus' visit, Paul has converted him to Christianity. The letter, carried by Onesimus, is a carefully crafted appeal. The basis of Paul's appeal is his own relation with the slave owner: Paul had converted Philemon, and Philemon is addressed as a "dear friend and co-worker" (v. 1). As a convert, Philemon owes Paul his own self (v. 19) so that Paul could have commanded Philemon's compliance (v. 8). Paul, however, wishes to appeal "on the basis of love" (v. 9), so that Philemon's compliance "might be voluntary and not something forced" (v. 14). Earlier, Paul has commended Philemon for his "love for all the saints" and his "faith toward the Lord Jesus" (v. 5). Since the church is included in the address, additional weight is given to the appeal.

On behalf of Onesimus, Paul urges Philemon to receive him "as a beloved brother" (v. 16), i.e., to accept him into the church. Making a wordplay on the name Onesimus (Gk., "useful"), Paul says that the slave was formerly useless (as a misbehaving slave) but is now useful both to Philemon and to Paul (v. 11). Since Onesimus is to be received "no longer as a slave . . . in the flesh" (v. 16), Paul is apparently asking for his manumission. Paul, who considers the converted Onesimus to be his child (v. 10), pledges to repay any wrong that Onesimus may have done (v. 18). Although Paul does not attack the institution of slavery (see 1 Cor. 7:20–21), he urges the slave owner to treat Onesimus as a person in Christ (Gal. 3:28; 1 Cor. 12:13) who should be welcomed as though he were the apostle himself (v. 17). The fact that the letter was preserved and included in early collections of the Pauline Letters implies that Philemon complied with Paul's request. Thus, Onesimus, freed for service in the Pauline mission, probably became an important leader of

the church (see Col. 4:9). ***See also*** Onesimus; Paul; Philemon. W.R.B.

Philetus (fi-lee´tuhs), a man accused, with Hymenaeus, of upsetting the faith of some by teaching that "the resurrection is past already" (2 Tim. 2:16–18), evidently a false reading of Paul's eschatology. ***See also*** Hymenaeus.

Philip (fil´ip), a name borne by important people in 1 and 2 Macc. and the NT. **1** Philip II, king of Macedonia (359–336 B.C.) and father of Alexander the Great (1 Macc. 1:1; 6:2). **2** Philip V, king of Macedonia (220–179 B.C.), mentioned in 1 Macc. 8:5. **3** Philip, governor of Jerusalem, appointed by Antiochus Epiphanes ca. 179 B.C. (2 Macc. 5:22; 6:11; 8:8). **4** Philip, a close associate and foster brother of Antiochus Epiphanes (1 Macc. 6:14–15; 2 Macc. 9:29). **5** Philip, mentioned in Matt. 14:3 and Mark 6:17 (cf. Luke 3:19) as the "brother" of Herod (Antipas) and first husband of Herodias; perhaps Herod (Philip), son of Herod the Great and Mariamne II and half-brother of Antipas. **6** Philip the Tetrarch, son of Herod the Great and Cleopatra of Jerusalem, not to be confused with 5. According to the historian Josephus, he was granted rule over a portion of his father's kingdom following the latter's death in 4 B.C. His rule over this non-Jewish territory, stretching from the Sea of Galilee north and east toward Damascus, was apparently a benevolent and prosperous one. He built Caesarea Philippi, named in honor of the emperor (and himself), and rebuilt the city of Bethsaida on the Sea of Galilee. He died ca. A.D. 33–34, and his territory became part of the Roman province of Syria. **7** Philip the Apostle, one of the Twelve whose name appears in the four apostolic lists (Matt. 10:3; Mark 3:18; Luke 6:14; Acts 1:13). John's Gospel contains most of the references to Philip. According to John 1:43–51, Philip was from Bethsaida in Galilee, the home also of Andrew and Peter. When called by Jesus, Philip sought out a skeptical Nathanael, who also responded to Jesus' messianic identity. Philip's pragmatism is perhaps suggested in his response to Jesus' direct question concerning feeding the multitude: he observed that it would take a large amount of money to feed so many (John 6:1–14). Later, it was Philip whom Greeks approached with their request to meet Jesus (John 12:20–22). How much can be made of Philip's association with Gentiles in this episode is not clear. In John 14:8–11, it is Philip who said to Jesus, "Lord, show us the Father, and we shall be satisfied." Philip appeared with the other apostles in Jerusalem after Jesus' ascension (Acts 1:13). Later tradition surrounding his activities is legendary and uncertain. The Gnostic *Gospel of Philip* is attributed to Philip, and the *Acts of Philip* purports to recount his activities. **8** Philip the Evangelist, not to be confused with 7. This Philip first appears in the NT when he is appointed (along with Stephen and others) to supervise the daily distribution of food to the widows following the dispute between the "Hellenists" and the "Hebrews" (Acts 6:1–6). Later, Philip carried the gospel to Samaria (Acts 8:5–13), and he subsequently baptized the Ethiopian eunuch (Acts 8:26–39). For the author of Acts, this latter is the first of three conversion stories (with Saul/Paul in 9:1–19 and Cornelius in chap. 10) that demonstrate God's role in originating the mission to the Gentiles. The final NT reference to Philip is in Acts 21:8–9, where he and his four unmarried daughters, residing in Caesarea, are visited by Paul on his way to Jerusalem. ***See also*** Alexander; Andrew; Antiochus; Apostle; Bethsaida; Caesarea Philippi; Cornelius; Disciple; Ethiopia; Eunuch; Herod; Herodias; Macedonia; Nathanael; Stephen; Twelve, The. P.L.S.

Philippi (fi-lip´*i*, fil´i-p*i*), an ancient city in northeastern Greece. Its site, dominated by a high acropolis and surrounded by mountains on three sides, lies ten miles inland from the modern port city of Kavalla (ancient Neapolis).

The history of Philippi before the fourth century B.C. remains obscure, although there are reports of two older settlements on or near the site, Krenides and Datum. Philip II of Macedonia, particularly interested in the nearby gold and silver mines of Mount Pangaeus, annexed the entire region and in 356 B.C. formally established Philippi as a city bearing his own name. Although the extensive city wall which still survives perhaps originated at this time, Philippi remained insignificant until after the Roman conquest of Macedonia in 168–167 B.C. Included by Aemilius Paulus in the first of the four districts into which Macedonia was then divided (Livy, *Roman History* 45.29; see Acts 16:12), it became a major stopping place on the Via Egnatia, the newly constructed road connecting Byzantium with the Adriatic ports that led to Italy.

In October of 42 B.C. Mark Antony and Octavian defeated Roman Republican forces led by Brutus and Cassius in two separate battles just west of Philippi. Brutus committed suicide im-

mediately after the defeat, and the poet Horace, also a soldier on the losing side, recalled how Brutus threw away his shield as he ran in retreat (*Odes* 2.7.9–12). Shortly afterward, Mark Antony settled many veterans from his army here and refounded Philippi as a Roman colony; its territory included the towns of Neapolis, Oisyme, and Apollonia. After the battle of Actium (31 B.C.) more settlers came here from Italy by order of Octavian (Augustus), and Philippi was again refounded, receiving the formal name that it thenceforth retained, Colonia Julia Augusta Philippensis. These settlers along with some of the previous inhabitants constituted the legal citizen body; and Philippi was governed by "Italian law" (*ius Italicum*), the highest privilege attainable by a Roman provincial municipality.

Despite such strong Roman influence, the variety of Philippi's religious life suggests that its inhabitants, noncitizens included, were more mixed in their backgrounds. Roman gods such as Jupiter and Mars had their cults, but the Thracian goddess Bendis remained very popular, and sanctuaries to gods from Egypt and to Cybele, a Phrygian goddess, are also known. A Jewish synagogue was apparently located just outside the city walls (Acts 16:13). The apostle Paul came to Philippi ca. A.D. 50 and founded here his first European Christian community (Acts 16:12–40; 1 Thess. 2:2). This church, always one of Paul's favorites, received his Letter to the Philippians ca. A.D. 54 and one or more further visits from him ca. A.D. 55 (1 Cor. 16:5–6; 2 Cor. 2:13; 7:5; Acts 20:1–6). A letter of Polycarp of Smyrna written to the Philippian Christians ca. A.D. 125 still survives, and Philippi enjoyed considerable ecclesiastical prominence even in medieval times.

Excavations, which still continue, have uncovered extensive remains on the now uninhabited ancient site: a portion of the Via Egnatia, the forum area, and surrounding porticoes (as rebuilt ca. A.D. 175), numerous rock reliefs of various divinities, temples, and the ruins of several Byzantine churches. A Roman-period crypt that may still be seen became known after the fifth century as "The Prison of St. Paul." This attribution, however, is extremely dubious. ***See also*** Macedonia; Paul; Philippians, The Letter of Paul to the. R.A.W.

Philippians (fi-lip´ee-uhnz), **the Letter of Paul to the,** one of the thirteen Letters in the NT attributed to the apostle Paul. While almost no one doubts Pauline authorship of this text, many have suggested that several separate letters by Paul to the Christians at Philippi were very early shortened and combined into a single letter in order to facilitate wider community usage.

Especially indicative of this possibility is the very harsh transition from 3:1 to 3:2. While 3:1 seems to move toward the conclusion of a letter (cf. 2 Cor. 13:11; Gal. 6:17), 3:2 begins a strongly negative condemnation of Jewish or Jewish Christian advocates of circumcision and perhaps dietary observances as well (see 3:19). This section contrasts sharply in tone with the affectionate mode of address generally adopted in this letter by Paul. Phil. 4:4 in turn picks up the language of 3:1 and seems to flow directly from it.

Furthermore, Phil. 4:10–20 by itself is most easily interpreted as a note to the Philippians from Paul, who as a prisoner at Ephesus or, more doubtfully, at Rome or Caesarea, had received a gift of money sent by them via Epaphroditus and then responded promptly with his thanks. Phil. 2:25–30, on the other hand, implies that Epaphroditus has been with Paul for some time, has recovered from a life-threatening illness, and is now well enough to travel back to Philippi.

All this evidence suggests that Phil. 4:10–20 is from the first of a series of Philippian letters, that Phil. 1:1–3:1 + 4:4–9 + 4:21–23 form most or all of a second letter that was carried back from Paul by the returning Epaphroditus, and that Phil. 3:2–4:3 is a portion of yet a third letter. It is placed last in the series because in 3:2–21 Paul speaks more directly about his apparently impending death and provides his followers with a very moving last will and testament in the manner of, e.g., Acts 20:18–35.

According to this view, sometime prior to ca. A.D. 90 an unknown editor removed overly localized material from the first and third letters and then inserted what remained, what we now know as Phil. 3:2–4:3 and 4:10–20, into the second letter, presumably viewing these insertions as reasonably consistent with that document's overall line of argumentation. The present literary structure of Philippians, a structure shaped by the second letter, seems to follow the canons of ancient Greco-Roman rhetoric for a deliberative speech set within an epistolary framework.

While it remains the dominant explanation, the multiple-letter theory just described has not been quite so clearly demonstrated for Philippians as for 2 Corinthians, and the outline that is provided does not necessarily depend upon it. No firm consensus exists regarding the precise divisions within Philippians 4, and even the sharp break at 3:1 is not altogether unparalleled in Paul's other writings (see. Rom. 16:17). In addition, common vocabulary, even some words found rarely or not at all in Paul's other Letters, appears in the supposedly separate letter fragments, and some scholars view this fact as strong evidence against a multiple-letter hypothesis.

References to Paul's imprisonment serve as the best clue for determining the date of Philippians or its component fragments. Some investigators have argued strenuously that Paul's mention of the "praetorium" (1:13) must certainly indicate a Roman origin for the letter, but

OUTLINE OF CONTENTS

The Letter of Paul to the Philippians

I. Epistolary salutation (1:1–2)
II. Introduction, or exordium: Paul gives thanks for the faith of the Philippians (1:3–11)
III. Paul's narrative of the situation: Paul describes his imprisonment and seeks to reassure (1:12–26)
IV. Paul's main point, or proposition: live faithfully to the gospel in communal unity and confidence (1:27–30)
V. Supporting argumentation or proofs to strengthen the Philippian acceptance of the proposition (2:1–4:3)
   A. The example of Christ and its impact (2:1–18)
   B. The example of Timothy and Epaphroditus (2:19–20)
   C. The example of Paul (3:1–4:1)
   D. The counterexample of Euodia and Syntyche; the need for unity and reconciliation (4:2–3)
VI. The summing up, or peroration (4:4–20)
   A. The general summary (4:4–9)
   B. Paul as an exemplar: an illustration of the general statement in 4:9 (4:10–20)
VII. Epistolary closing (4:21–23)

it is quite possible that Paul simply applied this term loosely to the governor's residence in any provincial capital (e.g., Ephesus). Since Paul makes reference to much traveling back and forth between Philippi and his own place of imprisonment (1:26; 2:19; 2:23–24; 2:25–30; 4:18), it is unlikely that he was in Rome or, as some have proposed, at Caesarea, since these cities are quite distant from Philippi. The evidence found particularly in 1 Cor. 15:32 and 2 Cor. 1:8–10 indicates that Paul was in fact a prisoner at Ephesus ca. A.D. 55, and it is probable that he wrote from there or from some other place of incarceration (see 2 Cor. 11:23) closer to Philippi. ***See also*** Epaphroditus; Ephesus; Paul; Philippi; Prison.

Philistia (fi-lis´tee-uh; Heb. *peleshet*), the territory controlled by the Philistines, the fertile coastal plain of Palestine that stretches from the "River of Egypt" northward to Ekron. ***See also*** Philistines.

Philistines (fi-lis´teenz), a warlike people who, with the other Sea Peoples, migrated from the Aegean basin to the southern coast of Palestine in the early twelfth century B.C. and became one of Israel's principal rivals.

Name: The Hebrew name for the Philistines is *pelishtim;* the OT usually refers to their territory as *'eretz pelishtim* ("land of the Philistines") or *peleshet* ("Philistia"). The modern term "Palestine" is derived from the Greek and Latin names given to the descendants of the Philistines.

Origin: Although the exact origin of the Philistines remains uncertain, there is no doubt that they were part of a great ethnic upheaval that occurred in the Aegean area in the final decades of the thirteenth century B.C. During this unsettled period, an unknown combination of social, political, and economic factors caused the displacement of various peoples on the Greek mainland and Aegean islands and in eastern Anatolia. The so-called Sea Peoples, or "foreigners from the Sea," emerged from the hodgepodge of refugees, and their military advance across the eastern Mediterranean brought an end to the Hittite Empire and the city-state of Ugarit. Ultimately, the Sea Peoples

The Philistines began settling along the coast of Palestine in the early twelfth century B.C. When they consolidated their claim to the area, their principal cities were Ashdod, Ashkelon, Ekron, Gath, and Gaza.

reached the coasts of Phoenicia, Palestine, and Egypt. In the eighth year of his reign (ca. 1190 B.C.), Ramesses III fought two groups of the Sea Peoples, the Tjekker and the Philistines. Though the battle was fought on land and sea, the Egyptians prevailed; an important written and pictorial description of this episode was carved on the walls of Ramesses' funerary temple at Medinet Habu (Thebes). Following his victory, Ramesses settled the Philistines along the southern coast of Canaan, and this Aegean people claimed a new homeland—the region we now call Philistia.

In agreement with the external sources, the Bible points to an Aegean origin for the Philistines by linking them with Caphtor (Jer. 47:4; Amos 9:7; cf. Gen. 10:14; Deut. 2:23; 1 Chron. 1:12). Caphtor is almost certainly to be identified with Crete (cf. Cherethites; Palethites; Caphtorim).

History: Since nonbiblical texts do not use the term "Philistines" before ca. 1200 B.C., most scholars assume that the appearance of this name in Gen. 21:32, 34; and 26:1, 8, 14–18 is anachronistic. While it is quite possible that there were peoples of Aegean origin in Canaan during the patriarchal period, it seems likely that a later editor "updated" their ethnic designation by calling them Philistines. If the name "Philistine" was not used until the twelfth century B.C., a similar explanation must be given for its appearance in Gen. 10:14; Exod. 13:17; 23:31; and Josh. 13:2–3.

As the Philistines consolidated their claim to Palestine's southern coast, roughly in the area between Gaza and modern Tel Aviv, they organized themselves into a league of city-states. The "Philistine pentapolis" was composed of Gaza, Ashdod, Ashkelon, Gath, and Ekron; these five cities remained important throughout Philistine history. Although this region had great agricultural and commercial potential, the Philistines were not satisfied with such a narrow strip of land. Their expansion into the hinterland eventually brought them into conflict with the Israelites, who were expanding their territory at about the same time from the opposite side of Canaan. This competition for land and political control produced a fierce rivalry that lasted from the middle of the twelfth century B.C. until ca. 965 B.C. (i.e., from the time of the Philistine expansion into Israelite territory until their defeat by David).

In agreement with Josh. 13:2–3, Judg. 3:1–3 says that the Philistines were among the nations that the Lord left in Canaan "to test" Israel. Beginning with the book of Judges, the OT records numerous encounters between the Hebrews and Philistines. The first reference to hostility between these two rivals is Judg. 3:31, a single verse that praises Shamgar for delivering Israel by killing six hundred Philistines with an oxgoad. Strength and military prowess are acclaimed in the well-known story of Samson

Ashdoda, a Philistine cultic object in the shape of a seated woman, from Ashdod, twelfth century B.C.

(chaps. 13–16), but this account also serves to illustrate the Philistine encroachment into Hebrew territory. Indeed, during some forty years of Philistine domination over Israel (13:1; 14:4), the tribes of Dan and Judah fought for their very existence. The Samson narratives document the eastward expansion of Israel's rival by mentioning the Philistine presence in Timnah and Lehi, both in the strategic Valley of Sorek. According to Judges 18, this Philistine expansion worsened the land shortage that eventually forced the Danites to migrate northward.

Shortly after the call of Samuel, Israelite-Philistine tension erupted into all-out war. Israel was defeated at Ebenezer, the Ark was captured, and Shiloh was destroyed (1 Sam. 4–6; cf. Ps. 78:56–66; Jer. 7:12–14). After rededicating themselves to God, the Israelites defeated the Philistines at Mizpah (1 Sam. 7:3–14). The balance of power fluctuated, but the establishment of the monarchy and a regular army enabled Saul to defeat his foes (chaps. 13–14), in spite of the Philistine superiority in weaponry (cf. 13:19–22). While Saul fought a variety of enemies on all fronts (cf. 14:47–48), "there was hard fighting against the Philistines all the days of

Saul" (14:52). The acclaim that David received after his victory over Goliath and the resultant rout of the Philistines (17:41–54) led to Saul's jealousy and David's flight. David took refuge with the Philistine king of Gath, Achish, and became one of his vassals (27:1–28:2), but David was not present when the Philistines killed Saul and his sons on Mount Gilboa (chap. 31). This Philistine victory led to an even greater expansion of their holdings (cf. 31:7).

The death of Saul caused David to break his alliance with the Philistines and establish his kingship in Hebron (2 Sam. 1:1–2:11). In an effort to crush David's independent state, the Philistines attacked, but David "smote the Philistines from Geba to Gezer" (2 Sam. 5:17–25). Ultimately, David's opposition to the Philistines broke their power (2 Sam. 8:1; cf. 1 Chron. 18:1). Although the Philistines continued to resist Israel's expansion (cf. 2 Sam. 21:15–22; 23:8–39), they were no longer a major threat to the Hebrews.

When Solomon came to the throne, he received tribute from subordinate kingdoms on the Israelite frontiers, including the city-states of Philistia (1 Kings 4:21). Solomon allied himself with the Egyptian pharaoh by taking an Egyptian wife and receiving the city of Gezer as dowry (1 Kings 9:16). The passing of this important city from Egyptian to Israelite hands is a good indication of the low ebb of Philistine power at this time.

This does not mean that Philistine hostility toward the ancient Hebrews had disappeared; indeed, intermittent fighting between these two peoples continued throughout the history of the Divided Monarchy. Judah received tribute from the Philistines during the reign of Jehoshaphat (2 Chron. 17:11), but the Philistines were among those who raided Judah in Jehoram's day (2 Chron. 21:16–17). While Uzziah made successful incursions into Philistia (2 Chron. 26:6–7), Ahaz lost territory to the Philistines (2 Chron. 28:18). According to the biblical record, the last Israelite king who had contact with the Philistines was Hezekiah; he directed successful campaigns against this traditional rival (2 Kings 18:8).

Since much of this fighting took place during the eighth century B.C., reference should be made to oracles of two Hebrew prophets from this era. Amos (1:6–8) leveled a severe indictment against Gaza, Ashdod, Ashkelon, and Ekron because of the Philistine involvement in slavery (cf. Zeph. 2:4–7; Joel 3:4–8). Isa. 9:12 says that the Lord used the Philistines to punish Israel, but the prophet also warned Philistia about an approaching enemy who would come "out of the north"—the Assyrians (14:28–31).

Isaiah's warning in 715 B.C. (i.e., the year Ahaz died) came long after the Assyrians began interfering with the internal affairs of Philistia. At the end of the ninth century B.C., Adad-nirari III mentioned tribute payments from the

A Philistine pottery sarcophagus from Deir el-Balah, twelfth century B.C.

Philistines. The military power of Tiglath-pileser III, Sargon II, Sennacherib, and Esarhaddon was felt by the often rebellious cities of Philistia between 734 and 676 B.C. (cf. Isa. 20). Although the Assyrians exacted tribute from the Philistines and set pro-Assyrian rulers on the thrones of Philistia's city-states, the Assyrian kings allowed this coastal region to retain a measure of autonomy because Philistia acted as a buffer zone on the Egyptian frontier.

Following the collapse of Assyria, the cities along Palestine's southern coast were controlled by Egypt and, when the Philistines joined Egypt in an anti-Babylonian alliance, Nebuchadnezzar deported the rulers and populace of Philistia (cf. Jer. 25:20; 47:2–7; Zech. 9:5–6). While some of the Philistine cities (e.g., Gaza, Ashdod, Ashkelon) were reoccupied and survived until the Byzantine period (and beyond), the Babylonian conquest brought an end to the cultural and political unit known as Philistia. The appeal for help that a Philistine king named Adon made to the Egyptian pharaoh illustrates the panic caused by the Babylonian invasion.

Archaeology: Our knowledge of the Philistines is based not only on the Bible and extrabiblical

historical sources (including the temple reliefs at Medinet Habu), but on excavated material from numerous archaeological sites. Evidence from these sites, most of which are located in the coastal plain and foothills of southern Palestine, agrees with the written sources in placing the Philistine arrival, expansion, and decline between ca. 1200 and 1000 B.C. Even the distinctive, Aegean-influenced Philistine pottery (derived from Mycenaean III C 1:b ware), which is commonly found in strata dating to the twelfth–eleventh centuries B.C., disappears after ca. 1000 B.C., a clear indication of the Philistines' adoption of local culture.

The locations of three cities of the Philistine pentapolis are certain—Gaza, Ashkelon, and Ashdod. Current excavations at modern Khirbet el-Muganna (Tel Miqne) might identify this site as ancient Ekron, but the location of Philistine Gath is still uncertain (modern Tell es-Safi?). Major excavations have been conducted at Ashdod, with the recovery of significant data, while the Philistine evidence from Gaza and Ashkelon is meager. Recent investigations at other sites (e.g., Deir el-Balah, Tell el-Batashi, Tell Gezer, Tell Jemmeh, Tell Qasile) have shed new light on Philistine architecture, burials, pottery, metallurgy, religion, and commerce. For example, Tell Jemmeh, located ca. seven miles south of Gaza, yielded artifacts from Arabia, Egypt, Phoenicia, Assyria, Cyprus, and Greece; such evidence demonstrates that Philistia was a crossroads for international trade.

Religion: The OT refers to three Philistine deities—Dagon, Ashtaroth, and Baal-zebub—all of whom had Semitic names; this indicates that the Philistines assimilated the divinities or the names used in local Canaanite religion, a common phenomenon in ancient times. Dagon had temples in Gaza (Judg. 16:21, 23–30), Ashdod (1 Sam. 5:1–7), and probably in Beth-shan (1 Chron. 10:10; cf. 1 Sam. 31:10). Ashtaroth had temples in Ashkelon (Herodotus 1.105) and probably in Beth-shan (1 Sam. 31:10); and Baal-zebub had a temple in Ekron (2 Kings 1:1–16).

Like other ancient peoples, the Philistines offered sacrifices to their gods (Judg. 16:23), sought counsel from priests and diviners (1 Sam. 6:2–9), and developed the art of soothsaying (Isa. 2:6). Apparently, Philistine warriors carried portable idols into battle (2 Sam. 5:21) and had respect for other national deities (cf. 1 Sam. 5:1–6:21).

Prior to the excavations at Tell Qasile, virtually all information about Philistine religion was derived from the biblical passages mentioned above. This situation changed when three superimposed Philistine temples were uncovered at this important site, which is located within the city limits of Tel Aviv. The layout of the latest temple includes both Canaanite and Cypriot-Greek features. Also important was the recovery of a number of cultic vessels from this complex, some of which have Aegean antecedents.

Language: Strangely enough, not one written text can be attributed to the Philistines with certainty. There are several inscriptions in Cypro-Minoan or Cypro-Mycenaean script that might be Philistine (e.g., seals from Ashdod and tablets from Tell Deir Alla), but none of them can be deciphered. While most Philistine names are Semitic, the names Achish and Goliath find their parallels in Crete and western Anatolia, respectively. Several Hebrew words were probably borrowed from the Philistine language, e.g., *seren,* "lord" (cf. 1 Sam. 5:8); *kôba',* "helmet" (cf. 1 Sam. 17:5); and *'argaz,* "box" (cf. 1 Sam. 6:8). Like the rest of Philistine culture, their language ultimately disappeared and a local Semitic dialect was adopted. The isolation of Philistia's cities, even in post-exilic times, produced a language barrier between the Ashdodites and the Judeans (Neh. 13:23–24). ***See also*** Cherethites; Palestine; Pelethites; Philistia.

Philo (fi'loh; ca. 20 B.C.–A.D. 50), a wealthy Alexandrian Jew, both statesman and philosopher, the most prolific author of Hellenistic Judaism (i.e., the non-Palestinian branch of Judaism most influenced by Hellenistic culture). Although stemming from the period of the rabbinic sages Hillel, Shammai, and Gamaliel, as well as Jesus and Paul, Philo's writings are remarkably free of rabbinic concerns and betray no awareness of any Christian person or event. Rather, Philo combined a fierce loyalty to Judaism with a profound love of Greek philosophy to present a literary defense of Judaism to his racially troubled city and an extensive allegorical interpretation of Scripture that made Jewish law consonant with the ideals of Stoic, Pythagorean, and especially Platonic thought.

No NT writing owes a direct debt to Philo, but the Gospel of John (especially the *Logos* doctrine of its prologue), the Pauline Letters, and the Letter to the Hebrews reflect to some extent Philo's philosophical terminology and milieu. His writings were preserved by Christians, and later his philosophical ideas and allegorical

method had a direct impact on Christian theology through the writings of Clement of Alexandria and Origen. ***See also*** Alexandria; Logos.

Phinehas (fin´ee-huhs). **1** A priest, son of Eleazar, grandson of Aaron (Exod. 6:25; 1 Chron. 6:4, 20), and ancestor of Ezra (Ezra 8:2). Phinehas demonstrated his zeal for God during the wilderness period. Seeing an Israelite man having intercourse with a Midianite woman as part of the rites of Baal of Peor, Phinehas killed them both with one thrust of a spear. This stayed the wrath of God against the people and earned a covenant of eternal priesthood for Phinehas and his descendants (Num. 25:1; cf. Ps. 106:30–31; Ecclus. 45:23–24; 1 Macc. 2:26, 54). Phinehas accompanied Israelite soldiers in a holy war against Midian (Num. 31:6), successfully negotiated a religious dispute between Israel and the Transjordanian tribes (Josh. 22:10–34), and advised the Israelite tribes to attack Benjamin (Judg. 20:27–28). 1 Chron. 9:20 states that he was in charge of the Temple gatekeepers. His home was in Gibeah (Josh. 24:33). **2** A priest, the son of Eli (1 Sam. 1:3). He and his brother Hophni abused their priestly office at Shiloh for which they were condemned (1 Sam. 2:12–36). Both were killed in battle at Aphek by the Philistines who captured the Ark (1 Sam. 4:11). On hearing the tragic news, Phinehas's wife gave birth to Ichabod. **3** The father of the priest Eleazar (Ezra 8:33; 1 Esd. 8:63). ***See also*** Eli; Hophni; Priests.

M.A.S.

Phlegon (fleg´uhn), a Christian greeted by Paul in Rom. 16:14; perhaps a member of a house-church.

Phoebe (fee´bee; KJV: "Phebe"), the first of the twenty-seven people greeted by Paul in Romans 16, as well as the first of the nine (or possibly ten) women included in the greetings. The fact that she is the first person greeted indicates her prominence in Christian circles, and her commendation by Paul probably means she was entrusted with the delivery of Paul's letter to the Christians in Rome. She was designated by Paul as "sister," a common term used for female Christians indicating the close familial relationships prevailing in early Christian communities; as "deacon" (in light of Phil. 1:1 probably a church official) of the church in Cenchreae, a community near Corinth; and as "helper" both of Paul and of many others, probably indicating, in addition to a certain amount of wealth, that she was the head of a Christian community that met in her house, i.e., a "house-church," in Cenchreae. ***See also*** Cenchreae; Church; Paul; Romans, The Letter of Paul to the; Women.

P.J.A.

Phoenicia (fi-nish´uh), the name given to a strip of the coastal Levant during the first millennium B.C. It was in that period that the city-states of Tyre, Sidon, Arvad, Byblos, and others engaged in long-distance navigation, maritime commerce, and colonization with Cyprus, North Africa, Sicily, Sardinia, and Iberia.

Name and Origin: The geographical and chronological boundaries for Phoenicia are imprecise, in part because neither the Phoenicians themselves nor their Near Eastern neighbors used the term "Phoenician." It is in Homer, probably in a milieu of the ninth to eighth centuries B.C., that the inhabitants of Sidon are called Phoenician, although the term may first occur in Mycenaean Linear B texts of the thirteenth century B.C. The Phoenicians were famous for their costly purple dye produced from crushed mollusks; it has long been suggested that the name "Phoenicia" is derived from the Greek word for red-purple, *phoinix.* By the same token "Canaan," a name for parts of the Levant, may come from a Hurrian word for red-purple, *kinahhu.*

In fact the Phoenicians of the Iron Age (first millennium B.C.) descended from the original Canaanites who dwelt in the region during the earlier Bronze Age (3000–1200 B.C.), despite classical tradition to the contrary. There is archaeological evidence for a continuous cultural tradition from the Bronze to the Iron Age (1200–333 B.C.) at the cities of Tyre and Zaraphath. In the Amarna age (fourteenth century B.C.) many letters to Egypt emanated from kings Rib-Addi of Byblos, Abi-Milki of Tyre, and Zimrida of Sidon, and in other New Kingdom Egyptian texts there are references to the cities of Beirut, Sidon, Zaraphath, Ushu, Tyre, and Byblos. Additionally there is a thirteenth-century B.C. letter from the king of Tyre to Ugarit, and a Ugaritic inscription has turned up at Zaraphath. Despite these facts showing that the coastal cities were occupied without interruption or change in population, the term "Phoenician" is now normally applied to them in the Iron Age (beginning about the twelfth

Phoenician silver coin showing a Phoenician ship and hippocampus monster—part horse, part fish.

Phoenician porters, in pointed caps and unfringed robes, carry tribute to the Assyrian ruler Shalmaneser III; ninth-century B.C. engraved bronze gates.

century B.C.) onward when the traits that characterize Phoenician culture evolved: long-distance seafaring, trade and colonization, and distinctive elements of their material culture, language, and script.

Principal Cities and Sites: The heartland of Phoenician city-states was the coastal area from Acco in the south to Arvad in the north, which in the main constitutes modern Lebanon where the Lebanon mountain range is an imposing barrier to communications between coastal cities and the inland. The most important cities and sites are the island-city Tyre, with its mainland counterpart Ushu (Old Tyre), and Sidon and its neighbors, Zaraphath and the religious center Eshmun, followed by the other island-city, Arvad, with its mainland settlement of Amrit/Marathus, the ancient port of Byblos that was famous long before the Phoenician period, and Beirut with the small burial ground at Khalde. The roster of Phoenician cities changed during the near millennium-long period beginning in 1200 B.C., reflecting the waxing and waning of their individual fortunes and the impinging historical events of the Near East.

At the beginning of the Iron Age, as part of the invasion of the Sea Peoples (groups from the Greek islands, especially Crete), the Philistines occupied the coastal area south of Mt. Carmel, including Dor, Ashdod, Ashkelon, and Gaza. By the eighth century B.C., however, the material culture of the Phoenicians extended southward, and Sidon controlled Dor and Joppa during the Persian period (539–333 B.C.). There were no major Phoenician cities north of Arvad, but Phoenician influence extended into Cilicia in the ninth and eighth centuries B.C.

Culture and Influence: Obscurity surrounds the emergence of Phoenician culture during the twelfth and eleventh centuries B.C. In a foray, the Assyrian king Tiglath-pileser I (1114–1076 B.C.) sojourned at Arvad and received tribute from Byblos and Sidon, and there are archaeological data from Tyre and Zaraphath for this period. The Egyptian *Tale of Wenamun,* dating to the mid-eleventh century B.C., graphically portrays the decline of Egyptian prestige and power in the Levant. This was due in part to the invasions of the Sea Peoples and the general disruptions of Late Bronze Age cultures throughout the eastern Mediterranean, with the collapse of Mycenaean and Hittite cultures and the destruction of city-states in the Levant. Trade was severely affected. During the fourteenth and thirteenth centuries B.C. Mycenaean and Cypriot imports flowed into the Levant but they were only a trickle from the twelfth century B.C. onward.

In the aftermath of the disruptions and the power vacuum a new order emerged in which flourishing Phoenician settlements replaced such destroyed centers as Ugarit on the coast of northern Syria. Instead of the Levant being the recipient of Aegean wares, Phoenician cities began exporting goods and services to Cyprus and Palestine.

The history of Tyre and Sidon is intertwined (indeed they were only twenty-two miles [35 km.] apart). Classical tradition suggests that Sidon was the more powerful at first but by the tenth century B.C. Tyre dominated. Tyre's kings ruled a stretch of the coast that included Sidon, and often they were referred to as kings of the Sidonians (1 Kings 16:31).

By the tenth century B.C. Phoenician craftsmen were sent to Israel to assist Solomon in the construction of the Temple at Jerusalem. In return Solomon sent grain and olive oil to Hiram, king of Tyre, and even Galilean territory was given to him (1 Kings 5), although it was not to his liking. Tyre's colonization of Cyprus in the tenth century B.C. was established and it controlled the southern coastal city of Kition where Phoenicians constructed temples for their goddess Astarte.

In the ninth century B.C. Tyre strengthened its influence over the northern kingdom of Israel. Phoenician influence is also to be seen in the region of Cilicia at Zinjirli where King Kilamuwa, probably Aramaean in origin, chose the Phoeni-

cian language and script for a long inscription at the front of his palace. Other Phoenician inscriptions come from the same region in the following centuries; Azitiwada marked the rebuilding of his city with bilingual inscriptions in Phoenician and hieroglyphic Hittite at Karatepe. The strong Phoenician influence in Cilicia may be due to trading activities in a network including Urartu, the northern rival of Assyria in the ninth and eighth centuries B.C. Phoenician trade and colonization of the western Mediterranean became strong in this period. Classical tradition places the date of foundation of Carthage at 814 B.C. by Tyrians.

During the earlier centuries Phoenician cities were autonomous for the most part and free from interference from outside political forces, although Assyrian monarchs from time to time demanded tribute. The pace of Assyrian activity in Phoenicia quickened in the ninth century B.C. when Ashurnasirpal II, Shalmaneser III, and Adadnirari III exacted tribute and taxes from Sidon, Tyre, and other Phoenician cities. Assyria was gradually extending its control over the Levant. As a result of the far-reaching reorganization of the Assyrian Empire by Tiglath-pileser III (744–727 B.C.), the nature of the impact on Phoenicia changed from one of occasional demands by raiding armies to incorporation as vassals into the empire. Many cities lost their autonomy altogether and became part of Assyrian provinces administered by governors; for example, an Assyrian province of Simyra was established by Tiglath-pileser III.

During Sennacherib's reign (705–681 B.C.) he crushed a serious revolt by coastal cities in 701 B.C. and forced Luli (Elulaeus), king of Tyre, to flee to Cyprus, where he died. Later Sidon revolted against the Assyrian ruler Esarhaddon (681–669 B.C.) who in 676 B.C. sacked and destroyed it and in its place built a governor's residence, called Kar-Esarhaddon, for a new Assyrian province. He also made a treaty with Baal, king of Tyre. Ashurbanipal (668–627 B.C.) laid siege to Tyre and Nebuchadnezzar besieged it for thirteen years (586–573 B.C.; Ezek. 26–28:19).

Sidon reemerged as the dominant city of Phoenicia in the Persian period (539–333 B.C.) and led a Phoenician contingent in the Persian wars of the early fifth century B.C., helping bridge the Hellespont and fighting at Salamis. In Phoenicia itself, remains of this period are best represented at a sanctuary near Sidon dedicated to the god Eshmun, at Byblos, and at Amrit (Marathus). In 332 B.C. Tyre finally yielded to military attack when Alexander built a mole between the island-city and the mainland during his seven-month siege.

Phoenicians expanded into the western Mediterranean during the ninth and eighth centuries B.C. in Sardinia, Sicily, North Africa, and Iberia. Their trading stations and colonies on the Atlantic and Mediterranean sides of Gibraltar (Tartessos region) exploited the rich silver mines and other raw materials of Iberia. Many causes have been put forward for the impetus of Phoenician expansion: the geographical setting of an inland mountain barrier naturally turned them seaward; depletion of natural resources (timber); overpopulation; development of a craft industry that demanded raw materials and foreign markets (Ezek. 27–28); and the influence of Assyria. It is debatable whether Phoenician expansion developed internally or was in reaction to growing Assyrian imperialism. If it was in response to Assyrians and Chaldaeans, did the Phoenicians flee their homeland to escape oppression (Isa. 23) or did they prosper economically as key middlemen in the empire's trade network (Isa. 23; Ezek. 27–28), which extended the length of the Mediterranean? The greater economic threat came from competing Greek expansion during the eighth century B.C. and later. The Phoenicians extracted from the mollusk *Murex trunculus* a rare and costly purple dye for textiles and garments. Heaps of crushed *murex* shells have been found at Zaraphath, Sidon, and Tyre.

Solomon turned to skilled Phoenician builders, who helped cut and assemble stone and wood for the Temple at Jerusalem (1 Kings 5). Today the best examples of Phoenician sacred architecture are the temple of Astarte at Kition, the sanctuary at Eshmun, and a small shrine at Zaraphath. Phoenicians often constructed stone walls with vertical piers of ashlar blocks laid in an alternating pattern of header and stretcher. The area between the piers was filled with irregular field stones. Ivory carving was another Phoenician craft. Their ivories, which were often inlays for furniture, date to the eighth and seventh centuries B.C. and have been found at Megiddo, Samaria, and elsewhere in Palestine, in Assyrian cities, on Cyprus and in the western Mediterranean, and in the homeland at Zaraphath and Byblos. The ornate Levantine style exhibits a strong Egyptian influence with motifs of winged sphinxes, lotus flowers, and human figures with Egyptian headdress. Metal bowls with embossed and engraved designs of a central medallion and concentric bands were produced by skilled Cypro-Phoenician craftsmen in bronze, silver, and gold.

Phoenicians spoke a Northwest Semitic language closely related to Ugaritic, Hebrew, and Aramaic. According to the ancient Greek historian Herodotus the Phoenicians introduced the alphabet to Greece. Alphabetic writing was already well established in the Late Bronze Age at Ugarit where a cuneiform script was used. The Phoenician alphabetic script is similar to early Hebrew and Aramaic scripts of the first millennium B.C.

Religion: Phoenician religion shared elements with other Canaanite cultures of the Levant in which the pantheon (i.e., the gods who were worshiped) differed from city to city and from

one age to the next. Nature and fertility deities predominated. Baal, Astarte, Eshmun, Adonis, and Melqart were the chief deities, while Tanit, most popular in North Africa, was also known in Phoenicia. Baal, the chief god of Tyre and Sidon, was the leading rival to Yahweh worship in the northern Israelite kingdom (1 Kings 16:29–32:18). Baal's consort was the goddess Astarte. At Byblos the deities El and Baalat took the place of Baal and Astarte, and nearby the young god Adonis was worshiped at a country shrine of Aphka at the source of the river Nahr Ibrahim. Lucian (second century A.D.) relates that the death of Adonis was marked by annual rites of mourning when the river became red with the god's blood. At Sidon the god Eshmun was also worshiped at an important country sanctuary near springs for the river Nahr el-Awali. Eshmun, whom the Greeks identified with the healing god Asclepius, was most popular in the Chaldaean and Persian periods. Melqart, whose relationship to Baal is ambiguous, was worshiped at Tyre and in the western Mediterranean. At Carthage the goddess Tanit was propitiated by infamous child immolation by fire. Sacrificial precincts (Heb. *tophet;* 2 Kings 23:10; Jer. 7:31) containing cremation urns have been found at Carthage and on Sicily and Sardinia but none have turned up in Iberia or Phoenicia. However, a dedicatory inscription from Zaraphath for Tanit-Astarte makes it clear that Tanit was worshiped in Phoenicia as early as the seventh century B.C. In the NT, Jesus journeyed into this region (Mark 7:24; cf. v. 26), and the area was visited by various Christian missionaries (Acts 11:19; 15:3; 21:2). ***See also*** Hiram; Philistines; Sidon; Solomon; Tyre.

Phoenix (fee´niks), a seaport (possibly modern Port Loutro) on the southeastern coast of Crete. It was while on board an Alexandrian ship en route from Fair Haven to Phoenix for winter harborage that Paul and his captors were shipwrecked (Acts 27:12).

Phrygia (frij´ee-uh), a large region of interior western Asia Minor, during the NT period divided by the Romans into the provinces Asia and Galatia. The Phrygians, apparently of Thracian stock, were renowned for fanatical worship of the mother-goddess Cybele and her consort Attis. Jews too inhabited the region as early as the second century B.C., according to the historian Josephus. Acts 2:10 mentions Phrygian Jewish pilgrims among those who heard the apostles speaking in tongues at Pentecost.

Even though Paul never explicitly mentions his ministry there, it is likely he and his fellow missionaries were primarily responsible for evangelizing Phrygia. Philemon, whom Paul knew personally and whom he intended to revisit, probably lived in or near Colossae. Paul's silence concerning Phrygia most likely is due to his habit of referring to Asia Minor areas by their provincial names; if so, references to Galatia and especially to Asia may in fact pertain to Phrygia. Be that as it may, Acts says he preached in Antioch of Pisidia (not actually in Pisidia; 13:14–51), and again later passed through Phrygia twice (16:6; 18:23). According to pseudo-Pauline letters, he or his companions worked in Antioch, Laodicea, Hierapolis, Colossae, and Iconium (Col. 1:2; 2:1; 4:13, 15–16; 2 Tim. 3:11). The second-century apocryphal *Acts of Paul,* almost certainly dependent on earlier tradition, tells of his ministry to Antioch and to Iconium, where allegedly he converted a woman named Thecla, later long venerated in the region as a prophetess, teacher, and healer.

The itinerant author of the Revelation to John also worked in this area, as one can see from his comments concerning Laodicea (3:14–22). Papias, bishop of Hierapolis early in the second century, tells of missionaries who still traveled through the area, and of the prophesying virgin daughters of Philip (see Acts 21:8–9), two of whom lived in Hierapolis. Our primary witnesses to Christianity in Phrygia—Paul, Revelation to John, Papias, and *The Acts of Paul*—all suggest it was characteristically apocalyptic, sectarian, and socially disruptive. The New Prophecy that sprang up in Phrygia during the mid-second century with the appearance of the prophets Montanus, Maximilla, and Priscilla seems to have been rooted in this distinctively Phrygian form of Christianity. ***See also*** Colossae; Hierapolis; Laodicea. D.R.M.

Phygelus (fi'juh-luhs), an Asian Christian who, with Hermogenes and others, abandoned Paul the prisoner (2 Tim. 1:15). This and the following three verses are sometimes thought to create a vivid impression of authenticity and thus to pose difficulties for the theory that 2 Timothy is pseudonymous; oral tradition may, however, have preserved such references. ***See also*** Hermogenes; Timothy, The First and Second Letters of Paul to, and Titus, The Letter of Paul to.

phylacteries (fi'lak'tuh-reez; Heb. *tephillin*), a pair of small black boxes containing passages from Scripture written on parchment. According to ancient Jewish tradition, the *tephillin* are fastened by black straps to the upper left arm and above the forehead. The tradition is based on Exod. 13:9, 16; Deut. 6:8; and 11:18. The paragraphs in which these verses appear are the very ones placed inside the phylacteries.

There is no evidence as to when the practice of wearing phylacteries originated. The verses from which the practice is derived appear to carry a metaphorical meaning, namely, that the acceptance of God's laws and the recognition of his power be on one's mind and body. Exod. 13:9 in particular is suited to such an interpretation, as it is speaking within the context of the annual observance of the Passover service without reference to a daily practice. A nonliteral understanding of these verses is further strengthened in light of the widespread metaphorical use of ornaments to indicate something carefully remembered and held dear (Isa. 62:3; Jer. 2:32; Prov. 1:9; Song of Sol. 8:6; *Gilgamesh Epic* XI, 164–165). Nevertheless, Deut. 6:8 and 11:18 may intend the practice to be followed literally (there it is words that are to be bound to the body, and the context also refers to the literal writing of these words on doorposts and gates).

A "silver phylactery" is mentioned in an Aramaic papyrus from Elephantine, Egypt, dating from the beginning of the third century B.C. Phylacteries found at Qumran, along with statements in Matt. 23:5 and in rabbinic literature (e.g., *M. Meg.* 4:8), show that the practice was widely observed toward the end of the Second Temple period. While the wearing of phylacteries was not universally accepted during the rabbinic period (post-A.D. 200), the celebrated Bar-Kochba phylacteries from Wadi Murabbaat attest to the steadfast adherence to the practice, even under trying circumstances, of those who did keep it.

Like many religious objects, phylacteries were often conceived of by the masses as possessing apotropaic (i.e., protective) powers. This association was deepened by the outward resemblance of the phylacteries to a type of amulet known as *qemia* which was also thought to possess protective powers. However, the edifying contents of the phylacteries as well as the laws forbidding their use by certain people thought to be most susceptible to demonic power show that the phylacteries were originally intended as a spiritual and educational device. The official understanding of phylacteries is brought out in many rabbinic sources, most notably in the Babylonian Talmud, tractate *Berakot* 14b–15a: "Whoever wishes to take the yoke of the kingship of heaven upon himself completely should [first] relieve himself and wash his hands, and [then] don *tephillin* and recite the *Shema* and the *Tefillah;* this is the complete [acceptance of the] kingship of heaven."

Like other religious objects, phylacteries could be used to flaunt piety. Such a show is criticized in Matt. 23:5 and in Talmudic sources (e.g., *Midr. Eccles. Rab.* 4:1). ***See also*** Frontlet.

physicians, those healing illnesses by profession. The OT text does not provide a representative sample of the illnesses and therapies obtaining in ancient Israel. The physician healer (Heb. *rofe',* "healer," Jer. 8:22; 2 Chron. 16:12) and midwife (e.g., Gen. 35:17; 38:28; Exod. 1:15–22 [following the Masoretic Text vocalization]) come under the category of medical personnel. In addition, priests and prophets or miracle workers (e.g., 1 Kings 17:17–24; 2 Kings 4:14–37; 5) are shown providing medical services; prophet (Isa. 38; 2 Kings 20:1–11) and patriarch (Gen. 20:7, 17–18) at times served as intermediary between God and king on the occasion of illness. Information regarding modes of healing may even be inferred from divine attributions (e.g., Ps. 147:3).

As with other ancient cultures, there was in Israel no necessary conflict between belief in divine, demonic, and/or human causation of illness or between requests for divine assistance and the application of practical therapy. Prayer played a role in some treatments. Certainly, miraculous cures are occasionally described (1 Kings 17:17–24; 2 Kings 5:1–14). It is unnecessary to seek scientific explanations for such cures. Here and there we may be dealing with natural remission or psychogenic illness amenable to certain therapies, but on the whole, the stories are intended to demonstrate the supernatural powers of God and/or of the miracle worker. Yet it must be assumed that belief in natural causes of illness existed and that rational diagnoses seeking autonomous causes of illness co-existed with other approaches. Practical aids included: bandages, salves, poultices, bone setting (e.g., Isa. 1:6; Jer. 8:22; Ezek. 34:4, 16). A good perspective on biblical medicine is provided in Ecclus. 38:1–15. The general

absence of incantations and magical therapies (exorcism) from the Hebrew Bible should not lead us to conclude that they did not exist in ancient Israel.

Worthy of special mention are the different kinds of medical personnel and types of documentation in ancient Mesopotamia, because of its general influence on the culture of Israel. Professional handbooks and correspondence of royal courts provide detailed and reliable information on the approach to illness of and types of therapeutic activities undertaken by the *āshipu* (exorcist) and *asû* (doctor).

While many healing miracles are reported of Jesus in the NT Gospels (e.g., Matt. 8:1–4; Mark 5:1–20; Luke 13:10–13; John 9:1–7), the term "physician" is never applied to him. Jesus assumed that such healing activity would also characterize his followers, something the Gospels (e.g., Mark 6:13) and Acts (e.g., 3:1–8; 14:8–10) record, but again, the title "physician" is never applied to them either. Physicians were known in the NT world, however, even though their skills were not held in high esteem (e.g., Mark 5:26), and a physician named Luke, whom tradition has identified as the author of the Third Gospel, is mentioned as a companion of Paul (Col. 4:14). I.T.A.

Pi-beseth (p*i*-bee′sith), a city in the delta in Egypt. Ezek. 30:17 includes it as part of the prophet's oracle against Egypt. Known in Greek as Bubastis, it is modern Tell Basta on an eastern branch of the delta flow. Its name reflects its identification with the Egyptian cat goddess, Bastet.

Pi-hahiroth (p*i*′huh-h*i*′roth), a town mentioned in Exod. 14:2, 9 as an Israelite stopping place on the route from Egypt (see also Num. 33:7). Its associations with Baal-zephon and Migdol suggest an eastern Nile delta location, but the site is not precisely known.

Pilate washing his hands at the trial of Jesus (cf. Matt. 27:24); from a fifth-century ivory.

Pilate, Pontius (p*i*′luht, pon′shuhs), Roman prefect of Judea, the fifth governor of the province and the second-longest holder of the office (A.D. 26–36). His term included the time of John the Baptist's activity, as well as that of the public ministry and crucifixion of Jesus (see Luke 3:1). In addition to the NT references, where Pilate plays a central role in the events surrounding the trial and crucifixion of Jesus (Matt. 27:1–2, 11–26; Mark 15:1–15; Luke 23:1–25; John 18:28–19:16; Acts 3:13; 4:27; 13:28; 1 Tim. 6:13), we have information about Pilate and his rule in the historical writings of Philo Judaeus and Flavius Josephus. An important piece of archaeological evidence is a dedication inscription, found in Caesarea Maritima in 1961, where Pilate is given his correct title of prefect (not procurator).

In the Jewish Sources: Pilate's character is represented very negatively in the Jewish sources: he is presented as insensitive to Jewish religious scruples and all too ready to use brutal force to repress any dissent. He is also charged with incompetence and venality. Since, however, we hear only one side on Pilate (the only extant Roman mention is a brief reference in the historian Tacitus to the crucifixion of Jesus), and since Pilate governed Judea for an unusually long term, which may indicate that the Roman government was not displeased with his performance, it appears best to withhold judgment on his character.

Josephus reports that, when Pilate first brought Roman troops to Jerusalem from Caesarea, he committed an unprecedented violation of Jewish sensibilities by allowing the troops to bring into the city their military standards with the busts of the emperor, which were considered idolatrous images by the Jews; and this was done in an underhanded manner,

the troops bringing in and setting up the images by night. A massive protest demonstration in Caesarea's stadium forced the removal of the standards, but only after the Jews used tactics of nonviolent mass resistance, lying down and baring their necks when Pilate's soldiers, swords in hand, surrounded and attempted to disperse them.

Philo tells of an incident where Jewish letters of protest to Rome brought the intervention of the emperor himself, who commanded Pilate to remove golden shields with the emperor's name on them that he had placed in his residence in Jerusalem. Similar incidents were not always resolved without bloodshed, however. Josephus again speaks of protests that broke out when Pilate appropriated Temple funds to build an aqueduct for Jerusalem. On this occasion, Pilate had Roman soldiers, dressed as Jewish civilians and armed with hidden clubs, mingle with the shouting crowd and attack the people at a prearranged signal. Many were killed or hurt.

There is no extrabiblical account of the incident mentioned in Luke 13:1, "of the Galileans whose blood Pilate had mingled with their sacrifices," but it does not appear out of character with the other incidents or with the slaughter of Samaritans in A.D. 35, mentioned by Josephus, which apparently brought about Pilate's recall. A Samaritan prophet (Josephus calls him a liar) gathered large numbers of his people to Mount Gerizim with the promise of showing them the holy vessels supposedly hidden there by Moses. Pilate treated the event as an insurrection and attacked the crowd with cavalry and heavy infantry, killing many in the battle and executing the leaders among the captured. Vitellius, the imperial legate to Syria, felt compelled to remove Pilate from office and sent him to Rome to render account of his conduct.

In the Gospel Accounts: Pilate's part in the trial and execution of Jesus is, of course, the focus of most later interest in him. His role is presented somewhat differently in each of the Gospels, reflecting the diversity of theological agendas of the various authors as well as a growing tendency, as time passed, for Christians to exonerate the Romans and to lay blame for Jesus' crucifixion on "the Jews."

Mark's account (15:1–15) presents Pilate in the most ambiguous light: he "wonders" at Jesus' silence when questioned and accused of calling himself "King of the Jews" and bends to the will of the mob (stirred up by the chief priests) in sending Jesus to the cross and setting Barabbas free, even though he sees no good reason for this (15:14–15). Matthew's account (27:1–2, 11–26) introduces Pilate's wife (not named in the Gospel but called Procla or Procula in later tradition), who warns Pilate to have nothing to do with "that righteous man," about whom she has had a dream; also introduced is the hand-washing incident, in which Pilate claims, unchallenged, his own innocence and "all the people" cry, "His blood be on us and on our children!" (27:24–25). Luke's version (23:1–25) has Pilate send Jesus, accused of perverting the nation, forbidding payment of tribute to Caesar, and claiming his own kingship, to Herod Antipas, whose soldiers (not the Romans) mock him. John (18:28–19:16), in an elaborate scheme of "inside" and "outside" scenes, carries even further the idea that Pilate, who did not wish to condemn Jesus, was a helpless pawn (not only of the Jewish people but also of God; see 19:11). John also has Jesus emphasize the otherworldly character of his kingship.

Later Christian tradition went even further than the Gospels in the direction of exonerating Pilate, in some cases even suggesting his eventual repentance and conversion to Christianity. ***See also*** Barabbas; Judea; Procurator; Trial of Jesus, The. F.O.G.

pilgrimage, a journey to a shrine, holy place, or sanctuary for a religious reason. Such journeys are a common feature of religious devotion and are not confined to any particular religious tradition, period of time, or group of people. In the ancient Near East, shrines or cultic (worship) centers were often established at sites connected with divine activity, such as an extraordinary event (e.g., Josh. 4:1–7) or unusual natural phenomena, or at sites revered by tradition as holy (e.g., Gen. 13:18). The shrine often became the goal of pilgrimages, and worshipers would bring offerings to the shrine for petition or thanksgiving. Archaeological excavations in various parts of the world have uncovered such shrines, altars, and temples containing pottery jars or other objects used for the offerings.

The earliest pilgrimages recorded in the Bible were to the shrines or cultic centers that existed throughout Israel before the reforms of King Josiah (ca. 622 B.C.). At a critical point in Jacob's life (the changing of his name to Israel) he made a pilgrimage in ritual purity to Bethel, the place where he had earlier erected an altar after seeing God in a dream (Gen. 35:1–15; cf. 28:10–22; 12:8). Shiloh was also the goal of an early annual pilgrimage (Judg. 21:19–21; 1 Sam. 1:3–7, 21), and other early cultic centers in Israel also attracted worshipers, including Gibeon (1 Kings 3:4), Beer-sheba (Amos 5:5; 8:14), and Gilgal (Hos. 4:15; Amos 4:4–5; 5:5), as well as numerous "high places" (1 Sam. 9:12–19, 25). Although the provisions concerning pilgrimage in Deuteronomy are connected with Jerusalem in their present context, they may reflect an earlier tradition of pilgrimage to these local shrines (e.g., Deut. 26:1–11).

To Jerusalem: In the time of David (ca. 1000 B.C.), Jerusalem was established as a religious center (2 Sam. 6:12–19), and following the completion of the Temple under Solomon (1 Kings 8; 2 Chron. 7:8–10) it increasingly became the goal of pilgrimage, a place to which

the people could bring their offerings and a place they could celebrate the feasts and offer sacrifice to God (Deut. 12:6–7, 11–12, 17–18). After the division of the nation (ca. 924 B.C.), Jeroboam I of the Northern Kingdom, in an attempt to prevent the people from traveling to the Temple in Jerusalem (in the Southern Kingdom), established sanctuaries at the ancient shrine of Bethel and at Dan (1 Kings 12:26–30). The reforms of Hezekiah and Josiah attempted to eliminate the outlying shrines and high places because of the threat of corruption by Baal worship (2 Kings 18:4; 23:4–20), but they continued to exist until the period of the Exile (587 B.C.).

The old Israelite religious legislation required pilgrimage to Jerusalem three times a year: at Passover (the Feast of Unleavened Bread), the Feast of Weeks (Pentecost), and the Feast of Booths (Deut. 16:16; cf. Exod. 23:13–17; 34:18–23), although it is unlikely that the entire male population attended all of these feasts. In any case, in NT times there were large crowds of pilgrims in Jerusalem for the feasts from widely scattered places (Luke 2:41–45; John 12:20; Acts 2:1–10). According to the Fourth Gospel, Jesus made several pilgrimages to Jerusalem to celebrate the feasts (John 2:13; 5:1; 7:2–10).

Those on pilgrimage often traveled in groups (Pss. 42:4; 55:14; Luke 2:44) and the joy of the occasion would be marked by singing and rejoicing (Isa. 30:29). Several of these songs are preserved in the "Songs of Ascent" (or "degrees" in some older versions) or "Pilgrim Songs" sung by the pilgrims as they approached Jerusalem (Pss. 24, 84, 118, 120–134).

Jews continued to make pilgrimages to Jerusalem after the destruction of the Temple (A.D. 70) as well as to the tomb of Samuel at Nabi Samwil (Ramah). The western retaining wall of the Temple Mount known as the "Wailing Wall" is still the goal of Jewish pilgrims who bemoan the loss of the Temple and pray for the peace of Jerusalem.

In Christian Tradition: Christian pilgrimages to the Holy Land began as early as A.D. 100 although they did not become popular until the time of Emperor Constantine I (A.D. 306–337). After his conversion to Christianity, he and his mother, Helena, attempted to locate places in the Holy Land associated with the life of Jesus and in so doing stimulated the construction of shrines and churches on the sites. These locations drew pilgrims whose piety and devotion were expressed in a veneration of the sacred places. By the end of the fourth century A.D. pilgrimages to the Holy Land, as well as to Rome, Egypt, and numerous other local shrines associated with relics, miracles, visitations, or martyrs, were commonplace and an accepted part of Christian devotion.

In a figurative sense, the NT portrays the Christian life as a journey toward a heavenly city (Heb. 11:13–16; cf. 1 Pet. 1:17; 2:11). The allegory in *The Pilgrim's Progress* by John Bunyan is a popular expression of this concept. ***See also*** Bethel; Feasts, Festivals, and Fasts; High Place; Passover, The; Shiloh; Via Dolorosa; Zarephath.

D.R.B.

pillars. **1** Vertical columns of wood or stone used as architectural members to hold up roof supports, whether in temples (1 Kings 7; Judg. 16:25–29), palaces (Esther 1:6), or houses, as archaeological evidence abundantly shows. They were set on firm bases or in sockets for stability and were capped by capitals sometimes elaborately decorated or carved. The two nonsupporting pillars erected at the front entrance of the Temple (1 Kings 7:15–22) were lavishly finished both in material and motifs. One possible function for these named items was that they were a Hebrew adaptation of Canaanite symbolism (see 3 below). Pillars could be solid, single-block columns, sometimes fluted, or composite columns built of drum cylinders fitted together in vertical alignment.

2 Memorials marking individual burials (Gen. 35:20, Jacob's memorial to Rachel at her grave), self-commemorations (2 Sam. 18:18, Absalom's monument to himself), or significant events (Gen. 28:22; 31:45; 35:14, aspects of Jacob's life), in some cases leading to shrine locations. Inscribed stelae commemorating historical events were used by Egyptian, Assyrian, Greek, and Roman forces and have been recovered at numerous locations in the Near East, e.g., the Nahr el-Kelb north of Beirut in Lebanon.

3 Sacred objects. The stone pillar representing the male deity and the lush tree or wooden post representing the female deity were standard parts of Canaanite Baalist shrine equipment. Their presence symbolized the sexual union of the gods necessary to allow agricultural fertility to continue from one year to the next. Israelite religion opposed this point of view vigorously in law (Exod. 23:24; Deut. 7:5; Lev. 26:1) and prophetic warning (Hos. 3:4; 10:2; Mic. 5:13), despite its somewhat popular appeal among the ordinary folk (Amos 2:7–8). The mysterious and uncertain nature of the two pillars in front of the Temple is due in part to the fact that such bisexual symbols would have had no place in a monotheistic theology.

Additional sacred pillars include the sacred tree at the shrine at Shechem (Judg. 9:6), parts of the tabernacle (Exod. 26:32), the altar at Bethel (Gen. 35:14), a special shrine in Egypt (Isa. 19:19), numerous sacred pillars in Egypt (Jer. 43:13, "obelisks"), and possibly the twelve-stone center at Gilgal (Josh. 4:129–24) and the one placed by Moses (Exod. 24:4) somewhere in the wilderness.

4 Meteorological or volcanic phenomena, such as the pillars of cloud or fire (Exod. 13:21) that guided Israel in the wilderness and marked the door of the tent of meeting (Exod. 33:9, 10; Deut.

31:15), experiences long remembered as acts of God's gracious love (Neh. 9:12–19; Ps. 99:7).

5 Symbols, often of strength or support. They supported the earth (1 Sam. 2:8; Ps. 75:3) or the heavens (Job 26:11). It was wished that daughters would be strong as corner pillars (Ps. 144:12). They supported the "house" of wisdom (Prov. 9:1), and Isaiah could describe people as mainstays of society with the term (Isa. 19:10), as Paul could similarly describe James, Cephas, and John in the reputations they enjoyed in the Church (Gal. 2:9). The church was the pillar of truth (1 Tim. 3:15). As an angel's legs could be described as "pillars of fire" (Rev. 10:1), so the pillar of salt could be remembered as a symbol of the folly of Lot's wife (Gen. 19:26).

6 Markers of various sorts. According to archaeological evidence from Palestine, pillars were used as boundary stones, menhirs, and milestones. The function of the still enigmatic dolmens (usually two slabs of rock capped by a horizontal slab) scattered in fields is still debated. R.S.B.

pillow, a headrest, whether made out of goat's hair (conjectural translation in 1 Sam. 19:13, 16) or another material such as stone (Gen. 28:11, 18). The KJV uses the term in Ezek. 13:18, 20 where the RSV has "magic bands," and the pillow (RSV: "cushion") on which Jesus slept in the boat (Mark 4:38) was probably a seat pad.

pim (pim), a weight averaging 7.8 grams in samples found. This makes it equal to three-fifths of a heavy shekel or seven-eighths of a light shekel. In 1 Sam. 13:21 it was the Philistine price for sharpening iron implements. ***See also*** Weights and Measures.

pin, a short, pointed shaft. A pin (Heb. *yathad*) is mentioned in Judg. 16:13–14, where it apparently designates the short, pointed stick used to beat up the weft in a loom (the Masoretic text is unclear and the Septuagint understands the term as a peg driven into the wall to secure the loom). The same Hebrew word is used elsewhere for a tent stake or peg (Judg. 4:21), including those used in erecting the tabernacle (Exod. 27:19, KJV: "pins"), a peg for hanging objects (Ezek. 15:3, KJV: "pin"), and a digging stick or spade (Deut. 23:13).

pine, a word used as both noun and verb in the OT. **1** A tree of the genus *Pinus* with straight-grained highly resinous wood, good for construction (Song of Sol. 1:17), shipfitting (Ezek. 27:6), reclamation (Isa. 41:19), decoration (Isa. 60:13), aromatics, and other products. **2** A verb meaning to fade away or dwindle (Lev. 26:16; 26:39; Isa. 24:16; Ezek. 24:23).

pipe. *See* Music.

Piram (pi´ruhm; Heb., "wild ass"?), the king of Jarmuth and one of the Amorite allies who attempted to stop Joshua at Gibeon (Josh. 10:3–11), only to be killed and hung (Josh. 10:22–26). Jarmuth is probably modern Khirbet Yarmuk about fifteen miles southwest of Jerusalem.

Pirathon (pihr´uh-thon), a town considered the home of Abdon, who was buried there (Judg. 12:15), and Benaiah, one of David's guards (2 Sam. 23:30; 1 Chron. 11:31; 27:14). It is probably modern Far'ata about five miles west and slightly south of Shechem.

Pisgah (piz´guh), a mountain in the area east of the Dead Sea. In the Bible "the top of Pisgah" is mentioned four times. In Num. 21:20, Pisgah, which looks down upon the desert, is located in the region of Moab. In Num. 23:14, Balak took Balaam to the field of Zophim, to the top of Pisgah, in the land of Moab. In Deut. 3:27 and 34:1 Moses went up from the plain of Moab to Mount Nebo, to the top of Pisgah, which is opposite Jericho, to view the land.

The "slopes of Pisgah" are also mentioned four times. In Deut. 3:17 and 4:49 the Sea of the Arabah, the Salt Sea, is "under the slopes of Pisgah" to the east. In Josh. 12:3 the territory of the Israelites, beyond the Jordan, is described in part as extending "to the sea of the Arabah, the Salt Sea, southward to the foot of the slopes of Pisgah," while in Josh. 13:20 the Reubenite territory includes "the slopes of Pisgah."

Most commentators identify Mount Pisgah with modern Ras es-Siyaghah, which is located to the east of the Dead Sea and northwest of Mount Nebo and separated from the latter by a saddle. ***See also*** Arabah; Balaam; Balak; Dead Sea; Jericho; Moab; Moses; Nebo. B.M.

Pishon (pi´shon), one of the rivers in the Garden of Eden (Gen. 2:11), but a minor one in the company of the Tigris and the Euphrates. There is no scholarly agreement on whether the reference in Genesis is to a river, or to a larger body of water, such as the Persian Gulf.

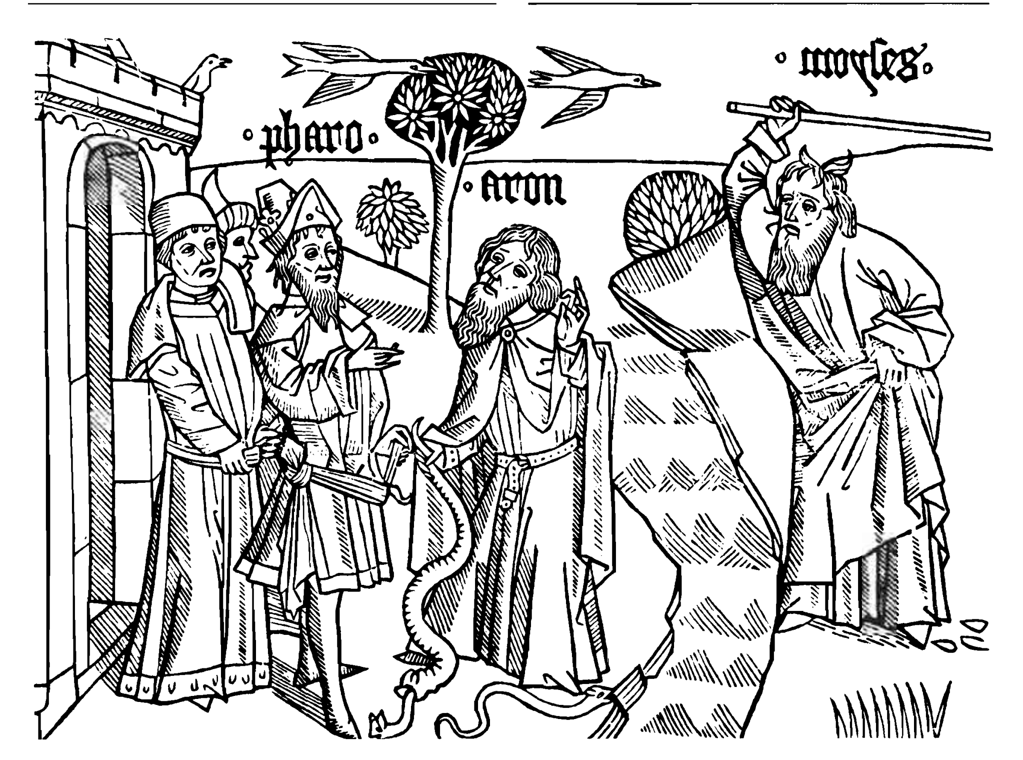
Pisidia (pi-sid´ee-uh), a mountainous region just north of Pamphylia in south-central Asia Minor which, in 25 B.C., became part of the Roman province of Galatia. Paul and Barnabas passed through this region twice during their first journey (Acts 13:14–51; 14:24) and were persecuted in its principal city, Antioch, where there was apparently a sizable Jewish community (Acts 13:14–15, 43–45). The inhabitants of these rugged mountain ranges, like the people in the plateau region of Lycaonia, were perhaps unaccustomed to innovative religious ideas, a fact that might account for their violent reactions to Paul and Barnabas (Acts 13:50; 14:5–20). ***See also*** Antioch, Galatia. M.K.M.

Pisidian Antioch (pi-sid´ee-uhn an´tee-ok). ***See*** Antioch of Pisidia.

pit, a term that translates a variety of Hebrew and Greek words for natural, crafted, or symbolic depressions in the earth. Included are bitumen pits (Gen. 14:10), traps used to kill deliberately (Gen. 37:22) or accidentally (Ps. 7:15), public hazards (Exod. 21:33), burials (2 Sam. 18:17), animal traps (or lairs? 2 Sam. 23:20), landmarks (2 Kings 10:14), the abode of the dead (Job 33:18), foundation trenches for construction (Mark 12:1), or a bottomless source of scourges and plagues (Rev. 9:1, 2; 11:7) and the destination of the Devil (Rev. 20:2).

Archaeological evidence of pits is frequently found. They include wells, cisterns, lined and unlined storage vaults, graves and shafts dug in soil or cut in rock, and modifications of natural caves for use as cisterns, dry storage, or animal and human shelter. Chalcolithic and some Early Bronze Age houses are partially pits in earth or stone built up with surrounding walls and roofs for shelter. R.S.B.

pitch, a brown-black, gummy, resinous, tarlike substance used for waterproofing and as an adhesive. Resinous pitches are derived from conifers such as pine. Tarlike mineral pitches can be derived from natural asphalt or bitumen deposits or as by-products of petroleum processing. The Dead Sea area provides natural deposits of asphalts. Moses' mother waterproofed the rush basket that she put him in and set upon the Nile by smearing it with pitch (Exod. 2:3). Pitches were used to waterproof boats as well, and in the Bible they provided caulking for Noah's ark (Gen. 6:14). The burning streams of pitch in Isa. 34:9 refer to the flammable properties of asphalt and bitumen. Pitches were also commonly used as adhesives for hafting tools and weapons, as well as for securing inlays. P.L.C.



pitcher, a ceramic, glass, or stone container, usually with a single vertical loop handle and a molded lip or inserted spout for pouring, the latter sometimes through a set of sieve holes in the vessel just above the pouring lip. Jeremiah was instructed to bring wine to the Rechabites in pitchers (Jer. 35:5), and a broken pitcher symbolizes death (Eccles. 12:6).

Pithom (pi´thom; from Egyptian *per-atum,* "house of Atum"), an Egyptian store city mentioned in Exod. 1:11 together with Raamses (and On, Septuagint). It was built by Israelite slave labor not long before the Exodus. Apparently the city contained a temple center of the creator god, Atum, of On-Heliopolis. The modern identification is uncertain. Many scholars locate Pithom at modern Tell el-Maskhuta in the eastern delta along the Wadi Tumilat, but confirmation is lacking. A location in the general area is likely because Ramesses II (1279–1213 B.C.), the pharaoh of the Exodus, and his predecessors undertook major building projects in the eastern delta and many people from the biblical lands were located there. ***See also*** Exodus; On; Raamses, Rameses. H.B.H.

pity, a quality due to which a person does some significant kindness to another in need, notably when that other has no right to the kindness and cannot repay it. The quality inheres in a person's eyes and/or heart (Deut. 7:16; 19:13, 21; Ps. 17:10) and is revealed by what a person does in behalf of others in need (e.g., Ps. 111:4–9; Mark 1:41; 8:2). One who acts out of pity is said to be compassionate or gracious. Such pity is a quality of God (Exod. 34:19; Rom. 9:15; Jon. 4:2; Pss. 103:8, 13; 111:4; James 5:11); its withdrawal is a sign of God's judgment (e.g., Jer. 13:14; Ezek. 5:11; 7:4, 9). It normally marks the behavior of fathers toward their children (Ps. 103:13; but see Ezek. 5:10). Prophets expect it of God's people in dealing with their less fortunate fellows and resident aliens (e.g., Zech. 7:8), and Jesus uses it as the touchstone of his picture of the final judgment (in Matt. 25:31–46). Pity is undoubtedly part and parcel of the care and concern for neighbor that Jesus sought (Matt. 5:43–47; Luke 6:27–28). ***See also*** Loving-kindness; Mercy. B.J.M.

plagues, infectious diseases occurring naturally or in punishment for sin, other calamities sent by God, or the ten plagues of Egypt. In Gen. 12:17, God strikes Pharaoh "with great plagues" because of Abram's wife. This isolated J (Yahwist source) usage foreshadows the punishments inflicted on Pharaoh and his country at the time of Moses. Rarely called plagues in Exodus (see 9:3, 14–15; 11:1, all attributed to the J source), they are mentioned only occasionally elsewhere (Deut. 28:60; 1 Sam. 4:8; Pss. 78:43–51; 105:27–36; 135:8–9; 136:10; cf. Amos 4:10; Hab. 3:5). In the Pentateuch, plague terms often describe punishment for Israel (Exod. 5:3; 30:12; Lev. 26:25; Num. 8:19; 14:12, 37; 17:11–15; 25:8–9, 18–19; 31:6; Deut. 28:21; 2:24; cf. Exod. 12:13). In Leviticus 13–14, Hebrew *nega'*

PLAGUES

Moses (right) turns Egypt's water into blood, the first of the ten plagues (Exod. 7:14–19), while Aaron (center) performs miracles; woodcut from the fifteenth-century Cologne Bible.

describes skin disease or rot in a house. Jeremiah and Ezekiel regularly threaten pestilence, sword, and famine as a threefold divine punishment. Elsewhere, plague terms occasionally describe disease or punishment for sin.

The ten plagues of Egypt (Exod. 7–12) represent a complex tradition whose origins can only be glimpsed. Popular retelling before and after the settlement in Canaan has given the stories a lively narrative force, as well as some duplication and exaggeration. The source division is disputed. J and P (Priestly source) shaped the narratives, and there were later additions; E (Elohist source) is not clearly represented in the plague stories, however, and may have had only the death of the firstborn (cf. Exod. 4:22–23). Also, a tradition of peaceful departure from Egypt (without plagues, but with gifts from the local populace) may underlie Exod. 3:21; 11:2–3; and 12:35–36.

As reconstructed, the J cycle may be seen to include eight episodes: Nile water turning foul (Exod. 7:14–17a, 18, 20a, 21a, 23–24); frogs swarming out of the Nile into living quarters (7:25–29; 8:4–11a; RSV, 7:25–8:4, 8–15a); flies on the Egyptians and their land, but not on the Israelites (8:20–32); a plague on the cattle of the Egyptians, but not on the cattle of the Israelites (9:1–7); thunder and hail to harm cattle in the fields (9:13–21, 23–25a, 26–30, 33–34); locusts to devour crops left after the hail (10:1–11, 13–19); darkness over the land of Egypt for three days, except where the Israelites lived (10:21–26, 28–29); and the death of all the Egyptian firstborn (11:1, 4–8; 12:29–32). If the plague on cattle is secondary within J (since it harmonizes awkwardly with the hail on cattle in the fields), the original J cycle would have had seven episodes.

The P cycle is now primarily a supplement that recasts J as a contest between Pharaoh and God. The staff that turned into a serpent, originally a sign to authenticate Moses before the people (4:1–5, from J), now begins a contest between Aaron and Pharaoh's magicians (7:8–13, from P), and the contest theme recurs several times. As reconstructed, P's contributions are: all Egypt's water, not just that in the Nile, is turned to blood, and the magicians produce the same effect (7:17b*g*, 19–20a*a*, 21b–22); frogs come up out of all Egypt's waters, not just the Nile, and the magicians also equal that (8:1–3, 11b; RSV vv. 5–7, 15b); the dust of the earth is turned to gnats on humans and animals in all the land, the magicians fail to reproduce that, and they acknowledge God's "finger" at work (8:16–19); ashes from the kiln are thrown into the air and cause boils breaking out in sores on humans and animals throughout all the land, and the magicians cannot stand before Moses because of the boils (9:8–12); hail is brought on all the land, upon

humans and animals and plants, and the magicians are not even mentioned (9:22, 25b, 35); and characteristic formulae are added to the episodes of locusts (10:12, 20) and darkness (10:27), as well as in conclusion (11:9–10). The death of the firstborn is moved outside P's contest cycle to come within the Passover description (12:12–13; cf. 12:17). Thus it inaugurates the actual deliverance from Egyptian bondage.

Outside of the Pentateuch, different versions of the plagues may be found in Psalms 78 and 105; and different traditions have also been preserved in such postbiblical authors as Josephus and Pseudo-Philo. ***See also*** Sources of the Pentateuch. K.G.O.

plains, areas of level land. In Palestine, a land of geographical contrasts, a plain takes on special significance. Fertility, possibilities of trade and conquest, and ease of travel are particular characteristics associated with broad valleys and tablelands.

The Plain of Megiddo or Esdraelon Plain is a fertile valley (Heb. *biq'âh,* 2 Chron. 35:22; Zech. 12:11) linking the coastal plain with the Jordan Valley; this was the main land route from Egypt to Damascus and the east. Megiddo guarded its western entrance, and Taanach and Jezreel were other towns on the plain that were the scenes of biblical events. The Song of Deborah places the defeat of the Canaanites near Taanach (Judg. 5:19), Jezreel was a royal residence during Ahab's kingship (1 Kings 21:1), and Josiah was killed in battle at Megiddo (2 Kings 23:29).

The Plain of Sharon was only eight to twelve miles wide along the Mediterranean coast, but during biblical times it was thick with forests of oak and swampy marshes; it was not fertile or productive.

North of the Plain of Sharon were several smaller plains along the coast: the Plain of Dor south of Mount Carmel, the Plain of Acco north of Carmel, and the Phoenician plain with its natural harbors at Tyre, Sidon, and Byblos. South of Sharon was the broad Philistine plain, which often defied Israelite control. The cities of the Philistine pentapolis were Ashdod, Askelon, Gaza, Gath, and Ekron, and their characteristic material culture can be traced eastward. Valleys in the hill country formed small plains such as those around Shechem and Dothan.

The Jordan Valley broadens out into a plain particularly around Jericho (Josh. 5:10; 2 Kings 25:5). The Hebrew word most often used to describe the Jordan plain is *'arābâh,* meaning "wilderness" or "desert plain." *'Arābâh* also describes the area east of the Dead Sea opposite Jericho, usually in reference to the "plain of Moab" (Num. 22:1; 33:48–50; Deut. 34:1; Josh. 13:32). These desolate areas were important in the desert wanderings and conquest narratives (Josh. 4:13) and for armies to pass through in their conquests (Jer. 39:5). The RSV often translates *'arābâh* as a proper name for the plain west of the Jordan River (Josh. 12:8; 2 Sam. 2:29), east of the river (Josh. 12:1), and on both sides (Josh. 11:2).

Five cities believed to be on the southeast shore of the Dead Sea (Sodom, Gomorrah, Admah, Zeboiim, and Zoar) have been known as the "Cities of the Plain" from the narratives of Lot (Gen. 13, 19) and the battle of the four kings against five in Genesis 14. The Hebrew word translated "plain" in the KJV is *kikkār,* meaning basically "round" or a "circle"; it probably refers in these passages to a round area or district. The RSV translates *kikkār* as "valley" (Gen. 13:10–12; 19:17, 25, 28). Recently excavations have been carried out near the southeast shores of the Dead Sea and the Bronze Age (after 3000 B.C.) occupation seems to be in the first ridge of foothills rather than down in the plain; "Cities of the Plain" or even "of the Valley" may be inaccurate translations. Perhaps *kikkār* refers to the cities around (but not in) the Dead Sea plain.

In the OT the Hebrew word *mîshôr* is used for plain or level place both literally (1 Kings 20:24; 2 Chron. 26:10) and figuratively (Ps. 27:11; Jer. 21:13; 28:8). When *mîshôr* refers to a particular plain, the RSV and NEB translate it "tableland" (the Medeba plain, Josh. 13:9, 16). Sharon, the name for the plain, may be derived from this Hebrew root. ***See also*** Esdraelon; Philistines; Sharon, The Plain of. N.L.L.

plaister, an archaic variant of the word "plaster" (KJV, Isa. 38:21).

plane, a tree of the genus *Platanus.* Biblical usage associates it with pine (Isa. 41:19; 60:13) and describes its use to control the appearance of offspring of animals (Gen. 30:37–39). Its symbolic value as beauty is also mentioned (Ezek. 31:8). *Platanus orientalis* is most likely a correct identification.

plants, trees, vines, shrubs, herbs, vegetables, flowers, fruits, or ornamental forms of life characterized by roots, a stem, and leaves or foliage equivalent. "To plant" identifies the action of placing either seeds, cuttings, or small samples of plants into soil so as to bring them to growth. Biblical usage includes both the noun and the verb in extended degree. This review does not exhaust the biblical uses but points to representative texts. Readers are referred to articles on specific trees, flowers, fruits, herbs, and other items for more exhaustive treatment.

The general disposition reflected in the Bible is that plants, like animal, marine, and other forms of life, are God's good gifts. As such they are to be cherished, used, enjoyed, shared, and processed for the good of all people (Gen. 1:29, 30; 2:8; 3:18). There are some plants that are special messengers of this blessing, such as a tree growing by water (Jer. 17:8; Ps. 1:3) or a rich vineyard (2 Kings 19:29; Prov.

31:16; Amos 9:14). Conversely, there are forms of judgment and curse that are described as deprivation of the normal benefits from plant life.

> . . . though you plant pleasant plants
> and set out slips of an alien god,
> though you make them grow on the day that you plant them,
> and make them blossom in the morning that you sow;
> yet the harvest will flee away
> in a day of grief and incurable pain.
> Isa. 17:10b–11

Overgrown, barren, and deserted sites are also used as metaphorical expressions of divine displeasure or judgment (Amos 4:9; 5:11).

Levitical law forbade early exploitation of fruit-bearing trees (Lev. 19:23), and it was forbidden to plant a tree as the religious symbol of the Canaanite fertility goddess Asherah (Deut. 16:21). Plants can symbolize weakness (2 Kings 19:26) or strength (Ps. 144:12), God's nourishment (Ps. 104:14) or his destruction (Isa. 40:24). A plant can symbolize the persistence of life (Job 14:7–9) or its temporary and unstable character (Job 8:12; Eccles. 2:4–7). Planting is seasonal action (Eccles. 3:2) but plants need sustained care to be productive (Isa. 5:1–4).

In the NT, various plants are used as metaphors for God's proper action (Matt. 15:13), all else being futile. They are a metaphor for life which tests the conduct of humans (Matt. 13:18–23). Planting is just one stage in the growth of the church (1 Cor. 3:6–8) whose life, as all of life, is a gift of God. R.S.B.

pledges. *See* Loan.

Pleiades (plee´uh-deez), a constellation that in the Bible is always mentioned with Orion. Astral phenomena played a large role in ancient knowledge and practice, constituting the unchanging cosmic order and governing times for human action. Orion and Pleiades are mentioned in two OT passages. In Amos 5:8, those who overturn the moral order (5:7; following astral cults?) will encounter One who, having ordered the times and seasons of light and darkness (5:8; cf. Gen. 1:3), but who caused water to flood the earth (5:8; cf. Gen. 6–9), will shine forth to destroy the strong wicked (5:9). Job 9:9 reflects Job's conviction, in view of his undeserved suffering, that the divine creation and manipulation of the order of the cosmos is unfathomably arbitrary and devoid of justice. In Job 38:31–33 God answers Job, challenging his interpretation of astral phenomena and reasserting the divine wisdom intrinsic to the divine governance of times and seasons of human experience. J.G.J.

plow, a farming implement used for breaking up the earth. Biblical texts include both literal and figurative use of the term. In the agricultural cycle of Palestine, plowing was a seasonal activity geared to preparation of the soil prior to planting. Practically, it could occur any time in the rainy season (October–April) or in the dry season before soil hardened too severely, the setting for some wry humor (Prov. 20:4; Isa. 28:24). While Israel's acquaintance with agriculture is attested early (Gen. 45:6), it was life in Canaan that forced them to adapt to local practices (1 Sam. 13:20) for the care and maintenance of plows and other equipment. The local charge of one pim for sharpening a plowshare indicates Israel's dependence on Canaanite neighbors to practice the craft. Primitive plows made of forked tree branches with metal points to dig into the earth are still sometimes used.

Figurative use of plowing includes its standing for marital abuse (Judg. 14:18), cultivating sin (Job 4:8), a national fate (Hos. 10:11), straightforward dedication (Luke 9:62), legitimate hope for compensation (1 Cor. 9:10), the absurdity of injustice (Amos 6:12), the aggravation of enemies (Ps. 129:3), destruction (Jer. 26:18; Mic. 3:12), and the hoped-for time of peace (Isa. 2:4; Joel 3:10; Mic. 4:3). Except for recognition of uneven (therefore unfair and certainly awkward) pulling power, it is not clear why Israel's law prohibited plowing with mixed teams (Deut. 22:10). In some texts the "plowman" is teamed with vinedressers as a euphemism for farmers (2 Kings 25:12; Isa. 61:5; Jer. 52:16). ***See also*** Pim. R.S.B.

plowshare, a sharp iron blade attached to the beam of a plow. Lacking rudimentary iron technology, Israelites of the early monarchical period (ca. 1020–1000 B.C.) took plowshares for sharpening to the Philistines (1 Sam. 13:19–23). As instruments that can only be used in times of peace, they are contrasted to swords, also made of iron, which are instruments of war; turning swords into plowshares demonstrates peace (Isa. 2:4; Mic. 4:3). In Joel 3:10 the process is reversed, however.

plumb line, a length of string or light rope with a weight (Lat. *plumbum,* "lead") attached at one end that, when suspended by the other end, will show a true vertical line. It is used in the construction of any object that needs to be vertically true, such as a wall of a building or a fence. Amos sees the Lord with a plumb line in his hand, which he is using to test Israel. As a result of that test, Israel, for failing to be "plumb" with God, will be destroyed (Amos 7:7–9).

pods (KJV: "husks"), probably the fruit of the carob or locust tree, common in Syria, Palestine, and Egypt. When ripe, these pods are filled with a dark honeylike syrup. They were then

collected, ground up, and fed to animals. They were also eaten by the very poor (cf. Luke 15:16). Since it is possible that the locusts eaten by John the Baptist (Matt. 3:4) refer to this plant rather than to the insect, these pods are also called St. John's Bread.

poetry, imaginative writing characterized by vivid language and patterned arrangement of material, often in keeping with a fixed meter or other prosodic feature. In the Hebrew Bible, songs, prayers, proverbs, oracles, and other lofty pronouncements have been identified as "poetry," although, interestingly, there does not appear to be any one biblical term that corresponds to our word poetry.

Form: The characteristic feature of this style is a brief, two-part sentence whose second part typically reasserts, strengthens, or otherwise completes what was said in the first: "Happy the man who fears the Lord, who greatly delights in his commandments" (Ps. 112:1). The effect of this sentence form is to provide the whole with a feeling of closure and completeness: just as, in poetry, a rhyme can pull things together and give a couplet a final "click," so the second part of such a sentence, strengthening and finishing off the first, marks it as complete and polished. The sentence gains an elegant and sometimes emphatic or epigrammatic quality.

While speaking or writing in this sentence form is certainly less demanding than, say, composing rhymed couplets in English or dactyllic hexameter in Latin, there is nonetheless much room for artistry and skill in meeting its requirements. Great variety is observable in the relationship between the two (or, rarely, three) parts of these sentences. Sometimes the second part seems little more than saying the same thing twice in different words, an emphatic restatement ("let me praise the Lord in my life, let me sing of my God while I live," Ps. 146:2); more often, it carries the first part further, completes it, supplies some grammatically or semantically necessary conclusion ("Since *X* . . . then *Y* . . . " "By day . . . by night . . . "), or otherwise seems to polish things off. Especially in wise sayings such as those in the book of Proverbs, this two-part sentence can function almost like a riddle: the listener is invited to figure out the relation between the first and second parts. Such, for example, is the statement in Eccles. 7:1: "Better a name than precious oil, and the day of death, than the day of one's birth." Everyone would agree that a person's good name is a more precious commodity than any actual possession, even precious oil; but the day of birth is almost always a happy occasion, and death almost always a time for mourning—so in what sense is the latter "better"? The point of this saying seems to be that the human body, like precious oil, is perishable; eventually it must spoil and die. A good name, however, is quite the opposite: it takes a lifetime to build, but once completed, i.e., on the day of a person's death, it is immutable, imperishable. Thus, the proverb seems to be arguing, just as a name is better than precious oil, so is the day of one's death, when the building of a name is finally complete, better than the day of one's birth, when that process is only beginning.

Effects of the Two-Part Form: Although scholars have long been aware of the feeling of regularity and heightened eloquence created by this style, they have had some difficulty in describing its workings. In antiquity, Josephus, and later Eusebius, Jerome, and others, asserted that biblical songs were written in quantitative meters, just like Greek or Latin verse—in fact, in the same meters as these! It was not until the Renaissance that Western scholars began to realize that this assertion was false (and of apologetic intent); yet even afterward, scholars have intermittently continued to search for some other sort of metrical system underlying these sentences—accentual, syllabic, "word rhythm," and so forth. In truth none of the systems proposed can be made to work consistently, for the regularity is only approximate—they are usually two or three or four words per part, but there is some room for exceptions. It seems that an approximate and intermittent regularity was all that this style demanded.

One contributing factor to the regularity is the extraordinary terseness and compression characteristic of this style. Utterances framed in it frequently dispense with such features as the Hebrew definite article *ha-*, the relative *asher* ("which" or "that"), and other common signposts of ordinary discourse. More generally, it is this same principle of terseness that holds clauses down to three or four words, allowing complex thoughts and images to develop only within the confines of these brief, two-part assertions strung one after the next. Thus, where an English-speaking orator might have said, "Listen, O Heaven and Earth, as I speak words which, like the rain and dew sent from above to nourish fertile fields, may prove fructifying to those whom I hereby admonish. . . ," Moses begins his farewell in Deut. 32 in these balancing clauses:

> Give ear, Heaven, as I speak, and let the Earth hear my words. Let my speech flow down like rain, my discourse distil like dew—like showers upon grain-fields, or raindrops on the grass.

Parallelism: The attempt to pin down the workings of this style eventually led the eighteenth-century biblical scholar Robert Lowth to coin the term *parallelismus membrorum* ("the parallelism of the clauses"), and since then "parallelism" generally has enjoyed wide popularity as an explanation of the principle underlying this style. Of late, however, this approach has been seriously questioned. For while some form of paralleling, in meaning or

syntax, can be shown to characterize quite a few of the two-part sentences involved, far too many exceptions exist to allow paralleling to be accepted as the generative force behind all such sentences. Moreover, it is clear that the term "parallelism" has been used extremely loosely by biblical scholars. Almost no series of consecutive sentences (in the Bible or anywhere else) can be shown to be utterly devoid of some form of parallelism, so that finding instances of parallelism in this style, in whatever muted or obscure form, proves very little. Moreover, the notion of "parallelism" has occasionally served to group together various very different features and thus cover over important distinctions. Surprisingly, "parallelism" has been used to label such phenomena as actual repetition, for example, or numerical ("Three things . . . four things . . . ") or other sequences.

Contemporary scholars have shown that the "principle of parallelism" is really a bit of shorthand for a complex of phenomena: various forms of ellipsis, especially of subject or verb in the second part (called "gapping" by one writer), and a whole range of semantic equivalences and associations. The basic principle underlying this style might thus better be described simply as "seconding" or "extending," the process of following up the typically short, spare assertion of Part A with another, subjoined one in Part B: "A is so, and what's more, B"; "Not only A, but B"; "Not A, and certainly not B"; "First A happened, then B"; "If A . . . , then B . . . "; and so forth. This form, so frequently emphatic (as many of the above examples imply), was sometimes abstracted to include almost any sequence of two or three short clauses. The basic requirement seems only to have been that parts A and B be (syntactically) separated, so that the pause between them be maintained; and that B identify itself, semantically and/or syntactically, as A's completion rather than the start of a wholly new thought. It is the necessity of maintaining this delicate balance, i.e., of keeping A and B divided yet related, that generates the frequent recourse to repetition, apposition, ellipsis of subject or verb, word pairs, and other manifestations of "parallelism."

Poetry Versus Prose: A particularly vexing problem for scholars has been that of distinguishing biblical "poetry" from "prose." Neither of these terms, derived from other literary traditions, has an equivalent in biblical Hebrew, and there is no evidence that ancient Israelites divided their literary corpus into these two camps. Obviously, these terse, two-part sentences were favored for some types of compositions (songs, proverbs, etc.), where they were used with great consistency; but the same sentence form can frequently be found here and there in ordinary narratives, particularly in dialogue, as well as in legal material, blessings and curses, oracles and prayers. Moreover, in various prophetic books, this terse, binary style seems now and again to slip into a looser and less easily identified idiom; it is often hard to say where "poetry" ends and "prose" begins. Even in the Psalms, the contrast between the clipped, binary style of, say, Psalm 94 and the looser style of Psalms 23, 35, and 122 is striking. Some scholars have used statistical analyses (of, for example, the relative presence or absence of the definite article and other signs of a lack of terseness) in order to help distinguish poetry from prose in the Bible. But at present this remains a crude tool (the Song of Solomon, for example, ends up in the "prose" camp by such a measurement!), perhaps inevitably so. As one recent writer remarked, "the distinction is often quantitative rather than qualitative, and in terms of degree rather than kind."

Historically, this distinction between biblical poetry and prose was at first wholly dependent on literary genre: those compositions that, if they had been written in Latin or Greek, would have been composed in verse were declared by early biblical commentators to be the Bible's "poetry"—the Psalms, for example, or various songs such as the hymn of the Israelites at the Red Sea (Exod. 15), or the songs of Moses (Deut. 32), Deborah (Judg. 5), and David (2 Sam. 22), as well as Job, Lamentations, and other books. Prophetic books were held to be "prose," at least until the scholar Robert Lowth forcefully argued their structural similarity to psalms and songs on the basis of their "parallelism." Nowadays the term "poetry" is still used to refer to those parts of the Bible in which the terse, "seconding" style is most apparent (especially Psalms, Proverbs, Job, Song of Solomon, Lamentations, Ecclesiastes, much of the prophetic corpus, and individual songs, oracles, etc., found in biblical narrative); but there is an increasing awareness that in biblical Hebrew even more than in other languages, the precise distinction between poetry and prose is difficult to draw.

The NT contains a few fragments of poetic lines cited from classical Greek poets (Acts 17:28, citing from Aratus, *Phaenomena* 5; 1 Cor. 15:33, perhaps from Menander, *Thais;* Titus 1:12, from Callimachus, *Hymn to Zeus*). These classical poets wrote in the formal meters of ancient Greek verse. Elsewhere in the NT, however, the "poetry" evinced is of a piece with earlier Hebrew Bible models, and such passages as the Lord's Prayer (Matt. 6:9–13; Luke 11:2–4) or the Magnificat (Luke 1:46–55) seem to conform to the same principles of composition as the prayers and hymns of an earlier day.

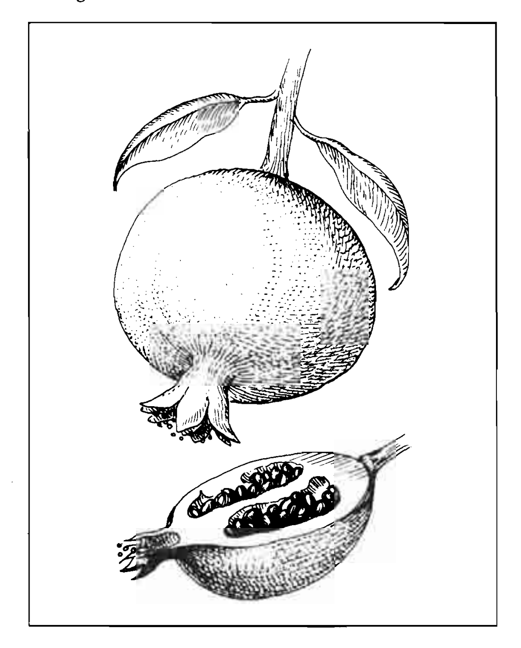
polytheism (pol´ee-thee-iz´uhm), the belief in the existence of numerous gods. In the environment of the Bible most societies were polytheistic: there were "many gods and many lords" (1 Cor. 8:5). Different deities had different functions, associations, characters, and mythologies. Some were male, some female, and they had individual personal names. They might be grouped in families and generations; the younger gods might overcome and displace the older. Theomachy, war among the gods, could have an important role, not least in creation stories: a younger god defeated an older, monstrous deity and from its body fashioned the world. The variety among the gods did not exclude elements of rank and leadership; but leadership did not always mean complete supremacy.



Polytheistic religions are known in detail from ancient Egypt, Mesopotamia, Greece, and Rome; particularly relevant for the OT is the Canaanite polytheism of Ugarit (cf. also the later evidence of Philo of Byblos [ca. A.D. 63–141]), in which occur divine names known also from the Bible: El, Elyon, Baal, Anath, Athirat (cf. Heb. *Asherah*), Dagon. This Canaanite mythology stressed the elements of conflict, sexuality, fecundity, the mountain of the gods, and the building of the palace.

The OT from early times opposed the entire ethos of polytheism and its mythologies. Certain echoes of it continue in the various names for God, perhaps in the plural form *Elohim* (Heb., "God"), in the concept of the "sons of God" or court of heavenly beings, in the imagery of battles with hostile superhuman powers, in the occasional recognition that another land is the sphere of another god. But for Israel there was only one God, and sole devotion to this one God was a paramount essential: to follow or serve "other gods" was a cardinal offense, emphasized particularly in Deuteronomy and in Isaiah 40–55. It is repeatedly stated, however, that large groups of Israelites committed this offense; perhaps not so many really did so. Polemic against polytheism was partly an internal argument among the Israelites: it reinforced the theology and the ethical demands of the God of Israel. Finally hostility to polytheism tends to become caricature and ridicule: it ceases to include any real analysis of polytheism or any profound understanding of its workings or its attractions. Rejection of it became a standard constituent of Jewish life and it ceased to form a real temptation for many Jews.

The NT follows this tradition in taking for granted the established monotheism of Judaism. Its reserve in using the term "God" or even "Son of God" of Jesus is part of this; later sources and later text forms use "God" of him rather more. The NT does not depict Jewish opponents as criticizing Christianity for reintroducing polytheism. In the Greco-Roman world Christianity largely followed the lines of established Jewish apologetic, dismissing the absurdities of polytheism, linking it with moral depravities, and affirming the oneness of true deity as background to the Christian affirmations. In all the ancient world the primary choice was not that between a God and no God, but that between one God and many gods. ***See also*** Monotheism. J.B.

pomegranate (*Punica granatum*), a small tree whose bright red fruit resembles an apple. Its hard shiny rind encloses a pulp of fleshy seeds, the juice of which is especially refreshing in a hot environment (Song of Sol. 8:2; Deut. 8:8). The beautiful round fruit was a common decorative motif used on the hems of the robes of the Temple priests (Exod. 28:33–34) and carved

Pomegranate.

into the timbers and beams of Solomon's Temple (1 Kings 7:18, 20). Extract of the rind was used medicinally and as a red dye, as well as in tanning leather. The pomegranate was regarded as a symbol of fertility and eternal life. P.L.C.

Pontius Pilate. *See* Pilate, Pontius.

Pontus (pon'tuhs), a Greek word meaning "sea," often used without further modification to identify the Black Sea. In NT times it commonly referred to a province of Asia Minor stretching along the south shore of the Black Sea from Bithynia to Armenia. According to Philo, a first-century Jewish author, Jews lived throughout Pontus. Acts says Jewish pilgrims from that province were heard speaking in tongues at Pentecost (2:9). Acts 18:2 mentions a Jewish native of Pontus named Aquila who, with his wife Priscilla, left Rome during Claudius's eviction of Jews, and met Paul in Corinth. The NT mentions no mission to Pontus, though 1 Pet. 1:1 addresses Christians there. Later traditions attribute its evangelization to Peter or Andrew. By A.D. 100 the Christian movement had caused social unrest throughout the province. The father of Marcion, a second-century sectarian leader, apparently was bishop of the Pontic city Sinope. D.R.M.

pool. *See* Cisterns; Reservoir; Solomon's Pools; Water.

poor, lacking in material or spiritual goods. Poverty, the state of being poor, is mentioned in two ways in Scripture. In the secondary way, encountered primarily in Proverbs, poverty is the consequence of moral lassitude, especially laziness (Prov. 13:18; 20:13). In the primary sense, however, when the poor are encountered in their need or treated as a group, their situation is understood not as a consequence of personal failings but as a result of social factors, particularly injustice (Prov. 13:23).

The view of the poor is revealed in the chief Hebrew terms for the poor, which address them as needy, without power, and abused by those with greater power. Leviticus defines the poor as those who are lowly because their "power [lit., hand] wavers" (25:35) or is insufficient (14:21). They do not have the capacity to provide for themselves the essentials of life. Their deficiency in life-supporting power is understood to exist in relation to the rest of the community, represented by the phrase "with you," repeated twice in 25:35 (cf. "beside you" in v. 36); that is, their crisis is based in the network of power relationships that form society.

Behind such poverty lies economic conflict (Eccles. 4:1). The intensity of the conflict is reflected in the prevalence of slavery (Neh. 7:66–67; Exod. 20:17), since slavery was the lot of the losers in the economic struggle (2 Kings 4:1; Amos 2:6–7; 8:4–6). The condition of the wage earners, vulnerable because they were cut off from a reliable relationship to the land, was as bad (Job 7:1–2) or worse (Deut. 15:16–17).

The extent of poverty increased to a new level in the time of the eighth-century B.C. prophets Amos, Isaiah, and Micah. Economic conditions in the preceding two centuries had produced a commercial and landed aristocracy. Inequities increased and the new elite was able to exploit the poor through sharecropping arrangements (Isa. 3:14–15). Through foreclosures, land became concentrated in fewer hands (Isa. 5:8). The peasants lost their patrimonies in the land (Mic. 2:1–2). From the standpoint of one of the prophets, a whole class was being wiped out (Amos 8:4).

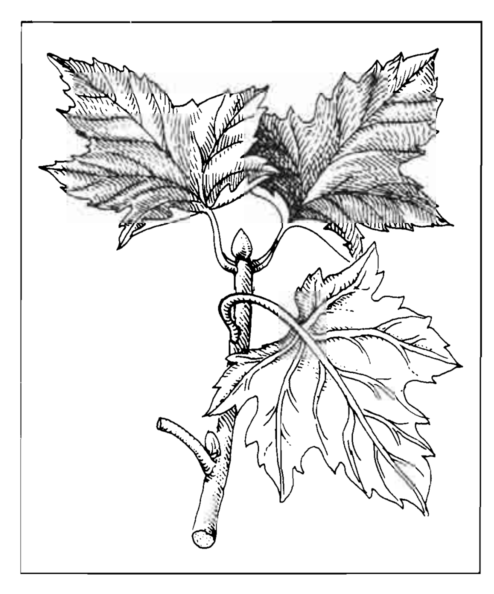
Responsibility to the Poor: The responsibility of redressing the plight of the poor is fundamental to biblical faith. At the basis is the nature of God as one who hears the cries of the poor (Ps. 12:5). The deliverance from Egypt is presented as the great exemplar of God's justice to the needy (Ps. 68:5–10; Exod. 2:23–24). As their dilemma is grounded in injustice, their need is for justice (Isa. 10:2). As their condition is loss of power, the response required is empowerment. A literal rendering of "you shall maintain him" in Lev. 25:35 is, "you shall make them strong." This demand is extended outside the chosen people, for almost the same wording is used in condemning Sodom, which did not "make strong the power [hand] of the poor and needy" (Ezek. 16:49).

In the law attention is given to social structures that affect the poor. The land is to be left fallow every seventh year "that the poor . . . may eat" (Exod. 23:11). In this year the landed means of production are to be given over in their entirety to the poor and the debts of the poor are to be cancelled (Deut. 15:2). That the landless poor have rights in the land is also supported in their claim to immediate sustenance from the fields (Deut. 23:24–25) and in restrictions on reaping and gleaning so that some harvest is left to them (Lev. 19:9–10). The law also restricts the processes that tear people down. The empowering in Lev. 25 includes a proscription of interest on loans intended to relieve the distress of the recipient (23:36–37). A collateral (pledge) is prohibited if it were one that would further weaken the debtor (Deut. 24:6) or cause the debtor to suffer (Exod. 22:26).

Finally, there is to be open-handed sharing with the poor. Jesus' statement that "You always have the poor with you" (Mark 14:7) is a citation of the strong command on giving to the poor in Deut. 15:11 and a reminder of the permanence of this obligation, one also commanded by Jesus (Luke 12:33).

The ideal for the ruler is to be one who fully assumes the responsibility of delivering the poor and crushing their oppressors (Ps. 72:4). It is part of the messianic expectation (Isa. 11:4)

seen fulfilled in Jesus (Luke 1:52–53; 4:18–21). The hope for "good news proclaimed to the poor" (Luke 4:18; 7:22) was ancient (Ps. 68:10–11; Isa. 29:18–19; 35:4–6). The beatitude concerning the poor in Luke emphasizes God's siding with the poor against their afflictors (6:20, 24). In Matt. 5:3 "the poor in spirit" are those who have the attitude of dependence upon God associated with poverty (cf. Zeph. 2:3; 3:11–13).



A major concern of Paul was to make a collection for the poor (Rom. 15:26) in Jerusalem (2 Cor. 8–9). His purpose was "that there may be equality" (2 Cor. 8:13–15). ***See also*** Justice; Ownership; Wealth.

Poplar (*Populus alba*).

poplar, a tree of the genus *Populus.* Probably the white poplar (*Populus alba*) or the storax (*Styrax officinalis*) is the tree mentioned in Gen. 30:37, where its color is of consequence. It grew in groves with other trees (Hos. 4:13) and symbolized solid life (Hos. 14:5).

porch, or vestibule. **1** A forecourt or central court of a house (1 Kings 7:6; Mark 14:68) or the pillared hall on a flat roof (Judg. 3:23). Private homes during the Greco-Roman period often had porches that opened onto the street just outside the front door. **2** A colonnaded portico or passageway, often part of a public building or temple (e.g., the stoa at Athens; Solomon's portico). These frequently provided shelter for travelers or those in ill health (John 5:2) and a forum for religious and philosophical discussions (Acts 17:16–32). **3** An area of the throne from which the king of Israel pronounced judgment (1 Kings 7:6–7).

Porch, Solomon's. ***See*** Solomon's Portico.

porcupine. ***See*** Hedgehog.

porter (gatekeeper, doorkeeper, watchman), term used in the KJV for various officers: guardians of city gates (e.g., 2 Sam. 18:26; Ezra 7:24); of private houses (Mark 13:34); and of a sheepfold (John 10:3). The Temple officers so described appear as a subgroup of the Levites (1 Chron. 23:3–5; cf. Ezra 2:40–42; Neh. 7:43–45).

Portico, Solomon's. ***See*** Solomon's Portico.

post. 1 A vertical beam, usually of wood, that served as part of a frame from which a door or a gate was hung. When Samson took revenge on the Gazites he carried off not only the gate but the posts as well (Judg. 16:3), thus leaving the town defenseless until they could be replaced. One not permitted entry could stand at the gatepost and observe what occurred inside (Ezek. 46:2). **2** The position occupied by persons in pursuit of their duties, whether king (1 Kings 20:24), priest (2 Chron. 7:6), or watchman (Isa. 21:8).

postexilic period, the time following the Babylonian exile of Israel (587–539 B.C.). The period began with the conquering of Babylon by the Persians and Cyrus's toleration of diverse religions. This moderate and enlightened practice led to the restoration of the Jewish community in Palestine (cf. Ezra 1:2–4; 6:3–5). Among the most prominent literature from this period is Isaiah 40–66, Haggai, Zechariah 1–8, Ezra, and Nehemiah. While the term "postexilic" can refer more generally to the time up until the end of the "OT period" when contrasted with "pre-exilic" and "exilic," it may best be limited to the restoration extending through the fifth century B.C. The current tendency to discuss the Exile and restoration together presents a more enriching understanding. ***See also*** Exile. K.H.R.

Potiphar (pot´uh-fuhr; Egyptian, "he whom Re has given"), an official of Pharaoh and captain of the guard who purchased the patriarch Joseph in Egypt from some Midianite (Ishmaelite) merchants who had themselves purchased him from his brothers (Gen. 37:36; 39:1). Potiphar recognized Joseph's special talents but cast him into

prison because of a false accusation by Potiphar's wife (Gen. 39:6–20). ***See also*** Joseph; Potiphera.

Potiphera (puh-ti´fuh-ruh; KJV: "Potipherah"; Egyptian, "he whom Re has given"), a priest of On whose daughter, Asenath, was given in marriage to Joseph by Pharaoh (Gen. 41:45, 50; 46:20). As priest of On, center of the cult of the sun god Re, Potiphera would have been an important person. The priests of On engaged in a wide variety of commercial, political, and cultic duties. ***See also*** Asenath; Joseph; On; Re.

potsherd. ***See*** Pottery.

pottage (lit., "boiled thing"), a soup or stew made with lentils (Gen. 25:34) or herbs (2 Kings 4:39), sometimes with meat. It was used to nurture Elisha (2 Kings 4:38–41) and was used by Jacob to get Esau's birthright (Gen. 25:29–34). When eaten with bread (Gen. 25:34) and beverage it comprised a full meal.

potter. ***See*** Pottery.

Potter's Field, a tract of land near Jerusalem, used to bury strangers. It is identified in Matt. 27:1–10 with the Field of Blood (Akeldama in Acts 1:18–19), a term associated with the money paid to Judas for betraying Jesus. The quotation erroneously attributed to Jeremiah in Matt. 27:9–10 is from Zech. 11:12–13 (cf., however, Jer. 18:1–3; 32:6–15), but altered to fit Christian legends concerning Judas's end.

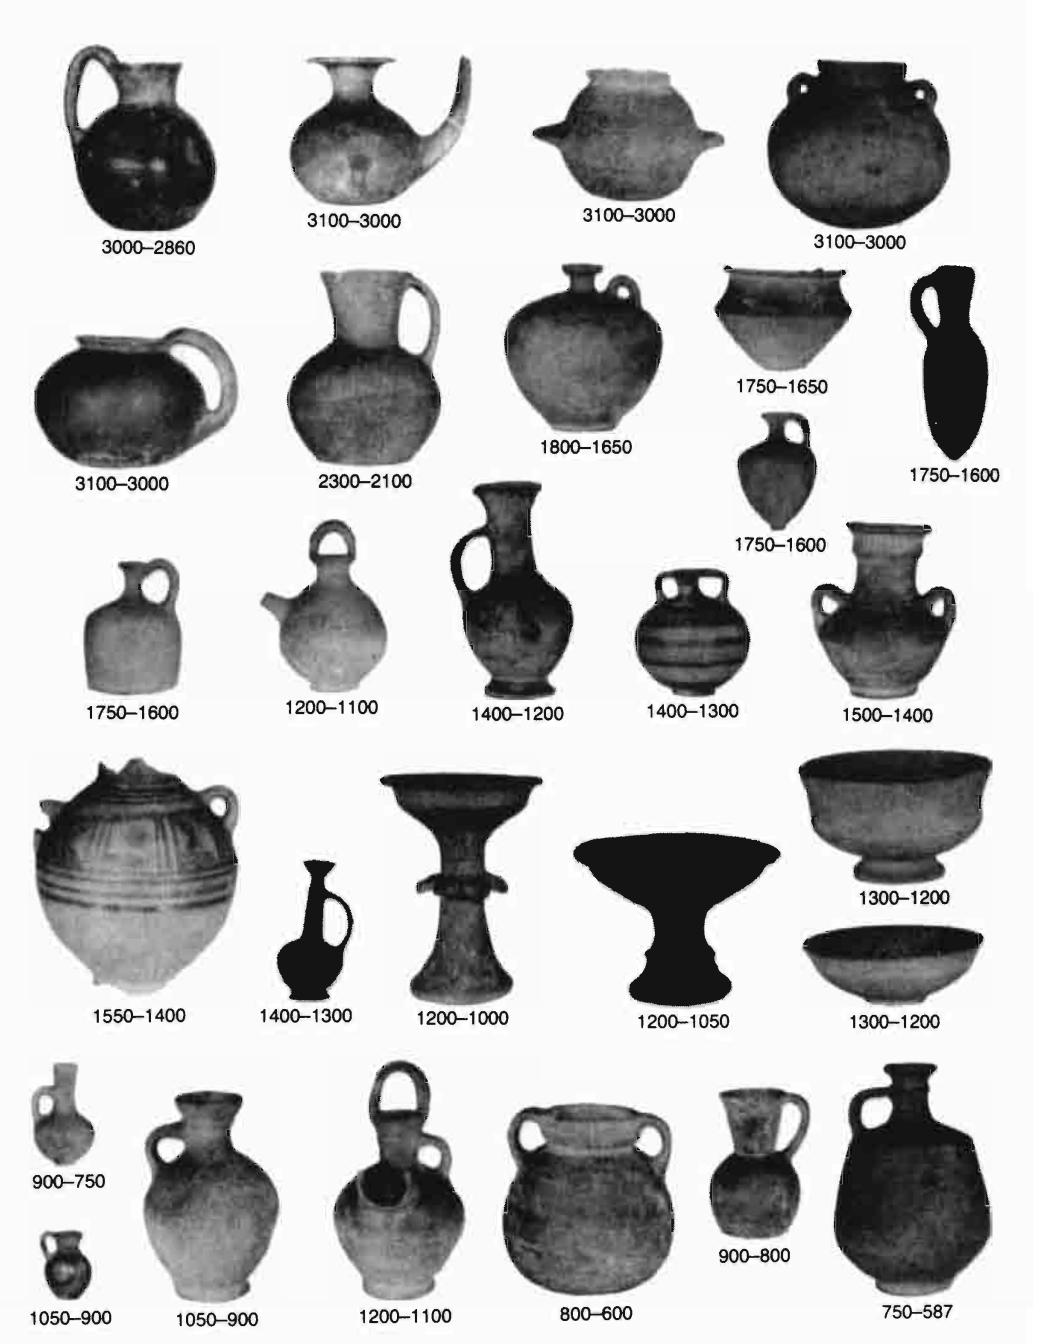
Since the fourth century, the field has been identified with a location near the confluence of the Hinnom and Kidron valleys. Early pilgrims located Akeldama south of Mount Zion on the far side of the Hinnom Valley, corresponding to the site today just north of St. Onuphrius's Monastery. Still visible are tombs from a Jewish necropolis and ruins of a medieval burial vault for pilgrims. ***See also*** Akeldama; Judas. C.H.M.

potter's wheel. ***See*** Pottery.

Pottery

POTTERY IS MADE FROM CLAY and hardened by fire. One who makes pottery is a potter, and the art of pottery making is ceramics.

The Significance of Pottery for Biblical History: Clay has two distinctive traits: it can be fashioned into a particular shape and can retain that shape; when it is fired at a temperature of 700–900 degrees Fahrenheit, it undergoes chemical changes that harden the shape and render it almost impervious to decay or corrosion (although it can be broken by impact).



Parthian twisted-handled amphora (second–fourth century A.D.).

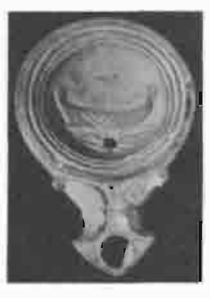
Because of these characteristics, pottery has become an indispensable tool of archaeologists as they seek to reconstruct the history of the biblical lands. In contrast to Egypt and Mesopotamia, Palestine has preserved few stone monuments that record its past and relatively few inscriptions. On the other hand, potsherds, broken bits of ancient pottery, are found in abundance wherever biblical peoples and their predecessors settled. A common pattern of settlement was to build a new city on the ruins of one that had been destroyed. A *tell,* the mound that results from the accumulated layers of the remains of cities, is eloquently described in Josh. 8:28: "So Joshua burned Ai, and made it forever a heap of ruins, as it is to this day." Buried within the tells of Palestine the broken remnants of the everyday utensils and objects of each successive generation lay unnoticed for their historical importance until 1890, when William Flinders Petrie conducted the first excavation of a tell in Palestine at Tell el-Hesi.

Petrie recognized that pottery unearthed and understood in the light of its proper sequence had enormous chronological value for dating successive occupation layers and thus the other artifacts and architectural features contained within them. This is because the styles and methods of manufacture of pots changed over the centuries, sometimes rapidly, sometimes very slowly. Bases were rounded, flattened, or elongated; handles altered their shape and their point or manner of attachment; variations on rims—wide, narrow, turned-in, turned-out—were almost limitless. If the form of the pottery associated with a particular period could be established, then a simple piece of rim, base, or handle made in this form could be dated. Thousands of whole pots have been found in the tombs from various periods, contributing greatly to the identification of pottery forms. Petrie was able to use his knowledge of pottery from dated Egyptian tombs to suggest dates for comparable wares at Hesi, thus introducing the principle of cross-dating to turn a relative chronology into an approximate absolute chronology. Since this pioneer contribution, the pottery unearthed in the course of every excavation has been the object of critical examination and study, resulting in continuous progress in the identification and dating of pottery forms.

In recent times this emphasis on the changing shape of pottery as a gauge of passing time or new developments has been broadened so as to exploit more fully the cultural significance of the ceramic evidence.

A selection of pottery vessels from the Early Bronze through the Iron II periods in Palestine. The years (all B.C.) below each vessel refer to the approximate date-range of construction.

Pottery industries are now being carefully studied as excellent indicators of the technological achievement and economic structure of any one period. Scientific techniques of examination, such as petrographic and spectrographic analysis, are being applied to thin sections of potsherds to determine the mineral content and composition of the clays and, if possible, their geological source. Furthermore, surface surveys of the broader landscape of which the tells were always an integral part have become a regular feature of archaeological endeavor. In order to provide a fuller picture of the complex political, social, and economic occupational history of the whole land, specialists collect and analyze potsherds from every period which have gradually been exposed on the surface of the soil either through erosion or human activity. Their studies indicate that there were marked regional variations in the pottery forms of any given period.



Early Bronze Age (3200–2100 B.C.) pottery from Tell Halif has distinctive markings made by the potter, perhaps a personal signature or designation of the customer.

Manufacturing Techniques: The clay used by the potter in the biblical lands was an earthen clay usually found in the immediate vicinity. It was combined with nonplastic grit and mixed with water. When it had attained the desired consistency, the water was removed, leaving the clay bed or batch. It then had to be de-aired or wedged to prevent air pockets from building up and shattering the fired ware. A common method employed was treading by the feet (see Isa. 41:25).

Evidence indicates that the earliest vessels were shaped by hand in a variety of ways. One was by molding. Clay was pressed around the inside of a basket which was then consumed in the firing process, leaving the finished pot. Some small vessels were formed by holding a lump of clay in the palm of one hand while pinching it into the desired shape with the other—the "pinch-pot." Large square or oblong vessels were fashioned from flat slabs of clay joined together with slip (clay diluted with water). Sometimes long rolls of clay were coiled in a circle around a base, layer upon layer, until the desired height and shape were achieved; the walls of the vessel were then thinned and smoothed.

It is impossible to say where and when the potter's wheel was introduced, but it clearly revolutionized the pottery industry. All pots had to be turned or moved in the making, and a wheel greatly facilitated this effort. The earliest form was the tournette, or slow wheel, of which many examples have been found in Palestine. A typical tournette consisted of a lower thick-walled stone bowl that had a conical depression in the center and an upper stone bowl with a flat upper surface and a lower conical projection that fit into the depression. This type of wheel, topped by a turntable, was rotated either by hand or foot and was probably lubricated with olive oil. On the basis of archaeological evidence, we can conclude that the tournette probably remained in use throughout the Israelite period. The fast wheel, introduced later, consisted of a shaft with a horizontal disk on top and a heavy wheel that was turned with the feet until the proper momentum was achieved. A lump of clay was thrown onto the disk with great force so that it would stick, the form was opened with the hand, and the sidewalls drawn up to the desired height, thickness, and shape. A number of small vessels might be made from one large lump of clay, each one being cut off from the top of the column as it was finished. Larger, more sophisticated pieces were often made in segments and later joined together with slip. This was a common practice for adding necks, handles, and spouts as well.

An oil lamp from the first century B.C.–first century A.D. depicts a Roman galley.

Newly shaped articles were allowed to dry slowly in the atmosphere until they reached the stage of leatherlike hardness. The earliest vessels were sun-dried but not fired and could only be used for storing dry materials. If they were filled with water, they would absorb it, become soft, and eventually collapse. In the early 1960s excavations at a Neolithic settlement at Çatal Hüyük revealed a variety of such unbaked earthenware estimated to date to ca. 6750 B.C. The earliest examples of true pottery, fired clay, in Palestine appeared in Jericho in the late sixth millennium. Although there is no precise evidence concerning the firing techniques in ancient Israel, extrapolation from contemporary Near Eastern methods has proved helpful. In early times pots were simply stacked in a shallow hole in the ground and a heap of combustible material was burned over them. At a later stage the pottery was separated from the fuel by a perforated clay partition, and finally the closed kiln was developed. Firing probably took from two to three days, since the temperature had to be raised and lowered slowly to avoid cracking the vessels. The amount of air in the kiln at the time of firing as well as the composition of the clay body determined the color of the pot. Particularly well-preserved examples of ancient kilns have been found at Serafand in Lebanon.

Israelite pottery differs from modern pottery in that it was not glazed. The preferred mode of decoration was to coat the whole pot or parts of it with a liquid clay or slip. After the pot had dried but before it was baked, it would then be burnished or polished with a rubbing tool of bone, stone, or wood. During the tenth and ninth centuries B.C. burnishing was generally done by hand; afterward burnishing was accomplished as the pot was turned on the wheel. Some ware was painted, although this was not a common practice except for an occasional line of red or black around the shoulder or middle of the pot. A third type of decoration seen on much early pottery was incision or puncture along the rim and neck.

The art of the potter was a difficult one to master. It required knowledge of finding the right raw materials and of the best method of preparing the batch and shaping, decorating, and firing the ware. Traditions of pot making were passed on from generation to generation, an abrupt change in the tradition indicating newcomers on the scene. Potters and their workshops were familiar scenes in every village and town (see Jer. 18:3–4). Eventually, as cities became larger, guilds of potters were established to meet the needs of increased production (see 1 Chron. 4:23).

Most Palestinian pottery was made for utilitarian purposes. Articles in the home included bowls, cups, cooking pots, lamps, jars, pitchers, and juglets, as well as the household oven and huge storage jars. Other items like spindle whorls, buttons, figurines, and toys were also made of pottery. Although essentially functional, the pottery of the biblical period frequently displays excellent craftsmanship and high artistic accomplishment.

Even broken vessels had their use. Potsherds were used as notepaper on which important messages, such as the Lachish Letters, were written. Larger shards were used as braziers to take fire from the hearth or as ladles (see Isa. 30:14). Potsherds may also have been used to scrape oil or dirt from the skin (see Job 2:8). Broken vessels were occasionally repaired in antiquity by drilling holes at the edges of shards and joining them together with some sort of string. Most potsherds,

however, were simply discarded and forgotten, providing the archaeologist of today with invaluable historical clues.

Some Distinctive Features of Palestinian Pottery: The pottery of the late Neolithic period (5500–4300 B.C.) was handmade, of coarse ware, and poorly fired. Its types include saucers, bowls, and storage jars decorated with a burnished red slip, painted triangular designs, or incisions. Pottery continued to be handmade in the Chalcolithic period (4300–3200 B.C.), but the ware is finer and better fired and the forms more advanced. These include V-shaped bowls, goblets, cornet cups, and "churns," decorated by incision or paint. The largest collection of Chalcolithic pottery has been found in Ghassulian and Beer-sheba cultures. In the Early Bronze Age (EB; 3200–2100 B.C.) typical of the first phase (EB I) are forms with ledge handles, high loop handles, or vertical pierced lug handles and wares with gray or red burnish, or band slip or line-group paint. The key diagnostic pottery of the second phase (EB II) is called "Abydos" ware after the site in Egypt where it was first found in first-dynasty tombs and identified as non-Egyptian. The subsequent association of this pottery with Canaan has been very important for correlating the pottery of Egypt and Palestine. Characteristic vessels are pitchers and jars with burnished red slip on the lower half and brown painted triangles and dots on the upper half. Typical of the third phase (EB III) is Khirbet Kerak ware, red- or black-burnished vessels decorated with incised lines. New pottery forms, indicating a new culture, appear in the Middle Bronze Age (2100–1500 B.C.). By 1900 B.C. all pottery was produced on the wheel, which allowed for the development of homogeneous and pleasing forms. Distinctive are the carinated bowls, often burnished over rich dark or cream slip, and graceful large jar forms. The single-spouted open oil lamp came into widespread use at this time. In the Late Bronze Age (1550–1200 B.C.) Palestine was under Egyptian control, and its pottery was influenced both by Egypt and by trade connections with Aegean and eastern Mediterranean civilizations. Bichrome painted ware with friezes of birds, fish, and geometric designs appeared. Imports, mainly of Cypriot and Mycenaean origin, became common and were widely imitated.

Storage jar from the Jordan Valley: Chalcolithic Period (4300-3200 B.C.).

There is marked continuity between the Canaanite pottery of the Late Bronze Age and the pottery of the Iron Age (1200–587 B.C.), including both Israelite pottery and the pottery of other groups. On the other hand, the profound changes brought about in Canaan by the settlement of the Israelite tribes are reflected in some new ceramic elements that eventually developed into a distinctive Israelite pottery. This reached its highest expression in the days of the Divided Kingdom (ca. 918–587 B.C.) when standardization of ware through mass production resulted in shapes that remained virtually unchanged for three hundred years.

The typical Israelite bowl was covered with slip, usually red, inside and over the rim, and on that a band of burnish was rubbed in spiral fashion, beginning in the center and extending over the rim. This is the well-known "ring-burnished" bowl. Evidence of the high standard of the potter's art is nowhere better seen than in the beautiful shape of the ring-burnished water decanter from the eighth and seventh centuries. A popular perfume juglet with one handle is distinctive because of its black color which contrasts with the usual Palestinian red. The large storage jars that could hold about ten gallons each also testify to the expertise of

"Syrian bottle" from a burial cave at Gezer, fourteenth century B.C.

A clay oil lamp from Amka, a town northeast of Acre, is shaped like a schoolmaster unrolling a scroll as he reads; third–second century B.C.

the potter. In the eighth century under the Judean kings royal stamps were pressed into the wet clay of the handles reading *lmlk*, "Belonging to the king." The "Samarian thin bowls" are noteworthy for their eggshell-thin ware and their striking decoration. They had red slip inside and outside or red and yellow slip alternating in bands and were highly burnished.

In marked contrast to the generally unpainted Israelite pottery was the elaborately decorated Philistine pottery of the early Iron Age. The most characteristic features in the decoration are metopes enclosing stylized birds or geometric patterns like friezes of spirals and groups of interlocking circles. The presence of considerable quantities of this distinctive pottery at particular sites is an indication of Philistine settlement or cultural influence or trade.

The conditions of hardship and privation that followed the Babylonian destruction of Judah in 587 B.C. are reflected in the marked decline in the quality of local pottery made during the Persian period (587–332 B.C.). This is also true of the Hellenistic period (332–63 B.C.), characterized as it was by almost constant warfare. In these periods finer wares were imported from the highly specialized workshops of the Greek world. Most notable were the black-figure, red-figure, and black-glazed vessels. The pottery imported from the West was widely imitated, although the Palestinian pottery generally did not succeed in duplicating the superb quality and carefully wrought decoration of the Hellenistic models. An exception is the Nabatean ware found mainly in southern Transjordan but also in the Negeb. This hard, well-fired and beautifully decorated pottery reflects high technical skills and is the most outstanding ceramic accomplishment in the history of Palestine and Transjordan. During the early Roman period (63 B.C.–A.D. 135) pottery manufacturing centers all over the Mediterranean began to produce vessels with the same distinctive shapes and glossy red surface treatment. This *terra sigillata* ware is found in abundance in Palestine. Local potters under the Herods also developed some very fine ware of their own. Recent excavations in Jerusalem have uncovered thin-walled bowls of excellent quality, painted on the inside in stylized floral patterns in red and sometimes in brown or black.

Symbolic Use of Pottery in the Bible: The potter's art provided the biblical writers with many symbols. Perhaps best known is the creation story of Gen. 2:7, which depicts God as a potter fashioning a man from clay. The theme of God, the Master Potter, molding people and nations is a common one (Jer. 18:1–6; Isa. 29:16; 64:8; Rom. 9:20–24). One who argues with God is as foolish as the potsherd who argues with the potter (Isa. 45:9; cf. Rom. 9:20). The smashed vessel symbolizes utter and permanent destruction (Jer. 19:10–11). Human frailty is that of the earthen jar (Lam. 4:2). The pottery oil lamp is a favorite biblical symbol used in a variety of contexts.

poverty. ***See*** Poor.

power, the actual or potential capacity to effect something by virtue of inherent excellence or rightful authority. Power is manifested in the reproductive forces of nature (Gen. 4:12; 49:3), in the physical strength and vitality of human beings (Judg. 16:6; Prov. 20:29), as well as animals (Job 39:11; Prov. 14:4), and in the military prowess of men (1 Sam. 14:52; 2 Sam. 23:8–10). Natural forces exhibit power (Exod. 14:21; Isa. 43:16), as do emotions like love and greed (Song of Sol. 8:6; Isa. 56:11). Various forms of political authority are also a manifestation of power (Luke 7:8; Acts 26:10, 12; Rom. 13:1).

More mighty than any of these, however, is God, who is the ultimate source of all power (Pss. 66:7; 147:5; Jer. 10:6; Job 36:22). God's power is manifested in nature (Ps. 65:6–7; Jer. 10:12) and history, especially in God's act of redemption at the Exodus (Exod. 15:6, 13; 32:11; Deut. 3:23). Compared to God's power, human power pales into insignificance (Pss. 33:16–17; 147:10–11). God gives power to the faint (Isa. 40:29), and human beings may take refuge in God's strength (Ps. 28:7–8; Jer. 16:19; Luke 1:49). According to the NT, the power of God was made manifest in the life and deeds of Jesus (Mark 6:2, 5; Luke 4:14, 36; 5:17; 6:19). His followers were empowered by the Holy Spirit (Acts 1:8; 4:33; Rom. 15:19). Even the proclamation of the gospel of Jesus Christ was seen by Paul as a manifestation of divine power (Rom. 1:16; 1 Cor. 1:18). Finally, the NT also speaks of cosmic powers at work in the world, who stand in opposition to God, but whose power has already been broken and subordinated to the power of God made manifest in Christ (Rom. 8:38; 1 Cor. 15:24; Eph. 1:21; Col. 2:15; 1 Pet. 3:22). ***See also*** Dominion. W.E.L.

praetor (pree´tuhr), a senior Roman magistrate of senatorial rank. Praetors served as judges, commanders in the army, managers of the senate treasury, supervisors of the roads, of grain distribution, or of public works, or as governors of provinces. A person was eligible for praetorship at age thirty if he had served in the lower offices of the *cursus honorum* (Lat., "career of honors," i.e., a public career). It was usual for an individual to have held three appointments as praetor before becoming a consul. Jesus was scourged in the praetor's residence ("Praetorium") by Roman soldiers (Mark 15:16–20).

Praetorian (pri-tor´ee-uhn; KJV: "palace") **Guard, the,** the probable meaning of "praetorium" in Phil. 1:13 (cf. also "those of Caesar's household" in Phil. 4:22). It refers either to a select unit of the Roman army that served as imperial bodyguards or simply to the military (and other) personnel attached to a praetorium (the official residence of a Roman official). ***See also*** Architecture; Gabbatha.

praetorium (pri-tor´ee-uhm). ***See*** Architecture; Gabbatha.

praise, to glorify, or the act of glorifying God, frequently in communal worship (Ps. 113; Luke 1:64; Acts 2:47; Rev. 19:5). The Hebrew term for the Psalms translates as "Praises." ***See also*** Hallelujah; Psalms, The; Worship.

prayer, the act of petitioning, praising, giving thanks, or confessing to God; it is expressed by several different words in both the OT and the NT. Prayer can be individual or corporate, audible or silent. It is conditioned by the biblical understanding of God as a personal being who hears the prayers of his people (1 Kings 9:3; Pss. 34:15; 65:2; Matt. 7:11; 1 John 5:15).

In the OT: The earliest instances of prayer in the OT are conversations between persons and God. Such conversations take place between God and Adam (Gen. 3:9–12), Abraham (Gen. 15:1–6), and Moses (Exod. 3:1–4:17). It is said that God spoke to Moses "face to face, as a man speaks to his friend" (Exod. 33:11). Kings (1 Sam. 23:2–4; 1 Kings 3:5–14) and prophets (1 Sam. 3:4–9; Isa. 6:1–13; Jer. 1:4–19) are portrayed as conversation partners with God (frequently the divine presence is by way of visions or dreams).

The forms of prayer in the OT include petitions for guidance, requests for divine help, intercessions, praise and thanksgiving, and confession. Prayers for guidance are offered by Isaac (Gen. 24:12–14), Moses (Num. 11:11–15), and most notably by Solomon, who asks for wisdom (1 Kings 3:5–14). Requests include prayers for the necessities of life (1 Kings 8:22–53; Prov.

Jesus praying in the garden at Gethsemane (Luke 22:39–46); sixth-century mosaic at San Apollinare in Classe, Ravenna, Italy.

30:8), deliverance from enemies (Gen. 32:11; Pss. 31:15; 59:1), and retribution (Judg. 16:28; Ps. 137:7; Jer. 17:18). Intercessions are offered by the patriarchs and Moses (Gen. 18:22–32; Exod. 5:22–23; 32:11–13), David (2 Sam. 12:16–17), and various prophets (Amos 7:1–6; Ezek. 9:8; 11:13). While such intercessions are generally for the whole people, there are instances of intercessions for individuals (1 Kings 17:20–21; 2 Kings 4:32–33) and Gentile governmental authority as well (Jer. 29:7; Ezra 6:10). Praise and thanksgiving are offered to God for his steadfast love (Pss. 100:4–5; 108:3–4), his creation of the world, his rule over it, and his benevolent care for all that he has made (Pss. 145–150). Confession is prescribed for the annual Day of Atonement (Lev. 16:21), but it can be made whenever an offense against God has occurred. Confession is usually made by the confessor on behalf of the people (Exod. 32:31–32; Neh. 9:16–37; Dan. 9:20) or by the community (Judg. 10:10), but there are instances of individual confession (2 Sam. 24:17; Ps. 51). Confession is made in the certainty of God's promises to forgive (Lev. 26:40–45; Isa. 1:18; Mic. 7:18–19).

The OT assumes that prayer can be offered at any time and place. There are, however, prescribed times: confession is made on the Day of Atonement; hours are set for daily prayer (Dan. 6:10); and the Sabbath and other festivals are days for prayer. The Temple was a place of prayer, as were the synagogue and home in the postexilic era. The prophets taught that prayer is more than a matter of ritual; it must be offered with integrity, pure motives, and only within the context of having attended to ethical concerns (Isa. 1:15–17; Hos. 6:6; Amos 5:21–24; Mic. 6:8; cf. Ps. 24:3–6).

In the NT: Jesus is portrayed as a model and instructor in prayer in the NT, especially in Luke's Gospel, where he prays at decisive moments: his baptism (3:21), the calling of his disciples (6:12), transfiguration (9:29), Gethsemane (22:39–46), and crucifixion (23:46). The major prayers attributed to Jesus, however, are in Matthew (6:9–13, the Lord's Prayer; cf. Luke 11:2–4) and John (chap. 17, the High Priestly Prayer). Jesus teaches that prayer should not be ostentatious and verbose but in private and with brevity (Matt. 6:5–8), earnest (Luke 11:5–13), in faith (Mark 11:23–24), and in a forgiving spirit (Mark 11:25). God is to be addressed as "Father" (Matt. 6:9; 7:11).

Within the early church, prayer was addressed directly to God (1 Cor. 1:4; Col. 1:3) or "through" Christ (Rom. 1:8). That prayer should be "through" Christ is based on the prior concept that God's grace and love come "through" Christ (Rom. 1:5; 5:1; 8:39) and that the reigning Christ is Lord and is accessible as mediator (Rom. 10:9–13; 1 Cor. 1:9).

As in the OT, the prayers of the NT are of several kinds. Paul frequently gives thanks for the faith and witness of those to whom he writes (Rom. 1:8–9; 1 Cor. 1:4; Phil. 1:3–5), and worship regularly includes prayers of thanksgiving (1 Cor. 14:16–17) and praise (Acts 2:47). Prayers are to be offered for daily needs (Matt. 6:11; 7:11; Phil. 4:6) and for the healing of the sick (James 5:13–16). Intercessions are made by Paul for his congregations (Rom. 15:13; Phil. 1:9–11), and he asks for their intercessions (Rom. 15:30–32; 2 Cor. 1:11; 1 Thess. 5:25). Intercessions are to be made for all persons, including rulers, that a peaceable life may be enjoyed by all (1 Tim. 2:1–2). There are prayers for forgiveness (Luke 18:13; cf. Matt. 6:12) and guidance (Acts 1:24–25; 6:6; 13:2–3).

Christ and the Spirit take on special roles in the prayers of the NT. Prayers are offered directly to Christ (Acts 7:59; 1 Cor. 1:2), although not frequently. The language of the "Kyrie" ("Lord, have mercy") is found at Matt. 17:15 and 20:30–31 (cf. 8:25), and the prayer "Maranatha" ("Our Lord, come!") appears at 1 Cor. 16:22 (cf. Rev. 22:20); both are addressed to Christ. Not only, however, are prayers offered "through" Christ or to him; Christ also prays as intercessor for the saints (Rom. 8:34; Heb. 7:25). Likewise, the Spirit's role in prayer is manifold. Prayer is "in the Spirit" (1 Cor. 14:15; Gal. 4:6; Phil. 3:3), who prompts and guides believers in prayer. On the other hand, the Spirit intercedes for believers (Rom. 8:26–27), because the Spirit knows their weaknesses and the mind and will of God (Rom. 8:27; 1 Cor. 2:10–11).

Prayer is not always answered in the way expected (see 2 Cor. 12:7–9). The picture that emerges from a survey of the biblical materials is that prayer is to be made to God in faith and expectation, but, in the NT, through Christ and in the Spirit. Prayer is not an act of attempting to manipulate God but a means of giving God thanks and praise, calling upon him for one's daily needs and the care of others, and asking that his will be done and that his kingdom come. ***See also*** Atonement, Day of; Feasts, Festivals, and Fasts; Holy Spirit, The; Lord's Prayer, The; Maranatha; Psalms, The; Sabbath; Synagogue; Temple, The; Worship.

Prayer of Manasseh, the, a penitential prayer composed by a pious Jew sometime during the second or first century B.C. It is typical of Jewish prayer during the intertestamental period (ca. 160 B.C.–A.D. 45; cf. Tob. 3:2–6, 11–15; Jth. 9:2–14; Rest of Esther 13:9–11; 14:3–19; Song of the Three Children 3–22), yet goes beyond the

typical to provide perhaps the finest example of the genre. Its parts include:

I. Invocation of God (v. 1)
II. Ascription of praise, mentioning both God's wrath and his mercy to sinners (vv. 2–8)
III. Confession of sin (vv. 9–10)
IV. Supplication for God's pardon (vv. 11–15a)
V. Doxology (v. 15b).

The prayer was suggested by 2 Chron. 33:12–13, 18–19, where the idolatrous king, Manasseh, is said to have prayed to God for forgiveness, and its intended audience may have been Jews who had broken the first or second commandment (Exod. 20:1–6) in responding to the lure of Hellenistic culture. The theme is the efficacy of repentance in securing God's pardon for the wicked. In speaking of guilt as a weight or burden (v. 10), the work contains perhaps a hint of the Hellenistic theme of the psychological self-punishment of the guilty (cf. Wisd. of Sol. 17:1–21; Philo *Flaccus* 162–180). The metaphors for this experience seem also to reflect the details of the punishment of the fallen angels in *1 Enoch* 9:4, 11–12; 13:5; 54:1–5; 56:1–4—the petitioner is weighed down by iron fetters, cannot lift his face to heaven, and asks God not to condemn him to the depths of the earth (vv. 9–10, 13).

Because of its brevity, the Prayer of Manasseh cannot be dated with any certainty, nor can its place of composition or original language be easily fixed. It is not found in the Hebrew Bible, and is attested only in the third century A.D. in Christian sources. Appearing in only a few Septuagint (LXX) manuscripts, generally appended to the Psalms, the Prayer of Manasseh was apparently unknown to the Bible scholar Jerome in the fourth century B.C. Protestants include it among the Apocrypha. It was not present in the edition of the Vulgate declared canonical by the Council of Trent and, when printed in Catholic Bibles, it is placed with 1 and 2 Esdras in an appendix to the NT. It is considered canonical in Eastern Orthodoxy. ***See also*** Apocrypha, Old Testament; Prayer. D.W.S.

preaching. 1 As a mode of communication, the translation of a number of Hebrew and Greek words. In the OT, "preaching" refers to an announcement, the content of which is supplied by the context (Jon. 3:2; Neh. 6:7), but it also translates a word meaning to announce *good news* (Isa. 40:9; 52:7; 61:1). This latter word, in its Greek form, became a favorite of the early Christian community. But the act of preaching cannot be confined to the occurrence of certain words. The prophets were those who spoke for God, and their oracles are sermonic. In 2 Pet. 2:5, Noah is called a preacher of righteousness. In the NT, preaching is explicitly or implicitly conveyed by many terms. The two most commonly used are the word from which we get "evangelize," meaning "to announce good news" or "to preach the gospel" (Matt. 11:5; Rom. 1:15), a term that carries within it both mode and content, and the word meaning "to herald" or "to make an authoritative proclamation" (Matt. 3:1; Acts 10:42; 2 Cor. 4:5). Preaching is also described by more modest words, such as announcing (Luke 9:60), speaking (Acts 20:7), or simply telling (Mark 2:2). In addition, there are terms that carry a special emphasis: witnessing (Acts 2:40), exhorting (Rom. 12:8), and prophesying (1 Cor. 12:28).

The Christian movement was launched and nourished by preaching. In the tradition of the prophets, both John the Baptist (Mark 1:7) and Jesus (Luke 4:18) came preaching. The Twelve continued this function (Acts 5:42), and Paul understood his primary task was to preach the gospel (1 Cor. 1:17). While certain persons were designated as evangelists (Acts 21:8; Eph. 4:11), the whole church shared in the proclamation of the gospel (Acts 8:4).

2 As a term designating content in early Christianity, the good news, the gospel. At times, the content of the good news is spelled out. According to Luke 4:18–19, Jesus preached good news to the poor, release to captives, sight to the blind, liberty to the oppressed, and the acceptable year of the Lord. Paul's gospel consisted of the death, burial, resurrection, and appearance of Jesus Christ according to the Scriptures (1 Cor. 15:3–8). Portions of sermons in Acts (2:16–36; 3:12–26; 13:16–41; 17:22–31) reveal the content of preaching in some early churches. In the opinion of many scholars, the four Gospels contain the core of the content not only of the preaching of Jesus but also of the Christian communities. The Letter to the Hebrews, called by the writer a "word of exhortation" (13:22), is a sermon and represents a style of preaching (citing a text, interpreting and applying it) that became widespread after the second century. In the NT, however, most references to preaching do not elaborate but refer to the content simply by such terms as the gospel (Mark 1:14), the proclamation (Rom. 16:25), the kingdom of God (Luke 9:2), Christ (Phil. 1:15), Christ crucified (1 Cor. 1:23), or the word of God (Acts 13:5).

3 An act whose purpose in the NT is "repentance and forgiveness of sins" (Luke 24:47), for God does not desire that any should perish (2 Pet. 3:9). This word of God's love for all peoples had been in the preaching of the great prophets (Isa. 2:1–4). Preaching also served to edify and instruct the believers. While distinctions between preaching and teaching are made (Matt. 9:35; Rom. 12:6–8), they can be exaggerated by modern interpreters to the detriment of both. ***See also*** Gospel; Gospels; Teaching. predestination, a theological affirmation that takes up and extends the affirmations of election, providence, and covenant. Throughout the

centuries of religious reflection and debate, the notion of predestination has tended to become a questionable category. To some, it suggests a God who is unfair, capricious, and arbitrary (cf. the handbooks of dogmatic theology). But its use in the Bible as a whole does not support the (mistaken) notion that God plays favorites, blessing certain of his creatures while cursing others. Whereas providence emphasizes a divine ordering and regulation of the world and history toward a positive goal, predestination emphasizes a divine predetermination of human destiny in conformity with an eternal plan. God "foreordains" according to his "design and purpose"; he "chooses" and "elects" according to his "counsel" and "will" (e.g., 2 Chron. 19:7; cf. Rom. 11:15; Prov. 16:4; Rom. 9:18, 20–24; Gen. 50:20).

Sovereignty of God: For all such terms, the notion of the sovereignty of God is a key starting point. God alone is the Creator and sustainer of all that is; God is the sovereign Lord who designed the standards for life and directs all things toward their appointed destiny; God alone is wise enough, righteous enough, and loving enough to determine what shall become of his creation. God does what he wills (e.g., Ps. 115:3; Isa. 45:5–7; 46:8–11; Rom. 9:11, 15; Eph. 1:11).

In the OT, God chooses the Hebrew people as his own covenant people (e.g., Deut. 7:6–10); he chooses individuals to carry out his will and purpose (e.g., Judg. 2:16; 1 Kings 18:1); he raises up prophets to proclaim his word (Isa. 6:1–13; Jer. 1:1–2; Amos 3:6–8); he uses nations and events of history to execute his judgment and accomplish his goals (Isa. 7:18–19; 45:1–4). The worlds of nature and of history are under God's control (Isa. 45:5–7; Gen. 3:17–18; Rev. 21:1).
